Govt. anti-trust suit against RCA-NBC over NBC-Westinghouse station swap (Vol. 12:49, 51, 13:18) moved another step this week with hearing on motions in which Philadelphia Federal Judge Kirkpatrick took under advisement a request by RCA-NBC that Govt. be required to supply minutes of Philadelphia Federal Grand Jury which looked into the station sale. Two other motions were argued: (1) Govt.'s objections to some RCA-NBC interrogatories; judge ruled that some would have to be answered, others deleted, splitting about 50-50. (2) RCA-NBC objection to tremendous volume of documents sought by Govt.; judge indicated compromise would be to cut down magnitude of RCA-NBC's file search. Court set June 28 as date for pre-trial hearing.

Better TV-radio relations with newspaper reporters are sought by Radio-TV News Directors Assn. in 2 "constructive steps" announced May 15 following board meeting in Chicago. "Greatly concerned over recent reports of ill-feeling on the part of a few newspapermen in covering stories along with radio & TV reporters" (Vol. 13:15), RTNDA (1) set up professional standards committee to "seek fair & equal treatment for all news media" and (2) invited American Society of Newspaper Editors to cooperate "in preventing or stopping incidents." Sam Zellman of KNXT, Los Angeles, is committee chairman.

TV competition is too much for *Picture Post*, British weekly magazine which folds June 1 after 19 years of publication. Announcing suspension, Hulton Press Ltd. stated: "The demands of the public are changing rapidly. Thus TV is doing so well much of the work which we pioneered in *Picture Post*." Patterned after U. S. magazines, *Picture Post* reached 1,750,000 circulation in 1939, is down now to 738,000.

SUMMARY-INDEX OF THE WEEK'S NEWS — May 25, 1957

PAY-TV TESTS DELAYED as FCC asks industry for specific plans by July 8; both proponents & opponents find sustenance in action (p. 1).

FEDERAL AID TO TV TEACHING has little chance now; Magnuson bill for \$50,000,000 govt. grants to equip stations viewed dimly by NARTB (p. 2).

STATION OWNERS PREDICT record TV year with 6% gain in revenues, 3% hike in costs. First quarter boost in network & spot shown by statisticians (p. 3).

ABC-TV BILLINGS for next season ahead of fall 1956 already, Goldenson says; Kintner's contributions to network defended at stockholder meeting (p. 4).

PAYOFF FROM TV now being reflected in movie balance sheets, film moguls praising medium as additional (and perhaps some day principal) money source (p. 6).

CELLER NETWORK REPORT toned down as subcommittee makes progress toward compromise; BMI and option time sections still in dispute (p. 6).

FULL SWITCH TO 110-DEGREE tubes planned by RCA, Admiral, GE & Sylvania. Pickup seen in 17-in. bulb orders as 14-in. portable loses favor (p. 9).

GE & HOTPOINT start 1958 TV sets to market, feature slim look, 110-degree tubes. Gleanings of other manufacturers' plans (p. 10).

RETMA BOARD unanimously approves changing name to Electronic Industries Assn.; election of new dept. & div. directors announced (p. 12).

NEW CERAMIC "PYROCERAM" developed by Corning could find TV use in transparent picture tube screens; use in transmitting tube envelopes seen (p. 8).

SATELLITES figure prominently among new starters, KBTX-TV, Bryan, Tex. becoming 500th operating station. Canadian activity mounts (p. 7).

NEW COMMISSIONER prospects for FCC include attorney George S. Smith, VA deputy administrator John S. Patterson. Others fading rapidly (p. 14).

FCC DELAYS TOLL TV TESTS, WANTS SPECIFICS:

Both proponents & opponents of pay TV drew some measure of comfort from FCC's "notice of further proceedings" issued May 23. What Commission said, basically, is that it believes a test of pay TV should be conducted to determine whether it should be adopted commercially. However, it went on, it's fearful of authorizing tests until it knows more precisely what the tests would be like. Hence, it asks industry to supply by July 8 specific information on 11 subjects relating to tests. (Full text of FCC's Notice is included herewith as Special Report to all subscribers.)

Also of significance is Commission's conclusion that it has "statutory authority" to approve toll TV "if it finds that it would be in the public interest to do so" -- but it leaves for the future a decision on the very touchy subject of whether subscription TV is "broadcasting," "common carrier" or what-have-you.

Proponents of pay TV were happy with FCC's assertion that an "adequate trial" is "indispensable to a soundly based evaluation" and its conclusion that it has the legal authority to give systems go-ahead. They were disappointed with fact a trial wasn't authorized with finality or promised with certainty.

Skiatron pres. Arthur Levey, for example, admitted he'd hoped for more speed from Commission but said he's sure comments filed will persuade the Commission to approve tests. Another proponent stated: "It's a step in the right direction. We're pleased that the Commission says it has legal jurisdiction. But it isn't all we wanted -- by any means." Still another said: "This commits the FCC to a test; it can't back down from that."

Opponents would have preferred to see the Commission shelve whole irritating topic but they claim this week's action delays everything at least a year and that plenty of additional delays will develop.

They point out that July 8 deadline is much too short; that time for filing reply comments must be given; that Commission vacations all of Aug.; that a new member and chairman will be on hand after June 30; that wired pay system will have

provided some answers by fall, taking edge off telecast toll TV; that proponents have yet to show they have any programs to offer, if they do start tests.

NARTB's reaction, as given by spokesman: "FCC was wise in not taking precipitous action. It recognized the need for more information. We still question its authority to adopt pay TV and we still believe pay TV isn't in the public interest."

Networks made no public statements, but their various spokesmen made it clear they like FCC's cautious approach, can't see possibility of ultimate approval.

Commission action is a victory for Chairman McConnaughey. He obtained a unanimous compromise without getting anyone really mad -- as he prepares to leave Commission June 30 for private law practice.

* * * *

Our own estimate of situation is that pay TV has had a setback. We believe stock market was a good barometer. Zenith rose only 2 points to 118, while Skia-tron rose 1/2 point to 5% May 24, day after FCC action.

Another excellent indication, we believe, is that Rep. Harris (D-Ark.), chairman of House Commerce Committee, is understood to be quite pleased with Commission action -- and he doesn't want subscription TV. Same day it issued call for comments on tests, FCC replied to Harris' sharp questions (Vol. 13:17) by stating it couldn't answer them satisfactorily until it got more information from industry.

These are in addition to our constant feeling out of Commission on the topic -- which has always given us impression majority doesn't favor pay TV. -- (AW)

GOVT.-FINANCED TV FOR SCHOOLS UNLIKELY: Prospects for Federal aid to educational TV, as proposed in unprecedented \$50,000,000 bill by Chairman Magnuson (D-Wash.) of Senate Commerce Committee (Vol. 13:20) looked remote and dim this week.

Sprung unexpectedly on Senate floor May 17, Magnuson plan for \$1,000,000 grants to state authorities, Hawaii & Alaska for TV school equipment stirred no immediate enthusiasm even among ardent educational TV advocates. It was certain to have strenuous opposition from broadcasting industry. And Congress hasn't yet accepted broad principle of direct Federal aid to education itself.

Magnuson himself asked quick approval of proposal (S-2119) in follow-up speech in Senate May 22. He called for "earliest possible" hearings by his Committee, "very early vote by Senate on measure to help 48 states & 2 territories utilize 250 TV channels reserved by FCC for educational purposes."

Describing it as "modest proposal," Magnuson told Senate: "I am convinced that unless the Federal Govt. takes the initiative, offers the impetus, and contributes to the cost, the great educational potential from these channels will be lost."

Formal comment on \$50,000,000 plan was withheld by 2 organizations directly affected -- Joint Council on Educational TV and NARTB. But exec. director Ralph Steetle of JCET, which has never sought such Federal aid, told us that bill "seems to be hastily drawn." NARTB pres. Harold E. Fellows said with distaste: "It puts the Govt. into broadcasting, doesn't it?"

"We are as surprised as anybody" by sudden introduction of Magnuson proposal, JCET's Steetle told us. As it stands, he said, plan "only fits existing state TV educational authorities in a few places" -- notably Ala. & Okla., which have own statewide stand-by systems. Bill requires states & territories to underwrite TV operating costs, furnish facilities for "4 or 5" stations Magnuson thinks could be equipped with govt. grants of \$200,000-\$250,000 per unit.

"I've never known broadcasters to approve of that," NARTB's Fellows said, meaning any such injection of govt. money into non-military stations.

* * * *

Commerce Committee had made no move by week's end to schedule any hearings on bill despite Chairman Magnuson's advocacy -- and despite indications that Senate Democratic Policy Committee had direct hand in writing it.

TV measure was drafted for Magnuson by staff director Gerald W. Siegel of Democratic Policy Committee, chaired by Majority Leader Johnson (D-Tex.), whose wife is 94.4% owner of KTBC-TV, Austin; 50% of KRGV-TV, Weslaco; 29% of KWIX-TV, Waco.

Johnson is known to favor the bill. But Policy Committee sources said there is no intention to put it on legislative agenda now.

Meanwhile, Congressional mood on idea of Federal aid to education was shown by halting progress of cut-down \$1.5 billion general school construction bill toward probable defeat in House -- despite President's "full support." -- (WHB)

BROADCAST BUSINESS GOOD, GETTING BETTER: All of the industry's accepted barometers indicate beyond doubt another record year for TV -- not only in total billings but in average sales per station -- and continued pickup in radio, despite the unusual slowness of some big network sponsors in making up minds about next season.

Perhaps most significant indicator is NARTB survey of some 200 TV and 600 radio stations which showed that the average TV station anticipates 6% revenue gain this year over last, with 3% increase in expenses, while radio operators forecast 4% boost in revenues and only 1% boost in operating costs.

Almost 80% of TV stations look for some improvement in sales, NARTB said, with about two-thirds expecting higher costs. TV stations in markets of less than 100,000 population expect 12% revenue gain, larger stations predicting 4%.

Breaking down TV revenue predictions, stations expect 9.7% increase in time sales from networks, nearly 7% boost from national & regional spot and 4% hike in local revenues. In radio it was: From networks, no significant change; national & regional, up 5%; local, up 3%. Neither network-owned outlets nor stations not on air all of 1956 were included in survey.

Reliable indicator of advertiser spending, Printer's Ink National Advertising Index, shows total advertising up 3% in first quarter 1957 over last year's first quarter -- with network TV expenditures (time & production) up 8% and network radio piling up whopping 12% increase, biggest of any medium.

Network radio & TV showed biggest gains among the media for month of March -- up 9% & 8% respectively from March 1956, though network radio was down 8% from Feb. 1957, while network TV showed 3% gain over February.

In spot TV field, TvB released quarterly report, showing national & regional spot spending of \$116,935,000 on 321 stations during first quarter. Taking the 255 stations which reported in first quarter 1956 & first quarter 1957, TvB found hike of 11.7% in spot spending on gross one-time rate basis. TvB pres. Norman E. (Pete) Cash pointed out that 23 companies spent more than \$1,000,000 on spot TV during the quarter, compared with 15 in same 1956 period.

(List of top 100 national & regional TV spot advertisers and their expenditures, together with product classification breakdown of spot advertisers, is available from TvB at 444 Madison Ave., N.Y. 22.)

Investigation of FCC "leaks" is definitely planned by Senate investigating subcommittee headed by Sen. Jackson (D-Wash.) which is still making headlines with its CAB probe. Subcommittee counsel Don O'Donnell said he already has conferred with ICC & FCC general counsel in preparation for future hearings involving those agencies, but no date or timetable has been set. He laughingly denied a published report that subcommittee planned investigation of gyrations of subscription-TV stocks. "What's subscription TV?", he asked. Sen. Jackson, meanwhile, proposed criminal penalties for persons giving or receiving unauthorized information from govt. regulatory agencies and endorsed proposal to isolate members of CAB, ICC, FCC, etc. from "pressure" about pending cases by putting them in category similar to judges.

Suit against 23 TV film distributors and San Francisco's KPIX & KRON-TV has been filed by KNTV, San Jose, in California Superior Court seeking \$500,000 damages and asking injunction banning distributors from refusing to deal with station. Suit charges San Francisco stations and the distributors with restrictive practices in refusal to sell it films because of alleged "overlap" of San Francisco & San Jose service areas.

Ranks of the "reluctant 7" independent TV programmers from whom financial data was subpoenaed by FCC network study committee (Vol. 13:17-18, 20) were thinned this week after chief hearing examiner James D. Cunningham ruled that subpoenas were legal and relevant. Three of the firms capitulated, indicating that they planned to respond to subpoena. They were Entertainment Productions Inc., Official Films and TPA. The others—Screen Gems, Ziv and MCA-TV and its subsidiary Revue Productions—immediately prepared petitions for reconsideration of examiner's decision. The 4-member Association of TV Film Distributors, which presented anti-network testimony to network study group, was split down the middle—2 of its members (Official Films & TPA) abiding by decision, the other 2 (Screen Gems & Ziv) choosing to fight.

Pure science is neglected for practical advances in engineering, RCA chairman Brig. Gen. David Sarnoff said May 22 at Founder's Day at Dropsie College for Hebrew & Cognate Learning, Philadelphia. He said result is serious lag between fundamental knowledge & application such as in radio, where "we are constantly having to use frequencies before we know their characteristics." Sarnoff received honorary doctor of laws degree.

ABC-TV NETWORK billings for 1957-58 season already exceed those at the start of 1956-57 season, AB-PT pres. Leonard H. Goldenson told stockholders in New York this week in a meeting which was enlivened when an emissary from NBC exec. v.p. Robert Kintner read a statement intended to set record straight on the former ABC president's contributions to third network.

Goldenson expressed hope that ABC-TV would be able to reach 85% of all TV homes live by next fall—compared with last fall's 76% coverage—on basis of expected operation of new stations in Boston, Miami and Pittsburgh.

Attending meeting and holding Kintner's proxy was attorney Edward S. Greenbaum, who made these points: (1) ABC's profits (as separate from other AB-PT divs.) hit new high in 1956. (2) Sales of prime evening time at time of Kintner's resignation totaled 19½ hours weekly, a record for the company. (3) Lower revenues from *Mickey Mouse Club* resulted from joint Goldenson-Kintner decision to double guarantee to Walt Disney Productions. (4) "It would appear that the surprisingly poor showing in the first quarter of 1957 [Vol. 13:16] does not result from sales and policies during the time when Mr. Kintner was president," but from later cancellations, lower sales by ABC's o-&o stations and higher operating expenses.

Radio station sales reported this week: KFXD, Nampa, Ida. by Frank E. Hurt & Son Inc. (Edward Hurt, pres.) for \$277,000 to E. G. Wenrick Bestg. Co., 51% owned by E. G. Wenrick (also pres. of KBOE, Oskaloosa, Ia.), 49% by KFXD mgr. Kenneth Kilmer . . . WMEX, Boston, by Northern Corp. (Wm. S. Pote, pres.) for \$215,000 to Philadelphia adv. agency owners Robert S. Richmond (holding 85%; also owner of WPGC in Washington, D. C. area) and brother Max E. Richmond (15%) . . . KLER, Lewiston, Ida. by Cole E. Wylie for \$160,000 to owners of local daytimer KOZE (John M. Matlock, 60%, Eugene A. Hamblin, 40%) . . . WQOK, Greenville, S. C. by Albert T. Fisher and George Speidel III (also owners of WPAL, Charleston & WOIC, Columbia, both S. C.) for \$125,000 to James A. Dick, also owner of WIVK, Knoxville . . . WMBH, Joplin, Mo. by D. J. Poynor to Don O'Brien (70%) and Herbert Lee (30%)—Lee also holding 70% of WKTY, La Crosse, Wis., in which O'Brien has 30%. Brokers: KFXD, Hugh Norman & Assoc.; WQOK, Blackburn & Co.; WMBH, Allen Kander & Co.

Sale of WTVD, Durham, N. C. (Ch. 11) to new Durham TV Co. Inc., controlled by owners of WCDA, Albany, N. Y. (Ch. 41) for \$1,621,800 (Vol. 13:14) was approved this week by FCC. New owners are headed by Frank M. Smith, also pres. of WCDA, controlled by Lowell Thomas interests. Major selling principals—Harmon L. Duncan and wife (12.5% each), J. Floyd Fletcher (24.9%) and Durham radio WDNC (25%)—retain minority interest. Duncan and Fletcher are to remain as co-gen. mgrs.

CP for KDHS, Aberdeen, S. D. (Ch. 9) is being sold by Joseph E. McNaughton interests, publishers of *Effingham* (Ill.) *News* and *Pekin* (Ill.) *Times* for \$2447 out-of-pocket expenses, according to application filed with FCC. Buyer is John Boler, operator of North Dakota's KBMB-TV, Bismarck (Ch. 12); KCJB-TV, Minot (Ch. 13); KXJB-TV, Valley City (Ch. 4).

West coast broadcaster-publisher Sheldon F. Sackett has purchased defunct *Portsmouth* (Va.) *Times* for \$125,100, plans to resume publication. He owns radio stations KOOS, Coos Bay, Ore.; KVAN, Vancouver, KROW, Oakland; CPs for KOOS-TV (Ch. 16) & KVAN-TV (Ch. 21); *Coos Bay Times*.

Goldenson replied that he had not attributed earnings decline to Kintner, who resigned because of "policy differences." It was officially disclosed that company was paying Kintner about \$230,000 for his contract, which runs until 1960. Kintner made \$100,000 a year as president of ABC.

In other subjects covered, Goldenson: (1) Said ABC-TV definitely plans to move into live daytime programming June 1. (2) Expressed optimism that current network investigations by Justice Dept., FCC & Congress "will not materially alter the character of current broadcast operations." (3) Assailed pay TV as potential threat to viewer which would siphon off good free programs. (4) Conceded that "much remains to be done to rebuild the position of network radio." (5) Revealed that subsidiary Am-Par Pictures will release "the first of several moderate budgeted pictures" next month.

As to other subsidiaries, he said Am-Par Records has shown "substantial increase" in volume this year, that Disneyland Park (about one-third owned by AB-PT) is also currently running ahead of last year. In electronics, 2 companies in which AB-PT has interest—Technical Operations Inc. & Microwave Associates—are now operating in new plants in Burlington, Mass., industrial area, and Wind Tunnel Instrument Co., partly owned by AB-PT, will move to same location this summer.

Formal transfer by Consolidated (Bitner) of 3 TV & 3 radio stations in midwest to Time Inc. in \$15,750,000 deal (Vol. 13:16) was completed May 22 in N. Y. Stations (WTCN-TV & WTCN, Minneapolis; WFBM-TV & WFBM, Indianapolis; WOOD-TV & WOOD, Grand Rapids) will be operated by TLF Broadcasters Inc., newly formed Time Inc. subsidiary. Phil Hoffman, shifted from Time's KLZ-TV & KLZ, Denver, is v.p. & gen. mgr. of Minneapolis stations, succeeded as KLZ-TV mgr. by Jack Tipton, by Lee Fondren as KLZ mgr. Eldon Campbell is v.p. & gen. mgr. of WFBM-TV & WFBM. Willard Schroeder continues as pres. & gen. mgr. of WOOD-TV & WOOD.

Canadian TV applications to be considered by CBC Board of Governors at June 25 meeting in Ottawa: CHCA Television Ltd. for Ch. 6, Red Deer, Alta.; radio CHOV, Pembroke, Ont. (E. Gordon Archibald, pres.) for Ch. 5 there; radio CKBL, Matane, Que. (Rene Lapointe, managing director) for Ch. 9 there; Henri Audet for Ch. 13, Three Rivers, Que.; radio CKBI, Prince Albert, Sask. (E. A. Rawlinson, pres.) for Ch. 5 there; Wm. D. Forst for Ch. 5, Swift Current, Sask.; CKCO-TV, Kitchener, Ont. (Ch. 13) for power increase from 31.4-kw to 275-kw.

Commenting on possible acquisition of WATV, Newark, Metropolitan Educational TV Assn., N. Y. states: "Within the last few weeks it has become apparent that there is a strong possibility that META, with adequate support from individuals, business, industrial & civic groups, and foundations may well be able to acquire the station outright, provided adequate financing can be arranged, probably not to extend over more than a 5 years' period."

Sale of radio WAPL, Appleton, Wis. by Gerald A. Bartell family (owners of WMTV, Madison, Wis. & 4 AMs) for \$100,000 (Vol. 13:16) was approved this week by FCC. Buyers are station mgr. Miss Connie Forster (40%), attorneys Karl Baldwin & Lester Chudacoff (20% each) and R. P. Beelen (20%).

Negotiations by Harold F. Gross interests to purchase WDAF-TV, Kansas City (Ch. 4) & WDAF from *Kansas City Star* remained in "discussion" stage this week. Asking price for properties reportedly is \$10-\$12,000,000 (Vol. 13:16). Gross heads highly successful WJIM-TV, Lansing (Ch. 6) & WJIM.

Personal Notes: L. Byron Cherry promoted to v.p.-finance & management services, CBS Inc. . . . Wm. S. Morgan Jr., ex-radio KLIF, Dallas, where as gen. mgr. he promoted "Win a Million," "Wheel for a Day," "Mystery Voices" & \$50,000 treasure hunt contests, elected ABC Radio v.p. in charge of programming . . . Wm. Froug resigns as CBS Radio v.p. in charge of programming, Hollywood, to join Screen Gems exec. staff to create & produce new projects . . . W. Thomas Dawson, from WBBM-TV, Chicago, named sales promotion mgr. for CBS-TV Spot Sales . . . J. Robert Kerns, Storer Bestg. Co. v.p., named managing director of WPFH, Wilmington; Lionel Baxter, from radio WBRC, Birmingham, managing director of radio WIBG, Philadelphia . . . Jack McGrew promoted from commercial mgr. to station mgr. of KPRC-TV, Houston . . . W. K. Hoyt, publisher of *Winston-Salem Journal* and *Sentinel*, elected pres. of Piedmont Publishing Co., owner of WSJS-TV & WSJS, succeeding ODM director Gordon Gray, who was named chairman; Harold Essex continues as TV-radio gen. mgr. . . . Richard Bell, pres. of Key Television Inc., which recently acquired KEYT, Santa Barbara, takes over as mgr. from former pres.-gen. mgr. Colin B. Selph . . . Bill Walker, ex-KBTB, Denver, named promotion mgr. of upcoming WFGA-TV, Jacksonville . . . Robert Kimball named promotion mgr. of WAGA-TV, Atlanta, succeeding Charles E. Trainor . . . Lionel Wernick promoted to business mgr. of WCAU-TV, Philadelphia; Jack Dolph to asst. program mgr. . . . David M. Davis promoted from production mgr. to asst. gen. mgr. of educational WGBH-TV, Boston . . . Paul Williams promoted to public affairs mgr. of WWJ-TV & WWJ, Detroit . . . Ernest

N. Olivieri, ex-WNHC-TV, New Haven, named film director of upcoming WTIC-TV, Hartford . . . George C. Mirras promoted to sales development mgr. of WOW-TV & WOW, Omaha . . . H. Paul Field, ex-Benton & Bowles and Grey Adv., N. Y., named to new post of commercial services supervisor of WTVJ, Miami . . . Bernie Ebert resigns as production coordinator of KTLA, Los Angeles, to open adv. agency there . . . John E. Holmes, ex-Automatic Projection Corp., Viewlex Inc. & NBC, named sales mgr. of Roger Wade Productions . . . Henry Grossman promoted to new post of CBS-TV facilities operations director . . . Ward L. Quaal, v.p. & gen. mgr. of WGN-TV, Chicago, elected a director of WGN Inc. . . . Richard Butterfield, ex-WARD-TV & WARD, Johnstown, Pa., named station mgr. of KCRG-TV & KCRG, Cedar Rapids . . . Mrs. Mary McKenna named research & sales development director of DuMont Bestg. Corp.; David Yarnell, public relations director; Kenneth Klein, adv. director; all are from radio WNEW, N. Y., where they continue in similar posts at recently purchased DuMont station . . . Roy E. Morgan of WILK-TV & WILK, Wilkes-Barre, elected pres. of Pa. Assn. of Broadcasters.

Obituary

John F. Grinan, 63, pioneer radio operator who received 1950 Radio Club of America award, died May 22 in St. Petersburg, Fla. of heart disease. In 1916, his N. Y. amateur station 2PM was first to transmit relay message to west coast and receive reply. He was at key of 1BCG, Greenwich, Conn., when first transatlantic short-wave message was transmitted in 1921. Surviving are 2 sisters.

ADVERTISING AGENCIES: Lyndon O. Brown named chairman of newly-formed Dancer-Fitzgerald-Sample executive committee . . . John Hoagland, formerly head of BBDO TV-radio programming, becomes Lever Bros. & General Mills account executive; George Polk, in charge of TV-radio planning, assumes program responsibilities; Don Rowe named Lucky Strike account executive, Robert Stefan asst. to v.p. in charge of Hollywood office . . . Wm. L. Wernicke, TV-radio director of Morey, Humm & Warwick, promoted to v.p. . . . Arnold Benson, ex-CBS Radio, joins Dowd, Redfield & Johnstone as copy group supervisor . . . Ben Lipstein, ex-Audits & Surveys Inc., appointed asst. to pres. & technical director of McCann-Erickson's Market Planning Corp. . . . Wm. J. Moore, ex-NBC, joins Benton & Bowles as TV operations director.

Edward F. Kenehan, FCC Broadcast Bureau chief since Aug. 1, 1955, becomes partner in Washington law firm of Haley, Doty, Wollenberg & Kenehan May 27. He had stint with Commission immediately after war, served as counsel for RCA engineering products div. 1951-55. Harold G. Cowgill, chief of Common Carrier Bureau, succeeds Kenehan, while John R. Lambert moves up to replace Cowgill on acting basis. Cowgill worked for Commission 1935-44, left to join law firm of Segal, Smith & Hennessey, later served as exec. v.p.-gen. mgr. of WTVP, Decatur, Ill. (Ch. 17) before returning to Commission.

Society of TV Pioneers, formation of which was sparked at this year's NARTB convention by W. D. (Dub) Rogers, KDUB-TV, Lubbock, Tex., votes shortly by mail ballot for pres. and 3 v.p.'s—nominees being selected by Richard A. Rawls, KPHO-TV, Phoenix, and P. A. Sugg, WKY-TV, Okla. City.

Robert L. Heald, NARTB chief attorney, resigns as of June 24 to become partner in Washington law firm of Spearman & Roberson. He came to NARTB from firm of Welch, Mott & Morgan, previously served as FBI special agent in 1941-46.

First-prize TV winners in *Billboard's* 19th annual promotion competition: Promotion of network programs in markets with 4 or more stations, WTVJ, Miami; in 3-station markets, WBNS-TV, Columbus, O.; in 1 & 2-station markets, WAFB-TV, Baton Rouge. Promotion of local programs, in markets with 4 or more stations, KBTB, Denver; in 3-station markets, WSM-TV, Nashville; in 1 & 2-station markets, KWTB, Oklahoma City. General audience promotion, 4 or more stations, WCCO-TV, Minneapolis-St. Paul; 3-station markets, KYW-TV, Cleveland; 1 & 2-station markets, KDAL-TV, Duluth. Promotion of syndicated film programs, 4 or more stations, KTTV, Los Angeles; 3-station markets, WSLs-TV, Roanoke, Va.; 1 & 2-station markets, WAFB-TV, Baton Rouge. Promotion of feature film programs, 4 or more stations, KTTV, Los Angeles; 3-station markets, WFIL-TV & WCAU-TV, Philadelphia (tie); 1 & 2-station markets, WFBG-TV, Altoona. Film distributor awards: Promotion of syndicated series, MCA-TV; feature film package, MGM-TV.

AAAA appoints John F. Devine (J. Walter Thompson, N. Y.) chairman, Hildred Sanders (Dan B. Miner Co., Los Angeles) vice chairman, TV & radio administration committee; Frank G. Silvernail (BBDO, N. Y.) chairman, Jane Daly (Earle Ludgin & Co., Chicago) vice chairman, broadcast media committee.

N. E. Holmblad, chief engineer of Danish Posts & Telegraphs, govt. operating agency which operates TV-radio, joins Great Northern Telegraph Co. Ltd. in Copenhagen as technical v.p.

New reps: WABT, Birmingham, to Harrington, Righter & Parsons (from Blair-TV); KLFY-TV, Lafayette, La. to Young June 1 (from Venard, Rintoul & McConnell); WLBR-TV, Lebanon, Pa. names Blair Television Assoc.

Rate changes: KPRC-TV, Houston, May 1 raised base hour from \$1000 to \$1100, min. \$220 to \$250. WCPO-TV, Cincinnati, April 15 cut base half hour from \$535 to \$412.50, raised min. from \$200 to \$275.

TV IS BETTER than ever—to paraphrase the movies' old promotional slogan, and recent stockholders' meetings and financial reports of motion picture producers and distributors strongly reflect that sentiment.

Movie distributor United Artists suddenly ended an industry guessing game when pres. Arthur B. Krim announced that negotiations with distributors to syndicate its highly valued post-1948 features to TV had been called off and that UA was even thinking of the possibility of buying out a TV film distributor itself. The company, he said, has decided to continue distributing its own feature films directly to TV. He said UA's revenue from TV syndication of 39 pictures made in 1951-52 totaled \$2,000,000 and that the 52 in syndication this year should bring in about \$5,000,000 in 1957.

"We have looked upon TV as a retarding factor," he said. Now, he added, "we regard it as a healthy source of additional revenue, and we expect revenue from it to increase substantially in the next few years." He said company expects to get in TV film distribution business whether it buys out a syndicator or not. Other officials pointed out that UA will make its first-run features available to Bartlesville, Okla. wired TV experiment.

Loew's Inc. pres. Joseph Vogel this week told N. Y. Society of Security Analysts that his company hopes to realize \$40,000,000 from TV licensing of MGM's 723-film feature library and may soon sign deal for release to TV of all MGM theatrical short subjects.

Pres. Spyros Skouras of 20th Century Fox told stockholders that minimum rental payments for the 237 features being distributed by NTA will total \$16,940,000 over next 7 years, that 560 of its pre-1949 features are still uncommitted and 210 made since 1949 will some day be available to TV. He added that 20th is now producing 3 TV film series and hopes to have 6 or 7 on air if current negotiations succeed.

Walt Disney Productions reported that for first time its TV income exceeded rental from theatrical pictures during 6 months ended March 30—the figures being \$6,747,759 vs. \$6,631,805.

TV news is in such demand by once-hostile newspapers that 3 networks must maintain big staffs of experienced ex-newspapermen just to keep up, May 18 *Editor & Publisher* reports. Roundup by Ray Erwin tells how "TV-happiness" of papers has brought increase up to 600% in 3 years in space given to TV & radio. Networks keep reporters on regular beats covering shows for press, supply vast quantity of photographs. NBC has press information staff of 43 in N. Y., including 14 writers. CBS has 42 in N. Y., 25 in Hollywood. ABC has 34 in N. Y.

New Pulse technique—"commercial recognition" measurement for comparable TV, radio & newspaper advertising costs in any market—was described May 22 by pres. Dr. Sydney Roslow at breakfast meeting of 300 advertisers & agency representatives in Hotel Plaza, N. Y. Formula developed in 2-year field studies uses home interviews in which respondents are shown lists of TV & radio commercials and newspaper ads, then asked to recall which they had seen, heard & read.

New TV spot analysis by TvB covering budgets of \$4729-\$100,000 per week tabulates audience and cost-per-1000 of various schedules of 10-sec. ID's purchased on 13-week basis, using highest rate station in top markets. Initial TvB report, based on Nielsen audience data for week of Feb. 11-15, concludes that "no one time period is best in everything."

HOPE FOR COMPROMISE report on TV network practices was high this week among members of both parties on Rep. Celler's anti-trust subcommittee, after meeting at which agreement was reached on several points—including draft report's wording on "must buy" practices (Vol. 13:19). Reports from subcommittee sources indicated that final document would be toned down somewhat from original language approved by Chairman Celler.

There were still 2 sticky points of contention on which the 2 factions on subcommittee had not yet agreed by week's end—the sections on BMI and on option time. One subcommittee member predicted satisfactory compromise on these issues would be reached next week, calling prospects for a single unanimous subcommittee document "better than ever."

Meanwhile, Senate Commerce Committee's proposed report on network practices, drafted largely by former chief TV investigation counsel Kenneth Cox, was awaiting reaction from Sen. Bricker (R-O.). Chairman Magnuson (D-Wash.) has indicated endorsement of report, and document has rested in Bricker's office for about 2 weeks. Spokesman for Bricker said he has read about one-third of lengthy draft and hopes to finish it next week. Whether it is finally issued as a Committee report or as a "staff study" hinges to great extent upon Bricker's reaction.

TV-radio self-regulation—not censorship—is objective of "action" committee of National Congress of Parents & Teachers. Dr. Kenneth E. Oberholtzer, committee chairman, said at 61st annual PTA convention this week in Cincinnati that it is "much concerned" about portrayals of "violence, force, intrigue or exploitation" on TV & radio and in movies & comics as way to solve human problems. But committee itself will not judge programs, proposing instead to encourage self-policing by industry by assisting individuals & local groups to make appraisals and transmit them to producers & publishers.

Anonymous political broadcasts would be banned in Ohio legislative bill, passed by Senate and referred to House, to require TV & radio stations to air names & addresses of persons making such statements. Similar requirement now applies to newspapers. Measure is opposed by Ohio Assn. of Radio & TV Broadcasters, whose counsel Carlton Dargusch Jr. told House committee that state has no right to enter federally-regulated TV-radio area; that stations already are responsible for statements made over their facilities.

FCC general counsel Warren Baker will be questioned by Sen. Pastore's communications subcommittee at 10 a.m. May 27 in hearings on bill to set up Airway Modernization Board (S-1856), charged with revamping air safety and traffic control regulations. Though FCC is not involved directly in legislation, any changes in air traffic control presumably would affect radio communications, radio navigation devices, etc.

"Bait" advertising on TV and in newspapers was charged May 24 by FTC against Fidelity Storm Sash Co., Baltimore, Washington & Philadelphia. Latest in FTC complaints of false advertising (Vol. 13:20) said 3 firms lured customers by offering storm windows at fictitious prices.

Suit for \$5,000,000 damages by Schick Inc. against Sperry Rand Corp. for alleged "false, misleading" TV commercials for Remington woman's shavers (Vol. 13:20) was withdrawn this week from N. Y. Supreme Court. Sperry Rand agreed out of court to discontinue TV demonstrations which allegedly disparaged Lady Schick shavers.

New and Upcoming Stations: **KBTX-TV, Bryan, Tex.** (Ch. 3) began program tests 5:30 p.m. May 22 as partial satellite of **KWTV-TV, Waco** (Ch. 10), 76 mi. away, bringing on-air box score to exactly 500 (92 uhf). All ABC-TV shows programmed by KWTV-TV will be carried without charge by KBTX-TV, which also has per-program agreement with CBS-TV. KWTV-TV owns 50% of Bryan outlet and KWTV-TV v.p.-gen. mgr. M. N. (Buddy) Bostick holds 10%. KBTX-TV officer-stockholders are local insurance man W. C. Mitchell, pres., with 10%; rancher Frank Seale, v.p., 10%; attorney John M. Lawrence III, secy.-treas., 5%; farmer-businessman Brazos A. Varisco, director, 10%. Harry Lee Gillam, from KWTV-TV, is station mgr., with Woody Cox, also KWTV, chief engineer. KBTX-TV base hour is \$150; KWTV-TV hour, \$300. Rep for both stations is Raymer.

KCCC-TV, Sacramento, Cal. (Ch. 40) goes dark May 31, it informs FCC, owner Lincoln Dellar exchanging plant & stock for approximately 17% of **KOVR** (Ch. 13), due to become area outlet (Vol. 13:20).

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WRLP, Greenfield, Mass. (Ch. 32) is due to begin June 1 as satellite of **WWLP, Springfield** (Ch. 22), reports WWLP mgr. Wm. L. Putnam. It has 12-kw RCA transmitter and 620-ft. Ideco tower at Bolton Rd. site in Winchester, N. H. WWLP also holds CP for **Claremont, N. H.** translator **W79AA**, expected to start before end of June repeating WRLP, has applications pending for 5 more translators (Vol. 13:20). WWLP base hour goes from \$600 to \$700 when WRLP begins. Rep is Hollingbery.

CHBC-TV, Kelowna, B. C. (Ch. 2) has ordered RCA equipment, expects to be on air Sept. 1-15, reports J. H. Browne, pres. of **Okanagan Valley TV Co. Ltd.**, which also holds licenses for satellites in **Penticton** (Ch. 13) & **Vernon** (Ch. 7). It's building road to transmitter site 4 mi. NW of Kelowna, expects to start work on transmitter house early in June. It will use 100-ft. Stainless tower, will have studios at 342 Leon Ave. Roy G. Chapman, ex-CKOK, Penticton, will be gen. mgr., with Tom Wyatt, ex-RCA Victor, Vancouver, chief engineer. Rep not chosen.

"CRAVEN PLAN" comments deadline stands at June 3—Commission promptly rejecting RETMA's plea this week for extension to June 28. Only Comr. Hyde favored grant of delay; Comrs. Lee & Mack were absent. Substantial number of comments are in the works, attorneys report—but nothing like the total which would have descended on FCC couple years ago. Plan proposes to abandon most of allocations table, consider applications for channels wherever they can be fitted, engineering-wise—but operating stations and CPs have left few significant vhf drop-ins possible. (For full text of proposal, see Special Report, April 27.)

Commission disposed of several allocations changes, meanwhile: (1) Finalized shift of Ch. 13 from New Bern to Norfolk area, replacing it with Ch. 12. (2) Denied petition of **WNOW-TV, York, Pa.** (Ch. 49) for shift of Ch. 33 from Reading. (3) Started rule-making to commercialize Ch. 9 in Eugene, Ore., reassigning educational Ch. 7 to Eugene-Corvallis. (4) Finalized substitution of Ch. 4 for Ch. 8 in Hay Springs, Neb., Ch. 9 for Ch. 4 in North Platte. (5) Denied petition to substitute Ch. 20 & 77 for Ch. 9 in Charlotte, N. C. Commission received one rule-making petition, **WCOV-TV, Montgomery** (Ch. 20) asking either that Ch. 8 be shifted to Montgomery from Selma or that Ch. 12 in Montgomery be designated educational

CJOX-TV, Argentia, Nfld. (Ch. 10) hopes to start May 28 with test patterns, May 30 programming as satellite of parent **CJON-TV, St. John's** (Ch. 6), reports Geoff Stirling, CJON-TV pres.-gen. mgr. It has 500-watt RCA transmitter with wavestack antenna 75-ft. above ground on hill adjacent to U. S. Naval & Air Base. CJON-TV base hour is \$200. Reprs are Weed and All-Canada.

Ch. 3 **Kapuskasing, Ont.** satellite of **CFCL-TV, Timmons, Ont.** (Ch. 6) is expected to be on air in Sept., although equipment hasn't been ordered, nor has construction started, reports J. Conrad Lavigne, CFCL-TV pres. He hopes to use existing tower in Kapuskasing, some 25-mi. NW of Timmins. — (P.S.)

Rawlins, Wyo. translator **K73AF** began May 15 repeating **KFBC-TV, Cheyenne**, reports Donald D. Stanczyk, gen. mgr. of KFBC-TV owned radio **KRAL, Rawlins**, which is operating translator, built with public contributions. **Rock Springs, Wyo.** translators **K74AF & K78AB** plan June 1 start repeating **KTVT & KSL-TV, Salt Lake City**, reports John E. Wendt, secy. of Translator T.V. Bestg. Corp., also stating company expects to apply for Ch. 82 there. **Lone Pine, Cal.** translator **K80AD** expects transmitter about June 15, plans start about July 1, reports E. A. Barmore, secy.-treas. of Lone Pine Television Inc.

Power increases: **KRGV-TV, Weslaco** (Ch. 5) was due to begin with 100-kw May 20; **WCHS-TV, Charleston, W. Va.** began interim operation from new Coal Mt. site May 15, using 5-kw GE transmitter and 32-kw ERP—while 50-kw RCA unit is being moved to Coal Mt. so station can return to authorized 316-kw. **WTWO, Bangor, Me.** (Ch. 2) June 1 increases power to 36.4-kw ERP.

WTPA, Harrisburg (Ch. 71) plans to begin operation on Ch. 27 June 1, FCC recently having authorized channel swap with off-air **WCMB-TV**, as part of \$150,000 sale of transmitter & tower (Vol. 13:20).

Enlarged studio has been completed by **WCCO-TV, Minneapolis**, following year's construction including 2½-story addition at 50 S. 9th St. Station now boasts largest TV studio in area.

Ground-breaking ceremonies for new studio-office-transmitter building of **WANE-TV & WANE, Ft. Wayne** (2915 W. State Blvd.), will be conducted May 28.

and Ch. 8 be shifted from Selma to Tuscaloosa, also given to educators.

FCC denied petition of **WPTF, Raleigh**, to reconsider & stay grant of Ch. 5 to **WRAL-TV, Raleigh**—Comrs. Mack & Craven abstaining.

Only translator CPs issued were for Ch. 70, Myton, Utah and Ch. 75 for Roosevelt, Utah area—to **Uintah Basin TV Co.**

Private microwave—**Memphis to Tupelo, Miss.**—was granted to **WTWV, Tupelo** (Ch. 9).

Hagerstown, Md., closed-circuit educational TV project will be described in 4 papers at June 24-28 AIEE summer general meeting at Sheraton-Mt. Royal Hotel, Montreal. Papers will be delivered by Hagerstown project chief engineer John R. Brugger, RCA's Louie Lewis, Chesapeake & Potomac Telephone Co.'s Wm. Warman & Jerrold's Max Kraus. Other TV-radio papers scheduled for June 28 broadcast systems session: Canadian TV, by CBC's J. E. Hayes; CBC Radio Service, CBC's N. R. Olding; video testing techniques, CBC's A. Ste. Marie; TV lighting, Herbert More, Kliegl Bros.; filter to permit simultaneous transmission from single antenna of 2 complete TV stations on different channels, Canadian RCA Victor's G. B. MacKimmie.

Telecasting Notes: What's the newest TV program trend? It's music, says the entertainment trade press. Both *Billboard* and *Variety* this week have articles pointing out that about 20 TV musicals will be on air next season—a revival keyed by success of ABC-TV's 2 modestly budgeted Lawrence Welk shows . . . **Musical rundown** of networks, from the trade press: NBC-TV probably will have 7, ABC-TV at least 6, CBS-TV 4 or more . . . ABC drops radio version of *Wednesday Night Fights*, network pres. Robert E. Eastman stating that "programming must be exclusive; [the] so-called simulcast of most events detracts from radio's creativity" . . . ABC-TV network's biggest single time sale in its history—reportedly involving more than \$5,000,000 for a year—is for Sun. 7:30-9:30 p.m. segment, with principal purchaser rumored to be Kaiser Aluminum . . . Sometimes we wonder if the TV quizzes don't make those mistakes on purpose—witness the publicity gleaned as result of *Twenty-One's* Hank Bloomgarden-Jim Snodgrass \$73,500 snafu . . . The suspense is over for NBC-TV—General Motors has decided to buy *Wide Wide World* alt. Sun. next fall, with *Omnibus* (now produced by Robert Saudek Assoc.) sliding into alt. week segment for at least 13 weeks. Latter already has Union Carbide as 1/3 sponsor, and Aluminium Ltd. is expected to come in for 1/3 . . . N. Y. Gov. Harriman has asked ruling from CBS-TV's *The Last Word* on whether wording of state income tax returns uses correct grammar; decision will be handed down on May 26 show, in time to allow corrections before 20,000,000 new tax forms are printed . . . TV critic on TV: New York Herald Tribune Syndicate TV-radio columnist John Crosby signed as host for CBS-TV's 60-min. 7 *Lively Arts* on Sundays beginning next fall . . . Soviet Red chief Nikita Krushchev's appearance (filmed) on CBS-TV's *Face the Nation* (Vol. 13:20) will be June 2, program lengthened to full hour for show . . . Groucho Marx, actor, will star in 90-min. NBC-TV special next fall based on "Time for Elizabeth," written by Groucho Marx, author (with Norman Krasna) . . . Fund for the Republic's controversial film, "Segregation & the South" will be presented June 16 in special hour-length show in ABC-TV's *Open Hearing* series . . . MGM-TV reports 4 more feature film sales totaling more than \$2,500,000—including full 723-film library to NBC's WBUF, Buffalo, and WAAM, Baltimore, whose sale to Westinghouse pends FCC approval.

NBC will drop *Home* show late this summer because of sagging ratings. The 10-11 a.m. magazine-type program has already run for more than 3 years, having started in March 1954. Its place will probably be filled by 30-min. variety show starring Arlene Francis, hostess on *Home*, and another 30-min. show not yet selected. Network intends to revive *Home* concept on irregular one-shot basis some Sunday afternoons next season. Another of NBC-TV's magazine shows—*Tonight*—is in trouble, too, and its "America After Dark" format is slated to be discarded end of next month, with return to studio-audience variety format considered most likely.

Network TV audiences continue to grow, TvB reported this week on basis of study of Nielsen ratings—with each month of 1957 to date exceeding preceding year's comparable month's audience. Average evening network program reaches over 1,500,000 more homes per broadcast in 1957 than 1956, TvB reports, while average increase for weekday daytime shows is more than 350,000. Average evening program increase in 1957 over 1955 is 43%, weekday daytime 33%.

Survey of French TV programs in Canada will be conducted June 4-7 in Montreal by Schwerin Research Corp. to determine whether entertainment & selling themes appeal differently to French & English-speaking audiences.

CORNING Glass Works' new family of ceramic materials, announced this week in conjunction with dedication of its new Eugene C. Sullivan Research Labs, appears to have potential uses in TV-electronics field. First use of new Pyroceram will be for radomes in nose of guided missiles. Though Corning scientists won't even predict number of potential uses, one electronic application appears certain to be for envelopes of power and transmitting tubes. Pyroceram has excellent heat-resistant and electrical insulating properties and therefore is ideally suited for electron tube use.

Since Pyroceram may be made in transparent form, it opens up possibility of use in certain picture and radar tube screens. It can stand extremely high temperatures and conceivably could pave way for TV use of the transparent picture tube phosphors developed by Dr. Charles Feldman of Naval Research Lab (Vol. 13:17-19).

One of principal drawbacks of Feldman phosphors cited by TV industry is fact that special expensive glass is required for use with them because of extreme heat under which they must be applied. Corning engineers stated that Pyroceram probably will be far cheaper than the high-temperature glasses now being used in developmental models of the Feldman tube.

ELECTRONICS PERSONALS: Rodney D. Chipp, ex-DuMont labs, appointed systems engineering mgr. of Federal Telecommunication Labs (IT&T), Nutley, N. J. . . . Fred M. Farwell resigns as Underwood Corp. pres. to become exec. v.p. of IT&T in charge of U. S. research & manufacturing. . . . Dr. Werner F. Auerbacher promoted to engineering & mfg. v.p., George Rappaport to marketing v.p., Emerson govt. electronics div., Dr. Donald L. Burcham to v.p. for research labs . . . Daniel E. Noble, Motorola exec. v.p., moderates panel on Management of Research and Development Activities at June 6-7 Third Annual Conference of Armed Forces Management Assn., Bolling AFB, Washington, D. C.

Complete new line of industrial TV equipment, built around 2 basic cameras, was announced at week's end by DuMont, to be available from local established electronic distributors by July. Entirely new line, says DuMont, was designed after 2 years of research and interviews with more than 250 users of closed-circuit industrial TV systems. Completely installed systems built around self-contained TC-100 camera are available at about \$2000, while systems using tiny 3-lb. TC-200 (3x3½x10-in.) will cost about \$3500. Vidicon camera systems will be accompanied by full group of additional gear—which may be added later in "building-block" fashion—including remote focus, iris & lens change equipment, special housings.

Network-financed advertising research in new "See for Yourself" plan was announced this week by v.p. Matthew J. Culligan of NBC Radio, who said "present radio audience ratings are virtually meaningless as an indication of radio's true selling power." To prove point, he said, NBC Radio will pay up to \$10,000 for sales effectiveness studies (store audits, test market comparisons, etc.) by network advertisers whose campaigns are of sufficient frequency & length to give measurable result and which use "some exclusive copy points."

Closed-circuit color demonstration, followed by seminar, will be conducted May 28 by NBC-TV at Ziegfeld Theatre, N. Y., for visual communications conference sponsored by Art Directors Club of N. Y.

Licensed TV sets in London outnumbered radios for first time at end of March, 736,021 to 698,972. For all of United Kingdom, figure was 6,966,256 TVs, 7,558,843 radios, increase of 103,022 TVs during March.

RCA shipped 3-V color film chain May 21 to Tokyo.

4 BIG MAKERS GO ALL-110°; 14-in. FADING: Raging battle of "slim" 110-degree tube vs. conventional 90-degree seemed to be veering this week in favor of new design, with GE & Hotpoint introducing new lines consisting entirely of the 110-degree sets (see story below). Adding considerable strength to position of the new type tube is fact that all new models by RCA, Admiral & Sylvania will be 110s.

Manufacturers preparing to include at least some 110-degree sets in new lines include Westinghouse (about 50-50 division between 90 & 110), Motorola, Emerson and DuMont. Magnavox will stick to 90-degree, and it's probable that Zenith will, too.

Heavy promotional build-up which will be given the 110 by RCA, Admiral & GE -- among industry's top 3-4 in advertising and TV unit sales -- will provide strong impetus to consumer desire for the new-design sets.

Those manufacturers sticking with 90-degree tubes will also be able to claim a "slim" product -- new gun making tube about an inch shorter and new faceplate taking 2½ lb. off total weight. New faceplate, incidentally, is said to immunize set from pincushioning, because its radius is about that of electron beam scan.

We toured Corning's picture tube bulb plant this week while attending unveiling of its new research labs (see p. 8), and saw heavy production of 110-degree bulbs, but Corning officials were silent on ratio of 110 to 90-degree orders. They also refused to be drawn into discussion of merits of new tube vs. old -- and they aren't betting on which type will win final consumer acceptance.

* * * *

Tube glass manufacturers are important barometers of future TV picture tube trends because of relatively long lead time between bulb orders and tube & receiver production. Corning officials gave us this size-up of next season's tube outlook:

The 14-in. tube, comeback sensation of last 2 seasons, will be de-emphasized. Orders for these are definitely down -- with 17-in. expected to show proportionate increase, presumably due to size & weight reductions which bring 17-in. sets quite close to 14-in. in portability without great differential in cost.

Sizes smaller than 14-in. -- the conglomeration of 8½, 9 & 10 3/8-in. tubes -- are definitely dead after short-lived "boomless boom."

The 21-in. remains staple commodity -- with a little more emphasis next season as manufacturers hopefully stress higher-priced sets at expense of portables.

Some resurgence is noted in 24-in. size, presumably sparked by shallower cabinets (GE claims cabinet on its 24-in. set will be only 15-in. deep) made possible by 110-degree deflection. The 27-in. is now being made almost exclusively for replacement -- very few manufacturers (principally Muntz) currently making 27-in. sets, with no pickup in sight. The 27-in. is made with 90-degree deflection only.

Extremely heavy activity in color tube bulb production was notable at the Corning plant -- as result of RCA's switchover to all-glass tube (last metal-coned color tube was turned out by RCA April 9).

Corning hopes to take last big metal part out of color tube. Its engineers have designed new shadow-mask of "Photoceram," a glass-derived ceramic which is a first cousin of Corning's newly announced Pyroceram basic material. New shadow-mask is made from photosensitive glass, then heated to alter molecular structure.

Perforated ceramic shadow-mask has these advantages over present metal masks, according to Corning researchers: (1) Its expansion & contraction with heat variations are far less than metal mask, providing greater color stability. (2) It offers promise of interchangeability of masks from tube to tube -- whereas today's color tube screens are wedded to their individual metal masks.

Color bulb orders, Corning spokesmen said, are relatively high, and they view recent pickup as "more than seasonal." -- (DL)

GE-HOTPOINT LAUNCH 1958 TV-MODEL SEASON: First of the majors to take wraps off new TV models, Hotpoint showing wares May 24 at Burlington, Wis., GE May 27 at Louisville, go all out for 110-degree, wide-angle tubes (see above). Prices suggested are higher than this year's -- GE's 1958 table models ticketed \$190-\$260 compared with \$170-\$240, Hotpoint table sets \$190-\$250 vs. \$190-\$240. GE consoles run \$230-\$450 vs. current \$220-\$310; Hotpoint consoles range \$230 up -- high end not yet set -- compared with current \$270-\$330.

Catchy "Slim Silhouette" is theme tag of GE line which features 24-in. 110-degree tube in cabinet only 15-in. deep with 2-in. tube cup projection. Balance of line is in 21-in. table and console models -- a total of 19 sets in 10 basic models. GE emphasis is switching from portables to table & console sets with such extras as multiple speakers. Color sets are unchanged.

GE's 24-in. tube has a viewable area of 332 sq. in.; 21-in. has 262 sq. in. Other features of high-end sets: "Horizontal" console with full doors, a Danish Modern model, triple speakers, remote control, electronic tuning, push-button selection, circuit changes for 110-degree tube.

New cabinets come in metal, wood, pressed wood. Most sets are in production now, others in few weeks -- all on market in fall.

Interesting sidelight is consumer survey by GE to determine styling. First model circulated had 17-in. deep cabinet; 2nd had 13-in. cabinet & 4-in. tube cup; 3rd had 15-in. cabinet and 2-in. cup. Result showed 90% of those sampled preferred 15-in. cabinet and 2-in. cup.

Emphasis at Hotpoint also is on higher end. Line has 4 table, 7 console models -- including 2 lowboys with "Slender Profile" styling. Two deluxe 24-in. sets are part of console line -- rest of which has 21-in. tubes. Depth of sets is 15-in. with tube projection cup about 1½-in. Portables came out in April (Vol. 13:15).

Some deluxe features are: "Miracle Memory" fine tuner, improved tetrode tuner, 3 speakers on some models, touchbutton power tuning, automatic focus and sight-sound tuner. Two of consoles have casters; 2 have swivel bases.

* * * *

Here's some advance word on other set makers' plans and new models:

RCA will start distributor showings in New York's Hotel New Yorker June 2 -- with press showing June 4; Chicago showing will be June 6-8 at Hotel Knickerbocker; San Francisco's, June 9-11. Whole line will use 110-degree, includes 14, 17 & 21-in. portables; prices will be up 5-10%. Color sets will be shown in fall.

Philco will show its line June 3-4 at Philadelphia's Bellevue-Stratford Hotel, no information available except that color won't be offered. Exec. v.p. Larry F. Hardy has written distributors 3-page letter saying that color TV is an unprofitable business at manufacturers' level; that Philco believes same is true at distributor level; that only selected few retailers have made money on color. He said Philco is not against color, has spent a great deal of money on it, but believes much work is required before sets can be mass-produced profitably.

Admiral, introducing its line June 6-7 at the Americana Hotel in Miami Beach, will use 110-degree tube, won't have 24-in. sets or 21-in. portable. Its portable line came out this week end (see p. 12).

Westinghouse shows new line June 16 at Chicago's Merchandise Mart. About half will use 110-degree tube. Line will include 14 & 17-in. portables.

Sylvania starts series of four 3-day distributor meetings June 2 in Buffalo's Statler Hotel, then has public showing June 17 at Merchandise Mart. Line will include 17 & 21-in. portables, 21-in. table & console sets. Top price of \$200 previously reported (Vol. 13:16) applies only to portables; consoles will be somewhat higher. All new sets will have 110-degree tubes.

Emerson shows its line around end of June. Some sets will use 110-degree tubes and some prices will be higher.

DuMont's line will be given public debut June 12 at New York's Delmonico Hotel. Low end will use 110-degree tube, rest will have stub-neck 90-degree. A 14-in.

Text of FCC Request for Specific Proposals for Pay-TV Tests

Adopted Unanimously and Issued May 23, 1957 as Public Notice 57-530, Mimeo 45331

NOTICE OF FURTHER PROCEEDINGS

1. In our Notice of Proposed Rule Making adopted February 10, 1955 (FCC 55-165) we invited comments on proposals that the Commission authorize the use of frequencies allocated to television broadcasting for the transmission of programs in scrambled, unintelligible form under proposed systems calling for the payment of a charge by the viewer for the reception of such programs in unscrambled, intelligible form.

2. We have received proposals for three different systems for the encoding and decoding of television signals: "Phonevision", sponsored by Zenith Radio Corporation and TECO, Inc.; "Subscriber-Vision", sponsored by Skiatron Electronics and Television Corporation and Skiatron TV, Inc.; and "Telemeter", sponsored by International Telemeter Corporation. In this document we will use the general term "subscription television" to refer to all three of the foregoing systems, as well as to any other system which may be developed for the encoding and decoding of programs broadcast by television stations.

3. Interested parties representing important segments of the television industry, motion picture distributors, the proponents of three different systems of subscription television and others have formally submitted lengthy comments and reply comments in this proceeding. In addition we have received many thousands of informal expressions of opinion in letters from numerous organizations and members of the public—over 25,000 in all. The volume of the record, the complexity of the issues, the fact that basic departures from established practice are involved, and the necessity for concentrating much of the time of the Commission and its staff during the past year on television allocations problems have made it impossible, until now, to advance our continuing study of subscription television to a point where a decision could be reached concerning additional steps it would be desirable to take in this proceeding.

4. The record discloses basic disagreement between parties who claim that subscription television would provide a beneficial supplement to the programming now available to the public and an increase of the financial resources available to support television, and parties who contend that it would seriously impair the capacity of the present system to continue to provide "free", advertiser-financed programming of the present or foreseeable quantity and quality. The Comments filed to date have provided us with data and arguments which have furnished helpful assistance in our initial consideration of the questions of law, fact and policy set out in the Notice of Proposed Rule Making. Useful as they have been, however, the written submissions of the parties, taken alone, do not in our opinion provide a fully adequate basis for concluding either that the proposals in hand that we authorize subscription television should be denied, or that they should be granted by amending the Rules in such fashion as to open the way for permanent nationwide subscription television operations using the frequencies which have been allocated to television broadcasting.

5. Since we propose to defer final conclusions until completion of the steps discussed in this Further Notice we will not endeavor in this document to discuss the numerous questions here involved in detail but will mention briefly the principal matters which at this stage we think are of paramount importance. The additional proceedings contemplated in this Notice will be directed toward the specific questions which in our opinion remain unclear and on which we feel the need of additional information and study in order to afford us a sound basis for decision.

6. The first group of questions raised in our Notice,

designated as "Questions of Law", concern the statutory power of the Commission to authorize subscription television, its proper classification as a broadcast or other type of service, and amendments which might be required to the Communications Act of 1934, as amended, or to the Commission Rules and Regulations. Several of the parties provided us with detailed memoranda of law on these questions which, together with separate researches by Commission staff, have enabled us to reach the conclusion that the Commission has the statutory authority to authorize the use of television broadcast frequencies for subscription television operations if it finds that it would be in the public interest to do so. We believe this authority falls within the powers conferred on the Commission in the Communications Act for licensing the use of radio frequencies.

7. We leave for future determination the related legal questions of whether subscription television would be properly classifiable as "broadcasting" within the meaning of Section 3(o) of the Communications Act or whether it may be classifiable as some other type of service. Nor, in view of the steps contemplated in this Further Notice, is it necessary or desirable that we endeavor to reach final conclusions at this stage concerning the proper classification of subscription television. While we recognize the importance of settling this question, we believe that it would be premature to attempt to decide it until we have additional information concerning the manner in which subscription TV, if authorized, would operate in actual practice.

8. While the three major proponents of subscription television have sketched in some detail several proposed modes of conducting subscription television operations, some of the critical aspects of such operations are left for future determination. Since the classification of this novel type of service is in part dependent on the way it would actually operate in practice, we are not in a position to decide finally how to classify the proposed service until we can learn more about the techniques and methods which would be employed. We need more information than is available on the present record concerning the relationships between subscription program producers, distributors, community franchise holders, television stations, manufacturers and distributors of encoding and decoding equipment and the public, and, in particular, concerning the role of the broadcasters, to whom the Commission issues licenses authorizing the use of television broadcast frequencies and whom the Commission holds responsible for the proper discharge of their responsibility to operate their stations in the public interest.

9. We recognize that at the initial stage of rule making it was difficult for proponents of subscription television to specify precise plans of operation of a service which is not yet in being, and numerous aspects of which cannot feasibly be worked out and crystalized except in practice. At the same time it is not possible for us to make sound determinations concerning the classification of the proposed service, or to reach well-founded conclusions concerning its potential impact on the public and on the established system of television broadcasting on the basis of the information submitted so far.

10. We recognize also that it is impossible to make a fully realistic assessment of an untried service such as subscription television without ample demonstration of its operation in actual practice. The field experiments performed so far were too limited in scope and duration to disclose much more than an indication of the feasibility of the technical processes involved and the initial response of limited numbers of participating viewers. We believe that an adequate trial demonstration of subscription television in operation is indispensable to a soundly based

evaluation of its acceptability to the public, its capacity to enlarge the selection of program fare, now or foreseeably, available under the present system, its significance as a possible additional source of financial support for continued expansion of the nation's television services, its potential impact, beneficial or otherwise, on the established television system and its mode of operation in actual practice. Since all of these matters bear on a decision as to whether the authorization of subscription television on a nationwide scale will serve the public interest, convenience and necessity, we think it is now timely and desirable to determine the conditions under which trial demonstrations of subscription television could properly be authorized.

11. The question of field demonstrations of subscription television in itself poses problems and difficulties which are partly similar to, although in some respects different from, the problems which are associated with full scale nationwide operation of subscription television. It would seem clear, on the one hand, that field demonstrations under highly circumscribed conditions and limitations would be unlikely to yield reliable indications of how subscription television would be likely to operate if later authorized on a more general scale. On the other hand we do not believe that we could at this stage justify the authorization of subscription television on an unlimited or general scale, even for a prescribed trial period. It may be possible to avoid the objectionable results of either extreme by authorizing the conduct of field demonstrations of subscription television under conditions which will provide useful information on critical questions we cannot resolve on the present record, but which will preclude subscription television operations of such scope and magnitude as to induce inordinate investment either by the industry or by the public in equipment and other costs necessary for a novel type of television service on which we must reserve final judgment.

12. This brings us to the question of the basis upon which it may be useful and desirable to authorize the conduct of field demonstrations of subscription television. These questions involve a host of matters which have been lengthily debated in the comments submitted so far in this proceeding. They include, with particular reference to a trial period, the questions of whether subscription television operations should be confined to the larger markets, for example those with at least four stations, or in which at least four television services are available; whether some maximum limitation should be placed on subscription programming in terms of hours per week, per day or per broadcast time segment, or in terms of some percentage of the participating station's total broadcast hours per week; whether subscription television, as has been proposed by one of the proponents, should be limited to UHF stations with the possible exception of VHF stations in certain circumstances; whether subscription television operations in a particular market should be limited to a single system; whether a trial of any of the individual systems should be limited to a single station in any particular market or made available for participation of more than one station in an individual market; preservation of the broadcaster's duty to retain control over the selection of material broadcast over his station, which is necessary to the proper discharge of his responsibilities as a licensee; and numbers of other related problems.

13. Before it would be possible for the Commission to make decisions concerning the basis on which it may be desirable to permit field demonstrations of subscription television operations it will be necessary for us to obtain more information than is available on the present record concerning questions such as were briefly stated in the preceding paragraph.

14. Therefore, in order to assist us in reaching decisions on the foregoing matters, we have decided to afford an opportunity to television station licensees, sponsors of subscription television systems and any other interested parties to submit statements informing us as to their views on the following questions relating to a trial demonstration of subscription television:

(1) The city or cities in which it may be desirable and feasible to conduct trial demonstrations.

(2) Whether trial operations should be confined to a single station in any individual community; or whether more than one station could participate.

(3) Whether a trial in any individual community should

be confined to a single system; or whether it is proposed that more than one system be demonstrated in any individual community at the same time.

(4) If known, the identity of the individual stations which it is proposed would broadcast subscription programs in each community where trial operations would be conducted; and the basis for their selection.

(5) The time required for the production, distribution and installation of the necessary coding and decoding equipment & commencement of subscription programming.

(6) The minimum period of actual system operations necessary to a meaningful demonstration of the manner in which subscription television would operate, and of the reaction of the public to this novel type of TV service.

(7) The approximate minimum and maximum numbers of subscribers during the trial run in each city where trial demonstrations are proposed.

(8) Whether it is essential for a satisfactory trial demonstration of any proposed system that decoding equipment be sold or leased to the participating subscribers, and the terms of such sale or lease.

(9) The number of broadcast hours per week, and during the hours of 6:00 P.M. to 11 P.M. on weekdays and 1:00 P.M. to 11 P.M. on Sundays, which it is believed would be required for a meaningful trial demonstration of subscription television.

(10) Whether it would be preferable to state such limitations as may be imposed on subscription broadcasts in terms of a maximum number of hours per week, per month or per year, or in terms of some maximum percentage of the station's total broadcast hours per week, month or year.

(11) A statement of the specific ways in which it is believed that the conduct of the proposed field demonstrations would assist the Commission in evaluating the effects, impact, benefits, and potential hazards or disadvantages of subscription television if it were subsequently authorized on a more general scale.

15. While we believe that the information sought in the foregoing questions should be furnished primarily by any station licensees who may be interested in participating in trial demonstrations of subscription television and by other persons who would be associated in the operation, we will accept and consider comments on these matters by any other interested party. It is requested that the additional information be submitted in 14 copies on or before July 8, 1957.

16. We cannot, of course, anticipate the extent to which the additional information may answer all the questions which we believe it is important to evaluate before making decisions concerning the authorization of trial demonstrations. In the event the additional information fails to clarify all of the important considerations we believe to be involved, we will then decide whether it would be desirable to conduct oral hearings on specific issues to be designated.

17. Our immediate concern is to make sound determinations concerning the basis on which the Commission could authorize suitably controlled trial demonstrations of subscription television, as a means of ascertaining its potential impact and what amendments should be introduced in the Commission's rules and standards if it were later determined, on the basis of trial experience, and after further proceedings, that it would be in the public interest to authorize subscription television on a permanent basis.

18. It would, we think be premature at this stage to attempt to determine whether, if subscription television were ultimately authorized on some general basis, it would be necessary or appropriate to establish standards which would call for the use of a single system, or whether it would be appropriate to authorize the use of more than one system of encoding and decoding television signals. We do not believe that it will be possible to give adequate consideration to all the different questions involved in this matter unless the capacities, advantages and disadvantages of the respective systems which have already been proposed and of any others which may be proposed, could be suitably tested in field demonstrations.

19. We believe that the steps contemplated in this Further Notice will also help to disclose and clarify any matters which it may be desirable to take up with Congress, including any amendments to the Communications Act which the Commission may find it necessary or desirable to propose to Congress.

[Comr. Mack issued brief concurring statement.]

portable with 90-degree tube will be included. However, emphasis will be on selective production of high-end sets.

Motorola shows 1958 models July 18-20 at Chicago's Blackstone Theater and Conrad Hilton Hotel. Some 110-degree tubes will be used and new 17-in. portable is being added to Americana line. Prices probably will be up about \$20.

Business Status: Business is "continuing sideways movement which has been so evident since the first of the year," but majority of National Assn. of Purchasing Agents Business Survey Committee predicts improvement for rest of year. Survey shows 40% of NAPA members think conditions in latter portion of 1957 will be better than for same 1956 period; 37% feel things will be worse; 23% expect no change. Production, the report says, showed no substantial change in past month. New orders were off for 32% of members compared with 25% who reported drop previous month.

Slight improvement in employment is noted, fewer members (25%) reporting employment cuts this month compared with last month (31%); 63% found employment unchanged and 12% saw an improvement this month. On inventories, 34% had lower totals, 49% had no change. May report, says NAPA, reflects "goal of effecting still further reductions in unfinished materials inventories. As finished goods inventories climb -- as many report they are -- additional concern is expressed about this tie-up of capital. To keep total inventory investment in balance, many managements are withholding expenditures for raw materials."

Production: TV output was 80,436 week ended May 17, compared with 80,949 preceding week and 115,373 in corresponding week one year ago. It was year's 20th week and brought TV production for year to date to about 2,074,000 compared with 2,745,-201 in same period of 1956. Radio production totaled 243,270 (97,750 auto) week ended May 17, compared with 251,249 (102,111) the preceding week and 255,193 (56,-440) in corresponding week year ago. Radio output for 20 weeks totaled about 5,847,000 (2,325,000) vs. 5,320,351 (1,946,743) in same 1956 period. -- (JSC)

Trade Personals: George R. Marek promoted from operations v.p. to v.p.-gen. mgr. of RCA Victor record div., replacing Lawrence W. Kanaga, new pres. of General Artists Corp. talent agency, succeeding founder Thomas G. Rockwell, who becomes chairman . . . Clinton H. Harris, v.p. & engineering director of Argus Camera div., named director of new product development for parent Sylvania . . . Roger H. Bolin named Westinghouse director of advertising; he retains responsibilities of former post of mgr. of general advertising . . . W. P. Lewis, ex-Canadian Industries Ltd., appointed sales promotion mgr. for Sylvania Electric Ltd., Montreal, replacing W. Burke who resigned to return to U. S. . . . Maynard H. Moore, ex-Magnavox, named New England district mgr. of Ampex Audio, succeeding Harold Bresson who becomes New England district sales mgr. of parent Ampex Corp.'s professional products div.

DISTRIBUTOR NOTES: Philco expands coverage of Graybar Electric, Seattle, to Portland and Eugene, Ore., replacing Appliance Wholesalers of Ore. which will continue to distribute Philco parts and accessories . . . Westinghouse appoints following district appliance sales mgrs.: T. V. Wake, Indianapolis; F. G. Roehrig, Milwaukee; R. W. Sanford, Des Moines; E. K. Findlay, St. Paul; J. T. Urban named regional mgr. of utility sales, Chicago . . . Stromberg-Carlson appoints Tri-State Supply Co., 1148 Market St., Chattanooga, for radio & hi-fi . . . Motorola appoints National Sales Co., 56 Rutter St., Rochester, N. Y. (Louis Solomon, pres.), which drops Sentinel . . . Hoffman Radio appoints Barton Distributors, Inc., Wichita, for central and western Kan., replacing Kelvinator Sales div. which continues to cover eastern Kan., parts of Mo., Neb., Ia.

* * * *

New NEDA chairman is Merle Applebee, Kansas City, succeeding R. C. Hall, R. F. & L. F. Hall Inc., Houston. Re-elected were pres. Joseph A. De Mambro, De Mambro Radio Supply Co, Boston; 1st v.p. M. E. Shifino, Rochester Radio Supply Co., Rochester, N. Y. Victor N. Zachariah, Zack Radio Supply, San Francisco, was named 2nd v.p. succeeding Albert N. Kass, Kass Radio & Electric Co., Philadelphia; Meyer Spiro, Meyers Electronics Inc., Bluefield, W. Va. secy.-treas. succeeding John G. Bowman, Bowman Radio Supplies, Chicago.

NARDA chairman Mort Farr used his 15-min. Philadelphia TV show this week to demonstrate how to install Philco Bantam air conditioner. He uncrated and mounted it in less than 2 mins. after window bolts and brackets had been installed. Farr said there were 150 calls following show, despite cold, damp weather.

Trav-Ler plans to import Swedish line of Luxor hi-fi radios, combinations, tape recorders.

Philco International pres. Harvey Williams said group's 1957 foreign production will be 5 times greater than Philco exports and predicted overseas market will offer American industry its greatest growth opportunity in next 20 years. He told International Management Assn. meeting in N. Y. this week that in British homes wired for electricity less than 10% have electric refrigerators, less than 18% have washing machines.

Receiver for Plamondon Magnetics, S. Harvey Klein, was appointed this week in Chicago Federal court when company said it had been unable to work out plan of arrangement and that it had lost about \$21,000 since filing Chapter XI petition in Feb.

Sylvania plans 70-city closed-circuit showing of 1958 TV line to dealers, probably originating in N. Y. in July. Gen. sales mgr. Robert L. Shaw says purpose is to get "our message directly to the dealers for greater impact."

Topics & Trends of TV Trade: Recommendation to change name of RETMA to Electronic Industries Assn. (Vol. 13:11-19) was approved unanimously at last week's board of directors meeting in Chicago. Ballots on the proposed name change will be sent to membership for formal proxy meeting vote. Change, virtually certain, will require 6-8 weeks to become effective. Other actions taken at closed meetings and released this week include:

(1) These div. directors were elected: Consumer Products—Herbert Riegelman, GE; E. J. Kelly, Westinghouse; J. S. Holmes, Warwick. Military Products—W. A. MacDonald, Hazeltine; Sidney R. Curtis, Stromberg-Carlson; C. F. McElwain, IBM. Technical Products—L. H. Bogen, Unifronics. Jack M. Ferren, Zenith, was elected director of Industrial Relations Dept., succeeding Robert C. Sprague Jr., Sprague Electric Co., who resigned to accept 1-year MIT fellowship. Reelected dept. heads were: Dr. W. R. G. Baker, GE, engineering; Ray C. Ellis, Raytheon, international; C. Paul Young, Philco, military relations; Frank W. Mansfield, Sylvania, marketing data.

(2) Site of next year's convention May 14-16 will be Chicago's Sheraton Hotel with spring meeting March 19-21 in Washington's Statler Hotel. Next quarterly meeting is to be held Sept. 10-12 at Los Angeles' Ambassador Hotel, and board approved recommendation to hold one of annual quarterly meetings on West Coast, alternating between Los Angeles & San Francisco. Board also approved circulation of questionnaire to determine "number, type, cost, and desirability of trade shows now patronized by electronic manufacturers" (Vol. 13:14).

(3) F. R. Lack, Western Electric, was appointed chairman of Guided Missiles committee, replacing L. L. Waite, North American Aviation. Military Products div. arranged to name ad hoc committee to meet Air Force request for study to provide simpler and cheaper maintenance of electronic equipment.

(4) Set div. directed exec. v.p. James D. Secrest to ask Commerce Dept. to obtain detailed statistics on radio imports from commercial attaches in those countries shipping radios into U. S. This followed Census Bureau report it would be unable to supply information.

* * * *

New Federal wage & hour regulation, denying learner certificates at less than \$1 hourly minimum wage for TV-radio-electronics components industry under all but "exceptional circumstances" is subject of suit by Beckley Mfg. Corp., Beckley, W. Va. and Micamold Corp. of Virginia, Tazewell, Va.—both subsidiaries of General Instrument Corp. They ask U. S. District Court in Washington to throw out new regulation and direct Wage & Hour administrator Newell Brown to reconsider their applications for learner certificate renewals. They say experienced workers are not available for simpler jobs and they would be forced to pay higher rate to inexperienced personnel.

Dealer junkets sponsored by manufacturers and wholesalers were criticized this week by Irving Witz, pres. of Emerson Radio of Pa. and Emerson of Fla. He said dealers would be better off remaining in their stores during current drop in sales rather than loading up on TV & appliances to qualify for trips. There are so many offers, he said, that some dealers are trying to sell trips they've won but are too busy traveling to take. He says he's heard Internal Revenue Service is questioning some awards' tax-free status, holding they come under taxable income.

Westinghouse receiving tube sales increase, says v.p. & gen. mgr. R. T. Orth, has resulted in adding 200 employees at Bath, N. Y. plant, bringing total to about 1400. Orth says plant is working overtime on Saturdays, will have to hire more employees by Sept. "if sales continue at this high level."

TV-radio imports and exports are being investigated by N. Y. Federal grand jury to determine, according to Anti-Trust div. attorney Harry G. Sklarsky, if a cartel exists and also why certain big foreign TV-radio producers have little or no exports to U. S. Issue came up before Federal Judge Lawrence E. Walsh when attorneys for Siemens & Halske A. G. of Munich and Electric & Musical Industries Ltd. (parent of Capitol Records), Manchester, England, asked judge to quash subpoenas on U. S. subsidiaries calling for parent firms' records. Judge reserved decision on motion.

Portable TV sets have been sold as first sets, says Motorola exec. v.p. Edward R. Taylor, when they should have been second or third sets for the patio, den, etc. with the result they accounted for 35% of total TV sales—rather than a more proper 20%. He also told Chicago Tribune forum on distribution and adv. this week that color TV had been marketed ineffectively at wholesale and dealer levels and he chided dealers for cutting prices rather than putting "customer satisfaction ahead of the fast buck."

Admiral's 1958 portable line uses 14-in. & 17-in. 110-degree aluminized tubes. Sets come in 4 colors and 4 models in each size: P14D11, recommended price \$130-\$140; P14D12 & 13, \$140-\$150; P14D14, \$150-\$160 (\$20 extra for uhf); P17D21, \$160-\$170; P17D22 & 23, \$170-\$180; P17D24, \$180-\$190 (\$25 extra for uhf). Single pole antennas are included in 3 higher-priced models of both series. Sets have cascode tuners, 41-mc IF.

TV service contract fee must be reported as income in year it's received, rather than splitting it between different years covered in 12-month contract, U. S. Tax Court in Washington has ruled. Ruling was against Bressner Radio Inc., Brooklyn. However, court ruled Bressner could deduct from 1951 fiscal income amount paid to new corporation to take over unexpired parts of service contracts.

Columbia Records has bought Bell & Howell Co. hi-fi radio-console line, price not disclosed, but including inventory, tooling and manufacturing rights. B & H pres. Charles H. Percy said sale would allow devotion of "capital, manpower and facilities to the expanding requirements of its photographic and tape recorder lines." Columbia will service B & H consoles now in dealer and consumer hands.

Emerson is prohibited from advertising that radios containing vacuum tubes are "transistor radios" and that certain radios are the smallest on the market—under terms of Federal Trade Commission consent order. FTC said Emerson's agreement to order is for settlement purposes only and is not an admission it has violated law. Complaint had been issued Aug. 20, 1956.

Philco plans open house, public invited, to show products and services during June 3-4 distributor meeting in Philadelphia's Bellevue-Stratford Hotel. Emphasis at 10 a.m.-10 p.m. showing will be on Philco activities public doesn't know too much about—guided missiles, medical research, computers, components, etc. One model of each consumer product will be displayed.

Estimated 12,000 receiving tubes, worth over \$20,000, were stolen from hush-hush National Security Agency's Franconia, Va., warehouse, says asst. U. S. Atty. A. Andrew Giangreco, and apparently sold to Washington dealer. No charges have been placed yet.

Sylvania June promotion is "Sun Bonnet" to be given free with purchase of 17-in. 110-degree portable. Bonnet extends 13-in. beyond face of tube, is designed to eliminate direct sun glare; inside is black, outside yellow.

GE appoints Brooke, Smith, French & Dorrance Inc. to handle advertising for specialty electronic components department.

Financial & Trade Notes: Television-Electronics Fund reports net assets of \$148,650,002 and 12,218,644 shares outstanding as of April 30, compared with assets of \$138,055,961 and 11,918,646 shares as of Jan. 31. During the quarter, these were the changes in its portfolio:

New stocks added: 6700 shares Johnson Service, market value \$415,400; 5000 Leeds & Northrup, \$151,250; 5000 Smith-Corona, \$188,750. Also added were \$100,000 worth of American Machine & Foundry 5% convertible debentures, due May 1, 1977; 3 groups of \$2,500,000 Govt. bonds each, due June 6 & 27 and July 18, 1957; \$1,500,000 General Finance commercial paper, due May 13, 1957; \$1,500,000 G.M.A.C. commercial paper, due May 28, 1957.

Stocks eliminated: 3100 Aerovox, market value \$14,337; 8000 DuMont Bestg., \$64,000; 9400 International Resistance, \$55,225.

Holdings were increased in ACF Industries, Addressograph-Multigraph, Aircraft Radio, American Chain & Cable, American Machine & Foundry, Babcock & Wilcox, Beckman Instruments, Bell & Howell, Bendix Aviation, Boeing Airplane, Burroughs Corp., Cincinnati Milling Machine, Clark Controller, Consolidated Electronics, Cornell-Dubiller, Douglas Aircraft, Dresser Industries, Eastern Industries, Eastman Kodak, Eaton Mfg. Co., Emerson Electric, Ex-Cell-O Corp., Fansteel Metallurgical, Garrett Corp., General Bronze, General Mills, General Precision Equipment, General Railway Signal, Harris-Seybold, Hazeltine, Hoffman Electronics, International Nickel of Canada, Lockheed Aircraft, Magnavox, Martin Co., Mergenthaler Linotype, Minnesota Mining, Motorola, National Acme, National Cash Register, Neptune Meter, North American Aviation, Otis Elevator, Philco, Reliance Electric & Engineering, Royal McBee, Servomechanisms, Stewart-Warner, Sylvania, Technicolor, Thompson Products, United Aircraft, Vltro, Westinghouse Air Brake, Westinghouse Electric, Zenith.

Part of holdings were sold in Allis-Chalmers, Amphenol, George W. Borg Corp., Borg-Warner, Bullard, Chance Vought Aircraft, CBS 'A', Cutler-Hammer, Electronics Corp. of America, Elgin Watch, Emerson Radio, Friden Calculating, GE, General Telephone, Globe-Union, Goodyear, Liquidometer, Penn Controls, Ryan Aeronautical, Sangamo Electric, Sperry Rand, Square D.

Unchanged during quarter were holdings in Admiral, American Bosch Arma, AB-PT, AT&T, Ampex, Barry Controls 'B', Bell & Gossett, Bulova, Carborundum, Clevite, Columbia Pictures, Conrac, Consolidated Electrodynamics, Corning Glass, Curtiss-Wright, DuMont Labs 'A', duPont, Eitel-McCullough, Electronics Assoc., Elox Corp. of Mich. 'A' & 'B', Federal Sign & Signal, Food Machinery & Chemical, General Dynamics, General Tire & Rubber, G. M. Giannini, Hammond Organ, Indiana Steel Products, Industrial Electronics, IBM, IT&T, Litton Industries, Machlett Labs, P. R. Mallory, Marchant Calculators, W. L. Maxson, Minneapolis-Honeywell, Northrop Aircraft, Oak Mfg., Paramount Pictures, Photon, Pullman, RCA, Raytheon, Robertshaw-Fulton Controls, Sprague Electric, Storer, Taylor Instrument, TelAutograph, Telecomputing, Television Assoc., Texas Instruments, Tung-Sol, 20th Century-Fox, Union Carbide & Carbon, United-Carr Fastener, United Utilities, Varian Assoc., Walt Disney Productions, Western Union.

[For status preceding quarter, see Vol. 13:8.]

* * * *

Twentieth Century-Fox earned \$2,171,680 (82¢ per share on 2,644,486 shares outstanding) on sales of \$32,863,275 in 13 weeks ended March 30 compared with \$460,739 (17¢) on \$26,202,889 in same period year earlier. Pres. Spyros P. Skouras told stockholders meeting May 21 in N. Y. that "it looks as though the first 6 months will produce earnings of about \$1.50" vs. 82¢ in first 1956 half. He said 1957 profits as whole would be ahead of last year, when earnings were \$6,198,419 (\$2.34), but declined to estimate by how much.

Guild Films had more than \$10,000,000 sales in first 5 months of fiscal year ending next Nov. 30—up 220% from entire 1956 fiscal period (Vol. 13:17), pres. Reuben R. Kaufman told stockholders May 18 at annual meeting in N. Y. He said "additional sales which we hope to close during the remainder of the current fiscal year could conceivably come to an additional \$10,000,000," bringing "very healthy profit" compared with \$8187 year earlier.

United Artists will gross \$5,000,000 this year from film syndication to TV compared with \$2,000,000 in 1956, pres. Arthur B. Krim predicted this week in first report since company became publicly owned (Vol. 13:15). In first 19 weeks this year, gross from theatrical distribution of film was \$20,761,962 vs. \$17,889,799 in similar 1956 period. (For UA's TV plans, see p. 6.)

Unitronics earned \$200,126 (40¢ per share on 505,700 shares outstanding) on 1st quarter sales of \$8,434,735 compared with \$134,454 (30¢ on 453,522 shares) on sales of \$6,160,974 in similar 1956 period. Pres. Brantz Mayor said Olympic TV sales were 5% ahead during the quarter vs. similar period last year.

Amphenol common stock, previously unlisted, went on big board of N. Y. Stock Exchange May 17.

Whirlpool earned \$3,027,838 (49¢ per share) on first-quarter sales of \$112,124,406 compared with \$3,762,062 (61¢) on \$95,068,150 in same 1956 period. Pres. Elisha Gray, in report to stockholders, said drop in profit was due to added cost of introducing new products and industry's pricing structure which "has not properly reflected increasing labor and material costs adequately to produce a suitable gross profit margin. We expect this to firm up during the balance of the year." He said industry sales have picked up since Easter and improvement is indicated for year's last half, although no change is expected in 2nd quarter results due to "strenuous competitive conditions . . ."

IT&T consolidated earnings were \$5,900,000 (82¢ per share) on revenues of \$157,000,000 in first quarter vs. \$5,500,000 (77¢) on \$121,000,000 year earlier, pres. Edmond H. Leavey predicting at May 22 stockholders meeting in N. Y. that company would have better year than record 1956 (Vol. 13:14). He stressed importance of IT&T research in electronics & communications in increasing development of civilian product lines in addition to huge defense business. Foreign manufacturing operations, particularly in telephone equipment, "are still our most valuable asset," Leavey noted.

Warner Bros. earned \$2,630,470 (\$1.43 per share on 1,828,696 shares outstanding) in 6 months ended March 2 vs. \$1,863,768 (75¢ on 2,474,247) in same period year earlier, reflecting high revenues (\$39,744,690 compared with \$37,587,622) from film rentals & sales. Pres. Jack L. Warner reported to stockholders May 22 that earnings from music publishing div. also continued to rise. Net working capital on March 2 totaled \$42,199,000 including \$12,300,000 cash, Warner said, noting that company has acquired 47,400 shares of its common stock in open market.

Dividends: Hoffman Labs, 25¢ payable July 1 to stockholders of record June 14; Sylvania, 50¢ July 1 to holders June 10; Clevite, 25¢ June 12 to holders May 31; Globe-Union, 30¢ June 10 to holders May 31; 20th Century-Fox, 40¢ June 29 to holders June 14; Radio Condenser, 5¢ June 20 to holders June 1; GE, 50¢ July 25 to holders June 21; Gabriel Co., 15¢ June 15 to holders June 10; Speer Carbon, 25¢ June 15 to holders June 3; Philco deferred dividend "due to the continued unsettled conditions in the appliance industry."

Top salaried U. S. industrialists in 1956, as shown in May 25 *Business Week* compilation derived from reports to SEC, include CBS chairman Wm. S. Paley, ranking 18th with \$316,526; CBS pres. Frank Stanton, 20th with \$312,335. They were the only TV-radio executives receiving more than \$300,000. Leading nation was Bethlehem Steel chairman Eugene G. Grace with \$809,011—which gave him take-home pay of about \$133,000 after taxes.

Varian Associates earned \$427,515 (32¢) in 6 months ended March 31 vs. \$153,970 (14¢) in corresponding period year earlier.

Ward Products (antennas) leases 48,000-sq.-ft. building at Amsterdam, N. Y., closes Ashtabula, O. plant about June 30.

German-made Metz radio and combination line, from \$70 to \$600, goes to Thor Appliance Corp., N. Y. as importer and national sales agent, replacing Metz of America, Los Angeles, which becomes Thor West Coast sales rep.

Philco leases 170,000-sq. ft. warehouse at Colerain Ave. & Monmouth St., Cincinnati, to be used, spokesman says, for Crosley & Bendix parts furnished by Avco following Philco's purchase of Bendix (Vol. 12:46).

Zenith increases suggested lists on 14-in., 17-in., 21-in. Royal and Super-Royal table TV sets by \$10.

NEW COMMISSIONER for FCC, to succeed outgoing Chairman McConnaughey, is still unknown. Couple new names have popped up, are getting some White House consideration—George S. Smith, partner in Washington law firm of Segal, Smith & Hennessey; John S. Patterson, deputy administrator of Veterans Administration. Comr. Doerfer is still standing up as likely choice for chairman.

Most previously speculated names seem to have fallen by wayside. Robert L. King, adm. asst. to Vice President Nixon, has asked that his name not be considered. George M. Moore, ex-Civil Service Commission member, is said to be up for another govt. post—clearly not for FCC. All others (Vol. 13:19) are claimed to be out of picture, some of them never in picture in the first place.

Smith is veteran of the TV-radio wars, extremely well known in industry. The 56-year-old lawyer is an Ohioan, like McConnaughey, served with old Federal Radio Commission 1928-32 before joining Segal firm. He could settle into Commission job about as fast as anyone. He's not being touted for chairmanship, doesn't aspire to it, says he'd like to see Doerfer make it.

Patterson, 55, is termed "prominent industrial & public relations executive" in VA biography, comes from Mt. Carroll, Ill. originally, has been with VA since Nov. 3, 1954. He's no complete stranger to TV—having served as consultant to U of N. C. just before joining VA, doing a great deal to get its TV facilities going.

Patterson has moved fast, got a lot of business experience, is considered "conservative." After graduation from U of Ill. in 1927, he joined Montgomery Ward, Chicago. Then executive positions with: Gary, Ind. Chamber of Commerce; Pekin, Ill. Assn. of Mfrs. & Commerce; Greensboro, N. C. Mfrs. Assn. and Chamber of Commerce; Navy 1942-46 (Comdr.); J. P. Stevens & Co. (fabrics mfr.) as industrial & public relations director before serving U of N. C. as consultant. He's married, has 3 sons.

He says he'd be interested in chairmanship if offered it but says hasn't been thinking about membership.

Programming breakthrough for Armed Forces TV stations came at week's end with joint announcement by Defense Dept. & NBC that network has donated more than 450 hours of new programming, consisting of over 6000 prints, representing 33% increase in total volume of programming available to the TV stations on isolated military posts. Included are 11 NBC Film programs—such as *Silent Service*, *Dennis Day*—as well as *Groucho Marx*, *People's Choice*, *Hallmark Hall of Fame* kinescopes and *Wisdom* interview series. Armed Forces TV Service operates 23 stations, is currently seeking bids for 6-station Korean network and is negotiating with Moroccan Govt. for 2 new outlets there.

Strain of TV quiz shows can be harmful physically to contestants, according to doctors interviewed by Marie Torre for column in May 23 *N. Y. Herald Tribune*. Consensus: Normally healthy adults are safe, but "pressure of a video contest can accelerate underlying ills, such as high blood pressure, coronary, ulcers & what have you." Dr. Jacques R. Fischl suggested physical examination or review of medical history before quiz participant goes on air. Shows aren't hazardous to children, however, according to Dr. I. Newton Kugelmass. TV doesn't "fluster" them; it's "just another form of being put on a pedestal," like at home.

Franchise for wired-theatre system in San Angelo, Tex. has been granted to Concho Theatres Inc., city to get 1% of gross receipts.

Sylvester L. (Pat) Weaver, ex-NBC pres. & chairman who has kept broadcasting trade guessing about what he's up to since he announced formation of Program Service last month (Vol. 13:15), came up with a couple of answers this week. He signed his first sponsor and got himself a partner. Sponsor is Taylor-Reed Corp., maker of Coca-Marsh syrup & other food products, for *Ding Dong School* (also ex-NBC) in 8 TV markets, starting July 1. Partner is Sid Caesar, who becomes NBC-TV alumnus after May 25 show. But disclosures of these Weaver developments raised more questions. Announcements from Weaver headquarters at 430 Park Ave., N. Y., didn't reveal what stations would carry *Ding Dong School* or what Caesar will be doing. He said sponsored program would be seen Mon. thru Fri. 10-10:30 a.m. in N. Y., Chicago, Washington, Philadelphia, Baltimore, Cleveland, Cincinnati, St. Louis. Weaver was reported in negotiations for time with WPIX, N. Y., which doesn't start broadcast day now until afternoon. Outlets for other cities were unmentioned. Caesar's role in Program Service was described as "new business association which will initially utilize the comedian's talents in a new form of motion picture presentation for theatres [employing a] unique adaptation of TV techniques." Nothing was said about using Caesar as TV performer.

One application for new TV station and 13 for translators were filed with FCC this week bringing total to 127 for stations (31 uhf) and 55 for translators. Station application was for New Orleans, Ch. 12, by owners of KWTW, Oklahoma City (Ch. 9). Translator applications were for Grangeville, Ida., Ch. 72, 75, 78 & 81 by Central Idaho T. V. Inc.; for Newport, N. H. (Ch. 71), Bennington, Vt. (Ch. 74) & Rutland, Vt. (Ch. 74) by owners of WWLP, Springfield, Mass. (Ch. 22) and upcoming WRLP, Greenfield, Mass. (Ch. 32), who also filed for Lebanon, N. H. (Ch. 81) last week; for North Warren, Pa., Ch. 67, 74 & 82 by Conewango Valley TV Inc.; for Brownlee Trailer Court, Ore., Ch. 79 & 82 by Morrison-Knudsen Construction Co.; for Madras, Ore., Ch. 80 by operators of Ch. 74 translator there. [For details, see *TV Addenda 24-T* herewith.]

ABC-TV's Mike Wallace and disk jockey "Long John" of WOR, N. Y., are being called to stand next week as witnesses in Federal Trade Commission's "misleading advertising" proceeding against Dan Dale Alexander, author of *Arthritis and Common Sense*. FTC charges that Alexander's appearance on their shows earlier this year constituted "advertising." Hearing before FTC examiner James Purcell will be conducted in Army Bldg., N. Y. Theme of book, which has sold 550,000 copies at \$4, is that arthritis is caused by faulty diet, can be cured by proper diet—and FTC claims this is false.

"Broadcasters Club" in Washington, in process of formation by committee headed by attorney Leonard H. Marks, contemplates 150 local members (\$100 initiation, \$100 annual dues), 300 out-of-town (\$50 & \$50). Location: 1737 DeSales St. Colony Restaurant will supply lunch, cocktails, cater private parties—no dinner, however.

Jerrold Electronics buys the 3 J. H. Whitney community antenna systems—in Walla Walla, Richland & Wenatchee, Wash., price undisclosed, taking Whitney completely out of CATV business. Systems service some 9000 subscribers, bringing the 9 Jerrold-owned systems' total to 20,000.

Paul W. Kesten Fellowship was established this week by CBS Foundation Inc. at Harvard Graduate School of Business Administration in memory of former CBS exec. v.p. & vice chairman who died in Dec. 1956. Fellowship in advertising or marketing, worth \$2500 annually, will be awarded to "outstanding" first-year student.

SUMMARY-INDEX OF THE WEEK'S NEWS—June 1, 1957

"WEAVER NETWORK" picks up steam, announcing 14 hours weekly—but plans are even bigger than talk, with night shows & full day schedule blueprinted (p. 1).

OPPOSITION TO CRAVEN PLAN appears stronger than expected, includes AMST & JCET. Networks appear lukewarm, favor objectives, doubt practicality (p. 2).

TALL-TOWER CRITERIA agreement imminent, opponents of new standards arguing that they would ban all towers over 1000 ft. except in antenna farms (p. 2).

FCC PAY-TV ACTION provoking differing reactions. Rep. Harris seems satisfied with Commission's doubts. Rep. Celler wants pay-TV prohibited—now (p. 3).

U. S.-CUBA MICROWAVE grants made by FCC to AT&T and Florida Micro Communications, both planning TV service in summer or fall at \$500-\$750 an hour (p. 4).

AVERAGE TV FACTORY PRICE dropped to \$121 in April from \$127.50 year earlier, as portables' share of market increased from 10% to 35% (p. 9).

STATION BOX SCORE stands at 500 as Paducah vhf starts, Sacramento uhf stops. Canadian satellite begins in Argentina, Nfld. (p. 6).

SAFEGUARDS FOR TV and other allocated frequencies urged by FCC general counsel as Senate Committee considers airways modernization bill (p. 7).

VIDEOTAPE MAY SOON be cheaper than 16mm film for syndicated shows & commercials unless inspection & billing procedures improve, study indicates (p. 8).

TV NETWORK BILLINGS dip in April to \$41,206,913 but show 5.7% gain over year ago. Business this year runs at 7.8% higher rate (p. 12).

PAT WEAVER STARTS MAKING LIKE A NETWORK: Sylvester L. Weaver's "Program Service" began looking more like a network this week -- and there are strong indications that the former NBC chairman & pres. has more up his sleeve than he's talking about.

Announcing Chicago Tribune's WGN-TV as his first "affiliate," he disclosed a few more of his program plans -- totaling 14 hours weekly -- as a starter.

Program Service's weekday schedule of live shows, beginning July 1, as announced by Weaver in Chicago: 9:30-10 a.m., Mary Margaret McBride; 10-10:30, Ding Dong School (sponsored by Taylor-Reed Corp.); 10:30-11, Paul Fogarty's exercise show from WGN-TV. Some time this summer, he plans to enter early evening field with new 5:30-6 p.m. weekday "Entertainment with Information," will also network WGN-TV feature Lunchtime Little Theatre. He revealed that he'll start nighttime programming next fall with 90-min. Saturday dance party from Chicago's Aragon Ballroom.

Without giving call letters, Weaver has announced he'll have affiliates this summer in New York, Washington, Philadelphia, Baltimore, Cleveland, Cincinnati and St. Louis, and that in Oct. he'll add Hartford-New Haven, Indianapolis, Milwaukee, Minneapolis and Detroit. But he's shooting for greater number of outlets this fall.

Though he's refusing to go very far in discussing future plans -- preferring to dole out tidbits of information at strategic moments -- here are some indicators of the kind of planning currently going on in the Weaver domain:

Programming -- By fall, he's hoping to build up an almost-solid block of day-time shows from 9:30 a.m. until 3 p.m. His nighttime plans include every evening of week -- with 2 hours on Saturdays (7-9 p.m.). Though he has already announced 90-min. dance party for Saturday evenings, there is still considerable speculation that at least part of the 2-hour segment will be occupied by Weaver's friend and "movie" partner, Sid Caesar. As Weaver himself said in Chicago this week:

"One of the glorious things about the situation now is that so many entertainers are available. Because of the follow-the-leader policy of the networks, look at how many comedians are free -- Sid Caesar, Buddy Hackett, Jack Leonard, Jack Paar, Jack Carson, Imogene Coca, to name a few."

"Spectacular" concept, which he pioneered, still features in his plans -- with at least one "sports spectacular" planned early in the game.

Sponsors -- Though only announced advertiser is Taylor-Reed (Cocoa Marsh) for Ding Dong School, there has been plenty of advertiser interest in Program Service project, with signatures on dotted line for at least 5 hours weekly -- and sponsors either signed or on the verge include an auto maker and an aluminum firm.

Affiliates -- Though Program Service will affiliate at first mainly with independent stations in 4-station markets, it's also plumping hard for agreements with some ABC affiliates along its basic cable-microwave route. The temptation Weaver is offering is daytime programming (vs. ABC-TV's begin-at-3 p.m. status) -- and there are reports he's asking options on nighttime segments in exchange.

Personnel -- Program Service currently operates with basic 4-man staff, but additions are due, including at least one more former NBC executive. -- (DL)

Craven Plan Running Into Opposition: Deadline for comments on "Craven Plan," FCC's proposal to dispense with allocations table (Vol. 13:17), comes June 3 -- and support by industry shapes up as lukewarm at best, with some substantial groups quite vigorously opposed. Chairman McConnaughey seems to be pushing for final approval before he leaves Commission June 30 -- for he and Commission majority quickly denied the requests for more time filed last week by RETMA, this week by NARTB.

Networks indicate they don't plan any strong stand on matter. Likelihood is that they'll favor plan's objectives -- flexibility & speed in establishing stations -- but express doubt that proposal will accomplish them. Actually, like the other owners of well-situated vhf stations, they have something to lose in any plan that tends to permit encroachment on coverage of their stations -- though Craven Plan rigidly specifies that engineering standards won't be breached.

Assn. of Maximum Service Telecasters, however, doesn't take any middle ground. It will claim that allocations table is "keystone" of today's good service; that present method of channel-shifting via rule-making makes it easy for Commission to evaluate moves; that proposal is premature because TASO has just started its work on analysis of vhf-uhf coverage; that FCC itself points out fact most vhf channels are already occupied; that uhf would be weakened by vhf move-ins; that plan will produce less flexibility, rather than more; that faster rule-making procedures are better answer; that mileage separations will be hard to maintain. AMST spokesman says none of its 124 members has dissented from its position.

* * * *

Another source of opposition is Joint Council on Educational TV. Though "deeply gratified" by proposal to maintain educational channel reservations, JCET believes there are many dangers in plan, fears whole TV structure may be weakened.

JCET says that present procedures aren't "inflexible." In fact, it states, "If the procedural step of rule-making were to be abandoned, it appears that in many cases proposals to change or add TV facilities would be presented to the Commission on a competitive basis, so that the desirability of the change itself would have to be considered together with the choice among the applicants. Surely in many cases this would result in a much longer proceeding, and oftentimes the competitive aspects of the proceedings would be waste motion, if the changes in facilities were found intrinsically undesirable."

JCET is very fearful of hurting uhf. It says new rule may "make it generally possible to add a second vhf station in almost any area where there is a single vhf station presently in operation" and it claims that plan "would inevitably weaken the Commission's efforts to promote uhf by means of deintermixture." -- (AW)

Tall-Tower Criteria Agreement Ready: The 5-year-old military-aviation-TV industry dispute over tall TV towers comes to another climax Mon. June 3 when Joint Industry-Govt. Tall Structures Committee (JIGTSC) meets to ratify new set of criteria for the guidance of regional airspace subcommittees and Washington Airspace Panel in their consideration of whether proposed tall towers represent aviation hazards.

Document appears virtually to prohibit all future towers over 1000 ft. unless they are built in antennafarms -- but its supporters say this isn't true, that it's sufficiently flexible to permit Airspace Panel to continue to decide on a case-by-

case basis. New criteria are supported by entire NARTB board and by AFCCE, presumably will have no trouble gaining formal approval by the TV-aviation-govt. group.

TV industry supporters of document say it is only way to stave off action in Congress to ban all over-1000-ft. towers. Controversial section of draft involves apparent endorsement of Air Force regulation 86.3, which provides: "Objects or structures located at a distance greater than 100,000 ft. from an airfield reference point are considered obstructions to air navigation if...the top elevation is more than 1000-ft. above the ground elevation at the site." Document specifically states that Air Force rule shall be applied as "reference criteria" in cases of military and "joint-use" airports (all airports used jointly by military and civil planes).

Opponents state that "joint-use" term covers most major airports -- and they add that "over 100,000 ft. from an airfield reference point" could include virtually any location in the country. JIGTSC document notes these exceptions to criteria:

"The above criteria are adopted with the understanding that 'farm areas' will be established in every community. In the establishment of the height of towers in these 'farm areas', aviation interests will compromise their needs to the fullest extent possible in order to provide tower heights required to deliver the maximum service to the public. To meet this objective, the above-noted criteria will not apply." In preface to criteria, JIGTSC document states:

"These criteria, per se, are not intended as a rigid standard to be arbitrarily applied by the Airspace Panel in approving or disapproving applications for tower construction, and it is not intended that these criteria shall apply to existing antenna structures. Exceptions will be made by the Airspace Panel for the purpose of establishing or adding to antenna farm areas, as appropriate, and where existing conditions of terrain, obstructions or other circumstances would make application of these criteria inappropriate."

JIGTSC will ask FCC to change Part 17 of its rules to conform to new criteria. Commission already has rule-making pending to encourage use of antenna farms.

SPLIT REACTION to FCC's move on pay-TV last week (Vol. 13:21) is still evident—proponents still claiming they're getting somewhere, opponents satisfied they've staved off whole business for at least a year, perhaps indefinitely.

Newspaper reporters shared this schizophrenia. "If one thing is clear," wrote Jack Gould in May 29 *N. Y. Times*, "[it] is that pay-as-you-see video is a long way from practical realization. There are enough problems, social, legal, technical and economic, to keep the idea of toll-TV tied up for years."

Here's how *N. Y. Herald Tribune's* Charles Carroll evaluated it May 26: "Box-office TV, described variously as boon or bane to the TV industry, has taken a giant step toward full-scale testing. The FCC in effect flashed the green light for testing when it decided last week that it has the power to authorize pay-TV. However, just when the controversial system will go on the air on a large scale was not clear."

Even pay-TV's foes in Congress—Rep. Harris (D-Ark.), chairman of House Commerce Committee, and Rep. Celler (D-N. Y.), chairman of House Judiciary Committee—have varying views of FCC's action. Harris indicates he's satisfied that Commission shares his doubts about its powers to give subscription TV final go-ahead, noting that Commission said it may have to come to Congress later (see Special Report, May 25). Celler isn't complacent. He wants pay-TV outlawed—period. He wants FCC to declare that toll-TV simply isn't in the public interest—and if Commission won't do it, he intends that Congress kill the matter, once and for all. He told us he'll press Harris committee to conduct hearings on his bill to prohibit pay systems.

Theatre owners aren't relaxing, either. Their Joint Committee on Toll TV issued statement asserting that

FCC "erred" and that Congress & courts will find subscription TV "unconstitutional on more than one ground."

Meanwhile, Skiatron's Matty Fox, that wide-ranging wheeler-dealer, has west coast all stirred up with talk about financing move of N. Y. Giants to San Francisco and Brooklyn Dodgers to Los Angeles while tying up closed-circuit pay-TV rights to their games. Fox has been rumored planning to put pay-TV across under virtually every conceivable situation and in virtually every country with TV. In San Francisco, Pacific Telephone & Telegraph Co. pres. Mark Sullivan confirmed he had consulted with Fox representative Allen Lane about supplying cable facilities. "We have been working with Skiatron to find out the initial number of lines they're going to want," he said, "I think the plan is to just have a coast circuit at first and later to work back east by hooking onto trunk coaxial lines."

Dodgers pres. Walter O'Malley pooh-poohed the Skiatron talk. "I have never received a cent from Mr. Fox at any time," he said. "Skiatron doesn't enter the picture at all. I guess this is a great day for denials, isn't it?" No one seemed able to reach Fox for comment, and plenty of reporters were trying. At any rate, newspapers were full of such quotes as: "Reports circulated that the 2 clubs might each receive \$2,000,000 a year for 10 years for the rights to paid, closed-circuit TV coverage on the west coast."

■
Add candidates for FCC vacancy: T. Hartley Pollock, St. Louis attorney; he's 49, member of Pollock, Ward, Klobasa & Shaw, was active in Citizens for Eisenhower, has been pres. of Bar Assn. of St. Louis (1955-56). He's being pushed for chairmanship. There's no reliable indication, meanwhile, as to who's in lead position among all those named to date (Vol. 13:21).

FIRST 'OVER-HORIZON' TV microwave grants were made this week by FCC—to 2 competing companies proposing to link Florida and Cuba by 180-mi. tropospheric scatter relays—with indications that both would be in operation by late summer or early fall. The international TV grants were made to AT&T and Florida Micro Communications Inc.

AT&T's grant was modification of authorization made last year for over-horizon telephone communications between Florida City, Fla. & Guanabacoa, Cuba on 840 & 880 mc. FCC action permits monochrome relay to be added. Facilities at Cuban end of link will be owned and operated by Radio Corp. of Cuba (IT&T subsidiary). Although AT&T hasn't given target date for the 2-way relay operation, best guess is that operation will begin by about mid-Sept. 1957, in time for World Series.

Grant to Florida Micro Communications is for Tavernier, Fla.-Matanzas, Cuba link on 800 mc. FMC will own stations at both ends, plans only southbound service initially, adding northbound relay later. It has entered into agreement with Cuba's Telemundo network (CMAB-TV, Havana, & satellites) to bring Cuban programs to U.S. FMC, with headquarters at 1521 S.W. 13th St., Miami, is headed by Miles R. DuKet, with about a score of other stockholders, mainly from Chicago. It hopes to have monochrome-color channel in operation in 2-3 months, using composite klystron-powered transmitter.

Grant to AT&T was unanimous (Lee absent), while FMC grant was 4-1, Mack abstaining and Craven dissenting and indicating doubt whether "technical feasibility has been indicated."

Neither carrier has yet filed tariffs with FCC, but AT&T indicated in its application that it plans to charge about \$600 an hour for monochrome TV service over the relay, and FMC spokesmen have informally stated their charge would be \$500 an hour for monochrome and \$750 for color.

FCC's network study committee held another "hearing" in New York Federal Courthouse this week, with chief examiner James D. Cunningham presiding. This time 3 of the 7 subpoenaed independent programmers—Entertainment Productions, Official Films and TPA—showed up. Cunningham gave them until June 14 to produce material requested by network study group under Dean Roscoe Barrow. Other 4—Screen Gems, Ziv, MCA-TV & Revue Productions—continued to fight committee's right to subpoena their financial data, and Cunningham filed request with FCC to institute proceedings in Federal Court to require recalcitrants to honor subpoenas. The 4 programmers immediately answered with new filing, stating that matter could not be referred to court while Commission was still considering their request for review of Cunningham's refusal to quash subpoenas.

FCC was brought into act featuring Mike Wallace & Mickey Cohen with filing of protest May 31 by Los Angeles police captain James Hamilton against "sensationalism" of Wallace's ABC-TV interview May 19 with ex-gangster Cohen. It was another repercussion from broadcast, for which ABC-TV v.p. Oliver Treyz apologized on Wallace's May 26 show. Hamilton is one of group of Los Angeles officials who were denounced by Cohen in unrehearsed interview in language which brought threats oflander suits against all involved, including sponsor Phillip Morris. FCC refused to disclose full contents of Hamilton's complaint until ABC-TV has chance to present its side of controversy.

Blast at FCC, voiced by Rep. Dingell (D-Mich.) in House speech this week, used some of strongest language applied to Commission since death of Rep. Cox (D-Ga.), whose cry was usually "Communists!" Detroit attorney Dingell said Chairman McConnaughey, who leaves Commission June 30, is "winding up one of the most ignominious careers in the history of quasi-judicial regulatory agencies." He also blasted Comr. Doerfer as having "worked closely with Mr. McConnaughey in giving the Commission the reputation it has acquired . . . [Both] have demonstrated a penchant for endearing themselves to networks and bigger telecasters—the people, in short, whom the FCC is supposed to regulate." Dingell said a Commission investigation of AT&T charges for TV transmission "has been kept under wraps, possibly because of the Chairman's ties with the people he formerly represented as an attorney." McConnaughey should be brought before the House Commerce subcommittee, he said, to explain favors he has sought from broadcasters—and also certain "decisions of the Commission in which he and 3 others (Comrs. Doerfer, Lee, Mack) of the 7-man group have voted together in shocking disregard of policies," citing grant to *Boston Herald-Traveler* as example. Dingell went on to say that "among attorneys who are practicing before the present FCC, it is now believed that a case is arranged rather than tried, and the winner is the party with the most political strength." Commissioners declined to react.

Allocations activity at FCC this week: (1) Finalized addition of Ch. 10 to Tampa-St. Petersburg. (2) Proposed shift of Ch. 9 from Iron Mountain, Mich. to Wausau, Wis., replacing it with Ch. 8. (3) Invited comments on conflicting proposals to add Ch. 6 to Eureka, Cal. or Brookings, Ore. (4) Received proposal from WAKR-TV, Akron (Ch. 49) for addition of Ch. 12 to Akron-Cleveland, substituting Ch. 41 for Ch. 12 in Erie, Pa., Ch. 5 for Ch. 12 in Clarksburg, W. Va., Ch. 12 for Ch. 5 in Weston, W. Va.; proposal would require Erie's WICU to shift to Ch. 41, Clarksburg's WBLK-TV to Ch. 5. (5) Received proposal from prospective applicant Minnowa Bcstg. Co., Fairmont, Minn., for addition of Ch. 12 (6) Received request from WVEC-TV, Hampton-Norfolk (Ch. 15) for permission to shift to new Ch. 13.

Efforts of WJHP-TV, Jacksonville, Fla. (Ch. 36) to block grant of WFGA-TV (Ch. 12) pending FCC action on request to deintermix area were turned down by Court of Appeals this week. Court said that Commission was neither arbitrary nor capricious in its action; that Commission was reasonable in hastening service to area; that no tentative decision in favor of deintermixture had been made—as in Peoria, Springfield, Hartford, New Orleans, etc.—when WJHP-TV asked that WFGA-TV grant be stayed.

Experimental operation on new Ch. 12 in New Orleans, proposed by WJMR-TV (Ch. 20), drew opposition from TASO & AMST. TASO denied it had generally approved proposal and AMST told FCC that operation would be at co-channel mileage separation less than that prescribed by FCC rules. WJMR-TV proposes 40-kw ERP, 250-ft., says it would cause no more interference than 316-kw & 1000-ft. at normal separation.

CPs issued by FCC this week: Ch. 7, Hays, Kan., to KAYS; Ch. 5, Great Falls, Mont., to Cascade Bcstg. Co. (management consultant Francis N. Laird & engineer Robert R. Laird); Ch. 72 translator, Libby, Mont., to Libby Video Club; Ch. 83 translator, Santa Rosa, N. M., to Chamber of Commerce.

Probe of govt. agency "leaks" by Sen. Jackson's (D-Wash.) committee (Vol. 13:21) brings FCC and other agency representatives up for closed meetings June 4.

NARTB board's semi-annual meeting is scheduled June 18-21 at Washington's Mayflower Hotel.

Personal Notes: Ludwig W. Simmel promoted to mgr. of sales, service & traffic of NBC Radio; Wm. G. Thompson Jr. to supervisor of co-op sales . . . Michael Burke, ex-Ringling Bros. and Barnum & Bailey, named director of CBS-TV network programs in England, where he will act as talent scout . . . Frank McCall, ex-NBC, resigns as gen. mgr. of National Airlines' upcoming WPST-TV, Miami, to join Cellomatic Corp., N. Y. as v.p. in charge of sales . . . Ralph N. Harmon and Richard M. Pack, Westinghouse Bestg. Co. v.p.'s, awarded Westinghouse Electric Corp.'s Order of Merit & Silver W for "outstanding contributions to Westinghouse leadership" in broadcasting . . . Martin L. Nierman promoted from eastern sales mgr. to v.p. & national TV div. sales mgr. of rep Edward Petry & Co.; Ernest Lee Jahncke Jr., former v.p. & asst. to pres. of ABC, joins Petry as v.p. & asst. to pres. Edward Petry; Ted Page promoted to asst. sales mgr.; Thomas E. Knode resigns as v.p. in charge of TV, Charles H. Philips as sales development mgr. . . Dillon Anderson reelected to Westinghouse Electric board following 2-year hiatus while he served as President Eisenhower's special asst. for national security affairs; he's also 2.8% owner of KTRK-TV, Houston . . . Richard D. Buckley, gen. mgr. of DuMont's newly-acquired radio WNEW, N. Y., named DuMont v.p. in charge of all TV-radio programming & sales; John M. Grogan shifts as program mgr. from WNEW to WABD . . . Jerome P. McGranaghan, ex-GOP national speakers bureau, becomes asst. to NARTB govt. relations mgr. Vincent T. Wasilewski . . . Eugene S. Thomas, gen. mgr. of KETV, Omaha, elected v.p. of owner Herald Corp. (*Omaha World-Herald*) . . . Miss Alma F. Graef, ex-MBS director of commercial operations, joins NTA Film Network as director of sales services; Mrs. Lynn Cleary Christensen, ex-DuMont Network and WABD, New York, named asst. to v.p.-gen. mgr. Raymond E. Nelson; Joseph Schackner, ex-MBS, becomes asst. to station relations dir. Tony Azzato . . . Merl L. Galusha, from radio WGY, Schenectady, rejoins WRGB as mgr., WRGB sales manager Robert F. Reid becoming manager of radio WGY, succeeded at WRGB by George F. Spring . . . Waldo Abbot retires June 30 after 32 years as U of Mich. broadcasting director, will continue for year as consultant . . . Roger B. Read promoted from local sales mgr. to asst. gen. mgr. & gen. sales mgr. of WKRC-TV, Cincinnati,

Jack Berch, who has headed own producing firm, joins ATV Film Productions as partner & v.p. in charge of sales & client relations . . . James F. O'Grady named midwest sales mgr. of rep Young TV Corp., headquartering in Chicago . . . Jack Miller appointed asst. gen. mgr. of KTVR, Denver.

Obituary

Frank Pell Lawrence, 70, retired AT&T v.p. in charge of long lines dept., died May 27 in Community Hospital, Montclair, N. J., from burns suffered 2 days earlier from flaming canvas lawn chair at home. He joined Bell System as engineer in 1912, advanced to AT&T long lines chief in 1940, retired 6 years later. Surviving are his widow, son, daughter, sister.

Realignment of NBC-TV news & special affairs set-up was announced this week by exec. v.p. Robert E. Kintner, putting new emphasis on news and sports. New creative programming unit has been established, headed by Henry Salomon, director of "Project 20" and writer-producer of *Victory at Sea*, who reports to TV network programs v.p. Manie Sacks. News dept. has been separated from public affairs dept. and will operate as independent unit under news director Wm. R. McAndrew; sports dept., also separate, continues under director Thomas S. Gallery. Davidson Taylor continues as v.p. for public affairs and in addition has been appointed general program exec. in program dept. News, public affairs & sports depts. report to Kintner.

Deadline for applications for NBC President's Award of \$4000-\$6000 for TV-radio study & training is June 30. Annual competition is open to all U. S. applicants aged 25-35 "who show unusual skill & promise in the field of broadcasting." Winner will study under major directors, producers or executives.

Hearne & Spillane is new name of John P. Hearne law firm, Lester W. Spillane, ex-FCC, advancing to partner. Offices: 405 Central Tower Bldg., San Francisco; 6363 Sunset Blvd., Los Angeles.

Private plane crash atop 9500-ft. Ferris Mt., Wyo., cost life of Dalton LeMasurier, pres.-gen. mgr. of KDAL-TV & KDAL, Duluth-Superior. Rescue party May 30 found wife, who survived 19 days of exposure without food on snow-covered peak. Mrs. LeMasurier, 45, was unable to tell rescuers how long her husband lived after engine failure sent their light plane down May 11 in flight from Pasadena toward Duluth. But she thought he died either 4 days later or week before she was found huddled near his body. With no shelter except burned wreckage of plane & no nourishment except 4 pieces of chocolate & bottle of vitamin pills, she suffered shock, frostbite, sunburn, malnutrition, but was reported in "amazingly good" condition at Rawlins, Wyo. hospital. Search for plane, missing following take-off from Salt Lake City for Rapid City, S. D., ended after foreman Jack Putnam of Buzzard Ranch at foot of mountain spotted wreckage through binoculars. Duluth stations had offered \$2500 for information leading to discovery.

J. B. Fuqua will be sole owner of WJBF, Augusta, Ga. (Ch. 6), having paid \$300,000 for 35% held by Martin Theatres of Ga. and acquired 6% held by D. M. Kelly Jr. for undisclosed sum. Martin Theatres recently became sole owners of WTVM (formerly WDAK-TV), Columbus, Ga. (Ch. 28), buying 25% from radio WDAK for \$25,000 (Vol. 13:19).

CBS Foundation Inc. will give 1957 grants totaling \$38,000 to 12 privately-supported schools from which 19 key CBS executives graduated. Awards of \$2000 each are "in recognition of the services of these alumni to CBS," representing "cost of education" over & above costs charged to student: George T. Bristol Jr., Amherst; Kenneth E. Raine, Berea; Frank J. Shakespeare Jr., Holy Cross; Wm. Bachman & Joseph A. W. Iglehart, Cornell; George J. Arkedis & Robert J. Dunne, Fordham; Leon R. Brooks, Philip Feldman & Lewis Gordon, Harvard; Howard A. Chinn & Robert G. Marchisio, MIT; Harold C. Lang, NYU; Wm. Ackerman & Irving Townsend, Princeton; John A. Schneider, Notre Dame; Mitchell Miller & David J. Oppenheim, U of Rochester; Henry Howard, Yale.

USIA budget of \$96,200,000—slashed from \$144,000,000 sought by Administration—was finally voted May 29 by economy-bent Congress. Appropriation is \$6,000,000 more than Senate first granted (Vol. 13:20), but \$10,000,000 under figure favored by House for fiscal 1958 (Vol. 13:16). USIA had \$113,000,000 budget in current fiscal year. Only Sens. Javits (R-N. Y.) & Neuberger (D-Ore.) held out for Administration in 75-2 passage by Senate of Senate-House compromise measure, which struck at USIA payrolls & overseas news service. Left intact, however, were major VOA TV-radio projects, including \$1,100,000 to start new Middle East transmitter.

New and Upcoming Stations: WPSD-TV, Paducah, Ky. (Ch. 6) began May 28 as NBC-TV interconnected affiliate, becoming city's first outlet—nearest stations being WSIL-TV, Harrisburg, Ill. (Ch. 22), 45 mi.; KFVS-TV, Cape Girardeau, Mo. (Ch. 12), 53 mi. With KCCC-TV, Sacramento (Ch. 40) leaving air May 31 (Vol. 13:20-21), on-air box score remains 500, operating uhfs drop to 91. First Canadian satellite, CJOX-TV, Argentia, Nfld. (Ch. 10) began May 30 carrying programs of parent CJON-TV, St. John's (Ch. 6), bringing Canadian on-air total to 40.

WPSD-TV has 10-kw RCA transmitter, 500-ft. Ideco tower with 6-section superturnstile antenna on south edge of town. Owner *Paducah Sun-Democrat* (E. J. Paxton family) recently sold radio WKYB there to WEW, St. Louis (Vol. 13:16), also owns 25% of WFRX, West Frankfort, Ill. E. J. Paxton Jr. is v.p.-gen. mgr.; Sam Livingston, from WKYB, asst. gen. mgr.; Fitz Hooton, ex-KPLC-TV, Lake Charles, program director; E. J. Pell, WKYB, chief engineer. Base hour is \$400. Rep is Pearson.

CJOX-TV has 500-watt RCA transmitter with wave-stack antenna 75-ft. above ground on hill adjacent to U. S. Naval & Air Base, on west coast of peninsula, 60 mi. from St. John's. Owners are Geoff Stirling, pres. & gen. mgr. of parent CJON-TV, with v.p.-program director Don Jamieson serving as station mgr. of CJOX-TV. CJON-TV is raising base hour July 1 from \$200 to \$230. Reps are Weed and All-Canada.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WIIC, Pittsburgh (Ch. 11) plans July 15 start with NBC-TV but hasn't set target for test patterns, reports gen. mgr. Robert A. Mortensen. It's installing 100-kw RCA transmitter, has 840-ft. Truscon tower ready except for installation of transmission lines and GE helical antenna. It will be city's 2nd commercial vhf, WENS (Ch. 16) planning to leave air when WIIC gets going. Base hour will be \$1800. Rep will be Blair.

WWL-TV, New Orleans (Ch. 4) has started construction of transmitter house at site near Gretna, La., expects to begin Aug. 15 with CBS-TV, writes gen.-mgr. W. H. (Slim) Summerville for owner Loyola U. Ideco 750-ft. tower is scheduled to arrive Aug. 1, delivery date on RCA transmitter and antenna unreported. J. D. Bloom, from WWL, will be chief engineer. Rates not set. Rep will be Katz.

KETV, Omaha (Ch. 7) has studio-transmitter building at 27th & Douglas Sts. 85% complete, expects to have 50-kw RCA transmitter wired by July, 1957, says v.p.-gen. mgr. Eugene Thomas for grantee Herald Corp. It has 583-ft. Ideco tower with 12-section antenna ready, aims for start with ABC-TV in Sept., says test patterns will begin during "Aug. or Sept." John Quigley, ex-operations mgr. of KAKE-TV, Wichita, will be program mgr. Rates not set. Rep will be H-R Television.

WLWI, Indianapolis (Ch. 13), planning Sept. 15 start with ABC-TV, has Sept. 1 test pattern target, reports John T. Murphy, TV v.p. of grantee Crosley Bestg. Corp. Foundation forms for transmitter house are being constructed and 50-kw RCA transmitter has been ordered for Aug. 15 delivery. Ideco 1016-ft. tower is due July 12, 12-bay superturnstile antenna Aug. 1. Robert Lamb, ex-TV sales mgr. of Crosley rep firm in Chicago, will be sales mgr. Rep will be Crosley.

WAVY-TV, Portsmouth-Norfolk (Ch. 10) has Aug. 15 test pattern target, hopes to start with ABC-TV Sept. 1—Sept. 15 at latest—reports v.p.-gen. mgr. Carl J. Burkland. Studios are ready and closed-circuit programs have been conducted for special groups. It has 50-kw RCA transmitter on hand but installation awaits comple-

tion of transmitter house, due in about 7 weeks, at site near Drivers, Va. Work on 1050-ft. Ideco tower with 12-section superturnstile antenna begins June 3, with completion target June 25. Base hour will be \$700. Rep will be H-R Television.

KMOX-TV, St. Louis (Ch. 11), set back when FCC turned down CBS request to start with temporary facilities (Vol. 13:14, 18), has changed target to "close to the end of the year," reports gen. mgr. Gene Wilkey. Make of transmitter and tower to be used not reported. Rep will be CBS Spot Sales.

WINR-TV, Binghamton, N. Y. (Ch. 40) has changed test pattern target to Aug. 15, programming to Sept. 1, reports gen. mgr. Dale Taylor, ex-mgr. of radio WENY, Elmira. Owner is *Binghamton Press* (Gannett), which acquired CP along with radio WINR from group headed by Mayor Donald W. Kramer (Vol. 13:2). It has a 25-kw RCA transmitter due July 15 and construction has begun on TV addition to radio transmitter house. RCA 52-gain pylon antenna is due July 1 for installation on 299-ft. tower. Base hour not set. Rep will be Hollingbery.

KPLO-TV, Reliance, S. D. (Ch. 6) still is planning June test patterns, but hasn't set programming target for operation as semi-satellite of parent KELO-TV, Sioux Falls (Ch. 11), reports principal N. L. Bentson. RCA 10-kw transmitter has been installed in Butler steel building and 700-ft. Stainless tower is scheduled for completion by June 10, when 6-section superturnstile antenna is to be installed. Microwave connection to Sioux Falls, 146 mi. away, is under construction. KELO-TV, also operating KDLO-TV, Florence, S. D. (Ch. 3), has \$450 base hour. Rep is H-R Television.

KTVC, Ensign, Kan. (Ch. 6) expects to begin test patterns about first week in July, hasn't set programming target, reports Wendell Elliott, v.p.-gen. & sales mgr. & 5.65% owner. It has 5-kw transmitter installed, is assembling 6-bay antenna for installation on 600-ft. Liberty tower, now up. GE microwave to Stafford, Kan. will be ready shortly, to pick up ABC-TV affiliate KAKE-TV, Wichita. Base hour will be \$100. Rep not chosen.

WMVS-TV, Milwaukee (Ch. 10, educational), planning Aug. start, has 10-kw RCA transmitter on hand, but transmitter house near WITI-TV at Port Washington & Donges Bay Rds. won't be ready until mid-July, writes H. E. Barg, asst. director & business mgr. for grantee Board of Vocational & Adult Education. Alford 4-bay antenna will be side-mounted at 700-ft. level on WITI-TV tower. — (PS)

Second translator in Truth or Consequences, N. M., K8OAC began operation May 21, repeating KGGM-TV, Albuquerque, reports city mgr. Robert B. Laursen—city being operator of K7OAE, repeating KOB-TV, Albuquerque. Redmond, Ore. translators K73AE & K83AA haven't target as yet to begin repeating KOIN-TV & KPTV, Portland, reports A. J. Sheffield, JC-TV chairman for grantee Redmond Jr. Chamber of Commerce. He hopes Adler transmitters will arrive by June 15, when K73AE antenna is due from Wenatchee, Wash.—no delivery date set yet for K83AA antenna. Kirk Patrick, Prineville, Ore. will be in charge of maintenance. Romeo, Colo. translator K82AC began program tests May 28, repeating KGGM-TV, Albuquerque, reports Jack M. Corry for San Luis Valley TV Inc.

Upcoming facility changes: WFIE, Evansville, plans to switch from Ch. 62 to Ch. 14 by end of June; KPLC-TV, Lake Charles, La. (Ch. 7) has Aug. 1 goal for increase to 316-kw ERP; WJTV, Jackson, Miss. (Ch. 12) plans 316-kw by Sept. 1.

KSIX-TV, Corpus Christi (Ch. 10) boosted power to 214-kw May 29.

PROTECTION OF TV channels and other frequencies from preemption by new aviation electronic & communications systems was urged by FCC general counsel Warren Baker in testimony on airways modernization bill (S-1856) before Senate Commerce Committee May 27. He agreed to supply language for section of bill designed to assure coordination between proposed Air Modernization Board and FCC with respect to frequencies.

Legislation arose from report by Edward P. Curtis, special asst. to President for aviation planning, which recommended—among other things—“modernization” and “flexibility” of civilian and military aviation telecommunications.

Baker pleaded for “adequate consultation” with FCC before new electronic equipment is developed so that it can be determined whether proper spectrum space is available. Using TV requirements as an example, Baker told Committee that if air communication or navigation equipment were developed which used bands presently allocated to other services, “you are faced with the question, shall you throw away the piece of equipment because it needs the space now occupied by TV, or shall members of the public who have TV equipment junk their equipment in order to make way for it?”

“We would not like to see equipment developed in a particular band because it would be slightly less costly for the aviation interests,” he continued, “without taking into account that it might have to dispossess other people who have made substantial investments.” He suggested frequencies above 890 mc as “virgin territory” for new developments and systems.

Referring to recent discredited rumors that military was planning to take away Ch. 2-6 (Vol. 13:15), Baker proposed coordinated over-all study of spectrum utilization, to establish a “long-range program how best to use a spectrum which there is no more of.”

Sen. Potter (R-Mich.) repeated his proposal for similar study by independent group to ascertain whether military frequencies are being properly used. He added that he is “having some work done at the present time to see whether or not it would be desirable” to have such a study.

Radio station sales approved this week: KWIL, Albany, Ore. by *Albany Democrat-Herald* (R. R. Cronise, publisher) to Larry Gordon, gen. mgr. of KWIN, Ashland, Ore. for \$80,000 (Vol. 13:16). WKDL, Clarksdale, Miss. by Ann P. McLendon & W. L. Kent to co-equal owners Tom R. Stillwagon, gen. mgr. of WALB-TV & WALB, Albany, Ga., and WALB-TV employes John B. Craddock & Joseph G. Rachuba for \$40,000 (Vol. 13:16).

Option for 50% of CP for KPAC-TV, Port Arthur, Tex. (Ch. 4) is being exercised by Jefferson Amusement Co. (Julius M. Gordon, pres.), according to application filed this week to turn CP over to new Texas Goldcoast TV Inc. Julius M. Gordon will be KPAC-TV pres.; Carl D. Levy, of Jefferson, secy.; O. W. Collins, Port Arthur College, v.p.; Earl R. Moxon, also representing college, treas. Each group is to advance \$150,000 toward construction.

KICA-TV, Clovis, N. M. (Ch. 12) & KICA equal owners will be Mae Straus & Frank Lesley, FCC having approved their purchase of 1/2 for \$36,666 from Garfield C. Packard, now owner of KTRC, Santa Fe, N. M. (Vol. 13:18).

Catalog of govt. & civic agency program material is being sent to member radio stations by NARTB; directory of commercial sources is due to be distributed next month.

Radio station sales reported this week: KLUF, Galveston, sold by Mayor George Roy Clough & family for \$105,000 to local group (with minority interest in KGUL-TV) including banker R. Lee Kempner, investment mgr. Thomas H. McCray, clothier David H. Nathan, attorney Preston Shirley, KGUL attorney Ballinger Mills, furniture dealer Edward Schreiber, lumber dealer Robert T. Coleman Jr., beer distributor Thomas A. McCarthy, furniture dealer Morris Plantowsky . . . WHMA, Anniston, Ala. (250-w) by Col. Harry M. Ayers, publisher of *Anniston Star*, for \$75,000 to Ralph Allgood and Grove Wise, also owners of WRMA, Montgomery, Ala. . . WSPC, Anniston, (5000-w) by W. S. Weatherly and associates for \$65,000 to Col. Ayers, who proposes to change call to WHMA, having retained WHMA-FM . . . WWOC, Manitowoc, Wis. by Francis M. Kadow for \$62,300 to Joseph Clark, owner of WFOX, Milwaukee . . . KORT, Grangeville, Ida. by Far West Radio Inc. (Hub Warner, pres.) for \$50,000 to Edward M. Brainard, freelance TV-radio writer currently with Civil Defense Administration, Battle Creek. Brokers: WHMA & WSPC, Blackburn & Co.

Transfer of KVEC-TV, San Luis Obispo, Cal. (Ch. 6) by John C. Cohan and Jerome Kantro (50% each) to Salinas Valley Bestg. Corp., owner of KSBW-TV, Salinas-Monterey (Ch. 8) & KSBW, in which pres. Cohan holds 32% interest, Kantro 5%, was revealed by application filed this week with FCC. Also filed was application for transfer of radio KVEC to Cohan, who is paying Kantro \$50,000 for his 50% and will become 100% owner. In KVEC-TV transaction, Cohan & Kantro are to get \$25,000 each plus advances they have made to TV—Cohan \$27,250, Kantro \$50,200. Combined KVEC-TV & KVEC March 31 balance sheet shows \$77,390 deficit. It lists \$365,686 fixed assets, \$31,803 current assets; \$141,272 current liabilities, \$232,938 long term debt, \$105,000 advances by partners.

Sale of KCOP, Los Angeles (Ch. 13) for \$4,000,000, long anticipated (Vol. 13:15), was formally announced this week. The Copley Press property will be taken over by Bing Crosby, George L. Coleman, Joseph A. Thomas & Kenyon Brown. Formerly KLAC-TV, station was purchased in 1953 by Copley from *New York Post* publisher Mrs. Dorothy Schiff for \$1,375,000. Crosby, Coleman & Brown also own 1/3 each in KFEQ-TV & KFEQ, St. Joseph, Mo. (Ch. 2).

WAAM, Baltimore (Ch. 13) had surplus of \$788,696 Dec. 31, according to application filed this week to transfer station to Westinghouse for \$4,400,000 (Vol. 13:18-19). March 31 balance sheet lists \$688,234 current assets (\$216,670 cash, \$143,295 accounts receivable, \$297,500 U. S. Treasury Notes), \$344,720 fixed assets (after \$877,964 allowance for depreciation). It had \$904,992 capital & surplus, \$136,008 current liabilities, no long-term.

WMTV, Madison, Wis. (Ch. 33) is being sold by Gerald A. Bartell family for \$550,000 to WMTV Inc., 50% owned by WTVJ Inc. interests (Mitchell Wolfson, pres.), owners of WTVJ, Miami (Ch. 4), also having 20% interest in upcoming WFGA-TV, Jacksonville (Ch. 12). Other WMTV Inc. owners: Lee Ruwitch, WTVJ exec. v.p.-gen. mgr. 25%; radio WMAY, Springfield, Ill. (Gordon Sherman pres.-gen. mgr. & 36% owner), 25%.

Tax-supported educational TV has been upheld by Ill. Supreme Court in case in which taxpayers challenged right of U of Ill. to spend \$25,000 a year from state funds in operating WILL-TV, Champaign-Urbana (Ch. 12). Justice Byron O. House said university can't be restricted “to specific authorizations in its proposed research & experimentation,” that TV “is one of the many activities incident to the management & operation of the university.”

RCA shipped 3-V color film camera May 31 to upcoming WWL-TV, New Orleans (Ch. 4).

Telecasting Notes: "Spectaculars" and "specials"—irregularly scheduled 60 & 90-min. shows—haven't diminished in popularity, though it once looked like they might die out altogether. Next season, in fact, probably will see more of them than ever. *Variety* totaled up NBC-TV's scheduled and planned ones for next season, found a whopping 98 on the list—including 64 of them definitely on the agenda . . . Publicity build-up is beginning already on big 2-hour (8:30-10:30 p.m.) Nov. 27 color spectacular, *Annie Get Your Gun* (Mary Martin, John Raitt), which network hopes will be another *Peter Pan* . . . ABC going in for spectaculars this year, too—announcing two 60-min. live Frank Sinatra shows, with the singer-actor also doing 13 half-hour musicals and 23 half-hour dramas on film . . . Series of 7 special 60-min. color travel films starring Lowell Thomas is subject of negotiations between CBS-TV and GM's Delco div., Pat Weaver no longer involved; Art Linkletter also scheduled to do six 60-min. travel films for CBS-TV next season . . . Screen Gems steps up its operations in the spectacular field with "multi-million dollar agreement" with Henry Jaffe to develop & produce new TV shows, including Shirley Temple series of 60-min. fairy tales, new Lindsay-Crouse comedy suspense series, children's show, religious show and possibly some combination live-film 90-min. "specs" . . . Money: ABC-TV reported signing \$7,000,000 pact with Kellogg for 5-5:30 p.m. week-day strip for kiddie film shows (re-runs & cartoons), plus alt. weeks of *Circus Boy* (Sun. 7-7:30 p.m.). CBS-TV reportedly rang up \$6,000,000 in gross daytime sales last week, 6 advertisers signing long-term pacts on 5 shows . . . CBS-TV has bought all rights to Jackie Gleason's 39 filmed *Honeymooners* shows . . . U. S. Military Academy at West Point reports 400% increase in mail inquiries—or about 7000 so far—concerning entrance requirements since TV film series *West Point* was inaugurated . . . People watch TV, Pulse found in special N. Y. area survey, which turned up fact that "only" 15% of sets which are in operation during afternoon have no viewers.

TV isn't ruining book business, according to retailers interviewed at this week's Chicago convention of American Booksellers Assn. by Kenneth Slocum for May 29 *Wall Street Journal*. Despite "predictions from national authorities on many subjects" that TV would turn book readers into TV viewers, sales "turned up sharply" in 1956 and are likely to go higher this year, Slocum reports. ABA pres. H. Joseph Holihan doubts that TV affects reading habits one way or another: "Book stores in non-TV areas report identical trends with those in metropolitan areas."

Individual market ratings will be added to Pulse's nationwide U. S. Telepulse ratings, effective with May edition. Each monthly edition will contain ratings on network and syndicated film programs in 40 different markets—based on surveys in 23 major cities and 17 supplementary markets—with 150 individual markets covered in course of a year.

State Committee on Radio & TV has been established by Soviet Cabinet following deluge of complaints that programs were drab and dull. Committee, headed by D. I. Chesnokov, ex-editor of monthly party journal *Kommunist*, was named—according to govt. announcement—because of increasing importance of TV-radio as informational and political medium.

WWJ-TV, Detroit, celebrates 10th anniversary with closed-circuit program from Detroit to New York luncheon June 6, to Chicago luncheon June 7.

New reps: WEAT-TV, W. Palm Beach, to Venard, Rintoul & McConnell (from H-R Television); WTWV, Tupelo, Miss. to Jack Masla (from Young).

VIDEOTAPE may soon be more economical than film for distribution of syndicated programs and commercials to TV stations, according to study disclosed this week by management consultant Boyce Nemece, former exec. secy. of SMPTE. His conclusions: If methods can't be found to prolong effective life of TV film prints, mass switch to tape could come much sooner than many people think.

"Equipment availability, reliable splicing techniques plus assurance of reliability may be all that stand between the principal producers of film for TV and a radical change in their production techniques," study concludes. Among its findings:

Syndicated 16mm TV films have useful life of only 5-15 presentations on air, compared with normal motion picture use experience of 200-400 projections for each release print. Difference is attributed to physical damage from rough handling by station personnel, inadequate inspection at film exchange and failure of distributors to fix responsibility and to collect for film damage.

"Black-&-white 16mm prints for TV now cost 2-4 times as much per program hour as do 35mm color films for theatres"—the former costing distributor about \$54 per hour per print, or \$3.60 per program hour when aired 15 times, or \$10.80 when damage prevents use more than 5 times, and the latter seldom costing more than \$1.75 per projection hour. At same time, "the costs of tape and head replacement as reported by Ampex are already well within the range of film costs now being sustained." Tape and head replacement are currently in the neighborhood of \$5 per operating hour—\$5 for an hour's recording and \$5 for each playback.

Barring change in TV film inspection methods and billing procedure, to make possible more use per print and lower hourly cost, Nemece says, "the alternative may be Videotape."

Rate increases: KGUL-TV, Galveston, May 15 raised base hour from \$1000 to \$1200, min. \$200 to \$250, with min. being flat rate without discounts. WDSU-TV, New Orleans, June 1 raised hour from \$900 to \$1100, min. \$225 to \$250. WJHP-TV, Jacksonville, May 1 raised hour from \$300 to \$400, min. \$60 to \$80. WMFD-TV, Wilmington, N. C. May 15 raised hour from \$250 to \$350, min. \$50 to \$70. KELP-TV, El Paso, has raised hour from \$250 to \$300, min. \$50 to \$60. WCBI-TV, Columbus, Miss. Aug. 1 raises hour from \$150 to \$180, min. \$22.50 to \$30. CFPL-TV, London, Ont. April 1 raised hour from \$450 to \$525, min. \$100 to \$140. CKSO-TV, Sudbury, Ont. July 1 raises hour from \$220 to \$240, min. \$44 to \$48. Spot increase: KGO-TV, San Francisco, May 15 raised Class AA 20 sec. from \$375 to \$450, Class A min. or 20 sec. from \$270 to \$300.

Color TV microscope permitting direct examination of fine structure of living cells exposed to ultra-violet light was demonstrated May 27 by Dr. Vladimir K. Zworykin at faculty meeting at Rockefeller Institute for Medical Research, N. Y. He said device should lead to discovery of otherwise invisible cellular details. Director of Institute's medical electronics center and honorary RCA v. p., Dr. Zworykin recently was honored as co-designer of radio "pill" for research in intestinal disorders (Vol. 13:15). He is subject of "Personality Portrait" in June 1 *Saturday Review*.

Honorary degree of doctor of science was awarded to Motorola exec. v.p. Daniel E. Noble by Ariz. State College at graduation exercises. ASC pres. Dr. Grady Gammage, in conferring degree, said Noble's "complete dedication to the new field of electronics has already resulted in enduring benefits to mankind, both at home and abroad, in war and peace."

APRIL TV FACTORY PRICE AVERAGE DECLINES: Average price of TV sets at factory level in April dropped to about \$121 from \$127.50 in April, 1956, top industry statisticians tell us. Drop reflects bigger bite lower-price portables are taking out of market -- estimated 35% in April, compared with about 10% in same month last year. And retail sales followed about same pattern -- portable sales running 35% in April.

Drop in average price is attributable not only to greater percentage of portables in production mix but to drop in delivery of 21-in. table & console models from 65% last April to 58% this April.

Drive for higher prices -- and concomitant higher profits -- evident in the higher-end emphasis in new GE & Hotpoint lines (Vol. 13:21), is expected to be reinforced as other leading producers introduce lines in next few weeks.

Steady descent of TV prices, in face of mounting labor and production costs, evoked this comment recently from official of leading set maker: "This industry has produced and sold over 14,000,000 sets in last 2 years and hasn't made a nickel."

Full impact of decline is pinpointed by RETMA statistics on factory unit sales and total dollar volume -- with average price working out like this: 1947, \$280; 1948, \$235; 1949, \$193; 1950, \$180; 1951, \$177; 1952, \$172; 1953, \$170; 1954, \$140; 1955, \$138; 1956, \$127.

Analyzing problem from another standpoint, one TV industry spokesman put it this way: "What other industry has improved its product as much as TV and still cut price in half in 10 years?" To point up drop in TV prices compared with other industries, we obtained these wholesale price indices from U.S. Labor Dept. (Figures are expressed in terms of 1947-49 base period, which equals 100):

	<u>1953</u>	<u>1954</u>	<u>1955</u>	<u>1956</u>
TV Receivers	74.5	71.2	69.1	69.7
Motor Vehicles	118.9	119.3	122.9	129.8
Automatic Laundries	104.8	103.0	100.2	102.1
Refrigerators	105.6	106.4	101.5	98.0

Slim Look: This fall seems sure to be called the "Slim Look" era as TV manufacturers take a cue from thinner room air conditioners which have caught public's fancy. Emphasis on styling also sparks set makers' attempts to "return TV to the living room" (Vol. 13:20) with use of wide-angle 110-degree tube (Vol.13:21) at higher price & profit levels. GE's "Slim Silhouette" and Hotpoint's "Slender Profile" set pace with 21-in. & 24-in. sets only 15-in. deep with 1½-2-in. tube cup projection, accent on deluxe features at big-ticket prices. Comes now RCA -- with press showing June 4 at New York's Hotel New Yorker -- disclosing "first on-the-wall lean-clean console TV." We haven't seen set yet, but from what we hear RCA is eliminating tube cup projection -- "doghouse" -- as part of depth saved by use of 5-6-in. shallower 110-degree tube.

49-lb. Portable: Sylvania's 21-in. 110-degree portable -- first reported in April (Vol. 13:16) -- made appearance this week. It weighs 49 lbs., and TV-radio gen. sales mgr. Robert L. Shaw claims it is "more than 50% lighter than 21-in. table models with 90-degree tubes." Dubbed "The Californian," king-sized portable has metal cabinet, 261-sq.-in. screen, aluminized tube, suggested list of \$200. Cabinet is 13 11/16-in. deep, compared with 20-in. for 21-in. 90-degree table sets. RCA shows its 21-in. portable next week.

BDSA Group Saved: Appropriation to operate Commerce Dept.'s BDSA industry divisions for another year -- although on curtailed scale -- was assured this week when House-Senate conference committee approved Senate recommendation of \$2,167,000 to keep divisions going, after House had removed operating funds -- which, in

effect, would have killed the industry-govt. liaison operations (Vol. 13:15-16, 19-20). Passage of final legislation probably will come June 3 or 4 in both houses. Commerce Dept. already has given dismissal notice to more than 100 employes in industry divisions in anticipation of appropriation cut -- but Electronics Div., under director Donald S. Parris, has not been affected by the personnel cuts.

Production: TV output was 86,629 week ended May 24, compared with 80,436 preceding week and 117,767 in corresponding week one year ago. It was year's 21st week and brought TV production for year to date to about 2,165,000 compared with 2,862,177 in same period of 1956. Radio production totaled 249,720 (93,275 auto) week ended May 24, compared with 243,270 (97,750) the preceding week and 283,306 (76,723) in corresponding week year ago. Radio output for 21 weeks totaled about 6,099,000 (2,418,000) vs. 5,585,390 (2,017,395) in same 1956 period. -- (JSC)

Topics & Trends of TV Trade: Shipments of TVs to dealers totaled 1,457,636 in first quarter 1957, when production was 1,474,729, according to RETMA state-by-state report. They compare with shipments of 1,702,236, production of 1,844,632, in first 3 months of 1956. New York led with 163,054; California was second, 131,733; Pennsylvania was third, 101,095. March shipments totaled 535,310, compared with 499,251 in Feb. and 549,220 in March 1956. Here's first quarter 1957 report (county-by-county tables available to members from RETMA on request):

State	Total	State	Total
Alabama	24,294	New Jersey	52,757
Arizona	8,952	New Mexico	5,561
Arkansas	13,696	New York	163,054
California	131,733	North Carolina	29,969
Colorado	13,047	North Dakota	5,258
Connecticut	24,418	Ohio	80,733
Delaware	3,274	Oklahoma	14,908
District of Columbia	16,815	Oregon	16,710
Florida	56,470	Pennsylvania	101,095
Georgia	30,692	Rhode Island	7,221
Idaho	5,550	South Carolina	13,072
Illinois	83,134	South Dakota	5,590
Indiana	35,617	Tennessee	26,874
Iowa	15,965	Texas	80,477
Kansas	16,613	Utah	6,660
Kentucky	25,832	Vermont	2,963
Louisiana	26,606	Virginia	24,284
Maine	7,132	Washington	22,431
Maryland	20,843	West Virginia	15,779
Massachusetts	43,030	Wisconsin	24,951
Michigan	52,253	Wyoming	3,320
Minnesota	22,222		
Mississippi	14,403	U. S. Total	1,453,940
Missouri	32,300	Alaska	1,039
Montana	8,343	Hawaii	2,657
Nebraska	10,802		
Nevada	2,211	Grand Total	1,457,636
New Hampshire	3,526		

DISTRIBUTOR NOTES: National Assn. of Electrical Distributors elected George Albiez, Englewood Electrical Supply Co., Chicago, pres. at this week's 49th annual convention in Washington, succeeding Ralph J. Brown, GE Supply Co., Bridgeport, Conn. who becomes a director. J. M. Bilet, Northland Electric Supply Co., Minneapolis, was named v.p., succeeding Albiez. Relected v.p.'s were J. P. Hamblen, Southern Electric Supply Co., Houston; S. W. Mesick, Los Angeles Wholesale Electric Co; George W. Provost Jr., Doubleday-Hill, Pittsburgh . . . Sylvania appoints George H. Lehleitner & Co., Inc., 601 S. Galvez St., New Orleans (George H. Lehleitner, pres.), ex-Crosley-Bendix . . . Graybar promotes Donald B. Peck to district appliance sales mgr. for Wash., Ore., Mont., northern Ida., Alaska . . . Olympic, San Francisco, moves to larger quarters at 450 Ninth St.

Drop in consumer sales of major durable goods, despite further gains in consumer incomes, is cited by Federal Reserve Board as cause of recent production cutback and reassessment of factory and distributor inventories. Report lists sharp cut in TV-appliance production from last autumn; it notes TV rate was "reduced substantially further" in April and manufacturers TV stocks have declined. Retailers' TV and household goods stocks have "generally not been large relative to sales" in last 1½ years, board says, while sales have declined much less than production.

President Eisenhower, his Council of Economic Advisers and Federal Reserve Board have agreed direct Federal control of consumer installment credit is not needed. The President said he is not going to ask Congress for standby authority to regulate installment credit, agreeing with board that better restraint is obtained "by the use of general monetary measures and the application of sound public and private fiscal policies." President's Economic Council voiced opposition to Federal regulation of down payments and repayment terms.

Imports of radios and parts totaled \$8,491,510 in 1956, compared with \$3,350,896 in preceding year, Census Bureau reports. Bulk of the imports—with no breakdown by types—came from: West Germany, \$3,124,355 in 1956, \$1,631,716 in 1955; Japan \$2,482,424 & \$232,035; United Kingdom \$1,013,716 & \$392,486; Netherlands \$801,285 & \$584,810; Canada \$788,868 & \$367,306; France \$163,201 & \$73,533; Switzerland \$48,939 & \$23,782.

Master Video Systems Inc., New York specialists in hotel & industrial TV-radio, has acquired controlling stock interest in Transvox Corp., N. Y. manufacturer of Transvox Pocket Pager. Master Video pres. Arthur J. Moxham announced that his company's general offices and labs have been moved to larger quarters at Port Washington, N. Y. and that sales & service headquarters for the combined companies have been opened at 4 E. 43rd St., N. Y.

Battery-operated TV sets will be possible by first quarter 1958, pres. Nicholas Glyptis of Multi-Tron Lab, Chicago, announced this week. Multi-Tron's version of battery set is based on application of "pure signal" picture tube which is said to operate directly from diode or transistor output, eliminating video amplifier (Vol. 13:8, 13), uses combination of transistors and tubes. Glyptis says circuits and components can be developed in time to produce battery-operated set by early 1958.

RCA is first TV choice among 306,493 families in Cincinnati market area, according to analysis by *Cincinnati Times-Star*. Top 10 preferences by families (83.2% own one set, 15.8% own 2): RCA, 20.6%; Philco, 15.7%; Admiral, 12.4%; Crosley, 11.6%; Motorola, 7.2%; GE, 6.7%; Zenith, 5.1%; Muntz, 4%; Westinghouse, 3.7%; Emerson, 2.7%. Of sets owned, 22.5% were bought new in 1956, 19% in 1955, 16.1% in 1954, 23.7% in 1953. (For similar survey in Portland, Me., see Vol. 13:20.)

Dr. Lee De Forest announced he has applied for patent for picture-on-wall TV set 4-in. thick with "chassis and controls located on each side and on the bottom of the screen."

Colorado color set sales in first 4 months this year were 362, compared with 751 in all 1956 and 252 in 1955, according to Rocky Mountain Electrical League.

Financial & Trade Notes: Siegler Corp. emerges as \$75,000,000 firm, principally electronics, in merger with Hufford Corp. and Unित्रonics Corp.; latter is parent of Olympic Radio & TV, David Bogen Co. & Presto Recording Corp. Awaiting stockholder approval, plan calls for exchanging 1 share of Siegler common for 2 shares of Unित्रonics and issuing 108,000 shares of Siegler stock for outstanding Hufford shares.

Retaining Siegler name, new firm will be centered at Siegler's Anaheim, Cal. headquarters. Siegler pres. John G. Brooks says that merged companies will continue present operations; that Hufford pres. Merrill L. Bengston will become chairman of Siegler exec. committee.

Siegler initially made space heaters, recently moved into closed-circuit TV, electronic equipment, woodworking machinery, children's specialty products.

Hufford produces equipment for guided missile and aircraft, headquarters at El Segundo, Cal. Subsidiaries include Smith-Nelson Co., Santa Barbara, Cal. and Vac-U-Lift, Salem, Ill.

* * * *

Microwave Assoc. filed registration statement May 29 with SEC (File 2-13387) for 50,000 shares of \$1 par common stock to be offered by Lehman Bros., which has option to buy up to 20,000 at \$7 per share between Nov. 24, 1957 & May 24, 1962. Proceeds will be applied to working funds and to retire \$250,000 current bank debts, but company said substantial borrowings may be necessary in next year.

Litton Industries earned \$1,271,000 (\$1.10 per share) on sales of \$20,372,000 in 9 months ended April 30 compared with \$687,000 (67¢) on sales of \$10,732,000 in similar period preceding fiscal year. Report notes record \$44,000,000 order backlog, gross assets of \$15,702,000 compared with preceding period's \$9,842,000, stockholders equity of \$6,988,000 vs. \$4,185,000.

Ampex Corp. has negotiated sale of \$5,500,000 of 15-year 5% debentures through Blyth & Co. to dozen eastern institutional investors. Funds will be applied to working capital for expansion.

ELECTRONICS PERSONALS: John Kinnally promoted to mgr. of Philco govt. & industrial div., Dayton, O. office . . . C. Douglas Webb elected IT&T secy., succeeding Geoffrey A. Ogilvie, retired . . . Alfred C. Lindquist named merchandising mgr., theatre & industrial products dept., RCA commercial electronic products . . . Harvey J. Finison, ex-National Pneumatic exec. v.p., appointed mgr. Raytheon semiconductor div. . . W. Wm. Hensler elected Howard W. Sams & Co. v.p.-operations for all divs. except finance and industrial relations . . . Joseph L. Langevin named RCA Service Co. Tucson facility mgr., responsible for supervision & coordination of contract work at Army Electronic Proving Ground; he succeeds H. A. Baldwin, now administrator of atomic energy services in RCA's govt. service dept. . . Richard H. Baker promoted to administrator of value engineering, RCA defense electronics products.

Highest Brazilian civilian award, Officer Cruzeiro do Sul, has been presented to RCA international div. v.p. and managing director Meade Brunet for "Your important contribution to the mutual understanding of our two countries."

RCA has started 200,000-sq. ft. warehouse and boiler plant at Indianapolis TV plant "to keep pace with the increased production" of color sets, completion due next April.

Reese B. Lloyd, Philco TV-radio div. operations v.p., has been named pres. of Heintz Mfg. Co., Philadelphia (metal products).

Electronics Investment Corp., San Diego, in annual report of April 30, lists these portfolio additions since Jan. 31, 1957 (Vol. 13:9): 200 Amphenol, now holds 5000; 520 Babcock & Wilcox, now 5720; 3000 Beckman Instruments, new; 2600 Dresser Industries, new; 1000 Friden Calculating Machine, now 3000; 1000 General Precision Equipment, now 4000; 5000 General Railway Signal, new; 5650 G. M. Giannini, new; 4000 Hazeltine, new; 1000 IT&T, now 9000; 4000 Leeds & Northrup, new; 300 Minnesota Mining & Manufacturing, now 3000; 2000 RCA, now 7000; 1500 Taylor Instruments, new; 14,300 Telecomputing Corp., new; 1000 Thompson Products, new; 1000 Western Union, now 8000; 1000 Westinghouse Air Brake, now 6000; 1000 Westinghouse Electric, now 3000; 1500 Eastern Industries pfd., now 5000; \$200,000 Fischer & Porter 5¼% debentures; \$76,500 Ling Electronics 6% debentures. Sold during quarter were these total holdings: 4000 Douglas Aircraft, 6000 General Dynamics, 500 Minneapolis-Honeywell, 100 North American Aviation, 10,000 Texas Instruments. Also sold were 1000 Combustion Engineering, leaving 8000; 400 Litton Industries, leaving 5000. Common stockholding as of April 30 were valued at \$13,326,992; preferred holdings, \$171,375; U. S. govt. bonds, \$399,500. (For previous annual report, see Vol. 12:25; for report on Television-Electronics Fund Inc., see Vol. 13:21).

Sylvania will issue \$6,000,000 in new 4½% sinking fund debentures, due 1975, for private sale to 11 institutional investors with Guaranty Trust Co., N. Y. as trustee, according to SEC authorization under Trust Indenture Act of 1939. Guarantee Trust is trustee of 2 earlier Sylvania sinking fund debenture issues, but SEC ruled no material conflict of interest is involved in new issue.

Dividends: Clarostat, 5¢ payable June 28 to stockholders of record June 14; Arvin Industries, 50¢ June 29 to holders June 10; Bendix Aviation, 60¢ June 29 to holders June 10; Meredith Publishing, 45¢ plus 10¢ extra June 12 to holders June 5; Sprague Electric, 30¢ June 14 to holders May 31.

Admiral's automation story, as told by public relations director Martin Sheridan and staff to employes, distributors, dealers, is subject of case study in May 27 *Public Relations News* (815 Park Ave., N. Y.). Article says 10-minute color film on Admiral automation and resultant benefits was requested by 85 TV stations. Other methods used were speaking tours, special automation section in annual report, TV commercials, newspaper & magazine advertising.

RCA will establish military airborne electronics lab in Boston area between Burlington & Bedford, Mass., senior exec. v.p. Dr. E. W. Engstrom told Greater Boston Chamber of Commerce this week. Construction of the 132,000-sq. ft. building will begin in June, with completion expected in June 1958, though first of the 600 engineers, scientists and supporting personnel are due to be transferred from present airborne systems lab in Waltham late this year.

Radio shipments to dealers, excluding auto sets, totaled 1,612,044 in first 3 months of 1957, compared with 1,470,873 in corresponding 1956 period, reports RETMA in state-by-state and county-by-county tables available to members on request to RETMA. March shipments were 759,428 vs. 487,454 in Feb. and 530,349 in March 1956.

Sonora Radio & TV Corp. was formally adjudged bankrupt this week. In March, govt. agents had seized \$750,000 worth of machinery & merchandise, later sold for \$277,000, Govt. regaining \$195,000 toward 1956 excise tax debt of \$407,749 and withholding tax debt of \$23,909.

RCA confirmed this week that it is now shipping all-glass color tubes in limited quantities (Vol. 13:21).

Network Television Billings

April 1957 and January-April 1957

(For March report see *Television Digest*, Vol. 13:17)

APRIL BILLINGS of TV networks were 5.7% higher than year earlier, although they slipped to \$41,206,913 from \$43,652,995 in March, according to Publishers Information Bureau. Network business of \$167,747,111 in first 4 months of 1957 was running 7.8% better than in corresponding 1956 period, paced by CBS with cumulative total of \$78,097,833, up 11.1%. The complete PIB report for April:

NETWORK TELEVISION

	April 1957	April 1956	% Change	Jan.-April 1957	Jan.-April 1956	% Change
CBS	\$19,385,098	\$17,668,950	+9.7	\$78,097,833	\$70,302,742	+11.1
NBC	15,154,388	15,136,596	+0.1	63,241,934	59,632,400	+6.1
ABC	6,667,427	6,173,922	+8.0	26,407,344	25,722,106	+2.7
Total	\$41,206,913	\$38,979,468	+5.7	\$167,747,111	\$155,657,248	+7.8

1957 NETWORK TELEVISION BY MONTHS

	ABC	CBS	NBC	Total
Jan.	\$ 6,715,581	\$20,231,474	\$16,554,941	\$ 43,501,996
Feb.	6,175,488	18,309,088	14,900,631	39,385,207
March	6,848,848	20,172,173	16,631,974*	43,652,995*
April	6,667,427	19,385,098	15,154,388	41,206,913
Total	\$26,407,344	\$78,097,833	\$63,241,934	\$167,747,111

* Revised as of May 28, 1957.

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 25%. However, they're generally accepted in the trade as an index.

Tightening of translator rules, proposed by FCC (Vol. 13:17), generally drew opposition from translator operators, who don't want to quit when regular TV stations hit their areas. Adler Electronics, manufacturer of virtually all translator equipment, reflected their arguments in comments filed this week: (1) If town getting several translator signals must lose translator service when a conventional station starts, public suffers loss of program choice. (2) Translators have inhibited growth of illegal vhf boosters. (3) Multiple service from translators actually creates more potential audience for conventional stations; Adler says statistics indicate that set saturation rarely goes above 50% in 1-station areas, 75% in 2-station. Postponement of rules change for 1-2 years was urged by Adler, which reports it has put some 60 translators on air, is adding them at rate of about 3 weekly.

Three applications for new TV stations and one for a translator were filed with FCC this week, bringing total to 127 for stations (32 uhf) and 54 for translators. Applications were for Moline, Ill., Ch. 8, by group of local businessmen headed by realtor Mel Foster; for Pittsfield, Mass., Ch. 64 satellite, by WWLP, Springfield; for Lafayette, La., Ch. 3, by KVOL there. Translator application was for Hawthorne, Nev., Ch. 80, by Mt. Grant TV Booster Service Corp., operators of Ch. 70 translator there. [For details, see *TV Addenda 24-U* herewith.]

Bill requiring courts to open trials to TV-radio coverage has been pigeonholed by Cal. State Senate Judiciary Committee, which referred measure by Democratic Sen. Robert I. McCarthy to interim committee for "further study." Bill Welsh, special events director of KTTV, Los Angeles, testified in favor of measure, maintaining TV entitled to equal press rights and did not seek "sordid presentations."

"True-lease" rental plan is offered by Philco govt. & industrial div. for capital-goods financing of use of such equipment as closed-circuit TV, electronic data processing system, microwave communications system, color X-ray viewing contrastor. Leases run 1-5 years, can be optioned for renewal on year-to-year basis at reduced rentals.

Final court test of "equal time" political broadcast rule in Sec. 315 of Federal Communications Act—long opposed by NARTB—is in works. Appeal to Supreme Court to decide nettlesome issues of law is expected following dismissal May 23 by N. D. state court of \$150,000 libel suit by Farmers Union against WDAY-TV, Fargo, for carrying derogatory speech by splinter candidate A. C. Townley in 1956 Senate campaign (Vol. 13:8). Judge John Pollock ruled that station was immune from damage action because Sec. 315 creates legal privilege in "equal time" requirement. At same time, he said special state "defamation" statute (14-0209) limiting broadcasters' liability is invalid because it favors TV & radio over other media. Farmers Union promptly filed notice of appeal of decision to N. D. Supreme Court, indicating it will carry case to U. S. Supreme Court if it loses again. WDAY-TV, which had NARTB cooperation in defending suit, plans similar move if lower court is overturned. In either event, highest court probably will be asked to rule on legality of Sec. 315 itself.

Celler anti-trust subcommittee this week approved report on TV network practices and sent it to printer, to be released within next 2 weeks. Some sections of report have been toned down from language in Celler's original draft, and separate views have been filed by some members on certain topics. Subcommittee majority is said to have disapproved report's comment on BMI, noting that legal action against organization is pending and expressing opinion that comment would be improper at this time. Last significant issue was compromised in May 29 meeting, when subcommittee voted to soften recommendation on option time, requesting that FCC study situation—deleting its original threat to initiate legislation to abolish time options if FCC doesn't outlaw the practice.

Report on Hong Kong's closed-circuit TV system (Vol. 12:22, 13:19) from NBC correspondent Jim Robinson: Rediffusion Hong Kong, subsidiary of British-owned firm, started commercial programming early last month with 1500 sets, is currently installing about 100 sets weekly. Rediffusion supplies sets for \$5 installation fee and \$10 a month rental. They're 16-in. British-made receivers "tropicalized" for humid climates. TV service offers 4 hours of programming daily—consisting of newsreel, American & English filmed shows, locally produced Chinese programs and on-the-spot public service cut-ins. Rediffusion also operates highly successful wired radio service in Hong Kong (pop. 2,270,000), grossing more than \$100,000 monthly on rentals alone.

FCC will get breather before it undergoes new Congressional investigation by House Commerce "watchdog" subcommittee in \$250,000 probe of 17 regulatory agencies (Vol. 13:16). Subcommittee headed by Rep. Moulder (D-Mo.) plans no hearings until after 85th session adjourns—probably in Aug. Meanwhile, selection of staff is slowly under way, first being old hand at govt. regulation of industry. He is Dr. Walter M. Splawn, 77, whose appointment as consultant to subcommittee was announced May 27. Now retired, he was ICC member in Truman & Roosevelt administrations, was special counsel for 1930-33 House investigation of holding companies. Dr. Splawn once was pres. of U of Tex.

ABC-TV salutes affiliate KTVI, St. Louis (Ch. 2) with special presentation—"No More St. Louis Blues"—June 12 in Chase Hotel, St. Louis. Hosts to advertisers, agencies, press for report on network's growth will be ABC-TV v.p. Oliver Treyz and KTVI v.p.-gen. mgr. Joseph Bernard.

Add new lines: Russians will show the latest in Soviet monochrome (all red?) TV sets (largest, 17-in.) at Oklahoma Semicentennial Exposition starting June 14 in Oklahoma City.

SUMMARY-INDEX OF THE WEEK'S NEWS — June 8, 1957

RATIONING OF NETWORK LINES looms as probability next fall, with demands for circuits twice as great as last year, as result of increased TV networking (p. 1).

CBS-TV HAS WORLD BEAT in Khrushchev interview, but White House views it dimly; President refuses reply to Soviet leader's challenge to U. S. (p. 2).

VIGOROUS CELLER REPORT frowns on option time & must-buy practices, urging FCC & Justice Dept. study; serves notice of continued surveillance (pp. 3 & 6).

REP. HARRIS not satisfied with FCC pay-TV action. Wired system "deals" involving Dodgers-Giants west-coast move still inconclusive (p. 4).

TALL-TOWER CRITERIA approved on one-year trial basis, limiting new structures over 1000 ft. to antenna farms except in special cases (p. 7).

CRAVEN PLAN comments cover spectrum of opinion, stations' self-interest generally apparent. Chairman McConaughy may be key to final vote (p. 7).

OPTIMISM FOR FALL TV set business is keynote among industry leaders in showings of new lines; full employment, record consumer spending cited (p. 10).

NEW TV SET LINES: Generally higher priced; RCA & Sylva eliminate tube-cup projection; Philco & Zenith emphasize short 90-degree tubes (pp. 10-12).

COLOR DRIVE to be stepped up by RCA based on lesson learned in Milwaukee "Carnival of Color"; 5 more set makers expected to hike promotion (p. 12).

FCC "PLAYING POLITICS" charge levied by more Congressmen. Madison and Indianapolis decisions cited. Orlando's Ch. 9 goes to WLOF (p. 8).

CABLE THEATRE debate at NCTA convention compares Bartlesville flat monthly fee concept with pay-as-you-see coinbox technique (p. 9).

FIRST SATELLITE IN CHAIN of translators & satellites of Springfield's WWLP begins operation in Greenfield, Mass. 501 TV stations now on air (p. 9).

AT&T MAY RATION CIRCUITS THIS FALL: Network topkicks are keeping their fingers crossed and hoping it won't happen -- but at the same time they're making advance plans for the probability that the AT&T will have to allocate its major inter-city microwave-cable routes among TV users this fall, for first time in 5 years.

Spectre of allocations -- throwback to TV's pioneer days -- materializes once again because of this simple fact: There is every indication that demand for live network circuits this fall will be double that of last fall. Nobody at the networks or at AT&T cares to go into specifics about the situation, and full facts won't be known until July 29 when requirements are weighed against available facilities, but on basis of announced plans for increased use of live video trunk circuits, it appears almost a certainty that old allocation formula will have to be dusted off for some important routes, including east-west trunk lines.

Even for spring & summer, AT&T is being kept humping to fill bigger live TV demands than ever -- as we forecast in our Jan. 5 issue (Vol. 13:1) -- despite fact that facilities are constantly being increased and improved. New daylight time schedules have given phone company some rough moments -- and one sore spot currently is southwest, where cables are already being allocated because demand is greater than facilities, and "protection channels" are being used for regular TV relay.

AT&T refuses specific comment on situation, except to state that it's too early to say anything, because requirements won't be firmed up for almost 2 months. But it's no secret that networks already have given AT&T the word on what they'll be needing in way of relay circuits -- because the contracts with sponsors are specifically contingent on live clearance of programs to affiliates.

The threatened serious shortage of network facilities is due to a large number of simultaneous developments in TV field, most significant being:

(1) Expansion of ABC-TV program schedule and number of live affiliates -- combined with possible programming increase by other networks.

(2) Large increase in coverage planned by Sports Network Inc. (Dick Bailey),

leading syndicator of live sports events. Sports Network is virtually full-fledged network so far as demand for microwave-cable is concerned, seeking regular full-time 1 p.m.-midnight contract with AT&T. It handles baseball, pro & college (NCAA regional) football, basketball, is adding hockey and stepping up relays of boxing next fall. At least one other sports "networker" may also join this field.

(3) Pat Weaver's Program Service -- if current plans jell (Vol. 13:22) -- will also be a substantial user of network routes, though this week it was reported his programming won't begin July 1 as previously announced, but later in summer. Other live "networks," in talking stage, could aggravate shortage of trunk routes, if anything comes of all the talk.

(4) Closed-circuit TV's demand for network loops should be at least as big as last season, the 2 leaders in business-meeting field next season due to be TNT's Tele-Sessions and Teleprompter's Group Communications -- with such other firms as Closedcircuit Telecasting System (color) likely to become important later.

Another complication which could add to congestion of transcontinental and western regional routes would be move of N.Y. Giants & Brooklyn Dodgers to the west coast -- if it happens. This almost certainly would extend maze of professional baseball networking routes to a full coast-to-coast proposition -- whereas to date principal baseball networking has been confined to area east of Kansas City. Also, with Los Angeles and San Francisco each having a "home" team, demand for western regional network circuits should increase substantially.

* * * *

Note: It's scant solace for immediate future, but AT&T's Bell Labs this week announced development of new type microwave which could go far toward ending video network clearance problems. New "TH" system, based on solid-state technology, using new diodes, promises to more than triple the carrying capacity of present microwave systems -- carrying 12 TV programs and more than 2500 telephone conversations simultaneously. First "substantial installation" on major route is due in 1959.

WHITE HOUSE BRUSHES OFF KHRUSHCHEV TALK: Biggest telecast news coup of year, bringing Soviet boss Nikita S. Khrushchev straight from Kremlin into U.S. living rooms, was scored June 2 by CBS-TV. But unanswered at week's end was big question raised by unprecedented interview: Will it also stand as Russian propaganda beat?

President Eisenhower appeared indifferent to world-wide impact of hour-long, party-line TV debut by First Secretary of Communist Party of USSR on Face the Nation. He dismissed it at June 5 news conference as just case of "commercial firm in this country trying to improve" commercial standing with "unique performance."

White House spurned demands in Congress & press for "equal time" appearance by President to answer Khrushchev, despite quick offers of facilities by all 3 TV networks -- and tentative invitation from Moscow to use Russian air for reply.

"Somebody in the Govt. would be glad to accept" unrestricted Russian offer of TV-radio time, guaranteed against jamming, President said. But he ruled out any personal participation, designated no spokesman. CBS-TV then set up its own counter-broadcast forum, scheduling "Comment on Khrushchev" panel for June 9.

Unrehearsed interview with agile, articulate Khrushchev -- his first on TV anywhere -- was smash page one story in newspapers here & abroad. "Season's most extraordinary hour of broadcasting," Time Magazine called it.

It brought outpourings by editorial writers & columnists from Walter Lippmann to George Sokolsky. Orders to CBS-TV for rerun films came from many non-CBS stations and from Great Britain, Canada, Australia, Sweden, Cuba, Mexico. Even Russians saw & heard interview -- with one dialectical portion edited out for home consumption.

Editorial consensus: Khrushchev is a very clever propagandist ("Let us live in peace, let us compete"); TV performed salutary service in bringing Americans face to face with biggest Communist of them all.

Few protests against program were reported from viewers, estimated by network at 5,000,000 -- who didn't include President or Secretary of State Dulles. CBS-TV counted 81 telephone calls to N.Y. & Los Angeles headquarters in half-hour following

Face the Nation; 47 favored, 34 opposed grant of time to Khrushchev. Formal complaint was filed in advance by Catholic War Veterans commander Wm. J. Gill.

CBS-TV's Kremlin scoop was 2 years in making. When Moscow approval of interview finally came through, Face the Nation crew headed by producer Ted Ayers flew in last week, set up film equipment in 40-ft. office on second floor of Council of Ministers Bldg. Khrushchev was questioned by moderator Stuart Novins, Moscow CBS correspondent Daniel Schorr & B.J. Cutler of N.Y. Herald Tribune.

Interview was carried by Soviet home service & short-wave which purported to give full text. Deleted for Russian listeners, however, was exchange between Schorr & Khrushchev on whether any "contradictions" between Marxist-Leninist principles & Soviet practice exist today. Khrushchev said there are none.

* * * *

Network's purposes in producing interview were summed up June 6 by pres. Frank Stanton of CBS Inc. in answers to 9 questions posed day earlier in House by Rep. Anfuso (D-N.Y.), who asked why Khrushchev got "wide forum to reach the American people" with Soviet propaganda. Replying in detail, Stanton concluded:

"We believe that the people of America, if properly informed, are entirely capable of judging & deciding for themselves, and that it is a gross disservice to all of us to withhold or suppress evidence that can in any way help us all to arrive at the truth. It was in this belief that we labored so long & so hard -- and in the end successfully -- to get this face-to-face interview."

VIGILANCE IS KEY TO CELLER REPORT: The celebrated Celler report on TV industry -- finally released at week's end -- sniffs possible anti-trust violations in some of the networks' traditional ways of doing business, but by-&-large expresses willingness to leave these problems in hands of FCC and Justice Dept.

The 7-man subcommittee, which held extensive hearings on TV industry last year, made it plain, however, that it intends to watch FCC closely to see that it follows "suggestions" in the report. Group made only one proposal for legislation: Possible amendment of Robinson-Patman and Clayton anti-trust acts to bar quantity sponsorship discounts which are not geared to actual cost savings by networks.

Report is a piercing one in many respects -- and its effects will be felt in the future, as it takes its place alongside the Senate Commerce Committee's Plotkin Report and its forthcoming Cox Report (due in couple weeks) and presumably FCC's Barrow Report. Cumulative effect of this 5-foot reference shelf devoted to subject of "what's wrong with TV" will be difficult to ignore in terms of implications on future FCC -- and Justice Dept. -- actions.

* * * *

If networks were relieved by the report, it wasn't so much because of what was in it as because of what they once feared would be in it. Except for section dealing with ASCAP-BMI -- over which there is strenuous controversy -- the word "reckless" isn't likely to be applied to this report. Networks once had feared that Rep. Celler might insist on taking strong stand against network ownership of stations, programs and film syndicators, against multiple ownership of all kinds, against ownership of networks by theatre chains or manufacturers.

Even as recently as few weeks ago, conclusions & wording of original Celler-endorsed draft were considerably sharper than the version which was finally approved by full subcommittee (Vol. 13:19). In many cases, where specific action or goals were originally directed or demanded, subcommittee substituted more general suggestions -- preferring not to usurp powers of FCC or Justice Dept.

Recommendation on option time is example. Original draft had proposed "study by the FCC with a view toward abolishing time options," and threatened "in the absence of expeditious Commission action, the Committee will be constrained to...recommend appropriate amendment of anti-trust laws to accomplish the same purpose."

In final report, subcommittee substituted conclusion that "it is necessary for the Commission to consider amending the option time rule" and serving notice that "the Committee will maintain a continuing interest" in FCC's actions in this area. Even this language failed to gain support of the 3 Republicans on subcommit-

tee -- Keating (N.Y.), McCulloch (O.) & Miller (N.Y.) -- who objected to stress on word "amendment," feeling that subcommittee shouldn't try to influence FCC.

But report itself takes dim view of option time, stating that "if network survival depends upon [such] curtailment of competition...utility-type regulation [would] be necessary in order to safeguard the public interest." Report goes on to say subcommittee would prefer to see "artificial restrictions" removed.

Must-buy practices met with sharp disapproval of subcommittee, which proposed that FCC "consider" ban on them and instead "permit the networks to prescribe a gross minimum time charge, leaving the advertiser free, however, to select the stations making up the network package." It specifically inserted the proviso that FCC shouldn't have authority to prescribe what the figure should be.

Section on broadcasters' activity in music field was second longest in the 150-page report, but its recommendation was shortest -- proposal for thorough Dept. of Justice investigation into all phases of music field. Text of chapter, however, can hardly be described as favorable to BMI in any way. Five of the 7 members gave "additional views," Democrats Rodino (N.J.) & Rogers (Colo.) stating that section shouldn't be construed as expressing opinion with respect to pending litigation and the 3 Republicans going further by saying that "it is impossible for us to determine [where] the truth lies," noting regretfully that record has bearing on pending song-writers' suit against BMI and expressing confidence in Justice Dept. to "continue to perform its proper functions" without prompting by subcommittee.

FCC took lacing in report for failing to order hearing on NBC-Westinghouse Philadelphia-Cleveland station swap, now subject of govt. civil anti-trust suit, and subcommittee called for "code of ethics" to govern conduct of Commissioners and staff. Section dealing with allocations called for more deintermixture, FCC-backed public education campaign on uhf receivers and excise tax relief for uhf sets.

NBC was only network to comment on report immediately -- taking notice of the subcommittee's recognition of networks' important and beneficial role in history of free broadcasting, but maintaining it would be "inappropriate" to comment on the specific issues raised in report "since they are under active study by the govt. agencies concerned or are in the process of litigation in the courts."

Report is unmistakably a vigorous one, while it largely avoids the pitfalls of threats and precipitous action. Judging from Rep. Celler's past history, it's safe bet that he will continue to scrutinize closely actions of the FCC, networks and broadcasters in fields which he feels present problems with anti-trust implications. [For digest of report's major conclusions & recommendations, see p. 6.]

LOTS OF NOISE on the pay-TV front this week— but nothing conclusive emerged. Consider:

(1) Rep. Harris (D-Ark.), chairman of House Commerce Committee, apparently not too satisfied with FCC's compromise fact-finding action (Vol. 13:21), asked Commission to specify exactly why it thinks it has legal authority to authorize toll TV "if it finds that it would be in the public interest to do so." "This seems particularly important," he said, "in view of the Commission's statements . . . that the Commission leaves for future determination the question whether subscription TV should be classified as 'broadcasting' or some other type of service and that the Commission may desire to take up with Congress any amendments to the Communications Act which the Commission may find necessary or desirable for the purpose of regulating subscription TV in the public interest.

"These statements may lead some to the conclusion that the Commission claims in principle the *general* legal power to authorize subscription TV, but that having authorized subscription TV it may lack the *specific* powers to regulate subscription TV (as a broadcast service or as some other type of service) in such a way that the public interest is protected."

(2) Well-cultivated mystery still surrounds alleged

tieup between Brooklyn Dodgers, N. Y. Giants, Skiatron's Matty Fox and talk of moving teams to west coast. There were continued rumors of million-dollar wired pay-TV contracts—signed or unsigned—while N. Y. Mayor Wagner met with Dodgers' pres. Walter O'Malley and Giants' pres. Horace Stoneham in effort to keep teams in N. Y. Meanwhile, Skiatron added piquancy by filing application with city of Los Angeles, asking permission to wire up the town; T. M. Chubb, gen. mgr. of Public Utilities Dept., said he needed more information before he could give recommendation. Still nothing conclusive—while Skiatron stock oscillated between 6 & 7¼ during the week.

(3) Tapping this delightful publicity vein, one Max Kantor, pres. of ITV Inc., N. Y., called press conference to report he was offering \$5,000,000 for rights to carry Dodgers' & Giants' games on wired TV in N. Y. Team spokesmen said they'd never heard of Kantor or his offer.

(4) General Federation of Women's Clubs, meeting in Asheville, N. C., found virtually all other business shunted aside while Zenith and CBS tugged & pulled in effort to get resolution favoring their positions. And who, of all people, showed up there as a Zenith lobbyist? Ex-FCC Comr. Frieda Henneck. Group finally resolved to ask Govt. to take cautious approach "while insuring the maintenance of free TV service as it now exists."

Personal Notes: Wm. Seaman promoted to ABC-TV network production mgr., Thomas P. DeVito to program service mgr. . . . Theodore W. Herbert resigns as eastern sales mgr. for General Teleradio stations . . . John B. Poor, MBS pres., given doctor of laws degree by Wesleyan U, Middletown, Conn. . . . Harry Pertkin, ex-ABC-TV & DuMont, named NTA film network sales exec.; Peter McGovern, ex-Byron Productions, named director of network promotion . . . James R. Hoel, ex-Katz rep Chicago office, named gen. sales mgr. of WTCN-TV, Minneapolis-St. Paul . . . Gene Walz, ex-operations chief of KYW-TV, Cleveland, resigns to join WCKT, Miami, as exec. producer . . . Harold (Hack) Woolley, sales mgr. of KTVT, Salt Lake City, named pres. of Salt Lake Advertising Club . . . Victor Ludington, ex-station mgr. of WOAY-TV, Oak Hill, W. Va. named gen. sales mgr. of upcoming WINR-TV, Binghamton (Ch. 40); Bill Dorn, ex-program mgr. of WDAN-TV, Danville, Ill., program director; Gino Ricciardelli, ex-chief engineer of WPTV, Palm Beach, technical director . . . Paul Blue promoted to program mgr. of KLZ-TV, Denver . . . Robert L. Larsen promoted to program mgr. of educational WGBH-TV, Boston . . . Fred Beck, mgr. of KVEC-TV, San Luis Obispo, named operations director for KVEC-TV & KSBW-TV, Salinas-Monterey, and will headquarter in Salinas; Rowena Kimzey, KSBW-TV, named resident mgr. of KVEC-TV, which has requested change to KSBY-TV and will become satellite of KSBW-TV . . . Roger N. Cooper promoted to station relations mgr. of American Research Bureau, headquartering in Washington . . . Dick Jolliffe, from CBS Radio network sales service, named sales service mgr. of KTLA, Los Angeles . . . Reginald P. Merridew, ex-radio WGAR, Cleveland, named managing director of Storer's radio WJW there, replacing Jack Kelly, who moves to Storer's N. Y. sales office . . . Charles W. (Chad) Mason promoted to program director of WSUN-TV, St. Petersburg; Jerome Baker, ex-American Heart Assn., named sales promotion & adv. mgr. . . . Eugene J. Muriaty, former adv.-sales promotion mgr. of WBZ-TV, Boston, appointed promotion mgr. of WTIC-TV & WTIC, Hartford . . . Mack Edwards promoted to public service director of WAAM, Baltimore . . . John B. Jaeger

ADVERTISING AGENCIES: Lawrence Wisser, ex-Emil Mogul, named senior v.p. & creative director of Weiss & Geller, N. Y.; Max Tendrich promoted to exec. v.p. . . . Max D. Anwyl named financial v.p. & secy. of Needham, Louis & Brorby; Howard M. Brenneman succeeds him as treas. . . . Wm. I. Hoffhine Jr., secy.-treas. of Guild, Bascom & Bonfigli, San Francisco, elected a v.p. . . . Robert LaChance, ex-Guild, Bascom & Bonfigli, joins Young & Rubicam there in TV production capacity . . . Curtis Berrien, ex-Foote, Cone & Belding, Chicago, joins Reach, McClinton, N. Y., as v.p. & copy director . . . Robert G. Holmes, ex-WWLP, Springfield, Mass., joins Houck & Co., Roanoke, Va., as TV-radio director . . . Frank Daniel, ex-Lennen & Newell, joins Ted Bates as asst. media supervisor . . . Robert J. Dunn, ex-C. L. Miller Co., joins Erwin, Wasey & Co. as merchandising director . . . Peter H. Nicholas, ex-Benton & Bowles, named research vp. of Charles W. Hoyt Co. . . . Don Trevor, ex-ATV Film Productions, joins Doyle Dane Bernbach as TV producer . . . John F. Klatt named exec. mgr. of *Media/Scope*, new magazine published by Standard Rate & Data Service . . . Walter A. Tibbals, ex-BBDO, named head of TV-radio dept., Anderson-McConnell Adv., Los Angeles . . . Miss Charlene Hirst appointed TV-radio media director, Mohr Assoc.

New officers of National Community TV Assn.: pres., George J. Barco, Meadville, Pa.; v.p., Glenn H. Flinn, Tyler, Tex.; secy., A. J. Malin, Rochester, N. H.; treas., Clive Runnells Jr., Williamsport, Pa.

promoted to exec. v.p. of radio WNEW, N. Y., John V. B. Sullivan to v.p. & sales mgr. . . . George A. Greenwood, ex-radio WNAX, Yankton, S. D., named promotion mgr. of WSAZ-TV & WSAZ, Huntington, W. Va. . . . Wm. Lewis Cooper Jr., ex-WJAR-TV, Providence, named film mgr. of WPIX, N. Y. . . . John C. Morris, ex-radio CKSL, London, Ont., named gen. sales mgr. of CHEK-TV, Victoria, B. C. . . . Wm. A. Gietz promoted to local sales mgr. of WTAR-TV, Norfolk . . . Paul Hill promoted to program supervisor of WWTW, Cadillac, Mich. . . . Johnny Carpenter named public relations director of KOIN-TV, Portland, Ore. . . . Gene Plotnik, ex-*Billboard Magazine* assoc. editor, named Screen Gems trade & consumer press editor . . . A. J. Richards, ex-gen. mgr. of defunct KCCC-TV, Sacramento, named gen. sales mgr. of radio KROY there; Wm. R. Funnell, ex-program director of KCCC-TV, named Sacramento sales rep for KOVR, Stockton . . . Bette Doolittle, ex-NARTB and American Women in Radio & TV, joins Grocery Manufacturers of America as director of women's press & TV-radio relations . . . Irving Waugh, ex-commercial mgr. of WSM-TV, Nashville, named v.p.-gen. mgr. of WSIX-TV, Nashville, also acquiring minority interest from former v.p.-gen. mgr. R. D. Stanford Jr., who is selling his 1/3 to Waugh and other local residents, including niece of principal owner Louis Draughton . . . Simon Goldman, pres.-gen. mgr. of WJTN, Jamestown, N. Y., elected to NARTB radio board, defeating Michael R. Hanna, WHCU, Ithaca, in special election for N. Y.-N. J. district . . . Al Sussman promoted to AAP eastern sales mgr. . . . Mark Munn, asst. sales promotion supervisor, WGN Inc., Chicago, receives Ohio State U's first Ph.D. degree in mass communications.

Obituary

Dwight D. Doty, 51, partner in Washington law firm of Haley, Doty, Wollenberg & Kenahan, died suddenly of heart attack at his home June 5. Graduate of Georgetown U Law School, he had worked in Justice Dept., served in Navy during World War II, joined FCC in 1947. He was chief of Broadcast Facilities Branch in Bureau of Law, then chief of Renewal & Transfer Div. of Broadcast Bureau, left for private practice in 1951. Surviving are his widow, 2 sons, daughter, mother.

Competence of management is most important single factor in financial success of TV-radio stations, consultant Richard P. Doherty (TV Radio Management Corp.) told Virginia State Bcstrs. Assn. this week in Richmond. He enumerated these failures as "common causes of low profits or loss, and of mediocre broadcast operations": Inadequate financing, mediocre or poor staff, inadequate attention to continuity as major advertising task, lack of sales planning, poor employe morale, lack of management imagination and creativeness, inadequate sales incentive compensation plan, mediocre programming, ineffective cost control, lack of rate integrity. He predicted that increase in total TV revenue would level off to about 10% for 1957, as against average of 30% a year from 1951 to 1956, principally because of decrease in new-station starts.

First TV films of Maine House of Representatives at work in Augusta have been authorized in special permission voted by legislature for cameraman Bruce Nett of Guy Gannett's WGAN-TV, Portland. Representing *Kennebec Journal* of Augusta and other Gannett newspapers in state in addition to stations, Nett won approval to roam floor of legislature with camera—with stipulation that film would be silent, commentator to give narration on TV.

Highest civilian award by Army for exceptional services will be presented June 11 at Pentagon ceremonies to Edgar G. Shelton Jr., asst. to AB-PT Washington v.p. Robert H. Hineckley. Shelton was director of National Security Training Commission.

Highlights of Celler Subcommittee's Report on TV

Major Conclusions & Recommendations of House Judiciary Anti-Trust Subcommittee's TV Investigation Report

(See story on page 3)

Option time: "The Committee concludes that it is necessary for the Commission to consider amending the option time rule. In such consideration, particular weight must be given to the anti-trust principles discussed above [restriction of competitive opportunity by non-network programmers & advertisers, concentration of program control in hands of a few, and parallel with Paramount block-booking case], together with the networks' contention that option time is indispensable to their operations. Because of the importance of this matter from an anti-trust standpoint, the Committee will maintain a continuing interest with respect to the Commission's activities in this area."

Reps. Keating (R-N. Y.) McCulloch (R-O.) & Miller (R-N. Y.), would have substituted different conclusion: "Against this background, the Committee believes that the Commission should consider the option time rule in light of the foregoing principles and the light of the networks' contention that option time is indispensable to their operation."

Must-buy policy: "The Committee, without expressing opinion as to the legality or illegality of 'must-buy' under the anti-trust laws, thinks it clear that one of its effects is to deprive the national advertiser of untrammelled freedom of choice in selecting those stations and markets where he desires to have his advertising message carried.

". . . The Committee believes the FCC should consider issuance of a regulation prohibiting any network practice requiring an advertiser to buy designated stations as a condition to getting on the network . . . To avoid any possibility of network fragmentation, the action by the Commission might well permit the network to prescribe a gross minimum time charge to the advertiser. It might further provide that the figure not be so high as to deprive the advertiser of real flexibility in station selection . . . However, this is not to say that the Commission should be given authority to prescribe what the figure should be."

"First-call" practice: ". . . The FCC should consider amending its chain broadcasting regulations to limit the conditions under which the first-call privilege may be used to delay the broadcast of network TV programs. Among the factors relevant to such limitation are: (1) the nature of the program substituted for the delayed program, whether local or network; (2) the relative desirability of the time period in which the deferred program was originally scheduled and the time period in which it is later broadcast; and (3) the length of the delay . . . The Commission [should] also consider amending its rules to require a network, when its program is not broadcast by the local affiliate, to give appropriate notice of program availability so that other local stations may have opportunity to carry the program."

Network discounts: "To eliminate the competitive advantage obtained by the large network advertiser over the small advertiser solely because of the large advertiser's quantity purchasing ability, the Committee will consider possible amendment of the Robinson-Patman Act [and the Clayton Act] so as to make it applicable not only to the sale of goods but also to the sale of services by independent contractors engaged in trade and commerce."

Network programming practices: "A question not completely resolved by the record is whether the networks tie sales of network and network-owned station time to the sale of network-owned or controlled programs . . .

The Dept. of Justice should continue its investigation of these practices."

Network talent contracts: "Network practices with respect to talent raise grave questions of legality under the anti-trust laws in several respects. NBC's talent-development program seems little different in operation and effect from the concert & artist bureau it sold after institution of the Dept. of Justice anti-trust suit in 1941. Provisions in the talent contracts of both major networks restrict business activities of talent-using enterprises outside, as well as within, the domestic radio & TV industry. Accordingly, the Committee believes it necessary for the anti-trust div. thoroughly to investigate these practices of the networks and determine whether the filing of a new anti-trust suit is warranted . . ."

Multiple station ownership: "[It] appears that the multiple ownership of stations has had a recognized anti-competitive influence in the broadcasting field, which may lend itself to the abuses of concentration and tie-ins, and may produce incalculable competitive advantages for multiple owners and a degree of conflict of interest on the part of the networks. It further appears that the Commission has continued to permit this practice only because substantial interests developed in the wake of its earlier tolerance. The Committee concludes that the Commission should give these anti-trust and other factors emphatic consideration in any change in the multiple ownership rules."

Affiliation agreements: ". . . Continued discrimination in the compensation of network affiliates based on consideration of their financial stature will lead to increased concentration in the TV industry and will frustrate the objective of a competitively free system. The Commission should consider the advisability of making public all affiliation contracts filed with it. [It] should also make detailed study of the affiliation agreements a part of its continuing duties . . ."

FCC network study group: "This group appears to be making a conscientious, energetic and objective inquiry. It is imperative that the group complete its study promptly and submit an early report and recommendations for Commission action. It is no less imperative that the Commission act upon its study group's recommendations without delay."

Inter-city relay facilities: "In light of the importance of the issues to the achievement of national objectives for broadcasting, the Committee believes that the length of time during which [FCC] proceedings [on private microwaves and investigation of AT&T charges] have been allowed to drag on is inconscionable."

FCC-Justice liaison: ". . . In approving the NBC-Westinghouse exchange of 1955 without a hearing, without adequate consideration of the specific anti-trust histories of the applicants and their parent corporations and without maintaining adequate liaison with the anti-trust div. of the Dept. of Justice, the FCC fell short of performance fully protecting the public interest . . . The Committee also believes it necessary that, in the future, the FCC adhere to the policy of critically examining the anti-trust background of each license applicant."

FCC practices & policies: "The evidence demonstrates that for at least the past 10 years an air of informality has surrounded cases pending before the Commission. This has permeated the Commission's administrative processes

ONE YEAR TRIAL of new tall-tower criteria to guide Airspace Panel and subcommittees in air hazard clearances (Vol. 13:22) was approved this week by Joint Industry-Govt. Tall Structures Committee (JIGTSC), all TV industry representatives voting in favor of proposal. New criteria, which the JIGTSC document says "are not intended as a rigid standard to be arbitrarily applied," would prohibit all new towers over 1000 ft. unless they are in antenna farm areas or "where existing conditions of terrain, obstructions or other circumstances would make application . . . inappropriate."

JIGTSC voted not to disband, but to watch application of new criteria carefully during the year's trial period. At end of period, group presumably would be called into session again to determine whether further revisions are necessary.

One section of JIGTSC document was not approved, and was referred to CAA & FCC representatives on committee for further work, after which new version will be circulated for approval of all JIGTSC members. Controversial section involved CAA Order No. 18, putting broadcasters on notice that they must consider locations of existing airports when planning towers. Broadcast industry representatives wanted section amended to put shoe on other foot as well—making it necessary for airport operators to consider location of existing TV-radio towers when planning locations of new airports.

"Tallest man-made structure east of the Mississippi" is sought by WIS-TV, Columbia, S. C. (Ch. 10), which this week applied to FCC for authority to build 1518-ft. tower 13 mi. NE of Columbia and to increase ERP to 316-kw, using RCA's first vhf traveling wave antenna. Cost of improvements would be approximately \$500,000.

to a point where various members of the Commission without reluctance have, during the past decade, repeatedly discussed with one or more interested parties the merits of pending cases—even going so far as to indicate how particular Commissioners would vote. This practice [is] repugnant to fundamental principles of quasi-judicial procedure . . . The Committee believes it imperative that the Commission adopt without delay a code of ethics that would proscribe conduct of this kind by Commissioners and their staff and by attorneys and other representatives of industry alike . . ."

Allocations: "The Committee recommends that, pending the outcome of the proposed program of research & development concerning the feasibility of a major shift to uhf, the Commission vigorously press forward in its program of selective deintermixture . . . The Commission should broaden this program to include many more markets, if feasible in the public interest, and should continue to order the removal or conversion of existing stations where the public interest requires. The Committee will follow closely the pace and progress of the Commission's deintermixture program.

"[This program should be coupled] with a national educational campaign spearheaded by the agency itself. The public must be made to realize that a substantial portion of the TV system will ultimately utilize uhf and that all-channel receivers are essential equipment . . . The Committee recommends that Congress give favorable consideration to legislation that will spur the production of all-channel sets [either by exempting all-channel sets from Federal excise tax or] by increasing the tax on vhf-only sets."

ASCAP-BMI: See story, page 3.

CRAVEN PLAN comments filed June 3 by 100-plus parties displayed great variation in reactions to concept of virtually dropping fixed allocation table. There was large group in favor, large number opposed. In addition, substantial group said, in effect: "If you do make changes, please adopt our suggestions instead."

Naturally, self-interest of each party filing was generally apparent—though there were definite exceptions. Usually, big-coverage vhf stations want status quo, many stating FCC shouldn't tamper with present plan until TASO turns up definitive technical vhf-uhf data. Some vhf operators favored plan, presumably with eye to migrating to larger cities. Uhfs split wide open. Some have little vhf competition and they want to keep it that way; thus, they oppose Craven plan. Others aren't making out, hope to glom onto a vhf channel themselves, and they frequently urged Commission to specify that new vhf channels added in their areas should be earmarked for uhf operators.

Though some parties in favor of plan skirted talk of co-channel mileage cuts, others went all the way and asserted that assignment should be made on a coverage & interference basis—as in AM.

ABC & NBC were generally leery of plan. ABC expressed doubt that plan's objective of speeding administrative procedures would actually be achieved. NBC fretted over possibility that plan would "pose threats" to present mileage separations and to uhf stations.

But CBS came out for it, said it believes that plan will provide "more efficient use of channels"; that allocation plan has served its purpose; that TASO results shouldn't be awaited—because TASO is exploring "problems of much wider scope" and its "date of completion is uncertain."

Biggest question, of course, is how Commission will finally vote. Comrs. Hyde, Bartley & Lee dissented to issuance of proposal, while Comr. Mack expressed doubts though concurring (see Special Report, April 27). If final vote comes before Chairman McConnaughey leaves June 30, it's believed plan has good chance of approval. If vote comes later, much depends on new commissioner.

FCC's proposed translator rules change—to require cessation of translators when regular stations start in markets involved—drew approximately 70 comments at deadline this week. Comments were clearly divided: (1) Translator operators, grantees & applicants opposed proposal, don't want "death sentence" hanging over their heads. (2) Stations planning to serve translators extending their coverage areas also opposed, for obvious reasons. (3) Stations operating or planning conventional satellites favored proposal, fearing translator competition for audience; same goes for small-town regular-station operators. NBC was sole network filing; it supported proposal "with reservations," said case-to-case determination would be better than "absolute rule." It endorsed objective of promoting establishment of conventional stations.

All-out drive for equal news coverage of public proceedings by camera & microphone was urged June 6 by Howard H. Bell, asst. to NARTB pres. Harold E. Fellows, in speech to Va. Assn. of Broadcasters at Richmond. He said "full recognition & acceptance of electronic journalism" can't be won by individual broadcasters, that all-industry campaign is necessary.

Political broadcasters must identify themselves in Ohio under new law (Vol. 13:21) finally voted by state legislature. Employees of TV-radio networks & stations are exempted from ban on anonymous political material which already applied to newspapers.

OPEN SEASON ON FCC appears to be order of the day in House of Representatives. Following violent attack by Rep. Dingell (D-Mich.) last week (Vol. 13:22), Rep. Reuss (D-Wis.) on June 3 lit into Commission for "political favoritism." Reuss backed complaint of Madison, Wis. *Capital Times* that it lost decision for Ch. 3 (WISC-TV) to Morgan Murphy interests because of politics. He sicked Moulder "watchdog" committee on Commission as "its first order of business."

Then June 4, Rep. Bray (R-Ind.) got worked up about FCC decision giving Indianapolis' Ch. 13 to Crosley, turning down locally-owned applications. He cited facts that Crosley is multiple owner; that coverage of some of its stations overlaps; that its stations are run by employes, not by owners, etc. Bray's position was seconded by Indiana GOP Reps. Harden, Harvey & Brownson. Brownson thanked colleagues for joining him in calling on FCC Chairman McConnaughey to protest grant to Crosley. Rep Bow (R-O.), however, stood up to defend McConnaughey, said fact latter is from Ohio wouldn't prejudice him toward Crosley, which headquarters in Cincinnati.

Congressional complaints didn't affect FCC, for on June 5 it announced intention of denying defeated applicants' petitions for reconsideration.

* * * *

One of the few remaining larger-city vhf decisions was wrapped up this week when Commission gave Orlando's Ch. 9 to Mid-Florida TV Corp., interlocked with radio WLOF, denying WORZ and reversing initial decision of examiner Basil P. Cooper.

With Comr. Hyde not participating, Comr. Craven abstaining, FCC denounced WORZ principals for "numerous omissions & misstatements" in application & hearings, found that they tipped scale—otherwise nearly balanced—in favor of WLOF.

Examiner had given WORZ "clean bill of health," FCC noted. But Commission found that station's controlling Murrell family group "intentionally misrepresented the nature & extent" of participation in WORZ management by Wm. O. Murrell Sr., against whom disbarment proceedings had been instituted. Examiner had held that WLOF itself was deceitful in letter calling attention to Murrell's professional status.

Principal owner of radio WLOF is Harris Thompson (52%), Washington financier who bought 37% interest in Feb. from John W. Kluge (Vol. 13:6), who retained approximately 30% in TV applicant. Loser WORZ is controlled by Mrs. Naomi T. Murrell (55.9%), wife of Wm. O. Murrell Sr., and their son, daughter, son-in-law.

* * * *

FCC is sticking to its Ch. 3 Hartford decision, it indicated this week, announcing tentative vote denying petition for reconsideration of Hartford Telecasting. Commission also adhered to plans for deintermixing Springfield, Ill., issuing decision turning down efforts of WMAY-TV to keep Ch. 2; grantee gets Ch. 36 instead.

FCC allocations actions: (1) Finalized addition of Ch. 12 to Farmington, N. M., Ch. 10 to Presque Isle, Me. (2) Finally denied shift of Ch. 5 from Ft. Smith to Fayette, Ark. (3) Proposed substitution of Ch. 15 for Ch. 41 in Florence, Ala. (4) Proposed addition of Ch. 2 to Portland, Ore.—to be considered with conflicting proposals to add it to Longview or Vancouver, Wash.

WENS, Pittsburgh (Ch. 16) filed petition seeking addition of either Ch. 9 or Ch. 6 to city. First plan would involve swap of Ch. 16 & Ch. 9 (WSTV-TV) with Steubenville. Second, involving a lot of operating stations, would

require shift of Ch. 12 from Erie and Clarksburg to Akron-Cleveland and to Johnstown-Altoona, shift of Ch. 8 from Lancaster to Johnstown-Altoona and to Philadelphia-Camden-Atlantic City-Wilmington, shift of Ch. 6 from Johnstown to Pittsburgh.

Translator grants: Globe-Miami, Ariz., Ch. 77 & 80 to Community TV Project.

Note: TASO advises us it neither supports nor opposes experimental operation on New Orleans' Ch. 12 proposed by WJMR-TV (Ch. 20), correcting our report of opposition (Vol. 13:22).

Radio Station Sales Reports: WILD, Birmingham, by Sherwood R. Gordon for \$335,000 to Bartell Bestrs. Inc. (Gerald A. Bartell, pres.) . . . WWPf, Palatka, Fla. by L. C. McCall & J. E. Massey for \$100,000 to George W. Hall, local businessman . . . KHMO, Hannibal, Mo. by Mt. Ranier Radio & TV Bestg. Co. (Lester M. Smith, pres.) for \$97,500 to Jerrell A. Shepherd, owner of KLIK, Jefferson City and KNCM, Moberly, Mo. . . WNAV, Annapolis, control by Capital Bestg. Co. (Albert H. MacCarthy estate and Alfred H. Smith) for \$91,000 to Washington Bestg. Co. (Henry Rau, pres. & 58% owner), operator of WOL, Washington and WDOV, Dover, Del. . . KIHQ, Sioux Falls, S. D. by Leslie P. Ware for \$65,000 to James A. Saunders, gen. mgr. of St. Paul auto agency (51%) and John W. Hazlett, sales mgr. of WDGy, Minneapolis (49%) . . . KIHQ, Hood River, Ore. by C. H. Fisher for \$60,000 to Clarence J. McCredie, ex-30% owner & employee of KWIE, Kennewick, Wash. . . WSTN, St. Augustine, Fla. by James D. Sinyard for \$60,000 to Stanmark Inc., owned 25.5% each by realtors Harry C. Powell Jr. & Simpson R. Walter Jr., 49% by Lawrence R. Pincus, ex-mgr. of WIVY, Jacksonville. Previous sale to Carmen (Jim) Macri (Vol. 13:13) fell through when FCC raised question of overlap with his stations in Jacksonville & Palatka . . . WORM, Savannah, Tenn. by owners of WJOI, Florence, Ala. (Joe T. Van Sandt, pres.) for \$50,000 to Lexington, Tenn. attorney W. L. Barry (50.67%) and Neal B. Bunn (48.66%); latter will be gen. mgr., is mgr. & 25% owner of WDXL, Lexington, Tenn. . . WPUV, Pulaski, Va. by Mason C. Deaver for \$50,000 to co-equal owners John A. Columbus, asst. mgr. & chief engineer; Lawrence R. Schoenfeld, sales mgr.; Carl A. Shufflebarger, business mgr.; Howard R. Imboden, drug store proprietor. Brokers: WWPf and WNAV, Blackburn & Co.

Radio station sales approved this week: KGKB, Tyler, Tex. by Mrs. Lucille Ross Lansing, principal owner of KLTv there, to Ron C. Litteral, ex-sales mgr. of WAFB-TV, Baton Rouge, for \$150,000 (Vol. 13:14). WKYB, Paducah, Ky. by E. J. Paxton family's *Paducah Sun-Democrat*, operator of WPSD-TV there, to radio WEW, St. Louis (Bruce Barrington, pres.) for \$150,000 (Vol. 13:16). KLFY, Lafayette, La. by owners of KLFY-TV (Paul H. DeClouet, pres.) to new Pelican Bestg. Co. Inc. (headed by Houston businessman Howard Tellepsen, 50%) for \$140,000 (Vol. 13:19). WEGO, Concord, N. C. by A. W. Huckle and daughter Elizabeth G., also owners of *Concord Tribune*, to Robert R. Hilker, pres. of WCGC, Belmont, N. C., for \$102,000 (Vol. 13:16).

CP for KSLM-TV, Salem, Ore. (Ch. 3) is being transferred to Northwest Telecasting Inc., in which radio KSLM (Glenn E. McCormick, pres.) will hold 51%, according to application filed with FCC. Other 49% will be held by Shasta Telecasting Corp. (Geo. C. Fleharty, pres.-gen. mgr.), operator of KVIP, Redding, Cal. (Ch. 7), which also is buying 50% of CP for KHUM-TV, Eureka, Cal. (Vol. 13:20). Oregon Radio Inc. (KSLM) and Shasta Telecasting are to contribute up to \$75,000 each.

“CABLE THEATRE” dominated talk at National Community TV Assn. convention in Pittsburgh’s Penn-Sheraton Hotel this week—and focal point was debate between Jerrold Electronics pres. Milton J. Shapp and International Telemeter v.p. Carl Leserman over merits of flat monthly charge vs. coinbox pay-as-you-see technique.

After giving details of Bartlesville, Okla. setup (Vol. 13:20), Shapp argued that \$9.50 flat monthly fee is basically best because: (1) Home viewer, differing from movie patron, is no captive audience—thus is liable to contrast pay-TV fare with free TV easily available, regret having put coin in slot for inferior movie. (2) Billing monthly fee is simple, cheap—compared with coin collection. (3) Public will break scrambled codes. (4) Set servicing will be terrific headache because of decoder tie-in.

As for cable theatre potential, Shapp cited U of Okla. survey indicating movies may glean 3½ times as much in homes as in theatres. He advised CATV operators to get in touch with local exhibitors—and “lease, rent or share ownership with them, for they know their business.”

Leserman, pointing to 35 years movie experience, reiterated Telemeter (Paramount Pictures) claim that public just won’t buy entertainment on monthly basis; that it wants to pick and choose; that coinbox method permits producers to be paid according to value of individual pictures far more easily than with flat-fee.

Leserman claimed longer experience with cable-theatre concept by pointing to Telemeter’s experiment 4 years ago at Palm Springs, Cal. Tests were “very, very successful,” he said. Asked why Telemeter hadn’t continued, he stated Palm Springs experiment turned up bugs, sent technicians back to labs—and everything is now ready for big move. Without giving details, he said Telemeter would soon go into a town with plans to feed 10,000 homes. Leserman heads International Closed Circuit TV Inc., successor to Trans-Community TV Network, operator of wired systems in Cedar City, Utah; Miles City, Mont.; Needles, Cal.

Shapp again derided telecast scrambled systems, said they’d fall of their own weight if approved by FCC. Leserman said he believes in both “air link” and wired scrambled methods, plans demonstrations of latter to everyone interested, at Paramount Bldg., N.Y. next month.

During hot question-answer period, Leserman was asked what would replace popcorn & candy in cable theatre. He said that advertising could do the trick. It was also brought out by National Theatre Supply’s Jack Servies that Cinemascope could be handled on TV with new GPL equipment, losing only slight portion of picture.

TV sets-in-use figures for European countries as of May 1, as reported at press conference this week by TPA foreign sales mgr. Manny Reiner, just returned from European trip: United Kingdom 7,000,000, West Germany 1,000,000, France & Italy 550,000 each, Belgium 200,000, Netherlands 100,000, Denmark 76,000, Switzerland & Sweden 25,000 each. He gave these estimates for Iron Curtain countries: USSR 1,300,000-1,500,000, East Germany 55,000, Czechoslovakia 65,000. He said TPA now has sales representatives in every foreign TV market except far east, and reported recent sales of several TPA series in Europe and Latin America. He plans to leave Aug. 1 for Hong Kong, Philippines, Japan & Australia to arrange sales representation there.

CP for KTRB-TV, Modesto (Ch. 14) is being sold for \$5000 by radio KTRB (Wm. H. Bates Jr., pres. & 80% owner) to J. E. O’Neill’s KJEO, Fresno (Ch. 47), will be operated as satellite with some local programming, according to application filed with FCC.

New and Upcoming Stations: Major link in unique satellite-translator chain was forged June 1 when WRLP, Greenfield, Mass. (Ch. 32) began test pattern operation. Station will repeat programs of parent WWLP, Springfield (Ch. 22), as well as originating some local shows. WWLP has plans for another satellite and 5 translators, and gen. mgr. Bill Putnam reports he expects to have first translator—W79AA, Claremont, N. H.—relaying WRLP schedule by June 18. WWLP also has applied for Ch. 64 satellite in Pittsfield, Mass., and translators in Lebanon & Newport, N. H. and Bennington & Rutland, Vt.

Debut of WRLP brings on-air total to 501 (92 uhf). WRLP has 12-kw RCA transmitter and 620-ft. Ideco tower at Bolton Rd., Winchester, N. H. Wallace I. Green, ex-WWLP program director, is station mgr.; Philip J. Renison, also WWLP, is sales mgr.; Burleigh M. H. Brown, program director; John A. Fergie, chief engineer; Ralph L. Jay, asst. chief engineer. WWLP base hour is being raised from \$600 to \$700. Reps are Hollingbery and Kettell-Carter (Boston).

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KPAC-TV, Port Arthur, Tex. (Ch. 4) has RCA transmitter due Aug. 1, plans Sept. 15 programming with NBC, reports sales mgr. Mack Newberry. It will be 2nd outlet in Beaumont area, where KFDM-TV (Ch. 6) has been operating since April 1955 and KBMT (Ch. 31) quit last Aug. 1 after 27 months. Contractor has plans for studio-transmitter building; 700-ft. Ideco tower with 12-bay superturnstile antenna is to be ready Sept. 1. Julius M. Gordon, from Jefferson Amusement, will be pres.-gen. mgr.; Glenn Boatright, from KPAC, chief engineer. Rep not reported.

KGEZ-TV, Kalispell, Mont. (Ch. 9) has 5-kw RCA transmitter wired and ready at Flathead, plans June 15 test patterns, July 1 programming with CBS-TV, reports Richard V. Vick, v.p.-gen. mgr. & 2.4% owner. Also ready is 300-ft. Ideco tower with 3-bay antenna. Principal owner is Frank Reardon, who controls Montana radio stations KGEZ; KBOW, Butte; KLCB, Libby. Martin Tollberg will be program mgr. Base hour will be \$125. Rep will be Donald Cooke.

Rate increases: KHJ-TV, Los Angeles, July 1 raises base hour from \$1500 to \$1750, min. \$300 to \$400. KTVI, St. Louis, April 15, hour \$400 to \$1000, min. \$60 to \$250. KFJZ-TV, Ft. Worth, June 1, hour \$600 to \$1000, min. \$100 to \$225. WTVT, Tampa-St. Petersburg, June 1, hour \$750 to \$850, min. \$180 to \$220. WDAU-TV, Scranton, April 1, hour \$500 to \$600, min. \$100 to \$125. WTVH, Peoria, July 1, hour \$500 to \$550, min. \$100 to \$110. KELO-TV, Sioux Falls, S. D. June 1, hour \$450 to \$510, min. \$100 to \$125. KOB-TV, Albuquerque, June 1 added Class AA hour (6:30-10 p.m. daily) at \$410, min. at \$85, Class A hour going from \$300 to \$310. KFDX-TV, Wichita Falls, April 1, hour \$300 to \$350, min. \$60 to \$70.

Catholic Broadcasters Assn. holds 10th anniversary conference June 13-16 at U of Detroit. Panel participants will include TV-radio director Rev. Timothy Flynn of N. Y. diocese, U of Detroit pres. Very Rev. Celestin J. Steiner, national CBA director Richard Walsh, production mgr. Thomas Sutton of U of Detroit’s educational WTVS, gen. director W. T. Rabe of school’s Titan Transcription Network.

Research report on shadow-mask multicolor storage tubes for radar & other applications with low frame rates (*Long-Persistence 3-Color Indicator Cathode-Ray Electron Tube*) is available for 75¢ from Office of Technical Services, Commerce Dept., Washington.

OPTIMISM, BETTER PRICES, MARK NEW TV LINES: Bright prospects for TV market this fall, with industry sharing in generally strong economy, was theme of RCA & Philco new-line showings this week. As put by Robert A. Seidel, RCA consumer products exec. v.p.: "TV should get its place in the sun this fall." And Philco pres. James M. Skinner predicted minimum of overproduction and dumping -- manufacturers having shaken down to stable group.

Estimate of fall season being "probably best country has ever known" was based by Seidel on record high employment, peaceful labor scene, consumers spending at record pace. As he put it: "There's no reason why TV shouldn't get its share of excellent business." At the same time, he said, RCA's TV sales are practically even with last year while industry sales are off 15%.

New line has been redesigned inside and out, said Seidel. And RCA Victor TV v.p.-gen. mgr. Charles P. Baxter gave the keynote: "Lean, Clean and Mirror Sharp." Line uses 110-degree tube (Vol. 13:22) in all 17-21-24-in. sets, 90-degree short-neck in 14-in. portable. Featured also are lowboy styling based on survey which spokesman said showed overwhelming consumer preference, 59-lb. 21-in. portables which are 5-in. shallower than previous 21-in. tube table models, "Custom Corner" 21-in. consoles described as "first commercially acceptable corner cabinets."

All RCA sets have picture tube base completely enclosed in cabinet, eliminating so-called "doghouse" and allowing sets to be placed closer to wall. In response to our question, Seidel said sets would not overheat or mark wall if about ½-in. air space was left between wall and set. (For new line, see p. 12.)

"Some prices are the same as last year, some are up a little and the 24-in. sets have been cut \$20," Seidel noted. Explaining prices, Baxter said "we cannot escape the fact that costs are up all along the line and that profit levels in the industry have been unsatisfactory."

* * * *

"Some firming of TV prices this fall" was predicted by Philco's Skinner, adding that company would show a profit in second quarter, even though gross sales may be down from the first quarter of this year.

Philco prices are about same as last year, but contain "reasonable margins for Philco, distributors and dealers," Skinner said. Prices run \$160-\$475, have average 3¼% higher distributor discount than last year; this was attributed to engineering advances and switch to automation in TV production.

Skinner said Philco TV inventories were in best shape in 3-4 years and predicted company would exceed last year's production. He declared that he had no plan to limit production of portables which "are here to stay"; that 20-25% of Philco production last year was in portables, and would go somewhat higher this year.

Fall retail business should be pretty good, Skinner stated, adding that there shouldn't be so much overproduction or dumping as last year. He said that most manufacturers are now financially stable; that there should be no more dropping out; that conditions generally should be better for next few years.

Philco new line uses 110-degree picture tube only in its 17-in. series called "Slender Seventeener." Consumer products exec. v.p. Larry Hardy told distributor meeting that company decided 17-in. size was proper place to take advantage of the lighter weight and narrower depth. In other models Philco uses 90-degree short-neck tube with cabinets running 17-in. or deeper, plus 2-4-in. tube cup projection. Some question of availability of 110-degree tubes was raised by Skinner who told newsmen he thinks tubes may be "scarce to some degree for several months." (For details of Philco line, see page 12.)

Skinner predicted TV manufacturers would have a better year in 1957 than in 1956. And Hardy expressed view industry would produce 6½-7,000,000 sets this year.

He said Philco's plant is geared to turn out 20,000 TV sets weekly on a single-shift basis, thinks it may be necessary to add a shift.

Only one other company (obviously RCA) has spent as much on color as Philco, Hardy said. Skinner declared color TV has a "great future" -- but that today's product is not good enough and price is too high. He thinks color "should be soft-pedaled" until a set is developed which "shows real promise for the future."

Skinner said Philco's "apple" system shows "tremendous amount of promise" but still has flaws and needs continuing research. "I don't think we have the answer today," he declared, but "we're closer to it than any others." And Hardy stated that Philco lost money last year on color and doesn't want to lose any this year. But he said Philco can produce sets with all-glass shadow-mask tube if necessary.

* * * *

Other lines coming out this week included Zenith with new "Sunshine" picture tube which spokesmen described as short, aluminized, straight-gun type, which has no ion trap magnet, delivers twice the beam current for the same modulating voltage, avoids "heat and distortion" problems of 110-degree tubes. Prices are \$140-\$575, reflecting recent \$10 price increase on current line. (See p. 12.)

Sylvania started showing 1958 line to series of distributor meetings in Buffalo, expected to release details June 14. Meantime, we have learned line has 8 models -- 4 table, 4 console -- at slightly higher prices. Sets are called "Slim-line", use 110-degree tube with tube-cup projection eliminated. Leader 21-in. table model is only 13 11/16-in. deep, weighs 50 lb. vs. similar model last year which was 19-in. deep and weighed 101 lb.

Revolutionary changes in marketing methods, engineering programs and production techniques were predicted by v.p.-operations Marion E. Pettegrew in speech to Sylvania distributors meeting. He predicted annual sales of 9,300,000 TV sets by 1966, with manufacturing and distribution volume at \$4 billion.

* * * *

Packard-Bell pres. Robert S. Bell also cited growing optimism in TV industry and said final 6 months of the year would see higher prices and more high-end sets. New Packard-Bell line uses 110-degree tube in third of line, has 15 black-&-white 17 & 24-in. models, 2 color sets.

Prediction of a "flat TV wall picture" within 10 years was made to Admiral distributors convention by pres. Ross D. Siragusa. He told Miami Beach meeting that 110-degree tube is cutting cabinets to less than 16-in. deep from the 27-in. of 1951. He foresees renaissance in TV styling and in home decorating incorporating TV with "furniture-styled" cabinets. Details of line are not being disclosed until after distributors hold open house for dealers.

Retail Sales: TV set sales at retail in year's first 4 months were 2,020,876, says RETMA, down slightly from 2,036,808 sold in similar 1956 period. For April alone, sales amounted to 337,965 compared with 347,630 in April 1956. Radio sales at retail, excluding auto sets, totaled 2,362,068 compared with 1,984,915 sold in first 4 months of 1956. Sales in April were 543,092 vs. 471,193 in April 1956.

Production: TV output was 72,770 week ended May 31, reflecting Memorial Day holiday, compared with 86,629 preceding week and 94,578 in corresponding week one year ago. It was year's 22nd week and brought TV production for year to date to about 2,238,000 compared with 2,972,782 in same period of 1956. Also this week, RETMA placed official production of year's first 4 months at 1,835,975 compared with 2,394,264 in similar period last year. April production was 361,246 compared with 559,842 in March and 549,632 in April 1956. Radio production totaled 167,781 (59,041 auto) week ended May 31, compared with 249,720 (93,275) the preceding week and 208,224 (60,477) in corresponding week year ago. Radio output for 22 weeks totaled about 6,267,000 (2,477,000) vs. 5,800,145 (2,076,646) in same 1956 period. First four months production was placed at 5,075,180 compared with 4,525,225 in similar period last year. April production totaled 1,115,813 (380,452 auto) compared with 1,609,073 (597,532) in March and 992,982 (299,253) in April 1956.

Topics & Trends of TV Trade: "We're going to get color TV off the ground, come hell or high water," says RCA exec. v.p.-consumer products Robert A. Seidel in recapping lessons learned in 5-week Milwaukee "Carnival of Color." And he predicted 5 major competitors—which he said he couldn't name—will be actively promoting color within 3 months; that all set makers will be on bandwagon in 9 months.

Details of Milwaukee test—which will be used to cue RCA's interim color campaign this summer and a national campaign in fall—were supplied by RCA merchandising v.p. Martin F. Bennett. Prior to May campaign, color sales averaged 12 a week in Milwaukee County, he said, while for the 5-week drive sales averaged "106 a week, a rise of 783%." He said this "demonstrated conclusively that the public is ready to buy color now in large volume."

Bennett said summer color promotion will be held in many cities—but on smaller scale than in Milwaukee. Seidel said cities haven't been picked yet.

One prime lesson learned in Milwaukee test, said Bennett, is to go directly to consumer, by phone or in person, and ask him to buy color TV, and he added that surveys show 3 of 4 people have never seen color properly demonstrated; that another survey indicates 73% of those buying color sets had to ask to see color.

In Milwaukee, "we found the people wanted home demonstrations," Bennett said, "and once they saw color in their living room two-thirds of them bought sets." An RCA spokesman said about 600 home demonstrations were made in the 5-week period and resulted in about 400 sales.

Milwaukee dealer attitude toward color was described by Bennett in these words: "The dealers—far from being apathetic about color, as has sometimes been said—are actually enthusiastic in their support of it." In other sections of country some dealers who are not sold on color are a bottleneck, said Seidel, but he added that this is being corrected. He reported national color sales for year's first 5 months are twice those of similar period last year (figures undisclosed).

Other facets of Milwaukee test: (1) Timing was bad for program because May is slack month, with dealers liquidating stocks in preparation for new lines. (2) RCA dealers who promoted color also had 50% black-&-white sales increase in May over same month last year; RCA spokesman said this is true on national scale. (3) Some 70% of color sets sold were higher priced than \$495 price leader table model.

Role of *Milwaukee Journal's* WTMJ-TV in color was described by v.p.-gen. mgr. Walter J. Damm who said there were some 3300 color sets in station's service area at start of RCA campaign May 1. RCA's Bennett said station's daytime color programs (11 a.m.-3 p.m. daily) "helped immeasurably" in home demonstrations.

* * * *

Canadian TV production totaled 117,654 in first 4 months of 1957, says RETMA of Canada, compared with 208,193 in similar 1956 period. April production is listed at 22,823 vs. 36,432 in April last year. Distributor sales totaled 22,093 in April, 130,571 for year's first 4 months, with this breakdown by provinces: Ont. 9166 & 47,887; Que. 5706 & 34,427; B. C. 2318 & 11,429; Alberta 1411 & 10,091; Man. 1075 & 8736; N. S. 1061 & 6934; N. B. & P. E. I. 574 & 4374; Sask. 536 & 5187; Nfld. 246 & 1506.

Attack on \$100,000,000 tube counterfeiting racket is planned by RETMA, calling for campaign based on theme: "You never get something for nothing." Main objectives are: (1) Clarify status of legitimate tube reprocessor. (2) End counterfeiters' source of supply and market. (3) Improve identification of reprocessed tubes. (4) Encourage enforcement of laws dealing with fraudulent ads.

Legal battle royal over Cascade tuner appeared to be shaping up this week as Standard Coil Products filed infringement suit in N. Y. Federal Court against GE in what Standard Coil pres. James O. Burke promised was "one of many that will be instituted." He explained that Standard had been unable to file suit earlier with regard to the 1950-51 tuner design because its application for patent had been challenged in U. S. Patent Office since 1951 by RCA, which also claimed to be first inventor of Cascade circuit. Patent office has decided in favor of Standard, according to Burke.

RCA 1958 black-&-white line includes 5 basic portables plus 24 table and console models, at \$130 to \$395. They are: 14-in. portable at \$130 & \$150 with 90-degree short-neck tube (rest of entire line has 110-degree); 17-in. portable \$170-\$190; 21-in. portable \$230; 17-in. table \$190; 21-in. tables \$200, \$210, \$220, \$230, \$240; 21-in. consoles \$240, \$270, \$290, \$300, \$310, \$330, \$350, \$360, \$370, \$380; 24-in. tables \$240, \$260; 24-in. consoles \$370, \$380, \$395. One new deluxe color console—"Lockhaven"—at \$695 was added, will be shipped in next few weeks. All black-&-white except 24-in. are being shipped.

Philco's new line consists of 3 portables at \$180, 4 table models at \$160-\$175 in 17-in. "Slim Seventeen" series; 21-in. table models \$180-\$240; 21-in. consoles \$240, \$250, \$280, \$330, \$340, \$370, \$380, \$390; 24-in. table model \$280, consoles at \$340, \$450 and \$475; 21-in. "Carousel Ensemble" \$250. All except low-end table models are in wood, with lighter woods running \$10 higher; 21-24-in. sets use 90-degree short-neck tube. There are no color sets. All sets are in production except "Slim Seventeeners" which will be shipped about Aug. 1.

Zenith's 1958 TV line, shown to distributors this week in Chicago, includes 60 sets priced \$140-\$575, TV-combinations to \$625. They are: 14-in. portable \$140-\$195; 17-in. portable \$160-\$230; 21-in. table \$190-\$290; 21-in. console \$250-\$335; 21-in. combinations \$425-\$460; 21-in. hi-fi console \$320-\$435; 24-in. console \$300-\$345; in "Space Command" series, 21-in. table \$270-\$300; 21-in. console \$300-\$575; 24-in. console \$450. Shipments to dealers scheduled about July 1.

RCA's new hi-fi phonograph line, introduced this week by James M. Toney, v.p. & gen. mgr., radio and "Victrola" div., is priced from \$130-\$2000. He told press preview in N. Y. that 3 new recorder-"Victrola" stereotape players will be added in late summer. Toney also showed 2 AM-FM shortwave radios, made by unidentified German manufacturer, priced at \$230 for table model, \$370 for console.

Commerce Dept. appropriation was passed by both houses of Congress this week (Vol. 13:22), carrying sufficient funds to maintain industry divisions of Business & Defense Services Administration on somewhat reduced scale.

Trial date for Zenith's \$61,000,000 triple-damage anti-trust counterclaim suit against RCA, Western Electric & GE was postponed by Chicago Federal Judge Igoe to Sept. 9 from June 17.

Hoffman's 1958 TV-radio-hi-fi line will be shown at June 18 distributor convention at El Rancho Vegas Hotel, Las Vegas.

Emerson holds annual distributor convention for new TV-radio-hi-fi lines June 25-26 at Lido Hotel, Lido Beach, N. Y.

Philco Mount Clemens, Mich. plant was sold this week to Ford Motor Co. for \$1,450,000, its 235,000-sq. ft. to be used in manufacture of upholstery.

National Radio Week next year will be May 4-10 with same sponsors: RETMA, NARTB, NARDA, RAB.

Trade Personals: Theodore A. Smith named exec. v.p., RCA industrial electronic products, a new position, will report to pres. John L. Burns; he's succeeded as exec. v.p., defense electronic products, by Arthur L. Malcarney, v.p.-gen. mgr., commercial electronic products, who will report to senior exec. v.p. Elmer W. Engstrom; name of his successor hasn't been disclosed; Orrin E. Dunlap Jr. appointed RCA v.p., institutional advertising & publications; Sidney M. Robards to press relations director—both reporting to E. C. Anderson, executive v.p., public relations . . . Don G. Mitchell, Sylvania chairman and president, received special management award from National Sales Executives Association at 22nd International Distribution Congress this week in Los Angeles . . . Joseph L. Raffel appointed Webcor exec. v.p., Adolph Wolf manufacturing & engineering v.p. . . . E. W. Seay promoted to gen. adv. mgr. of Westinghouse Electric, S. F. Johnson to apparatus & defense adv. mgr. . . . M. V. Musy, ex-Westinghouse, named Sylvania district sales mgr. for San Francisco area . . . Paul Ritter MacAllister named consultant to Motorola's design dept. . . . Ken Summerfield named Dominion Electrohome Ontario sales promotion supervisor, dealer products div. . . . Wm. H. Miller promoted to Jerrold sales mgr., succeeding Fred Lieberman, resigned; Leon Papernow moves up to head community antenna system operations . . . H. Edwin Dudley, former employe relations mgr., named Stromberg-Carlson wage & salary administrator; Richard S. Heckman, ex-Charles Bruning Co., named personnel mgr.

Obituary

Col. Sosthenes Behn, 75, co-founder and retired pres. & chairman of IT&T, died of a heart ailment June 6 at New York's St. Luke's Hospital. He developed IT&T from modest Cuban-Puerto Rican telephone-telegraph operation to worldwide electronics manufacturing company and telecommunications operating system which grossed half-billion dollars yearly. He retired in 1956, retaining title of honorary chairman. He was noted particularly for skill in handling international finance. He was born in Virgin Islands of Danish father and French mother who gave him Greek first name signifying "life strength." Surviving are his widow, 2 sons, a daughter, 5 grandchildren.

Humphreys O. Siegmund, 61, Bell Labs military development engineer, died June 5 while driving car in Livingston, N. J. He held 23 patents, had written many articles on telephonic devices since starting with Western Electric in 1919. Surviving are his widow, daughter, brother, sister.

Magnetic Recording Industry Assn. named Irving Rossman, Pentron Corp., as pres., succeeding Joseph F. Hards, Magne-Tronics Inc.; Arnold Hultgren, American Molded Products Co., v.p.; Charles L. Dwyer, Webcor, treas.; Herman Kornbrodt, Audio Devices Inc., recording secy. Hards and Victor Machin, Shure Bros. Inc., were named directors.

DISTRIBUTOR NOTES: GE Supply Co. to open Denver major appliance branch about Nov. 1, replacing B. K. Sweeney Co. . . . RCA Victor Distributing Corp. appoints Clarence A. Malin mgr. at Los Angeles; Edward Dodelin succeeds him as Chicago mgr.; A. W. Sayers, former TV-radio merchandise mgr. in Chicago, succeeds Dodelin as Buffalo mgr. . . . Ed Germain resigns as merchandise mgr., Phileo Distributing Inc., Chicago . . . Graybar appoints Bob Gilbert, ex-Appliance Wholesalers, Portland, Ore., as appliance sales mgr. for Portland & Eugene branches . . . Radio & Appliance Corp. (Admiral), Nashville, has been purchased by Wm. L. Mitchener, pres.

General Instrument Corp. earned \$505,407 (37¢ per share) on record sales of \$33,254,735 in fiscal year ended Feb. 28 vs. \$285,474 (21¢) on \$28,928,604 year earlier. Improved position reflects wider product base in TV-radio field and military & industrial electronics, chairman Martin H. Benedek said in annual report, which includes operations of Micamold Electronics Mfg. Corp. and Canadian subsidiary T. S. Farley Ltd., both acquired in 1956. He said "further progress" is expected in fiscal 1958 as result of acquisition of Radio Receptor Co. (Vol. 13:15).

N. V. Philips' Gloeilampenfabrieken, big Dutch TV-radio-electrical combine, earned \$10,974,000 on first quarter sales of \$189,181,000 compared with \$8,361,000 on \$147,373,000 in similar 1956 period. Consolidated Electronics Industries, 40% owned by Philips' subsidiary, North American Philips, reports profits of \$1,154,803 (\$1.47 per share) on sales of \$14,800,838 in 6 months ended March 31, compared with \$1,174,441 (\$1.49) on \$13,722,497 in corresponding period year earlier.

General Precision Equipment offers 194,200 shares of \$3 dividend convertible preference stock (\$9,710,000) to stockholders at \$50 per share (Vol. 13:20). Holders of record June 5 may buy one new share for each 6 of common or one for each 9 of \$1.60 preference stock. Rights in offer through syndicate headed by First Boston Corp. and Tucker, Anthony & R. L. Day expire June 24.

Dividends: Cornell-Dubilier, 30¢ payable June 25 to stockholders of record June 17; Dynamics Corp., 10¢ June 30 to holders June 14; Decca Records, 25¢ June 28 to holders June 17; Corning Glass, 25¢ June 29 to holders June 17; Universal Pictures, 25¢ June 28 to holders June 14; RCA, 25¢ July 29 to holders June 21.

Erie Resistor Corp. filed registration June 5 with SEC (File 2-13406) for 100,000 shares of \$12.50 par 1957 preference stock, public offering at \$15 per share to be made through underwriting group headed by Fulton Reid & Co.

General Transistor Corp. earned \$50,225 (18¢ per share on 283,966 shares outstanding) on sales of \$510,135 in first quarter ended March 31, compared with \$41,161 (14¢) on \$153,723 year earlier.

Telecomputing Corp. earned \$125,000 (8¢ per share on 1,483,920 shares outstanding) in 4 months ended April 30 vs. \$185,000 (13¢ on 1,403,920 shares) year earlier.

"Pulling in of credit horns is not the answer" to tight money economy, Dr. Neil Jacoby, dean of UCLA School of Business Administration, told Packard-Bell annual distributors meeting in Los Angeles this week. He predicted increased TV business—both wholesale and retail—in last 6 months of year, but said profits would not go up proportionately. Consumers' high income, record savings, low debts were reasons he gave for prediction of increased buying.

Surcease from 10% excise tax on color and all-channel sets was asked by RCA tax director John F. Costelloe this week in appearance before Senate-House Economic subcommittee on fiscal policy. He said new products, now burdened with such excise taxes, need relief while they are attempting to establish domestic markets. He told committee black-&-white TV escaped similar tax for several years until market developed.

New Stromberg-Carlson "Electronics Center" and ultra-modern administration building in Rochester will be formally opened June 11, marking completion of \$5,000,000 expansion program at main plant, and adding more than 250,000 sq. ft. of plant space.

Andrea ships 21-in. lowboy with sliding doors at \$400 for mahogany, \$410 blonde or ebony, \$420 walnut-fruitwood on cherrywood base.

FCC was jarred back on its heels this week by Court of Appeals in important "economic injury" case involving grant of radio WCLE, Cleveland, Tenn. over protest of WBAC (Vol. 13:12). Commission had stuck out its neck and concluded it lacks power to consider economics in making grants. Judges Edgerton & Bazelon, with Danaher dissenting, this week ordered WCLE off air pending hearing on the appeal of WBAC. In very strong language, court said: "The probabilities of success appear to lie heavily with appellant. The showing of irreparable injury here is sufficient when coupled with such probability of success to justify a stay." WCLE promptly asked Court of Appeals *en banc* review of the 3-judge decision; WCLE was permitted to keep going pending court decision on that angle, expected next week.

Grant of \$100,000 to Metropolitan Educational TV Assn., N. Y., by Ford Foundation's Fund for Adult Education to buy equipment for production center in Carnegie Endowment Bldg. was announced this week. META plans programs for distribution to N. Y. stations and to educational outlets throughout country, will receive additional \$50,000 from FAE if it can achieve on-air operation itself. Boston's educational WGBH-TV & WGBH also received FAE grant—\$15,000 for staff to plan in-school TV there. Meanwhile, *TV Guide* established one-year fellowship for mgr. Harold Metcalf of Kentucky edition to work in Hagerstown, Md. pilot closed-circuit TV school project, supplying students with printed information on instruction programs.

Penal legislation against "leaks" from FCC & other govt. regulatory agencies will be drafted by Senate investigating subcommittee headed by Sen. Jackson (D-Wash.), aided by agencies themselves. He said conference June 4 (Vol. 13:22) with agency heads, including FCC Chairman McConaughy & gen. counsel Warren Baker, produced no objections to proposed law outlawing unauthorized disclosures and "improper influence or pressure" on agencies. Probe so far has centered on stock-profit "leaks" from CAB.

FCC issued "or else" order this week to the 4 TV programmers challenging Network Study Committee's power to subpoena them and their documents, upholding chief hearing examiner James D. Cunningham and directing them to appear at June 12 hearing at N. Y. Federal Court House with the items requested in subpoena. If not, said Commission, it will "forthwith institute appropriate proceedings to enforce compliance." Reluctant firms are Screen Gems, Ziv, MCA-TV & Revue Productions; 3 other companies which originally challenged subpoenas have agreed to supply data.

New one-inch diameter vidicon tube with extremely high sensitivity is being developed by RCA for monochrome & color broadcast and industrial use. RCA says tests show new tube can be operated to produce picture having good signal-to-noise ratio and fast response to moving objects with as little as one foot-candle of highlight illumination.

International TV-radio seminar sponsored by State Dept.'s International Educational Exchange Service will be held June 10-Oct. 11 at Boston U's school of public relations & communications. School will be host to 30 TV-radio experts from 25 countries.

Nobody was appointed an FCC commissioner this week. Couple more names "mentioned": Mary Jane Morris, FCC secretary; Clifton Young, former Nev. congressman.

FCC will observe usual Aug. vacation procedure, holding no hearings or oral arguments during month. Only full Commission meeting will be held Aug. 1.

Licensed TV sets in Great Britain totaled 7,050,308 at end of April, increase of 84,052 during month.

Paramount intends to release its 700-film library of pre-1948 features to TV before year is over, pres. Barney Balaban told stockholders meeting this week, adding that the company "intends to become an important supplier of motion pictures for TV." He devoted much of his statement to "the potential that lies in pay TV." He added: "There are many persuasive reasons for believing that the [closed-circuit] cable approach will be most effective in getting pay TV off the ground." Pay system of Paramount's 90%-owned subsidiary International Telemeter is now technically ready, he said, and has been submitted to manufacturers for bids. He also said Paramount is considering public financing for Telemeter in near future, and revealed that the movie company's investment in Telemeter totals \$5-\$6,000,000.

Criminal libel on TV is hard to prove in N. Y. without script, District Attorney Frank S. Hogan decided June 6, suspending grand jury investigation of statements made by ex-gambler Mickey Cohen May 19 on ABC-TV's *Mike Wallace Interviews* (Vol. 13:22). Promising to draft law to close loophole, Hogan said study of N. Y. penal code shows that TV performers apparently can say what they please without committing criminal libel—so long as they don't read from prepared script or record defamatory statements for kinescope. "Mere speech" may be cause for civil action for slander but not for criminal action in state, he said. Grand jury inquiry was started on complaint of Police Capt. James Hamilton of Los Angeles, one of persons excoriated by Cohen.

Three applications for new TV stations and 2 for translators were filed with FCC this week, bringing total to 127 for stations (33 uhf) and 54 for translators. Applications were for St. Louis, Ch. 42, by group headed by Milwaukee furniture manufacturer Bernard Heifetz; two for Weston, W. Va., Ch. 5, one by owners of WENS (Ch. 16), Pittsburgh, the other by WAJR, Morgantown, W. Va., owners of off-air WKJF-TV (Ch. 53), Pittsburgh. Translator applications were for Shelby, Mont., Ch. 72, by Shelby T. V. Club, operators of Ch. 76 translator there; for San Saba, Tex., Ch. 77, by Norman R. Phillips. [For details, see *TV Addenda 24-V*, herewith.]

NBC is again changing format—and perhaps name—of its *Tonight* show, officially confirming earlier reports. Maintaining its faith in late-evening live programming, network announced that comedian Jack Paar will star in the new show Mon.-Fri. 11:30 p.m.-1 a.m. beginning in mid-July, with format "hinged on comedy, music, guests and audience participation." Show will have tie-in with recording industry, featuring top disc stars.

Another group of 20th Century-Fox features is being offered to TV by NTA. This one is called "Big 50" package and includes 39 Class A features which will have been shown on NTA Film Network this year, plus 11 first-run-on-TV films. NTA announced it had already sold the package to WCBS-TV, N. Y.—price said to be \$700,000.

First 2 movies produced by AB-PT Pictures Corp., new subsidiary of American Broadcasting-Paramount Theatres, have been booked in more than 240 theatres starting June 20. They are *Beginning of the End* and *The Uncarthly*. AB-PT announced this week that its productions will be distributed in U. S. & Canada by Republic Pictures.

Advertising costs average 5% more in 1957 than 1956 for all big media, including TV, June 7 *Printers' Ink* says. Predicting continuing rise rest of year, magazine estimates advertisers spend \$143.14 now for every \$100 spent in 1950.

Commercial TV has spread to—of all places—Czechoslovakia. Advertising of products began late last month on stations in Prague & Ostrava. All advertising is handled by same agency—the Govt.

SUMMARY-INDEX OF THE WEEK'S NEWS — June 15, 1957

NO FEE-TV DEAL MADE with Skiatron, AT&T pres. says. Thurmond introduces anti-subscription bill; Comr. Craven and Hollywood film unions plug for tests (p. 1).

KHRUSHCHEV TV INTERVIEW lights fire for reciprocal program trade between U. S. & Russia, but Dulles sees little new in "Johnson Doctrine" (p. 2).

NETWORKS WAIT & HOPE that inter-city circuit shortage will loosen before deadline date, through cut in requirements or boost in facilities (p. 3).

SENATE REPORT on network practices due for Committee action June 18. Senate bars further funds for FCC network probe; film firms face court order (p. 6).

FCC CLEANING UP BACKLOG, disposing of petitions for reconsideration, rarely changing mind. Adding 2 vhf's in Schenectady area under consideration (p. 7).

GOOD INVENTORY POSITION documented, set sales paralleling 1956 rate but production kept in bounds. Year's sales prospects put at 6½-7,000,000 (p. 10).

NARDA SURVEY shows record high costs and low profits in 1956; 28% report net loss for year. Many dealers apprehensive about 1957 prospects (p. 10).

RCA CHARGES PHILCO with patent infringement, seeks treble damages, is joined by GE, AT&T, Western Electric & Bell Labs in denial of Philco charge (p. 11).

23-MARKET STUDY of brand names, conducted by newspapers, shows RCA still far in lead with 19 first places, one tie for first (p. 12).

LAMB FINALLY VINDICATED, Commission renewing license of his WICU, Erie, by 5-1 vote—Lee dissenting, Doerfer absent—ending weird 3-year fiasco (p. 14).

NO SKIATRON DEAL MADE, AT&T CHIEF SAYS: No commitment has been made by AT&T or any of its affiliated companies for transmission of any closed-circuit scrambled-picture fee-TV programs. This is the one island of fact we have been able to locate in the floodtide of rumors, surmises and unverified reports.

The statement comes from Frederick R. Kappel, pres. of AT&T, who supplied us with answers to series of questions arising from west coast reports of proposed tie-up between AT&T's Pacific Telephone & Telegraph Co. and Matty Fox's Skiatron TV for wired pay-TV transmission of games of Giants and Dodgers to California homes if the teams move to west coast (Vol. 13:22-23).

Kappel's statement did not preclude such action in future -- and we don't doubt that negotiations have been or are being held between telephone companies and subscription-TV entrepreneurs; but fact is, no action is yet in sight.

Our specific question to Kappel: Have AT&T or Bell companies made any commitments or signed any agreements with such pay-TV organizations as Skiatron, Zenith or International Telemeter, involving transmission of programs intended to be viewed on a per-program basis? Reply was "No" -- with exception of the experimental wired "Telemovies" operation in Bartlesville, Okla.

AT&T has no policy rule against carrying pay-TV programs on its inter-city lines, Kappel made clear -- pointing out that it has been relaying other types of closed-circuit programming for some time. As to AT&T's anticipated role in distribution of wired TV programs to subscribers' homes, he indicated that it's still too early to tell, but that it would probably be limited to supplying transmission channels. AT&T has no desire to get into the entertainment business, he emphasized.

Queried as to cost of wiring Los Angeles & San Francisco to bring pay TV to existing receivers there, he and other company officials declined to guess.

* * * *

Controversy over broadcast subscription TV was kept alive this week by proponents and opponents, both in and out of Govt. There was action again on Congress-

sional front, where Senate got a bill to outlaw fee TV -- S-2268, introduced by Sen. Thurmond (D-S.C.) and identical with Rep. Celler's HR-586 in House.

Assailing pay TV as "a new tax on the people," Thurmond said in Senate speech that experimental toll-TV program would be difficult to call off, once started. He advised FCC to stick to "matters of scientific concern" and leave "matters of policy" to Congress. His bill was referred to Senate Commerce Committee -- of which he is a member -- where it faces doubtful future, inasmuch as several members are on record as favoring at least a limited public trial of subscription TV.

NARTB backed Thurmond's stand, pres. Harold Fellows urging Congress to take pay-TV issue out of hands of FCC. As to public trial of fee TV, he said nothing significant can be learned from broadcast tests that won't be demonstrated in the Bartlesville closed-circuit project.

* * * *

Comr. Craven, who has been plumping within Commission for fee-TV tests, came out publicly for trial at week's end in strong speech to Md.-D.C. Broadcasters Assn. at Ocean City, Md. "Should broadcasters be allowed to stop subscription TV if it constitutes real progress?" he asked. "The realistic way to ascertain whether or not this new service is real progress is to give the public an opportunity to express its preference based on field demonstrations."

Public test will supply answers to most questions about fee TV, he said. As a clincher, he referred to FCC's sprawling May 23 subscription-TV notice (Vol. 13:21): "As you know, the Commission has already agreed that such a trial demonstration is necessary. We need only to determine the parameters of that trial."

He giped at broadcasting spokesmen who endorse closed-circuit pay TV but oppose scrambled telecasting. Said he: "I question whether [telecasters] will be really as protected from the economic effects of competition by this method as they may hope. In fact, it is difficult to understand how TV broadcasters can gain much comfort in the long run from this so-called freedom from competition."

* * * *

Pro & con lobbyists haven't been confining their big efforts to Congress and FCC. Though they fought to a draw last week at convention of General Federation of Women's Clubs (Vol. 12:23), the fee-TV proponents won clear-cut victory this week when Hollywood AFL Film Council, representing more than 24,000 movie and TV film industry workers, unanimously approved resolution urging FCC to authorize extensive tests of subscription TV "at the earliest possible moment" -- taking stand diametrically opposed to parent AFL-CIO which twice has urged FCC to reject pay TV.

Note: Lest anyone be laboring under the delusion that Zenith, Skiatron and International Telemeter would have a monopoly -- or even an inside track -- if FCC should approve subscription TV, RCA pres. John L. Burns this week confirmed what industry observers had known all along. In answer to question at Hollywood press conference, he reiterated RCA's belief that toll TV wouldn't be successful, but added that if it did succeed "all vested interests will get into it with both feet."

CBS-TV KHRUSHCHEV INTERVIEW REVERBERATES: Regular U.S.-Russian TV-radio exchanges, bringing new turn to east-west relations, were urged by powerful voices in Washington this week as result of Nikita Khrushchev interview which won world attention -- and general plaudits -- for CBS-TV's Face the Nation show June 2 (Vol. 13:23).

Inspired by CBS news beat and possibility of people-to-people communication it raised, Senate Majority Leader Johnson (D-Tex.) revived long-dormant proposals for Iron Curtain breakthrough via reciprocal broadcasting. Idea caught fire -- or at least smoldered -- all around Capital.

Johnson's "open curtain" plan (promptly hailed as "Johnson Doctrine" in Congress by supporters on both sides of aisle) was advanced June 8 in N.Y. speech, seconded next day by Senate Minority Leader Knowland (R-Cal.), who followed Soviet leader Khrushchev as Face the Nation guest.

Plan was welcomed -- but with restraint, and not as something new -- by Secy. of State Dulles at press conference June 11. Reflecting initial White House coolness to sensation stirred by Khrushchev interview, Dulles praised "Johnson Doctrine" as "demonstration of the bi-partisan character of our foreign policy," but maintained administration had been "pressing" for it all along.

Press across country was enthusiastic. N.Y. Times pundit Arthur Krock said "Johnson speech projected definite ideas, contrasting with the lack of them in administration suggestions how to deal with the issues raised by Khrushchev." Krock thought it was "sound, shrewd program to counteract Soviet propaganda." Christian Science Monitor said it could be "exploited into a larger exchange of fusillades in this 'war of ideas.'" Washington Post termed it "admirable."

Encouraged by reception to plan, seeing Dulles "in such complete agreement," Johnson told Senate June 12 he would proceed "to determine methods by which Congress" can act to implement it -- with "united backing of our people."

* * * *

But doubt over chances of Soviet cooperation, despite TV pleas by Khrushchev for more east-west "cultural" exchanges, was expressed at news conference by Dulles. He pointed out that similar proposals -- including 30-min. monthly radio trade between U.S. & Soviet -- were advanced at 1955 Geneva Conference, reiterated year ago in 17-point White House statement with little response from Kremlin.

Most direct reaction by Moscow, Dulles said, had been rejection of offer at Geneva by then Foreign Minister Molotov on ground American broadcasts would subject Russians to "social scum." Dulles said U.S. nevertheless has "been pressing them since the original formulation," that it continues to be "one of the items which is on the list" at Russian desk in State Dept.

"Supercilious" is word for Dulles, Sen. Fulbright (D-Ark.) retorted June 13, deploring apparent administration effort to dampen TV-radio plan down. "Indication of weakness," Sen. Mansfield (D-Mont.) agreed. And Fulbright, member of Foreign Relations Committee, added "it is the best kept secret since the first atomic bomb was made" if administration had been pursuing reciprocal broadcast arrangement.

"Wholehearted & enthusiastic backing of Congress" was promised by Fulbright if administration grasps "this opportunity to join in a proposal for action now." No immediate move was made by Dulles, but other State Dept. officials indicated earlier that it soon may try new, formal approach to Kremlin -- perhaps in several weeks.

Formal U.S. offer is all Russia is waiting for -- if First Deputy Premier Mikoyan could be believed. He told western newsmen in London June 13: "If you want to make such a proposal, go ahead. We are not afraid of competition in ideas." Moreover: "It's harder to tell lies on TV because you cannot only be heard but seen." Molotov, also in London, was less vocal but said he, too, favors idea now.

* * * *

What stands out painfully in the whole picture is silence of CBS, other networks and stations, in face of presidential criticism -- demonstrating anew the traditional industry fear of antagonizing any administration -- GOP or Democratic -- and the FCC it tends to control. Print media wouldn't take it.

Though a good friend of Eisenhower administration, Time Magazine took TV to task. Congratulating CBS-TV for "obviously enterprising, informative journalism" and noting tartly that the networks "constantly demand equal treatment" with print media, it stated: "Such a demonstration of eggshell caution under fire suggested that TV may be getting no worse than it deserves."

NETWORK ROUTE SQUEEZE--WATCHFUL WAITING: There's nothing to do now but wait and hope things aren't as bad as they look. That sums up attitude of network traffic chiefs toward threat of serious shortage of important inter-city microwave routes next fall, as revealed in Television Digest last week (Vol. 13:23).

Time-period allocation of AT&T lines among TV users seems probable because of unprecedented demand for network routes by major networks, closed-circuit en-

terprisers, proposed new "network" operations such as Pat Weaver's Program Service and specialized live TV services like Sports Network Inc.

Officials of all networks, contacted this week, said there's nothing they can do now but wait until after July 29, when AT&T weighs availabilities against requirements. They pointed out that there was tight squeeze for spring & summer-- which was relieved only through inter-network cooperation, all 3 cutting way back on original plans for daylight time zone repeats. Even so, they stated, quality of network picture in some areas this spring is "substandard," because telephone company had to throw old L-1 cable into circuit to accommodate heavy demands.

They're all hoping things might loosen up -- that some of the preliminary time requirements filed (by others) were inflated and will be toned down later, or that maybe AT&T has something up its sleeve and can squeeze more transcontinental and/or regional channels into the system. There were doubts, too, that Pat Weaver would actually reserve as much time as he now is seeking -- when the chips are down. There was also some speculation that Weaver may consolidate his time demands with those of another video circuit user. Weaver, as usual, was unavailable for comment.

If next fall's going to be bad, next spring will be well nigh impossible. That was another view held universally by network officials -- based on their hopes of going close to 100% "clock time" next year, relying heavily on Ampex playbacks for daylight time zones. This will require heavier use of intercity routes, and, barring near-miracle, networks will have to make heavy compromises then, too.

AT&T is required by law to treat all customers alike -- therefore, established networks get no special privileges for being "old customers." Under microwave-cable allocation procedures, video channels are shared by all users on basis of schedule worked out cooperatively among telephone company's TV customers who are affected.

* * * *

"The situation could be very serious," ABC traffic coordinator George Milne told us this week, "depending on which way the ball bounces." Networks can do nothing now but "guess and surmise," he added. "Allocations would take us back to where we were in the late '40s." However, he pointed out that mutual 3-network cooperation could make a bad situation much more palatable.

Sit-tight attitude was also taken by CBS traffic mgr. L.B. Gumbinner, who said his network's requirements for next fall are about same as last season. "We just don't know how bad it will be; the telephone company hasn't said anything about it yet." He expressed hope that CBS wouldn't have "too much trouble" in fall, but ruefully added he's already looking to next spring-summer as "the big problem."

"There's no use getting excited now," said NBC's John A. Hilton, asst. mgr., traffic. "There's not much to do until July 29." Perhaps, he said, AT&T will be able to turn some message (telephone) circuits over to TV use during heavy periods next season -- or maybe some early demands will be toned down before July 29.

"The situation is very delicate...very grave," from standpoint of pres. Dick Bailey of Sports Network Inc., which supplies live sporting events to stations and networks. "We'll probably squeeze by this summer with only a few preemptions, but the situation looks real difficult for next fall -- particularly on Sundays when we carry pro football. Of course, things will be much rougher next spring if the Giants and the Dodgers move to the west coast."

"Six-figure" salaries for top flight lecturers on closed-circuit TV were envisioned this week by RCA pres. John L. Burns in commencement address at his alma mater, Northeastern U. Receiving honorary doctor of business administration degree, Burns said use of closed circuit TV for education would: (1) Elicit highest quality of instruction by making it possible for teachers at one school to lecture on nationwide hookup. (2) Permit calling on outstanding business and govt. leaders as speakers. (3) Enable educational institutions to compete with highest salaries now paid in other fields by sharing costs.

First educational TV closed-circuit system sponsored by a state education dept. will be installed this summer by RCA in Conley Hills elementary school, Fulton County, Ga. Multi-channel installation, including 4 camera chains, 26 receivers in classrooms, will go into operation in Sept. as pilot project for state, with Mrs. Mary Grubbs as TV coordinator for Ga. school supt. Dr. M. D. Collins.

Boyce Nemeck, film & TV consultant, has been retained by Video Independent Theatres for planning of studio operations and programming of "Telemovies" wired TV experiment in Bartlesville, Okla.

Personal Notes: John B. Green, ex-NBC-TV, named ABC-TV program mgr., succeeding J. English Smith, resigned . . . Ernest Fladell promoted to NBC-TV sales promotion mgr. . . Thomas C. Harrison, ex-radio rep John Blair & Co., elected sales v.p. of ABC Radio; Stephen Labunski, from radio WDGY, Minneapolis, elected programming v.p., replacing Wm. S. Morgan Jr., who returns to radio KLIF, Dallas, as gen. mgr. . . Lester A. Loeb, ex-radio WMGM, N. Y., named eastern sales representative of ABC Film Syndication . . . George C. Stevens, ex-radio WRCA, N. Y., named gen. sales mgr. of Transcontinent TV Corp. . . Stanley L. Yentes promoted to sales service mgr., NBC TV Films div., California National Productions . . . Harold Graham Jr., ex-McCann-Erickson, joins CBS-TV, Hollywood, as program executive for liaison with advertisers . . . Robert J. Burton promoted to v.p. of BMI in charge of domestic performing rights administration, Robert Sour to v.p. for writer relations, Mrs. Theodora Zavin to asst. v.p. for publisher relations, Richard L. Kirk to asst. v.p. for publisher & writer relations, Hollywood . . . Charles C. Crockett named gen. sales mgr., Robert Costa local sales mgr., Sheridan (Dar) Reid program supervisor, of KGMB-TV, Honolulu, and satellites KMAU-TV, Wailuku, and KHBC-TV, Hilo . . . Howard K. Smith reassigned by CBS to Washington news staff after 11 years in London; Charles Collingwood replaces him as London bureau chief; Peter Kalischer, ex-*Collier's*, assigned to Tokyo, replacing Bob Pierpoint, who joins Washington staff . . . C. R. Bramham promoted to commercial mgr. of WSM-TV, Nashville, succeeding Irving Waugh, now v.p.-gen. mgr. of WSIX-TV there; Tom Griscom Jr. promoted to local sales mgr. . . Guy Tiller, ex-WLWA, Atlanta, named gen. mgr. of WVMM, Columbus, Ga. (formerly WDAK-TV), with Joe Windsor, local sales mgr., promoted to asst. gen. mgr. for network relations & national sales; John

Hughes, program director, succeeds Windsor . . . Cecil L. Heftel, gen. mgr. of radio stations KLO, Ogden, Utah and KGEM, Boise, Ida., named v.p.-gen. mgr. of KLIX-TV & KLIX, Twin Falls, Ida., succeeding Frank C. McIntyre; Gordon O. Glasmann, ex-*Ogden Standard-Examiner*, named asst. gen. mgr., Joe Gibney, station mgr. . . Herbert W. Holtshouser, ex-chief engineer of KUTV, Salt Lake City, named chief engineer of upcoming KUED (Ch. 7, educational) there . . . James F. O'Grady promoted to mid-western sales mgr. of rep Young TV Corp. . . Judd A. Choler, ex-WSBT-TV & WSBT, South Bend, named promotion mgr., WFMY-TV, Greensboro, N. C. . . Charles Sinclair, ex-Rogers & Cowan and *Sponsor*, joins *Billboard* as assoc. editor, replacing Gene Plotnik, now on Screen Gems publicity staff . . . Del Leeson promoted from promotion mgr. of KTVT & KDYL, Salt Lake City, to mgr. of KDYL . . . Charles A. Wilson, adv. & sales promotion mgr. of WGN-TV, Chicago, appointed to management group of WGN Inc. . . Ted Oberfelder resigns as pres. of rep Burke-Stuart, plans undisclosed, sales v.p. Allan Kerr becoming acting pres.

Honorary degrees: David Sarnoff, RCA chairman, LL.D, U of R. I., Kingston . . . Wm. S. Paley, CBS chairman, LL.D, and Edward J. Noble, LL.D, Adelphi College, Garden City, N. Y. . . Edward Lamb, pres. of WICU, Erie, doctor of humanities, Wilberforce U, Wilberforce, O. . . Joseph M. Bryan, pres. of WBTV, Charlotte, and WBTW, Florence, S. C., LL.D, Belmont Abbey College, Belmont, N. C.

AFA officers elected June 12 at Miami Beach convention: pres. & gen. mgr., C. James Proud, asst. to retiring pres. Elon G. Borton; chairman, Robert W. Feemster, *Wall Street Journal*; vice chairman, James S. Fish, General Mills; treas., Ralph Winslow, Koppers Co.; secy., Loretto J. Fox, Falk Corp.

All TV test signal proposals will be examined by special subcommittee appointed at meeting held this week by RETMA broadcast TV systems committee in New York. Subcommittee, headed by GE's Dr. Lyman Fink, consists of representatives of the 3 TV networks, subscription TV proponents Zenith, Siatron & International Telemeter, AT&T and RETMA's receiver div. Subscription-TV organizations have expressed interest in the test signals to be transmitted in vertical blanking period (Vol. 13:12, 14-15, 17), because pay-TV systems also make use of blanking interval to transmit decoding information. Subcommittee was asked to report back to full committee in August with recommendations for FCC standards.

Upcoming WFGA-TV, Jacksonville (Ch. 12), planning to be on air by Sept., will become basic NBC-TV affiliate, succeeding WJHP-TV (Ch. 36). National Airlines' upcoming WPST-TV, Miami (Ch. 10), due on air Aug. 1, will be primary ABC-TV affiliate.

ADVERTISING AGENCIES: Thomas D'Arcy Brophy retires Sept. 30 as chairman of Kenyon & Eckhardt . . . Deane Uptegrove, exec. v.p. of H. B. Humphrey, Alley & Richards, named head of N. Y. office . . . Werner Michel, ex-Benton & Bowles, joins Reach, McClinton as TV-radio director . . . Wm. A. Sittig named gen. mgr. of Clinton E. Frank Inc., continuing as v.p. & marketing director . . . James Chapman, ex-J. B. Rundle Inc., appointed *Electronic News* sales mgr.

First "communication award" of U of Chicago has been presented to chairman Earle Ludgin of Earle Ludgin & Co. as "outstanding alumnus in the field of communication." NBC's Clifton Utley headed awards committee.

Criminal conspiracy case against Philadelphia Radio & TV Broadcasters Assn. and 9 member radio stations accused by Govt. of rate-fixing (Vol. 12:26, 31, 37) ended June 13 when Federal Judge Allan K. Grim fined organization \$5000 and stations \$1000 each. Assn. pleaded guilty, stations no-defense, to charges they agreed "to maintain rates for sale of broadcasting time in Philadelphia in violation of the Sherman Act." At same time, Judge Grim dismissed conspiracy charges against 9 executives of stations. He said there had been "no moral turpitude involved" and that: "I believe also what was done by the men involved in this case was done with what they believed to be the best interest of their employers & the public." Stations fined: WHAT, WDAS, WIP, WIBG, WFIL, WCAU, WJMJ, Westinghouse (KYW, now NBC's WRCV), WPEN. Original charges against WFLN had been dropped.

Victory for community antenna operators was completed this week when Internal Revenue Service confirmed that it planned shortly to revoke 8% excise tax in accordance with court decisions. For psychological effect, most CATV operators plan to give subscribers rebates in cash. Operators also took comfort in report this week that Cal. legislature is tabling bill proposing to permit municipalities to finance translators out of taxes.

Flamingo Films, one of oldest TV film companies, reportedly is being sold by principal owner Sy Weintraub and his partner Joe Harris, for total of around \$3,000,000. Purchaser is said to be Continental Thrift Co., west coast financing firm, which will take over Essex Universal Co., which owns Flamingo. Weintraub also owns 15.9% of KMGM-TV, Minneapolis (Ch. 9).

TWO MORE INVESTIGATIONS of TV were in the finishing-touch stage this week, following issuance last week of Celler subcommittee report (Vol. 13:23). Senate Commerce Committee met this week, briefly discussed Cox report on network practices—endorsed by both Chairman Magnuson (D-Wash.) & Sen. Bricker (R-O.)—and then postponed further consideration until June 18, since several Committee members hadn't read it.

Committee is expected to refer report to FCC and Justice Dept. for appropriate action. It is said to be somewhat milder than Celler report, devoting most space to option time and must-buy practices. Report is understood to conclude that option time operates to transfer some of station's program control to network—subject, however, to veto by station—and to blanket prime hours on most stations to detriment of independent programmers. As to must-buy practices, report is said to conclude that some minimum network requirement is necessary, but to recommend—as does Celler report—that minimum dollar purchase be substituted for “basic” list of stations.

Whether Dean Roscoe Barrow's FCC network study will be completed by June 30 deadline or not, Senate this week gave the word that it would appropriate no more funds for it. Appropriations Committee report on funds for independent govt. offices submitted by Magnuson as chairman of independent offices appropriations subcommittee stated that if network study runs past deadline, regular FCC funds will have to be used for “completion [or] any implementation thereof.”

Dean Barrow told us this week he still doesn't know whether deadline can be met—but best guess is that study group will have rough draft ready by June 30, to be polished up over the summer by permanent FCC staffers currently assigned to study.

Network study committee's efforts to get financial information from 4 reluctant independent film programmers proceeded another step—to court—when the group

Sessions on broadcasting and TV receivers will be among the 48 at which 225 papers will be presented at WESCON-1957 Aug. 20-23 in San Francisco's Cow Palace. Broadcasting session Aug. 21 will feature symposium on Videotape recorder by Ampex's Ross Snyder & Charles Ginsburg and representatives of TV networks, and papers on traveling-wave vhf antenna by RCA's M.S.O. Siukola, artists' problem in telecasting by Wm. Wagner of San Francisco's KRON-TV, compatible single-sideband AM broadcasting by Kahn Research Labs' Leonard R. Kahn, stable precision TV demodulator by Herb Hartman of Sacramento's KCRA-TV, quadrature-fed antennas by Harry Jacobs of San Francisco's KGO-TV. Session on TV receivers & televisual devices will hear papers on “securing 110-degree sweep for the public domain” by Sylvania's E. O. Stone & Rola Co.'s C. E. Torsch, brightness-enhanced color receiver employing automatic decoding in the Chromatron by Litton Industries' R. H. Rector, 21-in. direct-view storage tube by Hughes Research Labs' N. J. Koda, N. H. Lehver & R. D. Ketchpel, TV color translating microscope by RCA's V. K. Zworykin, automatic fine-tuning for TV receivers by Westinghouse's C. W. Baugh Jr.

Construction of new studios of KFSD-TV & KFSD has started at 47th St. & Federal Freeway, San Diego. Building on 7-acre site in new Broadcast City subdivision is scheduled for completion in 7 months.

again refused to produce the data at FCC hearing in New York this week. Whereupon, Commission promptly got order from N. Y. Federal Court ordering that the firms appear June 25 to show cause why they shouldn't produce the material. The 4 are Screen Gems, Revue Productions, MCA-TV & Ziv.

Comr. Craven, meanwhile, told Md.-D. C. Bcstrs. Assn. this week that “certain elements of the broadcast industry itself” are largely to blame for rash of investigations and Washington interference. “After acting with what was supposed to be prudent business judgment,” he said, “certain entrepreneurs discovered that their judgment just didn't pan out as they originally expected. Consequently they ran to the Govt. to bail them out. A few others who enjoyed more fortunate economic situations took advantage of every legal procedural device in the Communications Act to stop competition. Still others seek and encourage the Commission to engage in economic planning through the assignment of channels to the various markets.”

Celler subcommittee report on TV industry this week became rallying point of ASCAP-member songwriters in their battle against BMI. “Songwriters' Protective Assn.,” which has been plumping for Congressional investigations of BMI, held big press conference in New York March 10, with such celebrities as W. C. Handy, Oscar Hammerstein, Helen Hayes, Paddy Chayefsky and Paul Whiteman as guests, to hail Celler report recommendation for Justice Dept. investigation of music business (Vol. 13:23). Meeting was widely covered by press, but on June 13 Authors League came out with blast at TV-radio networks for ignoring meeting. BMI spokesmen said they were satisfied with conclusions expressed in section of Celler report devoted to music business but not necessarily with full text of report. They pointed out that 5 of the 7 members of subcommittee filed “additional views” specifically mentioning pending \$150,000,000 suit against BMI and TV networks & stations by 33 ASCAP members and warning against any action which might be construed as prejudicial to court case.

Chicago's educational WTTW (Ch. 11) is paying more than half of its own way from sales of its TV recording service, station has announced. Of its current annual budget of \$723,000, some \$411,000 is expected to come from on-the-side business of producing TV announcements, closed-circuit programs and shows for distribution to other educational stations and institutions. Remaining \$312,000 will be paid by public subscription.

TV is establishing itself as international advertising medium—but it still lags far behind radio—according to survey released this week by International Advertising Assn. Of total international advertising expenditures of \$478,000,000 by 3600 U. S. companies in 1956, TV accounted for 5% or about \$24,000,000. Radio was 22% (\$105,160,000), foreign magazines & trade journals 24%, point-of-sale materials 19%, foreign newspapers 11%, direct mail 4%.

TV's “chaotic effect” on book buying has worn off as “people became more discriminating about what programs they watched,” according to Chicago book seller Max Siegel. He cited U. S. book business of \$750,000,000 last year, up \$10,000,000 from 1955, said bookstores are enjoying boom despite TV.

Orradio Industries has begun construction of new \$500,000 plant at Opelika, Ala., for manufacture of magnetic recording tape for TV, instrumentation and sound recording—to employ 150-200 and increase company's capacity 400%.

MOPPING UP PROCESS is underway at FCC, with Chairman McConnaughey leaving June 30 (and no successor in sight yet). Commission gave particular attention to unraveling knotty petitions requesting reconsideration of vhf grants.

Commission's decisions are mighty hard to change. For example, Commission instructed staff to draft decisions denying petitions seeking to reverse grants to: WCKT (Ch. 7) & WPST-TV (Ch. 10), Miami, and WFGA-TV, Jacksonville (Ch. 12). It issued final order denying petition to reconsider grant of WPSD-TV, Paducah, Ky. (Ch. 6).

FCC is also sticking by its deintermixture decisions, instructing staff to come up with final documents denying petitions to reconsider deintermixture of Springfield, Ill. and Evansville, Ind.

Another litigious case was terminated when Commission finally granted Ch. 31 to WMBD, Peoria. Station had asked for Ch. 31 after it lost Ch. 8 fight to WIRL-TV; WIRL-TV, in turn, lost Ch. 8 when Peoria was deintermixture—getting Ch. 25 instead. Uncontested CP was awarded for satellite on Ch. 11, Garden City, Kan., to KCKT, Great Bend (Ch. 2). Ch. 80 translator CP was issued in Madras, Ore.

FCC is considering resolution of tough Albany-

Schenectady-Troy situation through addition of both Ch. 10 & 13, instead of deleting Ch. 10 from Vail Mills and shifting WRGB (Ch. 6) to uhf. Shift would require giving Ch. 2 to WKTV, Utica (Ch. 13), putting Ch. 13 north of Albany to meet minimum co-channel spacing with N. Y.

In other developments, Commission: (1) Told staff to draft rule-making shifting Ch. 10 from Terre Haute to Lafayette. (2) Finalized shift of Ch. 12 from Coeur d'Alene to Moscow, Ida. (3) Proposed substitution of Ch. 62 for Ch. 4 in Columbus, Ga. (4) Received petition from WICS, Springfield, Ill. (Ch. 20), seeking deletion of Ch. 3 from Champaign, shifting WCIA to uhf.

Fighting "Craven Plan" to abandon allocations table, Assn. of Maximum Service Telecasters this week asked FCC to extend from June 18 to July 18 the deadline for replies to comments filed June 3 (Vol. 13:23), but Commission denied it immediately—though Comrs. Hyde & Lee wanted to give 2-weeks grace. AMST also analyzed last week's comments, reported: (1) 40 against plan, 29 for, 8 neither. (2) 19 law firms against, 8 for, 4 neither. (3) 46 operating stations against, 32 for. (4) 6 applicants & CP-holders against, 2 for. (5) 32 TV station "interests" (each multiple owner counted as one interest and excluding networks) against, 21 for. (6) 5 networks and organizations (ABC, NBC, JCET, NAEB, AMST) against, 2 (CBS, Committee for Competitive TV) for.

Radio station sales approved this week: KODY, North Platte, Neb. by John Alexander, George B. Dent Jr. & Townsend E. Dent for \$210,000 to Mr. & Mrs. Hartley L. Samuels and his sister-in-law Judith S. Scofield (Vol. 13:13). Hartley, ex-WINS & WABC, N. Y., now is pres. gen. mgr. & 25% owner of WDLB, Marshfield, Wis. . . . WBMS, Boston, by Friendly Group (Jack N. Berkman, pres.)—owners of WSTV-TV, Steubenville, O. and KODE-TV, Joplin, Mo.—for \$200,000 to Gerald A. Bartell & family (Vol. 13:19). Bartells are selling WMTV, Madison (Ch. 33), also owns 4 AMs . . . WONN, Lakeland, Fla. by co-owners Robert S. Taylor, Duane F. McConnell & E. D. Covington Jr. for \$169,000 to Theodore P. Noyes Jr. (90%), of WMAL-TV, Washington, and Robert W. Jonscher (10%), mgr. of radio WMAL (Vol. 13:14) . . . KTIK, Seattle, by W. Gordon Allen (owner of 4 other AMs) for \$180,000 to H. Scott Killgore interests, operators of 5 AMs (Vol. 13:19) . . . WGGG, Gainesville, Fla. by R. M. Chamberlin and associates for \$100,000 to T. K. Cassel, who has interest in off-air WTVE, Elmira, N. Y. (Ch. 24) and in 6 eastern AMs (Vol. 13:19) . . . WKXV, Knoxville, by H. Scott Killgore interests for \$100,000 to co-equal owners attorney Henry T. Ogle and accountant Bill L. Boring (Vol. 13:20) . . . WRNY, Rochester, N. Y. by David A. Kyle and associates for \$90,000 to radio WFEC, Miami, owned by Harry Trenner & Herbert Schorr (Vol. 13:16) . . . WKTM, Mayfield, Ky. by Fred L. Thomas for \$55,000 to co-equal owners Charles W. Stratton (also 1/2 of WKOA, Hopkinsville, Ky.) and brother H. D. & Mose Bohn (Vol. 13:19).

WREX-TV, Rockford, Ill. (Ch. 13) is being acquired for approximately \$3,000,000 by Bob Hope and associates—his attorney Martin Gang and his TV-radio agent James Saphier, plus Albert Zugsmith, Arthur Hogan and Ashley Robison. Hope interests control approximately 50% of KOA-TV, Denver (Ch. 4), with KOA. Zugsmith and Hogan own 25% each in KULA-TV, Honolulu (Ch. 4) & KULA and KSHO-TV, Las Vegas (Ch. 13) & KBMI, Henderson, also have interests in 4 west coast radio stations, as well as being associated with Robison in purchase of radio KBYE, Oklahoma City (Vol. 13:11). Plans are to retain gen. mgr. J. Michael Baisch and key staff members.

Radio station sales reported this week: WLOW, Portsmouth, Va. by owners of WTOB and off-air WTOB-TV, Winston-Salem (Ch. 26) for \$250,000 to James Bestg. Co. (John Quincy, pres.), owners being 5 Boston businessmen, ownership interlocking with Boston radio WORL (including mgr. Arthur E. Haley) . . . WMRO, Aurora, Ill. by Martin R. O'Brien for \$85,000 to equal partners Vincent G. Cofey, WMRO commercial mgr., and Benjamin A. Oswalt, sales mgr. of Batavia cosmetic firm . . . KOVE, Lander, Wyo. by Edward J. Breece for \$75,000 to Fremont Bestg. Inc., in which he has 4% interest, son Daniel E. Breece, gen. mgr., 32%; son John L. Breece, owner of KATI, Casper, Wyo., 32%; sister-in-law Mrs. Dorothy L. Reed, sales mgr., 32% . . . WKBL, Covington, Tenn. by R. William Hoffman (owner of WGFS, Covington, Ga.) and Charles K. Sparks for \$55,000 to Robert C. Whiteley Jr., chief engineer & news director of WBOP, Pensacola, Fla. Brokers: WLOW, R. C. Crisler & Co.

CP for WTLM, Laurel, Miss. (Ch. 7) will be majority-controlled by Mayor Wm. S. Smylie and son W. S. Smylie III under terms of transfer proposed in application filed with FCC. Mayor Smylie is acquiring 16.67% from Jack Rose for \$1750, increasing holdings to 41.67% while son retains 25%. Other stockholders, with 16.67% each, are furniture store owner D. B. Marcus and *Laurel Leader-Call* publisher T. M. Gibbons.

Senate approved \$8,300,000 to run FCC for fiscal 1958 this week—same amount voted by House. It was \$472,000 more than FCC received for fiscal 1957, but \$650,000 less than recommended in President's budget. Appropriation bill (HR-6070), which covers all independent offices, now goes to Senate-House conference to iron out other differences, but FCC appropriation won't be changed.

Entries for history contest sponsored by Westinghouse Bestg. Co. for local historical societies & non-affiliated TV-radio stations close next Jan. 15. Prize of \$1000 in first annual competition will be split by winning society & station for best program or series "making known the historical & cultural heritage of their localities."

Radio Kynsho (JOFO, Kyusho, Japan) has ordered Philco Cinescanner TV studio system, plans to go on air early next fall.

Notes on Upcoming Stations: Scanning reports from CP-holders, we find only about 25 more likely to make it this year—to add to the 12 that threw switch since Jan. 1. One factor slowing up rate of debuts is FCC's new requirement that grantees fulfill all requirements for full license before getting permission to start. Heretofore, CP-holder could begin transmissions with as little as low-power transmitter unit, a telephone pole tower and a dipole antenna.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WOWL-TV, Florence, Ala. (Ch. 41), seeking modification to Ch. 15, has ordered 1-kw GE transmitter, plans Sept. 1 test patterns, Sept. 15 programming, writes pres. & 25% owner Richard B. Biddle, also chairman of radio WGAD, Gadsden, Ala. Wing for TV studio and control room is currently being added to present radio building, with remainder of TV operation in radio building. It will use 300-ft. tower, but hasn't ordered antenna pending FCC action on Ch. 15. Base hour not set. Rep will be Rambeau.

WSUR-TV, Ponce, P. R. (Ch. 9) has Adler transmitter installed in building atop Mt. Maravilla and has changed target to end of June, reports gen. mgr. Mariano Angelet Escudero for owner Ralph Perez Perry who also owns WKVM, San Juan. Lehigh 200-ft. tower and RCA antenna are ready. Studio equipment is to be delivered by mid-June. Base hour will be \$120-\$150. Rep will be Pan American Bestg.

WGTV, Athens, Ga. (Ch. 8, educational) has set delivery date for 25-kw RCA transmitter, still plans Nov. start, writes Gerald L. Appy, assoc. director of communication services for grantee U of Georgia. Transmitter house construction on Jacks Creed Mt. is in design stage and delivery date for 1000-ft. Stainless tower hasn't been set. Studios in \$2,500,000 Center for Continuing Education are complete—closed-circuit programming having begun April 30.

WJCT, Jacksonville, Fla. (Ch. 7, educational) has changed programming target to Sept.-Oct., reports Heywood C. Dowling, pres. of Educational TV Inc. GE 5-kw transmitter donated by WMBR-TV is scheduled for installation about July 15 in building of upcoming WFGA-TV (Ch. 12); Alford single-section antenna is to be installed within 6 weeks at 843-ft. level of WFGA-TV tower. Educators will use WMBR-TV studios; film equipment and transmitter will be located at WFGA-TV transmitter house. Dr. Wm. K. Cumming, ex-Stephens College, Columbia, Mo. will be mgr.-director.

Rate increases: WFLA-TV, Tampa-St. Petersburg, June 15 raised base hour from \$750 to \$850, min. \$180 to \$210. WITI-TV, Whitefish Bay-Milwaukee, July 1, hour \$500 to \$600, min. \$100 to \$110. KOOL-TV, Phoenix, hour \$500 to \$550, min. remains \$100. KSBW-TV, Salinas-Monterey, July 1 adds Class AA hour (7:30-9:30 p.m. daily) at \$425, min. at \$90, Class A hour going from \$350 to \$400. KGGM-TV, Albuquerque, Aug. 1 adds Class AA hour (6:30-10 p.m. Mon.-Sat., 6-10 p.m. Sun.) at \$400, min. at \$85, Class A hour remaining \$300. WTVO, Rockford, Ill. May 1 added Class AA hour (7-10 p.m. daily) at \$350, min. at \$70, Class A hour remaining \$300. KOSA-TV, Odessa, Tex. July 1, hour \$250 to \$300, min. \$50 to \$60. KHAD-TV, Laredo, Tex. April 15 added Class AA hour (7:30-9:30 p.m. daily) at \$187.50, min. at \$37.50, Class A hour going from \$150 to \$180. KREX-TV, Grand Junction, Colo. May 1, hour \$120 to \$150, min. \$24 to \$30. Spot increase: WOOD-TV, Grand Rapids, June 1 raised base min. from \$200 to \$250. Canadian increases: CKCO-

CKRN-TV, Rouyn, Que. (Ch. 4) has 35-kw Canadian GE transmitter due Aug. 1, plans Aug. 15 test patterns, Sept. 2 programming, reports pres. David A. Gourde. Construction of studio-transmitter building has begun and 660-ft. Tylon tower from Wind Turbine is due July 1, 4-bay GE antenna later that month. Licensee Northern Radio Inc. also operates radios CKRN, Rouyn; CKVD, Val d'Or; CHAD, Amos; CKLS, LaSarre. Base hour will be \$160. Reps will be Weed and Joseph Hardy & Co.

WIPR-TV, San Juan, P. R. (Ch. 6, educational), often delayed, has changed target to Oct. 1, reports R. Delgado Marquez, gen. mgr. of TV-radio for Puerto Rico Dept. of Education. RCA 25-kw transmitter is to be installed June 30 and elaborate TV-radio plant 15-mi. from San Juan is to be completed by July 15. Blaw-Knox 200-ft. tower with 6-bay antenna is ready.

GE shipped 3-bay batwing antenna May 28 to upcoming KSPR-TV, Casper, Wyo. (Ch. 6), due on air soon; 12-bay batwing to KPLC-TV, Lake Charles, La. (Ch. 7). RCA shipped 6-section superturnstile antenna June 7 to upcoming WTIC-TV, Hartford (Ch. 3) due this summer; 5-kw transmitter June 4 to upcoming KOAC-TV, Corvallis, Ore. (Ch. 7, educational), due in Oct.—6-bay antenna having gone June 3; 50-kw amplifier June 11 to KOVR, Stockton (Ch. 13); 25-kw amplifier June 10 to WLBR-TV, Lebanon, Pa. (Ch. 15); 10-kw transmitter June 12 to KNTV, San Jose (Ch. 11).

John Day, Ore. translator K72AG began equipment tests June 2, repeating KBOI-TV, Boise, it has notified FCC; grantee John Day Valley TV Inc. also has CP for K77AC, to repeat KIDO-TV, Boise. Rock Springs, Wyo. translators K78AB & K74AF expect to begin in mid-June, repeating KSL-TV & KTVT, Salt Lake City, reports John E. Wendt, secy. of Translator T.V. Bestg. Coop. Inc.

Power & facilities changes: WHTN-TV, Huntington, W. Va. (Ch. 13) has resumed 316-kw ERP operation, from new 1000-ft. tower on Barkers Ridge. Changes planned: WJTV, Jackson, Miss. (Ch. 12), to 316-kw Sept. 1; WDMS-TV, Duluth-Superior (Ch. 6), to 804-ft. tower Aug. 1; WHEN-TV, Syracuse (Ch. 8) to 316-kw week end of June 15.

WTHS-TV, Miami (Ch. 2, educational) has notified FCC it will be off air during public schools' summer recess June 14-Aug. 26.

WTPA, Harrisburg, began operation on Ch. 27 June 2, reports gen. mgr. Donald D. Wear.

TV, Kitchener, Ont. July 1, hour \$400 to \$450, min. remains \$90. CFRN-TV, Edmonton, Alta. July 1, hour \$325 to \$400, min. \$80 to \$110. CHCT-TV, Calgary, Alta. July 1, hour \$250 to \$350, adding Class AA min. (7:30-10:30 p.m. daily) at \$90. CKCK-TV, Regina, Sask. July 1, hour \$250 to \$300, adding Class AA min. (7-10 p.m. daily) at \$75. CJBR-TV, Rimouski, Que. July 1, hour \$240 to \$260, min. \$40 to \$55. CFQC-TV, Saskatoon, Sask. July 1, hour \$230 to \$260, adding Class AA min. (7-10 p.m. daily) at \$60. CFPATV, Port Arthur, Ont. hour \$170 to \$225, min. \$35 to \$55.

All-Industry TV Music License Committee, organized in April to negotiate new industry-wide licensing agreement with ASCAP (Vol. 13:15), has unanimously elected its 15-man temporary negotiations subcommittee as a permanent unit, chairman Irving R. Rosenhaus, WATV, Newark, announced this week. RKO Teleradio's Elisha Goldfarb is treas. and Simon H. Rifkind has been retained as counsel. Current ASCAP TV contract expires Dec. 31.

Telecasting Notes: Precedent may be in the making in TV film field with announcement this week that 6 stations are helping finance and sharing in distribution profits of new high-budgeted Screen Gems syndicated series *Casey Jones*. The stations reportedly are putting up some \$500,000 to help finance show, which already has been sold to some stations outside the "family." Participants are WPIX, N. Y.; KTTV, Los Angeles, and Westinghouse's KDKA-TV, Pittsburgh; WBZ-TV, Boston; KPIX, San Francisco, & KYW-TV, Cleveland . . . Universal's 550-feature backlog will be leased to Columbia Pictures' Screen Gems for TV on 10-year basis for some \$18,000,000, June 12 *Variety* reports; Universal denies any deal has been closed, but promises announcement on negotiations soon . . . MGM now preparing its 950-program short subject library for direct-to-stations syndication . . . Biggest single re-run package sold to TV station by Ziv's Economee TV was sealed up this week with \$500,000 order by New York's WOR-TV for multiple-showing package of 7 series, or 331 half-hours . . . NBC-TV's college football schedule of 9 nationally telecast NCAA dates next fall is 75% sold out, sponsors being Bristol-Myers, Sunbeam & Zenith Radio; NBC-TV also will televise 4 eastern regional games, with Sunbeam and American Machine & Foundry each signed for one-fourth sponsorship . . . Magnitude of public service job done by networks is illustrated by these figures from new NBC booklet on public service announcements in 1956: Last year, NBC-TV broadcast more than 1000 one-min. TV announcements & 2600 radio announcements on behalf of more than 100 different projects. These announcements created 12 billion viewer & listener impressions and if paid for would have cost \$9,000,000 . . . Special CBS-TV series of 30 & 60-min. shows, *The Twentieth Century*, debuts Oct. 20 with hour devoted to Sir Winston Churchill . . . NBC-TV's excellent and successful *Matinee Theatre* "experiment" in daily live 60-min. nighttime-calibre dramas gets 52-week renewal order from Procter & Gamble, which will step up number of its daily parties. . . . Theatre men are sold on TV, survey by Allied Theatre Owners of N. J. indicates. Some 82% of members felt TV advertising was

ELECTRONICS PERSONALS: Dr. Myles L. Mace, Litton Industries v.p., named chairman of management committee; v.p. George Friedl Jr. succeeds him as gen. mgr. of electronics equipment div. . . . Sigurd F. Varian elected vice chairman of Varian Associates, succeeded as pres. by H. Myrl Stearns . . . Robert I. Mendels elected pres. of Electronic Devices Inc., Brooklyn . . . Joseph W. Poliseo named chief engineer of new Bendix Aviation electronics engineering dept. . . . R. E. Peterson, mgr. of Westinghouse Research Labs, elected a director of American Society of Testing Materials.

High-speed facsimile equipment, easily adaptable for TV news purposes, was unveiled this week by Army Signal Corps and Times Facsimile Corp. Portable gear, suitable for mounting in jeep or helicopter, puts high-quality photo in hands of person miles away 5 min. after photographer clicks shutter. Set combines high-speed facsimile techniques with polaroid picture-in-a-minute principle, transmits 3¼ x 4¼-in. picture in 3 minutes.

Stepped-up activity in video storage and magnetic tape & film recording of TV signals is planned by Stanford Research Institute, according to group's annual report. "It is anticipated," says report, "that new techniques of storing picture information can be improved and extended to a wide variety of applications in industrial and TV fields."

helpful to pictures, but 90% thought radio advertising didn't help—and 98% called TV their No. 1 competitor . . . Costs have risen 128%, on the average, for network shows which have lasted for 5 years, June 15 *Sponsor* reports, while number of TV homes has increased only 78% . . . Loyalty: 6 waitresses at Cooky's Grill, Morro Bay, Cal., chipped in and bought a present for their boss—three 10-sec. spots on KEYT, Santa Barbara.

NTA Film Network announced 3 new 30-min. program series and "triple exposure" time sales plan whereby each of 3 advertisers can participate in all 3 shows. Under the plan, each sponsor receives a 60-sec. commercial and opening & closing billboards on each of the shows weekly. New programs being offered are *How to Marry a Millionaire*, produced by 20th Century-Fox; and *This is Alice* and *The Last Marshal*, both by Desilu. NTA is shooting for prime-time exposure on 110-station lineup. Network's *Premiere Performance* feature film show currently is being carried by 134 stations.

TV telescope developed by 2 astronomers and pres. John H. DeWitt of WSM-TV, Nashville, has received official recognition by American Astronomical Society. In paper presented at society meeting in Cambridge, Mass., Dr. Carl K. Seifert, co-developer of device, explained that it stepped up sensitivity of ordinary telescope 100 times. TV device uses commercially available camera tube and other components, compensates for "twinkle" effect of stars and planets and makes planets more easily visible by stepping up contrast.

List of top 100 national advertisers of 1956, with breakdown of dollar expenditures in network & spot TV, newspapers, magazines and outdoor advertising, is featured in June 3 *Advertising Age*. Analyzing table, TvB reports TV represents over half total advertising budgets of 45 of the 100.

New reps: WIBW-TV, Topeka, to Avery-Knodel June 1 (from Capper Publications); KTAG-TV, Lake Charles, La. to Raymer (from Young); KLRJ-TV, Las Vegas, to Avery-Knodel July 1 (from Pearson).

Philco govt. & industrial div. adds 5 regional sales representatives in expansion program aiming at 17 representatives covering country by year's end. As announced by gen. sales mgr. Marshall A. Williams, new reps are: Sol J. Levy, Bradley Beach, N. J., for Conn., N. Y. and central & western Pa.; Carl A. Stone Assoc. Inc., Los Angeles, for Ariz., Cal. & Nev.; Foster Electronics, Escanaba, Mich., for Wis. & Mich.; Private TV Systems, Indianapolis, for Ky. & Ind.; Exec-U-Phone Systems Inc., Boston, for Me., Mass., N. H., R. I. & Vt. Reps will be responsible for sales, installation & service of Philco's industrial TV systems and Audipage pocket paging system. Communications & broadcast equipment will continue to be handled by Philco Corp. regional offices.

New testing lab, designed to take some of work load from Govt.'s National Bureau of Standards, was dedicated this week at Clifton, N. J., by IT&T. Among lab's aids to industry will be determination of accuracy of master gauges, precise electrical & mechanical measurements, etc.

New peak in military electronics spending is seen by RETMA in reporting \$2.492 billion spending in first 9 months of current fiscal year. RETMA says full year's spending should reach \$3.5 billion if present rate continues.

One of biggest contracts ever awarded by CAA for electronics equipment—\$9,777,287 for 263 TACAN units—was won June 14 by Stromberg-Carlson.

LOW INVENTORIES BOLSTER SET SALES OUTLOOK: Best receiver inventory position in 2 years -- at factory, distributor & retail levels -- tends to support industry-wide expressions of optimism as new TV lines continue to be introduced and on eve of June 17 opening of mid-summer Chicago marts where most 1958 models will be shown.

RETMA report to members puts total TV inventories at 2,200,000 as of June 1, compared with 2,400,000 same date last year, 2,250,000 year before. As one able market researcher put it: "The industry is in a very nice spot to take off."

Inventory drop is attributed to reduced production in May (335,000 vs. 467,913 in May 1956) while May sales to consumers were only slightly under same month last year (400,000 vs. 403,487).

Retail sales for first 5 months are estimated at only 2% less than for same 1956 period, while production this year is down about 24%. And most of the 2% sales decline, we're told, probably is in export sales.

Prospects seem good for 6½-7,000,000 set sales this year, based on movement of 2,020,876 during first 4 months, compared with 2,036,808 in similar 1956 period; 1956 total was 6,804,783. Industry is putting considerable faith in promotability of new "slim look" to spark spurt in latter part of year.

Prices of lines we've seen range from about same as last year's to somewhat higher (mostly because of new, more costly, 110-degree tube) with indications of better profit margins across the board (For this week's new lines, see p. 12).

Retail stocks are in good shape, with average dealer estimated to have 8 sets in inventory -- same level, or lower, than at any time since 1952.

Incidentally, decline of the 24-in. was documented this week when statisticians reported they comprised only 5% of first 4 months' production, compared with 8½% same 1956 period -- and percentage is still dropping.

Retail Profits: Despite improving inventory situation and generally optimistic talk, dealers showed apprehension about 1957 prospects as NARDA released its 11th annual "Costs of Doing Business Survey" to document their 1956 performance.

Net operating profit ratio of TV-appliance dealers dropped to 1.2% on 1956 net sales compared with 3.4% in 1955, says report compiled by Chicago consulting economist Richard E. Snyder. Cost of goods sold amounted to 67.7% in 1956 vs. 65.7% in 1955. Of dealers answering, a record 28% reported net loss for the year.

Study brought this comment from NARDA pres. Ken Stucky: "These findings show a serious threat to the continuance of many needed dealers in this industry as well as most of the marginal ones." He went on to say "a new high in teamwork between dealers, distributors and manufacturers is proved necessary by this business analysis and...NARDA expects to play a key part in bringing this about."

Other highlights of NARDA report: (1) Year-end inventories up 14.8% in dollar value over beginning of year. (2) Inventories were turned over only 4.2 times compared to 5.5 times in 1955. (3) Gross margin declined to 32.3% from 34.3% in preceding year. (4) Total operating costs hit 31.1% of sales compared with 30.9% in 1955. (5) Net profit declines were shown in all 5 volume groups and geographical areas. (6) TV-radio-phonos accounted for 31.7% of 1956 sales vs. 28.8% preceding year.

Dealers report main operating problems in 1956 were: Price-cutting & discount houses; "too low" factory and distributor margin allowances; "builder sales" by manufacturers and distributors. For 1957, they expect same problems to continue, plus: tight money; shortage of good salesmen; overproduction by manufacturers; unfavorable manufacturer selling practices; poor quality products.

Sales expectations for year were supplied by 79% of those reporting -- with

41% expecting an average 14% sales increase, 24% predicting 13% drop, 35% foreseeing no change. Of dealers answering, only 59% would talk about profits: 46% of these predicting 11% average increase; 11% seeing 10% average drop; 43% no change.

Production: TV output was 90,655 week ended June 7, compared with 72,770 preceding week and 136,020 in corresponding week one year ago. It was the year's 23rd week and brought TV production for year to date to about 2,329,000 compared with 3,083,387 in same period of 1956. Radio production totaled 237,106 (96,523 auto) week ended June 7, compared with 167,781 (59,041) the preceding week and 245,155 (70,837) in corresponding week year ago. Radio output for 23 weeks totaled about 6,504,500 (2,574,100) vs. 6,014,900 (2,135,897) in same 1956 period.

RCA COUNTERATTACKED this week against anti-trust suit by Philco (Vol. 13:3, 4) for \$150,000,000 treble damages against RCA, GE, AT&T and two of its subsidiaries charging "monopolistic practices" in RCA TV-radio-electronics patent pool. RCA charged Philco and subsidiary Lansdale Tube Co. had infringed on RCA patents since Jan. 1955, requested treble damages.

Denials of Philco charges in Jan. suit in U. S. District Court at Philadelphia also were filed by RCA, GE, AT&T, Western Electric and Bell Telephone Labs—all asking dismissal of suit. RCA also said it will file an additional claim for royalties on RCA patents it claims Philco used prior to Dec. 31, 1954.

RCA's reply said it has operated its "manufacturing, broadcasting, research and patent licensing activities in furtherance of competition in all aspects of the radio-television industry, as well as in the electronics industry generally and in no way in hinderance thereof." Reply went on to say "no industry in which there existed the restraint or attempts to restrain alleged in the [Philco] complaint could have increased and multiplied at such a dynamic pace."

Philco and Zenith are only major TV-radio manufacturers which are not RCA licensees. Philco did not renew RCA license when it expired in 1954; Zenith and RCA have been tied up in patent litigation since 1945.

RCA earnings are running about same as at this time last year, higher costs negating 5% sales increase, pres. John L. Burns said during west coast visit this week. He added that RCA total backlog is some 5% higher than for similar period in 1956. Burns said: (1) Color TV is going "pretty well for a new product." (2) Half-dozen major TV manufacturers "are planning to get into color in a big way" by fall—but wouldn't name them. (3) West coast electronics firms increased share of industry's dollar output from 2% to 16% in last 10 years; California is 3rd largest electronics center in dollar volume.

Uhf converters are exempt from 10% manufacturers' excise tax unless manufacturer sells converter on or in connection with a TV set, Internal Revenue Service ruled this week. If converter is sold by manufacturer in connection with set, 10% tax is computed on total manufacturer's price of entire outfit. Long-awaited ruling is #57-252, on p. 21 of Internal Revenue Bulletin No. 223.

Westinghouse Appliance Sales div., 207 W. Huron St., Buffalo, is taking over western N. Y. distributorship of major appliances from Buffalo Electric Co. which will continue to distribute Westinghouse radios, lighting fixtures, lamps, fans, etc. Buffalo Electric v.p.-merchandising Charles E. Schuster will become Westinghouse district mgr. for Buffalo wholesale branch.

Trade Personals: Robert M. Fichter promoted to TV sales mgr., Westinghouse TV-radio div, succeeded by Jack Rindner as market planning manager . . . F. P. Rice resigns as manager of DuMont TV receiver division, plans to be disclosed later this month . . . Robert Howard appointed director of Admiral commercial electronics div.; Samuel Schwartzstein succeeds him as gen. mgr. of Admiral Distributor Inc.'s metropolitan N. Y.-N. J. div. . . . Philip E. Cunningham named RCA color market development mgr. for New England . . . Charles A. Morrison, Canadian GE v.p. who has been gen. mgr., wholesale dept., Toronto, has been assigned to marketing problems, reporting to chairman Harold M. Turner; Walter G. Ward succeeds Morrison . . . Robert F. Marlin promoted to purchasing agent, Sylvania parts div. . . . John A. Chichester, ex-DuMont Illinois, named Warwick Mfg. Corp. industrial sales mgr. . . . Herb Fletcher, ex-Admiral, N. Y., named national sales mgr., N. Pickens Import Co., Blaupunkt line (German) importer . . . Sydnel W. Morrell, ex-Ford Motor Co., named v.p.-public relations, IT&T . . . Alex McKenzie, ex-*Electronics Magazine*, named McGraw-Hill industrial book dept. editor . . . Edwin Cornfield, ex-DeJur-Amsco, named exec. secy. of Institute of High Fidelity Mfrs., succeeding Sanford L. Cahn who continues as director of shows.

Dr. W. R. G. Baker, RETMA pres. and GE v.p., seriously ill since June 9, now undergoing tests at Ellis Hospital, Schenectady, to determine nature and extent of illness. At week's end, hospital reports no change in his condition.

"Advanced instruction" in TV maintenance is being offered technical school teachers in 3-week course by New York State Department of Education, New York Trade School and RETMA. Full-time course will be held July 8-26 in TV lab of N. Y. Trade School, costs \$30 for N. Y. residents, \$37.50 for others. Applications with tuition fee payable to Bureau of Accounts should be addressed to State Education Dept., Albany, N. Y. or to RETMA.

Four Zenith distributors given special awards this week for total of 75 years' affiliation: H. R. Basford Co., San Francisco; Tri-States Distributing Co., Shreveport; Morley-Murphy Co., Milwaukee; Chapin-Owen Co., Rochester, N. Y.

Striking transistor growth is emphasized by RETMA Jan.-April factory sales figures—6,899,300 units worth \$19,492,000 vs. 2,730,000 worth \$7,884,000 during similar 1956 period. April 1957 sales amounted to 1,744,000 valued at \$4,880,000 vs. 1,904,000 worth \$5,321,000 in March 1957.

Trade show questionnaire was sent by RETMA to its members this week (Vol. 13:14) following board approval. Members are asked number, cost, desirability, type of such shows—and how many they think there should be.

Topics & Trends of TV Trade: RCA sets are overwhelming choice—with 19 first places, one tie for first—in 12th annual Consolidated Consumer Analysis of 23 markets. Survey is conducted by local newspapers (Vol. 13:20, 22), with individual studies and consolidated report available from them or their national sales reps. The 130-page consolidated report covers all important consumer products in addition to TV. Here's tabulation of top 3 TV choices (study goes as far as 18th choice), with percentage of brands owned in each market in parentheses:

City	First	Second	Third
Chicago	Admiral (18.5)	RCA (16.8)	Motorola (11.2)
Cincinnati	RCA (20.6)	Philco (15.7)	Admiral (12.4)
Columbus	RCA (23.3)	Philco (12.9)	Admiral (11.1)
Denver	RCA & Motorola (9.5 each)		Admiral (8.5)
Duluth-Superior	RCA (15.1)	GE (11.3)	Admiral (8.2)
Fresno	RCA (13.0)	Philco (10.2)	Hoffman (9.0)
Honolulu	RCA (14.9)	Zenith (10.8)	Silvertooe (10.0)
Indianapolis	RCA (15.2)	Admiral (11.9)	Philco (8.8)
Long Beach	RCA (15.7)	Packard-Bell (9.7)	Hoffman (8.9)
Milwaukee	RCA (21.9)	Admiral (15.1)	Motorola (8.0)
Modesto	Hoffman (14.3)	Philco (11.6)	RCA (10.9)
Newark	RCA (26.6)	Admiral (11.3)	DuMont (8.7)
Omaha	RCA (19.4)	Philco (13.5)	Motorola (10.2)
Phoenix	RCA (10.6)	Admiral (10.2)	Emerson (7.3)
Portland, Me.	RCA (16.9)	GE (13.1)	Zenith (12.1)
Portland, Ore.	RCA (11.9)	Zenith (9.5)	Admiral (9.4)
Sacramento	RCA (15.4)	Philco (9.8)	Packard-Bell (9.0)
Salt Lake City	RCA (14.9)	Admiral (11.4)	Motorola (8.7)
San Jose	RCA (11.0)	Packard-Bell (9.1)	Philco (8.9)
Seattle	RCA (16.6)	Packard-Bell (8.1)	Motorola (7.0)
St. Paul	RCA (17.4)	Admiral (11.8)	GE (11.5)
Washington	RCA (23.6)	Admiral (14.7)	Philco (10.3)
Wichita	Admiral (12.6)	RCA (11.7)	Zenith (8.7)

Westinghouse 1958 models, priced about 10% higher than last year, include 12 basic receivers priced from \$130 to \$380 (individual prices to be announced later). Shallower 110-degree tube is used in several consoles and table models, 17-in. portable. Custom series has 2 table models, 1 horizontal, 2 vertical consoles. Deluxe series has 1 table, 3 consoles. Three portables are shown—17-in. 110-degree model, 14- & 17-in. models with 90-degree tubes. Features include automatic tuning, remote control, wood cabinets in table & consoles, 2-tone enamel or vinyl in portables.

Admiral's new TV line, featuring slimmer cabinets, flush to wall (15-in. deep for 21-in.), 110-degree tube, 8-watt amplifier, runs \$10-\$30 higher than last year. New models introduced this week are 21-in. only, the 14-17-in. portables having been shown previously (Vol. 13:21). New tables run \$180-\$220, consoles \$230-\$380—with \$10 increments. Line also includes 9 combinations, some of them lowboy models, no suggested lists. New ultrasonic remote control is optional on some models. Spokesman says Admiral wrote more orders at last week's Miami distributor convention than at any convention in last 7 years.

Packard-Bell's new line includes 13 black-&-white models at \$170 to \$425, 2 color sets at \$595 to \$725, no portables (although 17-in. set will be introduced later in year). Black-&-white are: "Special" series with 110-degree tubes, 17-in. table \$170-\$220, 21-in. table \$200-\$220, "Custom Decorator" series with 110-degree tubes, 21-in. consoles \$290-\$370, 24-in. console \$350-\$390; "De Luxe" series with 90-degree tubes, 21-in. table \$220-\$240, 21-in. combination \$400-\$425, 21-in. consoles \$240-\$290, 24-in. table \$240-\$260, 24-in. console \$280-\$300.

Phileo International's Mexico City subsidiary plans to double TV-radio production after July 15 move to 250,000-sq. ft. plant—the first there to use moving belt system. Plant also will produce receivers for Westinghouse subsidiary I. E. M. in exchange for refrigerator production.

American TV manufacturers exhibiting at Poznan, Poland International Fair, June 9-23, include Admiral, Emerson, RCA, Sylvania, Westinghouse, Zenith—Commerce Dept. reports.

Picture tube sales in first 4 months of 1957 totaled 2,952,318 valued at \$52,974,193, compared with 3,469,405 at \$65,008,912 in first 4 months of 1956, reports RETMA. Receiving tube sales totaled 153,011,000 worth \$130,192,000 in first 4 months vs. 155,604,000 at \$125,535,000 in same period year ago. RETMA's monthly breakdown:

	Picture Tubes		Receiving Tubes	
	Units	Value	Units	Value
Jan.	760,860	\$13,594,442	37,571,000	\$31,170,000
Feb.	728,363	13,134,778	44,460,000	36,631,000
March	833,088	14,850,847	43,010,000	37,007,000
April	629,838	11,394,043	27,970,000	25,384,000
TOTAL	2,952,318	\$52,974,193	153,011,000	\$130,192,000

Glum view of color was expressed by DuMont chairman Dr. Allen B. DuMont at N. Y. press preview of 1958 DuMont line. Saying DuMont would not make color sets this year, he stated that black-&-white sets now provide superior picture, use shallower cabinets with short CR tube, give public better buy. DuMont declared eventual color developments would bring set to mass market, but at cost of a color console now "a person can purchase [a] 21-in. console black-&-white receiver; a matching hi-fi phonograph with AM/FM radio; a portable black-&-white receiver" and portable transistor radio. DuMont is continuing development work on color, he said. New black-&-white line uses 110-degree 17-in.-21-in. tubes in low-end Playboy series (price not set), 90-degree short neck in others, includes 17 TV models at \$170-\$500, 2 combinations at \$1200. Remote control unit with 25-ft. wire ribbon connection, uhf are optional.

Scare over picture-tube voltage booster was debunked by Jack Gould in June 14 *New York Times* column following news story quoting warning from Dr. James B. Kelley, industrial consultant to N. Y. State Commerce Dept., on X-ray hazards from tubes using boosters. Gould quoted new State Labor Dept. manual saying that face plate absorbs voltage, that glass over face of tube is further protection. Story said Dr. Kelley "appeared to back down substantially from original warning," conceding he "was not aware of the technical sense in which the word 'boosters' currently is employed by TV set owners, service men and the trade," apparently was referring to "rare" replacement of set's high voltage power supply. Gould added that bigger danger to set owner is quality of TV programming.

Sylvania "Slimline" for 1958, using 110-degree tubes, has 4 table, 4 console basic models, previously announced 21-in. portable (Vol. 13:16, 22), one "prestige" console with no suggested list price. Some sets have Halolight, some Halolight "nightlite" which can be left on when set is off. Sets ranging in depth from 13 11/16 in. to 16 9/16 in. are: Portable \$200; tables \$180, \$200, \$230, \$250; consoles \$200, \$230, \$260, \$290.

Sylvania "Slim Jim" 110-degree portable, transistorized portable radio & portable phono are displayed in Monsanto House of the Future which opened June 12 in Disneyland Park, Anaheim, Cal.

Olympic's 1958 TV line, to be shown June 17-20 at Congress Hotel, Chicago, consists of 26 models in 3 chassis series, all with 90-degree short-neck tubes. They are: 14-in. & 17-in. portables, no suggested price; 17-in. table, no suggested price; 21-in. tables \$170-\$230; 21-in. consoles \$190-\$310; 24-in. consoles \$230-\$260; 21-in. combinations \$310-\$450; 24-in. combinations \$380-\$490.

Wrapup of TV industry production problems, promotional projects, advertising plans is contained in June 14 *Wall Street Journal*.

NARDA holds June 22 board meeting at St. Louis' Chase Hotel, mid-year get-together June 23 (Sunday).

Financial & Trade Notes: Officers-&-directors stock transactions reported to SEC for April: Admiral—Edmond I. Eger bought 500, holds 500. American Bosch Arma—John H. Flashkamper bought 100, holds 100; F. Wm. Harder sold 375, holds 7500; Sidney E. Miller exercised option to buy 100, holds 940; Kenneth H. Rockey sold 100, holds 4110. American Electronics—Ray H. Cripps sold 20,000, holds 70,500; Arthur E. Lamel sold 20,000, holds 70,500; Clifton W. Reed sold 100, holds 4200; Phillip W. Zonne sold 20,000, holds 66,300. American Machine & Foundry—Morehead Patterson sold 800, holds 35,753. Avco—George E. Allen bought 600, holds 1500; Matthew A. McLaughlin bought 500, holds 675. Consolidated Electrodynamics—Harold W. Washburn sold 200, holds 7390. DuMont Labs—Armand G. Erpf bought 300, holds 3700; David T. Schultz bought 400, holds 1400; Donovan H. Tyson bought 400, holds 400. Emerson Radio—Benjamin Abrams bought 2000, holds 233,445 personally, 29,139 in trusts, 63,801 in foundations. Friden Calculating—L. B. Taylor sold 700, holds 6950. GE—Neil McElroy bought 200, holds 600; J. S. Parker bought 240, holds 937; Warde B. Stringham sold 1500, holds 3247. General Precision Equipment—Walter E. Green sold 500, holds 500; Wladimir A. Reichel sold 5600, holds 11,844. Globe-Union—C. O. Wanvig Jr. bought 900, holds 10,100 personally, 14,900 in trust. Hoffman—J. S. McGee exercised option to buy 250, holds 250. Indiana Steel Products—Anthony J. Astrologes bought 200, holds 470. International Resistance—Harry A. Ehle sold 600, holds 14,600. Litton Industries—Roy L. Ash sold 820 in partnership, holds 47,415 personally, 18,755 in partnership; Lewis W. Howard sold 1000, holds 4762 personally, 900 in trusts; H. W. Jamieson bought 5000, sold 820 in partnership, holds 53,090 personally, 18,755 in partnership; Charles B. Thornton exercised option to buy 11,000, sold 1803 in partnership, holds 124,348 personally, 41,262 in partnership. Magnavox—Richard A. O'Connor sold 456, holds 57,943. Minneapolis-Honeywell—Richard P. Brown sold 500, donated 1000, holds 64,234; Wm. W. Gilmore sold 200, holds 1100; P. H. Wernicke sold 600, holds 1825. Norden-Ketay—Robert M. Adams Jr. sold 1000, holds none. Philco—Gaylord P. Harnwell bought 100, holds 200. RCA—Robert L. Werner bought 100, holds 787. Sperry Rand—Theodore F. Allen sold 2000, holds 2726; Harry Landsiedel sold 1000, holds 13,904 personally, 29,960 in joint account. Texas Instruments—W. D. Coursey sold 1000, holds 5254; C. J. Thomsen sold 600, holds 14,897. Westinghouse Electric—A. W. Robertson bought 500, holds 1000.

* * * *

Olympic reports record sales in first 4 months of 1957, up 33% from similar period last year, and covering all categories—TV-radio-hi-fi. Sales v.p. Morton M. Schwartz notes that April dollar volume was 42% higher than April 1956 and preliminary figures show continuing rise in May. He said the fall season should "round out the biggest year in Olympic's history."

Allied Artists will have loss before tax credits of "somewhere between \$2,000,000 & \$2,500,000" in fiscal year ended June 29 vs. net income of \$371,875 year earlier, according to pres. Steve Broidy. He predicted that production cost-cutting and box office returns from new films will help make next fiscal period "our best year for profits."

P. R. Mallory consolidated income was \$1,119,000 on sales of \$26,145,000 in first 4 months this year vs. \$632,000 on \$14,238,000 in corresponding 1956 period, which was affected by 6-week strike. Earnings & sales include those of subsidiary General Dry Batteries Inc., acquired April 26, 1956.

Crowell-Collier Publishing Co. had net loss of \$4,427,943 in 1956, its year of debacle (Vol. 13:7), but cleared \$61,701 from Oct. 18 to Dec. 31 on operations of its radio KFWB, Los Angeles, according to annual report to stockholders this week. Loss from *Collier's & Woman's Home Companion*, suspended in Dec., was \$7,990,376. But net income from non-magazine business, including radio, record club, book publishing, was \$5,168,426 on sales & revenue of \$26,405,712. Consolidated loss before special items of \$1,605,993 was \$2,821,950.

National Telefilm Assoc. filed registration June 12 with SEC (File 2-13423) for \$5,000,000 of 6% sinking fund subordinated notes due June 15, 1962, with purchase warrants attached giving rights to purchase 50 common stock shares for each \$500 of notes after Sept. 2, 1957. Also offered are 350,000 shares of common stock. Issues underwritten by Cruttenden, Podesta & Co., Chicago; Cantor, Fitzgerald & Co., Beverly Hills, and Westheimer & Co., Cincinnati, would be used largely for debt incurred by film acquisitions.

National Telefilm Assoc. earnings were more than quadrupled in 9 months ended April 30 over corresponding fiscal period year earlier, with net of \$818,592 (\$1.23 per share) vs. \$191,397 (29¢). Third-quarter earnings in fiscal year, which ends July 31, were \$309,961 (47¢) vs. \$55,584 (8¢) year ago. Film exhibition contracts in 9 months totaled \$12,346,081, up from \$3,580,898 in previous 3 quarters.

IT&T reports net income of \$5,900,448 (82¢ per share) on first quarter net sales of \$142,002,231 and total income of \$156,584,455 compared with net of \$5,514,548 (77¢) on sales of \$108,749,136 and total income of \$121,575,938 in similar 1956 period. U. S. volume amounted to \$60,824,787 vs. \$41,935,325; foreign sales were \$81,177,444 vs. \$66,813,811 in 1956 first quarter. Unfilled orders totaled \$194,000,000 in this country, \$292,000,000 abroad.

Texas Instruments earnings this year will be closer to \$1.10 per share than \$1 predicted earlier (Vol. 13:9), compared with 72¢ in 1956 (Vol. 13:12), pres. J. Erik Jonsson told Houston Society of Financial Analysts this week. He said 1957 sales would reach record \$65,000,000-\$70,000,000 vs. \$45,699,358 last year.

Standard Coil stock option plan, authorizing directors to award up to 10% of 1,470,000 shares outstanding to employees, has been approved by stockholders. Pres. James O. Burke told annual meeting second-quarter profit should be higher than first quarter's 3¢ per share.

Dividends: AB-PT, 25¢ payable July 20 to stockholders of record June 28; IT&T, 45¢ July 15 to holders June 21; Collins Radio 'A' & 'B', 35¢ July 31 to holders July 16; Admiral directors took no action.

Sperry Rand earned \$49,612,352 (\$1.83 per share on 26,887,722 shares outstanding) on sales of \$871,047,239 in fiscal year ended March 31 vs. \$46,348,878 (\$1.81 on 25,322,841 shares) on \$710,696,087 year earlier.

Cornell-Dubilier earned \$414,804 (76¢ per share) on sales of \$16,892,701 in 6 months ended March 31 vs. \$529,849 (98¢) on \$17,480,107 year earlier.

Columbia Pictures earned \$1,504,000 (\$1.18 per share) in 39 weeks ended March 30, compared with \$1,855,000 (\$1.49) in 40 weeks year earlier.

Philco closes Dallas regional office, splitting territory between Kansas City and Atlanta offices; mgr. Guy Hagerly will be given another post.

Electronic Parts Distributors Show for 1958 will be held week of May 19 in Chicago's Conrad Hilton Hotel.

EDWARD LAMB'S license for WICU, Erie, Pa. was renewed by FCC June 13—just 3 years, 3 months and 2 days after Commission raised doubts about his qualifications and touched off one of most bizarre episodes in its history. Commission's vote for renewal was 5-1, as we predicted last Jan. (Vol. 13:3), Comr. Lee being the dissenter, but issuing no statement. Comr. Doerfer, who sparked case originally and later said he'd abstain from voting, was listed as absent.

FCC's 58-page final decision was more direct and to the point—and less colorful—than examiner Herbert Sharfman's 140-page initial decision which recommended renewal 1½ years ago and was credited with taking Commission off the hook in what was widely regarded as an ill-advised sortie into red-hunting. Basic points in FCC's conclusions:

On issue of whether Lamb lied in denying Communist associations and sympathies, evidence generally is lacking to prove beyond question that he actually "associated" with groups and individuals he knew were communistic. In the case of his writings, it's impossible to say that they actually advocated Communism "in the classical sense." It ruled against Lamb on Issue No. 2—his charge that FCC investigators sought to solicit false testimony—but held that absolution of Lamb on the misrepresentation charge overshadowed its adverse finding on the other.

Commission criticized Lamb's "evasiveness and lack of candor" during the 64 days of hearings, but stated that these characteristics by themselves are not sufficient to warrant adverse finding in view of lack of proof of the basic and paramount issues of case.

Lamb issued statement expressing gratitude at his "belated vindication," terming the hearing "a trial of my ideas and activities." The hearings showed, he said, "that an agency of our Govt. placed on the witness stand a score of professional witnesses, persons coached and paid to bear false witness against a private American citizen," and he hailed decision as "reassurance of the integrity of our courts and administrative agencies."

Seven applications for new TV stations and one for translator were filed with FCC this week, bringing total to 132 for stations (35 uhf) and 54 for translators. Applications were for Mobile, Ch. 48, by Wistenn Inc. (Milwaukee furniture mfr. Bernard D. Heifetz pres.); for Indianapolis, Ch. 39, by Butler U; for Des Moines, Ch. 23, by Wistenn Inc.; for Lafayette, La., Ch. 3, by Acadian TV Corp. (physician Paul Kurzweg Jr. pres.); for New Orleans, Ch. 12, by principals of KTBS-TV, Shreveport; for Hay Springs, Neb., Ch. 4, by principals of KOTA-TV, Rapid City, S. D.; for Charleston, S. C., Ch. 4, by WTMA. Translator application was for Ch. 70, Pinedale, Wyo., by Town of Pinedale. [For details, see *TV Addenda 24-W*, herewith.]

"We must raise standards and improve quality. The business ethics of our industry are slipping." That's exhortation to fellow NARTB members by former MBS pres. Edgar Kobak, now business consultant, in current trade publication ad. He submits 22 suggestions for NARTB, including: separate associations and conventions for TV & radio, establishment of strong program depts., relocation of main office outside of Washington, etc. — plus review of virtually all current NARTB functions.

TV is top user of music, according to report of pres. James C. Petrillo to AFM Denver convention. During 1956, he said, TV industry paid \$10,552,531 for music of all kinds. Radio was second at \$9,835,327. Theatrical employment to musicians totaled \$6,028,893, major Hollywood movie studios \$2,782,533, independent producers \$718,500.

Comr. Doerfer was embroiled in dispute with movie industry this week, revolving generally around the question: Whose program code is best, TV's or Hollywood's? It started with recent INS interview—based in turn on May 5 speech to Catholic Institute of the Press in New York—in which Doerfer was quoted as saying TV industry is "cleaning up" Hollywood movies by editing out offensive portions of theatrical films before showing them on TV. He also praised TV industry for "voluntarily banning snide references to minority groups . . . in sharp contrast to the movies of 10 or 20 years ago." This resulted in sharp letter from Motion Picture Assn. pres. Eric Johnston, charging commissioner with "complete distortion of current facts" and "unfounded slurs" on picture industry. Johnston defended MPAA code, calling its enforcement machinery superior to TV code and stating that "as a practical matter it is a rare TV licensee who exercises any control over program content of filmed material he broadcasts." Doerfer replied that many of complaints about TV crime & violence were based on old movie film shows, that many old films have been rejected for TV broadcasting, that TV film producers are now following TV code, reiterated that "some old movie films do not measure up" to TV code. Another letter by Johnston noted with "gratification" Doerfer's statement that he had "no intention to disparage the American movie industry."

Scope of NBC's world-wide plans was hinted this week with establishment of new wholly owned subsidiary, NBC International Ltd., with headquarters in Montreal, to conduct "all of the NBC station management services, station investments and program sales outside of the U. S. and Canada." Its program sales will include both those of NBC-TV network and film subsidiary CNP Inc. NBC international operations director Alfred R. Stern has been elected chairman of NBC International Ltd.; NBC director of European operations Romney Wheeler is pres., with headquarters in London. Secy.-treas., assigned to Montreal headquarters, which opens in July, will be elected soon. New subsidiary plans to open 2 other offices—in Mexico City to conduct Latin American business by end of this year, and in Far East next year. Promising that NBC will take important part in international TV operations, pres. Robert W. Sarnoff said that by end of this year NBC International "will have completed on-the-scene surveys of TV in every country on the globe where the medium now exists or will soon exist."

Big one that got away: Huge on-again-off-again purchase of Sun. 7:30-9 p.m. on ABC-TV by Kaiser Aluminum—reportedly involving more than \$5,000,000 for year, which would have been that network's biggest single time sale (Vol. 13:21)—is off again, this time probably for good. Kaiser wanted to use time segment for group of top Hollywood movies, mostly post-1948. One reason for sponsor's change of heart was said to be unavailability of suitable quality movies. Kaiser's still shopping for top network show for next season, has been negotiating with Sylvester L. (Pat) Weaver's Program Service network, among others.

Advertisers shouldn't boast about how much they spend for TV stars, chairman Robert M. Granger of D'Arcy Adv. told 53rd annual AFA convention June 11 in Miami Beach. He said much of "blowing the trumpets" is (1) "downright bragging," (2) "poor taste," (3) "gross exaggeration." He asked: "How many times have you read about a \$5,000,000 or \$10,000,000 contract for a hot TV star, when we all know there is a slight little thing called '13-week cancellation clause' that always seems to be overlooked?"

SUMMARY-INDEX OF THE WEEK'S NEWS — June 22, 1957

WWLP IS FIRST STATION to test translator commercially; Springfield uhf is so sure of results it plans 9-link satellite-booster chain (p. 1).

RATE CARDS & ANTI-TRUST: Rate integrity desirable, but Phila. decision outlaws rate integrity agreements. Celler bill bans rate "discrimination" (p. 2).

CELLER BLASTS FCC actions and ethics. Cox report postponed for at least a week, Barrow study until Sept. 30. FCC files in anti-trust case (p. 2).

TV COVERAGE OF HOUSE hearings raises Congressional storm; Rayburn's authority to ban cameras is flouted by Walter in San Francisco inquiry (p. 3).

FCC REAFFIRMS MIAMI GRANT to WCKT after adverse court decision, refuses to reconsider grants to Crosley in Indianapolis and Travelers in Hartford (p. 5).

SETMAKERS CONFIDENT as they show 110-degree "Slim Look" at Chicago mid-summer mart. New automatic tuning, remote control units featured (p. 9).

TV SHIPMENTS to dealers through April total 1,787,346, drop of 270,000 from similar 1956 period. April slightly below April, 1956 (p. 11).

DELAY IN FEE-TV consideration probable as NARTB & JCTT ask time to reply to "test" comments after July 8; NARTB sets up 3-man anti-toll TV board (p. 6).

STUDY OF GOVT. USE of frequencies proposed by Sen. Potter in bill setting up commission to determine whether any can be relinquished for TV-radio (p. 8).

INTERCITY TV CIRCUITS to triple in 10 years, AT&T predicts at FCC hearing, forecasting "substantial number of telephones" equipped for TV in 15-20 years (p. 12).

TRANSLATORS—ECONOMICAL AID TO UHF OUTLETS: First use of translators by telecaster

-- WWLP, Springfield, Mass. (Ch. 22) -- hasn't started yet, but station thinks potentials for extended uhf coverage are so good that already it's planning to add at least 4 more to 5 definitely scheduled now, one of them ready to go on air.

"We think this is a damned good idea," treas.-gen. mgr. Wm. L. Putnam of WWLP enthused to us this week. He was all set for operation within another week of the nation's first station-owned translator (W79AA) at Claremont, N.H. for pickup (Vol. 13:23) from new satellite WRLP, Greenfield, Mass. (Ch. 32).

"We'll have more so long as we keep it under \$1 a head for audience," Putnam said -- and he figured that \$5000 station investment for Claremont installation will add 20,000 viewers to WWLP's Springfield audience of around 750,000.

In FCC works now for expected quick approval are WWLP applications for translators in Lebanon, N.H. (20,000 estimated new viewers), Newport, N.H. (7000), Rutland, Vt. (17,000), Bennington, Vt. (12,000).

Likely spots for future extension of WWLP's satellite-translator chain are Woodstock & St. Johnsbury, Vt. and Woodsville & Berlin, N.H. All locations are in foothills of White Mountains & Berkshires where 1500-ft. elevations are common.

"One thing I am certain of is that this is a means of providing city grade service for a lot of people who otherwise wouldn't get it," Putnam told us. "And advertisers will get a lot more whether they like it or not." Station's base hour is being raised to \$700 from \$600; he indicated other rate changes are in prospect.

Simplicity of translator operation also impresses Putnam: "You put up a collapsible tower, anchor it to a couple of rocks and use a pre-fab house. Then you're in business, and there's no maintenance to speak of."

Other telecasters are beginning to negotiate for translators, according to pres. Ben Adler of Adler Electronics Inc., New Rochelle, sole manufacturer of equipment whose use by chambers of commerce & other non-profit groups -- particularly in mountain states & west -- has grown steadily.

Springfield experience is being watched by other uhf operators in U.S. and Adler, whose payroll has gone from 100 to 340 in the past year, has inquiries from Canada, Cuba, Mexico, South America. His price for 10-watt station is \$2750.

"We have more orders than equipment to make gear," Adler told us. He is shipping from second production run of 100, planning third run of 100. Nine months ago translator CP score stood at one on air at Hawthorne, Nev. (Vol. 12:36), 2 more applications granted by FCC, 18 pending. Now 40 are on air, 27 additional CPs have been granted, 53 applications are pending.

TV-RADIO RATE CARDS AND ANTI-TRUST: Significance of last week's Federal anti-trust conviction of 9 Philadelphia AM stations and local broadcasters assn. (Vol. 13:24):

While maintenance of card rates is recognized as a laudable practice, any agreement among stations to stick to card rates violates the Sherman Act.

Case was precedental in that it struck at a practice never before attempted in the industry, to our knowledge, but one which Justice Dept. feared might have spread if unchecked. The stations weighed the risks, chose not to put up fight -- because, being subject to FCC regulation, they feared the consequences of a possible "moral turpitude" anti-trust conviction. However, those involved felt there was no "price-fixing," since any station could have changed its rate card at any time.

Fact remains that industry has been put on notice that inter-station agreements to maintain integrity of rates are subject to prosecution. As one anti-trust expert put it: "You can't even agree with your competitor not to be a chiseler."

Note: While judge ruled the 9 Philadelphia stations technically guilty of criminal anti-trust violations not involving moral turpitude, civil anti-trust suit against same defendants (except Westinghouse) is still pending, seeking injunction barring them from any future participation in similar agreements.

* * * *

An anti-trust push in the opposite direction -- aimed principally at network discount structure but with definite implications for station rates -- is inherent in bill introduced this week by Rep. Celler (D-N.Y.). His HR-8277, only legislation recommended in his anti-trust subcommittee's report on TV (Vol. 13:23), would make Robinson-Patman and Clayton Acts applicable to sale of services as well as goods.

Practical effect on TV-radio would be: Any network or station must offer all advertisers identical rates for identical services. Quantity discounts not related to actual cost savings by broadcasters would be considered illegal discrimination. Aim of bill is to prevent large advertisers from obtaining "competitive advantage solely because of superior mass purchasing ability."

Celler intends to push for passage this session. And since it will be referred to his own Judiciary Committee, he told FCC Bar Assn. luncheon this week: "I can assure you, you'll get action on this bill."

NO LET-UP IN CONGRESSIONAL HEAT ON FCC: "I'm going to tolerate no nonsense, no deliberate procrastination -- that's a solemn warning to the FCC."

So said Rep. Celler in a departure from his prepared speech before an FCC Bar Assn. luncheon -- a speech designed to burn the ears of the Commissioners in the audience -- still another in the recent series of Congressional attacks on the Commission (Vol. 13:22-23). Covering largely same ground as his anti-trust subcommittee's report on TV industry (Vol. 13:23), Congressman's words left no doubt about his feelings toward present Commission:

"In my opinion there has never been a greater need for qualified personnel in the FCC, both at the staff and the Commission level. For a number of years the FCC has simply not measured up to the standard of public service required to inspire public confidence...The FCC has failed to perform its statutory obligations adequately; [it] has not infrequently failed to conform its regulatory activities to the letter and spirit of the anti-trust laws; [it] has for many years fumbled the vital problem of station outlets and frequency allocations..."

He again castigated Commission for "informal relationships with members of the industry" and urged quick adoption of "code of ethics" for FCC & industry.

In attacking FCC's guardianship of anti-trust responsibility, he singled out recent grant to Boston Herald-Traveler as highlighting "the Commission's disregard of anti-trust principles." He added his subcommittee didn't look into this one, but he would refer it to Rep. Moulder's Commerce "watchdog" subcommittee.

After summing up his subcommittee's recommendations, he again put FCC on the spot: "The subcommittee has made formal request to the FCC and the [Justice Dept.] anti-trust div. for detailed progress reports as to steps these agencies undertake to carry out each of the recommendations pertaining to TV broadcasting."

* * * *

Another Congressional report on TV -- Senate Commerce Committee's "Cox Report" on network practices -- was postponed by Committee for at least another week. Due for consideration June 24 or 25 if sufficient Senators are present, document is understood to recommend changes in option time and must-buy rules (Vol. 13:24), but to declare moratorium on proposals for legislation until completion of the Justice Dept.'s TV study and until 90 days after wind-up of FCC's network study.

The FCC study, under Dean Roscoe Barrow, definitely won't make its June 30 deadline, and staff report has been postponed to Sept. 30. Though FCC's extra appropriation to finance study expires next week end, network study staff will be paid this summer out of regular Commission operating funds. Entire staff will be retained.

Note: FCC was heard from this week in the hot anti-trust action arising out of NBC-Westinghouse swap of stations in Philadelphia and Cleveland. Commission asked permission of Philadelphia Federal Court to file brief commenting on RCA-NBC defense that FCC's approval of transaction immunizes it from further govt. challenge.

Commission opposed RCA-NBC argument in the submitted brief, saying that in approving the exchange it "did not purport to pass on the anti-trust aspects of the transaction, but left the matter entirely to the Dept. of Justice." It added: "The Commission's approval of the exchange under Sec. 310(b) in any event could not in any way curtail or affect the power of the United States to proceed under the anti-trust laws; nor was the Dept. of Justice required to participate in or institute proceedings before the Commission before resort to the courts."

TEMPEST OVER TV COVERAGE of House Un-American Activities Committee hearings in San Francisco threatened this week to erupt into major Congressional storm over authority of 2 of the most powerful men on Capitol Hill.

At issue in unique clash between Speaker Rayburn (D-Tex.) and Committee Chairman Walter (D-Pa.), longtime friends & legislative collaborators, was question of whether House rules forbid TV cameras at any proceedings—anywhere.

Rayburn, whose word on procedure almost always is taken for law on Hill, said they do. Openly defying him, Walter said they don't—at least outside Washington—and went right on with San Francisco hearings televised locally by KRON-TV & educational KQED.

After 3 days of increasingly angry edicts against TV by Rayburn—and continuing flouting by Walter of Speaker's previously unquestioned interpretation of rules—it looked like Walter might be inviting contempt of Congress charge which he often uses against balky witnesses. Rep. Cannon (D-Mo.), top House parliamentarian, said June 21 that contempt citation against Walter was possible.

Meanwhile, in hurry-up effort to resolve issue, Rep. Scott (R-Pa.) introduced bill (H. Res. 282) June 20 "to provide equal access for all news media before proceedings of the House." Rep. Meader (R-Mich.) took floor next

day to demand that committees themselves exercise discretion. Similar legislation specifically allowing TV-radio coverage (H. Res. 31 & 32) was introduced by Rep. Griffiths (D-Mich.) early in session (Vol. 13:3), but has made little legislative progress.

Basis of Rayburn's rulings, first laid down in 1952, was that House regulations don't authorize TV either on floor or in committee sessions—and therefore forbid it. (Senate permits TV coverage of committees.) Un-American Activities Committee sessions haven't been televised in Washington, but Walter has okayed—if not welcomed—TV at hearings elsewhere.

Rayburn said he hadn't heard about Walter's out-of-town TV practice until he read about suicide of biochemist Wm. Sherwood, who had been subpoenaed in San Francisco inquiry into Communist infiltration of professional groups. Sherwood left note which said he had "fierce resentment of being televised."

Sen. Goldwater (R-Ariz.), paid own TV way to accept challenge from United Automobile Workers for debate on propriety of unions spending dues money for political broadcasts. Backing up his contention that such expenditures are "morally wrong," Goldwater insisted on putting up \$1000—\$780 for half of TV time, \$220 for personal expense—following appearance last week on WIBK-TV, Detroit, with UAW v.p. Leonard Woodcock on union-sponsored show.

Personal Notes: Eugene C. Wyatt promoted to national sales mgr. of ABC-TV, Henry Hede to eastern sales mgr., John Fitzgerald to sales service director; Henry W. Cox resigns as General Mills TV-radio programming mgr. to rejoin ABC-TV as national program sales mgr. . . . Ted Cott resigns as v.p. & gen. mgr. of DuMont Bcstg. Corp., for which he was v.p. & gen. mgr. of WABD, N. Y. & WTTG, Washington, to join NTA in executive capacity . . . Lucian Davis named exec. producer of CBS Radio programs, Hollywood . . . Robert L. Lamb, sales mgr. of Crosley Bcstg.'s Chicago office, July 1 becomes sales mgr. of upcoming WLWI, Indianapolis (Ch. 13), due in Sept. . . . Alfred N. Greenberg, ex-radio WBBM, Chicago, named advertising, promotion & research director of Teleprompter Corp.; Robert Rosencrans, ex-Sheraton Closed Circuit TV, business mgr. of sales dept.; Frank W. Noble, ex-Studebaker-Packard, Detroit area mgr. . . . Joseph R. Rastatter, ex-CBS-TV, named public relations director of TvB, succeeding Sid Mesibov, resigned to join ABC-TV as director of special exploitation projects . . . Earle J. Gluck elected chairman of WSOC Bcstg. Co., Charlotte, succeeded as pres. by exec. v.p. Larry Walker; George Henderson, gen. sales & promotion mgr. of WSOC-TV, named exec. v.p. . . . James R. Bonfils, ex-KTVI, St. Louis, named station mgr. of WTTG, Washington, succeeding James Anderson, transferred to DuMont's N. Y. office . . . Will Darch promoted to commercial mgr. of WSBT-TV & WSBT, South Bend; Jim Halpin named promotion mgr. . . . Joseph E. (Jay) Faraghan, ex-WGN-TV, Chicago, named program director of WFLA-TV, Tampa-St. Petersburg; John Alexander, ex-radio KODY, North Platte, Neb., named mgr. of WFLA . . . Willard (Bill) Fraker, ex-WJHP-TV, Jacksonville, named local sales mgr. of upcoming WFGA-TV, due on air there late in summer . . . Joe Evans named national sales mgr. of KFJZ-TV, Ft. Worth, succeeding Dale Drake; Bill Terry succeeds Evans as local sales mgr. . . . Aaron Boe, from KVAL-TV, Eugene, Ore., named station mgr. of satellite KPIC, Roseburg, succeeding Gene Pierce, who returns to KVAL-TV . . . Wm. E. Daley named local sales mgr. of WTCN-TV, Minneapolis-St. Paul, succeeded by Jack Cosgrove as local sales mgr. of radio WTCN; Robert Sampson, ex-radio WSAI, Cincinnati, becomes gen. sales mgr. of WTCN . . . Leo Dekker named production mgr. of WSOC-TV, Charlotte . . . A. Richard Robertson, ex-*Television Age* & KSL-TV, Salt Lake City, named sales development, promotion & publicity director of KSBW-TV & KSBW, Salinas-Monterey, and KSBY-TV & KVEC, San Luis Obispo, Cal. . . . Dean McCarthy, program director of WITI-TV, Milwaukee, also named asst. to pres. Sol J.

Douglas Anello, from FCC's Safety & Special Radio Services Bureau, named NARTB chief counsel as of July 1, succeeding Robert Heald; Gordon L. Ward, ex-NBC stations, Cleveland, named an NARTB field representative.

Walter Kiernan, TV-radio personality, new pres. of Catholic Actors Guild, succeeding late Gene Buck. Pat O'Brien, film star, named v.p., succeeding late Gene Lockhart.

Sol Cornberg, director of NBC studio & plant planning for past 6 years, forms Sol Cornberg & Assoc. consulting service at 550 Fifth Ave., N. Y., effective Aug. 1.

Sir Kenneth Clark retires from chairmanship of Britain's commercial ITA when term expires in August; no successor named yet.

Forbes W. Blair, recently Asst. U. S. Atty. in D. C., joins Washington law firm of Welch, Mott & Morgan June 24.

Kahn; Leon Dolnick promoted to merchandise mgr. . . . Robert S. Schultis promoted to asst. commercial mgr. of WDSU-TV, New Orleans . . . Bill Walsh named head of TV dept. & mgr. of new Boston office of rep Edward Petry & Co. (Statler Office Bldg.) . . . Carlos Reese promoted to St. Louis mgr. of rep John Blair & Co. . . . Edward L. (Ned) Koenig Jr. promoted to sales v.p. of Hal Roach Studios . . . Lou Marget promoted to sales promotion supervisor of MCA-TV Film Syndication . . . Martin Low named sales v.p. of Robert Lawrence Productions . . . Joe Zimmerman promoted to sales promotion director of Triangle Publications Inc. stations in merger of TV-radio div. of company's adv. & promotion dept. with that of WFIL-TV & WFIL, Philadelphia . . . John H. Norton Jr., v.p. & gen. mgr. of WMTW, Poland Spring, Me. also named v.p. & gen. mgr. of radio WPOR, Portland, replacing Harold H. Meyer, resigned . . . Edward Kaylin, assoc. director of CBS Radio sales presentations, also named administrative mgr. of adv. & sales promotion dept. . . . Raymond C. Fox, ABC Film Syndication controller, awarded master of business administration degree by NYU . . . Edward G. Sherburne Jr., ex-educational WGBH-TV, Boston, and Ray J. Stanley, from U of Wis. TV lab, appointed program associates by Educational TV & Radio Center . . . Nat Wolff resigns as director of NBC-TV program planning, but will continue work with fall special, "Annie Get Your Gun" . . . Irving Waugh, who was to move to WSIX-TV, Nashville, remains at WSM-TV, promoted to gen. mgr. . . . Frank Effron promoted to production supervisor of KOTV, Tulsa.

Obituary

Frank A. Cowan, 59, asst. director of operations, AT&T Long Lines Dept., died at Lenox Hill Hospital, N. Y. June 21 after short illness. A distinguished engineer and inventor, he participated in many FCC hearings on TV transmission facilities. Native of Escatawpa, Ala., he joined Bell System in 1919. Surviving are his wife; brother James A. Cowan, AT&T Long Lines Dept. commercial development engineer.

A. Cledge Roberts, 52, with CBS as producer-director in 1945-46 and WPIX, N. Y. 1947-52, died June 14 of leukemia in N. Y. Also an actor, he had for last 7 years taught professional TV-radio at NYU, was director of its TV Workshop and an instructor at School for Radio Technique, N. Y.

Cyril Ouellette Langlois, 64, founder (in 1935) and chairman of Lang-Worth Feature Programs Inc., died June 18 at Doctors Hospital, N. Y. Surviving are his widow; 2 sons, pres. John D. Langlois of Lang-Worth and pres. Cyril O. Langlois Jr. of Langlois Filmusic; 2 sisters.

ADVERTISING AGENCIES: Clement W. MacKay promoted to exec. v.p. of Roy S. Durstine Inc. . . . John L. Zimmer, ex-Cunningham & Walsh, named TV-radio director of Wesley Assoc., with offices at 10 Rockefeller Plaza, N. Y. . . . Philip A. Young, ex-McCann-Erickson, named copy director of Campbell-Ewald TV-radio dept. . . . Wm. Ross named TV-radio mgr. of Harold F. Stanfield Ltd., Toronto.

NARTB radio board elects Merrill Lindsay, WSOY, Decatur, Ill. chairman, succeeding John M. Outler, WSB, Atlanta; J. Frank Jarman, WDNC, Durham, N. C. vice chairman, succeeding Herbert L. Krueger, WTAG, Worcester, Mass.

New regional TV-radio rep firm, Foster & Creed, Statler Office Bldg., Boston (Hubbard 2-4845), has been formed by Robert C. Foster, owner of R. C. Foster Co., and Wm. A. Creed, v.p.-mgr. of Walker firm Boston office.

FCC CONTINUED cleaning up tough petitions for reconsideration in major vhf cases this week. One of most important affected grant of WCKT, Miami (Ch. 7), which Commission reaffirmed this week after Court of Appeals had sent case back with severely critical language.

Losers in case had asked that WCKT be taken off air or turned over to trusteeship pending reconsideration, but Commission said it wasn't bound to do so in absence of specific orders from court. As for charges WCKT pres. Niles Trammell has divided loyalties because of consulting contract with NBC, which he once headed, FCC said that a demerit should be given. Another factor re-weighed was "diversification"—ownership of WCKT by Cox-Knight newspaper-radio interests in Miami.

Upshot, FCC said, was that WCKT remains so superior in experience, ownership-management integration, program plans, etc., that demerits are outweighed.

Commission turned down petitions for stay and reconsideration of grant of WLWI, Indianapolis (Ch. 13) to Crosley with unusual 3-3 vote, Comr. Craven abstaining, Comrs. Hyde, Bartley & Lee dissenting. Losers in case had objected to Craven's participation in final decision without having heard oral argument. Commission cited numerous cases to show nothing illegal or unfair was involved.

Efforts of Hartford Telecasting to overturn Ch. 3 grant to WTIC-TV were rejected—Commission finding little merit in allegations that WTIC-TV ownership (Travelers Insurance Co.) concealed efforts to influence

Conn. state legislation and that Travelers may be legally ineligible as a TV applicant because of state laws.

Initial decision for Cheboygan, Mich., Ch. 4, was awarded to Midwestern Broadcasting Co., owner of Traverse City's WPBN-TV, over local WCBY (R. E. Hunt). Examiner Basil P. Cooper cited Midwestern's "exemplary" operation of its 4 Michigan AM stations and its Paul Bunyan Network as outweighing WCBY's superiority in media diversification issue. He also favored Midwestern on grounds its proposed power and antenna height would bring first TV signal to substantially greater number of people than would WCBY's.

* * * *

Reply comments on Craven Plan to abandon allocations table (Vol. 13:23) amounted to 10 in favor of plan, 2 against—drastic drop from the 70-80 original comments. Where Commission once seemed almost certain to approve plan, final authorization now seems unlikely.

As expected, Commission issued rule-making proposal to keep Ch. 6 & 10 in Albany-Schenectady-Troy area and to add Ch. 13, giving WKTU, Utica, Ch. 2 (Vol. 13:24).

It issued final decisions denying petitions for reconsideration of deintermixture decisions affecting Hartford, Madison, St. Louis-Springfield & Evansville. It also finally denied proposal to add Ch. 5 to Columbia, S. C. One petition was received — to add Ch. 12 to Esthersville, Ia., sought by prospective applicant KGLO-TV, Mason City (Ch. 3).

CPs granted: Ponce, P. R., Ch. 7, to Ponce TV Partnership; Nacogdoches, Tex., Ch. 19, to East Tex. Bestg. Co. (Lee Scarborough). Ch. 71 translator was granted in Farmington, N. M.

Radio station sales approved this week: KFXD, Nampa, Ida. by Frank E. Hurt & Son Inc. (Edward Hurt, pres.) for \$277,000 to E. G. Wenrick Bestg. Co., 51% owned by E. G. Wenrick (also pres. & 29% of KBOE, Oskaloosa, Ia.), 49% by KFXD mgr. Kenneth Kilmer (Vol. 13:21) . . . WJHP, Jacksonville, by *Jacksonville Journal* (John H. Perry Jr.), operator of WJHP-TV & WESH-TV, Daytona Beach, for \$275,000 to Carmen (Jim) Macri (Vol. 13:14)—also Macri's sale of WQIK, Jacksonville, for \$150,000 to ex-WJHP employes Mr. & Mrs. Marshall W. Rowland, each with 25%, other 50% held by Mrs. Rowland's father T. Edison Casey (Vol. 13:16) . . . KLER, Lewiston, Ida. by Cole E. Wylie for \$160,000 to John M. Matlock (60%) and Eugene A. Hamblin (40%), who will dispose of local daytimer KOZE (Vol. 13:21) . . . KHEY, El Paso, (formerly KEPO) by John W. Stayton, Thomas Black & Frank Stewart for \$150,000 to co-equal owners Harvey R. (Ray) Odom, A. V. Bamford & E. O. Smith (Vol. 13:17); Odom & Bamford are co-owners of KHEP, Phoenix, and KMOP, Tucson . . . WDCL, Tarpon Springs, Fla. by J. M. & Margaret Miller and Hal & Beatrice Freede for \$59,500 to author-newsman Hodding Carter and associates John T. Gibson (with whom Carter owns WDDT, Greenville, Miss.), McClain Bowman and songwriter Floyd Huddleston . . . KORT, Grangeville, Ida. by Far West Radio Inc. (Hub Warner, pres.) for \$50,000 to Edward M. Brainard (Vol. 13:22).

Rumors of CBS-Westinghouse merger, circulated this week, were "flatly denied" by Westinghouse v.p. E. V. Huggins, while CBS pres. Frank Stanton said: "There is nothing to it."

Sale of CP for KDHS, Aberdeen, S. D. (Ch. 9) by Joseph E. McNaughton interests to North Dakota Bestg. Co. (John Boler) for \$2447 out-of-pocket expenses (Vol. 13:21) was approved by FCC.

Radio station sales reported this week: KVOE, Emporia, Kan. by Lyon County Bestg. Co. Inc. (Sherwood R. Parks, pres.) for \$83,500 to Edward J. McKernan Jr., ex-WIBW-TV, Topeka, who will own 90% and Charles N. Putt, also WIBW, 10% . . . WJIG, Tullahoma, Tenn. by Col. Raymond L. Prescott Jr. for \$70,000 to M. D. Smith, program director of WBRC-TV, Birmingham . . . WHBG, Harrisonburg, Va. by Rockingham Radio Corp. (Doris B. Brown, pres.) for \$65,000 to co-equal owners Robert C. Currie Jr. (operations mgr. of WXEX-TV, Petersburg, Va.) and Frederick R. Griffiths (operations mgr. of WJAR-TV, Providence, R. I.) . . . KPLS, Dallas, Ore. by Leland M. Tucker (51%) and Edward C. McElroy Jr. (49%) for \$45,000 to Grand Island, Neb. appliance distributor D. H. Meves, who also owns 3.6% of KHAS-TV, Hastings, Neb. . . . KWFC, Hot Springs, Ark. 75% by Walter E. & Betty P. Hussman for \$24,000 to Clyde E. Wilson, who will own 100%. Hussmans control *Camden* (Ark.) *News*, which owns 50% of KCMC-TV, Texarkana (Ch. 6). Brokers: WJIG & WHBG, Paul H. Chapman Co.

WKAB, Mobile, Ala. is being transferred to John E. & George D. Hopkinson, who will own 30% each (they are co-owners of radio sales rep Dwight & Assoc.) and Quentin C. Sturm, 30% (also to become 1/3 owner of Dwight & Assoc.), with present sole owner Mrs. Louise P. Pursley to retain 10% of voting stock and remain a director. WKAB-TV (Ch. 48) was on the air from Dec. 29, 1952 to Aug. 1, 1954, and Pursley Bestg. Service Inc. "became so heavily indebted that it was not able to pay its outstanding debts." Under new ownership, \$50,000 is to be deposited to secure assignment of claims totaling \$323,004, settlement to be on basis of 15.2% of monies owned. Dwight & Assoc. is to loan WKAB \$15,000 to meet current accounts receivable, accumulated since last fall, and the 3 new owners are to advance total of \$15,000.

MORE DELAY in FCC's subscription-TV proceedings seemed probable at week's end as Commission was confronted with 2 petitions asking that provision be made for filing of replies to comments on its request for specific pay-TV proposals. Petitions came from NARTB and movie exhibitor-controlled Joint Committee on Toll TV.

Commission is due to consider the requests at June 27 meeting. Unless it plans to push for disposition of pay-TV test issue before its Aug. recess—which is unlikely—it can be expected to permit moderate amount of time for the pay-TV replies, which are due by July 8.

NARTB's petition stated that under its present order, FCC would receive only proposals of parties in favor of fee-TV tests and opponents wouldn't be permitted to analyze and review them. NARTB and other opponents obviously want to point out to FCC the portions of the comments which they consider to be improper and impractical. A delay of 2 weeks wouldn't hamper proceedings which have been under way for 2½ years, said NARTB.

Joint Committee on Toll TV raised same points, adding: "Although the Commission undoubtedly has the legal authority to proceed without affording an opportunity to file reply comments, such action, to the best of our knowledge, is completely without precedent." Committee suggested minimum of 60 days after July 8 for reply comments.

First actual comment in response to FCC's request for fee-TV proposals came from WDSM-TV, Duluth (Ch. 6), praising Commission's cautious approach, and stating: "It appears to us that the free TV industry already is hard pressed to fill the TV hours with top programming. Anything that complicates this problem may be a severe blow

to the continuation of good TV as envisioned by the FCC and all broadcasters."

NARTB TV board, meeting in Washington this week, passed resolution reaffirming strong opposition to pay-TV tests and authorized pres. Harold E. Fellows to name 3-man committee to oppose toll-TV proposals. Fellows named C. Payson Hall, Meredith stations; C. Wrede Petersmeyer, Corinthian stations, and W. D. (Dub) Rogers, KDUB-TV, Lubbock, Tex. Both TV & radio boards voted to participate in a fact-finding study of Bartlesville, Okla. wired pay-TV project.

In Bartlesville, meanwhile, Video Independent Theatres planned to launch all-out drive for subscribers to its "home theatre" project beginning next week end, utilizing virtually all media, including TV, radio, film trailers, direct mail, bumper strips, etc. Eventual goal is 3-4000 subscribers in the city of 38,000. GPL equipment is due to arrive July 15, with programming scheduled to start Aug. 1.

Paramount's International Telemeter plans to have closed-circuit systems in operation in 2-3 locations by year's end, according to v.p. Paul McNamara, who said it would cost about \$100 per installation (wiring and coinbox attachment), as opposed to \$400 per seat cost of constructing new theatre. He revealed that Telemeter plans "free" programming via its closed-circuit from 9 a.m. to 7 p.m., followed by pay movies in evening. He suggested that Telemeter exhibitors sell time to local merchants during "free" period—a sideline which they will find "better than even popcorn."

A. H. Belo Corp., publisher of *Dallas News* and owner of WFAA-TV & WFAA, applied to Highland Park, Tex. town council for franchise to operate closed-circuit TV system there, and theatre groups applied this week in Garden City, Manhattan & Great Bend, Kan., San Angelo, Wichita Falls & Laredo, Tex.

"It is not unreasonable to conclude then that, if the broadcasting spectrum space available is too little to serve our needs, wired communications systems will cease to be only convenient; they will be an absolute necessity not only from a straight communication viewpoint but also as a national defense requirement. All of this wiring we have been so blithely doing, however, has serious economic consequences and with present day equipment it possibly may be too costly . . . I believe that the community system of the future will look something like this: I see a very small diameter cable using new materials and having very low loss; it is radiation free and can be mounted on poles without the use of messenger wire. In the middle of a span I see a compact, cable-supported housing with one connector at each end showing—in fact, the housing is hard to spot because it is the same color as the cable. This housing I have described is a miniaturized amplifier of about 20 db of gain; it has a 500 mc bandwidth. Its response is shaped to the characteristic of the cable and in addition it has temperature-controlled equalization circuits. Automated level controls of a precise nature keep the levels in the amplifier and system constant—summer, winter, spring and fall. It is powered by an atomic battery and is hermetically sealed against the elements. Alarm circuits feed a control central point, so that any trouble is instantly pin-pointed. Servicing is limited to a once-a-year check of the atomic battery; if something really fails in the amplifier it is so cheap that it is more economical to throw the amplifier away than to try to repair it. At various points in the system, small boxes are mounted on poles near the ground into which can be plugged a camera or microphone for remote pickup purposes, and I am sure the fixed camera mounted at specific points and at every

major street intersection will become as commonplace as the red fire alarm box."—Fitzroy Kennedy, chairman, Spencer-Kennedy Labs, at NTCA convention, Sheraton Penn Hotel, Pittsburgh, June 4-6.

Opposition to any changes in FCC allocation system for educational TV and to proposals for extending station license terms from 3 to 5 years was expressed June 20 by American Civil Liberties Union. "Diversity of opinion on air" would be lessened if educational channels become available to commercial stations, ACLU exec. director Patrick Murphy Malin wrote chairman Pastore (D-R. I.) of Senate Commerce communications subcommittee and chairman Harris (D-Ark.) of House Commerce Committee. Malin said longer license period might cause stations to neglect their "public interest" obligations.

Networks hotly denied charges by Authors League of America and its pres. Moss Hart that they imposed news "blackout" on Celler subcommittee's TV report (Vol. 13:24). CBS pres. Frank Stanton called ALA charge "scandalous" and "wholly untrue," citing TV-radio news programs which gave the report coverage and pointing out that network exercises no censorship. ABC also denied any censorship, pointing out that play of news is entirely up to news editor on duty. NBC didn't indicate whether it replied to wire, but stated that it covered the report in its TV-radio newscasts.

CBS-TV started construction of big new Hollywood TV City facilities this week. Scheduled for completion late in 1958, additions include 2 studios with 14,100-sq. ft. floor area, 7 rehearsal halls, schoolroom for child actors, 8-story building housing west coast offices.

Telecasting Notes: Is TV following movie industry pattern of concentrating business and financial operations in New York and production in Hollywood? *Billboard* says it is—not in the far future, but next season. Documenting program-origination breakdown in its June 17 issue, publication reports 70% of network TV programming during prime evening hours next season will originate from Hollywood, 25% from New York. Split was 54-46 last season . . . Factors responsible for TV's westward migration, notes *Billboard*, are increased use of film and expansion of NBC-TV's Burbank studios, together with planned expansion of west coast facilities by both CBS-TV & ABC-TV, latter network announcing that 85% of its programming will originate from Hollywood next fall . . . Network sponsors are advised to insist on one-price policy—with no extras—in negotiating for time-&-talent packages, in June 17 *Advertising Age* editorial. Sponsors are urged to oppose "price increases" based on: (1) line charges, which should be borne by network & stations; (2) profits on programs owned or controlled by networks; (3) union wage-increase clauses in advertising contracts; (4) additional studio charges . . . TV gets biggest share of Florida Citrus Commission's record 1957-58 consumer ad budget of \$4,400,000. Earmarked for TV is \$2,145,100, compared with \$1,740,000 for current season; newspaper advertising is being increased from \$477,830 to \$627,300 but radio budget will be cut sharply . . . Big daytime sale: NBC-TV announces orders by Mentholatum and Star-Kist Foods for gross of \$1,500,000 worth of 5 daytime programs . . . Harry Truman, who was TV host on guided tour of White House during his presidency, returns to similar role June 30, when he guides CBS-TV viewers through Truman Library in Independence, Mo., on *Let's Take a Trip* . . . First Met Opera star to have own TV

show will be Patrice Munsel, who will be hostess on Fri. 8:30-9 p.m. ABC-TV variety show beginning Oct. 18; program will concentrate on Broadway show tunes and popular songs, according to network . . . Colgate has renewed its sponsorship of MGM features on Los Angeles' KTTV for another year—the deal which set pace for national advertisers' purchases of big blocks of first-run feature programming (Vol. 12:46) . . . Film programming coup: Don Whitehead will dramatize his best-selling book, *The FBI Story*, as 30-min. filmed series for CBS-TV, and there's at least the implication that Hoover himself may introduce some or all of the episodes . . . Twelve brand-new syndication properties will be on market by fall, reports June 19 *Variety*—just twice the number available last season . . . Sale of *Sgt. Preston of the Yukon* series and rights for \$1,500,000 to Jack Wrather and John Loeb by Trendle-Campbell interests, same principals involved in sale of *Lone Ranger*, has been completed, through broker Allen Kander & Co. . . . Some 18 NBC film shows are now being beamed from foreign TV stations, CNP reports . . . Pat Weaver negotiating with comic Lou Costello for possible 30-min. comedy series on his new network . . . Wide Wide Europe: Eurovision viewers last week end watched divers at work on bottom of Mediterranean in exploring and salvaging operations, in live pickup originated by French TV . . . Ed Sullivan joins trend to shared sponsorship, Lincoln dropping out of CBS-TV program after 8 years; Mercury retains half sponsorship, with at least 4 advertisers expressing interest in snapping up other half . . . Hal Roach Studios takes over distribution rights to some 1150 Warner Bros. shorts from AAP, to expand them into 30-min. TV film series . . . Storer's 5 stations have concluded \$1,000,000 deal with NTA for 136 features and five 30-min. series, biggest single film buy in chain's history.

Telestars Films Inc. is new TV film production and distribution firm formed by partnership of Seymour (Sy) Weintraub and producer Bernard L. Schubert. Company will syndicate 4 Schubert-owned shows—*Topper*, *Mr. & Mrs. North*, *Crossroads* and *TV Reader's Digest*. Ray Hamilton, formerly of Flamingo Films, is sales mgr. of new firm, which claims to have \$12,000,000 in financing available. Firm plans several new properties, with syndication due next fall for *White Hunter*, which also will be offered to theatres in feature version. Company also plans to produce legitimate plays and to operate TV-radio stations, integrating Minneapolis' KMGM-TV (in which Weintraub owns 20%) and Weintraub's wholly-owned radio WKIT, Mineola, N. Y., into the operation. Schubert will become chairman of Telestars, Weintraub pres. Weintraub recently sold his interest in Flamingo Films Inc. and severed his connection with the firm (Vol. 13:24), David L. Wolper taking over his former post as exec. v.p.; Joseph Harris continues as Flamingo pres., denying trade reports that he is leaving the company. Parent company of Flamingo, Essex Universal Corp., has purchased controlling stock interest in Continental Thrift Co., a California industrial loan institution, and Concord Securities Inc., N. Y. brokerage firm. Flamingo this week announced plans to produce at least 2 new pilot films a year for national sales, and to acquire additional series for syndication. Wolper said conversations have been held with other distributors as to advisability of consolidating sales, shipping and servicing facilities "similar to the method currently being used by major motion picture firms."

Five new color programs will be introduced week of June 29 by NBC's WRCV-TV, Philadelphia. Local 30-min. shows include *Concept*, presented in cooperation with U of Pa., and *Young Citizen* under municipal auspices.

Robert E. Sherwood TV Awards by Fund for the Republic for best network programs on freedom & justice theme were won June 19 by CBS for "Clinton & the Law" on *See It Now* (Edward R. Murrow & Fred Friendly) in documentary category and "Island in the City" on *Climax* (writer Adrian Spies, director Buzz Kulik, producer Edgar Peterson) in drama category. Each award carried \$20,000 prize. Judges deemed no nomination merited \$15,000 award for best program on independent station; instead, prize was split equally among 3 N. Y. stations: CBS' WCBS-TV for *Camera Three*, NBC's WRCA-TV for *Open Mind*, DuMont's WABD for *Night Beat*. Honorable mentions were won by "The Puerto Rican Story" on *See It Now*, "Error in Judgment" on *Armstrong Circle Theatre* (NBC), "The Family Nobody Wanted" on *Playhouse 90* (CBS), "Portrait of a Citizen" on *Studio One* (CBS).

Rate increases: XETV, Tijuana-San Diego, July 1 raises base hour from \$700 to \$800, min. \$140 to \$180. KVOS-TV, Bellingham, Wash. Aug. 1, hour \$435 to \$550, min. \$108 to \$137.50. KTBS-TV, Shreveport, July 1, hour \$400 to \$500, min. \$100 to \$125. WPTZ, Plattsburgh, N. Y. July 1, hour \$300 to \$400, min. \$60 to \$80. KID-TV, Idaho Falls, July 1, hour \$200 to \$225, min. \$45 to \$50. CFCM-TV, Quebec City, has raised hour from \$460 to \$475, min. \$92 to \$100. CJON-TV, St. John's, Nfld. July 1, hour \$200 to \$230.

Network radio leads other principal media in cumulative national advertising gain of 11% between April 1956 and April 1957, according to June 21 *Printers' Ink*. In same period, business papers had 8% increase, network TV 7%, magazines 2%, while newspapers fell 1%. Network radio gained 3% in April over March this year, business papers 2%, magazines 4%, while network TV & newspapers held steady.

Notes on Upcoming Stations: WPST-TV, Miami (Ch. 10), plans July 10 test patterns, Aug. 1 programming with ABC-TV, reports gen. mgr. Walter M. Koessler for owner National Airlines (G. T. Baker, pres.). It will have 50-kw RCA transmitter at Miami antenna farm on Honey Hill Dr., having purchased land, tower & studios of WGBS-TV (Ch. 23) when Storer took latter off air (Vol. 13:14). RCA 12-bay antenna is to be installed July 1 on 900-ft. Blaw-Knox tower formerly used by WGBS-TV. It's remodeling WGBS-TV studios at 316 N.E. 21st St., plans to have new studio bldg. ready Nov. 1. Koessler, ex-WGBS-TV, will have Jack Barry as production mgr. and Wm. R. Needs as chief engineer, both from WGBS-TV. Base hour will be \$825. Rep will be H-R Television.

KSPR-TV, Casper, Wyo. (Ch. 6) now doesn't expect to meet June 20 target for programming with CBS-TV, writes owner-gen. mgr. Donald Lewis Hathaway, although it has 5-kw DuMont transmitter on hand and 3-bay GE antenna installed on 300-ft. tower of radio KSPR. It will be 2nd outlet in town, where KTWO-TV (Ch. 2) began March 1. Marcus R. Nichols, from radio KSPR, will be national sales mgr., with Richard Frech local sales mgr. Base hour will be \$120. Rep will be Walker.

KTVG, Ensign, Kan. (Ch. 6) hasn't set programming target, but has GE 5-kw transmitter installed at site 20 mi. SW of Dodge City, also has 6-bay antenna installed on 600-ft. Liberty tower, reports Wendell Elliott, v.p.-gen. & sales mgr. & 5.65% owner. It hopes to have GE microwave relay system to Stafford, Kan. ready shortly to pick up ABC-TV affiliate KAKE-TV, Wichita. It also has signed with CBS under Extended Market Plan. Hershel Holland, from radio KGNO, Dodge City, will be program mgr. Base hour will be \$100. Katz is rep for KAKE-TV.

Power increases: WCHS-TV, Charleston, W. Va. (Ch. 8) June 19 to 158-kw ERP; KRGV-TV, Weslaco, Tex. (Ch. 5) June 16 to 100-kw; KTVH, Hutchinson-Wichita, Kan. (Ch. 12) now radiating 316-kw; KFEQ-TV, St. Joseph, Mo. (Ch. 2) 100-kw.

WISN-TV, Milwaukee (Ch. 12) & WISN moved June 17 to new \$1,250,000 Communications Center at 19th & Wells Sts. (Division 2-3000).

RCA shipped 25-kw amplifier June 19 to WTPA, Harrisburg, Pa. (Ch. 27) which plans boost to 1030-kw.

Educational WYES, New Orleans (Ch. 8) has moved to permanent quarters at 916 Navarre Ave.

TOP-LEVEL STUDY of govt. use of frequencies suitable for TV-radio was proposed this week by Sen. Potter (R-Mich.) in resolution (S. J. Res. 106) to set up 3-man investigating commission with power to study all allocations of radio frequencies. Similar resolution (H. J. Res. 381) was introduced in House by Rep. Bray (R-Ind.).

Commission on the Allocation of Radio & Television Frequencies, composed of experts in communications field, would be appointed by President for 6-month period "to conduct a thorough and comprehensive study and investigation of radio and TV frequencies allocated to the various agencies and instrumentalities of the Federal Govt. with a view to determining (1) whether such frequencies are being efficiently utilized to the maximum degree possible, (2) whether any (and if so, how much) of such frequencies may, without jeopardizing the public interest, be relinquished to the FCC for allocation to non-governmental purposes, and (3) what are the likely future requirements of [the] Federal Govt. for radio and TV frequencies."

Explaining his bill, Potter said: "Terrific pressure is building up for radio and TV frequencies. Commercial users accuse the Govt. of hogging spectrum space. Federal agencies claim they need what they have. A thorough review is in order to determine whether these frequencies are used efficiently and to a maximum degree. We may find that some of these frequencies could be relinquished to the FCC for non-governmental use without jeopardizing the public interest."

Bill is given good chance of getting favorable report from Senate Commerce Committee, of which Potter is member—if Committee can fit it on its crowded calendar and if military doesn't actively oppose it. It would provide first study of military uses of spectrum to be made by a non-government body.

Engineers' strike by IBEW members put WPIX, N. Y. off air 7 hours June 15 during negotiations for new contract. Engineers went back to work when agreement was reached on new contract, terms of which were not disclosed.

New radio format—nighttime *Program PM* running 2 hours with "lateral programming" of national & local features—will start June 24 on Westinghouse stations. Sales plan tied to shows 7 nights a week will offer cost-per-thousand rates lower than daytime at each station, idea being to attract advertisers & agencies which have been passing up nighttime radio. Westinghouse Bestg. Co. pres. Donald McGannon told N. Y. press luncheon this week that 80% of *Program PM* will be local, 20% originating from N. Y., emphasizing behind-the-scenes news & entertainment. Stations participating are KDKA, Pittsburgh; KYW, Cleveland; WBZ, Boston; WBZA, Springfield; WOWO, Ft. Wayne; KEX, Portland, Ore.

NARTB survey shows 77% of 226 programs monitored used no more than half of time which TV Code allows for "participating" commercials. Wm. B. Quarton, WMT-TV, Cedar Rapids, Iowa and chairman of TV Code review board, said that survey covered feature-length films on 49 stations in 24 cities; that no violations were found of permitted one min. advertising to 5 min. programming; that average number of commercials per show was 3.6; that 52% were no more than 1½-min. long; that 43% were 1½-2½ min. Covering only stations subscribing to TV Code, survey was confined to participation programs. Quarton said survey revealed about 90% of feature films have participating sponsors.

Anti-trust conviction of *Kansas City Star* on criminal charges that it monopolized news & advertising (Vol. 13:4-5) was upheld June 17 by Supreme Court, clearing way for Govt. to proceed with civil suit against newspaper demanding that it dispose of its WDAF-TV & WDAF. In brief order, Supreme Court refused to hear appeals by *Star* (fined \$5000) and adv. director Emil A. Sees (fined \$2500) for hearing. Negotiations for sale of stations for \$10-\$12,000,000 have been reported (Vol. 13:21).

NARTB wound up semi-annual board meeting June 21 in Washington, took these actions: (1) Backed resolution introduced by Sen. Potter & Rep. Bray for inquiry into govt.'s utilization of its TV-radio frequencies. (2) Authorized NARTB to file briefs in any litigation to establish property rights in TV-radio programs. (3) Approved NARTB filing of comments on useful life expectancy of depreciable property with Internal Revenue Service.

OPTIMISM, 'SLIM LOOK,' GADGETS, COLOR: Here are the four themes that stood out as we chatted with manufacturing topkicks and inspected their 1958 lines displayed to public for first time at Chicago's Merchandise Mart this week:

(1) Growing confidence -- that's the best description for set makers' calculations for fall season. Main reasons given are favorable inventory position, now at 2-year low (Vol. 13:24), and "slim look" styling which gives dealers a major and easily discernible change to talk about.

Firm fall market with profits for manufacturers, distributors & dealers was picture painted for us by Sylvania TV-radio sales mgr. Robert L. Shaw. Saying that "profits are created by the mix of sales," he opined "there is no tremendous market for sets selling over \$300." He estimated that a third of this year's production would be portables retailing at \$170-\$180.

"Good second 6 months" was the word from Philco marketing v.p. John M. Otter at Merchandise Mart news conference. He sees retail sales of 6,500,000 to 7,000,000 TV sets for the full year -- which fits in well with the 6,750,000 average we got from talking to a number of manufacturers. He said TV set makers "probably are going to have a very successful year."

To emphasize that prospect, another manufacturer disclosed to us his researchers' estimates that industry would move 65-70% of this year's production in last 6 months, compared with "normal" 60%.

(2) "Slim look" was apparent everywhere -- even in corridors where Sylvania had 2 willowy models in white evening gowns promenading with "Sylvania Slimline" actually painted on their backs.

Nearly every setmaker showing at Mart made some use of 110-degree tube to achieve shallow effect. RCA, GE-Hotpoint, Admiral & Sylvania are using 110's exclusively -- with exception of RCA 14-in. portable which uses short-neck 90-degree.

Westinghouse has 110-degree in more than half its line, Philco in its 17-in. portable & table models, DuMont in low-end sets. Only Zenith has no 110-degree tubes in line -- using instead short-neck, straight-gun 90-degree "Sunshine" tube. Motorola's new models won't be shown until July 18 at Chicago's Blackstone Theatre.

Growing conversation piece and controversy is variation in application of 110-degree tube. Only RCA & Admiral have it completely enclosed in consoles. GE-Hotpoint, Westinghouse & Sylvania have retained 1-2-in. cup or "doghouse" which permits even slimmer cabinet. Talk we heard revolves around heat and ventilation. Spokesmen for one school hold that only slight air space between wall and set is needed while those with cup say it keeps set proper distance from wall.

(3) Remote-control and automatic-tuning devices are getting more emphasis than ever -- something like auto industry's push on power steering, power brakes, etc. They're highly demonstrable -- and they were shown off continuously by Admiral, Westinghouse, Sylvania & GE-Hotpoint.

Westinghouse's remote-control unit seems unique. It plugs into any electric outlet, sends channel-changing impulse over house circuit. Gen. sales mgr. Tom Kalbfus told us it can be adjusted to control any one of 4 TV sets on same circuit. If set is on different circuit, connection can be made at fuse box.

One casualty of styling is full-door console. Among major-brand receivers -- with exception of RCA color -- only model displayed with full doors was GE lowboy.

(4) While no special emphasis was placed on color by most manufacturers, we did notice that largest crowds generally were found at RCA color demonstrations. Sylvania's Shaw told us he felt color sets would have to drop to \$400 before they

would go over with public -- and he said no such cut was in sight. Philco's Otter couldn't see any great advance in color sales this year or next, estimating this year's sales would fall in the 200,000-250,000 range.

With RCA reporting 5-6 major manufacturers planning to emphasize color this fall (Vol. 13:23-24), we sounded out representatives at Marts and found these to be likely candidates: Admiral, Motorola, Westinghouse, Sylvania, Hoffman, Packard-Bell.

Business Pulse: Giving support to TV manufacturers' optimism (see above) are (1) National Assn. of Purchasing Agents estimate of business as "steady and good"; (2) U.S. Chamber of Commerce panel's prediction that year's second half will generally be as stable as first half, with prices continuing to climb.

NAPA's business survey committee bases its findings on June reports of members -- with some terming situation "nice"; no boom-time pressures are present; new orders, production, profits are satisfactory. Drive to reduce inventories continues, they say, with few purchases being made to "beat" anticipated higher prices. Slight over-all employment improvement was reported.

C-of-C position was enunciated by Dr. Emerson P. Schmidt following its semi-annual panel meeting on business outlook. Research director Schmidt gave this summary of the panel's views: Prospects "look favorable" for year being country's best; employment and income continue at high levels; gross national product should reach \$440 billion -- up \$28 billion from last year's record level. Panel members include: Wm. A. McDonnell, First National Bank, St. Louis; John S. Coleman, Burroughs Corp., Detroit; George Hansen, Chandler & Co. (dept. store), Boston; Fred I. Rowe, W.L. Johnson Construction Co. & Assoc., Columbus; J.H. Carmichael, Capital Airlines.

Production: TV output was 116,302 week ended June 14, compared with 90,655 preceding week and 117,423 in corresponding week one year ago. It was the year's 24th week and brought TV production for year to date to about 2,445,000, compared with 3,193,992 in same period of 1956. Radio production totaled 229,967 (86,270 auto) week ended June 14, compared with 237,106 (96,523) the preceding week and 240,509 (67,321) in corresponding week year ago. Radio output for 24 weeks totaled about 6,734,000 (2,660,000) vs. 6,229,655 (2,195,148).

Trade Personals: Albert F. Watters, RCA International div. v.p.-operations mgr., resigns to become General Foods v.p.-personnel . . . Jack C. Houseman, ex-Admiral, appointed asst. sales mgr., Packard-Bell home products div. . . . J. Calvin Affleck, ex-DuMont, appointed adv. and sales promotion mgr., Keasby & Mattison, Ambler, Pa. asbestos products mfr. . . . Dick O'Brien, ex-DuMont New England TV receiver div. mgr., appointed Ampex Audio eastern zone mgr. . . . Joe E. Morin promoted to gen. sales mgr., Howard W. Sams & Co., succeeding v.p.-sales J. C. Keith who resigned but will continue as consultant . . . Richard M. Fielding promoted to public information mgr., Philco govt. & industrial div.; Robert W. Fuehrer, ex-Oil Industry Information Committee, joins public relations staff . . . Robert E. Zollars, ex-Shure Bros., RCA & Zenith, named General Instrument midwest regional sales mgr., Chicago . . . Bernard E. Narin, ex-Raymond Rosen & Co., elected Jerrold Electronics treas., succeeding Simon Pomerantz, who continues as secy. . . . Louis R. Burroughs, Electro-Voice chief engineer, elected v.p. for broadcast & recording equipment . . . Morton G. Scheraga promoted to DuMont instrument product mgr., replacing E. G. Nichols, resigned . . . Frank M. Hickey promoted to CBS-Hytron northeast regional sales mgr., headquartering in Newark.

Condition of Dr. W. R. G. Baker, RETMA pres. and GE v.p., is described as "satisfactory" following arterial spasm June 9, spokesman saying he has shown improvement this week. No indication how long he will remain at Ellis Hospital, Schenectady.

Hoffman introduced 16-basic-model 1958 line at Las Vegas distributor convention June 18. Sets feature "Black Easy-Vision" lens and "Neutrex" light shield—said to offer greater brightness & contrast—automatic tuning, wireless remote control. Only 110-degree tube listed is 17-in. "Move-about Furniture/17" (Vol. 13:19), priced at \$170-\$180. Rest of line is conventional 90-degree: 14-in. portable, no list; 21-in. table, \$210-\$280; 21-in. console, \$270-\$380; 24-in. console, \$340-\$395. Three 21-in. color sets are priced \$745-\$795.

Westinghouse TV prices, about 10% higher than last year's (Vol. 13:24), include: Portables—14-in. short 90-degree, \$130-\$150; 17-in. short 90-degree, \$150-\$170; 17-in. 110-degree, \$170-\$180; Deluxe series, table & console, \$200-\$330; Custom, 110-degree tubes, table \$240-\$270, console \$300-\$400. Prices will be slightly higher in south and west; uhf-vhf available at \$20-\$30 extra. All available in Aug.

Westinghouse expects 40% of its tube production capacity to be 110-degree 17-in. & 21-in. sizes by year's end, says R. T. Orth, v.p. & gen. mgr., electronic tube div., adding that production of other sizes is "contemplated if demand warrants it." Noting trend to new tube, he predicts its production will account for 75% of total turned out by end of 1958, virtually 100% by early 1959.

Excise tax bill retaining most present rates and imposing 10% manufacturers' levy on home tape & wire devices (Vol. 13:18-19) was passed finally by House June 20 and sent to Senate, where action is not expected until next year.

Topics & Trends of TV Trade: Shipments of TVs to dealers totaled 1,787,346 in year's first 4 months, when production was 1,835,975, according to RETMA state-by-state report. They compare with shipments of 2,059,129, production of 2,394,264, in first 4 months of 1956. New York again led with 204,095; California was second with 169,062; Pennsylvania was third, 121,908. April shipments were 329,710, compared with 535,310 in March and 356,893 in April 1956. Here's first 4 months' report (county-by-county tables available to RETMA members):

State	Total	State	Total
Alabama	27,942	New Hampshire	4,491
Arizona	10,677	New Jersey	63,513
Arkansas	16,430	New Mexico	7,372
California	169,062	New York	204,095
Colorado	15,812	North Carolina	36,169
Connecticut	29,335	North Dakota	6,279
Delaware	4,084	Ohio	100,122
District of Columbia	18,226	Oklahoma	18,933
Florida	66,317	Oregon	19,732
Georgia	36,479	Pennsylvania	121,908
Idaho	6,072	Rhode Island	9,102
Illinois	102,717	South Carolina	15,477
Indiana	43,475	South Dakota	6,356
Iowa	19,671	Tennessee	32,561
Kansas	19,894	Texas	100,373
Kentucky	31,060	Utah	7,907
Louisiana	34,764	Vermont	3,578
Maine	9,263	Virginia	30,013
Maryland	25,338	Washington	27,509
Massachusetts	51,930	West Virginia	19,278
Michigan	67,148	Wisconsin	29,460
Minnesota	25,454	Wyoming	4,152
Mississippi	17,200		
Missouri	39,905	U. S. Total	1,782,480
Montana	9,969	Alaska	1,244
Nebraska	13,172	Hawaii	3,622
Nevada	2,704	Grand Total	1,787,346

GE will enforce "Fair Trade" laws on its small home appliances and radios "to the extent permitted by law," Wm. H. Sahloff, v.p. and gen. mgr. of housewares and radio div., stated June 19, adding that U. S. Court of Appeals' dismissal of injunction against Masters Mail Order Co. of Washington would be carried to Supreme Court. Original suit enjoined Masters from advertising and selling GE items below fair trade prices. Sahloff said that most states still have enforceable fair trade laws (D. C. & 14 states excepted); that 73% of GE retail sales are in fair trade areas; that most GE distributors and dealers favor fair trade laws; that GE intends to maintain fair trade policy as long as no better system is available. Meanwhile, Masters said all 7 N. Y. daily newspapers and WRCA-TV had refused to run ads offering GE appliances at below fair trade prices. Masters listed reasons given for rejection as: (1) Mechanical problems. (2) "Postponed until we can make up our minds what we are going to do about it." (3) Don't accept retail ads from beyond metropolitan area.

DISTRIBUTOR NOTES: Admiral appoints Wm. F. Prentice, ex-GE, Westinghouse and Crosley, regional mgr. for Davenport-Des Moines, Iowa; Omaha & Peoria . . . Zenith appoints Peter S. Taranto, ex-Magnavox, southeast district sales mgr. . . . Graybar appoints A. G. Taylor appliance sales mgr. for Youngstown, O. and Erie, Pa. areas; also named were these branch appliance sales mgrs.: T. J. Bell, succeeding Naylor at Harrisburg, Pa.; L. T. Jamison, Erie; T. J. LeClair, San Francisco; M. M. Owen, Oakland. L. V. Chase succeeds Owen as San Francisco appliance promotion mgr. . . . Empire State Wholesalers Inc., Troy, wins 1957 Sylvania distributor service award . . . Sylvania names John Spahr, Peaslee-Gaulbert Corp., Indianapolis, as Sylvania TV Distributor of the Year . . . Admiral Distributors Inc., 625 W. 54th St., N. Y., plans moving warehouse to Long Island City, showroom to central Manhattan . . . Philco names Pat Cocchiarale as mgr. of its Akron Firestone div.; Pat Cominsky succeeds him as appliance sales mgr., Philco Distributors Inc., Philadelphia.

ELECTRONICS PERSONALS: Col. Elmer L. Littell, ex-controller of Office of Chief Signal Officer, has assumed command of U. S. Army Signal Supply Agency, succeeding Brig. Gen. Wm. D. Hamlin, transferred to U. S. Army in Europe . . . Robert Barton promoted to Motorola military electronics marketing mgr. . . . Wm. P. Anderson, ex-Ford Motor, named Raytheon production programming mgr. . . . Arthur E. Rasmussen, ex-Congoleum-Nairn, joins Avco as v.p. & asst. to pres. . . . C. W. Creaser Jr. promoted to sales v.p. of D. S. Kennedy & Co., Cohasset, Mass. . . . George O. Crossland promoted to GE mgr., electronic parts distributor development and trade relations . . . Irwin W. Braun resigns as pres. of Circuit Instrument Inc., St. Petersburg subsidiary of International Resistance Co. . . . John E. Lillich promoted to mgr. of product engineering, Corning Glass Works electronic components sales dept., electrical products div. . . . John F. Eaton, ex-Eastern Air Devices, named United States Dynamics Corp. sales mgr. . . . Vinton D. Carver, ex-Farnsworth div. of IT&T, joins Litton Industries as mgr. of new Salt Lake City plant.

International Resistance reports net income of \$204,262 (16¢ per share) on \$6,299,256 sales in 20 weeks ended May 19, compared with \$47,927 (4¢) on \$6,413,573 in similar 1956 period. Pres. Charles Weyl said higher earnings on lower sales were due to diversification and decentralization program. Smaller sales were attributed to drop in TV and auto demand, uncertainty of govt. orders due to federal budget disputes.

Belock Instrument reports net loss of \$280,450 on sales of \$6,246,977 in 6 months ended April 30 compared with earnings of \$258,112 (33¢ per share) on \$6,780,657 sales in similar 1956 period. Pres. Harry D. Belock said high cost for prototypes of military products and costs of development and promotion of new commercial products were written off against last 6-month income. He set current backlog of unfilled orders at more than \$15,000,000.

Raytheon sold its 40% interest in Datamatic Corp. for \$4,500,000 to Minneapolis-Honeywell Regulator Corp.—owner of other 60%. Raytheon pres. Charles F. Adams said sale of computer firm—representing "substantial" capital gain—would enable Raytheon to expand activities. Sale does not include certain advances to Datamatic which are repayable in 1958-1959, he said.

RCA "corporate good citizenship" was singled out by South Jersey Public Relations Assn. for its "Community Service" award. Ewen C. Anderson, RCA exec. v.p., public relations, accepted award, saying honor really went to "men and women whom you know—your business and residential neighbors—for the job they are doing in serving the community, as well as the company . . ."

Emerson reports net income of \$66,900 (3¢ per share on 1,950,546 outstanding) for 26 weeks ended May 4, compared with \$317,666 (16¢ on 1,935,717) in 26 weeks ended April 28, 1956. Consolidated profits for first fiscal quarter ended Feb. 2 were \$196,509 (10¢ on 1,953,373) vs. \$163,825 (8¢) in similar 1956 period.

Dividends: Motorola, 37½¢ payable July 15 to stockholders of record June 28; Packard-Bell, 12½¢ July 25 to holders July 10; Columbia Pictures, 30¢ plus 2½% stock, both July 30 to holders July 1; Tele-Broadcasters, 2½¢ July 4 to holders June 20 plus 2½¢ Dec. 26 to holders Dec. 10.

Ampex reports net income of \$1,087,000 (\$1.51 per share) for year ended April 30, compared with \$311,275 (58¢) for similar 1956 period.

Laboratory for Electronics Inc. earned \$84,968 in fiscal year ended April 26 vs. net loss of \$985,011 year earlier.

HUGE INCREASE in requirements for TV microwave transmission was predicted by AT&T officials, testifying this week before FCC's study of allocations above 890 mc. Chief engineer Gordon N. Thayer made it clear that he wasn't speaking only of TV broadcast service, when he said:

"It appears likely that TV transmission will develop in the future much as telephony has in the past half-century. This will require large numbers of broad-band circuits not only between cities but in local areas, and will involve the extensive use of microwave facilities . . . For example, we expect that within 15-20 years a substantial proportion of telephones, particularly business telephones, will be equipped with visual adjuncts."

He submitted chart illustrating prediction that inter-city microwave video channel mileage will triple in next 10 years—from an estimated 60,000 mi. at end of this year to more than 100,000 at end of 1962 and 200,000 by end of 1967. AT&T requested no over-all increase in common carrier allocations, except that some bands now shared by common carrier and other users be assigned exclusively to common carrier.

— ■ —
"Open curtain" plan for TV-radio exchanges between U. S. & Russia, dampened down last week by Secy. of State Dulles after Senate Majority Leader Johnson (D-Tex.) proposed it (Vol. 13:24), got some more splashes of cold water this week—from Kremlin. Soviet leaders had appeared receptive to idea of regular program trade following CBS-TV's unprecedented June 2 interview with boss Nikita Khrushchev (Vol. 13:23). But this week, Radio Moscow began broadcasts in English scolding plan, saying "Soviet people are not interested in listening to anti-Soviet mouthings" by U. S. spokesmen. *Pravda* followed with blast asserting that American plan, first suggested at 1955 Geneva Conference, was intended "not to weaken the cold war but to intensify it." Meanwhile CBS-TV was off on another excursion into Communist country. Edward R. Murrow left for Belgrade for film interview with anti-Stalinist Yugoslav President Tito.

TV-press investigation will be part of wind-up project by Fund for the Republic to "study contemporary life with a view to determining the conditions under which a free society may best be maintained." Financed by \$15,000,000 Ford Foundation grant of which \$6,000,000 is left, Fund is expected to go out of existence on conclusion of 3-to-5-year survey by Committee on Basic Issues, which will have own staff. Committee includes educators, clergymen, publisher Henry R. Luce of *Time*, *Life* and *Fortune*, no representative of TV industry. TV-radio & movie blacklisting practices were subject last year of Fund study (Vol. 12:26).

TV is "great blessing of God," Christopher movement leader Rev. James J. Keller told 10th annual Catholic Broadcasters Assn. conference at U of Detroit, urging members to "set the pace, provide good entertainment, good educational programs, use everything to do with culture." Earlier, Rev. Timothy J. Flynn, a CBA director, cited special Trendex survey to show that 60% of TV viewers "never or seldom" see religious programs—and most of those who do are unaware of denominational origin.

First college-credit course offered on home TV in N. Y. metropolitan area was announced this week by NYU and WCBS-TV. Comparative literature course will be presented every weekday from Sept. 23-Jan. 10, 6:30-7 a.m. To receive 3 credits toward degree, TV students will be required to enroll at university, take 2 home exams and final examination at university.

Telephone interview technique was recommended by NARTB's Audit TV Circulation Committee in report to TV board on recommended methods for long heralded TV circulation measurement project. Committee proposed both weekly and daily measurements of station circulation and TV set ownership data, on county-by-county basis. Method was developed in cooperation with Politz organization and Crossley S-D Research. Subcommittee concluded method "produces acceptable circulation percentages on an average day and average week basis for telephone homes in all cases where there is no problem of non-response." TV board recommended that survey method be fully explained to industry at NARTB regional meetings this fall—to be open this year to entire industry, rather than members only. Cost of survey is estimated at \$1,000,000 a year, which NARTB hopes will be underwritten by private research organizations.

Night club floor shows via TV are planned by Jack Entratter, producer of shows at Las Vegas' Sands Hotel, in scheme which he says "could revolutionize the night club business." His plan: Transmit portions of Sands show to night clubs all over country in large-screen color via closed-circuit, charging local clubs according to seating capacity. He says he will work with Teleprompter's Group Communications div. to get into national distribution before Dec. 15. He made announcement in connection with closed-circuit TV use in current Sands floor show by Peter Lind Hayes & Mary Healy, who flash pictures of members of audience on large screen during "community sing" act. Entratter gives credit for idea to Hayes, who presumably will be involved in the proposed night club TV syndication deal.

ARB announces 2 program survey innovations, both available on special order: (1) "Secret week," plan by which survey week varies from month to month and is not selected until after survey has been completed—designed to prevent stations from trying to influence audience during survey week by special programming and promotion. (2) One-week-4-week survey, in which full sample is used during normal survey week and partial sample during remaining 3 weeks of month. ARB printed report will include regular one-week ratings plus 4-week average for each time period.

Three applications for TV stations and one for translator were filed with FCC this week, bringing total to 131 for stations (34 uhf) and 53 for translators. Station applications were for Houma, La., Ch. 11, by Miami's WTVJ; for Fargo, N. D., Ch. 11, by North Dakota Bestg. Co. (KCJB-TV, Minot; KXJB-TV, Valley City; KBMB-TV, Bismarck); for Davenport-Rock Island-Moline, Ch. 8, by owners of local radio KSTT. Translator application was for Susanville, Cal., Ch. 72, by Honey Lake Community T-V Corp. [For details, see *TV Addenda 24-X* herewith.]

Billy Graham may have regular TV pulpit, he indicated June 20 following 3 televised evangelistic rallies in Madison Square Garden, N. Y. "The possibilities are tremendous," he said. "There's a terrific interest in this thing."

Panic spread in Milwaukee apartment building this week when loud rumblings sent 9 occupants fleeing to street in fear furnace was about to explode. Noise was traced to 2-year-old boy who'd turned up TV set as far as it would go.

"Do-it-yourself" TV camera kit, to be priced under \$400, aimed at TV-radio-electronics hams and experimenters, was shown this week by Electron Corp., subsidiary of Ling Electronics Inc. (5120 W. Jefferson Blvd., Los Angeles) at meeting of Hollywood section of SMPTE.

SUMMARY-INDEX OF THE WEEK'S NEWS — June 29, 1957

OPTION TIME CURTAILMENT, elimination of must-buy station lists, urged in network report released by Senate Committee, which withholds endorsement (pp. 1 & 6).

DOERFER NEW FCC CHAIRMAN as McConaughy leaves. Vacancy remains, no one in lead. Doerfer leadership will mean quick action, hands off industry (p. 2).

FEE-TV OPPONENTS get another inning, as FCC gives them until July 22 to reply to test proposals (p. 3); O'Malley talks about Skiatron deal (p. 8).

ALASKAN WIRED TV SYSTEM excellent proving ground for "cable theatre," etc. Successful operation charges \$12.50 monthly, plans similar setup in Sitka (p. 3).

FCC DECIDES San Francisco Ch. 2 case. Pittsburgh Ch. 4 applicants debate merger. Seattle Ch. 7 decision uncertain. Buffalo Ch. 7 case reopened (p. 7).

TV RECEIVER AD PLANS for fall taking shape. Sylvania ups budget 50%; RCA expects slight increase; GE switches emphasis from portables (p. 11).

BUSINESS FORECASTS continue in optimistic vein as President Eisenhower calls for voluntary inflation controls by management and labor (p. 12).

UHF LEAVES AIR in Bloomington, Ill., planning to return Aug. 1; Clarksburg's WBOY-TV plans July 15 debut, Hartford's WTIC-TV due Aug. 15 (p. 10).

FCC RULES OUT licenses for illegal boosters, ends vhf booster rule-making, proposes low-power station-owned uhf boosters to fill in shadws (p. 14).

MAY TV BILLINGS run 7% ahead of year ago, bring cumulative total in first 5 months to \$211,231,303 vs. \$196,267,677; CBS paces gains (p. 14).

COX REPORT URGES NETWORK RESTRICTIONS: Senate Commerce Committee handed a report on network practices to the Justice Dept., the FCC and the public this week -- but withheld its own action on it until the 1958 session of Congress. The 101-page document, drafted by former chief TV investigation counsel Kenneth Cox, was labeled a "staff report," taking its place beside same Committee's Jones and Plotkin reports.

New report urges some substantial modifications of network business practices -- most significant being changes in option time rule to permit (or require) more non-network programming on affiliated stations during prime hours, and substitution of "minimum dollar purchase" for networks' "must-buy" station lists. It also hints that cutback in network ownership of stations in big markets may be desirable.

Chairman Magnuson (D-Wash.) wanted document adopted as official report of Committee, and it also has backing of Sen. Bricker (R-O.) and others -- but the Senators finally voted unanimously for the "staff report" approach, deferring final action until at least 90 days after final report of FCC network study group (now due Sept. 30) and until after receipt of comments from Justice Dept. At that time, Committee announced, it will reconsider report and perhaps recommend legislation.

The highly readable, precisely worded report reflects Cox's background as a courtroom lawyer -- departmentalizing the arguments on both sides of all questions covered, concisely stating conclusions, backed by detailed reasons for them. In areas where it overlaps Celler subcommittee TV report (Vol. 13:23), many of the recommendations are similar. Like Celler, Cox recommends continuing Justice Dept. and FCC surveillance in virtually every area where "monopoly" cry has been raised.

Cox takes this-may-taste-bad-but-it's-good-for-you approach in recommendations for network changes: "Actually, it could be concluded that the changes proposed in the practices of the networks may work to the ultimate benefit of the networks themselves...It is not believed that any of the suggestions [will] seriously impair the ability of the networks to compete...On the other hand, it seems entirely possible that if steps such as are suggested herein are not taken, the networks may attain such a position of overwhelming dominance that the public interest will require the imposition of detailed and rigid governmental regulation."

Option time changes can be accomplished by Commission without legislation, Cox states, suggesting that FCC open part of the 7:30-10:30 p.m. period to non-network programming either by reducing evening option time, pushing option period earlier or later, or "by the adoption of the limitation on programming from any one source." Celler report was less specific, urging FCC to consider amending its rule.

Proposal for abolition of must-buy lists is virtually identical with Celler recommendation. As to network ownership of stations -- where Celler report urges that FCC consider anti-trust factors "in any change in the multiple ownership rule," Cox report speculates that networks may already have exceeded their legitimate needs to own individual stations, warns of "possible undue concentration" now.

Report sees no need for Sen. Bricker's bill for direct FCC licensing of networks, asserting it "appears" Commission already has power to regulate networks directly. It flatly rejects network contention that regulation is fraught with danger of censorship -- pointing out that there's no censorship of stations.

Like Celler report, new report urges FCC to make public the network affiliation agreements on file with it, expresses no specific view on extent and legality of network practices with regard to program ownership and profit participation, urges uhf receiver excise tax relief and a continuing program "looking to the ultimate shift of all, or a major part, of TV to the uhf band."

Unlike Celler report, it looks with some favor on proposal to extend station license period from 3 to 5 years -- if this is accompanied by "legislation strengthening the Commission's other means of control over the conduct of its licensees." This means, says report, that FCC should be required periodically to review performance of all stations, whether licenses are up for renewal or not.

Report also favors extension of network affiliation agreements from current 2 years to 5 years or more -- providing terms are weighted in favor of stations, with escape hatch permitting them to drop affiliations on shorter notice.

CBS spokesman issued short statement "welcoming" report's suggestion of further study and offering cooperation. NBC and ABC had no comment.

[For highlights of Cox report, see p. 6.]

DOERFER FCC CHAIRMAN, BUT NO NEW MEMBER YET: Administration has cleared up the most important uncertainty about FCC membership by announcing, as expected, designation of Comr. John C. Doerfer as chairman, to succeed George C. McConnaughey July 1.

This leaves vacancy, however, and Administration gives no clue -- if it has any -- as to who will fill it. No one appears to be in lead for the job, and the speculation continues to be frenzied, though most people are tired of it.

Latest name getting a play is that of George R. Perrine, chairman of Illinois Commerce Commission. He tells us he rejected job 2½ months ago.

* * * *

Doerfer's chairmanship will make news. He's impatient, impulsive, eager to get decisions out, hates to see things languish. He's not thin-skinned, not inclined to worry about ruffling dissenters, not fearful of getting reversed by courts.

He believes in keeping hands off industry, is even more emphatic about it than McConnaughey, whose chairmanship since Oct. 4, 1954 was a strictly "let-'em-alone" operation. In fact, Doerfer was author of famous Cleveland, Tenn. radio "economic injury" decision (Vol. 13:13), in which Commission boldly stuck its neck out and stated it had no authority to determine economic impact of new station on a market. Court of Appeals seems to disagree with thesis, though matter is still in litigation, but that doesn't bother Doerfer; he'd like to see a final court decision settling issue one way or other.

He's made several speeches praising U.S. TV-radio system as compared with others, notably British. He's quite sensitive about programming -- quick to object to off-color material, etc.

Doerfer has been a commissioner since April 15, 1953, was reappointed to 7-year term July 1, 1954. He came to FCC from chairmanship of Public Service Commis-

sion of Wis. Personally, he's gregarious, affable. He's married, has 2 sons, is member of Roman Catholic Church.

McConnaughey goes into private law practice immediately. In Washington, he forms McConnaughey, Sutton & L'Heureux -- joining with veteran practitioner George Sutton and Robert L'Heureux, who has been his FCC liaison with Congress; offices are those of Sutton, now enlarged, in National Press Bldg. In Columbus, O., whence he came to FCC, he forms McConnaughey & McConnaughey with his son.

FCC GIVES PAY-TV OPPONENTS ANOTHER INNING: Possibility of a decision on fee-TV tests before Commission takes its August vacation diminished almost to the vanishing point this week when FCC heeded petitions of subscription-TV opponents and granted them opportunity to file replies to proposals for tests after July 8.

Commission gave them only 14 days after deadline for test proposals -- setting reply deadline at July 22 -- despite fact that petitions by NARTB (as amended this week), CBS, ABC and Joint Committee on Toll TV had asked 60 days. Decision was 4-2, McConnaughey not voting and Lee & Bartley dissenting, latter feeling that fee-TV opponents had already said everything they possibly could say and that only result could be delay; Lee didn't state reason for dissent.

FCC decision at Aug. 1 meeting -- last one before month's vacation -- is still technically possible, but highly improbable. While staff conceivably could have comments and counter-comments analyzed by that time, there's still considerable doubt that Commission would act that quickly -- particularly in view of fact that there will either be a new commissioner (whose vote could be crucial) or that there will still be only 6 members on Commission (with tie vote a possibility).

Any FCC delay may well increase chances of Congressional action to ban pay TV, and author of Senate's bill, Sen. Thurmond (D-S.C.), is anxious to get moving. He told us this week that he doesn't feel a hearing is necessary, that the Commerce Committee has already heard all pro-&-con arguments. Chairman Pastore (D-R.I.) of communications subcommittee told us he plans to examine record of full Committee's fee-TV hearings and decide whether further hearings are necessary on specific bill.

* * * *

The advertising fraternity, which has been strangely silent on subscription issue -- considering what it has at stake -- was finally heard from this week when Ruthrauff & Ryan radio-TV v.p. George Wolf devoted his June 21 column in Advertising Agency Magazine to subject, predicting that if a test is conducted "it will lead to widespread adoption of the pay form of TV" in 5-10 years. Editorial in same issue states that "if toll TV became a success, in effect, it could wipe out a highly important channel of advertising communication" -- and urges "agency leaders" to speak out against fee TV by supporting anti-subscription legislation.

Another west coast entertainment union, meanwhile, acted on pay TV when the 70,000-member California State Theatrical Federation reaffirmed its opposition in wire to Chairman McConnaughey -- an action obviously designed to offset pro-fee resolution passed 2 weeks ago by Hollywood AFL Film Council (Vol. 13:24).

Brooklyn Dodgers pres. Walter O'Malley told a Congressional committee about his "contract" with Skiatron for wired pay TV in either New York or Los Angeles. Los Angeles city council held up cable grant to Skiatron. Press releases continued to flow and trade press continued to lap up planted publicity. Details on p. 8.

ALASKAN PROTOTYPE OF 'WIRED TV STATION': If you'd really like to see how a "pure" wired TV system works without benefit of any telecast signals whatsoever, with implications for "wired theatre," community antenna systems, etc. -- and you'd like to combine it with a delightful vacation -- we suggest you visit Ketchikan, Alaska, this summer and inspect operations of Ketchikan Alaska TV Inc.

It's the pioneer cable system originating all its own signals. Unlike community antenna systems, it has no outside station signals to relay to subscribers. Recently, we discussed operation of system with pres. R.D. (Chuck) Jensen, gleaned the following details:

System has 1000 subscribers among population of 9000, charges \$12.50 monthly (highest of any cable operation extant) after \$37.50 initial connection fee. Hours are 4:30-11 daily, occasionally longer, with Sat. 3:30-11. Program fare is mostly film & kines, plus some live. Only one channel is offered, but a second is planned.

Limited number of local commercials is carried, Jensen stating belief subscribers resent addition of many beyond those attached to network kines. He charges \$2.50 per film or slide spot, permitting up to min. at that price. For "elaborate" live commercials, spot runs as high as \$5. "The local merchants are constantly badgering us to carry more," he says, "but we don't believe it's a good idea."

System pays nothing to networks or sponsors for carrying kines, gets nothing -- merely makes certain commercials are carried.

Operation started in 1953, with Jensen as pres.-gen. mgr., Wally Christiansen as v.p.-engineer. Jensen came to Alaska during war as YP ("Yippee") boat skipper, became intrigued with country, is still the only compass adjuster in the territory -- though cable system now takes up most of his time. Twelve local businessmen were brought in later as investors.

Town is too hilly for low-powered TV station, Jensen says, and he reports that economics just aren't right for a telecasting operation.

Impact on morale of residents is incalculable, Jensen reports. Previously primarily a fishing village, Ketchikan now has huge American Viscose plant -- and its management has problem of keeping employes whose wives are homesick for States. Jensen says Viscose manager claims TV system is most important element in keeping turnover down. "One elderly lady," he relates, "stopped me on the street one day and said: 'Mr. Jensen, you're doing more good than the preachers.'"

"It's extremely successful now, after a slow start," Jensen concluded -- and by way of emphasis disclosed plans for establishing similar system in Sitka, where new pulp mill is under construction.

Formal TV-radio proposal for regular uncensored broadcast exchange between U. S. & Soviet Union was made by Govt. June 24 as result of CBS-TV's June 2 interview with Communist boss Nikita Khrushchev (Vol. 13:23-25). Ambassador Wm. S. B. Lacy, special asst. to Secy. of State Dulles, handed 84-word memorandum to Soviet Ambassador Georgi M. Zaroubin calling for "agreement in principle at an early date" on plan, which had been promoted by Senate Majority Leader Johnson (D-Tex.) Russians made no immediate response to diplomatic note, which said "purpose of these broadcasts would be to promote a freer exchange of information & ideas on important world developments." But Administration move, followed up by speech by Vice President Nixon, helped to quiet Democratic criticism of Dulles for apparent reluctance to pursue idea of reciprocal TV-radio broadcasting. Nixon told Kiwanis International convention in Atlantic City June 27 that Johnson's plan could bring "real progress" in "reducing misunderstanding & prejudice" among Russians & Americans if Kremlin proves "good faith" by accepting it. Note: CBS Inc. pres. Dr. Frank Stanton addresses National Press Club in Washington July 2 on "TV in the Cold War; Khrushchev & Moscow's Video Curtain."

"One-man TV studio," to sell for \$10,000-\$15,000, was unveiled this week by Hallamore Electronics Co. div. of Siegler Corp., Anaheim, Cal. at special New York showing. Designed for small stations, community antenna and closed-circuit business & educational installations, unit includes master control console, one or more live camera chains, film & slide projection equipment, turntable--all remotely operated from console and occupying 10x12-ft. space. Whole package, according to Siegler pres. John G. Brooks, can be installed by one man in half day.

Furore over TV coverage of House Un-American Activities Committee hearings in San Francisco last week (Vol. 13:25) subsided June 27 when Chairman Walter (D-Pa.) bowed to ruling against cameras by Speaker Rayburn (D-Tex.) "He is not going to televise anything else--full committee or subcommittee," Rayburn reported after conference sought by Walter, who said (despite his earlier open defiance of Speaker) that he hadn't realized Rayburn's TV-radio edict covered House proceedings generally. Walter's brief challenge of Rayburn's authority had set off new moves in House to revise rules to authorize TV--latest being measure (H. Res. 291) by Rep. Keating (R-N. Y.) to permit committees themselves to decide issue. NARTB pres. Harold E. Fellows and chairman Robert D. Swezey of Freedom of Information Committee advised NARTB members June 26 that "excellent opportunity now exists" for TV-radio industry to press Congress for ending of ban. But House Rules Committee said nobody had requested hearings on any proposal, so no action was contemplated.

Closedcircuit Telecasting System invited New York theatre management group to special color TV demonstration this week in revival of proposals to interest Broadway producers in closed-circuit colorcasts of plays to local theatres. Demonstration followed suggestions in recent Dramatists Guild panel discussion that telecast previews of show could help recoup production costs.

Public service theme of Westinghouse Bestg. Co.'s Boston conference for station executives (Vol. 13:9) is developed in new brochure, *To Meet a Challenge*, reporting on company's own programming.

Newly formed Marketing Impact Research Inc. (Max Bonfeld, pres.) establishes offices at 147 E. 50th St., N. Y.

Personal Notes: Thomas E. Knode, ex-Edward Petry & Co., rejoins NBC station relations dept., reporting to v.p. Harry Bannister; he is slated to be named a v.p. at next board meeting July 12 . . . Wm. C. Gillogly promoted to sales director of ABC-TV central div. . . W. Weller (Jake) Keever & Robert Cinader promoted to v.p.'s of NBC's California National Productions . . . Albert S. Goustin, ex-Ziv & Blair TV who recently headed own film distributing firm, named TV sales mgr. of DuMont Bcstg. Corp. . . Lon King promoted to TV sales promotion & research director of rep Peters, Griffin, Woodward Inc. . . Ed Obrist resigns as program director of WNHC-TV, New Haven . . . Michael R. Santangelo, ex-General Public Relations Inc., Benton & Bowles subsidiary, joins Westinghouse Bcstg. Co. as coordinator of publicity & special events . . . Mann Reed promoted to program mgr. of KBTB, Denver, succeeded by Russ Kundert as production mgr. . . Leon S. Rhodes named v.p. of Loucke & Norling Studios div. of Robert Lawrence Productions . . . Leroy E. Kilpatrick promoted to operations mgr. of WSAZ-TV, Huntington, W. Va.; C. Thomas Garten to commercial mgr. . . Joe Smedley Jr. named program director of WESH-TV, Daytona Beach, replacing Wm. Hall, transferred to sales . . . John G. Johnson, ex-gen. mgr. of WTOB, Winston-Salem, named pres. of WAPA-TV, San Juan, P. R. . . Robert Lawrence Patrick, ex-WHIO-TV & WIFE, Dayton, named secy.-mgr. of Ga. Assn. of Broadcasters, succeeding Ross Shackleford, who becomes public relations director of W. Ga. College, Carrollton . . . Gordon Grannis, ex-KOVR, Stockton, Cal., joins Crown Zellerbach Corp. as public relations asst. . . Wm. A. Slater resigns as local sales mgr. of WJHP-TV, Jacksonville, to join sales staff of WFGA-TV there . . . Jacob E. Evans, ex-NBC & McCann-Erickson, named sales promotion director of *American Weekly* . . . O. W. Myers, ex-Gerity Bcstg. Co. (WNEM-TV, Bay City-Saginaw; WABJ, Adrian; WPON, Pontiac, Mich.), joins WHTN-TV, Huntington, W. Va., as national sales rep . . . Charles C. (Bud) Hoffman, ex-Business Planning Assoc. Ltd., Toronto, named exec. v.p. of Bureau of Broadcast Measurement there.

Sale of WMTV, Madison, Wis. (Ch. 33) for \$550,000 (Vol. 13:22) to WTVJ Inc. interests (Mitchell Wolfson) and radio WMAY, Springfield, Ill. (50% of CP for WMAY-TV) includes \$200,000 option on buildings and land, it's revealed by transfer application filed with FCC. Until option is exercised, property is to be leased for \$1666 monthly. WTVJ Inc. April 20 balance sheet lists \$2,437,181 earned surplus and statement of income says WTVJ Inc. net after taxes for both 1955 & 1956 was "in excess of \$500,000." It had \$2,154,090 current assets, \$2,214,218 net assets; \$862,881 current liabilities, \$857,576 long-term notes payable. WMTV May 31 balance sheet shows \$1369 deficit. It had \$126,771 current assets, \$136,839 fixed assets; \$87,737 current liabilities, \$28,577 fixed assets (with additional \$97,999 due related interest).

Harry & Elmer Balaban's H. & E. Balaban Corp. will own 1/3 of radio WIL, St. Louis, Mo. & WWIL, Ft. Lauderdale, Fla., according to application filed with FCC. Other owners of firm acquiring properties for \$650,000 (Vol. 13:20) from Lester A. Benson's Missouri Bcstg. Corp. are Atlantic Brewing Co. (Harold S. Leder and family), 33 1/3%; Simon Zunamon, 18% (as trustee for 3 Epstein family trusts); Barbara Fink, 6% (as trustee of George F. Fink trust); Lois Schraeger, 5% (as trustee of Schraeger family trust); Herbert Schoenbrod, 4 1/3% (as trustee of Schoenbrod trust).

ADVERTISING AGENCIES: Norman B. Norman elected pres. of Norman, Craig & Kummel, succeeding Elkin Kaufman, resigned . . . Thomas G. Fielder, ex-GE TV receiver dept. adv. mgr., joins Cunningham & Walsh, N. Y., in charge of Texas Co. account . . . Edgar J. Donaldson, TV-radio director of Ketchum, MacLeod & Grove, elected a v.p. . . . Hibbard E. Christian named public relations mgr. of Young & Rubicam.

John R. McKenna, ex-mgr., industrial products, Philco govt. & industrial div., returns to Washington Aug. 1 to establish consultant engineering practice at 2000 P St. N.W. (Columbia 5-4664). With Philco since Dec. 1951, he had been an associate in Chambers & Garrison consulting firm in Washington 1946-51 after Navy service as asst. head of radar for Bureau of Aeronautics.

Society of TV Pioneers elects W. D. (Dub) Rogers Jr., KDUB-TV, Lubbock, Tex., as first pres. Named v.p.'s in mail poll: John E. Fetzer, WKZO-TV, Kalamazoo, and KOLN-TV, Lincoln, Neb.; Harold Hough, WBAP-TV, Ft. Worth; Campbell Arnoux, WTAR-TV, Norfolk. Secy. is Glenn Marshall Jr., WMBR-TV, Jacksonville.

Dr. Walter B. Emery, consultant to Joint Council on Educational TV, joins Michigan State U's College of Communication Arts, will teach TV-radio law. With JCET since 1952, he had served on FCC staff 10 years, last position as legal asst. to chairman Paul Walker.

Ed Sullivan elected pres. of National Academy of TV Arts & Sciences at board meeting June 27 in N. Y. Other officers: Harry Ackerman, first v.p.; Mark Goodson, second v.p.; Robert Longenecker, secy.; Lawrence Langner, treas.

NARTB names consultant Robert K. Richards to American Council for Education in Journalism, Robert T. Mason, WMRN, Marion, O., to Council's accrediting committee.

John H. Conlin, from FCC Office of Opinions & Review, due to be transferred to Office of General Counsel—in legislation, treaties and rules div.

Westinghouse's purchase of WAAM, Baltimore (Ch. 13) for \$4,400,000 in Westinghouse stock (Vol. 13:18-19) was approved by FCC this week. Pre-freeze WAAM started Nov. 2, 1948, with control held by Ben & Herman Cohen families; exec. v.p. and 7% owner is Norman C. Kal, partner in Kal, Ehrlich & Merrick Adv., Washington. Westinghouse now has limit of 5 vhf stations, others being WBZ-TV, Boston; KYW-TV, Cleveland; KDKA-TV, Pittsburgh; KPIX, San Francisco.

Sale of 50% of KNAC-TV, Ft. Smith, Ark. (Ch. 5) by Salome Nakdimen as administratrix of husband's estate to Harry Pollock interests for \$61,500 (Vol. 13:19) was approved by FCC. FCC had postponed approval of sale of other 50% to George T. Hernreich pending hearing on protest filed by Donald W. Reynolds' KFSA-TV, Ft. Smith (Ch. 22), but Reynolds dropped protest June 28.

Restating ownership of CP for KAKJ, Reno, Nev. (Ch. 4), application filed with FCC says Robert C. Fish gave up rights for \$500 to group headed by retired movie director-producer Irvin V. Willat, the other principals being Eldon E. Cory and Raymond D. Vargas. Owners seek to clarify status to make possible sale to Tower Telecasting Co. (Vol. 12:20, 24).

Transfer of CP for KPAC-TV, Port Arthur, Tex. (Ch. 4) to new Texas Goldcoast TV Inc., owned 50% each by Jefferson Amusement Co. (Julius M. Gordon) and Port Arthur College (Vol. 13:22) was approved by FCC.

Highlights of Cox Report on Network TV Practices

Major Conclusions & Recommendations of Staff Report Released by Senate Commerce Committee

(See story on page 1; for highlights of Celler report see Vol. 13:23)

LEGISLATIVE ACTION: "In deference to the still uncompleted investigations [by FCC's network study group and Dept. of Justice], it may be wise for the Committee to refrain from recommending specific legislation at this time. It is hoped that the Dept. of Justice and the FCC, through the enforcement of existing laws, can deal with certain aspects of these problems. In addition, it may well be that the Commission, through revision of its present regulations, can contribute further to the desired solutions. If there remain problems which can be dealt with only through legislation, the Committee must, of course, make its recommendation with respect thereto at a later time."

Option time: "It seems clear that as it presently functions, the option imposes serious disabilities and disadvantages on independent producers of programs, non-network advertisers and independent stations. The FCC, after it receives the report of its own network study group, should therefore give serious consideration to reasonable limitations on, or adjustments in, the option as it now stands. Of course, if the option is found to be illegal, it must be eliminated. But even in the absence of such a determination, regulations should be adopted which would open a fair part of the period from 7:30-10:30 p.m. in each time zone in such a way as to provide opportunities for local advertisers to sponsor programs and for independent producers to offer their programs in equal competition with the networks. This would be accomplished through a reduction in the amount of time which could be optioned in the evening, or by requiring a shift of the network program block to a period earlier or later in the evening, or by the adoption of the limitation on programming from any one source, or by any other means which the Commission can devise."

Must-buy policy: "Although the must-buy practice serves to bar most local and regional advertisers from network TV, some minimum network requirement seems reasonable. However, the required purchase of a specified list of stations seems possibly to discriminate against affiliates not on the list and to force advertisers to conform to patterns which may not fit their individual needs. A minimum dollar purchase serves all the legitimate needs of the network and should therefore be substituted for the prevailing form of must-buy."

Multiple station ownership: "The Commission should not permit increased concentration, either by networks or other multiple owners, until it has received and thoroughly considered the report of its network study group . . . Although it is clear that the networks should be permitted to own some stations, serious consideration should be given to the possibility that they may have exceeded their legitimate needs in this regard . . . The Commission should also take steps to prevent overreaching by networks in dealing with their affiliates for the acquisition of the latter's facilities."

FCC regulation of networks: Commission probably has enough power over networks now "to deal with all matters discussed in this memorandum;" in fact, it appears to have power to regulate them directly if necessary. Sen. Bricker's proposal to license networks as such may not be necessary, but networks' argument that it would involve censorship seems unsound, since FCC regulation of stations has brought no censorship.

Affiliation contracts: "The permissible maximum term of affiliation might well be extended to 5 years to give greater stability to broadcast operations and improve the status of affiliates in relation to their networks, although it might be wise to give the affiliates a right of cancellation upon shorter notice to maintain some flexibility." If license period is extended to 5 years, it should be "accompanied by legislation strengthening the Commission's other means of control over the performance of its licensees."

"Copies of affiliation agreements filed with the FCC should be open to inspection." It might be desirable to require networks to "specify the objective criteria which they employ in fixing rates;" and the "free hour" concept in affiliation agreements probably should be eliminated to remove confusion and possible discrimination.

Network program participations: "The networks must have the right of final decision as to the makeup of their program schedules. However, this gives them the power to grant preferential treatment to their own programs, although the record does not show this to be so common as to necessitate divestiture of program production. Since abuses are possible, however, the FCC and the Dept. of Justice should look into the matter on a continuing basis. Similarly, as to the possibility of the networks' acquiring interests in independently produced programs as a condition to their being broadcast on the networks, the Dept. of Justice should investigate to see whether any violation of anti-trust laws is involved, while the FCC should consider whether it should adopt rules prohibiting or regulating such acquisition by the networks of interests in independently produced programs."

Network "invasion" of station time: "Some restriction or adjustment of [network programming practices outside of option time] is . . . necessary lest TV become a completely national medium serving no local needs and almost entirely dependent on network service."

Network staging services: "The issues raised [by independent scenery designers] merit the prompt completion of the investigation which the Dept. of Justice has begun." If networks are to engage in scenery design and staging services, it should be on a standard bidding basis, with equal competition between independents and networks.

Network spot rep & syndication activities: These questions "merit further attention. If they are not fully covered in the report of FCC's network study group, the Committee should look into these matters at a later date."

Programming: Amount of time devoted to network religious programming doesn't seem adequately to reflect importance of religion in American life; religious programming on a sustaining basis probably is preferable to commercially sponsored religious programming. Most public service programming suffers from being presented in poor time periods. "The problem of the impact of TV programming on children is a serious one and is deserving of further study."

FCC's financial report on TV stations and networks for 1956 is due later than usual this year—possibly by end of Aug. Holdup is mainly due to fact that Commission's network study group is using the tabulating machines normally employed by FCC's economics div. in compiling the financial data.

SEVERAL BIG VHF cases appeared very ripe for FCC final decision this week, as Chairman McConnaughey left, producing some uncertainties as to possible future votes.

One particularly hectic case was that involving Pittsburgh's Ch. 4. Hearst's WCAE holds examiner's second initial decision nod, after KQV had won first round. This week, WCAE asked FCC for a meeting to consider proposal wherein WCAE & KQV would form new corporation, owned 50% each, and they would pay other 3 applicants \$50,000 each as they dismissed—leaving new corporation free for grant. At week's end, they were "still negotiating."

Commission finalized decision for San Francisco-Oakland's Ch. 2, giving it to organization favored in instructions—San Francisco-Oakland TV Inc. (Vol. 13:20). Decision is due to be made public next week. There's rumor of some sort of arrangement between winner and losers Channel Two Inc. and TV East Bay—presumably to preclude delays possible through court appeals, etc.

Seattle's Ch. 7 case may be quite uncertain now. KIRO, originally favored by FCC majority, is said to have only 3 votes now.

Buffalo Ch. 7 case is due to be reopened, FCC announcing preliminary decision to conduct further proceedings. It's understood purpose is to reexamine finances of applicant WKBW.

FCC suffered another reversal in Court of Appeals, which sent back the decision granting KARD-TV, Wichita (Ch. 3). Appeal of loser KFH contended Commission hadn't given adequate reasons for denying exceptions to examiner's initial decision. Judges Edgerton, Fahy & Burger stated: "Though a specific ruling on each minor exception is not indispensable, the parties and the court should not be left to guess, with respect to any material issue, which of the several alternatives the Commission had in mind. It should make the basis of its action reasonably clear. We cannot find that it did so here. Its statement of reasons comes to little more than this: For one reason or another, all the exceptions not granted are overruled." Court also noted:

"Appellant says the Commission erred in denying a rehearing and in denying leave to show by affidavits that

in the first months of operation Wichita failed to perform what it had promised. Commission counsel argue that only interim operation was involved, but the record does not make it clear that this was the theory on which the Commission refused to reopen the hearing. We think it should clarify its ruling in this respect."

Experimental grant of Ch. 12, New Orleans, was made to WJMR-TV (Ch. 20), which says it will compare uhf-vhf propagation of simultaneous transmissions. Application had been opposed by Assn. of Maximum Service Telecasters which objected to fact WJMR-TV plans transmitter location less than minimum co-channel distance from WJTV, Jackson, Miss.

Initial decision favoring Tri-Cities Bestg. Co., Monahans, Tex. for Ch. 9 was issued by examiner Elizabeth C. Smith after KMPS Bestg. Co. withdrew.

Low-power educational CP (296 watts) was granted on Ch. 30, Toledo, to Greater Toledo Educational TV Foundation, while translators were authorized in Alturas and Blythe, Cal.; Newport, Ore.

Grantee KSLM-TV, Salem, Ore. (Ch. 3) was told it would be given no more time to build, would be cancelled unless it requested hearing in 20 days. Same word was given to KAMT, Yakima, Wash. (Ch. 23).

* * * *

Our figures got twisted in last week's report of reply comments on Craven Plan (Vol. 13:25). Ten filed against plan, one for.

In other allocations proceedings, FCC proposed: (1) Addition of Ch. 16 to Ephrata, Wash., substituting Ch. 31 for Ch. 25 in Kennewick, Ch. 25 for Ch. 31 in Richland. (2) Substitution of Ch. 36 for Ch. 7 in St. Cloud, Minn., Ch. 7 for Ch. 36 in Alexandria, Minn. (3) Various plans to shift WICU's Ch. 12 out of Erie, Pa. to Cleveland-Akron area. (4) Reassignment of Ch. 12 from Flint to Saginaw-Bay City-Flint. At same time, Commission finally rejected proposal to shift Ch. 12 to Ann Arbor.

Two rule-making petitions were received. First—2 alternatives filed by WHOA, San Juan, P. R.: (1) Shift Ch. 13 from Aguadilla to Fajardo, Ch. 12 from Charlotte Amalie to Aguadilla-Arecibo. (2) Add Ch. 13 to Fajardo, substituting Ch. 12 for Ch. 13 in Aguadilla, deleting Ch. 12 from Charlotte Amalie. Second—Request of prospective applicant Clarence M. Mason, Hancock, Mich., for addition of Ch. 9 to town, substituting Ch. 8 for Ch. 9 in Iron Mountain, Mich.

Tax loophole in multiple ownership of TV & radio stations, already plugged by FCC in policy pronouncement last Oct., would be tightened by bill (HR-8381) introduced June 26 by Rep. Mills (D-Ark.), chairman of Ways & Means subcommittee on technical revision of Internal Revenue Code. Scheduled to be reported to House July 2 by full committee, comprehensive measure is intended to prevent station owners from avoiding immediate capital gain tax on profits from "rollover" sales of properties acquired in excess of existing FCC limits. Old tax law language, covering sales "necessary or appropriate to effectuate the policies of the Commission," could be construed by owners as defining such transactions as sales forced by Govt. New language permits tax deferrals only on sales "necessary or appropriate to effectuate a change in a policy of, or the adoption of a new policy by, the Commission." Amendment applies to any sale after last Dec. 31 and to sales contracts made after last Oct. 15.

Commercial film production div. has been started by WCAU-TV, Philadelphia, equipped to cast, set, record & edit films, under supervision of v.p. Charles Vanda.

Facilities changes: Philadelphia's WFIL-TV (Ch. 6) & WRCV-TV (Ch. 3) plan immediate start of construction of new joint 1000-ft. tower in Roxborough, Pa., with operations from new site scheduled for late Sept.; WMFD-TV, Wilmington, N. C. (Ch. 6) now radiating 100-kw from new 997-ft. tower at Delco, N. C.; WLBR-TV, Lebanon, Pa. (Ch. 15) plans boost to 129-kw ERP next week; KNTV, San Jose, Cal. (Ch. 11) to 26.3-kw about July 20; KOVR, Stockton, Cal. (Ch. 13) to 316-kw next Sept.

Suit for \$93,228 for claimed services from Sept. 1, 1954 to May 1, 1957 as mgr. of KLOR, Portland, Ore. (now KPTV) has been filed by S. J. Schile against Oregon TV Inc. and its former pres. Henry A. White. Schile alleges his services to station, bought in April by attorney-oilman George Haggarty (Vol. 13:17), were worth \$129,978 but he was paid only \$36,750 during period. He seeks balance plus 6% interest.

Call letters KSBY-TV have been assigned to KVEC-TV, San Luis Obispo (Ch. 6), now operated as satellite of KSBW-TV, Salinas-Monterey (Ch. 8).

SUBSCRIPTION-TV proponents Skiatron and International Telemeter continued to reap rich harvest of free publicity, notably in this week's hearings of Rep. Celler's anti-trust subcommittee investigation of professional baseball. Star witness Walter O'Malley, Brooklyn Dodgers pres., made these revelations while on the stand:

He had signed a tentative "escrow" contract with Skiatron TV Inc. (Matty Fox), but withdrew it before his appearance at hearings because "I didn't want to continue my negotiations in a fish-bowl." He indicated he plans to renew negotiations after hearings.

He said Skiatron contract provided for toll-TV of Dodgers games either in New York or Los Angeles or wherever team moved, that he'd discussed idea with all other National League clubs—which thought it seemed too good to be true.

The contract terms, as outlined by O'Malley: "We would receive one-third of the subscriptions. They would make a minimum guarantee that would protect us for having lost our present [TV] contracts, which would also have in mind that we would have to pay the visiting club 25% of our receipts." Skiatron's original proposal was to wire New York for subscription TV, which O'Malley said would double Dodgers' TV income. They first figured on charging 50¢ a game, "but I think the thinking today is that it would be nearer \$1, around the price of a general admission ticket."

He said negotiations started last spring at Vero Beach, Fla., with Skiatron TV v.p. Jerome Doff, who formerly headed Trans-Community TV Inc. (Comprovision wired TV service). O'Malley denied reports that Skiatron deal was responsible for proposed move of club to Los Angeles, saying move hasn't been decided yet and Skiatron's Los Angeles plans didn't enter into negotiations. "In other words, if Skiatron is sound—I hope it is—whether there

is baseball in Los Angeles or not you are going to have Skiatron in Los Angeles because it is a terrific market." And so, he added, are New York, Philadelphia, Chicago and others. He denied owning any Skiatron stock, but said he planned to purchase some "if it ever develops to its intention."

Subcommittee also heard blast at toll TV by inveterate subscription-TV opponent N. Y. City Council pres. Abe Stark who lambasted "the corrupting alliance between baseball and pay TV" as a monopoly threat fostered by "the prospect of easy money and windfall profits."

* * * *

TV & movie trade press continued to overflow with subscription-TV items—some of them obviously planted, others merely based on speculation. One was report that Motorola and Westinghouse had completed "pilot model" pay-TV sets for Skiatron and have been working on plans to mass-produce decoders and to develop coders for station transmitters. Westinghouse officials declined to comment, but Motorola exec. v.p. Edward Taylor said his company had been contacted by Skiatron. "We listened and we looked into it; as a result, some conclusions have been drawn which have no basis in fact. We're not in business with them. There's no agreement."

Skiatron's application to wire up Los Angeles for pay TV ran into snag in city public utilities board hearing when International Telemeter attorney Mendel Silberg asked for delay pending "thorough investigation of the financial responsibility, character of operation and technical advances of any applicant." Hearing was continued to July 2 after board members raised similar objections.

Another development was long story in June 26 *Wall St. Journal* that Metropolitan Life Insurance Co. was considering setting up closed-circuit subscription service in its N. Y. housing projects. A Metropolitan official commented to us: "Sure, we're interested. We're interested in any new development, but we're in the real estate business, not show business. If we ever should get into this sort of thing, it will be as a landlord only."

Radio station sales and transfers reported this week: WHIM, Providence, by Frank W. Miller Jr. for \$830,000 to Richard D. Buckley and John B. Jaeger, chief exec. officers of WNEW, New York, Buckley also having interest in DuMont Bestg. Corp. (Vol. 13:17). Miller is officer of Headley-Reed rep firm and Kelly-Smith newspaper rep. . . . WDOD, Chattanooga, by Earl W. Winger for \$250,000 to Interstate Life & Accident Insurance Co., same city (H. C. E. Johnson, pres.) . . . KRKD, Los Angeles, 36% (2750 shares) by Richard C. Simonton for \$107,500—licensee Continental Telecasting Corp. acquiring 1018 shares for \$39,775; Albert Zugsmith, 952 shares for \$37,248 and boosting ownership from 35 1/3% to 55.57%; John D. Feldmann, 780 shares for \$30,476, which gives him 12.04%. Other stockholder is pres. Frank Oxarart with 30.85% . . . WANS, Anderson, S. C. by Carolina Bcstrs. Inc. (C. J. Johnson, pres.) for \$85,000 to 1/2 co-owners W. Ennis Bray, ex-owner of WJAN, Spartanburg, S. C.; George C. Nicholson, who owns 50% of WAUG, Augusta, Ga. and 20% of WYZE, Atlanta, Ga.; Mrs. John C. Amick, of Augusta adv. agency . . . KLOG, Kelso, Wash. by Northwest Public Services Inc. (Roscoe A. Day Jr., pres.) for \$50,000 to J. J. Flanigan, ex-pres. & 49% owner of KITO, San Bernardino, Cal. . . . KSEI, Pocatello, Ida. and CP for KSEI-TV (Ch. 6), 88.9% sold by Florence M. Gardner for \$118,915 to Pioneer Bcstrs. Corp., owned by gen. mgr. Henry H. Fletcher & wife Ruthe (program mgr.), who already held 10.75% jointly. Florence Gardner is to remain with stations as v.p. Brokers: WHIM, Howard E. Stark.

Radio station sales approved this week: KHEP, Phoenix by A. V. Bamford & Harvey R. Odom (co-owners of CP for radio KMOP, Tucson) for \$252,000 under lease arrangement to Grand Canyon Bcstrs. Inc. (Wm. P. Ledbetter, pres.), dismissing application for 1580 kc in Phoenix (Vol. 13:17) . . . KJAY, Topeka, by KJAY Inc. (Robert Rohrs, pres.) for \$142,500 to Kansas City businessmen Ed Schulz, Dale S. Helmers, J. W. McCoskrie, & D. Wm. Overton (Vol. 13:20) . . . WQOK, Greenville, S. C. by Albert T. Fisher & George Speidel III (also owners of WPAL, Charleston & WOIC, Columbia, S. C.) for \$125,000 to James A. Dick, also owner of WIVK, Knoxville (Vol. 13:21) . . . WHMA, Anniston, Ala. (250-w) by Col. Harry M. Ayers, publisher of *Anniston Star*, for \$75,000 to Ralph Allgood & Grove Wise, also owners of WRMA, Montgomery, Ala. (Vol. 13:22) . . . WSPC, Anniston (5000-w), by W. S. Weatherly and associates for \$65,000 to Col. Ayers (Vol. 13:22) . . . WOOO, Deland, Fla. by Wm. Martin, B. F. J. Timm and associates for \$65,000 to Trio Broadcasting Co. owned by Wally King (WATR, Waterbury, program mgr.) and Herbert A. Saxe & Oscar Silverman (Vol. 13:20) . . . KIHQ, Sioux Falls, S. D. by Leslie P. Ware for \$65,000 to James A. Saunders & John W. Hazlett, from Minneapolis-St. Paul (Vol. 13:23) . . . WPUV, Pulaski, Va. by Mason C. Deaver for \$46,254 to co-equal owners John A. Columbus, Lawrence R. Schoenfeld, Carl A. Shuffebarger (all station employees) and druggist Howard R. Imboden (Vol. 13:23).

Telecasting Notes: Auto makers have always been in forefront in heavy use of TV—and in violent attacks on it. Madison Ave. is talking this week about another verbal assault against the medium by an auto industry spokesman—an assault reminiscent of last year's blast at TV as a durable goods sales medium by pres. Ernest Jones of MacManus, John & Adams agency (Vol. 12:13 et seq.), which, it had been hinted, represented the views of clients Pontiac & Cadillac. Latest attack came from Chrysler of Canada sales v.p. C. O. Hurly in address to Canadian Federation of Advertising & Sales Club . . . "Babied, humored and spoiled" by advertisers, TV is becoming a "monster," Hurly said. He urged the business & advertising fraternities to take "a cold, searching look at the somewhat ludicrous spectacle that we both present today"—the businessman a Sinbad, "blind as a bat, being led down to the sea by an eager, keen-eyed, clean-limbed young fellow in an ivy-league suit" . . . "The great home world of entertainment," which started as servant of advertising, he continued, is now "calling the tune." Advertising, he said, shouldn't be "the crutch upon which a vast segment of the world of entertainment, culture and enlightenment should lean . . . Industry and business simply cannot afford the luxury of any form of advertising which does not deliver a fair return for services rendered" . . . Auto firms, nevertheless, are pretty solidly lined up in network TV picture for next year. One sudden cutback, however, was Lincoln's dropping of CBS-TV's *Ed Sullivan Show* after 8-year stretch (Vol. 13:25), Mercury retaining alt.-week sponsorship, with Eastman Kodak jumping into the breach to pick up the reputed \$5,000,000-a-year total tab for the alt. week . . . Two auto makers have firmed up big network deals for all-star "specials"—GM with 2-hour 9-11 p.m. colorcast in Nov. on NBC-TV commemorating its 50th anniversary and budgeted at \$500,000, and Ford Motor Co. with an all-star CBS-TV special next fall to introduce new Edsel line, preempting *Ed Sullivan* for one week (presumably the Mercury-sponsored week, which would not add to Ford's over-all TV time bill) . . . Fairy tales sell: The Henry Jaffe-Screen Gems series of 16 hour-long fairy tale specials featuring Shirley Temple on NBC-TV about once every 3 weeks, beginning next Jan., is sold out—the 3 sponsors paying total of some \$4,000,000. Breck Shampoo has bought half, with Sealtest & Hill Bros. coffee sharing other half on split-network basis—Sealtest in east, Hill Bros. in west . . . "Sweet Success of Smell" is June 26 *Variety's* catchy headline for survey showing cosmetic advertising slated for TV next season totals some \$33,000,000 . . . Accurate data on reruns of TV film series will be made available to Screen Actors Guild, for purposes of comput-

ing payments to its members, according to announcement by Guild that information will be furnished it on regular & continuing basis by CBS TV Film Sales, CNP, ABC TV Film Syndication, MCA-TV & Screen Gems. SAG members have received \$1,321,000 in rerun payments to date . . . Appointment of Ted Cott as executive of burgeoning NTA (Vol. 13:25) seen as sign the film distributor is ready to get moving on its station acquisition plans; negotiations reportedly are already in progress . . . NTA has obtained distribution rights to *20th Century-Fox Hour* from the movie maker, getting the 37 hour-long shows which were used on CBS-TV in the last 2 years, with 20th Century-Fox planning to produce 20 new shows in the series for use on NTA Film Network (50% owned by 20th Century) . . . Week's chuckle: TV-radio weather forecasts are rigged and over-emphasized by stations, to keep folks away from the movies, Minnesota movie exhibitors believe—so says June 26 *Variety*, in St. Paul-dated story.

Negotiations for new music licensing agreement between TV industry and ASCAP opened this week in New York with "friendly and general" initial discussion, with next meeting planned in about a month. Meanwhile, boiling lobbying and press-release dispute between ASCAP members & their spokesmen and BMI continued in a manner which was neither friendly nor general, both sides moving up their big-name artillery. In behalf of Songwriters Protective Assn., consisting of ASCAP members, Bing Crosby made the newspapers with letter to Chairman Magnuson (D-Wash.) of Senate Commerce Committee, complaining that "pressure exerted by BMI" is responsible for current popularity of musical "trash" and charging "monopolistic trend in music on the part of the broadcasters." BMI v.p. Robert J. Burton countered that Crosby letter "is part of a continuing effort to prejudice the outcome of the trial of an important lawsuit brought by ASCAP members against BMI." He released statements by 21 top performers stating that they had never been subjected to pressure to perform BMI songs on TV-radio or recordings. Though Senate Commerce communications subcommittee staff, under counsel Nick Zapple, is making fact-finding investigation of music licensing situation, Chairman Pastore (D-R. I.) told us he hasn't decided whether to hold any hearings—and the implication was that certainly nothing will be started in this session of Congress.

First World Congress of commercial telecasters from 15 nations will open Sept. 18 in London. Coordinator of program, including special session in Paris, is Young & Rubicam v. p. Harry Rauch. "TV As a Medium of World Communication" is theme of one London session under auspices of People-to-People Foundation.

Compromise proposal to end stalemate over FCC network study committee's demands for data from 4 reluctant TV program organizations was submitted this week to N. Y. Federal Court Judge Bryan by the 4 companies. They offered to give committee the confidential financial data it seeks, but in "coded" summary form as prepared from their raw figures by an independent accounting firm. In this way, the packagers argued, prices, grosses, profits, etc., could not be identified with any particular program series. Earlier, Judge Bryan reserved decision on FCC motion to force the 4 firms to honor subpoenas to produce financial data, after hearing arguments by FCC gen. counsel Warren Baker and attorneys for the packagers. Judge called for reply briefs July 2. The 4 programmers are MCA-TV and its affiliated Revue Productions, Columbia Pictures' Screen Gems and Ziv TV.

Finally taking first dip into TV-radio ownership, following lead of *Time*, *Newsweek* is about to close deal for purchase of less-than-controlling interest in TV-radio combination in substantial secondary market. Negotiations are being handled by broker Howard Stark, who participated in *Time's* acquisition of Bitner properties.

Rate increases: WFMY-TV, Greensboro, N. C. Aug. 1 raises base hour from \$650 to \$800, min. \$130 to \$160; KSBY-TV (formerly KVEC-TV), San Luis Obispo, July 1 added Class AA hour (7:30-9:30 p.m. daily) at \$220, min. at \$44, Class A hour remaining \$200.

AAAA issues 1957 roster listing 329 member agencies in 656 offices in 93 U. S. cities and 43 abroad, copies available from 420 Lexington Ave., N. Y.

National Community TV Assn. will hold 7th annual convention next June in Mayflower Hotel, Washington.

New and Upcoming Stations: WBLN, Bloomington, Ill. (Ch. 15) ceased operation June 3, owner-mgr. Worth Rough has informed FCC, also stating he plans to resume Aug. 1 after filing ownership change resulting from stock sale to area viewers (Vol. 13:20). On-air box score stands at 500 (91 uhf).

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WBLK-TV, Clarksburg, W. Va. (Ch. 12), changing TV & radio call letters July 15 to WBOY-TV & WBOY, plans start on first day of World Series as NBC-TV affiliate, according to Jack N. Berkman, pres. of Friendly Group, also operator of WSTV-TV, Steubenville, O. (Ch. 9) and KODE-TV, Joplin, Mo. (Ch. 12). Make of transmitter isn't reported, but WBOY-TV will use 6-bay RCA turnstile antenna on 425-ft. Stainless tower. Base hour not set. Rep will be Avery-Knodel.

WTIC-TV, Hartford, Conn. (Ch. 3) has changed test pattern target to Aug. 15, programming target as independent remaining Sept. 1, reports public relations v.p. Bernard Mullins for owner Travelers Bestg. Service Corp., subsidiary of Travelers Insurance Co. RCA 25-kw transmitter is in place ready for wiring, construction of 442-ft. Ideco tower on Talcott Mt., Avon, Conn., awaits delivery of base insulators. Installation of 100-ft. antenna is scheduled for Aug. 7. Wiring of master control room equipment has begun and large TV studio is nearly ready in downtown Hartford, as is microwave link on roof of studio building. Base hour will be \$800. Rep will be Harrington, Righter & Parsons Inc.

WCBC-TV, Anderson, Ind. (Ch. 26) plans Sept. 1 programming, but hasn't signed with network, reports Charles Bates, WCBC program director. It has 1-kw RCA transmitter installed, and antenna is to be placed on 500-ft. Ideco tower Aug. 10. Owner is Great Commission Schools Inc. (Church of God denomination), which operates local school system and Anderson College & Theological Seminary. Base hour will be \$150. Rep not chosen.

WEEQ-TV, La Salle, Ill. (Ch. 35) has awarded contract for construction of studio-transmitter building near

Tonica, Ill. and plans Aug. 1 start, reports Fred Mueller, gen. mgr. of WEEK-TV, Peoria (Ch. 43), which will operate WEEQ-TV as satellite. GE 1-kw transmitter was due June 30. It has 400-ft. Stainless tower ready, but antenna isn't due until July 15. Edward G. Smith, asst. mgr. of WEEK-TV, will be gen. mgr. with Wm. W. Pendergraft, also from WEEK-TV, chief engineer. WEEK-TV hour is \$475. Rep is Headley-Reed.

WSUR-TV, Ponce, P. R. (Ch. 9) hasn't received studio facilities and now has July 30 programming target, reports gen. mgr. Mariano Angelet Escudero. It has Adler transmitter and 200-ft. Lehigh tower with RCA antenna on Mt. Maravilla. Base hour will be \$120-\$150. Rep will be Pan American Bestg.

KTCA-TV, St. Paul-Minneapolis (Ch. 2, educational), which aired first test patterns March 8 (Vol. 13:13), plans programming start Sept. 2, reports director John C. Schwarzwalder for Twin City Area Educational TV Corp.

New reps: WAAM, Baltimore, to Blair-TV July 1 (from Harrington, Righter & Parsons); KVIP, Redding, Cal. to Hollingbery (from Branham); WVUE (formerly WPFH), Wilmington-Philadelphia, to Katz (from Raymer); WJBF, Augusta, Ga. to Avery-Knodel (from Hollingbery).

GE shipped 5-kw used transmitter June 21 to upcoming WJCT, Jacksonville (Ch. 7, educational), due in fall; 20-kw amplifier to KVIP, Redding, Cal. (Ch. 7), planning boost to 117-kw; equipment for shifting WFIE-TV, Evansville, from Ch. 62 to Ch. 14.

RCA shipped 50-kw & 10-kw transmitters June 19 to upcoming WPST-TV, Miami (Ch. 10), due in Aug.; 50-kw transmitter June 24 to WVUE (formerly WPFH), Wilmington-Philadelphia (Ch. 12).

RCA shipped 3 live color cameras to Crosley Bestg., Cincinnati, to be used in RCA color mobile truck; 3-V color film camera June 27 to KFSD-TV, San Diego.

GE shipped color scanner June 24 to its WRGB, Shenectady.

Call letter changes: WPFH, Wilmington-Philadelphia, to WVUE; KTXL-TV, San Angelo, Tex. to KCTV.

ELECTRONICS PERSONALS: Wm. S. Wheeler, corporate planning asst. to Motorola pres. Robert Galvin, promoted to mgr., Chicago military electronics center, replacing Arthur L. Jones, resigned . . . Dr. H. Wm. Welch, ex-U of Mich., named director of research & development, Motorola military electronics div., Phoenix . . . Earl E. Sargent promoted to mgr., Sylvania Woburn, Mass. special tube plant . . . John R. Lenox elected v.p.-operations, Datamatic Corp. . . . Howard Patterson elected Varian Assoc. v.p., microwave tube activities; Arnold Wihtol succeeds him as tube div. mfg. mgr. . . . Arnold H. Henriksen appointed Helipod div. mgr., Beckman Instruments Corp. . . . David A. Harkavy, ex-Lafayette Radio, named industrial products ad mgr., DeJur-Amsco Corp. & Continental Connector Corp. . . . Kenneth Stiles promoted to v.p. for plans & programs of General Dynamics.

The vacuum is gradually going out of fashion in electronics. Witness 2 recent developments: (1) The "Solion"—a device activated by flow of ions in iodine solution. Developed by Naval Ordnance Lab, it can be made extremely sensitive to changes in temperature, pressure, light, sound or acceleration. Believed to be useful for missile & plane inertial guidance—but far less bulky than present equipment—it's also said to have applications for

heat controls, alarms, pressure indicators, etc. (2) New solid-state microwave amplifier using ferrite material has been developed to laboratory stage by Bell Labs, is expected to operate at much lower noise level than conventional amplifiers. Says Bell: "Thus it has exciting possibilities as an amplifier for very weak microwave signals such as may be encountered in the fields of radio astronomy, microwave relaying & radar."

Radio industry mobilization for World War II is recounted in *The Signal Corps: The Test*, published June 21 by Dept. of Army (621 pp., \$4.50, Govt. Printing Office, Washington). Signal Corps history of first 18 months of war relates how industry supplied army of 7,500,000 with radio equipment by mid-1943 although before Pearl Harbor only 15 of 180 manufacturers had produced military radios.

Industrywide survey of research & development personnel and company outlays has been started by Labor Dept. for National Science Foundation at President Eisenhower's request. Similar 1953-54 study showed private industry spent \$3.7 billion and employed 400,000 (including 157,000 scientists & engineers) in research & development.

General Transistor Corp. sets up subsidiary General Transistor International Corp. as exclusive foreign market agency to export transistors, import raw materials, negotiate licenses. Allan Easton, sales v.p. of parent, is pres.

AD PLANS FOR 'SLIM LOOK' MARKET DEBUT: Feeling TV's new "slim look" is something to get excited about, TV receiver manufacturers are in process of firming up plans for communicating this excitement to public. Advertising plans of some major makers haven't yet jelled -- or else they're playing it close to the chest -- but here are details we've been able to pinpoint this week:

GE advertising program is aimed at giving "this TV new look the widest possible audience with the greatest possible frequency within budgetary considerations." Greatest ad saturation is aimed for final 4 months of 1957. Program includes 4-color spreads in Life, Saturday Evening Post, Reader's Digest, This Week. Trade ads will be carried in Electrical Merchandising, Home Furnishings Daily, Mart, Electrical Dealer, NARDA News, American Motel, Tourist Court Journal. General Electric Theater (CBS-TV) will include TV receiver dept. campaign.

Point of particular interest in GE ad plans is shift of copy emphasis from portables -- which it popularized and which accounted for good share of its production -- to more profitable table and console models.

Another all-out l10-degree advocate, Sylvania is expected to spend 50% more in 1957 TV-radio-hi-fi ads than it did in 1956. No final estimates are in yet, but all departments should show increase. Program includes weekly TV show (ABC), major consumer magazines, trade press. Incidentally, Sylvania will have 50% more insertions in consumer magazines during year's final quarter compared with same period year ago. No use of radio is planned, but contributions to local distributor campaigns are to be increased 150% -- some of which may show up in local radio.

Sylvania plans show increased emphasis on promotion programs, such as monthly promotions of sunshade for portables, etc., spokesman told us. He added that new TV look will be played up -- with considerable emphasis also going to hi-fi; ad budget possibly may double last year's.

RCA will kick off ad campaign on slim black-&-white sets with double-page layout in July 29 Life, followed by insertions in Saturday Evening Post, Sunset, Progressive Farmer, etc. Total ad budget is expected to be about the same, or a little higher than last year when RCA spent \$35,173,000 for all divs. Of total, nearly \$25,000,000 was in measured media of TV, radio, outdoor, print.

Special series of ads on portable line will be carried in Life during Aug.; similar ads are scheduled in Saturday Evening Post, Farm Journal, etc. in Sept.

TV plans for new line include sponsoring Julius LaRosa summer show (NBC-8 p.m., Sat.), Eddie Fisher-George Gobel (with RCA Whirlpool) fall show (NBC-8 p.m., Tue.). Summer radio sponsorships are Monitor, Bob and Ray Show.

Philco plans to spend about 15% more on ads for all products compared with last year's outlay. Spokesman says biggest increase will probably be in local newspaper ads at dealer level. No breakdown is available on various media, but we're told consumer magazines will be used; there's no immediate plan for network TV.

DuMont also expects to spend more money this year on TV-radio-hi-fi line -- possibly as much as \$1,500,000 with budget set at about 8% of sales. Biggest segment will go to Sunday papers, plus co-op ads -- which are being raised from 1½% to 2½% of sales by both DuMont and distributors. Spot radio and magazines may be added.

Hotpoint's ad budget for TV is expected to run about \$1,000,000 in 1957 -- half in magazines, 30% in radio spots, 20% in newspapers. Starting in Aug., spots will be used in 40-45 markets, plus heavy schedule in Life. Co-op newspaper and radio ads will support the national campaign.

Hoffman plans aggressive dealer-level fall campaign to sell new line. Pro-

gram includes premiums, giveaways, national and local ads. TV-radio spots will be used, plus full-color ads in Parade, This Week, American Weekly.

Motorola does not show new line until July 18, but it tells us that ad budget will be heavier than last year's. It's already using full-page ads in Home Furnishings to plug new "Super Americana" portable with 110-degree tube.

Economic Views: More optimism was voiced by business leaders (Vol. 13:25) this week -- along with words of caution from President Eisenhower and Dr. Edwin G. Nourse, chairman of Council of Economic Advisers under President Truman.

Rosy outlook was delineated by Commerce and Industry Assn. of New York, Inc., made up of representatives of national firms having offices in N.Y. Nearly 250 participated in survey, gave these views: Some 49% said first half of 1957 was up 14.9% over last half of 1956; 24.2% saw no change; 26.9% reported business was off. Final 6 months of 1957 was etched this way: About 40% expect 14.3% increase; 40.5% saw no change; 19.5% anticipate a decrease.

Further breakdown shows wholesalers most optimistic group; 45% expecting upswing, 45% seeing no change, 10% looking for drop in final 6 months of 1957.

Another upbeat forecast came from 12 key executives of diverse industries, polled by First National Bank of Chicago. They see "high plateau" in last 6 months.

President Eisenhower's cautioning came at June 26 news conference at which he appealed for business and labor statesmanship to avoid "alarming" inflation threat. He urged businessmen to reflect before raising prices. And he told labor leaders wage increases should be demanded only where there is an increase in productivity -- or to correct "demonstrable injustices." Dr. Nourse told National Citizens Committee to Curb Inflation that the real inflation source is "in the market place, in the institutions and practices of labor unions and corporation price administration."

Despite President's words, U.S. Steel Corp. raised steel prices average of \$6 per ton, saying boost was necessary to offset higher wages and benefits to take effect July 1 under 3-year contract with United Steelworkers of America. Pay boost of 12% for postal workers was approved June 27 by House Post Office & Civil Service Committee. Hearings start July 2 on bills to raise pay of other govt. workers.

Production: TV output was 142,910 week ended June 21, compared with 116,302 preceding week and 105,947 in corresponding week one year ago. It was the year's 25th week and brought TV production for year to date to about 2,601,000, compared with 3,304,597 in same period of 1956. Radio production totaled 252,299 (98,616 auto) week ended June 21, compared with 229,967 (86,270) the preceding week and 229,041 (63,813) in corresponding week year ago. Radio output for 25 weeks totaled about 6,986,000 (2,759,000) vs. 6,444,410 (2,254,399).

Topics & Trends of TV Trade: What are principal causes of TV interference? July *Radio & TV News* cites survey of more than 2600 cases by Cooperative Interference Council of Los Angeles, indicating these 18 sources responsible for nearly 95% of complaints: Heating pads 409 cases, TV receivers 190, electric wiring 164, radio receivers 146, doorbell transformers 86, fluorescent lights 79, TV receiver installations 76, TV receiver radiation 71, butter conditioners 51, neon signs 46, refrigerators 37, radio stations 29, voltage irregularity 29, electric flashers 28, AC modulation 27, house wiring 25, universal motors 24, amateur radio stations 24. Council noted that in nearly one out of 5 cases, device generating the interference was operated by the complainant.

Emerson 1958 line, introduced June 26 at Lido Beach, N. Y., features 110-degree tube in 3 portables and 1 table model, short-neck 90-degree tube in rest. Line includes two color sets. Prices for black-&-white: portables (8½, 14, 17, 21-in.), \$134-\$268; tables (17, 21-in.), \$168-\$248; consoles \$248-\$308; Eldorado Series consoles & consolettes, \$248-\$328; combinations (17, 21-in.), \$268-\$318. Eight-transistor pocket radio also was introduced at \$44.

Commenting on 1957 color prospects this week, Motorola pres. Robert W. Galvin says his feeling is that "not more than 100,000 color TV sets will be sold this year." He points out that if production estimate of 200,000 sets is accurate, "it raises question of what will be done with the balance."

Whirlpool Corp.'s Appliance Buyers Credit Corp. (Vol. 13:16) opens first divisional office in St. Louis, providing financing service for RCA & Whirlpool distributors and dealers "where needed." Joseph B. Hawkins, ex-Redisco, is mgr. of St. Louis office; other offices are to be opened in Seattle, Cleveland, Chattanooga.

* * * * *

Business increases of 13-25% were forecast for next year by speakers at meeting of Assn. of Electronic Parts & Equipment Mfrs. in Chicago this week.

Kansas City color set sales were 80 in May, bringing total to date to 2077, according to city's Electric Assn.

Trade Personals: Herbert E. Taylor Jr., ex-Federal Telephone and Radio Co., named industrial products marketing mgr., Philco govt. & industrial div. . . F. P. Rice, ex-DuMont TV receiver div. mgr., appointed pres. of International Resistance Co. subsidiary Circuit Instruments Inc., St. Petersburg . . . John J. Kingan resigns as Canadian Marconi v.p.-gen. mgr. . . Gerald M. Miller, ex-Schramm Inc., appointed administrator, adv. & sales promotion, RCA components div., Camden; Joseph C. Weitzman promoted to market planning research analyst . . . James D. Kingery elected Bell & Howell v.p., electronic and professional equipment and instruments div. . . Robert M. Reed, ex-York, RCA & Norge, appointed Winston Electronics Inc. asst. national sales mgr. . . Sidney Brandt, ex-Raymond Rosen & Co., appointed Magnavox regional mgr. for eastern Pa., Md., headquartering in Reading.

New RETMA of Canada pres. is W. H. Jeffery, Philco of Canada v.p.-gen. mgr., who succeeds John D. Campbell, Canadian Westinghouse v.p.-gen. mgr., consumer products div. Others elected: Stuart D. Brownlee, Canadian Admiral, v.p. & chairman, receiver div.; W. Frank Wansbrough, Canadian GE, vice chairman, receiver div.; A. L. Stopps, El-Met-Parts Ltd., v.p. & chairman, components div.; J. Key, Aerovox Canada Ltd., vice chairman, components div.; W. Jones, Pye Canada Ltd., v.p. & chairman, electronics div.; R. M. Robinson, Canadian GE, vice chairman, electronics div. Reappointed: R. A. Hackbusch, Hackbusch Electronics Ltd., director of engineering; F. W. Radcliffe, gen. mgr.-secy.

Canadian RETMA officials see industry developing spirit of optimism, term balance of year's outlook "encouraging," predict firmer prices. New pres. W. H. Jeffery, Philco of Canada v.p.-gen. mgr., said manufacturers are matching production to demand, cleaning up inventories, aiming toward reasonable prices. Outgoing pres. John D. Campbell, Canadian Westinghouse v.p.-gen. mgr., told annual meeting June 21 at Adele-en-Haut, Quebec, that "the economy remains strong, and the industry is in a good position to capitalize on it." He went on to say that inventories are improved; that new sets feature better styling, are more compact due to 110-degree tubes. Volume for year was estimated at 500,000, which Campbell said was less than previous 2 years but "still a very healthy volume." He declared "we can look forward to color and some more stations with a greater degree of confidence, and if the new Parliament will act on their recommendation for financing the CBC, we should soon be relieved of the burdensome 15% excise tax."

Dynamics Corp. earned \$308,003 (7¢ per share) on sales of \$9,949,459 in first quarter vs. \$307,322 (7¢) on \$9,900,750 in similar period year earlier, pres. David T. Bonner reporting military & industrial orders in electronics, communications & small appliance fields "indicate a continuing good level of sales." Subsidiary Radio Engineering Labs recently received subcontract from Western Electric for tropospheric scatter radio equipment, part of \$32,000,000 backlog.

Teleprompter Corp. stockholders will hold special meeting July 15 in N. Y. to vote on increase in capital stock and 2½-for-1 split proposed by directors, chairman & pres. Irving B. Kahn stating increase is needed for expansion program but no additional financing is contemplated now. Teleprompter stock was selling over the counter at 23 this week.

DISTRIBUTOR NOTES: Westinghouse names Samuel J. Brechner, ex-Gerald O. Kaye & Assoc., gen. mgr. of wholly-owned Westinghouse Appliance Sales Co., N. Y.; he succeeds v.p. & gen. mgr. C. J. Ward who joins headquarters sales staff, Pittsburgh . . . Motorola appoints South Bend Electric Co. Inc., 437 E. Colfax Ave., replacing Femco Inc.; Wm. E. Laswell, Fla. regional sales mgr., transferred to Cal. regional sales mgr. (Los Angeles, San Francisco, San Diego, Fresno), replaces James M. Tuttle, regional; W. Alex Kuehlthau, ex-Gibson, appointed Seattle regional sales mgr. (Portland, Spokane, Salt Lake City, Billings), replaces H. E. von Kahrs, resigned . . . Emerson N. Y. moves to No. 1 Boston Post Rd., Larchmont . . . DuMont appoints Orgill Bros. Hardware Co. Inc., 301-11 W. Pearl St., Jackson, Miss. (Joseph Orgill Jr., pres.) for central & southern Miss. except Jackson, Meridian, Hattiesburg, Brookhaven, Vicksburg, Yazoo City . . . Sampson Co. buys 50% of Electronic Utilities Corp. (Braun, Siemens, Novak hi-fi); Bernard J. Golbus named asst. to Electronics pres. Paul M. Davison; Jack Ricard, ex-Ironrite, succeeds Golbus as Sampson merchandise mgr. . . Otto W. Brodnitz resigns as Delmonico International Corp. secy.-treas. . . Kuba Import Co. Ltd. (Kuba hi-fi radiophones) moves national sales office from Delmonico Hotel to 1120 Broadway, N. Y. . . Admiral promotes D. P. Mahin gen. mgr. of Admiral Distributors-Detroit div.; he has been gen. sales mgr. of Detroit branch.

Treble damage suit for \$2,250,000 was filed this week against IT&T by Olson & Co., former Philadelphia distributor for Capehart-Farnsworth line. Suit charges violation of Robinson-Patman Act, alleging IT&T sold Capehart-Farnsworth products to "favored" distributors in N. Y., Mass., N. J., Pa., Md., D. C. at lower price than to Olson. Olson complaint said these distributors then shipped into Philadelphia area at cut prices.

National TV Week organizational meeting was held June 25 in Chicago with Daniel J. Edelman & Assoc., Chicago public relations firm, handling promotion. Plans for Sept. 8-14 observance expected to be disclosed in mid-July. Sponsors: NARDA, RETMA, NARTB, TvB, NAMM, NEDA, National Retail Furniture Assn.

RCA expects 60% increase in its hi-fi sales this year with industry producing 1,500,000 units compared with 900,000 in 1956. Radio-hi-fi sales mgr. L. W. Collins also told Chicago news conference that RCA probably will demonstrate stereo disc by year's end.

Former CBS-Columbia plant in Long Island City was sold this week to Neptune Meter Co. in \$2,000,000 deal by realtor Frederick Brown who bought it last March.

General Instrument Corp. achieved a profit in quarter ended May 31, compared with \$84,355 net loss for similar period last year, chairman Martin H. Benedek told annual stockholder meeting June 27. He said that although final figures aren't available, sales were "substantially higher" than the \$5,668,079 of same quarter last year. He said that orders for TV components indicate industry sales & earnings have "touched bottom and are now definitely on the way up."

Dividends: General Dynamics, 50¢ payable Aug. 10 to stockholders of record July 12; Lear, 15¢ July 29 to holders July 15; Electronic Assoc., 100% stock July 30 to holders July 8; Topp Industries, 4% stock July 26 to holders July 12.

Guild Films earned \$216,000 (14¢ per share on 1,535,000 shares outstanding) in 6 months ended May 31 vs. \$40,000 (4¢ on 1,035,000) in same period year ago.

Network Television Billings

May 1957 and January-May 1957

(For April report see *Television Digest*, Vol. 13:22)

NETWORK TV BILLINGS in May maintained steady advance this year over 1956, totaling \$43,468,833 for 7% gain over \$40,610,429 in May 1956. Cumulative total of business in first 5 months was \$211,231,303—up 7.6% from year earlier. CBS-TV again paced networks with 11.3% increase last month above same 1956 month—\$20,331,441 vs. \$18,260,894. The complete PIB report for May:

NETWORK TELEVISION

	May 1957	May 1956	% Change	Jan.-May 1957	Jan.-May 1956	% Change
CBS	\$20,331,441	\$18,260,894	+11.3	\$98,429,274	\$88,563,636	+11.1
NBC	15,878,585	15,710,403	+ 1.1	79,120,519	75,342,803	+ 5.0
ABC	7,258,807	6,639,132	+ 9.3	33,681,510	32,361,238	+ 4.1
Total	\$43,468,833	\$40,610,429	+ 7.0	\$211,231,303	\$196,267,677	+ 7.6

1957 NETWORK TELEVISION BY MONTHS

	ABC	CBS	NBC	Total
Jan.	\$ 6,715,581	\$20,231,474	\$16,554,941	\$ 43,501,996
Feb.	6,175,488	18,309,088	14,900,631	39,385,207
March	6,848,848	20,172,173	16,631,974	43,652,995
April	6,682,786*	19,385,098	15,154,388	41,222,272*
May	7,258,807	20,331,441	15,878,585	43,468,833
Total	\$33,681,510	\$98,429,274	\$79,120,519	\$211,231,303

* Revised as of June 26, 1957.

Baseball broadcasts earned \$6,802,721 for 15 major league clubs in 1956, according to financial reports filed June 25 with anti-trust (Celler) subcommittee of House Judiciary Committee. Top TV-radio income in American League—\$1,053,171—was reported by Cleveland. Brooklyn led National League with \$888,270. Others: Baltimore, \$301,630; Boston, \$477,300; Chicago White Sox, \$518,992; Chicago Cubs, \$226,270; Kansas City, \$210,000; N. Y. Yankees, \$900,000; N. Y. Giants, \$730,593; Washington, \$316,640; Cincinnati, \$267,275; Milwaukee, \$125,000; Philadelphia, \$301,650; Pittsburgh, \$158,000; St. Louis, \$327,450. Detroit did not file complete report.

Sen. Potter's proposal for a top-level independent study of govt. usage of spectrum space (Vol. 13:25) has received warm reception throughout industry. Chairman Pastore (D-R.I.) of Senate Commerce communications subcommittee told us: "I personally am very amenable to the proposal." He said he had not yet made plans to hold hearings on the resolution, but lack of expressed opposition indicates possibility that Commerce Committee might approve resolution without hearings.

One application for TV station and one for translator were filed with FCC this week, bringing total to 123 for stations (33 uhf) and 50 for translators. Station application was for Pittsburgh, Ch. 47 (see adjoining column), by Metropolitan Pittsburgh Educational TV Station, operator of WQED (Ch. 13). Translator application was for Cedarville, Cal., Ch. 70, by Surprise Valley TV Club. [For details, see *TV Addenda 24-Y* herewith.]

Application by Louisville's WHAS-TV (Ch. 11) for taller tower, continually rebuffed by Airspace Subcommittee during 5 years of site-searching (Vol. 13:13) was designated for hearing this week by FCC, which made Lexington's uhf WLEX-TV & WLAP-TV (CP) parties to hearing. They had objected to site move and height increase.

One of Australia's 4 commercial TV stations, Sydney's ATN, announced that its losses amounted to some \$900,000 in first 6 months of operation—but is expressing faith in future of TV by investing \$450,000 in additional equipment.

FORMALLY REJECTING proposals to license currently unauthorized boosters, FCC this week served notice that the approximately 200 illegal repeaters should find a home in the uhf band via translator operation. At the same time, it officially decided against authorizing any on-channel booster service for vhf stations, but proposed to license booster stations to fill holes in uhf stations' coverage areas.

The negative actions on vhf boosters were in answer to Appeals Court decision 2 months ago which upheld Commission's power to bar operation of illegal boosters, but also asserted they shouldn't be kicked off the air until they have a legal "home" in the spectrum (Vol. 13:18). Termination of vhf booster proceeding in effect served notice to the unlicensed boosters (FCC knows of 176 still in operation) that their "home" will be in the uhf band, via translators.

Commission is still worried about the court decision, since it appears to give FCC discretion on question of whether to issue cease-&-desist orders to enforce its own rules—and FCC apparently still anticipates trouble when it tries to get the unlicensed boosters off air. Therefore it's considering whether to appeal decision to Supreme Court to seek eradication of "discretionary" provision.

As to uhf boosters, Commission proposed: (1) That they be employed only to fill in shadows within station's normal Grade A area. (2) That they be owned only by licensee of "mother" station. (3) That their power be limited to that necessary to provide signal of 5 uv/m at "most distant political boundary" of principal community in area to be served, ERP not to exceed 5-kw. Comments on proposal are due by Aug. 1.

For all other circumstances, Commission stated, "we see no reason why translators cannot be employed by any community beyond the range of existing TV stations as a means of providing service."

Two-channel educational TV service is proposed in letter to FCC from John T. Ryan Jr., pres. of Pittsburgh educational WQED (Ch. 13). Station requests permission to operate also on Ch. 47, unoccupied in Pittsburgh for almost 5 years. Ryan said TV's limitation to one class at a time poses "serious handicap for this new educational tool," adding that closed-circuit is too costly. He said station would offer classroom instruction throughout day on both channels, as well as "special educational services for industry and the professions—services which are badly needed but are not appropriate for programming on the regular channel." He said WQED has been providing 78½ hours of programming weekly since its debut in April 1954, and that 97 public school districts are contributing 30¢ per pupil to help maintain station's classroom services. He requested waiver of rules, if necessary, to permit the multiple-grant.

Heavy program of educational telecasts is planned by WVEC-TV, Norfolk-Hampton, Va. (Ch. 15) in experiment jointly sponsored by Norfolk public schools and financed under Ford Foundation's \$4,000,000 fund-matching program of grants for nationwide test of teaching by TV (Vol. 13:20). Under local program budgeted at \$112,000 for first year, station will give school system 2 hours of air time (9-10 a.m. & 1-2 p.m.) each school day from next Sept. 9 to June 4, 1958, will also provide complete camera & technical facilities, studios and engineering & programming personnel. Some 35-40 teachers will participate in preparatory summer TV workshop.

SUMMARY-INDEX OF THE WEEK'S NEWS — July 6, 1957

FREDERICK FORD NOMINATION to FCC elicits strong commendation. Justice Dept. official handled tough cases during stint as FCC attorney, 1947-53 (p. 1).

STANTON OFFERS CREDO for TV-radio journalism, defends CBS-TV interviews with Communist leaders as public service in National Press Club speech (p. 2).

TV IN RUSSIA, as observed by Bell Labs' Axel Jensen: Equipment well designed; production mechanization needed; NTSC-type color system (p. 3).

REP. HARRIS ACCUSES FCC of violating law in fee-TV rule making. Telemeter files with Commission, opposing tests, urging start of regular service (p. 6).

SAN FRANCISCO-OAKLAND decision turns on service to whole area, FCC disagreeing with examiner. Several petitions for reconsideration denied (p. 8).

PORTABLE TV PRODUCTION for 1957 hits 800,000, or 30% of 6-month total; RCA, Motorola, Sylvania, Admiral, Philco, DuMont assess market (p. 10).

FLAT WALL TV not around corner, but closer than many think, as Sylvania treads carefully to underplay TV possibilities of its image-producing panels (p. 11).

TRANSPARENT-PHOSPHOR cathode ray tube to be shown by GE in resumption of once-discarded development; Navy developer tells of progress (p. 12).

CENSORSHIP OF INTERVIEWS with Iron Curtain leaders, through screening of questions, urged by Rep. Maden. President denounces proposal (p. 8).

NATIONAL ADVERTISER SPENDING on TV to exceed \$1 billion this year for first time, according to McCann-Erickson tabulation for Printers' Ink (p. 14).

FORD FCC NOMINATION DELIGHTS INDUSTRY: Designation of Frederick W. Ford as FCC nominee to succeed Comr. McConnaughey, announced by President Eisenhower this week, truly pleased and relieved just about everybody. We can't recall when a Commission appointment evoked such warm approval. Unique thing about it is that approbation came from the entire political spectrum -- from GOP to Democratic extremes.

Darkest of dark horses, the 47-year-old Ford never had been mentioned during the month of speculation. Currently a Justice Dept. official -- assistant deputy attorney general under Wm. P. Rogers -- he had made excellent record at FCC during service on staff from 1947 to 1953, rising to chief of hearing div. before joining the Justice Dept. as first assistant to asst. attorney general J. Lee Rankin, who is now U.S. solicitor general.

Ford is regarded as a solid, savvy lawyer -- no bleeding heart, nobody's pawn. Under both Democratic and GOP leadership at FCC, he gained the industry's respect. His 2 biggest cases were hearing on ABC-United Paramount Theatres merger and the Richards case. In the first, as Commission counsel, he made all parties toe the line -- but everyone ended up feeling he'd been fair. Richards case was a messy fight over charges that G. A. (Dick) Richards had ordered news slanted on his KMPC, Los Angeles (Vol. 5:1 et seq.). A less stable lawyer could have wound up badly smirched. Ford didn't.

Ford also led FCC's activities in streamlining hearing procedures to cope with enormous load brought on by end of TV freeze in 1952. In fact, Commission's work was cited as example for other govt. agencies -- when the Administration was striving to cut red tape of administrative procedures.

Nomination was surprise to Ford himself. He says he was called over to the White House June 27, asked if he'd take the job. "I gulped and said 'yes'," Ford relates. Next evening, he was told he was in. He shouldn't have any trouble getting Senate approval; hearing on nomination is expected within a couple weeks. New job won't mean huge jump in pay; he gets \$16,000 now, will get \$20,000.

A West Virginian, he was active in GOP politics before beginning government service in 1939. His late father had been state supt. of schools. A 1934 W. Va. U law school graduate, Ford was associated with law firm of Stathers & Cantrell, in Clarksburg, 1934-39. In Govt., he served in Federal Security Agency & OPA 1939-42. In Air Force 1942-46, he emerged with rank of major. After military service, he returned to OPA for a few months before joining FCC in 1947.

Ford is married, has one daughter, is a resident of suburban Alexandria, Va. He's very active in professional, civic and religious (Episcopalian) affairs. Personal characteristics: easy-to-know, direct -- and when at Commission he used to be described as "handsomest man on the staff."

FRANK STANTON OF CBS MEETS THE PRESS: Broadcasters as journalists are "duty-bound to bring the most important men and ideas of our times to the American people" who can be counted on to judge issues -- including Communist issues -- properly, CBS Inc. pres. Dr. Frank Stanton told National Press Club in Washington July 2.

In wide-ranging speech on "Journalism on the Air" he slapped back at press & Congressional -- and White House -- critics of CBS-TV interviews with such Communists as Nikita Khrushchev (Vol. 13:23-26): "The less this man -- or any man of his importance -- remains a myth or a dark legend or a mystery to the American people, the more certain they are to size him up correctly."

And Stanton brought burst of applause from the big Press Club audience when he said "a dark day is outside the door" if Congress ever agrees to proposal (H. Res. 305) advanced July 1 by Rep. Madden (D-Ind.) to require State Dept. screening of all questions in TV-radio interviews with Iron Curtain leaders (see p. 8). "I know we will do everything we can to make sure it doesn't come to pass," he said.

There's "no hope for a free press" unless it accepts Thomas Jefferson's opinion that the people "may be safely trusted to hear everything true & false and to form a correct judgment between them," Stanton said. "Indeed, there will be no use for it, because there will be no free society for it to serve."

In oblique reference to deprecatory remark by President Eisenhower last month that CBS-TV was just "commercial firm in this country trying to improve" its commercial standing with "unique performance" by Khrushchev, Stanton opened speech with: "Gentlemen, I come from a commercial firm."

Asked in question-&-answer period why CBS had made no retort to President then, Stanton said he now wished he had. His Press Club speech would have been the answer, and "you can't have a free press unless you have commercial enterprise. There has to be someone that provides the oil for the lamps of the journalist, and I didn't think that there was anything wrong with being commercial. . ."

* * * *

Other points in Stanton's "Journalism on the Air" credo:

"You can't say that it's all right for some people to be exposed to ideas or personalities but it's dangerous for others to be exposed. You can't say the people can be trusted once in a while or almost all the time. Once you start doing that, who is going to make the exceptions and on what grounds?"

"We have decided that it is unwise for our newscasters to act as editorialists. . . For one thing we are certain in our own mind that for radio & TV at least, reporting & editorializing are separate and quite distinct functions. . . Intermingling the two enervates them both; the news loses authority as it is sifted through the filter of opinion, and opinion loses its force as it is tugged & compressed to pass as the coverage of news."

"As journalists, we have seen our first job as reporting and our second as providing a forum for discussion & debate by public figures. . . The development of this newer function of airing editorial opinion is still subject to the sweat & care of responsible experimentation. But we know. . . we will not have achieved full

stature in journalism until. . . we exercise fully and as wisely as possible our fundamental [management] right to editorialize."

TV-radio press privileges, subscription TV, outlook for color TV, merger rumors, were covered by Stanton in question-&-answer period:

Question -- Radio & TV fought hard for their right to film & record the Presidential news conferences. Yet rarely are they broadcast in full. Why?

Answer -- A matter of news judgment.

Question -- What is the matter with pay TV?

Answer -- I think that the public would be short-changed if we had pay TV. I am not at all persuaded. . . that the public would go for it, but if the public did go for it, I think they would soon discover that they were then only beginning to pay for what they had been getting free up until that time . . . I think that the promoters would be hijacking the public . . . I think it would be only a very short time before most of your big shows that are now coming to the public free would be on the pay-TV schedule if it works.

If that happens and your networks as you now know them and your free stations as you now know them are converted, you will have a different kind of service in this country. . . And when you talk about getting more culture, I can't think of a promoter who if he had his choice between putting on Sadler Wells Ballet and Jayne Mansfield or Monroe -- is there any doubt in your mind what he is going to do?

Question -- What is the future for color TV?

Answer -- I think the future is very bright. . . I think eventually we will have most of our programs in color, but the timing is something that I don't think I would care to predict. But just as sure as we are here, some day you are going to have the majority of your schedule -- your live schedule at least -- in color. And I think you will get more out of it.

Question -- Would you comment on the rumor that CBS & Westinghouse are merging?

Answer -- One of you called me in N. Y. when that story broke. . . I commented at that time that there was nothing to it, there had been no conversations of any kind, and there has been no change since the date of that statement.

AXEL JENSEN DESCRIBES SOVIET TV PROGRESS: One of America's outstanding TV scientists -- Axel Jensen, Bell Labs director of TV research -- has returned from Russian trip with a healthy respect for the products of the Soviet TV industry and the technical brains behind them. He was one of 4 American electronics engineers invited to tour Russia by the Popov Society, Soviet equivalent of the IRE.

Jensen gave us his impressions of his tour of Russian TV-electronics facilities this week. His observations, in summary: While Russians unquestionably are far behind us in TV expansion, their electronic workmanship is excellent; their big need now -- which they apparently are hurrying to meet -- is for greater mechanization of production so that more products may be turned out at lower cost.

* * * *

Russia currently has 26 stations in operation, he was told -- all originating their own programming, with no interconnections, though the aim is to hook up all big population centers. Official goal is 65-70 stations by 1960. Only city with more than one station in operation is Moscow, which has 2 and is building a third.

Jensen toured Moscow stations. He found telecasting installations "not nearly as large as ours, but technically very good." Main station has 2 large studios, one using Soviet-built image iconoscope cameras of the type very popular in Europe, the other employing Russian image orthicon chains "similar to ours and just as good." Vidicon cameras, he said, are also used for some studio and closed-circuit purposes.

Transmitting equipment is similar to U.S. design, he found -- in fact, the original RCA transmitter purchased by Russia in 1930's is still in use, though "much

modified." Russian transmitters, he said, are "functionally designed, with fine workmanship, easily accessible for maintenance."

Moscow studios are housed in sprawling old buildings, he said -- but new and ultra-modern studios, which he compared with CBS-TV's Hollywood TV City, are now under construction, covering a large city block.

Clearing up widespread confusion about Russian color TV progress, Jensen -- who was a member of NTSC which devised U.S. color standards -- observed color development work in progress at TV Research Institute in Leningrad, where TV equipment is designed and manufactured for all Soviet stations. Building of a complete color TV studio was well under way there, he reported.

"They're doing a lot of color experimentation there," he said. "They have played with all the systems and they're leaning more and more toward a modified NTSC system compatible with their black-&-white standards. We discussed color and argued about it for more than 3 hours," he added -- not without a trace of nostalgia -- "and I felt as though I were back at NTSC."

"They asked all the proper questions about our color troubles -- they're quite conversant with the latest American developments, even quoting recent articles in our technical journals," he said, decrying fact that so few American electronic engineers are able to keep abreast of Russian developments in the field. "I have every reason to believe their color will be as good as ours -- and they may have fewer problems, since they have a wider band [7-mc] to work with."

* * * *

On visit to one of Russia's TV receiver factories, he saw sets being assembled by hand on moving belt by techniques "very much like ours," but with somewhat less mechanization. "Their biggest worry," he said, "apparently is how to supply the demand for sets; they're trying to mechanize production, speed up manufacture of equipment and components. Quality-wise, they have it."

Sets are now being made with screen sizes varying from 12 to 17-in., priced \$100-\$350 at official exchange rate -- but undoubtedly at least twice the equivalent of those prices in terms of buying power of the average Russian.

TV sets are obviously selling, nevertheless. "If you walk around Moscow or Leningrad and look at the rooftops -- not only of fine houses and apartments, but of the little shacks -- you see a sea of antennas, just like at home." He said he was told there are 2,000,000 sets in Moscow area alone.

Pictures that the Russians see are very good technically, he stated. As to programming, he said he didn't have much opportunity to observe, though there was a TV set in his hotel room. What he did see, he said, consisted of some live ballet from the Bolshoi Theatre, some filmed news shots and a children's program "conducted by a very pretty young lady." By and large, he said, it was similar fare to "the govt.-controlled programming you see all over Europe. It reminded me of the BBC."

Camera access to courtrooms is demanded by editors, not to assert freedom-of-press principles but to sell "sensational pictures of sensational trials," according to article in Jan. *Journal of Criminal Law, Criminology & Police Science*, which is distributing reprints. Newspapers are "comparatively dishonest" in expressing principled opposition to American Bar Assn.'s Canon 35 against court photography, article maintains, citing answers to questionnaires sent to managing editors, judges, lawyers, criminologists. Authors are Dr. Gilbert Geis, U of Okla., and Robert E. L. Talley, ex-Hollywood *Citizen-News*.

TV staff artist Bill Sayre covered recent hammer-murder trial in Huntington, W. Va. for WHTN-TV there, using old newspaper device to circumvent court ban on cameras. Sayre's sketches of proceedings were shown regularly by station during trial.

Pat Weaver's "Program Service" network has officially affiliated DuMont's WABD, N. Y., and WTTG, Washington. Only other announced affiliate is Chicago's WGN-TV, though it is known that a number of independents such as Milwaukee's WITI-TV are also on the list. Programming is now scheduled to start next month--with *Ding Dong School* and Mary Margaret McBride interview-home-making show 10-11 a.m. weekdays and *Saturday Night Party*, dance band variety show from Chicago's Aragon Ballroom Sat. evenings for 90 min.

TV substituted for comics section of *St. Louis Post-Dispatch* June 30 when jurisdictional dispute between Printing Pressmen and Teamsters prevented delivery with rest of Sunday paper. George Abel & Clif St. James of newspaper's KSD-TV took turns narrating developments in missing section.

Personal Notes: Thomas O. Loeb promoted to director of special NBC-TV programs . . . Lew Arnold, gen. mgr. of KTLA, Los Angeles, elected a v.p. & director of Paramount TV Productions . . . Claude H. Frazier, managing director of radio WAGA, Atlanta, and Lionel Baxter, managing director of radio WIBG, Philadelphia, elected v.p.'s of Storer Bestg. Co. . . . Louis Chesler, chairman of Associated Artists Production, also elected pres. . . . Mark Starr, educational director of International Ladies Garment Workers Union, elected a director of Educational TV & Radio Center, Ann Arbor . . . Wm. L. Putnam, treas.-gen. mgr. of WWLP, Springfield, Mass., also named pres. of Springfield TV Bestg. Corp., succeeding father Roger L. Putnam, who becomes chairman . . . Ray Baker named sales director of KFSD-TV, San Diego . . . John F. Cundiff, ex-KCRG-TV, Cedar Rapids, named sales mgr. of WNHC-TV & WNHC, New Haven . . . Wm. B. Ryan, ex-BAB, Quality Radio Group & NARTB, joins broker Blackburn & Co. . . . Alvin H. Barnard named engineering director of KVAL-TV, Eugene, and satellite KPIC, Roseburg, Ore.; Wm. R. Riley succeeds him as KVAL-TV chief engineer . . . Jack Eisele, ex-KGUL-TV, Galveston, named mgr. of rep Clarke Brown Co. Houston office . . . Robert J. Dean, ex-gen. sales mgr. of WFIE-TV, Evansville, Ind., joins WBNS-TV, Columbus, O. as account exec. . . . Walter Reese, ex-production director of WDMJ-TV, Marquette, Mich., named sales service mgr. of WEHT, Evansville, Ind. . . . Barbara Haddox, ex-WBNS-TV, Columbus, named press information & audience promotion director of WCAU-TV & WCAU, Philadelphia . . . Betty Boucher promoted to head of ABC's station clearance dept.

ADVERTISING AGENCIES: Advertising Assn. of West elects John Hoefler of Hoefler, Dietrich & Brown, San Francisco, as pres. at Honolulu convention. Other officers: Nelson Carter, Foote, Cone & Belding, Los Angeles, senior v.p.; Mrs. Billye Luedtke, Billye's, Stockton, v.p. at large; Richard Ryan, radio KLOK, San Jose, secy.; Don Ostensoe, First National Bank, Portland, treas. . . . Charles E. J. Clifford elected pres. of Kastor, Farrell, Chesley & Clifford, succeeding W. S. Chesley, who becomes exec. committee chairman & treas.; Lloyd G. Whitebrook promoted to senior v.p. . . . Daniel Potter, ex-Wm. Esty, named TV-radio director of Norman, Craig & Kummel.

Obituary

Hugh Roy Cullen, 76, Texas oilman-philanthropist whose estimated \$30,000,000 gifts to U of Houston included funds to help establish KUHT there as nation's first educational TV station in 1953, died July 4 of heart disease in Hermann Hospital, Houston, one of many medical institutions which also were his beneficiaries. He was chairman of U of Houston's board of regents, which shares ownership of KUHT with Houston Independent School District. Surviving are his widow and 4 daughters.

C. E. Palmer, 80, whose Camden News Publishing Co. owns KCMC-TV & KCMC, Texarkana, Tex., and publishes *Camden (Ark.) News*, died July 4 in Texarkana following heart attack. His interests also included radios KAMD, Camden, and KWFC, Hot Springs, and 6 other newspapers in Ark. & Tex. He pioneered in newspaper teletypesetter system. In 1944 he founded philanthropic Palmer Foundation, which helped publish Golden Rule Series school textbooks.

Percy J. Orthwein, 68, pres. of D'Arcy Adv., St. Louis, died July 2 at home there. He joined agency in 1914. Surviving are his widow and 2 sons.

Approval of merger of WGR Corp. with Transcontinent TV Corp. was sought in application filed this week with FCC, revealing that General Railway Signal stock holdings in Transcontinent are being reduced to 5.4%—GRS getting \$1,550,000 for 15,500 shares of Class B stock and \$1,162,500 of 5% debentures. Merger brings under one corporate roof WGR-TV, Buffalo (Ch. 2) & WGR with WROC-TV, Rochester (Ch. 5). Transcontinent also owns 50% of WSVA-TV, Harrisonburg, Va. (Ch. 3). WGR Corp. had earned surplus of \$869,302, according to March 31 balance sheet. It lists \$916,967 current assets, \$1,167,292 operating assets; \$919,645 current liabilities, \$913,561 long term debts. Pro forma consolidated Transcontinent TV Corp. and WGR Corp. balance sheet dated March 31 lists \$2,372,494 surplus after deduction of earned deficit of \$384,565 by Transcontinent and stock devaluation and other expenses involved in merger. It had \$1,993,342 current assets, \$8,654,628 operating assets; \$1,484,895 current liabilities, \$2,463,561 long term debts, \$3,267,600 debentures, \$4,210,534 stock equity.

WNOV-TV, York, Pa. (Ch. 49) & WNOV are being sold for \$255,000 by Helm Coal Co. partners Morgan E. Cousler & Lowell W. Williams, who state they have suffered "serious financial losses" from uhf operation. New owners will be Wm. F. Rust Jr., Manchester, N. H. electronic equipment mfr., who will be pres. & 51% owner (with wife Margaret holding additional 19%) and Ralph Gottlieb, v.p. & 30%. Gottlieb is gen. mgr. and Rust is treas. of Granite State Bestg. Co., operator of N. H. radio stations WKBR, Manchester; WTSL, Hanover; WTSN, Dover; WTSV, Claremont. Same group also is buying radio WAEB, Allentown, Pa. for \$200,000. Helm radio-TV April 30 balance sheet lists \$25,807 current assets, \$405,209 fixed assets (\$293,629 in TV building & equipment); \$19,938 current liabilities, \$224,473 depreciation reserve (\$157,508 for TV), \$186,605 partnership equity.

Louis H. Peterson owns 49.9% of WTOV-TV, Norfolk (Ch. 27), it's revealed in application seeking acquisition of another share by his Norfolk Bestg. Corp. (WNOR), to bring holdings to 50%, with Temus R. Bright holding other 50%. Peterson acquired holdings in May for \$52,900. Norfolk Bestg. also owns 21% of WLVA-TV, Lynchburg, Va. (Ch. 13) & WLVA, and Peterson controls WSSV, Petersburg, Va. WTOV-TV balance sheet dated May 31 lists net worth at \$166,513. It had \$80,833 current assets, \$148,780 in property; \$3100 current liabilities, \$60,000 other liabilities. Norfolk Bestg. shows \$335,993 surplus. Statement filed with application says Bright's Starlight Motors, Norfolk auto agency, has been buying sufficient time at regular rates to compensate for operating deficit of WTOV-TV.

WNAO-TV, Raleigh, N. C. (Ch. 28) is selling radio WKIX for \$168,000 to Ted Oberfelder (ex-pres. of rep Burke-Stuart and ABC v.p. for o-&o stations) and N. Y. theatrical attorney Lou Randell. WNAO-TV owners include *Raleigh News & Observer* and *Times* (Frank A. Daniels); pres. John W. English and secy. George J. Mead also have interest in WSEE, Erie. Broker was Blackburn & Co.

Sale of translator K80AB, Tucumcari, N. M., for \$11,000 is proposed by Howard L. Sauter in application filed with FCC. He's moving from town and buyer is UHF TV Assn., non-profit group of 5 local merchants, with John Thomas, operator of retail appliance store, as secy. Owner estimates equipment cost at \$7659, first year operating expenses at \$2000.

REP. HARRIS angrily accused FCC of violating the law in its pay-TV rule-making order, as he fired third of his letters to the Commission this week in his campaign against subscription TV. The day after the Arkansas Democrat, chairman of House Commerce Committee, shot off his latest blast, Paramount Pictures' International Telemeter—one of the 3 main proponents of subscription TV—filed its comments in the proceeding, urging FCC to dispense with tests and authorize fee TV on regular basis as soon as possible.

Apparently unable to get satisfaction from former Chairman McConnaughey, Harris addressed letter to Chairman Doerfer July 1—the day he took over as FCC chief—expressing “amazement” at McConnaughey’s statement that Commission didn’t prepare any formal opinion to back up its claim that it has statutory authority to order fee-TV tests. Wrote Harris:

“It seems to me that the failure of the Commission to set forth in a formal opinion the basis for its conclusion is a shocking disregard of the rights of interested parties and the rights of the general public as well. Furthermore, the Congress has a right to learn from the FCC, which is an arm of Congress, the basis for conclusions reached by the Commission with respect to authority which the Commission claims to have been delegated to it by the Congress.

“Finally, it would appear that the Commission’s failure to state the basis for its conclusions is a violation of the spirit as well as the letter of the provisions of the Administrative Procedures Act.”

As to McConnaughey’s offer to prepare for Harris “a legal memorandum in connection with our authority on subscription TV,” the congressman wrote: “The assembling and preparation for the chairman of this Committee of a legal memorandum which is not formally a part of these proceedings would not appear to constitute a proper discharge of the Commission’s responsibilities in the instant proceeding.”

Doerfer answered Harris’ letter July 5, enclosing legal memorandum giving Commission’s documentation for its belief that it has power to authorize trial. In covering letter, he said in effect that Commission feels it has authority for its actions so far; that it doesn’t know whether it will need legislation during tests, after tests or after it authorizes pay TV—if it does authorize it. Only practical way of determining full impact of fee TV, and what legislation is needed—if any—is to go through with tests, he said, adding that if FCC finds it needs new laws it will come to Congress for them.

* * * *

First of the subscription-TV groups to file comments (due July 8) in Commission’s request for specific proposals for pay-TV tests (Vol. 13:21), International Telemeter made these main points:

- (1) FCC should classify subscription TV as a broadcast service.
- (2) No limited “test” can properly answer the questions about fee TV. “Telemeter cannot agree that subscription TV on a permanent basis should be postponed. In the final analysis there is only one true test as to public acceptability of a new product or service—the test of the market place. And that test can be made only by offering the product or service to the public and seeing if it will

pay the price that will render the project self-supporting.”

(3) No matter what FCC does, Telemeter is embarking on wired fee-TV systems on a large-scale basis. This operation will furnish valuable data—a limited broadcast test is not necessary for this purpose.

On latter point, Telemeter says its plans and equipment are fully developed and that it is now negotiating franchises for “selected territories.” It says complete wiring job can be done at full cost of \$100 a home, and already-wired community antenna systems can be converted to Telemeter for \$50 a home. Telemeter system would have 3 channels—for 3 separate pay programs or 2 pay programs plus a “public service” channel.

Though it opposes principle of a test, Telemeter answered FCC’s questions about test proposals—stating that if test is necessary, these should be the conditions:

(1) “The Commission should clearly limit the participating stations to non-network, unaffiliated, independent stations . . . Any test in which a network station is permitted to participate might well be abortive if some of the participating stations have a vested interest in seeing the tests fail.”

(2) There should be no limit on the number of stations or subscribers.

(3) Commission should adopt single set of standards for subscription TV, but if it is unwilling to do that before tests it should leave choice of system to the individual participating stations.

(4) No specific time limit should be placed on tests; FCC should give at least 9 months advance notice before they are terminated.

(5) No maximum number of pay-TV program hours should be set; stations will determine this themselves, since sponsored broadcasting is their bread-&-butter. Stations should be required to comply with FCC rules relating to minimum hours of operation; subscription programs shouldn’t be counted in determining compliance.

Meanwhile, Telemeter won at least a partial victory in the “Battle of Los Angeles” this week. City’s Board of Public Utilities gave Skiatron a franchise to wire up city for closed-circuit pay TV—but on a non-exclusive basis. Telemeter immediately announced that it would apply for franchise, too. Under terms of Skiatron application accepted by the board, company would be required to post \$25,000 bond as token of “faithful performance” and to pay city 2% of its annual gross income as service fee. City has option to use part of the 2% fee to pay Skiatron for use of its closed-circuit facilities for televising of up to 5 hours a week of municipal programs. Skiatron is required to put system into operation within 2 years.

Skiatron officials this week acknowledged that they have reached no agreement with telephone company for any services in California—not even use of its poles for wiring—as reported in *Television Digest* June 15 (Vol. 13:24).

Note: FCC this week turned down all requests for extension of July 8 & 22 deadlines for filing comments & replies in its subscription-TV test proceeding.

At least 2 World Series games will be colorcast this fall, according to NBC-TV’s current plans. Network says the improvements in color pickup equipment make possible the use of color for the games. Last year’s series was not telecast in color after protests about quality of 1955 series colorcasts. This year first 2 games, possibly others, will be in color.

New and Upcoming Stations: KXGN-TV, Glendive, Mont. (Ch. 5) has 5-kw DuMont transmitter installed and plans Sept. programming, reports Dan C. Palen, mgr. of radio KXGN, for owner Lewis W. Moore, also operator of local theatre. Studio-transmitter building is ready in downtown area. It will use 192-ft. Fisher tower. Rates not set, rep not chosen.

KDHS, Aberdeen, S. D. (Ch. 9) hasn't ordered equipment yet, but plans Oct. 1 start, reports John Boler, whose North Dakota Bestg. Co. acquired CP from Joseph E. McNaughton interests (Vol. 13:25). Rep will be Weed.

WMUB-TV, Oxford, O. (Ch. 14, educational) has ordered 1-kw RCA transmitter and 6-section helical antenna, plans Nov. test patterns, Dec. programming, reports Stephen Hathaway, TV-radio director for grantee Miami U.

CHBC-TV, Kelowna, B. C. (Ch. 2) has ordered 2-kw RCA transmitter for July delivery, plans Sept. 1 test patterns, Sept. 21 programming, reports gen. mgr. Roy G. Chapman, ex-radio CKOK, Penticton, B. C. It has 50% of studio built, begins construction at transmitter site July 2. It will use 100-ft. Stainless tower with batwing antenna. It also is licensee for satellites CHBC-TV-1, Penticton (Ch. 13) and CHBC-TV-2, Vernon (Ch. 7), which won't have definite targets until master station begins. Satellites will have RCA transmitters, wavestack antennas. One-third of TV is held by radio CKOV, Kelowna (J. H. B. Browne & Mrs. J. W. B. Browne), 1/3 by CKOK, Penticton (Roy G. Chapman-Maurice P. Finnerty); 1/3 by CJIB, Vernon (Charles Pitt-Richard Peters). CHBC-TV base hour will be \$170. Rep will be All-Canada.

CHAT-TV, Medicine Hat, Alta. (Ch. 6) plans Aug. 15 test patterns, Sept. 1 programming, writes gen. mgr. R. J. Buss. RCA transmitter is due July 8 and studio-transmitter building is nearly ready. It will use 300-ft. Stainless tower. Base hour is \$100. Reps are Weed and H. N. Stovin.

Five new Canadian TV stations were recommended by CBC Board of Governors at June 25 meeting, which turned down one application. Approved were CHCA TV Ltd. for Ch. 6 Red Deer, Alta.; radio CKBL (Rene Lapointe, managing director) for Ch. 9, Matane, Que.; Henri Audet, CBC regional engineer for Quebec, for Ch. 13, Three Rivers, Que.; radio CKBI (E. A. Rawlinson, pres.) for Ch. 5, Prince Albert, Sask.; Wm. D. Forst for Ch. 5, Swift Current, Sask. Radio CHOV (E. Gordon Archibald, pres.) was turned down for Ch. 5, Pembroke, Ont. Also denied was request by CKCO-TV, Kitchener, Ont. (Ch. 13) for boost to 275-kw.

Bullhead City, Ariz. translator K72AH began operation June 20, reports operator Mohave County Board of Supervisors, stating it will seek change to Ch. 78. Globe-Miami, Ariz. translators K77AD & K80AE expect Adler equipment after Aug. 15, plan Sept. 1 start, reports Kenneth G. Nylund, pres. of non-profit Community TV Prospect.

New "TV City" will be built by WSOC Bestg. Co. at N. Tryon & W. 23rd Sts., Charlotte, to house WSOC-TV studios and WSOC studios & transmitters. Scheduled for completion next spring, 2-story center will have 27,000-sq.-ft. floor space on 8 1/2-acre site.

GE shipped 10-kw Ch. 12 transmitter and 12-gain helical antenna July 5 to WJMR-TV, New Orleans (Ch. 20), which last week was granted permission to experiment with simultaneous transmissions on Ch. 20 & 12.

RCA has shipped conversion equipment, to boost to 25-kw the transmitter of WHP-TV, Harrisburg (Ch. 55), which plans hike to 514-kw ERP.

WHDH-TV, Boston (Ch. 5) will be ABC-TV primary affiliate when it begins in late fall.

WFIE-TV, Evansville, resumed programming on Ch. 14 at 7 a.m. July 3, after quitting Ch. 62 July 1.

Radio station sales approved this week: WILD, Birmingham, by Sherwood R. Gordon for \$335,000 to Bartell Bestrs. Inc. (Gerald A. Bartell, pres.), operators of 5 other AMs (Vol. 13:23) . . . WNAV, Annapolis, control by Capital Bestg. Co. (Albert H. MacCarthy estate and Alfred H. Smith) for \$91,000 to Washington Bestg. Co. (Henry Rau, 58% owner), operator of WOL, Washington and WDOV, Dover, Del. (Vol. 13:23) . . . KUDI, Great Falls, Mont. (formerly KBGF) by Dan Snyder & associates for \$70,000 to co-owners Walter N. Nelskog, Paul Crain, D. Gene Williams & Delbert Bertholf, who also have interests in Wash., Ore. and Billings, Mont. radios (Vol. 13:16) . . . WWOC, Manitowoc, Wis. by Edward W. Jacker & Edward D. Allen Jr. (52% of WDOR, Sturgeon Bay, Wis.) for \$62,300 to Joseph Clark, owner of WFOX, Milwaukee (Vol. 13:22) . . . WSTN, St. Augustine, Fla. by James D. Sinyard for \$60,000 to group headed by Lawrence R. Pincus, mgr. of WIVY, Jacksonville (Vol. 13:23) . . . WKBL, Covington, Tenn. by R. Wm. Hoffman (owner of WGFS, Covington, Ga.) and Charles K. Sparks for \$55,000 to Robert C. Whiteley Jr., chief engineer of WBOP, Pensacola, Fla. (13:24) . . . WORM, Savannah, Tenn. by owners of WJOL, Florence Ala. (Joe T. Van Sandt, pres.) for \$50,000 to W. L. Barry & Neal B. Bunn, also mgr. & 25% owner of WDXL, Lexington, Tenn. (Vol. 13:23) . . . KLUF, Galveston, by Mayor George Roy Clough & family for \$40,000 to local businessmen (with minority interest in KGUL-TV) including banker R. Lee Kempner, KGUL attorney Ballinger Mills (Vol. 13:22).

Radio station sales reported this week: KUDU, Ventura-Oxnard, Cal. by Voice of Ventura Co. (Wm. H. Haupt, pres.) for \$162,500 in bankruptcy proceeding to group headed by Mrs. Virginia Wallace (50%), whose husband is asst. mgr. of CKNW, New Westminster, B. C.; other stockholders will be Wm. Rea Jr. (20%), former owner of CKNW, and Mr. & Mrs. Robert Grettenberg, 30% . . . KLYN, Amarillo, by Kenyon Brown (also applicant for Ch. 7 there) for \$110,000 to Boyd Whitney, founder and co-owner of KLOS, Albuquerque . . . KCIJ, Shreveport, La. by Southland Bestg. Co. (Lester Kamin, pres. & 1/3 owner) for \$75,000 to Edward McLemore, also owner of "Texas Rasslin'" film show and 50% of radio KZEE, Weatherford, Tex. . . . WFYC, Alma, Mich. by L. R. Kamperman & associates for \$70,100 to gen. mgr. David W. Somerville (30%), Gilbert E. Thomas, WWTW, Cadillac, account exec. (15.5%) and local businessmen Wayne G. Harris (40%) and H. B. Gase (13.3%) . . . WKTL, Kendallville, Ind. by Charles R. Palmquist Sr. & Jr. and associates for \$48,000 to co-equal owners Paul L. King (program mgr. of WOHO, Toledo) and restaurateur Weldon M. Cornell. Brokers: KUDU, Wilt Gunzendorfer & Assoc.; KLYN, Hamilton, Stubblefield, Twining & Assoc.

Radio is driving adults away by playing too much music aimed exclusively at teen-agers, Columbia Records musical director Mitch Miller told recent Fla. Broadcasters Assn. meeting. He said too many stations play music to "please the kids who can only buy Popsicles and peanut brittle," urged them to try pleasing adults for a change.

AFTERMATH of final decisions—petitions for reconsideration—continue to be disposed of by FCC—which seldom changes its mind. In addition to releasing San Francisco-Oakland Ch. 2 final decision, Commission denied requests for “second chance” filed by losers to WWL-TV, New Orleans (Ch. 4); KSLA, Shreveport (Ch. 12) and WTIC-TV, Hartford (Ch. 4).

Four new translators were authorized: Ch. 71, Newport, N. H.; Ch. 70, La Grande, Ore.; Ch. 82, North Warren, Pa.; Ch. 76, Raymond, Wash.

* * * *

Reversing initial decision on very grounds on which examiner made it—proposed localized service—FCC this week released text of final decision awarding San Francisco's Ch. 2 to San Francisco-Oakland TV Inc. (Vol. 13:20, 26). As previously reported, vote was 4-3 in unusual party-line split. Democrats Bartley, Mack & Craven dissented but issued no statement of views.

Winner is headed (47½% each) by gen. mgr. Ward D. Ingram of General Teleradio's Don Lee Broadcasting System and gen. mgr. Wm. D. Pabst of radio KFRC, San Francisco. Losers are TV East Bay, in which influential Democrat Edwin W. Pauley has 60.85% interest, and originally-favored Channel Two Inc. (Vol. 12:25), in which 5% is held by publisher Joseph R. Knowland of *Oakland Tribune*, father of the Senate Republican leader.

Main factor in examiner Thomas H. Donahue's recommendation of Channel Two Inc. year ago was that it would concentrate on “neglected” Oakland-East Bay communities instead of 5-outlet San Francisco (KGO-TV, KPIX, KRON-TV, KSAN-TV, educational KQED). FCC said this actually was “adverse factor,” scored examiner's choice for planning “virtually a total neglect [of] a large segment of the area to be served.” Commission commended San Francisco-Oakland TV Inc.'s plans for area-wide coverage, including auxiliary studio in San Francisco. Winner also was found superior in experience, ownership-management integration, planning & preparation and policy.

System for telecasting color from black-&-white film is “under development” by Bryg Inc., 324 S. McKean St., Butler, Pa., according to announcement by pres. Ralph A. Nicholas & exec. v.p.-gen. mgr. Samuel H. Depew. Initial demonstrations were held recently for officials of WJAC-TV, Johnstown, which is joining Bryg for testing and development work. Demonstrations of new system in action are planned by late summer. Photographic and TV engineers have been working for many years on various color TV recording systems using black-&-white film—to take advantage of cheapness and quick processing of black-&-white film. Bryg says it is developing 2 systems—mechanical system using color filters in camera and projector, and electronic process using different filtering technique to achieve same result. Bryg Inc. was formed last year to develop and market the new film system.

Triple damage suit for \$150,000 under anti-trust laws was filed July 2 against *Kansas City Star* and adv. director Emil A. Sees by Vogue Theatre proprietor Edward R. Golden. He alleged in U. S. District Court there that newspaper and Sees forced him to advertise in *Star's* afternoon & morning issues when he wanted ads only in afternoon. Supreme Court last month rejected appeal by *Star* from criminal anti-trust conviction (Vol. 13:25).

TV-RADIO CENSORSHIP plan, promptly denounced by President Eisenhower as aligning U. S. with totalitarian systems, was proposed July 1 in House by Rep. Madden (D-Ind.) in protest against “false propaganda” he said was spread by CBS-TV interviews with leaders of Communist countries (see p. 2).

Denouncing CBS-TV for putting Soviet boss Khrushchev and Yugoslav President Tito on U. S. TV screens, Madden introduced measure (H. Res. 305) expressing “sense” of House that Secy. of State must screen & approve questions in TV-radio interviews “with any official representative of the Union of Soviet Socialist Republics or of any other Communist or Communist-dominated government.”

President Eisenhower, who had been critical of “commercial” aspect of Khrushchev interview (Vol. 13:23), said at July 3 news conference that he was opposed to making it mandatory that any future telecast here by Communist leaders be submitted in advance for govt. approval. He said that would align us with countries which control press at expense of its freedom.

Censorship proposal aroused little apparent interest in House, although Rep. Feighan (D-O.) said he wanted “to congratulate the distinguished gentleman from Indiana for his timely & practical resolution,” which Feighan said “would clearly fix responsibility for the questions asked of any Communistic dictators.” Only other comment on floor came from Rep. Derounian (R-N. Y.), who wondered if “Mr. Murrow might be put out of business” by Madden's measure, which was referred in routine to House Commerce Committee.

In statement July 5, NARTB pres. Harold E. Fellows said Madden resolution is “gratuitous insult to broadcasters” and “repugnant to the most fundamental American concepts.”

“Campaign of deception” by TV, radio & press has aided supporters of “cunningly devised” civil rights legislation proposed by Eisenhower administration and passed by House, Sen. Russell (D-Ga.) charged July 2 in floor speech. He said news media are guilty of “abuse of the constitutional guarantee of freedom of the press” in promoting “propaganda line” that measure is intended to insure Negro voting rights. Instead, Russell said, bill gives “unprecedented power” to attorney general to “force a commingling of white & Negro children in the state-supported schools of the south.”

New reps: WAAM, Baltimore, to Blair-TV July 1 (from Harrington, Righter & Parsons); KVIP, Redding, Cal. to Hollingbery (from Branham); WTVP, Decatur, Ill. to Gill-Perna (from Bolling); WWTW, Cadillac, Mich., to Hollingbery Sept. 1 (from Weed).

ASCAP's gross revenue from licensees in 1956 hit all-time record of \$24,731,156, according to financial report to membership. Distributions to members totaled \$18,689,638, with expenses of Society coming to \$4,462,251.

Award for “distinguished service to higher education” was presented Joint Council on Educational TV (Ralph Steetle, exec. director) by American College Public Relations Assn. at annual meeting in Omaha.

Mobile color TV unit delivered July 1 by RCA to Crosley's WLWT, Cincinnati, is an air-conditioned \$250,000 van with 3 color cameras, equipment for cable and microwave relay.

Telecasting Notes: One of slickest Hollywood publicity stunts in years was recent TV spot announcement prepared by a couple of movie producers who were certain that no TV station would use it. When it received its pilot turndown by a station (Los Angeles' KNXT, in this case), it got plenty of free publicity in the newspapers—which quoted the purported TV "spot" in full, giving name of picture, etc. . . . The rejected spot used the following copy (expurgated by us to avoid giving free publicity): "Hey you. You look terrible. I mean it. You are suffering from T.T., which means Television Tension. Now why don't you stop looking at this silly little box; stop straining your eyes on this bleak, foggy picture. Tear yourself away from these nauseating wavy lines and break away right now from this TV trap. Button your shirt. Put on your shoes, grab the little woman and take her out to some real entertainment, the movies" . . . We think TV stations should accept the commercial—on one condition: That the movie theatres of the nation (85% of which subject their paid audiences to advertising films) give equal time, using copy running something like this: "Are you disgusted? Have you had it? Did you pay \$1 for parking plus \$1.80 admission plus baby-sitting fees to come to this theatre and see a real turkey? Tired of dressing up and paying hard-earned money to be bored? Treat yourself and your family to free entertainment in the home—try television, and see the top stars of yesterday and today, plus up-to-date newsreels, in the comfort of your own living room. And remember—it doesn't cost you anything to watch. And you can turn it off if you don't like it" . . . British TV sensation, Prince Philip's 75-min. BBC show explaining International Geophysical Year, will appear on Russian & Czech TV via kinescope, at the

request of those countries; Australia, Canada and Belgium have also requested prints of the show . . . More than 40 western series will be seen on TV next season—network and syndicated—July 1 *Billboard* reports, estimating sponsors will spend about \$25,000,000 for the eaters . . . TV-radio spectacular: Sponsor Rexall Drugs has ordered NBC simulcast for Oct. 13 "special" *Pinocchio*, featuring Mickey Rooney . . . Big ABC-Kaiser deal for Sun. evening next season is on again—and this time it's final. It involves total of \$7,000,000 in time & talent for year, of which \$3,300,000 represents time charges for 7:30-8:30 p.m. Period will be filled by 60-min. filmed western series, *Maverick*, to be produced by new corporation owned jointly by Kaiser Industries, Warner Bros. & AB-PT . . . National college football telecasts sold out on NBC-TV, Libbey-Owens-Ford Glass Co. signing as fourth sponsor . . . United Artists' post-1948 package of 52 features reportedly has been sold in 40 markets in first 4 weeks of active selling, for gross of nearly \$3,000,000 . . . Time-for-films barter deal blanketing country, similar to C&C-International Latex pact, reportedly in the making between NTA and Exquisite Form (brassieres).

Senate hearing on terms of 1957 Mexican broadcasting compact and 1951 North American Regional Broadcasting Agreement will be held July 10 by Foreign Relations subcommittee headed by Sen. Fulbright (D-Ark.).

Republic Pictures will double its Hollywood TV and feature film production facilities under new \$5,000,000 expansion project announced last week end.

Commercial telecasting for Sweden has been rejected by Parliament. Country currently has 4 govt.-operated stations and about 36,000 sets.

Electronics Reports: Radio "relays" in the sky might be "practical in the immediate future," International Geophysical Year Chairman Dr. Joseph Kaplan said this week in interview on CBS Radio's *Capitol Cloakroom*. "Ten pounds of chemical injected into the upper regions of the atmosphere can play a significant role," he said. He added he had induced Air Force to "toss 10 lb. of nitric oxide out at a height of about 60 mi. just to see what would happen. The results were amazing. During the daytime, it produced a new ionized layer from which we bounced radio signals, just as intense as the normal ionized layer. In other words we formed a mirror in the sky. At night the nitric oxide reacted with the atomic oxygen in the high atmosphere—a very simple, elementary reaction—and formed a blob of light about 10 mi. across and as bright as Venus. And so we realized that at least we were making a beginning on an artificial modification of the atmosphere."

* * * *

Electronic industry financial failures are increasing at faster rate than for business generally, says National Credit Office Inc. For year ended April 30, it lists 30 electronic manufacturer & 20 jobber failures, compared with 29 manufacturer & 22 jobber dropouts preceding year, 12 manufacturer & 9 jobber in 1952. It says electronic failures in year ended April 30 increased 175% over 1952 while all business failures increased 66%. Liabilities of manufacturers failing in year ended April 30 amounted to \$19,500,000 vs. \$11,000,000 a year earlier, NCO said. Report showed average age of companies failing in current year was 13 years—2 years greater than for preceding year and twice the age of those failing 2 years ago.

ELECTRONICS PERSONALS: Harold B. Richmond, ex-RMA (now RETMA) pres. and director, retires as chairman, General Radio Co. . . . Newland F. Smith elected pres. of Gray Research & Development Co. . . . Dr. Cleo Brunetti resigns as managing director, engineering research & development, General Mills mechanical div., takes exec. post at Food Machinery & Chemical Corp., San Jose, Cal. . . . Brig. Gen. Alfred R. Maxwell (USAF-ret.) named v.p. of Siegler Corp. Hallamore Electronics div. . . . Charles A. Parry, ex-RCA international div., named consultant to engineering director Ross Bateman, of Page Communications Engineers, also will be technical advisor on international telecommunications projects . . . Joseph T. West named mgr. of new Western Electric plant in Oklahoma City . . . Gilbert M. Davidson, ex-ACF Avion div., named DuMont Labs market research mgr. for instrument sales . . . Paul E. Gregg, Midwestern Instruments adv. director, takes on Magnecord div. adv. & merchandising duties . . . Wm. H. Martin appointed pres. of Clevite Ltd., St. Thomas, Ont., succeeding Wilbur D. Prescott, named to Clevite Corp. central management staff.

New industrial products div. of IT&T takes over electronic instrument manufacturing & distribution activities formerly conducted by IT&T's Federal Telephone & Radio Co. New div. will specialize in manufacture & sale of large-screen oscilloscopes, bar graph oscilloscopes, sweep frequency generators and distribution of Rohde & Schwarz and other imported precision test equipment. Instrument organization is headed by Rudolph Feldt, IT&T industrial products v.p.; Richard Hess, sales mgr.; Henry Wolcott, engineering mgr.; Leon Seldin, mfg. mgr.

MID-YEAR ASSESSMENT OF TV PORTABLES: With industry striving to "sell public up" to higher-end higher-profit receivers, we've taken pulse of good cross-section of industry -- seeking current facts and feelings about portables.

Production of portables for first 6 months ran about 800,000 units, some 30% of the 2,718,000 sets produced. This compares with 325,000 portables for first 6 months of 1956, about 9½% of the TV output for the period.

Statistical authorities tell us that portable inventories at end of June for all levels of industry were about 650,000, some 27% of total, compared with 550,000 at beginning of year. At this time last year, portable inventories were about 10% of total. Inventories aren't considered excessive. Retail sales of portables in May were about 125,000 and June sales probably were higher. Average factory price of portables is about \$100, not including excise tax.

Ratio of 17-in. to 14-in. portable production was about 5-1 during first 6 months, compared with 2-1 ratio for similar period last year.

Here are evaluations of portables by some top producers:

Robert A. Seidel, RCA exec. v.p., consumer products, says portable TV won't continue to get as great a percentage of total market because of changed appearance in console cabinets -- due to slim styling and 110-degree tube. However, he adds that RCA hasn't sold "the percentage of portables that the industry has -- the RCA line is heavily weighted to the console end, having 5 portables to 25 consoles."

Seidel declared he didn't know whether "sales will increase RCA's ratio of portables to consoles...so far we've been able to merchandise a broad line of consoles...but we have to gauge production on what customers buy."

Example of consumer preference, he said, was recent RCA survey which showed lowboy styling picked over higher TV sets, liking for light finishes over mahogany.

Some increase in RCA's proportion of portable sales is expected, Seidel said, because "we haven't been strong there." He also expects some step-up in sale of table models because of improved appearance.

S.R. Herkes, Motorola consumer products marketing v.p., commenting on GE's changed advertising emphasis, shifting away from portables, told us: "GE echoed what most of us believe...that there's no money in portable TV." He went on to say that "Motorola's emphasis will not be there at all" (on portable TV). As a matter of fact, promotion for Motorola's new line -- which will be introduced July 18 -- features teaser ad on "Golden Satellite" which, Herkes said, "you can believe me, will be on the high end."

Motorola production currently is running about 25% portables, Herkes said, while "ordinarily we try to keep it to 20%." He explained increase is due to introduction of new 17-in. portable -- and need of filling pipelines.

Robert L. Shaw, gen. sales mgr., Sylvania radio-TV div., said it's a "normal situation that portable TV, like portable radios, will take a seasonal curve in Sept. & Oct. when emphasis shifts to table and console models -- merchandising sets inside the home." However, he said shift will be back to portables for Christmas.

"Sylvania will continue to push portables," Shaw said, adding that heavy emphasis will be put on 21-in. portable. He said that biggest profit squeeze is in portables 14-in. and under -- not in 17-in. sets at \$170 and 21-in. at \$200.

Portable production at Sylvania is running "well in excess of 1/3" of total production, he said, and he expects total for year to run about 1/3.

Admiral spokesman said portables will be featured in its substantially increased fall and winter national advertising campaign. And he said about 1/3 of Admiral TV production now is in portables.

Philco official told us its feeling is that "portables meet market no other set reaches; portable TV will be with us for a long time." He described portable market this way: "Highly competitive...profit margin thin...not the profitable end."

DuMont spokesman described position as "quite light on portables and not putting emphasis on them." DuMont aim is to put sets in the living room, he said.

Retail Sales: TV set sales at retail in year's first 5 months were 2,420,633, says RETMA, only slightly below the 2,428,888 sold in similar 1956 period. For May alone, sales amounted to 399,757, compared with 392,080 in May 1956. Radio sales at retail, excluding auto sets, totaled 2,909,548, compared with 2,551,272 sold in the first 5 months of 1956. Sales in May were 547,480 vs. 566,357 in May 1956.

Production: TV output was 117,337 week ended June 28, compared with 116,302 preceding week and 98,597 in corresponding week one year ago. It was year's 26th week and brought TV production for year to date to about 2,718,000, compared with 3,415,202 in same period of 1956. Also this week, RETMA officially estimated first 5-month production at 2,178,361 compared with 2,862,177 in similar 1956 period. May production was 342,386 (41,956 uhf), compared with 361,246 in April and 467,913 in May 1956. Radio production was 200,242 (80,129 auto) week ended June 28, compared with 252,299 (98,616) preceding week and 199,107 (58,491) in corresponding week year ago. Radio output for 26 weeks totaled about 7,186,000 (2,839,000) vs. 6,659,165 (2,313,651) in same 1956 period. First 5 months' production was placed at 6,098,951 compared with 5,585,390 in similar period last year. May production totaled 1,023,-771 (396,151 auto), compared with 1,115,813 in April and 1,060,165 in May 1956.

SYLVANIA'S DILEMMA: 'FLAT' vs. 'THIN' TV: Sylvania is deliberately soft-pedaling the very substantial TV possibilities of its developmental "Sylvatron" image-producing panels, demonstrated this week in New York. This apparent unnatural aversion to horn-blowing is easily understandable in light of public's aptitude for conclusion-jumping and the large stake of Sylvania in new "thin" TV sets.

Remembering what "wait for color" once did to the black-&-white set market, Sylvania went out of its way in press releases and at demonstration to stress that "we are restricting our attention to national defense applications and relatively specialized commercial and industrial fields. Exploratory work in any other fields will have to take a back seat for quite some time...As far as TV, specifically, is concerned, there will be no application of Sylvatron in the foreseeable future."

But newsmen at the demonstration quickly spotted the natural TV potential of the one-eighth-of-an-inch-thick panels (currently being made in 2-&-4-in. squares, but said to be virtually unlimited in size possibilities) -- particularly those versions which can reproduce moving pictures when excited optically or electronically. When pressed as to how much territory "foreseeable future" actually took in, company officials gave the rather surprising answer that flat wall TV "is possible in about 4 or 5 years and a few million dollars from now." In terms of time, this is about 10 years less than most industry leaders have previously been willing to predict.

There's no question that Sylvania topkicks are more excited about Sylvatron's TV possibilities than any of its other uses -- particularly in view of fact that the company already has made panelescent lamps, operating on similar principles, capable of giving off 40-50 foot-lamberts, about the brightness of today's monochrome picture tubes. Though 4-5 years would be relatively short time for such a revolutionary TV development, there are indications that Sylvania is hoping to cut even this period.

From thin to flat is a big step -- and the company has adopted a policy of tiptoeing ever so gently in order not to step on any eggs which it hopes will hatch this fall into heavy sales for new "slim" 110-degree sets.

Topics & Trends of TV Trade: Transparent phosphors for cathode ray tubes will be displayed for first time by GE Aug. 20-23 at Western Electronics Show & Convention (WESCON) in San Francisco. Announcement marks first hint that GE has renewed its activity in development of transparent phosphors—which it had discontinued after many years of research.

Though no GE officials were available for comment, there was speculation that the new phosphors were inspired by the approach taken by Naval Research Lab's Dr. Charles Feldman, who last May demonstrated transparent phosphors in various colors (Vol. 13:17-18). At that time, industry observers agreed that principal drawback of his method was the need for special expensive glass (such as Corning's Vicor) which could withstand the temperatures at which his phosphors are applied.

Dr. Feldman told us this week that CR tubes using his transparent phosphor would probably be in use this year in military aircraft. For TV purposes, he speculated, it may be more practical to develop new types of glass for use with the transparent phosphor than to attempt to develop a low-temperature version of the phosphor. He said both Corning and Kimble (Owens-Illinois) had submitted "promising" samples of lower-cost high-temperature glass; he also suggested the possibility of metal-coned picture tubes sealed to high-temperature glass screens. He said he had investigated possibilities of Corning's newly announced ceramic Pyroceram (Vol. 13:21), but had been told that transparent version was still far off and prices would be too high in foreseeable future.

Principal immediate advantage of transparent-phosphor picture is its extreme contrast—which would be particularly advantageous for viewing outdoors or other places where external light is bright. Using 3 layers of color phosphors, new type of color tube might be possible—but this is considered even further in future than the monochrome tube. Dr. Feldman said he is not working with GE on the phosphors.

GE didn't announce potential uses of its new phosphors, except to say they "can radically improve the clarity of pictures on a cathode ray tube screen" and permit "spot and line resolution to approach the diameter of the electron beam itself, instead of the usual 2-3 times enlargement found in powdered phosphor screens."

* * * *

Uhf receiver radiation limits were increased from 500 to 1000 uv/m above 260 mc for one year at request of RETMA, which told FCC that new 500 uv/m limit can't be met by manufacturers by Dec. 31, 1957 deadline (Vol. 13:19). In postponing its original limit until Dec. 31, 1958, Commission noted that Sarkes Tarzian Inc., commenting on proposal, had stated that all of its uhf tuners currently meet 500 uv/m limit, and FCC said "it would appear that this achievement should serve as an indication that the industry as a whole will find it practicable" to comply with that limit by end of next year. FCC rejected a proposal by RETMA to relax power line interference limits for TV sets, but agreed to relaxation of the limits for radios. Text of amended rules is available from Commission (Doc. No. 12018, Mimeo 57-706) or we'll get a copy for you.

Business failures in May among TV-radio-appliance retailers totaled 47, representing liabilities of \$1,466,000 according to Dun & Bradstreet monthly reports. In May 1956 there were 22 failures & \$632,000 liabilities.

More than 20% of N. Y. area homes have 2 or more TV sets, according to special survey of 1000 homes by Pulse Inc. for *Television Age*, detailed in its June 17 issue—shedding light on TV buying intentions of New York families. Capsule summary: (1) Of 1000 families, 78.3% said they had one set in working order, 20.1% had two, 1.6% had 3. (2) The 783 respondents in one-set homes were asked what they would do if they had money available to buy second black-&-white set now; 197 (25.2%) said they'd buy it now, 586 (74.8%) would use the money for something else. (3) Of those who would buy it now, 105 (53.3%) preferred portable as second set, 92 (46.7%) would buy console or table model. Some 87 (44.2%) said they have plans to buy another set this year, and of those, 45 (51.7%) plan to buy portable. (4) Of 586 who expressed no interest in buying second black-&-white set now, these were principal reasons given: 124 (21.9%) prefer color TV; 316 (55.9%) said they had no need for another set; 50 (8.8%) said they couldn't afford it; 48 (8.5%) said "necessities first;" 31 (5.5%) had no room for another set. (5) Of the 1000 TV homes, respondents in 44% had seen color TV. Of these, 241 (54.6%) were satisfied with color quality, and 199 (45.4%) said they weren't.

Philco has reorganized govt. & industrial div. sales dept., gen. sales mgr. Marshall A. Williams reporting following setup: (1) C. Paul Young named director of govt. & industry relations, covering general sales policy and contract negotiations. (2) F. D. Langstroth, marketing mgr., govt. products, supervises the 5 regional offices and home office govt. sales. (3) H. E. Taylor Jr., marketing mgr., industrial products, coordinates 3 depts.—communications & TV broadcast equipment, export and manufacturer's rep support. (4) C. C. Pond is marketing mgr., computer & automation equipment. (5) W. M. Carey is mgr. of business operations. (6) Richard M. Fielding, mgr. of public information, covers advertising, sales promotion & public relations. (7) A. T. Pollock, mgr. of field engineering, supervises installation, maintenance & warranty of div. products.

Admiral's fall & winter advertising for TV receivers will be substantially increased, probably about 20-25%, spokesman reports. Kickoff will be 4-page spread in Sept. 9 *Life*, followed by single pages at regular intervals for balance of year. He said ad program will hit these points: (1) Slimline styling with 110-degree tube. (2) Sonar remote control. (3) Hi-fi power pack. (4) Portable TV. Campaign also will use *Holiday*, *New Yorker*, *Sports Illustrated*, *Sunset*, etc.; 24-sheet posters; trade publications; co-op ads—which will be boosted over 25%; separate programs for radio & hi-fi.

First phase of Zenith patent suit has been settled by Wilmington, Del. federal district court ruling that Zenith did not infringe on a tuning condenser patent held by Western Electric. Remaining are 7 phases of 1947 Zenith patent suit against Western Electric, RCA and GE. Tuner was developed by Sidney E. Anderson, with patent held by Western Electric. Judge Paul Leahy declared "Zenith's is a different system from Anderson's and independent of the concept of Anderson."

Philco has been given until Aug. 1 to answer RCA treble-damage suit (Vol. 13:24) charging Philco and its subsidiary, Lansdale Tube Co., has been infringing on RCA patents since Jan. 1955. RCA suit was counterclaim to Philco's \$150,000,000 anti-trust action against RCA, GE, AT&T, Western Electric and Bell Labs.

Trade Personals: Charles K. Rieger, GE v.p. and gen. mgr. of TV-appliance div., elected chairman, NEMA major appliance div., succeeding R. J. Sargent, mgr. Westinghouse marketing & distribution, consumer products div.; John A. Hurley, RCA-Whirlpool v.p.-sales, named vice chairman . . . Richard J. Sargent, Westinghouse consumer products div. marketing & distribution gen. mgr., elected a trustee of alma mater Hiram College . . . Louis H. Cohen, ex-manufacturers' rep in Canada and ex-gen. mgr. of Philco Service Inc., appointed gen. sales mgr., IT&T components div. . . . Gerald M. Miller appointed RCA components div. & adv. sales promotion administrator, Joseph C. Weitzman market planning research analyst . . . Joseph T. Nolan promoted to mgr. of RCA editorial & press services . . . Lowell H. Good promoted to RCA director, engineering utilization.

Obituary

Manton Davis, 80, retired RCA v.p. & general counsel, died July 1 following heart attack at Fishers Island, N. Y. summer home. A native of Mayfield, Ky., he joined RCA in 1923 following 6 years in army. He retired from RCA in 1941 because of poor health.

Stromberg-Carlson appoints 4 regional mgrs. in reorganization of commercial product sales, special products div.: northeast, W. E. Cutler, New York; southeast, Alighero Cortese, Philadelphia; north central, A. V. Samuelson, Chicago; Pacific, E. V. Goodwin, Los Angeles. Martin T. Zegel, sales mgr.-commercial products, says southwest region office is also planned.

Motorola pres. Robert W. Galvin is subject of "Pat on the Back" section of July 8 *Sports Illustrated*, noting that he has made sports an important part of his company's corporate philosophy. Item says he has been known "to rush out of a West Coast business meeting to fly to Evanston, Ill. for weekly practice session" of softball team he plays with.

False advertising for "Color Filter" TV set device by Sunset House Distributing Corp., 792 Sunset Bldg., Hollywood, was charged July 2 by FTC. Complaint said company claimed plastic adapter, attached to black-&-white screen, would produce same visual effects as color set.

GE franchises for radio & housewares div. are being extended to 2 years from current one year. If franchise is terminated, distributor will have option of reselling merchandise to manufacturer.

P. R. Mallory & Co. and Radio Materials Corp. have agreed to merge, RMC—which makes ceramic capacitors—changing name to Radio Materials Co. and operating as div. of Mallory, which makes electronic & electrochemical products. RMC stockholders will receive total of 176,488 Mallory common shares. Mallory pres. J. E. Cain said merger is "expected to add materially" to earnings from combined sales in excess of "\$80,000,000 in 1957." Mallory earnings last year were \$3,065,108 (\$2.60 per common share) on sales of \$68,356,203. Effective date of merger is not set, but expected to be before Oct. 1.

Tung-Sol has registered \$5,000,000 issue of 100,000 shares of \$50 preferred stock with SEC for marketing through underwriters headed by Harriman Ripley & Co., N. Y. Proceeds from stock convertible into common shares until Aug. 1, 1967 would be used to reduce \$6,600,000 short-term borrowings and increase working capital.

DISTRIBUTOR NOTES: Graybar appoints E. E. Leavey asst. district mgr., Los Angeles, effective Aug. 16; H. G. Cook succeeds him Aug. 1 as Miss. Valley district mgr., St. Louis; D. A. Williams succeeds Cook Aug. 1 as Wolverine district mgr., Detroit. W. B. Whaley becomes asst. district mgr., Kansas City. C. C. McGraw named supply sales mgr., Houston, Aug. 1; F. M. Sholders succeeds him as Omaha branch mgr. Creighton C. Kohnert named district appliance sales mgr., Gulf Coast district, Houston; K. D. Leavitt succeeds him as Cleveland district appliance sales mgr.; Rudy Johnson takes over Leavitt's post as Cleveland mgr., major appliance sales. R. W. Miller becomes Duluth branch appliance sales mgr. . . . Admiral Distributors names Carl Lantz exec. v.p. replacing Clarence Tay, retired . . . Hamburg Bros. Inc. (RCA), Pittsburgh, appoints Wm. C. Lawrence sales mgr., RCA Victor div. . . . Ohio Appliances Inc. (RCA), 804 Sycamore St., Cincinnati, to move to 45,000-sq.-ft. building in suburban Edgemoor by year's end . . . DuMont names Lyle Winslow for Columbus, O.; he's rep for DuMont National Distributors Inc. in Cleveland, Cincinnati, Dayton, Toledo—has offices and warehouse at 701 Clair St. NE, Cleveland . . . DuMont corrects its announcement (Vol. 13:26) to show that Orgill Bros. Hardware Co. Inc., 301-11 W. Pearl St., Jackson, Miss., will handle central and southern Miss., including Jackson, Meridian, Hattiesburg, Brookhaven, Vicksburg, Yazoo City, but excluding 6 southernmost counties . . . Philco 5-star annual merchant award presented 5th time to Larry May, owner-mgr., General Appliance Co., San Jose, Cal. . . . CBS-Hytron appoints John M. Bearse Seattle district mgr.; Joseph H. Denselbeck succeeds him in Detroit office . . . RCA Victor Distributing Corp., Chicago, appoints Fred Parsons, ex-Zenith, as sales v.p., effective Aug. 1; he succeeds Wm. Boss, recently named asst. to RCA pres. John L. Burns . . . Motorola appoints Central Distributing Co., 1201 E. Houston St., San Antonio (Cal Michelson, pres.), replacing South Texas Appliance Corp.

Celebrating Golden Anniversary, RCA distributor Krich-New Jersey Inc., Newark, notes that RCA TV receiver saturation in area is now 26.6%, highest of markets covered in 23-city Consumer Analysis conducted by newspapers (Vol. 13:24); that survey shows 43.6% of families in area planning to buy TV this year list RCA first. Demand, says exec. v.p. Frederic M. Comins, "is unique in comparison with any trademarked product in the entire survey, whether it be toothpaste or automobiles."

Walt Disney Productions, 26.6% held by Atlas Corp., has options to buy 31% of outstanding stock of Disneyland Inc. from Walt Disney, WED Enterprises and Western Printing & Lithographing Co., bringing total ownership to 66%, balance being held by American Broadcasting-Paramount Theatres. Option price was \$528,810, of which \$100,000 was in cash, remainder in notes to sellers. Disneyland Inc. is expected to earn \$1,000,000 in fiscal year ending July 31 following depreciation of \$2,200,000.

Unitronics reports \$200,126 net profit (40¢ per share) on first quarter sales of \$8,434,735, compared with \$134,454 (26¢) on sales of \$6,160,974 in similar 1956 period. Pres. Brantz Mayor said special meeting will be held this summer for stockholders' action on board's approval of merger with Siegler Corp., which also is acquiring Hufford Corp. Unitronics is parent of Olympic Radio & TV, David Bogen Co., Presto Recording Corp.

NATIONAL TV advertising expenditures—network plus spot—will exceed \$1 billion for the first time this year, *Printer's Ink* predicts on basis of projection of McCann-Erickson research figures. The ad magazine estimates 1957 national TV expenditures at \$1.035 billion, 8.4% above 1956 estimate of \$954,700,000. The estimate for 1957, incidentally, is extremely close to the \$1.02 billion we predicted for the year in our issue of Dec. 29, 1956 (Vol. 12:52).

Biggest increase predicted by *Printers' Ink* is for radio—rise of 21.8% in national business, from \$229,900,000 in 1956 to \$280,000,000 for 1957. Total ad expenditures for 1957 were forecast at record \$10.2 billion, 3.4% increase over 1956's \$9.9 billion. The complete *Printers' Ink* projection (for comparison with other years, see p. 42, *Television Factbook No. 24*):

First-Quarter 1957 Estimate of Current Annual Rate of Advertising Volume

Medium	Expected 1957 total advertising revenue (millions)	1956 final estimate (millions)	% change 1957 vs. 1956
Newspapers (national)	\$ 815.0	\$ 788.9	+ 3.3
Magazines	805.0	794.7	+ 1.3
Television (network and spot)	1,035.0	954.7	+ 8.4
Radio (network and spot)	280.0	229.9	+21.8
Business papers	540.0	495.5	+ 9.0
Outdoor (national)	133.0	134.7	- 1.3
Other investments by national advertisers	2,590.0	2,527.2	+ 2.5
Estimated total investments by national advertisers	6,198.0	5,925.6	+ 4.6
Estimated total investments by local advertisers	4,040.0	3,979.1	+ 1.5
Grand total	\$10,238.0	\$9,904.7	+ 3.4

Doctor in the house: A mistaken-identity problem is responsible for use of "Dr." in front of the name of CBS Inc. pres. Dr. Frank Stanton, he revealed in July 2 address to National Press Club in Washington. Referring to the title, he explained: "It is not something that I think I would have carried over from academic life into business were it not for the fact that in the New York area there is a man who issues a tip sheet in electronics stocks who has unfortunately the name of Frank Stanton, and I have not been able to separate him from my life except by going back and putting the Ph.D. in front of my name and then there is no doubt about it because he does not have that."

Tele-Broadcasters Inc. gained \$44,745 on \$108,000 sale of radio WKXL, Concord, N. H., to Joseph L. Close (WKNE, Keene, N. H.) and Frank B. Estes (Vol. 13:8), according to interim report to stockholders for quarter ended April 1. Company headed by H. Scott Killgore, incorporated last Aug., had net profit of \$38,491 on net revenues of \$149,120 in period, when earned surplus was \$17,624, compared with \$20,866 loss in all 1956. Tele-Broadcasters now is selling WKXV, Knoxville (Vol. 13:24), leaving these radio holdings: WPOW, N. Y.; KALI, Pasadena; WPOP, Hartford; KUDL, Kansas City.

Federal court injunction against IBEW Local 1212 in N. Y. TV jurisdictional dispute was issued July 1 by Judge Archie O. Dawson, who ordered union to stop unfair labor practices in handling lights for remote telecasts. Injunction was sought by NLRB on complaint of CBS-TV, whose April 21 telecast of "Tony" awards was cancelled as result of inter-union squabble with members of IATSE (Vol. 13:17-19). Injunction will stand until NLRB resolves dispute.

Jail & fines for leaks from govt. regulatory agencies, including FCC—and for improper attempts to "influence any adjudication" by them—are provided in bills (S. 2461 & 2462) introduced July 2 by chairman Jackson (D-Wash.) of Senate investigating subcommittee (Vol. 13:23). Penalties for violations would be fixed at imprisonment up to year and \$500 fines. First measure makes it Federal crime for "members, officers & employes" of agencies to make unauthorized disclosure of votes, plans to vote, or advice they receive from subordinates on pending issues. Second measure forbids "undue influence" on members of FCC, CAB, FTC, ICC, SEC or FPC, requiring notice to all interested parties when "certain communications" are submitted to them. Jackson said anti-leak bill was needed because of "willful disclosure" of CAB information which brought burst of trading in Northeast Airline stock, that only FTC now has criminal provision covering such tips. Second bill "in no way curtails any interested party from presenting his views" to agencies so long as "all parties are first advised," Jackson said, adding: "It is only fair & just because it relieves the commissioners from undue influence." Sen. McClellan (D-Ark.) is co-author of both bills, which are expected to gather additional sponsors. They were referred to Judiciary Committee.

Flexible tax depreciation schedules are necessary in broadcasting industry in which equipment obsolescence is increasing factor, NARTB maintains in 25-page argument against tighter general all-industry standards proposed by Internal Revenue Service. Responding to request by IRS for comments on proposed changes in Bulletin F, last revised in 1954, NARTB attorneys Walter R. Powell Jr. & Walter J. Murphy Jr. urged that tax depreciation determination be left largely to agents in field, as it is now. They said any attempt to set rigid rate tables would raise peculiarly difficult tax problems for broadcasters because industry is changing constantly, equipment is replaced frequently by new inventions, buildings can't be salvaged for other industrial uses. Any new ruling by IRS on depreciation rates will be delayed at least until Sept.

October opening is set for Broadcasters Club in Washington (Vol. 13:21) with 32 resident and 43 non-resident members already signed up. Club will be on second floor of Colony Bldg., 1737 DeSales St., food and bar operations to be handled by Colony Restaurant. Membership is to be limited to 150 resident, 250 non-resident executives in broadcasting and related manufacturing industry, allied professions and business assns. Fees are: non-resident, \$60 initiation, \$50 annual dues; resident, \$120 & \$100. For non-resident applications, contact Howard Lane, KOIN-TV, Portland, Ore.; for resident, Leonard H. Marks, Cafritz Bldg., Washington.

Two TV station applications were filed with FCC this week, bringing total to 126 (34 uhf). Applications were for Norfolk, Va., Ch. 13, by group headed by Emil J. Arnold, who has ownership in group of southern radio stations; for Erie, Pa., Ch. 66, by local WLEU, which formerly held CP for same channel when under different ownership. No translator applications were filed. [For details, see *TV Addenda 24-Z* herewith.]

ODM takes over work of discontinued Cabinet Committee on Telecommunications Policy and Organization. Defense Mobilizer Gordon Gray plans to consult with Telecommunications Advisory Board—which includes FCC representative—in carrying out work. Spokesman said telecasting and broadcasting are excepted from ODM responsibility.

SUMMARY-INDEX OF THE WEEK'S NEWS — July 13, 1957

FEE-TV BACKERS ask fullscale service now, looking askance at limited test; proposals to FCC are vague. More "antis" than "pros" (pp. 1 & 5).

40,000,000 TV HOMES are counted by NBC for sets-in-use high mark; new tabulation shows TV's saturation spread from .02% in 1946 to 80.3% now (p. 3).

RAPID RADIO GROWTH reflected in station totals. 3079 AMs, 530 FM's on air, vs. 500 TV's. Total tripled since construction resumed at end of war (p. 4).

SUMMER TV FARE draws criticism from critics and trade alike. Jack Gould proposes talent "try-outs," repeats of winter season's best shows (p. 7).

TWO "WHITE SPOTS" in U. S. filled in as KGEZ-TV, Kalispell, Mont. and KPLO-TV, Reliance, S. D. begin, latter to operate as a satellite (p. 8).

ANNUAL "GUESSTIMATE" sees 7,000,000-set year. Greenebaum & Assoc. also venture output predictions for top 11 producers (p. 10).

ATTRITION IN SET MAKERS to be pointed up in forthcoming TV Factbook; 44 U. S. & 16 Canadian left from peak of 94 & 13 in 1951 (p. 10).

NATIONAL TV WEEK plans shaping up, sponsors NARDA, NARTB, RETMA & TvB vowing to avoid fizzle of Radio Week promotion (p. 11).

RAYTHEON'S "SPACISTOR," newest semi-conductor device, said to be capable of operating up to 10,000 mc at 500° C. Regular use 3-5 years off (p. 12).

BARTLESVILLE "TELEMOVIE" debut postponed to Sept.; NCTA begins large-scale closed-circuit fee-TV study. Los Angeles postpones action on Skiatron (p. 9).

PAY-TV PROPONENTS DISLIKE 'TRIAL' IDEA: FCC thought it was opening the door a crack when it asked fee-TV backers to propose conditions for a trial operation—but when the comments came in this week, it was clear that subscription-TV proponents want a hole big enough to drive a bulldozer through.

Two of the 3 opposed the idea of a trial altogether, but indicated they'd go along if it were made broad enough. The third pouted, threatened to pick up its marbles and go home unless FCC gives it virtually free hand.

This week's filings added little to the sum total of knowledge of how fee TV would work if authorized, and there was some chagrin at Commission because pay-TV's promoters were unwilling or unable to present more concrete plans.

■ ■ ■

The opponents, sparked by NARTB and the networks, again pointed up all the arguments they could muster—none of them new.

They were joined by a strange bedfellow—Rep. Celler (D-N. Y.)—who, as chairman of House Judiciary Committee and its anti-trust subcommittee, has repeatedly accused them of monopolistic tendencies.

In letter to FCC this week, he demanded that Congress be permitted to decide whether there is to be a test of subscription TV—and his arguments seemed to hew closely to the "network line." But the author of the House's anti-fee-TV bill reverted to anti-network form at end of letter when he predicted that networks eventually would take over subscription TV, thereby compounding their "monopolies."

Chairman Harris of House Commerce Committee, meanwhile, is understood to be satisfied with FCC's current attitude as expressed in Chairman Doerfer's letter to him last week (Vol. 13:27). It's said that he feels Commission has receded considerably from its original position that it had blanket authority

to order tests, and he's accepted its assurance that it will come to Congress, if necessary, when it determines exactly what legislation is needed. Next move, he feels, is up to FCC.

Of the more than 30 comments filed, 21 opposed subscription TV and/or a test, 8 favored it, and a couple were undecipherable. While most stations filed "anti" comments, some broadcasters did favor a test.

Notable was RKO Teleradio, whose WOR-TV, New York, in the past has cooperated with Skiatron on fee-TV tests. It offered its 2 independent outlets—WOR-TV and KHJ-TV, Los Angeles—for trials, but said it wasn't wedded to any specific fee-TV system.

Other stations favoring trial, and suggesting their outlets be used, were: WITV, Ft. Lauderdale-Miami, Fla. (Ch. 17)—and permittees of uhfs WFMZ-TV, Allentown; WCAN-TV, Milwaukee; WSES-TV, Philadelphia; KBAY-TV, San Francisco. None of the latter 4 is on the air.

Subscription-TV proponents definitely gave impression they were throwing cold water on idea of a test. Comments filed jointly by Skiatron Electronics (Arthur Levey) and Skiatron TV (Matty Fox) expressed disappointment that FCC is talking about a test instead of fullscale service, stating that they were "skeptical of the validity of the trial suggested" and that a test "to be worthwhile must in essence be a full-fledged operation."

Paramount's International Telemeter flatly opposed a trial—as reported last week (Vol. 13:27)—giving lengthy arguments why test idea should be discarded and regular fee TV authorized forthwith.

Zenith wasn't as specific, but pres. E. F. McDonald Jr., in statement filed with his company's comments, urged Commission not to "tie our arms behind our backs," testily asked it "to reject our petition altogether rather than to bog us down in further endless administrative hearings and proceedings."

Proponents' comments had much in common, though details differed. All gave their versions of test conditions—even those opposing principle of a test.

All want a trial in large cities.

All seek relatively "open-ended" trial with no fixed termination date—Zenith asking at least 2 years, Skiatron 5-10 years, Telemeter no specific limit.

All want vhf as well as uhf stations to participate in test. Skiatron, which long ago proposed that fee TV be limited to uhf stations at outset, decided to "withdraw this previous suggestion" for purposes of the trial.

Their attitudes on wired systems were interesting—and divergent. Telemeter devoted 6 pages to its closed-circuit plans, describing them as "interim" step which will provide FCC with valuable data and aid broadcast subscription operation by establishing ready-made pay-TV audience.

Zenith blasted wired fee TV all over the map, accused networks of fostering it and warned "they may find when the time comes that AT&T has not only preempted the field but created a Frankenstein which will reduce broadcasting to a third-rate service."

Skiatron, most active of all in publicizing grandiose wired-TV ideas, mentioned nary a word about closed-circuit fee TV.

As to details of how they plan to operate, all 3 were so vague they gave definite impression they were holding back—either for competitive reasons or because they just plain weren't ready to say.

The opponents—networks, stations, theatre owners—pulled out all the stops, giving birth in the process to such colorful phrases as:

"If someone is confronted with an unmarked bottle, there are measures short of drinking a little of the contents to determine whether it is a mouthwash or a poison" (CBS).

"Any broad-scale test of pay TV would be like testing a new weapon by shooting it into a crowd of people to see how it works" (NBC).

“. . . What stands if freedom falls? We suppose, in the present context, a promoter's dream—which bids fair to become the public's nightmare" (NARTB).

Principal arguments of the "antis": Commission doesn't have legal authority to order tests, nor can fee TV be classified as broadcasting. Congress must settle issue. Small-scale trial would be meaningless; fullscale trial might be impossible to turn off. If there are tests, they shouldn't be in broadcast band; use other frequencies or wired TV. Tests would aggravate competitive station shortage problems. Basic public interest questions and technical standards should be settled before trials. Full evidentiary hearings should be held.

Continuing to occupy its unique position on toll TV, Jerrold Electronics Corp. told FCC that broadcast subscription TV is unworkable, while closed-circuit method is practical and feasible.

Video Independent Theatres' "Cable Theatre" project in Bartlesville, Okla., Jerrold said, will provide test information without dangers of on-air test; it offered to make available any data Commission wants, said scrambled-picture facilities can be tested in lab without on-air trial.

For comparison of 3 major fee-TV proponents' ideas of what trial should be like, see p. 5. For developments on closed-circuit pay-TV projects, see p. 9.

NBC ESTIMATES TV SATURATION AT 80.3%: Total TV homes attained 40,000,000 milestone July 1, NBC Research estimated this week in new tabulations underscoring industry's astonishing growth from a standing start just 12 years ago.

TV saturation has spread from two-hundredths of one per cent in 1946 to 80.3% now, according to measurements tallied under direction of NBC planning & development v.p. Hugh M. Beville Jr.

Only 8000 homes boasted TV-sets-in-use in 1946, and it was 1948 before number of second sets (1000) was significant enough to be counted in continuing NBC tables now built from Advertising Research Foundation-Census Bureau surveys (Vol. 12:8).

All but 9,800,000 of estimated 49,800,000 homes in all U.S. (they increased from 37,825,000 in 1946) had TV sets by July this year—and 3,160,000 of TV homes had extra sets—according to NBC figures, which will be condensed in our TV Factbook No. 25, due in mails in mid-Aug. Here's NBC's graphic story of TV's rise:

TV's 12-YEAR GROWTH (Figures in thousands)

Jan. 1	TV Homes	Secondary Sets in Homes	Public Place Sets	Total TV Sets	Total Homes	% TV Saturation
1946	8	—	2	10	37,825	.02
1947	14	—	2	16	38,575	.04
1948	172	1	17	190	39,950	.4
1949	940	10	50	1,000	41,475	2.3
1950	3,875	50	75	4,000	43,000	9.0
1951	10,320	165	115	10,600	43,888	23.5
1952	15,300	315	185	15,800	44,760	34.2
1953	20,400	505	295	21,200	45,640	44.7
1954	26,000	800	500	27,300	46,660	55.7
1955	30,700	1,000	800	32,500	47,621	64.5
1956	34,900	1,610	1,080	37,600	48,600	71.8
1957*	38,850	2,520	1,280	42,650	49,500	78.7
July 1, 1957*	40,000	3,160	1,340	44,500	49,800	80.3

* Estimated

RADIO GROWTH—IN TERMS OF STATION TOTALS: For years, much of FCC's time has been taken up with haggling over scarcity of TV stations. No such problem with radio. Tallying AM-FM station figures, you can see that radio has continued without letup its speedy multiplication. As for "media of local expression," to employ a choice FCC expression, radio is localer and localer. Consider these grass-roots CPs granted in recent weeks: Gillette, Wyo. (pop. 2191); Wauchula, Fla. (2872); Alma, Ga. (2588); Mount Dora, Fla. (3028); McRae, Ga. (1904).

First half of 1957 ended with exactly 3079 AM and 530 FM stations on air, compared with 500 TVs. These compare with year-ago figures of 2893 AM, 532 FM, 477 TV. During first 6 months of this year, only one AM license was turned in, 4 CPs dropped, compared with 9 TVs quitting and 5 CPs dropped.

July 1 count is based on our 1957 annual AM-FM Directory, which is kept current with weekly Addenda covering FCC grants, changes, withdrawals, etc. It actually shows 3247 AM stations authorized (including on-air or under-construction), as against 3140 last Jan. 1 and 3021 July 1 year ago.

Authorized AMs have almost exactly tripled since 1945, when wartime freeze on construction was lifted. Here's how list has grown (as of Dec. 30 each year): 1945, 1056; 1946, 1579; 1947, 1961; 1948, 2131; 1949, 2246; 1950, 2351; 1951, 2410; 1952, 2516; 1953, 2644; 1954, 2782; 1955, 2941; 1956, 3140.

Applications pending for new AMs totaled 270 June 30, while AMs in CP status totaled 169.

Even FM has crept up a bit, with stimulus of multiplexing, etc. There are 568 authorized, up from 549 year ago. Peak was 706 FMs at end of 1950.

Emerging as the major power in Pacific northwest broadcasting, Mrs. A. Scott Bullitt's King Broadcasting Co. this week completed negotiations for purchase of KREM-TV, Spokane (Ch. 2) with KREM & KREM-FM. Purchase will give King ownership of TV-radio combinations in the 3 major Pacific northwest markets, with Seattle's KING-TV-AM combination and Portland's KGW-TV & AM. Spokane stations are to be purchased from Louis Wasmer for \$2,000,000 (\$500,000 down, balance over 11 years) through establishment of new KREM Broadcasting Corp., of which Wasmer will be pres. and presumably a minority stockholder. Sale was negotiated through Blackburn & Co.

Purchase of KOVR, Stockton, Cal. (Ch. 13) for some \$3,500,000 by Lowell Thomas, Frank M. Smith and associates is being negotiated. They will form new corporation to take over ABC-TV affiliate from Television Diablo Inc., majority owned by manufacturer H. Leslie Hoffman. Thomas-Smith interests also operate WCDA, Albany, N. Y. (Ch. 41), with satellites WCDB, Haganan, N. Y. (Ch. 29) and WDCD, Adams, Mass. (Ch. 19); they also control WTVD, Durham, N. C. (Ch. 11).

Bait advertising is outlawed in Ohio bill, signed by Gov. C. Wm. O'Neill and effective in Sept., providing \$200-\$1000 fines and/or 20-day jail terms for advertisers who offer "any merchandise, commodity or service" with intent not to sell at stated price—or not to sell at all. Media will not be implicated in violations if they act "in good faith" in accepting such advertising without knowledge of "false, deceptive or misleading character."

First foreign TV station built by private firm for its own employes is under construction at Dharan, Saudi Arabia, by Arabian American Oil Co. Station management advisory services will be provided by NBC International Inc.—second such deal signed by the NBC subsidiary (first being with British commercial TV program contractor for upcoming Cardiff, Wales, station). Aramco plans to have station on air within 6 months, using 6-kw transmitter and concentrating on kines and films of U. S. TV shows—many dubbed in Arabic. The population of Dharan and environs consists of 25,000 Arabs and 5000 Americans. New outlet won't be first TV service for area, since U. S. Air Force maintains AFTV station AJL-TV (100 watts) for American Armed Forces personnel there. Under management services contract, NBC is sending 2 programming advisors—Wm. Parrish, of network's public affairs dept., and TV-radio writer Jack Krutcher—who will remain with the station 3 months to a year.

In effort to dissuade FCC from its firm stand against unauthorized vhf boosters, Colo. Gov. Steven R. McNichols met late July 12 with FCC Chairman Doerfer, key Commission staff members and representatives of congressmen. McNichols is following pattern set by former Colo. Gov. Edwin Johnson, who encouraged groups to establish boosters despite FCC disapproval. Among Commission staff members at this week's meeting: Warren Baker, Harold Cogwill, James Barr, McIvor Parker. Nick Zapple represented Senate Commerce Committee; Richard Pelz sat in for Rep. Don Magnuson (D-Wash.), vigorous supporter of the booster operators.

SUBSCRIPTION-TV proponents' responses to FCC's requests for specific pay-TV test proposals (though Skiatron & Telemeter expressed opposition to basic idea of a limited trial):

(1) Cities in which tests should be conducted:

Skiatron—At least one metropolitan market for each system, preferably a "mixed" vhf-uhf market, with proponents also to be permitted to operate on stations in markets adjacent to metropolitan areas.

Telemeter—Prefers no limit to number of cities, but participating stations should be limited to those unaffiliated with networks.

Zenith—Maximum of 3 communities for each system, chosen from list of 30 communities which have 4 or more authorized stations—proponents of each system being permitted to select one Class A, one Class B and one Class C market.

(2) Number of stations to be permitted to participate in each test market:

Skiatron—All stations in the community should have opportunity to participate at various times during trial period.

Telemeter—All non-network stations should be permitted to participate.

Zenith—Same as Telemeter.

(3) Should test in any community be limited to single fee-TV system?

Skiatron—Yes.

Telemeter—Prefers to have FCC select single system for fee TV, but otherwise would leave choice to individual stations.

Zenith—Has no objections to more than one system in a community, but feels its own system may be only one which can qualify under standards it proposes to Commission.

(4) Name proposed individual stations for test:

All three—No specific stations mentioned.

(5) Time required for production, distribution and installation of necessary equipment:

Skiatron—Initial production of minimum required amount (200,000 decoders) should take about a year.

Telemeter—No answer possible now.

Zenith—At least 6 months to commence operations in first community, more could be added at "somewhat faster rate."

(6) Minimum test period:

Skiatron—Five years minimum, 10 years desirable.

Telemeter—No time limit, FCC to give 9 months advance notice before termination.

Zenith—No time limit, but minimum of 2 years.

(7) Approximate minimum & maximum numbers of subscribers to be permitted in each trial area:

Skiatron—Minimum 200,000, no maximum.

Telemeter—No limits.

Zenith—As many as possible.

(8) Should decoders be leased or sold?

Skiatron—FCC shouldn't concern itself with this; it is a merchandising problem. Would prefer to sell equipment, but would lease if required.

Telemeter—Lease only.

Zenith—Lease for \$1-\$2 a month, plus installation charge.

(9) Number of fee-TV programming hours per week:

Skiatron—No limit in multiple-station markets; limit

to be worked out area-by-area in other markets, possibly maximum of 20 hours weekly during 6-11 p.m. segment with maximum of 35 hours a week during all segments.

Telemeter—Only limitation should be FCC rules on minimum hours of operation, fee-TV hours not to be counted as programming.

Zenith—15% of annual operating hours, with no more than 3 hours in any time segment; this rule may have to be relaxed in markets with 4 or more stations, where only one station is carrying subscription programs.

* * * * *

These parties filed in opposition to broadcast trial of fee TV: NARTB; ABC; CBS; NBC; Joint Committee on Toll TV; Jerrold Electronics; WDSM-TV, Duluth; WBRZ, Baton Rouge; WSAZ-TV, Huntington; WGAL-TV, Lancaster; WXEX-TV, Petersburg, Va.; KVOO-TV, Tulsa; WVEC-TV, Hampton-Norfolk; WSYR-TV, Syracuse, & WSYE-TV, Elmira; WBRE-TV, Wilkes-Barre; KTRK-TV, Houston; KHAS-TV, Hastings, Neb.; WHBF-TV, Rock Island, Ill.; WTOP-TV, Washington, & WMBR-TV, Jacksonville, Fla.; KOTV, Tulsa, with KGUL-TV, Galveston, WISH-TV, Indianapolis & WANE-TV, Fort Wayne (Whitney stations).

All parties filing in favor are listed in story on p. 1. Petitions by Cinema-Sound Co., Chicago, and TV Consumers Inc., East Orange, N. J., were not specifically pro or con.

Stations which opposed a test generally gave same arguments as those covered in comments of the networks and movie exhibitor-dominated Joint Committee on Toll TV—with particular emphasis on allegations that FCC has no authority to permit toll TV and that a limited test wouldn't prove anything, while a fullscale test might severely damage free TV.

RKO Teleradio's comments, submitted by v.p. John B. Poor, stated that tests "will provide the Commission with complete, factual and incontrovertible evidence" whether there is demand for pay-TV, whether it is technically and economically feasible and whether it can coexist with free TV. RKO proposed that test stations be non-affiliated vhf & uhf outlets in multiple-station markets, that fee programs be limited to 35 hours weekly, that they not be confined to single station in any test market where there are enough outlets to assure "continuous availability of non-subscription service."

The uhf broadcasters favoring trials all proposed that tests be confined mainly to uhf outlets. Each suggested its own market and station as a possibility. Allentown's WFMZ-TV, instead of proposing time limit for tests, said subscription-TV proponents should be given time to recover their costs, "but only their costs, before their operations are halted by the Commission."

Cinema-Sound Co. (Almer S. Linkton, managing director) claimed "copyright" on all fee-TV systems (it proposes a wired system), asked FCC to notify all 25,000 parties which have commented in fee-TV proceedings of this fact "and inform them to communicate with us" about licensing. "We are presently compiling data of our damages," Cinema-Sound said ominously.

TV Consumers Inc. (Walter C. Routson, pres.), claiming to represent independent servicemen, urged that this group of enterprisers be "a part of the over-all picture" through change in "relationships between the producer and the retailer." What this group was driving at was unclear.

Deadline for counter-comments is July 22.

Personal Notes: Robert E. Kintner, NBC exec. v.p. for TV programs & sales, and Manie Sacks, v.p. for TV programs, elected directors . . . Lew Arnold, gen. mgr. of KTLA, Los Angeles, named v.p. & director of owner Paramount TV Productions, replacing Bernard Goodwin who resigned to give full time to DuMont Bcstg. Corp. as pres. . . Rukeyser Jr., ex-Young & Rubicam; Mrs. Beth Drexler Brod, ex-Tide, join Lynn Farnol Group, N. Y. public relations firm . . . Eric H. Haight, ex-International Affiliates Inc. & Encyclopedia Britannica Films Inc., named treas. of NTA . . . Syd E. Bades promoted to marketing director of International News Photos sales dept. . . Wm. E. Young named north-central div. mgr. of Screen Gems, Detroit; Harry Bubeck, ex-Leo Burnett, joins Chicago sales staff . . . Joe Levine of *Boston Herald-Traveler* news staff joins paper's upcoming WHDH-TV as head of news & film depts.

Obituary

Frank Samuels, 46, west coast mgr. of CBS-TV sales, died July 7 in General Hospital, Hollywood, of encethial myclitis, rare virus-type disease, following 2½-month illness. He formerly was a v.p. of ABC & Wm. Morris Agency. His widow, 2 sons, daughter and sister survive.

Art Van Harvey (Arthur Van Berschot), 73, TV & radio actor who was "Vic" on NBC's *Vic & Sade* which started in 1932 for 12-year radio run, died July 7 at Chicago home. Later he was in NBC-TV's *Hawkins Falls* cast and played old "Vic" role when series was resumed on TV on WNBQ, Chicago, early this year. Surviving are his widow, sister, brother.

Robert W. Sedam, 52, asst. v.p. of AT&T in charge of press information & customer relations div., died July 10 of leukemia in Lenox Hill Hospital, N. Y. Surviving are his widow, parents, 2 sons.

Harry Butcher is acquiring KIVA, Yuma, Ariz. (Ch. 11) under agreement whereby all but \$37,000 (to be retained for working capital) of \$241,000 involved is earmarked to clear up obligations of station which calls itself "underfinanced and . . . insolvent" in transfer application filed with FCC. Butcher owns radio KIST, Santa Barbara, once had interest in KEYT (Ch. 3) there. Agreement states KIVA has "secured creditors in excess of \$225,000; unsecured creditors of approximately \$180,000; owes taxes to various governmental agencies of approximately \$22,000 . . ." May 31 balance sheet shows April 1 - May 31 loss of \$2249, total loss being \$159,120. It had \$96,342 current assets, \$204,177 fixed; \$359,236 accounts payable, \$100,403 loans from stockholders.

NBC is reorganizing overseas news setup, sending Joseph C. Harsch to London as bureau chief & senior European correspondent. Ed Newman, former head of London bureau, goes to Rome as Mediterranean area chief. Frank Bourgholtzer moves from Bonn to new Vienna bureau, John Rich from N. Y. to Berlin, Jim Robinson from Hong Kong to Tokyo.

Certificates of Appreciation have been awarded by Army to Edward R. Murrow & Walter Cronkite (CBS) and John Daly & John Cameron Swayze (ABC) for "outstanding patriotic civilian service" in narrating Army Reserve documentary film series.

Sylvia D. Kessler, Washington communications attorney, moves to Washington Bldg. (Sterling 3-0116).

Telecasting Notes: Caustic comments on summer TV are more prevalent—and more deserved—this year than ever before, with trade press as well as newspapers and magazines getting licks in. July 8 *Advertising Age* leads off a pro-&-con roundup of summer programming letdown with this statement: "The summer network TV schedule would be understandable if it had been put together by a committee composed of magazine editors, book publishers, dance hall operators, amusement park owners, drive-in-theatre managers and beach concessionnaires" . . . Says the agency trade journal: "All these people have their own perfectly logical and thoroughly honorable reasons for wanting to drive the public away from TV and toward other pursuits." But why should TV "try to strangle itself?" . . . Similar commentary from *New York Times'* Jack Gould July 7: "TV this summer is an unmitigated mess. The slack season once was regarded as the ideal time to experiment with new formats and afford a hearing for new personalities. Now the warm weather is the time for rerunning half-hour TV films or putting on trivia that requires little time or trouble" . . . Gould has 2 suggestions for summer TV: (1) As "the logical 'minor league' where newcomers in all branches of the creative arts can have a fair chance to compete for the first team." (2) As a showcase for really top-notch repeats—both kinescope and film—of hit shows of previous season, with all-inclusive format such as *The Best of NBC* or *The Best of CBS* . . . Caution is watchword of TV advertisers for upcoming season, according to July 13 *Sponsor*, noting that for first time joint sponsorships (57) will outnumber full sponsorships (53) in fall, compared with 49 & 65 last season . . . Figaro Inc., jointly owned by Joseph L. Mankiewicz and NBC, now has definite plans for both live and film TV production, as well as at least one legitimate

show to open on Broadway next fall and several theatrical film projects . . . Warner Bros. will spend \$15,000,000—up \$10,000,000 from last year—on TV film production in coming year, including 4 one-hour programs for ABC-TV in fall; movie maker also has earmarked \$1,000,000 for expansion of TV production facilities, with work on new 2-story TV building to begin immediately . . . Two major 30-min. drama series will be shot simultaneously by NBC's CNP—beginning "immediately." One of them, *Boots & Saddles*, is being offered for non-network sale; future of the other, *Union Pacific*, hasn't been decided . . . Official Films will handle first-run syndication of new *Big Story* series in \$1,500,000 deal with Pyramid Productions. Advance orders for former NBC-TV show, now featuring Burgess Meredith as narrator, have come from WABD, N. Y.; KTLA, Los Angeles; WTTG, Washington . . . TV film series boosting New York City's industry will be produced by Walt Framer Productions on contract for N. Y. Board of Trade, for network or station use on commercial or sustaining basis . . . Reruns of Ann Sothern's *Private Secretary (Susie)* have grossed \$3,220,000 for TPA; more income still expected from stripping in syndication . . . "Largest ever" Canadian TV deal is in works, according to CBC, now negotiating with General Motors for sponsorship of drama series Tues. 9-10 p.m. after year's lay-off, along with renewal of variety program on French network.

Nathan Leopold cancelled scheduled July 12 interview by Irvin Kupciet of *Chicago Sun-Times* on NBC-TV's *Tonight*, explaining at Stateville Penitentiary that it "might jeopardize my opportunity for freedom" in application for parole from 85-year sentence for 1924 Bobby Franks slaying. Prison officials had approved arrangements for telecast from Stateville.

Radio Station Sales Reports: WHDL, Olean, N. Y. 49% of radio and *Olean Times-Herald* by Gannett Co. for \$213,566 to Olean Times-Herald Corp., with stock being retired to treasury, increasing holdings of pres. E. B. Fitzpatrick from 35% to 68.6% . . . KOME, Tulsa, by John Brown U, Siloam Springs, Ark. for \$100,000 to partners John W. Kluge, Washington industrialist and radio station owner (80%), and Marcus J. Austad (20%), better known as TV-radio performer Mark Evans . . . WLBN, Lebanon, Ky. by Charles Shuffett & Clarence H. Hulse Jr. for \$65,000 to W. Dee Huddleston, gen. mgr. of WIEL, Elizabethtown, Ky. in association with 5 WIEL owners, Huddleston and others to own 16% each of WLBN . . . WPLY, Plymouth, Wis. by Milton Maltz & Robert Wright for \$65,000 to Charles & Marion Boonstra, R. B. Rogoski & Dalton C. Hille; latter being gen. mgr. of WMUS, Muskegon, in which Boonstras are substantial stockholders . . . KERV, Kerrville, Tex. by Arthur G. Rodgers for \$65,000 to Clyde Jones, KERV chief engineer, and Albert F. Mason Jr., employee of KVOU, Uvalde, Tex. . . . WARB, Covington, La. sold by A. R. Blossman for \$50,000 to co-equal owners brother David C. Blossman, station mgr., and son A. R. Blossman Jr. . . . WBSE, Hillsdale, Mich. by Lloyd V. Hickok, acting as attorney for stockholders, for \$35,150 plus nearly \$20,000 in current assets (book value) to co-equal owners movie actor Harmon L. Stevens & John F. Wisner, also owners of WHLS, Port Huron, Mich., holding CP for WHLS-TV (Ch. 34), and WLEW, Bad Axe, Mich. . . . WGAD, Gadsden, Ala. by Coosa Bestg. Co. (Richard B. Biddle, principal owner) for \$25,000 to group with interest in WGSV, Guntersville,

Ala., including Rep. Albert M. Rains (D-Ala.), gen. mgr. Edward Z. Carrell & chief engineer D. L. Jackson. Biddle is pres. & 25% owner of grantee WOWL-TV, Florence, Ala. (Ch. 41). Brokers: WLBN, Paul H. Chapman & Co.; WPLY, Allen Kander & Co.

Radio station sales approved this week: WMBH, Joplin, Mo. by D. J. Poynor for \$110,000 to Don O'Brien & Herbert Lee (Vol. 13:21) . . . WWPF, Palatka, Fla. by L. C. McCall & J. E. Massey for \$100,000 to George W. Hall (Vol. 13:23) . . . WMRO, Aurora, Ill. by Martin R. O'Brien for \$85,000 to equal partners Vincent G. Cofey & Benjamin A. Oswalt (Vol. 13:24) . . . KVOE, Emporia, Kan. by Lyon County Bestg. Co. (Sherwood R. Parks, pres.) for \$83,500 to Edward J. McKernan Jr. (90%) and Charles N. Putt (10%) (Vol. 13:25) . . . KOVE, Lander, Wyo. by Edward J. Breece for \$75,000 to Fremont Bestg. Inc., in which he has 4% interest; sons Daniel E. & John L. Breece, 32% each; sister-in-law Mrs. Dorothy Reed, 32% (Vol. 13:24).

"Major upswing" in radio sales is reported by NBC Radio, which announced new and renewal business totaling \$1,500,000 in net revenue was placed with the network by 14 advertisers last week. Announcement followed CBS's disclosure last week that it signed \$2,200,000 gross radio billings in single week.

Dismantling of old WOR-TV tower in North Bergen, N. J.—or what was left of it after last fall's plane crash (Vol. 12:45-46)—was started this week. Tower originally was 810-ft.; top was removed after accident, leaving 450-ft. section to be demolished. North Bergen's mayor had ordered tower removed as a hazard.

New and Upcoming Stations: KGEZ-TV, Kalispell, Mont. (Ch. 9) began 6 p.m. July 9 with CBS-TV while KPLO-TV, Reliance, S. D. (Ch. 6) was all set for start on July 15, using mostly film, having received program test authorization from FCC July 11. On-air box score now is 502 (91 uhf).

KGEZ-TV has 5-kw RCA transmitter and 300-ft. Ideco tower with 3-bay antenna at Flathead. It's picking up CBS-TV programs from KXLY-TV, Spokane, Wash. (Ch. 4), 131-mi. away, taking advantage of freak condition which puts 350 uv/m signal to mountain, and transferring it by cable ½ mi. to KGEZ-TV transmitter.

Principal owners are pres. Frank Reardon and community antenna operator Northwest Video Inc. (G. Norman Penwell, pres.), which exercised option for 30% of stock. Reardon controls Montana radios KGEZ; KBOW, Butte; KLCB, Libby. Richard K. Vieck, v.p. & 2.4% owner, is TV gen. mgr.; Robert S. Bennett, commercial mgr.; Martin Tollberg, ex-WBZ-TV, Boston, program director; Wilbur E. Myhre, chief engineer. Base hour is \$125. Rep is Donald Cooke Inc.

KPLO-TV has 10-kw RCA transmitter in Butler steel building, 700-ft. Stainless tower with 6-section superturnstile antenna. Live programming, as semi-satellite, is scheduled for mid-Aug. upon completion of microwave link with parent KELO-TV, Sioux Falls (Ch. 11), 146 mi. away. Owners, also operators of satellite KDLO-TV, Florence, S. D. (Ch. 3) and radio WLOL, St. Paul, are Joseph L. Floyd, N. L. Bentson and Edmund R. Ruben, each with ½. C. J. Johnson, ex-KDLO-TV, is station mgr.; Charles Delperdang, ex-KELO-TV, engineering supervisor. KELO-TV base hour is \$510. Rep is H-R Television.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WBOY-TV, Clarksburg, W. Va. (Ch. 12), changing from WBLK-TV July 15, has 25-kw RCA transmitter due in Aug. and plans start with NBC-TV first day of World Series. It has changed to 380-ft. Ideco tower, and construction of transmitter house and tower base has begun on Pinnickinnick Mt. It's part of Friendly Group, opera-

New deal for Canadian broadcasters, in line with Royal Commission recommendations for end of CBC monopoly controls (Vol. 13:13, 15), may be expedited by new Progressive Conservative Govt. in Ottawa. Report by Commission headed by industrialist Robert M. Fowler had been favored generally by ousted Liberals, and it wasn't big election issue. But incoming Conservatives have aggressively advocated such Commission measures as replacement of CBC Board of Governors with separate govt. regulatory agency. It would have authority over CBC and private TV & radio stations. Probable results if Conservatives carry program through Parliament in session opening in Oct.: Early loosening of licensing restrictions on private stations in competition with publicly owned CBC stations; increased promotion by CBC of commercial business.

NBC-TV is severing dual affiliations in Dallas-Fort Worth area, station relations v.p. Harry Bannister stating that basic affiliate there will be WBAP-TV, Ft. Worth, and that contract with WFAA-TV, Dallas, will be terminated. Long-standing share-time radio affiliation isn't affected.

tor of WSTV-TV, Steubenville, O. (Ch. 9) and KODE-TV, Joplin, Mo. (Ch. 12). Peter Lyman will be program-production chief, with Vilah Brooks, from WPAR, Parkersburg, W. Va., chief engineer. Base hour will be \$250. Rep will be Avery-Knodel.

WRIK-TV, Ponce, P. R. (Ch. 7) has ordered 500-watt DuMont transmitter and plans Sept. 1 start, reports 50% owner George A. Mayoral, also exec. v.p. of WJMR-TV, New Orleans, and WORA-TV, Mayaguez, P. R. Construction is under way and 100-ft. custom-built tower will be used. Rep will be Forjoe.

RCA shipped 25-kw transmitter with 6-kw standby July 11 to upcoming WWL-TV, New Orleans (Ch. 4), due in mid-Aug., previous day shipped 6-section superturnstile antenna; 12-section custom-built superturnstile antenna July 8 to upcoming WPST-TV, Miami (Ch. 10), due Aug. 1; used 12-kw transmitter July 11 to upcoming WPTA, Roanoke-Ft. Wayne (Ch. 21), due in mid-summer; 46-gain antenna July 8 to WBUF, Buffalo (Ch. 17), planning boost to 1000-kw; 24-gain antenna July 1 to WFIE-TV, Evansville (Ch. 14), which has switched over from Ch. 62.

Rock Springs, Wyo. translators K74AF & K78AB began July 4 repeating KTVT & KSL-TV, Salt Lake City, reports R. A. Forsgren, director of Translator T.V. Bestg. Co-op Inc. Redmond, Ore. translators K73AE & K83AA had July 10 target to begin repeating KOIN-TV & KPTV, Portland, writes A. J. Sheffield for grantee Redmond Jr. Chamber of Commerce. Newport, Ore. translator, also planned to serve Otter Rock, has Aug. 1 target to begin relaying KOIN-TV, Portland, reports owner Paul Kafoury.

First Canadian translator application comes from J. Conrad Lavigne, owner of CFCL-TV, Timmins, Ont. (Ch. 6), who asks grant for 34-watt Ch. 3 satellite in Kapuskasing, Ont. be changed to Ch. 70 translator. If change is approved, he reports he will probably order Adler equipment, plans to use 300-ft. tower of Spruce Falls Power & Paper Co., hopes to begin by Christmas.

WMBD-TV, Peoria (Ch. 31) signs with CBS-TV as primary interconnected affiliate, to replace WTVH (Ch. 19), has Jan. 12 programming target.

RCA shipped 3-V color film chain July 9 to WLWT, Cincinnati.

More classroom TV will be used at U of Texas as result of televised courses which showed students progressed faster with chemistry lab experiments than those in regular classes. Faculty report by Dr. W. H. R. Shaw, Dr. Pete D. Gardner & Dr. L. O. Morgan said lectures limited to factual exposition were no more effective on TV than in regular courses, but that experiments could be demonstrated better on TV. "Our feeling is that in no sense will TV replace the conventional classroom, but TV can be used very efficiently to supplement regular lectures," they said.

Printers' Ink Publishing Co. has sold *Printers' Ink* to Vision Inc., management service & publication firm. Confirming deal at press conference July 11 in N. Y., Vision pres. Wm. E. Barlow said 69-year-old magazine will continue as "authoritative business paper of advertising," that "series of publishing improvements" will be announced soon. Terms of sale were not disclosed, but *Printers' Ink* pres. Richard W. Lawrence Jr. will be Vision chairman, Eldridge Peterson continues as publisher, operating magazine as autonomous division.

WIRED "TELEMOVIE" project's debut in Bartlesville, Okla., has been postponed for a month to Sept. 1, Video Independent Theatres pres. Henry Griffing attributing delay to need for extensive equipment and reception tests. He says public subscription campaign will begin in late Aug., though he doesn't expect mass audience until the first-run-movies-in-the-home begin.

He estimated that it would take a year of hard selling to build up audience of 2000 homes and said his eventual goal is 4000. When project starts, however, Bartlesville is expected to become the research capital of the U. S.—with possibly more researchers studying the effects, whys & wherefores of wired fee TV than there are citizens of Bartlesville.

One of first groups to begin such a study met last week in Oklahoma City—National Community TV Assn.'s home theatre committee, which started work on most intensive research project in NCTA history. Headed by Wm. Daniels, the committee outlined tentative program covering all technical aspects of constructing a cable theatre system or converting existing community antenna systems to cable-theatre operation, continuing analysis of Bartlesville test together with study of legal problems of cable theatre operation.

In Los Angeles, meanwhile, city council postponed for another week consideration of Skiatron's request for franchise to wire up city for closed-circuit fee TV.

Last week city's Board of Public Utilities approved Skiatron's request for franchise, but on non-exclusive basis, cancellable if system isn't in operation in 2 years (Vol. 13:27).

A leading advertising executive, visiting in Los Angeles this week, predicted that wired pay TV would not be economically feasible for an area like Los Angeles, and went on record as favoring on-air test of subscription TV—which he said "will fall on its face."

He was BBDO exec. v.p.-gen. mgr. Charles Brower, who said Skiatron would be in pay-TV business in Los Angeles next summer, carrying games of the Dodgers—but on a regular broadcast basis. He said he favors a test because "I don't believe in saving people from themselves." Test will fail, he added, since "the public will not feed quarters into a machine all day."

Film distribution monopoly by 20th Century-Fox & affiliated theatre interests in 1947-50 was charged by Samuel Goldwyn of Samuel Goldwyn Productions Inc. in \$1,800,000 anti-trust trial opening this week in Federal Court, San Francisco. Civil action claimed theatre market was "honeycombed" with Sherman Act violations by 20th Century-Fox & National Theatres Inc., preventing Goldwyn from obtaining fair market rentals for his films.

Rate increases: KAKE-TV, Wichita, July 1 raised base hour from \$600 to \$675, min. \$135 to \$151.50; WLOS-TV, Asheville, N. C. July 1, hour \$400 to \$450, min. \$80 to \$90; WSAV-TV, Savannah, Aug. 1 raises hour \$275 to \$300; KHVH-TV, Honolulu, sets base min. at \$75 for MGM & Warner Bros. special feature participations.

Projection TV receivers for closed-circuit educational and business meeting use are being manufactured by new Tela-Electronics div. of Meilink Steel Safe Co., Toledo. Sales chief of new div. is W. R. Smith, ex-v.p. of East-West TV Network, closed-circuit TV organization.

Do's-&-Don'ts for producers of children's TV programs are offered in new 60-page illustrated booklet, *Television for Children*, prepared by Foundation for Character Education, Boston, in cooperation with Boston U's School of Education. Principal theme of manual, written by specialists in TV, education & psychology, is that programmers—and parents—make many "purely adult" assumptions about child's mind which "do not square with the ideas which children actually have about the world." Foundation is mailing 11,000 copies to networks, educational & psychological organizations, package producers, sponsors, FCC; NARTB is distributing them to member stations; U. S. Office of Education to special libraries.

School Bell Awards in second annual competition co-sponsored by U. S. Office of Education & 6 national school organizations have been won by Loretta Young (NBC-TV), Bette Davis (ABC-TV) and WRCV-TV, Philadelphia. Citations for "most distinguishing dramatic interpretations of education" on TV network in 1956-57 school year were given for "End of the Week" on *Loretta Young Show* Nov. 11 and "Stranded," featuring Miss Davis, on *Telephone Time* May 9. WRCV-TV was cited for "outstanding local or state reporting of education" in *Progress* series.

Suit for \$149,500 against CBS and 4 other defendants has been filed in Nassau supreme court, Mineola, N. Y., by song writer Paul W. Flynn, alleging that CBS-TV's *High Finance* used quiz show format he had submitted to producers Mark Goodson & Wm. S. Todman. Naming all as defendants, he claimed producers either "sold" or "divulged" his format to Jade Productions Inc., which in turn delivered it to CBS & employe Peter Arno. Defense attorneys denied charges at hearing this week before Judge Joseph M. Conroy.

Full texts of speech by CBS Inc. pres. Dr. Frank Stanton and transcript of question-&-answer period at Washington's National Press Club July 2 (Vol. 13:27) were inserted in July 8 *Congressional Record* by Rep. Celler (D-N. Y.). Meanwhile State Dept. press officer Lincoln White reported that Kremlin had made no reply to official U. S. proposal for regular U. S.-Soviet TV-radio exchange as follow-up to CBS-TV's June 2 interview with Communist boss Nikita Khrushchev (Vol. 13:26).

Children in Fairfax County, Va. watch screens 2-3 hours "regularly" in evening, Mon.-thru-Fri., according to survey of 1500 students by local American Assn. of University Women branch. Other findings: 41% watched TV one hour after school; 93% watched Sat., $\frac{2}{3}$ spending 2½-5 hours at it; "comparatively high percentage" in all grades watched Mon.-thru-Fri. after 9 p.m.

Hearing on Frederick Ford's nomination to be FCC commissioner hasn't been set by Senate Commerce Committee yet. Committee is due to meet for short closed session July 16, could set date for hearing at that meeting. No opposition to nomination is expected.

Sweden will have 1,000,000 TV sets by 1965—or one set for every 7 people—according to report by Swedish Institute of Industrial Administration. There currently are 4 TV stations serving approximately 45,000 sets.

Guild Television International S. A. is new Guild Films subsidiary formed to handle foreign TV program activities. Incorporated in Panama, it will have offices in Panama City, Mexico City, London, Rome & Dusseldorf.

"Interim" agreement on staff requirements for video tape recording has been reached by NABET and NBC in Hollywood. Details weren't announced.

OUT ON A LIMB WITH 1957 'GUESSTIMATES': Prediction of 7,000,000 TV set output this year keynotes annual "guesstimate" made for us this week by financial analyst Edgar N. Greenebaum Jr., of Greenebaum & Assoc., Chicago.

Estimate was revised upward from 6,000,000-6,500,000 forecast earlier this year, he said -- the 7,000,000 figure reflecting industry's optimism, due partly to "excellent reception accorded some of the 1958 lines by distributors and dealers."

The 110-degree tube seems to have caught on, Greenebaum stated, "though time will tell whether the 2 majors who have shunned this development (Zenith & Magnavox) have had good reason to do so or were merely ultra-conservative."

Greenebaum's estimate of 7,000,000 is somewhat higher than most we've heard. Many have given us guesses from 6,500,000 to 7,000,000. Nonetheless, Greenebaum's neck-sticking-out year ago -- foreseeing 7,400,000 by year's end -- was phenomenally accurate: RETMA official figure was 7,387,029.

Turning to something considerably more controversial, always vigorously challenged by some set manufacturers, he proffered his estimates of year's output for individual producers. Without endorsing his figures, which are sometimes protested with considerable heat and which are never officially verifiable, we pass along these estimates for 1957, compared with those he made for 1956:

	1957	1956		1957	1956
RCA.....	1,000,000	1,150,000	Magnavox.....	285,000	300,000
GE-Hotpoint.....	850,000	800,000	Emerson.....	225,000	380,000
Admiral.....	700,000	900,000	Sylvania.....	225,000	no est.
Philco.....	600,000	750,000	Westinghouse.....	225,000	200,000
Zenith.....	600,000	675,000	TOTAL.....	5,560,000	6,230,000
Motorola.....	500,000	675,000			
Silvertone.....	350,000	400,000	Balance of Industry	1,440,000	1,170,000

Set Maker Attrition: Following up foregoing estimates, which show just 11 majors producing about 80% of whole industry's output, we've gone back over our semi-annual Television Factbooks and marked the rise & decline in number of TV manufacturers. Though the majors have always had the lion's share of business, there was a time when anyone who could use a soldering iron could call himself a set manufacturer -- and make money at it. However, even today, TV-radio industry is far more competitive than most -- no one producer really dominating the field.

Here is the number of set producers we listed in each mid-year Factbook since 1948, when the figures began to jell into significance: 1948, 70; 1949, 77; 1950, 90; 1951, 94 U.S. & 13 Canadian; 1952, 93 & 21; 1953, 87 & 27; 1954, 75 & 25; 1955, 80 & 24; 1956, 56 & 20; 1957, 44 & 16.

Some of the 44 U.S. & 16 Canadian organizations to be listed in the new Fall-Winter Factbook, due off presses in mid-Aug., may be scarcely worthy of the title "set manufacturer," but we prefer to err on side of generosity. However, a few more are certain to slip out of the picture by Spring-Summer Factbook time.

Business Better? Revised govt. statistics make upward adjustment in U.S. economy for 1956 and first quarter 1957. Commerce Dept.'s final figure for 1956 Gross National Product is \$414.7 billion, compared with previous estimate of \$412.4 billion; new estimate for 1957 first quarter is at annual rate of \$429.1 billion -- or \$2 billion higher than earlier predictions. At same time, downward revision was made in first quarter's \$1.2 billion estimated inventory liquidation to \$800,000,000.

Production: TV production was 63,785 week ended July 5, reflecting July 4 holiday and start of plant vacations, compared with 117,337 preceding week and 48,115 in corresponding week one year ago. It was year's 27th week and brought TV production for year to date to about 2,782,000 compared with 3,499,435 in same period of 1956. Radio production totaled 76,832 (35,714 auto) week ended July 5, compared with 200,242 (90,129) the preceding week and 92,751 (35,937) in corresponding week year ago. Radio output for 27 weeks totaled about 7,263,000 (2,875,000) vs. 6,800,839 (2,363,292) in same 1956 period.

Topics & Trends of TV Trade: Campaign for National TV Week, Sept. 8-14 (Vol. 13:26), is getting up full head of steam as co-sponsors NARDA, NARTB, RETMA, TvB, line up promotional plans. One active participant, seeking to jog his confreres, remarked to us: "You know, I hope this doesn't fall on its face, as Radio Week did, because some of the sponsors sat on their hands."

NARTB and TvB, representing broadcasters, will use theme: "Television—A Member of the Family." NARTB pres. Harold E. Fellows says objective will be to unite stations and networks in showing how TV serves America. TvB pres. Norman Cash plans "expanded services to advertisers to assist them in the effective use of this moving medium."

NARDA and RETMA, representing manufacturers and dealers, are planning a "Television Fall Festival" in 148 cities. A. W. Bernsohn, NARDA exec. v.p. and chairman of manufacturing-retailing steering committee, said "the retailer is the key factor in our program." RETMA exec. v.p. James D. Secrest represents manufacturers on committee. Other groups active in supporting campaign are NEDA, NRFA, NAMM.

* * * *

Capehart Corp. has no immediate plans to produce TV sets, pres. Robert A. Gross indicated in July 8 *Home Furnishings Daily* report. He said "TV today is in a chaotic and non-profitable state. We will not produce or enter into fields which we know in advance are not profitable for our company." Capehart—former IT&T div. which was sold last year (Vol. 12:18) to Ben Gross Corp.—is reported planning to introduce a British-made hi-fi line and considering possibility of domestic radio & hi-fi lines.

Functions of advisory groups to Govt. are spelled out in bill passed this week by House and sent to Senate. Opposed by Administration, bill says Federal Govt. would have to advise Congress of membership and aims of advisory groups and meetings would have to be supervised by govt. employe who would supply summary of proceedings. In opposition, Rep. Halleck (R-Ind.) said bill's red tape might make capable people hesitant to accept membership on such panels.

Transistor sales for first 5 months of 1957 were 8,954,300 worth \$25,128,000, compared with 3,628,000 valued at \$10,082,000 in similar 1956 period, RETMA reports. May factory sales were 2,055,000, compared with 898,000 in May 1956, and 1,774,000 in April 1957.

Closed-circuit meetings of GE appliance dealers, distributors & retailers introduced new TV sets and automatic clothes washers & dryers in 39-city coast-to-coast hookup from Los Angeles July 10. Teleprompter handled technical facilities for show produced by Young & Rubicam.

Westinghouse introduces its first major hi-fi line, 4 basic models priced \$159-\$298. Consoles—to be available in fall—have 3-4 speakers, 6-18 watt amplifiers.

Picture tube sales in first 5 months of 1957 totaled 3,710,646 valued at \$67,005,712, compared with 4,376,142 at \$81,132,537 in similar 1956 period, reports RETMA. Receiving tube sales totaled 185,847,000 worth \$159,147,000 in first 5 months vs. 188,619,000 at \$152,680,000 in same period year ago. RETMA's monthly breakdown:

	Picture Tubes		Receiving Tubes	
	Units	Value	Units	Value
Jan.	760,860	\$13,594,525	37,571,000	\$31,170,000
Feb.	728,363	13,134,778	44,460,000	36,631,000
March	833,257	14,850,847	43,010,000	37,007,000
April	629,838	11,394,043	27,970,000	25,384,000
May	758,328	14,031,519	32,836,000	28,955,000
TOTAL	3,710,646	\$67,005,712	185,847,000	\$159,147,000

Supreme Court Justice Harlan has refused GE request for injunction to prohibit Masters Mail Order Co. of Washington from advertising GE products in N. Y. at less than "fair trade" prices. GE asked the injunction in appealing a U. S. Circuit Court decision in N. Y. reversing a lower court order which had banned such advertising. Harlan said GE can make a new request for an injunction this fall if Supreme Court decides to consider GE's appeal.

Sonic Industries Inc. has filed \$1,000,000 damage suit in N. Y. Federal Court against resistor manufacturer Globe-Union Inc., charging breach of warranty. Suit claims controls purchased from Globe-Union proved defective when phonographs containing them were returned by customers.

Industrial closed-circuit 3-dimensional color TV system has been developed by GE for use initially in its nuclear aircraft propulsion research project for Air Force. In application, twin-lensed TV camera is positioned within radioactive area to transmit double image outside to technician who views screen through polarized glasses.

United Kingdom TV sales for first 5 months amounted to 426,000 at retail, compared with 352,000 for similar 1956 period, says British Radio Equipment Mfrs. Assn. Radio sales for 5 months were 412,000 vs. 339,000 a year ago.

Hoffman Labs buys 3-story building at 2621 S. Hill St., Los Angeles, to house new electro-mechanical dept. Laurence Mendelsohn, ex-Atlantic Instrument Co., Norwood, Mass., heads dept. as v.p.

Philco plans to mail 9,000,000 copies—one of its largest mail undertakings—of 8-page promotion of 1958 TV-radio-hi-fi line to coincide with early Sept. national ad campaign.

Canadian Admiral new models introduced this week use 110-degree tubes, as does full Admiral line (Vol. 13:24). Table models run \$270-\$290; consoles, \$330-\$450; combinations, \$600.

RCA color advertising will be sustained at high level, reports adv. & sales promotion mgr. J. M. Williams, who says color will be featured during Aug.-Sept. on TV-radio, *TV Guide*, *Life*, *Sports Illustrated*, *New Yorker*.

Trade Personals: Charles M. Odorizzi, RCA exec. v.p., sales and service, elected member of RCA board, succeeding Wm. E. Robinson, Coca-Cola pres., who resigned; Pinckney B. Reed promoted to v.p.-international sales, effective July 16 . . . Roger S. Drew named mgr., RCA color TV market development, with 8 field reps: W. J. Cummins, Chicago; P. E. Cunningham, Boston; J. E. Decker, Dallas; R. P. Edwards Jr., Los Angeles; J. V. C. Harter, Kansas City; C. G. Miller, Cleveland; G. F. O'Brien, N. Y.; G. W. Rogers Jr., Atlanta . . . Alfred P. Petrusky promoted to mgr., Sylvania marketing research-electronics . . . C. Kenneth Emery named media planning & research mgr. of GE's adv. & sales promotion dept. . . W. J. Turnbull elected exec. v.p. and a director of National Theatre Supply Co., subsidiary of General Precision Equipment Corp. . . James N. Bailey, ex-RCA, appointed Dot Records director of administration & finance, succeeding L. L. Thornton, resigned . . . Robert E. Lake promoted to Whirlpool international div. director of technical services . . . B. J. Snow named Westinghouse Dallas area sales mgr. . . Irving Tjomsland named director of TV component renewal sales dept., Triad Transformer Corp.

Frank M. Folsom, chairman of RCA board's executive committee, was named member of advisory board of Loeb Awards for business and financial journalism. Other members: Laurence J. Ackerman, U of Conn.; Gerald M. Loeb, E. F. Hutton & Co.; Raymond L. Hoadley, N. Y. *Herald Tribune*; Herbert E. Dougall, Stanford U. Two winners are to be picked annually starting next April, with prizes of \$1000 and bronze plaque.

DISTRIBUTOR NOTES: Westinghouse appoints Dudley E. Warner district mgr. of new Richmond, Va. district headquarters, Westinghouse Appliance sales; Harry A. Cheyney becomes district sales promotion & training mgr.; Jack Adams, sales mgr., major appliances; Gene Roberts, sales mgr. for TV, room air conditioners & vacuum cleaners; Robert E. Moesta, service mgr. Westinghouse also appoints Glen Whitaker southwest district mgr., San Antonio, with Si Degulis, promotion & sales training mgr. and Joe Cutler district sales mgr. . . Philco appoints Bud Schuster, ex-California Electric Supply Co. (Philco), San Francisco sales development mgr., succeeding Lawrence Kulp . . . Sylvania appoints Allentown Wholesale Distributors Inc., Penn & Green Sts., Allentown, Pa. (Ralph L. Way, pres.), for Lehigh, Berks & Northampton counties . . . Motorola appoints Robert L. Perretz northwestern N. Y. regional sales mgr., replacing Rit Bottorf, resigned; Harry Schecter named regional sales mgr. for N. Y., Newark, Philadelphia, Atlantic City; Herb Dorrance transferred from N. Y. to Fla. regional sales mgr., succeeding Wm. E. Laswell, recently transferred to Cal.

RETMA teacher training seminar on advanced TV servicing (Vol. 13:24) will be held Aug. 12-31 in Los Angeles in cooperation with UCLA University Extension and Western Electronics Institute. Course is open to teachers of TV courses, tuition \$27, payable to Regents of U of Cal., 10851 Le Conte Ave., Los Angeles 24.

RETMA is polling members on recommendation to change name to Electronic Industries Assn. (Vol. 13:11, 19, 21). Answers received so far are heavily in favor of change. Result will be disclosed after proxy meeting July 23 in Washington. Change, if voted, will be effective couple weeks later when approved by State of Illinois—where RETMA is incorporated.

Electronics Reports: "Spacistor" is latest in family of semi-conductor devices, and developer Raytheon makes strong claims for its potential. So-called because of importance of spacing in its parts, spacistor is said to have potential of operating up to 10,000 mc at 500 degrees centigrade. It's still in research stage, may take 3-5 years for commercialization, Raytheon says.

Raytheon reports device can be made of variety of semi-conductor materials, more than those applicable to transistors. Small as transistor, it's said to operate electrically like a vacuum tube. Patents have been applied for by inventors—Dr. Herman Statz, Dr. Robert Pucel, Conrad Lanza.

* * * *

Five new recommended standards for electronics industry, approved by industry reps, are available through RETMA engineering dept., 11 W. 42nd St., New York 36, N. Y.: RS-185, *Dimensional and Electrical Characteristics Defining Miniature Receiver Type Tube Sockets for Printed Circuits*, \$2.80; RS-187, *Vibrators for Auto Radio*, \$1.65; RS-188, *Standard Dimensional System for Automation Requirements*, 25¢; RS-190, *Pin Straighteners and Wiring Jigs for Electron Tubes*, 50¢; RS-191, *Measurement of Direct Interelectrode Capacitance*, \$1.50 (minimum order charge \$1).

Navy Electronics Lab manual, *Reliability Design Handbook* (PB 121T839), used by engineering personnel & Navy contractors as guide to construction techniques, design procedures & application design data, is available for \$3 from Commerce Dept.'s Office of Technical Services, Washington 25, D. C.

Construction of new plant of Sylvania-Corning Nuclear Corp. at Hicksville, N. Y., to manufacture nuclear fuel elements for atomic reactors was started July 10. Scheduled for completion early next year, 25,000 sq.-ft. building will double Hicksville facilities.

Air Force guidebook on *Electron Tube Operation as Influenced by Temperature & Voltage* by T. H. Briggs of Wright Air Development Center (PB 121798) is available for \$2.50 from Office of Technical Services, Commerce Dept., Washington 25, D. C.

New \$3,000,000 plant will be built by IT&T subsidiary Farnsworth Electronics Co. at Ft. Wayne, scheduled for completion in 1958. Facilities are expected to add 1000 to Farnsworth's 4500 employes there.

Motorola leases 60,000-sq.-ft. bldg. (4900 Flournoy St., Chicago) for regional sales offices and electronics div. parts warehouse.

ELECTRONICS PERSONALS: Glen McDaniel, RETMA pres.-emeritus, appointed director of Litton Industries . . . Frank A. Ungro elected exec. v.p. of Westrex, Western Electric Co. subsidiary, effective July 31; R. A. Colistra succeeds him as treas. . . Forrest E. Gehrke promoted to mgr. of Sylvania's microwave power tube plant, Williamsport, Pa. . . Dr. Kenneth R. Eldredge appointed asst. director of Stanford Research Institute's engineering research div., Menlo Park, Cal.; Dr. Manning Hermes succeeds him as mgr. of control systems lab . . . Dr. Clarence Zener, Westinghouse research labs director, lectures on "Anelasticity in Solids" at summer session of International School of Physics, Varenna, Lake Como, Italy . . . S. M. Barr, Western Union v.p.-plant & engineering, named to new post of v.p.-planning, in charge of administering company's diversification program.

Financial & Trade Notes: Officers - & - directors stock transactions during May, as reported to SEC: American Bosch Arma—Charles Allen Jr. sold 3500 through Allen & Co., holds 70,214 indirectly, none personally; Frank I. Berisch sold 250, holds 800; Clifton T. Foss sold 1500, holds 600; Harold R. Sennstrom bought 200, holds 305; Wm. S. Wasserman sold 100 through holding company, holds 14,000 in holding company, 4969 in trusts, 12 personally. **AB-PT**—Robert H. Hinckley bought 1000, holds 1000; Herbert B. Lazarus bought 1000, holds 1500. **American Electronics**—Clifton W. Reed sold 3000, holds 1200. **American Machine & Foundry**—Morehead Patterson sold 200, holds 48,862 in trust, 35,453 personally. **Amphenol**—Arthur J. Schmidt bought 500, holds 29,858. **Arvin Industries**—Eldo H. Stonecipher exercised option to buy 150, holds 1700. **Avco**—Arthur R. Kantrowitz bought 10,000, holds 11,000. **Bendix Aviation**—W. H. Houghton sold 500, holds 2383; Raymond P. Lansing exercised option to buy 750, holds 4198; Palmer Nicholis exercised option to buy 2247, holds 3484. **Consolidated Electrodynamics**—Philip S. Fogg sold 1000, holds 20,000; Edwin Harbach bought 200, holds 1000. **Daystrom**—Thomas Roy Jones bought 4500, holds 15,610. **DuMont Labs**—Armand G. Erpf bought 2100, holds 5800; George Etkin bought 200, holds 200; George C. McConeghy bought 100, holds 100; David T. Schultz bought 2800, holds 4200. **Gabriel**—L. H. Davis bought 500, holds 5500. **General Dynamics**—Robert C. Tait bought 7500, holds 23,925. **GE**—Wm. R. Herod sold 330, holds 8176; Willard H. Sahloff sold 475, holds 3080. **Globe-Union**—George C. French Jr. bought 100, holds 3175; Wm. B. Fyie sold 100, holds 4400; Chester O. Wanvig Jr. bought 100 for trust, holds 15,000 in trust, 10,100 personally. **Hazeltine**—Henry Reeve sold 250, holds 10,000. **International Resistance**—Edward A. Stevens exercised option to buy 600, holds 5100. **IT&T**—Robert McKinney bought 5000, holds 30,000. **Litton Industries**—Roy L. Ash exercised option to buy 5000, holds 19,357 in partnership, 52,415 personally; L. W. Howard sold 700, holds 200 in trust, 4762 personally. **Magnavox**—Stanley S. Sondles bought 10, sold 105, holds 3200; Richard A. Wilson sold 1600, holds 1524. **Minneapolis-Honeywell**—Richard P. Brown sold 200, holds 64,034; J. J. Wilson sold 1800, holds 75,270. **Paramount Pictures**—Duncan G. Harris bought 500, holds 2500; Randolph C. Wood sold 2100, holds 39,900. **Raytheon**—D. R. Hull exercised option to buy 1000, holds 1500. **Sperry Rand**—Harry Landsiedel sold 3000 from joint account, holds 26,960 in joint account, 13,904 personally; Bernard O. Reuther sold 5000, holds 25,000. **Sylvania**—W. Benton Harrison sold 200, holds 466; Robert E. Lewis exercised option to buy 390, holds 8310. **Unitronics**—Robert A. Kerr sold 220, holds 200. **Webeor**—Harry R. Ferris bought 1100, holds 1200. **Westinghouse**—Bruce D. Henderson bought 150, holds 600.

* * * *

Avco reports net income of \$5,232,621 (56¢ per common share) on sales of \$165,016,259 in 6 months ended May 31 compared with \$28,716 profit on \$167,844,606 in similar period year ago. No provision was required for income taxes due to loss carry-forward. Avco sold its Bendix home laundry business to Philco, discontinued its Crosley TV-radio-appliances, last Nov.

National Telefilm Assoc. offered new \$5,000,000 issue of 6% 5-year sinking fund subordinated notes (Vol. 13:24) this week at par through Cruttenden, Podesta & Co., Cantor, Fitzgerald & Co. and Westheimer & Co. At same time, 350,000 common stock shares were offered at \$7.75 per share.

RCA second quarter sales are up, profits about same, *Wall Street Journal* reports, making comparison with similar 1956 period. For quarter ended June 30, story says sales were 6% higher than \$251,600,000 in corresponding quarter last year, while profits showed little change from the \$7,310,000 (47¢ per share) reported then. RCA financial report will be released about July 30. RCA had no 1957 TV or hi-fi factory inventory at end of June, report adds, while last year it had some old model inventory until Sept. Shipments of new line to distributors are said to be running substantially ahead of last year. Bloomington, Ind. TV plant is reported operating on 2-shift basis, having recalled most of 1800 laid off last winter.

Aerovox will have good profit in first 6 months of 1957, despite fact sales were lower than during similar 1956 period, says pres. W. M. Owen. Improved earnings on lower volume are due to operating economies and dropping of some unprofitable lines of resistors and capacitors, he said, adding that he was optimistic about second half. He added part of Aerovox volume decline resulted from TV inventory reduction, that a step-up in TV production "could help us quite a bit." He stated only 30% of Aerovox production goes to TV-radio, compared with 45% two years ago.

C&C Super Corp., which owns pre-1948 RKO feature films, will change name to C&C TV Corp. and turn over all non-TV operations to subsidiary National Phoenix Industries Inc. if stockholders approve company plans at special meeting July 29. Proxy statement proposes distribution of about 4,000,000 National Phoenix shares on basis of one share for each 2 shares of C&C Super, whose TV operations are headed by Matty Fox. Company and consolidated subsidiaries had total operating revenues of \$10,664,725, net loss of \$1,594,764 in 1956.

Sanders Assoc., Nashua, N. H. manufacturer of electronic components and research & development firm, has filed with SEC for registration of 110,000 shares of non-voting Class A common stock (\$1 par). Company plans public issue of 100,000 shares, reserving remaining 10,000 for employees. At least \$700,000 of net proceeds will be applied to reduction of bank loan.

Stromberg-Carlson is "bright light" div. of General Dynamics, pres. Frank Pace Jr. of parent company told N. Y. Society of Security Analysts recently. He predicted that it "will be the fastest growing in the future," that overall General Dynamics sales & earnings "will increase substantially" this year over 1956, when net was \$31,946,995 on sales of more than \$1 billion.

Dividends: Gross Telecasting, 40¢ payable Aug. 9 to stockholders of record July 25; Howard W. Sams, 10¢ July 25 to holders July 12; International Resistance, 5¢ Sept. 3 to holders Aug. 15; Warner Bros., 30¢ Aug. 5 to holders July 19; General Telephone, 45¢ Sept. 30 to holders Sept. 3; National Theatres, 12½¢ Aug. 8 to holders July 25.

Airborne Instruments Lab has been granted exemption by SEC from Investment Company Act of 1940 for non-public sale of \$1,000,000 convertible notes to small group of purchasers, including American Research & Development Corp., which has inter-company affiliations with Airborne (Vol. 13:20).

Television-Electronics Fund reports record net assets of \$155,073,811 June 30 vs. \$128,181,192 year earlier. Net asset value per share increased to \$12.46 on 12,443,606 shares from \$11.96 on 10,713,875 in period after deduction of 55.7¢ per share paid in realized capital gains.

U. S.-Europe live TV link in 5 years was predicted by NBC pres. Robert Sarnoff in July 10 edition of his newsletter to TV-radio editors, devoted to his recent European trip. He said question most frequently asked him by European TV officials was: "When will we have a live link-up with the American continent?" Europeans are eager for the link, he added, "as a means of generating new interest in new programming." He said western Europe currently has about 10,000,000 TV sets and estimated that number would double within 3 years. "The spark for this expansion must come from programming," he added, "and the best hope for fulfillment appears to lie in the rise of competing commercial services."

Asking for special microwave channels or permission to share telecasting STL frequencies, Jerrold Electronics Corp. pres. Milton J. Shapp told FCC, in testimony during microwave hearing this week, that there are 501 towns of 1500-10,000 population beyond range of reliable direct TV service from stations. He said 375 are within 60-100 mi. of stations, 126 beyond. Need for microwave, he said, is to provide "run-to-town" link from reception point to heart of town where signal may be distributed by CATV system. He stated that cost of cable run from suitable reception point is prohibitive for most of the towns. Analyzing STL distribution, Shapp asserted that use of station STLs is such that sharing of frequencies may be accomplished with no interference problems.

First TV coverage of murder trial in Ark. history started July 10 in Texarkana, where Judge Lyle Brown permitted KCMC-TV, Texarkana, Tex., to film court proceedings. Disregarding American Bar Assn.'s Canon 35 against cameras, judge authorized TV recordings, stipulating only that they be withheld until after end of retrial of once-convicted James Moore on robbery-slaying charges. In addition, newscaster for radio KCMC sat in adjoining room listening to trial through earphones, breaking into programs to give running account.

Unusual public service "network" has been established by Ohio State U's educational WOSU-TV and commercial WHIZ-TV, Zanesville, and WTAP, Parkersburg, W. Va. The 3 uhf stations are cooperating to carry WOSU-TV's *Five & Ten Show*, daily 5 p.m. children's educational variety program, on live basis via private microwave—possibly first daily program originated on educational station for live "networking" to commercial outlets. Additional programs are slated to be added to 3-station schedule later this year.

Polish Govt. has ordered at least \$14,000,000 worth of TV sets from Pye Ltd. of London, after company had displayed sets at Poznan fair. Polish Govt. Buying Agency placed immediate order for 12,000 sets, with at least 100,000 more to be delivered later, according to Pye.

FCC allocations actions: (1) Finalized assignment of Ch. 8 to Ainsworth, Neb. (instead of originally assigned Ch. 3), added Ch. 3 to McCook, Neb. (2) Received petition from WTVP, Decatur, Ill. (Ch. 17) to shift Ch. 3 from Champaign, Ill. to some other area to effect deintermixture, giving a uhf channel to WCIA, Champaign.

Single TV application for new station filed this week was by Tele-Views News Co. Inc., Rock Island, Ill. printer of *TV Guide*, for Ch. 8 in Moline, Ill. This brings total to 127 (34 uhf). No translator applications were filed. [For details, see *TV Addenda 24-AA* herewith.]

Translator CPs granted: Ch. 79 & Ch. 82 to Morrison-Knudsen Co., Brownlee Trailer Court, Ore.; Ch. 70 to Town of Pinedale, Wyo.

New inexpensive movie-making technique—high-quality adaptation of the kinescope—is being offered to businesses, educators, etc., in new venture of NBC's burgeoning subsidiary California National Productions Inc. New system, not designed for TV use, is called "Calnatron," offers quick quality films at fraction of cost of conventional methods, CNP says. Using special lighting techniques, film and processing methods, the kines can be made via closed-circuit TV from remote as well as studio locations. NBC's entire film library of stock shots will be made available to Calnatron users for backgrounds, settings, etc. Calnatron operations, concentrated in New York, will be headed by Theodore H. Markovic, under NBC-TV Film Sales v.p. H. Weller Keever.

Advertising agency profits are down, July 12 *Printers' Ink* reports in 1956 survey, first undertaken by magazine since similar 1953 roundup. Study of 315 agencies shows before-tax profits last year averaged only 1.46% of billings, or 9.74% of income including commissions, percentage charges & fees, compared with 10.8% in 1953. Income from TV time & talent increased last year to 11.42% of total from 9.59% in 1953, but income from radio time & talent was down to 7.62% compared with 9.26%. *Printers' Ink* says big reason for lower profits is that "the advertising agency, like other service businesses, can never increase its charges as rapidly as costs increase."

Billion-dollar radio industry can be achieved as "immediate target"—and "then we're going to go on from there"—pres. Robert E. Eastman of ABC Radio told Station Representatives Assn. at meeting July 9 in ABC's N. Y. headquarters. He said ABC is "going to be a constructive force to stabilize rates & values" in support of objective, outlining these network policies: (1) No selling 6-9 a.m. & 4-6 p.m. (2) "Smallest unit of sale—5 min." (3) "No negative selling." (4) "Only live programming." (5) "No expediency selling."

Suits for \$3,000,000 for libel & slander on ABC-TV's *Mike Wallace Interviews* show May 19 were filed against ABC July 8 in Los Angeles superior court by police chief Wm. H. Parker and captain James Hamilton, alleging ex-gambler Mickey Cohen damaged them by remarks he made on program (Vol. 13:22-23). Parker demanded \$2,000,000, Hamilton \$1,000,000, in actions which also named Wallace, Cohen, sponsor Philip Morris, N. W. Ayer agency, 10 "John Does" as defendants.

New by-laws of NBC-TV affiliates, effective at annual meeting Sept. 11-13 at Waldorf-Astoria, N. Y., provide for replacing 9-member executive committee with 10-member board of delegates elected for 2-year terms. Officers of station-network liaison board will be chairman & vice chairman representing basic affiliates, vice chairman representing optional affiliates, secy.-treas. selected from either group. Walter J. Damm of WTMJ-TV & WTMJ, Milwaukee, is chairman of executive committee.

Closed-circuit TV was used for first time in a British art auction this week when Sotheby's of Bond Street used it to show paintings to overflow crowd in the \$914,000 auction of collection of late Wilhelm Weinberg. Potential buyers who couldn't get into main room saw the pictures by TV and their bids were relayed to auctioneer by telephone.

Industrial TV training devices are rated according to image clarity in new study, *Visual Principles for Training by Television* (PB 121931), by R. Jackson of Office of Naval Research, available for 75¢ from Commerce Dept.'s Office of Technical Services, Washington 25, D. C.

SUMMARY-INDEX OF THE WEEK'S NEWS — July 20, 1957

TV COURT COVERAGE fight carried to ABA convention by ABC's Daly; Canon 35 must go, he says. Lawyers await committee report on revision (p. 1).

SAFETY OF PORTABLE SETS reaffirmed by manufacturers, warning public against jumping to conclusions following "electrocution" report (p. 2).

CLOSED-CIRCUIT PAY TV draws congressional attention as Matty Fox pledges start next year. Rep. Chelf demands fee-TV trial (p. 4).

TASO ACTIVITY slowed by Justice Dept. red tape, govt. representatives presiding over panels. New Orleans' cut-mileage Ch. 12 experiment worries AMST (p. 7).

UHF EXCISE EXEMPTION campaign starts anew in Congress, with new bill introduced. Magnuson urges passage; amendment of excise tax bill sought (p. 7).

7,000,000-SET YEAR seen by Motorola, introducing new line, as bullish comments continue—latest from Admiral, Emerson and Sylvania (p. 11).

RCA REPORTS RECORD first-half sales of \$564,990,000, more than \$38,500,000 higher than previous record; profits up slightly (p. 10).

MBS SALE FOR "UNDER \$1,000,000" due next week as RKO Teleradio Pictures concentrates on TV-radio station operation, film syndicate (p. 8).

TV REACHES MORE HOMES than dailies do, new Gallup poll shows; broadcasts preferred 3-to-1 to newspapers for "understandable" news (p. 9).

FTC HITS TV COMMERCIALS for Lanolin shampoo as ad monitors move on cosmetics field; footage aimed at "beauty conscious young girls" scored (p. 14).

ASSAULTING THE COURT-COVERAGE IRON CURTAIN: It's time for courts "to go along with history—and to stop fighting it" with bans on TV-radio trial coverage, ABC v.p. John Daly, in charge of network's news & public affairs, told American Bar Assn. convention this week in N. Y., demanding unrestricted freedom of press for broadcasters.

In vigorous assault on ABA's Canon 35—"the major barrier to our inherent rights under the Constitution"—Daly called for repeal of non-binding but generally-observed lawyers' dictum:

"The taking of photographs in the courtroom . . . and the broadcasting or televising of courtroom proceedings are calculated to detract from the essential dignity of the proceedings, distract the witness, degrade the court, and create misconceptions thereto in the minds of the public and should not be permitted."

Daly said: "Let's set the record straight on a few basic facts," emphasizing that "the news function is broadcasting's first responsibility to the public." He listed commonly-heard objections to TV-radio coverage—and answered them, paraphrasing points in Colo. Supreme Court ruling last year (Vol. 12:9) which authorized individual state court judges to permit cameras & microphones:

(1) Broadcasters are in entertainment field, not protected by freedom of speech—"The Supreme Court of the United States has ruled otherwise."

(2) Broadcasters merely want to satisfy curiosity & entertain public—"Public is poorly informed about the courts; additional coverage will be beneficial."

(3) Publicity-hungry judges & attorneys will play to cameras—"We can't deny the Constitutional right of all citizens just to prevent a few persons from making fools of themselves before a larger audience than usual."

(4) TV & radio violate privacy of everybody in courtroom—"There just isn't a law protecting anybody's privacy on a public matter." Moreover, "Canon 35 violates freedom of the press in that it constitutes censorship."

(5) Cameras, mikes, technicians will make "madhouse" of court—"Industry's agreed to pool its coverage of trials."

Possible softening of Canon 35 by ABA was hinted in report by board of governors to house of delegates that special committee is studying rule. Findings will be presented to ABA meeting next Feb. But Daly was dubious about it:

"Where Canon 35 is concerned, we feel that documentary dynamite not only fails to stampede you; you hardly even look around . . . For us, relaxation of the ban is insufficient; for you abandonment is still unthinkable."

■ ■ ■

Meanwhile Daly's arguments for court coverage were supported by results of latest in succession of dozen TV-radio tests in which Circuit Court Judge Lyle Brown permitted KCMC-TV, Texarkana, Tex., to film murder trial across state line in Texarkana, Kan. (Vol. 13:28).

Judge Brown complimented broadcasters on orderly work. Following guilty verdict, other court officers, including defense lawyer Harold Flowers, also agreed that coverage was success. And no complaints were reported earlier when Judge James W. Crawford permitted televising part of perjury trial in Portland, Ore. of Mayor Terry D. Schruck, who was acquitted by jury.

Score kept by NARTB since 1954 shows similar successes when other telecasters have had access to courts: KWTX-TV, Waco, Tex., murder trial; KEYD-TV (now KMGM-TV), Minneapolis, murder trial; WOAI-TV, San Antonio, hearing; WTMJ-TV, Milwaukee, sentencing; WSM-TV, Nashville, murder trial; WBTV, Charlotte, superior court proceedings; KCSJ-TV, Pueblo, murder trial; WKY-TV, Oklahoma City, general trial coverage; WWJ-TV, Detroit, and WRC-TV, Washington, traffic court.

PORTABLE TV, SAFETY & PUBLIC RELATIONS: Set manufacturers and distributors moved quickly this week to reassure public about safety of metal-cased portable receivers.

Manufacturers rechecked their own safety precautions following July 14 tragedy in which 6-year-old boy was killed in Skokie, Ill. when he reportedly brushed against aluminum TV stand while reaching into kitchen cabinet for a knife. Reports from Cook County coroner's office, where the 17-in. 1958 GE portable was impounded, indicated that receiver's cabinet was in electrical contact with hot (110-v.) chassis, though coroner said tests on set so far were "inconclusive."

Incident received widespread newspaper publicity, including big story by TV editor Jack Gould in July 17 New York Times decrying portables' "hazards" and urging review of safety standards.

Congress stepped into the act next day when Chairman Magnuson (D-Wash.) of Senate Commerce Committee wrote FCC Chairman Doerfer expressing "grave concern" and asking what steps Commission can take "in order to require adequate safeguards to protect the public against this type of a hazard." Magnuson asked if FCC had authority to meet this type of situation. "If not," he added, "I would welcome any suggestions for legislation to meet this problem head-on."

There is only one other case of TV electrocution on record which cannot be traced directly to tampering. It also is said to have involved child and a portable, but what actually happened in this case was never fully explained.

Set makers point out that TV safety record is perhaps better than that of almost any other type of appliance around the home; that over 43,000,000 are in use, including more than 2,500,000 portables.

■ ■ ■

Underwriters' Laboratory, whose safety standards are followed by all major set makers, took wait-&-see approach, stressing that full facts in case aren't known, that the allegedly faulty set hasn't

yet been examined to determine responsibility for the trouble. An official expressed regret that so much publicity was given the case before "the cause of the fatality is actually known."

"There's no reason why a TV receiver complying with our requirements shouldn't be as safe as any other appliance," we were told by UL assoc. managing engineer Arnold Smoot. "It's certainly possible that we may make changes in our rules, but not until all the facts are known. We have felt that, considering everything—including the economics of TV receivers—our standards are entirely adequate." He said Underwriters had never even heard a complaint involving a GE portable.

There was immediate public reaction. GE said its offices have been receiving calls from owners of its portables asking for servicemen to check their sets for shock hazard. Company ordered immediate field tests of its TV sets, and at week's end a check of stocks in hands of distributors and in factory hadn't turned up a single defective one.

GE engineers said a preliminary check of the set involved in tragedy showed that it had been damaged—but there were also reports that it was dropped after the reported electrocution.

Like other set makers, GE said that every set is normally tested for safety before it leaves factory, and that Underwriters' standards are rigidly followed.

Despite its widespread publicity, the incident has caused no consumer panic, set manufacturers agreed. We contacted a number of them, and all agreed there was no drop in sales of portables or any other kind of sets this week. Nor was there any evidence that people were afraid to use their sets.

Set makers do realize they may have a public relations problem on their hands. RCA and Admiral wired distributors spelling out in detail the safety factors in their portable sets.

None of the manufacturers we contacted could understand how accident could have happened unless set had been tampered with or improperly serviced.

Admiral pres. Ross D. Siragusa said portable TV sets are no more dangerous than AC-DC radios, which have used similar hot-chassis principle for past 25 years—"and more than 100,000,000 of these are in use today."

Emerson pres. Benjamin Abrams said all receivers leave factory with proper insulation and instructions for servicing. Unless tampered with or improperly serviced, he added, such an accident never could have happened.

Most set makers, like Motorola, expressed interest in taking any further steps possible to add further safeguards to what they consider an already safe set.

In Chicago, meanwhile, Coroner McCarron began assembling "blue ribbon" jury of electrical & TV experts—with assistance of Illinois Institute of Technology—to examine the receiver involved in tragedy, as well as factory-fresh portables from other manufacturers. Jury is due for fact-weighting session July 30.

Always feuding with manufacturers, pres. Frank Moch of National Alliance of TV & Electronic Service Assns. (NATESA), with headquarters in Chicago, called conference of his board to draft statement which he hopes servicemen will have their customers sign when a portable is fixed. Draft statement says flatly: "This set can cause electrocution." It adds that serviceman has taken all possible precautions and has checked set after servicing, but that he is not legally liable for any injuries.

Manufacturers emphasized that there is some danger in any appliance if misused or improperly serviced; that a power lawnmower can amputate toes, a gas range can cause asphyxiation, an electric iron can burn down a house. Almost daily, misused or damaged electrical appliances cause electrocution, but these incidents no longer get nationwide publicity.

Meanwhile, industry seems to be faced with potential problem similar to those of TV's early days—the days of picture tube implosion scares, X-ray and sterility scares, eyestrain scares.

PAY-TV PENDULUM SWINGS TO WIRED SYSTEMS: Subscription-TV spotlight turned again to closed-circuit approach this week—in lull between comments and counter-comments (due July 22) on FCC's proposal for trial of broadcast fee TV—as Skiatron TV's Matty Fox assured a Congressional committee that people will be paying-as-they-see next year in Los Angeles, San Francisco or New York, that he has adequate financial backing, that programs will be cheap, that his wired pay TV will give people programs they couldn't see on free TV. Baseball, for instance.

On FCC's pay-TV front, business was mostly mail-order, with these letters going back and forth:

(1) From Commission to Chairman Celler (D-N.Y.) of House Judiciary Committee, in answer to his letter of last week demanding that Congress be permitted to decide question of pay TV (Vol. 13:28). Letter, approved unanimously by FCC, said, in part:

"We agree that Congress could reach the conclusion that the use of radio frequencies for a subscription-TV service should be prohibited. However, in the absence of Congressional action . . . the Commission is obligated to abide by the provisions of the Communications Act and the Administrative Procedures Act [and] we believe it is FCC's duty to make some disposition of the pending petitions . . .

"On the basis of these comments and reply comments we will carefully examine the problems involved in a determination of the proper scope of trial demonstrations and the Commission's power under the present law to safeguard the public interest adequately during a trial period."

(2) From Rep. Chelf (D-Ky.), also a Judiciary Committee member, to Chairman Doerfer, urging trial of fee TV without further delay, expressing opinion that FCC has "full, complete and final authority" and warning it not to "allow anybody, no matter what position he may hold in or out of Govt., to attempt to either pressure or intimidate you."

Letter referred to Rep. Celler's opposition to fee-TV trial, and Chelf repeated the oft-denied charge that RCA chairman Brig. Gen. David Sarnoff "tried to buy the patents of pay-as-you-see TV from its inventors when it was first developed."

(3) From Gen. Sarnoff to Chairman Doerfer, denying as "utterly false and untrue" Chelf's statement that he tried to buy subscription-TV patents, blaming "the president of Zenith Radio Corp." for originating the report, and reiterating his belief that pay TV would "cripple this great democratic medium for the free dissemination of ideas, education and entertainment to all the people of America."

House anti-trust subcommittee's hearings on professional baseball meanwhile delved again into closed-circuit subscription-TV issue this week. As did Dodgers Pres. O'Malley (Vol. 13:26), Giants Pres. Stoneham told hearing that he had tentative contract with Skiatron TV to carry his team's games on toll TV next season if team moves to west coast or on expiration of current TV commitments (3 years) if team stays in New York. He said contract guarantees Giants one-third of gross, with specific minimum which is larger than the \$730,750 Giants received from TV in 1956.

Just before Stoneham's appearance in Washington, San Francisco Mayor Christopher let out a groan heard coast-to-coast after Pacific Telephone Co. pres. Mark Sullivan observed that it would cost \$30-\$60,000,000 to wire San Francisco Bay Area and this money "was not forthcoming immediately."

After conferring with Skiatron officials later, however, Sullivan—while still maintaining project involved "tens of millions of dollars" and "thousands of man-years"—said it was "well within the range of commercial possibility."

Sullivan scotched reports that telephone company has signed contract with Skiatron or that it would put any risk capital into the venture. He indicated that PT&T is considering contract to let Skiatron use its poles and conduits, and stated:

"We have decided that our company cannot enter into a speculative business. We might put in some money on a guaranteed basis. Costs must be borne by TV people or guaranteed in some fashion."

■ ■ ■
Skiatron pres. Matty Fox, star pay-TV witness before Rep. Celler's subcommittee, drew interested attention as he explained his plans to "go nationwide," to wire up cities "in a great many places." In response to questions, he made these points:

(1) Sullivan's estimate of \$30-\$60,000,000 to wire San Francisco area did not apply to Skiatron system. He said "wire grid system" covering greater Bay area would cost about \$6,000,000, for Los Angeles County under \$12,000,000—not including connecting loops to homes or decoder attachments. He didn't say what they'd cost.

(2) He could start operations 4-6 months after beginning to wire San Francisco, could give service to all TV homes in Los Angeles County in 11 months. He promised service could begin to some homes either on coast or in New York (outside of Manhattan) by 1958 baseball season.

(3) Skiatron would charge subscribers \$3 monthly covering installation and rental which would include 2 pay-TV channels and one free "hi-fi music" channel. Then, viewers would pay on per-program basis through Skiatron's IBM card system. He said no specific charge had been decided for baseball games, but 50c-\$1 had been discussed with O'Malley.

(4) He's negotiating for other program attractions and for wiring other cities. Skiatron wouldn't put on any programs that public could ordinarily see free. He added that without pay TV, baseball games would soon be withdrawn from TV to preserve box office.

(5) He owns 87½% of Skiatron TV, only stockholders are "myself and another fellow" (unidentified). Company has no corporate tie with Skiatron Electronics & TV Corp., which developed system.

(6) Discussions and tentative agreements with Giants & Dodgers aren't limited to closed-circuit TV, also apply to on-air fee TV, if authorized.

Celler and other congressmen listened attentively and politely, asked few questions. At one point, however, Celler told Fox: "I think you better be prepared for state legislation [to control rates] if there aren't already regulations which apply."

Rep. Rogers (D-Colo.) injected only harsh note into proceedings when he said: "From the letters that I have received, the public is pretty much in opposition to paying for programs."

Limited Red China coverage by U. S. newsmen was proposed July 18 by Secy. of State Dulles to TV-radio-press representatives as modification of outright ban on travel there (Vol. 13:17), but they insisted on removal of all restrictions. Dulles suggested that dozen reporters, presumably selected from newspapers & news organizations which now have foreign bureaus, be permitted to go to China mainland for 6-month trial period. Disagreement with compromise was expressed at State Dept. conference by committee composed of pres. Theodore Koop of Radio-TV News Directors Assn., chairman Robert Hurleigh of Radio & TV Correspondents Assn., ANPA pres. Wm. Dwight, J. Russell Wiggins of American Society of Newspaper Editors, editor Henry R. Luce of *Time*. Next step: State Dept. will try to find out how many correspondents would go if China ban is lifted.

Peru will get TV by Nov., according to RCA International, which announced this week that Radio America Co. has ordered 2-kw transmitter, 2 camera chains and studio equipment for installation in Lima.

Slow-starting "watchdog" probe of FCC and 16 other govt. agencies by special House Commerce Oversight Subcommittee, headed by Rep. Moulder (D-Mo.), moves another step July 22 when it meets to pick staff director. Leading candidates for job are J. E. (Buck) Taylor, 1944-52 attorney general in Moulder's home state, and Bernard Schwartz, director of NYU's Institute of Law. Set up 3 months ago with \$250,000 appropriation to see whether regulatory agencies are administered properly (Vol. 13:22), Subcommittee isn't expected to get down to hearings before fall or winter, when FCC will be No. 1 investigative target. Staff so far consists of chief investigator Baron I. Shacklette, consultant Dr. Walter M. W. Splawn, attorneys Mary Louise Ramsey & Joseph T. Conlon Jr., clerk-coordinator Herman Clay Beasley.

Asking WJZ call letters for newly purchased WAAM, Baltimore, Westinghouse told FCC history of the call: Owned by Westinghouse for radio in Newark 1921-23, then transferred to RCA and moved to N. Y., later sold to ABC and changed to WABC—unused since.

Personal Notes: Sylvester L. (Pat) Weaver retained by Kaiser Industries Corp. to direct all of its TV advertising activities, including new weekly 60-min. *Maverick* drama on ABC-TV, to be produced by new company owned jointly by Kaiser, Warner Bros. & AB-PT; Weaver and his associates assume the Kaiser duties in addition to their Program Service networking organization; Mort Werner, NBC v.p. for daytime programming, Aug. 19 joins Kaiser in executive capacity with responsibility for all "internal TV activities of the affiliated Kaiser companies;" he'll be elected a v.p. . . . Stanley Moldov promoted to film coordinator of CBS TV Film Sales . . . Eugene R. Myers named mgr. of CBS Radio spot sales, St. Louis . . . Herman Rush resigns as v.p. & director of Official Films to establish own business . . . Ben A. Hudelson, ex-Westinghouse Bestg. Co., named production mgr. of WRCA-TV, N.Y. . . . Bob Lemon resigns as gen. mgr. of WTTV, Bloomington-Indianapolis after 8 years with Sarkes Tarzian organization, says he has no immediate plans . . . Tom Sheeley promoted to operations mgr. of KELO-TV, Sioux Falls, S. D., J. C. Johnson to mgr. of satellite KPLO-TV, Reliance . . . A. Schneider, first v.p. of Columbia Pictures, assumes duties of late exec. v.p. Jack Cohn; A. Montague named v.p. in charge of distribution . . . Chester R. Cooper promoted from Triangle Publications program dept. to program mgr. of WNHC-TV, New Haven . . . Harry Travis promoted to v.p. & asst. gen. mgr. of WNEM-TV, Bay City-Saginaw, Tom Matthews to operations director; John J. Keenan resigns as sales mgr. to join WINT, Ft. Wayne . . . Kendall Smith, ex-WHYN-TV, Springfield-Holyoke, Mass., joins upcoming WTIC-TV, Hartford, as asst. program mgr. . . . Mrs. Anne Kohler promoted to v.p. of Roger Wade Productions . . . Robert Schultz, ex-Perceptual Development Labs, St. Louis, named

sales mgr. of Shamus Culhane Productions . . . Ken Bagwell, ex-radio KXYZ, Houston, named asst. national sales mgr. of WTVJ, Miami . . . Sheldon W. Peterson, ex-KLZ-TV, Denver, joins WTCN-TV & WTCN, Minneapolis-St. Paul, as news & special events director . . . Edward M. Gray, NTA v.p., named head of NTA's new Famous Films-Programs for TV div. to supply low-budget specialized programming, headquartering at 8721 Sunset Blvd., Hollywood; Cy Kaplan appointed special asst. to NTA sales v.p. Harold Goldman, N. Y. . . . Robert Livingston promoted to Pacific Coast mgr. of CBS-TV sales, succeeding late Frank Samuels.

Obituary

James M. Cox, 87, Democratic Presidential candidate in 1920 and 3-term Governor of Ohio who had wide newspaper & radio-TV interests, died July 15 in Dayton home. His health had been failing several years during which son James Cox Jr. assumed management of properties, but he was at work last week at *Dayton Daily News* when fall led to fatal heart attack. He bought *News* in 1898 with borrowed \$26,000, spread from it into political-publishing-broadcasting career. Properties included *Dayton News* and *Journal-Herald* (WHIO-TV & WHIO), *Atlanta Journal and Constitution* (WSB-TV & WSB), *Miami News* (part of WCKT & WCKR), *Springfield (O.) Sun and News*. He served in Congress 1909-13, was Ohio Governor 1913-15, 1917-19, 1919-21, lost to Warren G. Harding in Presidential campaign in which he carried on Woodrow Wilson's League of Nations fight. Many newspapers eulogized Cox, while bipartisan tributes were paid in Senate & House this week. Surviving in addition to widow and James Cox Jr. are another son, 2 daughters, 5 grandchildren.

ADVERTISING AGENCIES: Jere Patterson, ex-*Life*, joins Erwin, Wasey & Co. as exec. v.p. . . . Harry S. Bean elected a v.p. of BBDO . . . Gilbert L. Burton, gen. mgr. of Guild, Bascom & Bonfigli, elected a v.p. . . . Fred Becker named TV-radio director of Roy S. Durstine, San Francisco . . . Robert J. Black, ex-Hicks & Greist of Cal., named a v.p. of Calkins & Holden, Los Angeles . . . Ruth Chilton named TV-radio director of Robinson, Adleman & Montgomery, Philadelphia.

One of FM's greatest enthusiasts, Capt. W. G. H. Finch (USN-ret.) is on air again—this time with a multiplex operation at Brookfield, Conn. Associated with him is another retired Navy captain, A. J. Detzer. Finch had once operated WGHF, New York, a pioneer FM station, was an early experimenter with facsimile. New station is WGHF-FM, operates on 95.1 mc with regular service, also offers stereophonic sound through multiplexing—latter carrying no commercials, aimed primarily at commercial establishments. Finch's last active duty with Navy was as chief of patents. Detzer was also an electronics specialist, served as chief of staff, New York Navy Base, before retirement in 1951, most recently was exec. v.p. of Haller, Raymond & Brown electronics research & development firm.

Lawrence Creshkoff, ex-asst. director of Boston's educational WGBH-TV & WGBH-FM, named director of Chelsea closed-circuit TV project, Ford Foundation-backed experiment which will bring special educational TV programs to homes of 608 low-income families in New York's John Lovejoy Elliott Houses (Vol. 13:16).

Wm. H. Bauer, FCC patent adviser, retires Aug. 31 to enter private practice. With Govt. 42 years, with FCC since 1935, he worked persistently in attempt to get Commission to adopt strong rules governing TV-radio patents. In letter of resignation tendered to gen. counsel Warren Baker, he stated: "As you know, I have a number of times, in memoranda and orally, pointed out to the Commission that my work is ineffective without patent rules such as defined, and the purposes and benefits stated, in Comr. Lee's dissenting statement to the Commission's recent Report & Order terminating rule-making proceedings in Dockets 10090 & 11228. It is my hope that I will find a way to continue my work for the adoption of such rules by the Commission."

Three-point cold war plan was advocated by RCA chairman Brig. Gen. David Sarnoff in interview with Drew Pearson for column syndicated July 15. Sarnoff said U. S. should: (1) Spend 1/10th of military budget in propaganda contest with Russia. (2) "Set up a strategic board for political defense equivalent to the Joint Chiefs of Staff." (3) Change name of VOA to "Voice of America—For Freedom & Peace." He argued: "No investment to win the cold war is exorbitant when measured against the cost of a bombing war."

New AT&T govt. communications mgr. in Washington is Robert E. Gradle, replacing Claude M. Blair, promoted to asst. treas. in N. Y. headquarters. In other Washington div. promotions, AT&T named Ernest H. Crabb commercial mgr., Arthur L. Winner plant supt.

New rep: KOB-TV, Albuquerque, N. M. to Petry July 1 (from Branham).

TASO, the all-industry uhf-vhf crash-research organization, appears to be running into some trouble—apparently largely due to Justice Dept.'s insistence on controlling panels if anti-trust possibilities are to be minimized. Chairmen of panels are chafing, because Justice insists govt. representative must actually preside—making chairmen something even less than figureheads. Panel 2, on receivers, hasn't met for months—has no date to meet—manufacturers being understandably shy in view of Justice's refusal to guarantee anti-trust immunity for panel actions.

Another uhf-vhf development being watched closely is proposed experimental operation of WJMR-TV, New Orleans (Ch. 20), planning to test Ch. 12 at site 162½ mi. from WJTV, Jackson, Miss. (Ch. 12), instead of rules-required 190 mi. Commission has ordered WJMR-TV's Ch. 12 power kept at no more than 40 kw towards WJTV, but latter still fears interference. Legally cautious, Commission has ordered WJTV to "show cause" why the WJMR-TV operation shouldn't be permitted. Maximum Service Telecasters members have joined WJTV in fighting the mileage-cut experiment.

* * * *

A long fight evaporated this week when WMUR-TV, Manchester, N. H. (Ch. 9) dismissed application to sell to Storer Bestg. Co. after sale agreement expired July 7. Storer loosed blast at applicant TV for New Hampshire, which participated in blocking sale by filing for Ch. 9 at WMUR-TV's renewal time, calling the application "almost without precedent." WMUR-TV is retaining application to move nearer Boston.

One vhf CP was granted—KSOO, Sioux Falls, S. D. (Ch. 13)—along with 3 translators: Ch. 71 & Ch. 74, Flagstaff, Ariz.; Ch. 72, Susanville, Cal. Two CP-holders were told to ask for hearings to show why they haven't built—or surrender grants: KOLF-TV, Flagstaff (Ch. 9); KAMT-TV, Alpine, Tex. (Ch. 12).

Sole FCC allocations action was to start rule-making on conflicting proposals to assign Ch. 12 to Mankato, Minn.; Fairmont, Minn.; Estherville, Ia.

Three applications for stations and 5 for translators were filed with FCC this week, bringing total pending to 129 for stations (35 uhf) and 43 for translators. Station applications were: (1) For Los Angeles, Ch. 34, by Sherrill C. Corwin, who holds CP for KBAY-TV, San Francisco, and owns 15% of KAKE-TV, Wichita, with interests in 4 Cal. AMs; (2) for Moline, Ill., Ch. 8, by group headed by H. Leslie Atlass Jr.; (3) for Farmington, N. M., Ch. 12, by group including owners of radio KVBC and local community antenna operator. Translator applications were for 3 channels in McGill, Nev., one each in La Grande, Ore. and Benton City, Wash. [For details, see *TV Addenda 24-BB* herewith.]

Quick Senate confirmation of Frederick Ford as FCC commissioner appeared assured this week following July 19 hearing by Senate Commerce Committee in which no opposition was heard and all of Committee's members praised nominee highly. Senators' questions in 45-min. hearing concerned expediting of pending FCC cases, recognition that FCC is "arm of Congress," importance of educational TV. Sen. Revercomb (R-W. Va.) testified in Ford's behalf. Committee recessed hearing until July 24, when Ford's current boss—Deputy Attorney General Wm. Rogers—will testify.

HELP-UHF campaign to exempt all-channel sets from 10% manufacturers' excise tax—now a hardy perennial—started anew this week with aim of amending House-passed excise tax revision bill (HR-7125) either before or after it is reported out of Senate Finance Committee. Opening gun was fired in featured Sunday TV article July 14 by *New York Times'* Jack Gould, who pointed out the unanimity with which entire industry endorses proposal and expressed hope that Treasury Dept. would reconsider its opposition.

Gould's column was inserted in *Congressional Record* by Senate Commerce Committee Chairman Magnuson (D-Wash.) with the notation that "every impartial group, every Congressional committee that has looked into this subject matter, as well as the FCC, has strongly recommended the removal of the Federal excise tax on all-channel sets . . ."

Meanwhile, Rep. Ikard (D-Tex.) reintroduced his bill, which died in committee last session, to accomplish the exemption (HR-8675). Committee For Competitive TV also got to work on the issue this week, is pushing for amendment of HR-7125 from floor in both House and Senate. Senate Finance Committee still has set no date for consideration of excise tax revisions.

Translator starts: K75AD, Blythe, Cal. began July 11 repeating KRCA, Los Angeles, reports Paul Micalizio, secy. of Palo Verde Valley TV Club, also operator of K71AB there and holder of CP for K79AA. W79AA, Claremont, N. H. is on air with equipment tests, reports Bill Putnam, pres.-gen. mgr. of parent WRLP, Greenfield (Ch. 32), satellite of WWLP, Springfield (Ch. 22). K83AB, Santa Rosa, N. M. began equipment tests July 3, repeating KGGM-TV, Albuquerque, reports E. M. Lucero, pres. of local Chamber of Commerce, owner. K77AC, John Day, Ore. plans start by Aug. 1, repeating KIDO-TV, Boise, reports R. W. Southworth, pres. of John Day Valley TV Inc. operator of K72AG there. K70AW, Pinedale, Wyo., plans Aug. 1 start repeating KID-TV, Idaho Falls, reports Glen W. Wise for owner, Town of Pinedale.

Power & height increases: WMT-TV, Cedar Rapids, Ia. (Ch. 2) began telecasting from its new 1355-ft. tower July 17; WHP-TV, Harrisburg, Pa. (Ch. 55) July 12 increased power to 514-kw ERP, plans boost to 1000-kw in several months; WEAU-TV, Eau Claire, Wis. (Ch. 13) July 11 to 310-kw; CKVR-TV, Barrie, Ont. (Ch. 3) July 9 to new 740-ft. tower with 26.7-kw; WJTV, Jackson, Miss. (Ch. 12) plans boost to 316-kw Aug. 10.

Rate increases: WTMJ-TV, Milwaukee, Aug. 1 adds Class AA hour (6:30-10 p.m., daily) at \$1450, 20 sec. at \$275, Class A hour going from \$1150 to \$1250. WSYR-TV, Syracuse, July 1 raised base hour from \$900 to \$1100, min. \$175 to \$200. WBRZ, Baton Rouge, Aug. 1, hour \$300 to \$400, min. \$65 to \$90. Note: KAKE-TV, Wichita, \$675 hourly rate reported last week (Vol. 13:28) is for combination including affiliated KTVC, Ensign, Kan.

WHYY-TV, Philadelphia (Ch. 35, educational), delayed by controversy over station control, now has Sept. 16 programming target, following reorganization of board of directors, giving greater representation to school board and city council. Public school authorities have approved payment of \$100,000 to station, withheld pending outcome of dispute.

Video tape for Ampex recorders is now commercially available from Minnesota Mining & Mfg. Co. in 4800-ft. rolls at \$306 each.

Telecasting Notes: Drive to preserve New York's film production industry got sympathetic ear of Mayor Wagner this week at meeting with representatives of Film Producers Assn. of New York. Wagner designated city's first Asst. Corporation Counsel Leo A. Larkin to meet with group July 25 to provide whatever immediate assistance is necessary to head off the widely heralded (but undocumented) exodus of TV film commercial production to west coast . . . New York film companies asked mayor to name special coordinator "to promote and expedite civic cooperation with respect to location permits, revision of antiquated fire regulations, clarification of sales tax provisions [on commercial films] and encouragement generally of film producers to schedule shooting in New York City . . . City's non-theatrical film industry, FPA pointed out, is \$70,000,000 business, employing 25,000 in production, laboratory and creative posts . . . MCA's *Revue Productions* is No. 1 in this year's TV film production race, reports July 15 *Billboard*, which says it has \$20,800,000 worth of business in the works and planned. Same article reports that top 4 companies account for about half of this year's TV film output; in addition to *Revue*, they are *Desilu* with \$15,875,000 gross (largely being produced for others), *Screen Gems* with \$10,200,000 and *Warner Bros.* (new-comer to the top ranks) with \$8,000,000. Others, in order, are *McCadden* (\$5,600,000), *4 Star* (\$5,500,000), *Ziv* (\$4,800,000), *Disney* (\$4,000,000), *Don Fedderson* (\$3,200,000), *Official Films* (\$3,100,000) . . . *MGM-TV's* first TV film series, *The Thin Man*, has been purchased by *Colgate-Palmolive* on 26-week contract for Friday evening NBC-TV exposure beginning next fall . . . *Revlon* seeking injunction to prevent *Hal March, m.c.* on its \$64,000 *Question*, from taking on similar duties on NBC-TV's *What's the Use?*; both shows are owned by *Entertainment Productions Inc.* . . . Second sponsor has been signed by *Pat Weaver* for his Program Service network's *Ding Dong School*, which starts Aug. 26 on 8 stations—*Climax Industries*, for *Kid-O*, synthetic modeling compound, buying unspecified number of participations thru *Hicks & Greist Inc.*

Plumping strongly for TV-radio use of microwave facilities, NARTB pres. Harold E. Fellows and engineering mgr. A. Prose Walker testified this week in FCC's above-890-mc hearing, documenting value of remotes and STLs. Walker made these specific recommendations: (1) Use of 940-952 mc exclusively for aural STLs. (2) Exclusive use of 1990-2110, 6875-7050 & 12,700-13,200 mc, with TV-radio foregoing sharing of 2450-2500 & 10,500-10,700 mc. (3) The 3 channels in 7050-7125 mc, allocated to TV-radio but "temporarily" reserved for sole use of common carrier should be made available to TV-radio on same basis as other channels in these bands. Walker noted that most remote equipment has been in 7000-mc band but said he expects equipment development in 2000 & 13,000 mc range to ease congestion. Also testifying this week was John Boler, North Dakota telecaster (*KXJB-TV*, Fargo, etc.), who launched severe attack on AT&T, saying he's paid \$364,211 in 2½ years for 8-hour-daily service he could have provided himself for \$90,000—24 hours a day. Last April, he said, after he told AT&T he could no longer afford service, basic tariffs were cut from \$10,650 to \$4580 monthly. He asked for investigation, called AT&T "vicious, arrogant and arbitrary."

Primary affiliation of *WFAA-TV*, Dallas, with *ABC-TV* is effective Sept. 9, following termination of arrangement whereby *WFAA-TV* and *WBAP-TV*, Ft. Worth, shared both NBC-TV & ABC-TV (Vol. 13:28).

SALE OF MUTUAL Broadcasting System for "under \$1,000,000" to syndicate headed by Paul Roberts, mgr. of *KRDK-FM*, Los Angeles, is expected to be agreed upon next week. Not involved in sale are any of the stations owned by MBS' parent *RKO Teleradio Pictures Inc.* Assets to be transferred include contracts with 480 affiliates, good will, contracts for AT&T lines, contracts with talent, office equipment, etc.

No official word at all was forthcoming from principals, but considerable partial information was floating around. Roberts wasn't telling who his backers were, but one may be Roger L. Stevens, investment broker and theatrical producer ("*Tea & Sympathy*," "*Bus Stop*" and other hits). Stevens told us he may or may not lend Roberts group some money. "That would be my only connection," he said. "I'm not interested in radio—but I'd only have a small amount involved, if any. I understand Roberts doesn't have a deal yet. I don't know who else has been approached for loans."

Apparently, the Thomas F. O'Neil enterprise is being sold because O'Neil chooses to concentrate on his profitable TV-radio station holdings: *WNAC-TV & WNAC*, Boston; *KHJ-TV & KHJ*, Los Angeles; *WOR-TV & WOR*, New York; *WHBQ-TV & WHBQ*, Memphis; radio *KFRC*, San Francisco; ⅓ of *CKLW-TV & CKLW*, Windsor-Detroit, along with Don Lee and Yankee Networks, *RKO Teleradio* film syndicate; is buying radio *WGMS*, Washington.

MBS spokesmen were quick to scotch rumors network is going out of business, pointing to new business signed this week. Network currently has only 63 employees. It was started in 1934 by *WOR*, New York; *WLW*, Cincinnati; *WGN*, Chicago; *WXYZ*, Detroit. In 1943, parent of *RKO Teleradio Pictures* and MBS, *General Tire & Rubber Co.*, began buying into groups holding part of network. *General Tire* obtained controlling interest in 1952.

Sale of *KERO-TV*, Bakersfield (Ch. 10) for \$2,150,000 by Gene DeYoung & associates to *Wrather-Alvarez Bcstg. Inc.*, operator of *KFMB-TV*, San Diego (Ch. 8) & *KFMB* (Vol. 13:11) was approved by FCC. However, approval was with following conditions: (1) Agreement *KERO-TV* has with *KFSD-TV*, San Diego, not to increase coverage by either station is to be cancelled. (2) Grant is subject to action FCC may deem necessary as result of court proceedings regarding sale. (3) Grant is subject to FCC action on petitions regarding Ch. 10. Sale has been protested in courts and with FCC by Robert K. Strauss, 10% owner of *WITI-TV*, Milwaukee, who is suing sellers, charging abrogation of contract to buy *KERO-TV* (Vol. 13:17).

Transfer of *KSBY-TV*, San Luis Obispo (Ch. 6)—formerly *KVEC-TV*—to owners of *KSBW-TV*, Salinas-Monterey (Ch. 8) was approved by FCC. Former co-owners John C. Cohan & Jerome Kantro get \$25,000 each, plus advances they made to station, and *KSBW-TV* assumes \$372,021 obligations (Vol. 13:22). Cohan is pres. & 32% owner of *KSBW-TV & KSBW*, Kantro 5%. Also approved was transfer of radio *KVEC* to Cohan, who pays Kantro \$50,000 for 50%, becomes 100% owner.

Frank J. Russell's *WDMJ-TV*, Marquette, Mich. (Ch. 6) has purchased CP for *WJMS-TV*, Ironwood, Mich. (Ch. 12), provided FCC will permit Ironwood operation as satellite and construction of private intercity relay. Seller Wm. L. Johnson, also owner of radio *WJMS*, is to receive \$10,000 out-of-pocket expenses.

TV HOMES outnumber newspaper homes — and editors had better “take stock” and “plan accordingly” if they “want the newspaper to maintain its present strong position” against TV competition, according to report by American Institute of Public Opinion being prepared by Dr. George Gallup for fall publication.

Reporting “disturbing” and “rather startling” findings in survey to American Society of Newspaper Editors convention July 11 in San Francisco, Dr. Gallup said special poll based on 7000 interviews showed that:

(1) “As of June 1, a total of 41,000,000 households had TV receivers. The number getting a daily newspaper at that time was 39,000,000.” (NBC estimates 40,000,000 TV homes as of July 1, Vol. 13:28).

(2) “. . . only one adult in 5 gets his news, on a typical day, solely from newspapers. And as many persons listen to news on radio before 9 a.m. as read a newspaper before 9 a.m. And as many look at TV news after 6 p.m. as read a newspaper in this time period.”

(3) “Radio won by a vote of nearly 3 to one” in answers to question whether newspapers or broadcasts were preferred if only 15 minutes could be spared for news. And TV won by the same margin.” Why? The people who voted for radio or TV said that broadcast news is more understandable, easier to get.”

(4) “It is too much to expect people to pay more money [in increased price] for a newspaper whose editorial emphasis is on the very same news which these people have already heard on their radios, or seen on their TV sets.”

Dr. Gallup warned ASNE that TV & radio “competitors are on the march, experimenting constantly with new types of material, new techniques, new forms of presentation.” Nevertheless: “The evidence is overwhelming as to the basic strength of the newspaper with the American public.”

Communications systems survived simulated atomic attacks this week in Operation Alert 1957, ODM officials indicated July 19 at close of nationwide exercise in which 167 nuclear weapons were assumed to have destroyed 155 key target areas. Reports of presumed damage to broadcasting, telephone & telegraph facilities were charted by ODM’s Emergency Communications Agency in secret relocation center, where it was estimated that vital inter-city messages could have been sent & received despite attack—and adequate services to peripheries of bombed-out areas restored by end of week. Maj. Gen. Jerry V. Matejka (ret.) was acting ECA administrator for tests.

DuMont appoints 10 distributors for new industrial TV line: Audio Equipment Co., Detroit; Engineered Electronics Inc., Pittsburgh; Hunter & Bell Inc., Buffalo; A. B. Loudermilk Co., San Francisco; John A. Morefield Co., Camp Hill, Pa.; N. J. Communications Corp., Kenilworth, N. J.; Research Instruments Corp., Richmond; Sound Systems Inc., Long Island City, N. Y.; J. H. Sparks Inc., Philadelphia; Telephone Electronic Sound Corp., St. Louis.

Control of WTOV-TV, Norfolk (Ch. 27) will be equally held by Louis H. Peterson’s Norfolk Bestg. Corp. (WNOR) and Temus R. Bright, FCC this week approving transfer of another share to bring Peterson’s holdings to 50% (Vol. 13:27). Norfolk Bestg. also holds 21% of WLVA-TV, Lynchburg, Va. (Ch. 13) & WLVA, and Peterson owns 94% of radio WSSV, Petersburg, Va.

Unique TV audience measurement service is being offered by ARB, surveying all counties in which station claims effective coverage. Report will give total homes reached by each program, average number of viewers per set, percentage of men, women, children watching—in place of ratings stated in terms of percentage of specific “coverage areas.” New surveys will be done simultaneously with metropolitan area surveys in order to provide method of evaluation. Effort will be made to interest ad agencies in new method—which will cost \$2400-\$4000 for one-week survey. Example of new area survey: Memphis area, now being measured, includes 60 counties. Because of overlap in outlying areas, audience data will be supplied only for home market stations. Another area currently being surveyed is Wichita-Hutchinson.

WEWS, Cleveland, makes unique use of precast concrete stave silo for microwave equipment which beams programs from downtown station to transmitting tower in suburban Parma, O. Parabolic antennas are enclosed in circular room with plexiglas windows at top of 16 x 100 ft. structure, thus eliminating weather interference, “particularly bounce caused by high winds.” Silo also enables workmen to service equipment by using inside ladder. WEWS chief engineer J. B. Epperson conceived and developed idea; Mann Engineering Co., Pittsburgh, handled construction; Marietta Concrete Corp. built silo.

Deaf-blind communication by electronic Braille was demonstrated July 17 at meeting of World Council for the Welfare of the Blind and Committee on Services for Deaf-Blind in N. Y. Messages are tapped out on typewriter-like machine, transmitted over regular telephone circuit, translated into Braille through pins in “feeling box” at other end. System was developed in labs of Netherlands Telephone & Telegraph Co. at The Hague by Dr. Wm. L. van der Poel & Dr. Gerrit van der May, who is himself deaf & blind.

Educational TV stations average 31 hours on air per week compared with 25 hours year ago, but proportion of live programming dropped to 58% from 60%, according to report released July 17 by Educational TV & Radio Center, Ann Arbor. Survey of 21 stations in week of April 1-7 showed in-school & after-school programs for children increased 52%, most popular categories being music & dance, literature & philosophy, science, national & world affairs. Least scheduled were vocational guidance programs.

Lowell TV Lecturers at Harvard for 1957-58 are Prof. I. A. Richards, critic & language teacher who pioneered in basic English techniques, and Prof. Jakob Rosenberg, art historian. They will give weekly lectures, adapted from college class work, on Boston’s educational WGBH-TV. Richards will present “Poetry through TV”; Rosenberg, “History & Appreciation of Graphic Arts.” First Lowell TV Lectureships, established by Harvard in 1956, were held by Edwin G. Boring and late Zechariah Chafee.

TV spurs reading, according to annual report of Brockville, Ont. Public Library. Report says librarians should drop fears that TV lures viewers from books, and states that TV’s “frequent screening of the classics has directly resulted” in increased library use. For instance: “The juvenile division is bursting at the seams.”

Fellowship grants of \$2000 each have been given to MIT, Stanford U & U of Ill. by TV Shares Management Corp., principal underwriter of TV-Electronics Fund Inc., for graduate students in electronics. Similar grants totaling \$6000 were made last year.

Radio station sales approved by FCC: WIL, St. Louis, & WWIL, Ft. Lauderdale by Missouri Bestg. Corp. for \$650,000 by H. & E. Balaban Corp. (1/3), Atlantic Brewing Co., Chicago (1/3) and 4 family trusts (Vol. 13:26) . . . WLOW, Portsmouth, Va. by owners of WTOB, Winston-Salem (Ch. 26) for \$250,000 to James Bestg. Co. (Vol. 13:24) . . . KUTI, Yakima, by Independent Bestrs. for \$237,500 to Harrison Roddick (Vol. 13:19) . . . KCRS, Midland, Tex. by Ruth & Clarence Scharbaur Jr. for \$220,000 to Wendell Mayes (Vol. 13:16) . . . WMEX, Boston, by Northern Corp. for \$215,000 to brothers Robert S. & Max E. Richmond (Vol. 13:21) . . . WTOP, Toledo, by Edward Lamb for \$122,500 to John L. Booth (Vol. 11:34) . . . KRKD, Los Angeles & KITO, San Bernardino, 36 2/3% by Richard C. Simonton for \$107,500 to parent corp., with Albert Zugsmith increasing holdings from 35 1/2% to 55.57% (Vol. 13:26) . . . KBYE, Oklahoma City, by co-owners Frank J. Lynch & Kenyon Brown for \$90,000 to Great Empire Telecasting Corp. (Vol. 13:11) . . . WANS, Anderson, S. C. by J. C. Johnson & associates for \$85,000 to W. Ennis Bray, George C. Nicholson & Mrs. John C. Amick (Vol. 13:26) . . . WHBG, Harrisonburg, Va. by Rockingham Radio Corp. for \$65,000 to co-owners Robert C. Currie Jr. & Frederick R. Griffiths (Vol. 13:25) . . . KIHR, Hood River, Ore. by C. H. Fisher for \$60,000 to Clarence J. McCredie (Vol. 13:23) . . . WNTM, Vero Beach, by Mrs. Naomi Murrell for \$52,500 to Frank Spires (Vol. 13:20) . . . KLOG, Kelso, Wash. by Northwest Public Services Inc. for \$50,000 to J. J. Flanigan (Vol. 13:26). Note: Also approved was transfer by Mrs. Louise P. Pursley of all but 10% of WKAB, Mobile, under refinancing deal to John E. & George D. Hopkinson and Quentin C. Sturm (Vol. 13:25).

Radio station sales reported this week: WXRA, Buffalo, by Thaddeus Podbelniak for \$175,000 to John W. Kluge, also buying KOMA, Tulsa (Vol. 13:28) and owner of stations in Washington, D. C. area, St. Louis, Nashville, Pittsburgh & Ft. Worth . . . WNAM, Neenah, Wis. by owners of WFRV-TV, Green Bay, Wis. (Ch. 5) for \$154,000 to Neenah-Menasha Bestg. Co. . . . KPEG, Spokane, by Martha & Robert D. Rapp (owners of WINI, Murphysboro, Ill.) for \$137,500 to F. Kemper Freeman (46.67%), Elwell C. Case (46.67%) & Mrs. Florence C. Hayes (6.66%) . . . KSEO, Durant, Okla. by B. F. & Bennett Story for \$60,000 to U of Okla. journalism professor Robert V. Peterson & wife (30% each) and sons Robert H. & Richard P. Peterson (20% each); Petersons also have purchased *Durant Daily Democrat* from Storys.

TV refinement for sidewalk superintendents is provided by Sam Minskoff & Sons Inc., builder of new 34-story office structure at Lexington Ave. & 51st St., N. Y. Closed circuit links camera with three 21-in. receivers mounted on wooden fence along Lexington Ave., giving bystanders close-up of construction details 8 a.m.-4 p.m. daily.

List of firms offering films for co-op TV use has been compiled by TvB. First of kind, it contains 203 company names divided into product categories. Largest groups are household appliances with 43 firms listed, toilet requisites with 17, food products with 14. List is available from TvB.

Hour a day of educational programs will be scheduled beginning next fall by WSOC-TV, Charlotte, N. C. (Ch. 9), which plans to pick up and rebroadcast programs from educational WUNC-TV, Chapel Hill (Ch. 4) daily 9-10 a.m. during coming school year.

Financial & Trade Notes: RCA reported record sales of \$564,990,000 for first 6 months of year, a 7% increase over previous first-half record of \$526,488,000 in 1956. Net income amounted to \$20,311,000 (\$1.35 per share) in first 6 months of 1957 compared with \$20,037,000 (\$1.32) in similar period last year.

Second quarter earnings were \$7,501,000 (48¢) on sales of \$269,217,000, compared with \$7,310,000 (47¢) on sales of \$251,640,000 in same period of 1956.

* * * *

General Instrument earned \$77,454 on \$7,042,565 in first fiscal quarter ended May 31 vs. loss of \$84,355 on \$5,668,079 in corresponding period last year, chairman Martin H. Benedek ascribing firm's bettered position to diversified electronics program. Figures include earnings & sales of Micamold Electronics & T. S. Farley Ltd. of Canada, both bought in 1956, but exclude those of Radio Receptor, acquired in April (Vol. 13:15). Benedek said diversification in industrial & military fields provides "a broader cushion against fluctuations of the TV & radio market while allowing the company to maintain its position as a major supplier of components in the field of 'entertainment' electronics. . . ."

GE reports record sales and earnings for first half 1957—\$127,823,000 (1.47 per share) on sales of \$2.121 billion, compared with \$112,864,000 (\$1.30) on sales of \$1.958 billion in first 6 months of 1956. Second quarter profits were \$63,817,000 (74¢) on \$1.072 billion sales vs. \$57,902,000 (67¢) on sales of \$1.012 billion in similar period last year. Pres. Ralph B. Cordiner said sales of capital goods equipment continued at "high levels," durable goods remained about the same, several home appliance lines "declined in recent months." He blamed drop on smaller number of housing starts, unusual weather—and appliances are "lasting longer before replacement is necessary."

Raytheon reports operating profits of \$2,296,000 (81¢ per share) on sales of \$111,950,000 in first 6 months of 1957, plus non-recurring gain of \$2,671,000 (94¢) from sale of 40% interest in Datamatic Corp. to Minneapolis-Honeywell (Vol. 13:25). Second quarter profits were \$1,153,000 (41¢) on sales of \$59,680,000. (No comparison with previous year available since Raytheon changed this year from fiscal to calendar year basis.) Pres. C. F. Adams says backlog of govt. business exceeds \$250,000,000 despite increased volume of shipments.

United Artists already has grossed \$2,500,000 of anticipated \$5,000,000 in contracts for 52 films released in May for TV syndication (Vol. 13:21), chairman Robert S. Benjamin reported this week. He said company is headed toward record gross income of around \$70,000,000 from theatre & TV films this year for net in excess of last year's \$3,106,000 (\$3.84 per share). Gross for second quarter ended June 30 was about \$3,500,000 ahead of \$15,147,000 in same 1956 period.

ORRadio Industries earned \$59,700 (13¢ per share on 477,335 outstanding) on sales of \$524,400 in 3 months ending May 31, compared with \$37,100 (7¢ on 422,515) on sales of \$314,300 in similar 1956 period.

International Resistance Co. reports net income of \$255,980 (19¢ per share) on sales of \$7,667,065 in 25 weeks ended June 23, compared with \$111,455 (8¢) on sales of \$7,725,097 in similar 1956 period.

Teleprompter Corp. stockholders approved 2 1/2-for-1 stock split, increase in shares from 250,000 to 1,000,000, at special meeting in N. Y. July 15 (Vol. 13:26).

SETMAKERS SEE SECOND SEMESTER SURGE: Predictions for TV set sales during last 6 months of 1957 continue bullish -- ranging from ebullient to restrained. Add the following to previous string of optimistic judgments:

* * * *

(1) Last of the majors to show new line, Motorola held sales convention in Chicago this week, and consumer products exec. v.p. Edward R. Taylor predicted that industry would sell 4,500,000 sets in second half, making year's total 7,000,000. He also forecast 1957 phonograph sales 60% higher than last year, radio up 15%. He could see only 100,000 color sales this year -- "about the same as in 1956." To emphasize Motorola's drive, he said its ad budget would be double that of year ago. For Motorola's new line, see p. 12.

(2) "TV business is beginning to look up," says Emerson pres. Benjamin Abrams, who reports radio has been "fairly good, helped along by hi-fi." However, he said, hi-fi is being "overdone" -- with too many companies climbing on bandwagon.

(3) Admiral pres. Ross Siragusa, reporting June distributors' convention produced orders for 300,000 Admiral hi-fi & TV units -- "second best in the company's history"--looks for exceptionally good last half. Commenting on Greenebaum & Assoc. estimates that Admiral would produce 700,000 sets this year, compared with 900,000 in 1956 (Vol. 13:28), Siragusa said that the 1957 figures excluded Canadian production, whereas 1956 total included some 150,000 Canadian units. Thus, he added, Admiral U.S. production may be running about same as last year in units -- but a far higher dollar total is in prospect.

(4) Sylvania expects larger share of market than the 225,000 sets in the Greenebaum "guesstimate." Robert L. Shaw, TV-radio-gen. sales mgr., declined to give a figure but indicated Sylvania is expecting considerably more. At any rate, company appears to have the capacity to produce. We visited Batavia, N.Y. plant this week, were told it can turn out 12,000 or more sets weekly on single-shift 5-day basis -- more than twice the rate planned when plant was built 3 years ago.

* * * *

Business Outlook: Slight hedging on economic forecast is seen in July report of National Assn. of Purchasing Agents' Business Survey Committee, describing business situation as "spotty and mixed." NAPA says "conditions are not quite meeting expectations, and this is causing concern, despite the fact that, in the aggregate, a high level of activity is reported."

"Upswing in the second half" is hope of most of NAPA group members, but they don't have "same degree of assurance that was expressed in the May and June reports."

Majority of members -- 54% -- report production since June about same, 25% say their production is down, 21% list increase. New orders are better for 23%, worse for 29%, unchanged for 48%. However, NAPA says commodity prices were up, due mainly to steel; inventories are coming into balance; employment shows little change.

* * * *

Production: TV production was 65,338 week ended July 12, compared with 63,785 preceding week and 62,657 in corresponding week one year ago. It was the year's 28th week and brought TV production for year to date to about 2,847,000, compared with 3,583,668 in same period of 1956. Radio production totaled 110,092 (50,197 auto) week ended July 12, compared with 76,832 (35,714) the preceding week and 105,560 (42,748) in corresponding week year ago. Radio output for 28 weeks totaled about 7,373,000 (2,925,000) vs. 6,942,513 (2,412,933).

Topics & Trends of TV Trade: Shipments of TVs to dealers totaled 2,121,267 in year's first 5 months, when production was 2,178,361, according to RETMA state-by-state report. They compare with shipments of 2,386,108, production of 2,862,177, in first 5 months of 1956. New York again led with 247,590; California was second with 204,582; Pennsylvania was third, 142,634. May shipments were 333,921, compared with 329,710 in April and 326,979 in May, 1956. Here's first 5 months' report (county-by-county tables available to RETMA members):

State	Total	State	Total
Alabama	33,397	New Jersey	74,397
Arizona	13,361	New Mexico	8,749
Arkansas	19,209	New York	247,590
California	204,582	North Carolina	42,277
Colorado	18,459	North Dakota	7,229
Connecticut	34,481	Ohio	118,744
Delaware	4,862	Oklahoma	22,650
District of Columbia	20,620	Oregon	22,624
Florida	77,894	Pennsylvania	142,634
Georgia	43,861	Rhode Island	11,210
Idaho	6,946	South Carolina	18,162
Illinois	124,244	South Dakota	7,323
Indiana	51,613	Tennessee	37,836
Iowa	22,875	Texas	117,459
Kansas	23,342	Utah	9,642
Kentucky	35,919	Vermont	4,376
Louisiana	41,896	Virginia	34,360
Maine	11,083	Washington	33,769
Maryland	29,384	West Virginia	21,992
Massachusetts	61,813	Wisconsin	34,128
Michigan	81,072	Wyoming	4,697
Minnesota	30,111		
Mississippi	20,033	U. S. Total	2,115,313
Missouri	47,267		
Montana	10,917	Alaska	1,460
Nebraska	15,386	Hawaii	4,494
Nevada	3,399		
New Hampshire	5,439	Grand Total	2,121,267

* * * *

Motorola's 1958 line, using 90-degree short-neck CR tube in all but carry-over 17-in. portable which has 110-degree, features "Golden Satellite" wireless transistorized remote control tuner which operates on "supersonics generated by a magnetostrictive transducer" to turn set off or on, change channels. Also featured is automatic tube warm-up system which Motorola says adds to life of tubes. Leader 21-in. table model starts at \$200, console at \$230; 24-in. console, \$300; 17-in. table model, \$170-\$180. Upper-end Golden Satellite series has no suggested list. Hi-fi line runs from \$35 to \$775. Motorola plans ad campaign doubling 1956 expenditures. Harold J. McCormick, ad & sales promotion director, says full page ads will be used every other week in *Saturday Evening Post*, plus 2-page spread in *Life* on Golden Satellite line. Newspaper ads will be used every other week, starting in Sept. in every distributor market, with local newspaper campaign in 100 key cities.

Magnavox dropped in 3 new TV sets this week at Chicago Music Show; 21-in. lowboy console with short-neck 90-degree tube at \$300 in mahogany, \$310 in oak & cherry; 21-in. combination with 110-degree tube at \$595; 24-in. console with 110-degree tube at \$390 in mahogany, \$400 in walnut, blond walnut, cherry. New hi-fi models introduced range \$200-\$995.

Hotel-motel styled TV sets were unveiled this week by RCA Victor TV div., using 110-degree tubes: Whitfield (series 21H822), 262-sq.-in.; Ashton (series 17S807), 156 sq.-in. Sets are available in mahogany, walnut, limed oak grained finishes, are alcohol and burn-resistant, have tamper-proof back and hidden volume limiter. Both are table models, have optional metal stands.

FTC has approved consent order prohibiting J. David Paisley Co., St. Louis, from claiming plastic sheet it sells for TV screens will produce same visual effect as color TV (Vol. 13:16), prevent eyestrain or eliminate snow, blurring or haziness.

DISTRIBUTOR NOTES: Admiral appoints Capital Radio & Television Co., 1705 Charlotte Ave., Nashville (Herbert Eskind, pres.) for middle Tenn. and southern Ky., replacing Radio & Appliance Corp. of Nashville; Admiral Distributor-Detroit div. and Independent Distributors Inc., Grand Rapids, for Michigan counties formerly handled in Lansing; Detroit div. will operate branch at 1100 S. Water St., Saginaw . . . Canadian Admiral appoints J. Albert Reed Montreal branch manager . . . Sylvania appoints Electric Sales & Service Co., Atlanta (Arthur Butts, pres.), replacing Electrical Wholesalers Inc., and Northwest Radio & Electronic Supply Co., 116 E. St. Germain St., St. Cloud, Minn. (branch of Northwest Co., Minneapolis) for TV-radio; Lavender Radio & TV Supply Inc., 1307 E. Hillsboro, El Dorado, Ark., and Superior Radio Parts Co., 1433 E. Main St., Madison, Wis. for electronic tube products . . . Westinghouse appoints Walter Frederiksen, ex-Buffalo Electric Inc., Buffalo sales mgr., major appliances; Wm. J. Mara, sales mgr., TV, air conditioners and vacuum cleaners; Roland R. Hand, adv. and sales promotion mgr. . . Sues, Young & Brown, Los Angeles (Zenith), appoints Ed J. Dymek gen. merchandise mgr. . . Delmonico International Corp. names Ray Gincavage v.p.; he's ex-pres. of Olympic of Conn. and Raymond Distributors, New Haven . . . Allied Stores Corp. appoints Jay Murphy asst. market rep, TV-radio-hi-fi, replacing Howard Edelman, resigned . . . Isador Kaufman resigns as gen. sales mgr., Jos. M. Zamoiski Co. (Zenith), Baltimore.

Canadian Electronic Wholesalers Assn. elects M. L. Poole pres., succeeding John Dunn; W. H. Cowley, v.p.; John T. Rochford, secy.-treas.

Magnavox and Sentinel were charged with "conspiracy and agreement in restraint of trade" and sued for \$900,000 treble damages this week by National Sales Co., Rochester, N. Y., former Sentinel distributor. Suit, filed in U. S. District Court, Buffalo, charges that prior to Magnavox purchase of Sentinel (Vol. 12:8), firms reached agreement which had "design and purpose of compelling withdrawal of Sentinel radio and TV receivers from the market" by supplying distributors with faulty equipment so as to "create an unfavorable market" for the brand.

NRDGA report says dept. stores having annual sales volume of \$10-\$20,000,000 sold 7% fewer TV sets in 1956, compared with 1955, while their radio-phonograph sales increased 31%. Dept. stores with annual sales volume of over \$50,000,000 report TV sales increased 4%, radio-phonographs 22%. Figures are contained in *Departmental Merchandising and Operating Results of 1956*, published by NRDGA, 100 W. 31st St., N. Y.

Canadian TV sales by distributors for first 5 months of year were 149,215, compared with 189,059 in similar 1956 period and 218,350 in 1955, reports RETMA of Canada. May console sales were 7983 compared with 9641 in May, 1956; table models were 5833 vs. 10,301. Portable sales in May amounted to 4388 (no comparable figures available for May, 1956).

NAMM reelects pres. Paul E. Murphy, Steinert & Sons, Boston, and v.p. Clay Sherman, Sherman Clay & Co., San Francisco. Others elected: R. Gregory Durham, Lyon & Healy, Chicago, treas.; Ray B. Fitzsimmons, Fitzsimmons, Dayton, O., secy.

RCA's \$100,000,000 color TV investment will be detailed in fourth and final article in *Fortune's* electronics series in Aug. issue.

Trade Personals: Arthur A. Currie, ex-Adams Distributing Co., Boston, and Sylvania, named Westinghouse TV merchandise mgr. . . . Selwyn Jones promoted to appliances mgr., RCA Victor Co., Ltd., Montreal . . . Richard W. Griffiths, ex-Graybar, named sales director of Litton Industries components div. . . . George E. Eyer, Stromberg-Carlson v.p.-properties, received diamond pin July 15 to mark 50 years with firm . . . Arthur M. Liebschutz promoted to administrator, planning-entertainment, RCA semi-conductor div. . . . Dr. Cleo Brunetti, ex-General Mills, joins ordnance div. of Food Machinery & Chemical Corp. . . . Chester W. Nimitz Jr. resigns as Navy captain to join Texas Instruments, Dallas, in apparatus div. . . . Robert Beck named chief engineer, Packard-Bell Computer Corp. . . . Brig. Gen. Wm. L. Bayer resigns as exec. v.p., Tele-Dynamics Inc., subsidiary of Raymond Rosen & Co., Philadelphia . . . Robert T. Plummer promoted to Eitel-McCullough commercial marketing mgr., succeeding O. H. Brown, recently promoted to marketing director . . . Allen S. Johnson, ex-Thompson Products, named sales mgr. of Cletron Inc., sales div. of Cleveland Electronics, succeeding Dave Harris who is Cletron v.p. & gen. sales mgr. of Cleveland Electronics . . . Charles H. Berman, Trav-Ler adv. mgr., resigns . . . Dr. C. B. Jolliffe, RCA v.p. & technical director, appointed to new post of v.p. & technical director of RCA Defense Electronics Products; Joseph M. Hertzberg, mgr. RCA airborne systems dept., promoted to mgr. defense marketing; Wm. B. Kirkpatrick succeeds Hertzberg.

Obituary

John Woods, 48, v.p. & gen. mgr., Canadian Admiral Sales, was believed to have drowned July 14 in Mud Lake, near Peterborough, Ont. He was seen in motor boat, apparently going from a friend's cottage to his own. Short time later, boat was found empty. He had been vacationing with his wife, son and daughter.

RCA electron tube div. has been divided into three units to meet requirements of growing industrial tube market. L. F. Holleran was named mgr., distributor products; John B. Farese, mgr., entertainment tube products; C. E. Burnett, mgr., industrial tube products. V.p. & gen. mgr. Douglas Y. Smith placed Holleran in charge of renewal sales and the products of components & semiconductor divs. sold through distributors; Farese is responsible for marketing, engineering & manufacturing of entertainment-type receiving & CR tubes; Burnett supervises development, design & marketing of all types of industrial receiving tubes. Following continue present posts: W. H. Painter, mgr., administration; T. J. Scanlon, purchasing agent; L. S. Thees, gen. commercial mgr.; G. R. Shaw, chief engineer. L. A. Kameen was promoted from labor relations administrator to mgr. personnel, succeeding Farese.

Reorganization of RCA Service Co. includes these new assignments: Donald H. Kunsman, v.p. & operations mgr.; R. N. Baggs, v.p. & gen. sales mgr.; Anthony L. Conrad, v.p., govt. service; Stephen D. Heller, v.p., missile test project; Gerald W. Pfister, v.p., consumer products service; Edgar H. Griffiths, treas. & controller. Pres. E. C. Cahill says reorganization provides "necessary flexibility required at the operations level to assure continued growth in the expanding industrial and govt. service fields."

Excise tax on children's phonograph records retailing at 25¢ or less would be repealed under terms of bill approved this week by House Ways & Means Committee.

Growth of west coast electronics industry is highlighted by Calvin K. Townsend, pres. of West Coast Electronics Mfrs. Assn. and exec. v.p. of Jennings Radio, with statement that 15% of U. S. electronics firms, 17% of employment, 24% of sales are in west. In San Francisco area, he says, 3,500,000 sq.-ft. plant capacity is expected to increase 50%, sales to go up 41% by end of 1957. WCEMA survey showed at end of 1956 that 470 electronic firms in Los Angeles area employed 73,000, had \$300,000,000 payroll, \$1 billion sales.

Hi-fi boom is evidenced by RETMA figures on 5-month production of phonographs, combinations and record player attachments totaling 1,293,000 units, an increase of more than 300,000 over similar 1956 period. Breakdown showed phonographs made up 955,000 of total compared with 737,000 last year; combinations, 234,000 vs. 143,000; record player attachments, 104,000 vs. 95,000.

RETMA TV Week promotion committee, announced this week: chairman, Julius Haber, RCA; Joseph R. Owen, GE; David B. Van Winkle, Hoffman; Karl H. Carstens, Magnavox; Allen Center, Motorola; Wm. T. Reedy, Packard-Bell; Jack Frietsch, Philco; John J. Tormey, RCA; Charles R. Lunney, Sylvania; Earl L. Hadley, Westinghouse; Joseph Ptacin, Zenith.

Color receiver convergence & purity checker (PC-120) has been introduced by Vidair Electronics Mfg. Corp., Baldwin, N. Y. Accessory operates by removing CRT socket from color tube, plugging in checker, then using switches to turn colors on & off.

Plamondon Magnetics Co. has been adjudicated bankrupt by referee Wallace Streeter. Company previously filed Chapter XI proceedings (Vol. 13:9, 12, 21), offering unsecured creditors full payment in 5% monthly installments.

GE cut prices of high frequency tetrode transistors this week, reductions running 42-75% on transistors costing \$4-\$18. GE said price reduction on transistors—which are used in TV amplifiers, radar, 2-way radio equipment—resulted from improved production methods.

Collins Radio announces start of construction of new \$2,750,000 fabrication plant in Cedar Rapids, to begin operation early in 1959. Collins is also building \$1,700,000 engineering lab in Dallas.

RCA showed 2-speed record player—45 & 33 $\frac{1}{2}$ —at this week's Chicago Music Show. Priced \$33-\$55, player line has 2 portables, 2 table models, an attachment. Shipments are planned for Aug.

Radio shipments for first 5 months of year totaled 2,670,709 compared with 2,472,395 in similar period of 1956, reports RETMA. May shipments were 503,693 vs. 554,972 in April and 551,712 in May 1956.

New Capehart hi-fi line (Vol. 13:28) made by British affiliate, Radio Gramophone Development Co. Ltd., Romford, includes portable phonographs, consoles, combinations, priced \$140-\$619.

New color TV repair manual, *Servicing Color TV*, by engineer-author-lecturer Robert G. Middleton, has been published as Gernsback Library Book No. 65 (224 pp., \$2.90, hard cover \$4.60), 154 W. 14th St., N. Y.

Tieing in with color TV, Channel Master introduces "Color King" outdoor antennas at \$29 to \$72.

Zenith introduces hi-fi and combination line priced at \$100-\$625.

Sylvania starts commercial production of 24-in. 110-degree, non-ion-trap, aluminized picture tube.

FIRST FTC CRACKDOWN on TV toiletry commercials came July 19 with filing of formal complaint against Lanolin Plus Inc., 30 W. Hubbard St., Chicago, alleging advertising for its hair shampoo falsely disparages competitive products in violation of Federal Trade Commission Act.

FTC's special TV-radio monitoring unit previously had singled out TV commercials for several medicinal preparations in campaign against deceptive advertising (Vol. 13:20). But new case represents initial TV step by agency into general cosmetics field.

Cited in FTC complaint against Lanolin Plus are "false & misleading" TV pictures & words which FTC says "frighten beauty-conscious young girls" by showing "model washing her hair and looking up startled at the words, 'Stop! Don't burn your hair . . . with harsh detergent shampoos!'" Also challenged is TV footage in which model is shown "scooping up a handful of suds and looking at them scared and puzzled" while announcer explains detergent shampoos strip hair of "vital, natural oils . . . leave it dry . . . brittle . . . dead looking" . . . hard to manage."

"In truth and in fact," FTC observes, "detergent shampoos will not burn the hair of beauty-conscious young girls or the hair of any other individuals."

Cosmetic firm was given 30 days by FTC to answer complaint, on which examiner's hearing was scheduled for Sept. 11 in Washington. No TV network or station was listed as party in proceedings, but complaint named NBC-TV facilities as having been used for commercials.

"Conflict of interest" between clients American Tobacco Co. and *Reader's Digest*, whose July issue carried article on "The Facts Behind Filter-Tip Cigarettes," was blamed July 17 by BBDO for unannounced dropping by agency of magazine's advertising account 2 days earlier after 18 years. BBDO exec. v.p. Charles H. Brower denied reports in trade that tobacco firm, which spent \$22,000,000 in all media last year, had given agency ultimatum to abandon it or *Reader's Digest*, whose 1956 budget was \$1,250,000. "We understand it," magazine's advertising director Fred D. Thompson said. Newsstand promotion was transferred to J. Walter Thompson, mail order book advertising to Schwab & Beatty. Meanwhile, in unrelated agency development, Manischewitz transferred its account from Emil Mogul to Lawrence C. Gumbiner as result of what Mogul described as "policy differences." Wine company billings were estimated at \$1,500,000.

NBC color mobile unit is making 6th coast-to-coast trip, expected to arrive in N. Y. July 24 for 2-month checkup in preparation for World Series. Plans call for full TV-radio coverage of series with American League home games colorcast. National League home games also may be colorcast if there is sufficient time for mobile unit to make trip.

Theatre TV will try for comeback Sept. 23 when Nathan Halpern's Theatre Network TV will closed-circuit Ray Robinson-Carmen Basilio middleweight championship bout to motion picture theatres, with home TV blacked out. This will be first theatre-TV event in 2 years and 16th theatre-TV bout to be relayed by TNT, which carried its first fight telecast to theatres June 1951.

National TV Week sponsors NARTB, NARDA, RETMA & TvB have agreed to extend program (Vol. 13:28) past announced Sept. 8-14 week to a "Television Fall Festival."

ANPA attacks again: "Newest anti-TV presentation" is what July 13 *Editor & Publisher* calls upcoming booklet, *Spots Before Their Eyes—But Not in Their Minds*, produced by ANPA's Bureau of Advertising. It's report on "C. E. Hooper study of memorability of TV spot advertising by the viewer," claiming that telephone checks in half-dozen cities showed recall rating of only 2.4% among Boston viewers, 2% in Cleveland, "equally murderous" ratings in Detroit, St. Paul, N. Y. *E&P* also mounts its own offensive against TV-radio advertising. Editorial wonders why TV & radio "place so much ad copy in the columns of newspapers to attract audiences for their shows."

"Who's Afraid of TV?" July 22 *Life* asks rhetorically in 7-page spread on "Radio's New Riches," recounting how radio "is having the best year in its history" with independent stations as "front runners." *Life* says: "While talk persisted that TV had turned radio into a relic, an unremitting staccato of persistent interviewers, strident newscasters & chuckling disk jockeys gave jarring evidence day & night to the contrary." As examples of trend *Life* picks out radio shows in N. Y., Chicago, Troy, Hollywood, Los Angeles, Boston, Birmingham, Houston, Nashville, Columbia, S. C., Silver Springs, Fla.

"Note of caution" on advertising boom is sounded by investment management dept. of Calvin Bullock Ltd. in July *Perspective*. Bulletin for customers says "advertising business has been relatively immune to the moderate business recessions of recent year," but "sizeable part of the overall increase in advertising expenditures represents higher costs and not more advertising." If "important downturn" comes, advertising won't escape "cost reduction programs which will follow" and media competition will be intensified.

CBS Inc. sued Amana for \$284,545 for alleged contract failure in Chicago Federal Court this week, claiming refrigerator firm refused full payment for costs of *Phil Silvers Show* series last Sept. 25-Dec. 18. CBS said Amana agreed through Maury, Lee & Marshall to pay program production charges of \$38,250 for each of 7 programs after deducting 15% for agency's commission, but refused payment of \$41,401 balance due. CBS also claimed Amana owes it \$243,144 in facilities charges.

Educational radio grants totaling \$42,000 were announced July 17 by pres. H. K. Newburn of Educational TV & Radio Center, Ann Arbor. Recipients are U of Ill., \$1200; Indiana U, \$1788; Iowa State College, \$3400; Lowell Institute Cooperative Broadcasting Council, Boston (WGBH), \$3200; Pacifica Foundation, Berkeley, Cal. (KPFA), \$4500; St. Louis public schools, \$6700; U of Tex., \$5350; Union Theological Seminary, N. Y., \$4700. U of Wis., \$6975; Michigan State U, \$3800.

Network TV & radio gained 3% each in national advertising volume in May compared with year earlier, according to *Printers' Ink* index, which showed magazines up 6%, business publications up 5%, newspapers up 3%. Network radio paced cumulative May-to-May advertising increase with 10% gain, trailed by business publications, 7%; network TV, 6%; magazines, 2%, while newspapers showed no change.

"Soft sell pervades TV," titles July 12 *Tide* article which cites these as leading examples of commercials which try to "sell by leaving people with a pleasant feeling about your product": Alka-Seltzer, Zest, Chesterfield & Parliament, Coca-Cola, Pet Milk, Jello, Sugar Jets, Ford, Chevrolet, Nash.

SUMMARY-INDEX OF THE WEEK'S NEWS — July 27, 1957

WORLD TV BOXSCORE at midyear: 900 stations, 63,000,000 sets shown in new TV Factbook. Commercial TV dominates. Italy's coverage (pp. 1 & 11).

TV NETWORKS MOBILIZE statements, statistics to refute New York Times report by Jack Gould that they lack sponsors for "softest" season (p. 2).

PAY-TV TRIAL POSSIBILITIES dimmer, as proponents devote energies to closed-circuit. FCC decision seen likely in fall. National Theatres in pay TV (p. 3).

"OPEN WIRE" SYSTEM for closed-circuit TV, proposed by Siatron for San Francisco, backed enthusiastically by some, but most engineers skeptical (p. 5).

USIA CUTS TV 76% in economy drive; Arthur Larson allows only \$567,000 from \$92,600,000 budget for overseas TV programming this year (p. 7).

LATEST TV STARTER is KTVC, Ensign-Cimarron, Kan., whose July 24 start brings on-air total to 503. Roundup of plans of upcoming stations (p. 8).

MANSFIELD ESTIMATES 1,052,000 sets scrapped in first 6 months while dealers sold 2,865,000 to public; total sets in use: 44,553,000 (p. 12).

MANAGEMENT INSTITUTES attract NARDA members and TV manufacturing officials to week of lectures, discussion & study of business problems (p. 13).

"TV ELECTROCUTION" incident has first repercussions as South Bend plans to bar sale of metal-cabinet sets without isolation transformers (p. 14).

KIRO WINS Ch. 7 in Seattle with 3-commissioner majority. Pittsburgh's long Ch. 4 hassle settled by merger. New appeals load court docket (p. 9).

MUTUAL SALE AGREEMENT reached. Roberts group takes over Aug. 7, is backed by oilmen. Ex-FCC Comr. Hennock in deal (p. 10).

COMMUNITY ANTENNA RATE regulation case initiated in Wyoming as 14 CATV systems are ordered to register as utilities. Precedental appeal seen (p. 16).

WORLD TV: 900 STATIONS, 63,000,000 SETS: Midyear survey of worldwide status of TV underscores once more the growing trend toward commercial operation—and the more rapid growth of TV systems in countries where advertisers are helping foot the bill.

As of July 1 there were 900 TV stations and some 63,000,000 sets-in-use in 43 countries. Deducting the 500 outlets and 44,500,000 sets in U. S. (plus 23 Armed Forces stations), foreign countries had 377 stations and close to 18,500,000 receivers in use—an increase of 50 stations and slightly more than 4,000,000 sets since Jan. 1.

This growth is delineated in our Directory of Foreign TV Stations & Sets, a regular feature of our semiannual TV Factbooks. Latest directory—most complete and authoritative ever assembled—is updated to July 1, 1957, and contains lists of stations, set estimates and technical data for 57 countries which have TV systems in operation or definitely planned.

Culled from wide variety of foreign and domestic sources—checked and rechecked for maximum accuracy—new directory is part of 1957 Fall-Winter TV Factbook No. 25, due off press next month.

For first time, directory shows more countries with some form of commercial TV than without it—23 to 20. Not including U. S., the 22 countries which permit advertising on TV have total of 273 stations (though not all stations are commercial) and more than 14,000,000 sets. Non-commercial countries have 104 stations and some 4,300,000 sets.

With exception of Soviet Union, iron curtain countries trail the west, TV-wise. Western oriented

foreign nations have 325 stations, more than 15,000,000 sets—while Communist world has 52 stations (30 of them in Russia) and 3,236,600 sets (of which some 3,000,000 are in Russia).

Most remarkable foreign TV achievement during 1957 was Italy's virtual completion of its nationwide TV system 12 years ahead of schedule. As of July 1, Italy's RAI had put 90 of its planned 98 transmitters on air, covering about 95% of population, was well on way to interconnecting all of them. Plans are already being made for establishment of second—and competitive—TV network.

For table summarizing Factbook data on world's TV stations and sets-in-use, see p. 11.

JACK GOULD SETS OFF TV CALL TO ARMS: Heavy TV network artillery was wheeled out this week in defense against page one story in July 25 N. Y. Times headed: "Demands for TV Time Softening; Costs & Inflation Are Factors."

Story by critic Jack Gould asserted that TV industry "is experiencing the 'softest' demand for air time it has ever known." Times quoted network officials & advertising agencies as "agreed that TV had every prospect of a good economic season, but that there were definite signs of 'uneasiness' & 'caution' " among sponsors who haven't filled out available nighttime periods for fall season.

Counter-salvo in reply to such "unprecedented page one" treatment of time sales problems was fired at once by TvB, whose national sales director Halsey V. Barrett hurried to "correct the misinterpretation the hasty reader might get" from Times. He released 5 pages of statistics showing how TV revenue & audiences are heading up.

"Somewhat amazed" was reaction of CBS-TV sales v.p. Wm. H. Hylan to story. He deprecated Gould's "coupling of CBS-TV with reference to a 'soft' TV market," quoted PIB figures showing his network is 11.1% ahead of 1956 for Jan.-May—"a little over \$19,000,000 ahead of its closest competitor."

"Distortion of the coming season's picture," said ABC-TV pres. Oliver Treyz. He aimed this retort: "For the first 6 months of 1957, the evening network gross of NBC is up 3%, CBS is up 11% and ABC is up 20%." Treyz said that this TV record couldn't be disparaged.

Fire was withheld by NBC-TV, where any official comment on Gould's story awaited press conference (arranged 4 days earlier) with NBC pres. Robert W. Sarnoff July 29 in N. Y. Unofficially, it was pointed out at headquarters of network that Times hadn't noted that NBC-TV will have unprecedented sponsor business in daytime programs and "specials" next season.

Times took note of protests in follow-up piece by Val Adams July 26, observing mildly that "question of what constitutes a 'soft' TV market came up for more hard discussion" in network circles. Same issue of Times reported CBS "A" & "B" stock dropped $1\frac{3}{8}$, NBC was off $\frac{1}{4}$, AB-PT $\frac{3}{8}$, while "Zenith, pushing a subscription TV system, gained 1."

FEE-TV CHANCES LOOK SOMEWHAT DIMMER: Some of the subscription-TV boys were out west again this week whooping it up for closed-circuit, while back at the FCC ranch it began to look as if the chances of an open-circuit trial had diminished.

We still wouldn't bet either way—but as the last flurry of pay-TV test comments drifted wearily in this week, we could discern feeling at Commission that proponents had hurt their own case more than they had helped it.

FCC holds last pre-vacation meeting Aug. 1, then recesses until Sept. While there's no technical reason why it can't act next week, chances of definitive action then are very slim. Commission could shelve whole issue until Sept., or take these preparatory actions:

- (1) Instruct staff to prepare an order on fee TV, to be finalized in Sept.
- (2) Schedule series of special meetings on issue for next fall to mull whole problem before acting.

There's impression at Commission that proponents showed an almost disappointing lack of enthusiasm for getting moving on tests—or even full-scale pay operations. While 2 of them actually

opposed trial but reluctantly agreed to go along if it were broad enough, none really got down to brass-tack facts of how it would operate, or even answered Commission's request for "statement of the specific ways in which [the] conduct of the proposed field demonstrations would assist the Commission in evaluating the effects, impact, benefits & potential hazards" of fee TV.

Fee proponents' widely publicized glee over closed-circuit possibilities isn't exactly designed to stampede FCC into letting them use broadcast band, either—an angle on which opponents have capitalized in their comments.

■ ■ ■

As to question of when and how Commission acts, key man will be Chairman Doerfer—who in past has been considered proponent of tests. Comr.-designate Ford—whose Senate confirmation may be forthcoming next week following this week's unanimous approval by Commerce Committee—could also loom important in considerations next Sept., since he's unknown quantity, could cast deciding vote.

Comr. Lee remains No. 1 trial enthusiast on Commission. He favors test running about 3 years and limited to unaffiliated stations, feels FCC itself should lay down the specific test conditions which proponents declined to suggest. He still would prefer to limit trial to uhf outlets, but is willing to give in on this point, which has aroused no spark of enthusiasm from his colleagues.

Lee thinks more telecasters favor tests than will let on—saying some of them have told him privately they're all for it, but don't speak up publicly for fear of jeopardizing network affiliations.

Comr. Craven is also test exponent. He says he hasn't changed, still feels that stations themselves—since they come under FCC control—should come to Commission with proposals for tests, and FCC could approve or deny them.

Hyde, Bartley & Mack have generally been considered anti-pay-TV and anti-test, although they did vote in favor of FCC's trial-demonstration rule-making.

■ ■ ■

There's still a hope among some Commissioners that Congress will take the ball on pay TV. But despite noises from Reps. Celler, Harris and a few others, there has been no inclination on Capitol Hill to take any real initiative in the pay-TV issue.

Senate Commerce Committee specifically disqualified itself from considering fee TV 4 months ago when it refused to okay its own staff report on subject, announcing it would not dictate to FCC.

Rep. Harris, as chairman of House Commerce Committee, is in excellent position to start some real action on the issue (such as hearings on Celler anti-subscription bill, currently pending before his Committee), but he obviously doesn't want to—at least not yet.

■ ■ ■

Final go-round of fee-TV comments—these were answers to so-called trial proposals filed 2 weeks ago (Vol. 13:28)—consisted of mere 11 filings, as opposed to 35 last time. Seven opposed tests; 4 favored.

Opponents' arguments, summarized: (1) Proponents' comments show they really don't want trial, but full-scale subscription operation. (2) Proponents didn't answer FCC's request for specific trial proposals. (3) Necessary fee-TV data can be supplied by wired systems. (4) Question is one for Congress to decide. (5) Hearings are necessary.

Using some or all of these arguments were opponents ABC, CBS, NBC, NARTE, Westinghouse Broadcasting Co., Joint Committee on Toll TV, Jerrold Electronics Corp.

Two of the 3 major fee-TV proponents—Skiatron & Telemeter, both of which had opposed principle of tests—didn't even bother to file. They are currently busily fighting each other over who will wire up west coast cities for closed-circuit service.

Zenith did file, devoting bulk of its comments to vituperative attacks on AT&T, networks and movie exhibitors, specifically blasting closed-circuit concept. If fee TV should be confined to cable systems, it argued, "there would be no justification for retaining any of the spectrum for any TV or

radio service—subscription, sponsored or otherwise.”

Other pro-subscription comments were received from prospective fee-TV telecasters WFMZ-TV, Allentown; WTVK, Knoxville, Tenn.; Lou Poller.

■ ■ ■
Lining up in the “anti” column this week were National Football League and TV Guide. Unlike pro baseball moguls who preceded him to the stand, NFL commissioner Bert Bell told Rep. Celler’s anti-trust subcommittee hearing that he is “definitely against” pay TV for pro football. His reason: It would change game from a sport to a business.

TV Guide, largest-circulation weekly in U. S.—published by Triangle Publications (owner of 5 TVs & 5 AMs)—editorially urged FCC to delay trials “until results of the Bartlesville, Okla. closed-circuit TV experiment can be studied.”

■ ■ ■
Entry of National Theatres into closed-circuit fee-TV picture on west coast raised some interesting and complicated questions. Fox West Coast Theatres, 70-house subsidiary of 300-house NT, nation’s second biggest (United Paramount is No. 1), joined with International Telemeter in asking franchise to wire up Los Angeles for pay system. Los Angeles City Council has already awarded Skiatron non-exclusive permission to do same thing.

While trade press treated NT’s action as first break in theatre owners’ opposition to pay TV, this isn’t true, strictly speaking. Southwestern exhibitors have been falling all over themselves to get municipal “telemovie” franchises in various cities. Even United Paramount—under same corporate roof as ABC—has been seeking closed-circuit franchises in a score of southwestern cities.

Significance of NT’s move lies in fact that it has tied up with a toll-TV promoter for a scrambled-picture system. Also of interest is fact that Telemeter is subsidiary of Paramount Pictures, while NT was formerly part of 20th Century-Fox.

Both NT and Paramount are operating under anti-trust decrees as result of production-theatre divorcement, and there has been speculation as to whether Justice Dept. permission might be required for the tie-up.

Most significant angle of all is that this deal represents first real breakdown of big-city big-exhibitor opposition to wired movie plan, on if-you-can’t-lick-’em-join-’em basis. Partnership of Paramount Pictures and Fox West Coast Theatres would appear to assure continual flow of first-run movies for Telemeter’s closed-circuit coin-in-slot system—if and when it gets going.

In any pay-TV system, movies—not baseball—would be bread-&-butter. And if Skiatron’s Matty Fox lives up to his reputation, you can expect him to come up with a tie-in with big theatre chain and/or movie distributor.

Everybody and his brother was applying for wired-TV franchises—or talking about applying for them—in California’s big cities this week. Skiatron applied for San Diego and served notice of intention to apply in San Francisco; NT-Telemeter group announced it, too, will apply in San Francisco; numerous promoters and entrepreneurs announced they would apply in various cities.

Even San Francisco Chronicle’s KRON-TV was looking into wired-TV prospects. “Our local interest thus far,” it said in response to inquiries, “has been confined to making inquiries of city officials and public utilities with respect to the legal aspects of wired TV. No application has thus far been made.”

Telephone company's role in wired pay-TV systems always has been a bit hazy—and apparently that's because company hasn't arrived at any decision itself.

We asked Pacific Telephone & Telegraph Co. specifically about conflicting reports of its proposed tie-in with Skiatron. Would it merely lease space on its poles and in its conduits, as Matty Fox indicated last week, would it do the wiring itself or would it work under some complicated lease-sale-maintenance deal as phone company is doing in Bartlesville?

"It's a most complicated subject," company's official reply stated. "We don't know what type of arrangement would be placed in effect. We're studying every possibility—but we're interested in the communications part only. We'll have nothing to do with selecting programs, determining charges to TV customers or any billing arrangements."

There's still no PT&T deal with Skiatron, and surveys are still under way, company indicated. Last week, in fact, PT&T pres. Mark Sullivan stated that he hopes to have "complete report on Skiatron's request" by early 1958. PT&T said it has reached no conclusions as to cost of project.

As to Skiatron's claim of cheaper-than-cable wire system—presumably employing the "open wire" principle—there was some enthusiasm and much skepticism from engineers and closed-circuit pioneers. For roundup of opinion on this development, see below.

COST OF WIRING UP San Francisco for pay TV—\$6,000,000 or \$30-\$60,000,000? Last week (Vol. 13:29), Skiatron's Matty Fox was testifying before House Judiciary Committee, touting the smaller figure, while Pacific Telephone & Telegraph pres. Mark Sullivan was talking about the larger. Fox also mentioned \$12,000,000 for stringing up Los Angeles.

Though Fox hasn't disclosed technical plans, there's ample evidence he's talking about "open wire" system, as distinct from conventional coaxial cable employed by wired systems such as community antennas. Among his West Coast confreres are Jerome Doff, Alan Lane and Scotte Gray. They're core of organization that founded Trans-Community TV Network, which was formed to wire communities for closed-circuit TV—differing from community antennas in that they originated everything locally. Among towns they did wire is Miles City, Mont., using open wire.

Scotte Gray is the engineer, and an open wire enthusiast, having equipped Douglas, Ariz. community antenna system with it.

Open wire systems employ parallel bare wires, about 3-in. apart, with separations maintained by insulators every several feet.

* * * *

Engineers disagree vigorously about open wire. Few CATV systems, the logical customers, employ it. Several do, and like it. Some had it, replaced it with cable. None of larger systems use it.

Here's evaluation by a veteran AT&T engineer, who prefers not to be identified, to avoid getting into controversy: "It's theoretically feasible to use open wire in large cities, but we'd be awfully afraid of it. It radiates. It's subject to interference. In some climates, it's badly affected by weather—icing, leakage. As for costs, I doubt whether there would be much difference. The wire is cheaper, sure, but it's got to be put up right and maintained right. My guess is that we'd rather play it safe with cable."

Washington engineer Dr. Frank Kear, frequently con-

sulted by CATV operators, is also leery of open wire, also mentions radiation, interference susceptibility, weather problems. "Maybe they have some gimmick I haven't heard about, but I'd like to see it first."

FCC chief engineer Edward Allen, noncommittal about open wire vs. cable virtues, is concerned about radiation, says he would like to know whether Skiatron equipment restrains radiation within Commission-imposed limits.

Douglas, Ariz. CATV system is now owned by I. W. Brayer, Phoenix, Ariz. DuMont distributor who also operates CATV system in Williams, Ariz. Both are equipped with open wire.

He's hot about the technique, tells us coaxial cable systems cost 3 times as much. Radiation is kept down, he says, by maintaining low signal levels. He has 200,000 ft. of open wire in use, claims "we've never had any trouble with interference we couldn't lick." He gives his subscribers 4 signals, reports quality good. "It took us a long time to learn how to use open wire," he explains. "For example, we had ghosts at corners, but we cleaned them up." In Brayer's opinion, San Francisco & Los Angeles could use open wire "if engineered right."

Engineers tell us that signal induced around open wire tends to go straight ahead when wire turns corner. This invites "piracy" by non-subscribers. But, presumably, this wouldn't mean anything if signal were scrambled and a secure decoding system employed.

Summary: Open wire has never been used on large scale. It has worked on small scale. Experienced engineers are skeptical.

Statement panning fee TV—and radio, by inference—attributed to AFTRA national exec. secy. Donald Conway, drew criticism from union's national officers at San Francisco convention this week. AFTRA has never taken stand on subscription TV—and officers cited adverse reaction from radio stations to reports quoting Conway as saying free TV would become as "dull" as radio if pay TV is authorized.

Armed Forces TV Service plans Ch. 10 vhf translator on Guam to relay programs of KUAM-TV, Agana (Ch. 8) to military personnel stationed in remote sections of island.

Personal Notes: Donald B. Hyatt named mgr. of NBC-TV special projects programs, reporting to director Henry Salomon; James Nelson appointed program services mgr., John W. Kiermaier administrative mgr. . . . Stuart Griffiths resigns as head of special TV program development for CBC to join Granada TV Network, ITA program supplier, London, as programs controller . . . Larry H. Israel, ex-WENS, Pittsburgh, and KMGM-TV, Minneapolis-St. Paul, named gen. mgr. of WAAM, Baltimore . . . Norman Knight promoted to pres. of Yankee div. of RKO Teleradio Pictures, including WNAC-TV & WNAC, Boston . . . David G. Taft, gen. mgr. of WKRC-TV, Cincinnati, named operations supervisor of WTVN-TV, Columbus, and WBRC-TV, Birmingham, in executive realignment by Radio Cincinnati Inc.; Ken W. Church named operations supervisor of radios WKRC, WTVN, WBRC & WBIR, Knoxville; Wm. Hansher, general engineering supervisor; Donald L. Chapin, national sales mgr., headquartered in N. Y. . . . George S. Johnson, engineering director of KOB-TV & KOB, Albuquerque, named mgr. of both stations . . . Keith Culverhouse, ex-WPIX, N. Y., joins TvB as asst. sales promotion director, succeeded by Frank Tuoti at station as acting promotion, adv. & research mgr. . . . James H. Ferguson Jr. promoted to gen. sales mgr. of WWLP, Springfield, Mass., and satellite WRLP, Greenfield; Edmund J. Hughes Jr. named sales mgr. of WWLP, Philip J. Renison sales mgr. of WRLP . . . Charles W. (Chad) Mason promoted to program director of WSUN-TV, St. Petersburg; Jerome Baker, ex-American Heart Assn., succeeds him as promotion & adv. mgr. . . . George Morrison, ex-news director of KOB-TV, Albuquerque, named to same post at WFBM-TV, Indianapolis . . . Dick Sinclair promoted to promotion & adv. mgr. of KEYT, Santa Barbara . . . Rusty Bruton, ex-WTVJ, Miami, named production mgr. & acting program mgr. of upcoming WFGA-TV, Jacksonville . . . Dr. David W. Parker, ex-San

Francisco State College, joins KPIX, San Francisco, as education director . . . Robert M. Purcell, v.p. & gen. mgr. of Crowell-Collier's radio KFWB, Los Angeles, elected pres. . . . Marvin Lowe, ex-Lippert Pictures, named mid-west sales mgr. of Guild Films, replacing Robert C. DeVinney, who resigned to conduct own business . . . Raymond L. Hamilton, ex-Flamingo Films, named gen. sales mgr. of Telestar Films . . . Bill Buckley, ex-Buckley-Loomis Productions, named production chief of Roger Wade Productions . . . Bob Froemming promoted to asst. program director of WOW-TV, Omaha, succeeding Ken James, who joins KENS-TV, San Antonio, as program director . . . Steve Halpern, ex-WCKT, Miami, named publicity director of KYW-TV, Cleveland . . . Eric Boden promoted to European director for Schwerin Research Corp., headquartered in London . . . Nathan Stone, ex-MBS, joins CBS-TV station relations staff to develop statistical data . . . Robert Coats named public service-promotion director of upcoming KETV, Omaha.

Obituary

Robin D. Compton, 50, partner in Washington firm of George C. Davis Consulting Engineers, was electrocuted early July 24 near Charlotte, N. C. when a mobile antenna he was using to check night reception for WSOC-TV there came in contact with power line. He had checked terrain with flashlight but failed to observe line overhead. Before joining Davis firm, he had been chief engineer of WOIC (now WTOP-TV), Washington, and WCAU-TV, Philadelphia, was on NBC-TV engineering staff in N. Y., worked on military TV in Office of Naval Research during World War II. Surviving are his widow, one son.

George B. Donohue, 62, who retired in 1951 as valuation engineer in FCC's common carrier bureau, died July 22 after long illness in Glenn Dale Hospital near Washington. Surviving are widow, daughter, 3 brothers.

ADVERTISING AGENCIES: Rolland W. Taylor elected pres. of Foote, Cone & Belding, succeeding Fairfax M. Cone, who becomes exec. committee chairman . . . Henry Coleman, ex-Theatre Guild & *Robert Montgomery Presents*, named TV-radio production director of Emil Mogul . . . Robert R. Burton, ex-Needham, Louis & Brorby, named head of Kenyon & Eckhardt Chicago office, succeeding Walter Lawrence, resigned . . . Walter Daspit Jr., ex-Ruthrauff & Ryan, joins Needham, Louis & Brorby as TV-radio business affairs mgr., Chicago . . . Edmond Gray, ex-Kenyon-Eckhardt, joins North Adv. as head of broadcast production, Chicago.

Executive changes at AB-PT: Robert H. O'Brien resigns as financial v.p., secy. & director to join Loew's Inc. as v.p. & treas., succeeding Charles C. Moskowitz, retiring. Herbert B. Lazarus, AB-PT v.p. & gen. counsel, replaces O'Brien as secy. Simon B. Siegel, AB-PT & ABC treas., named coordinator for management liaison between network and o-&o TV stations. Raymond P. Eichmann ex-John Blair & Co., rejoins ABC as radio network sales development & research director.

Broadcast Advertising Club of Chicago elects Ward L. Quaal, v.p.-gen. mgr. of WGN Inc., pres.; Paul McCluer, Geoffrey Wade Adv., exec. v.p.; James W. Beach, ABC, 1st v.p.; Esther Anderson, McCann-Erickson, secy.; Marilyn Bielefeld, Earle Ludgin & Co., treas. New directors include John Carey, radio WIND; Howard W. Coleman, NBC; Louis A. Smith, Edward Petry & Co.

Broadcasting employes are second highest-paid industry group in country, according to U. S. Dept. of Commerce. Special section on national income in July *Survey of Current Business* lists average earnings of full-time TV-radio workers in 1956 as \$6584, topped only by income-earners in brokerage business, who averaged \$7765. *Survey* counted 79,000 TV-radio employes last year compared with 61,000 in 1952, when salaries averaged \$5559. Other statistics: (1) Broadcasting industry contributed \$669,000,000 to all-industry national income of \$343.62 billion in 1956. (2) Consumers spent \$2.442 billion for TV & radio sets, phono records & musical instruments, \$756,000,000 more for TV & radio repairs. (3) Expenditures for movie theatre admissions totaled \$1.298 billion; for legitimate theatre & opera, \$252,000,000.

Harry Butcher's acquisition of KIVA, Yuma, Ariz. (Ch. 11) from Donald Ellsworth and associates was approved this week by FCC. Deal involves \$241,000, of which \$37,000 is to be retained for working capital, over \$200,000 being required to clear up obligations of station. Butcher, one time CBS v.p., owns radio KIST, Santa Barbara.

New edition of *Educators Guide to Free Films* (625 pp., \$7) compiled by visual education director John W. Diffor of Randolph (Wis.) High School & Dr. Guy Fowlkes of U of Wis. has been published by Educators Progress Service, Randolph, Wis. Book lists 3880 titles, 842 new.

Irving Brownstein promoted to chief of law, enforcement & procedures office of FCC's Safety & Special Radio Services Bureau.

Telecasting Notes: Universal's 650-film backlog of features—one of last 2 batches of major pre-1948 movies to go to TV (other being Paramount's)—will be distributed by Columbia Pictures' Screen Gems. While negotiations haven't quite been completed, the deal is considered certain. Together with Columbia's own backlog, which is being released in relatively small packages, Screen Gems will have total of some 1300 pre-1948 features available for TV . . . Universal expects to realize some \$18,000,000 over 10-year period from TV showings of its pre-1948 movies . . . Dismal TV season coming up? Sez who? Coincidence or not, this was theme of columns this week by the 2 top TV columnists—*N. Y. Times'* Jack Gould and *Herald Tribune's* John Crosby. Both warned against prejudging and pointed out there are some very exciting things on tap—particularly the unprecedented number of 60 & 90-min. specials, which promise to be bigger than ever . . . Is Pat Weaver-Sid Caesar deal off? The former NBC pres. wasn't involved in the front-page reunion of the comedian and Imogene Coca for proposed 30-min. weekly live show on NBC-TV. Asked about his association with Weaver, Caesar replied: "It's in a state of flux" . . . High mortality rate of TV programs is defied by 23 shows, aged 5 years or older, which are surviving for fall renewals, July 22 *Billboard* points out. Among them: Ed Sullivan, Groucho Marx, *Talent Scouts*, *I've Got a Secret*, *Dragnet*, *What's My Line?* Big factor in longevity: "identification of sponsor & program" . . . Letter counter-offensive is being mobilized to rescue CBS-TV's *West Point* from threatened annihilation by advertising & budgetary forces—not to mention Texas Rangers, portrayed as heroes in *Trackdown*, scheduled as replacement in fall. Typical protest to network from Ft. Bragg major general said citizens need *West Point* "in these dangerous times." General Foods is dropping Academy show & Fri. 8-8:30 p.m. period in favor of Danny Thomas in Mon. 9-9:30 time formerly held by *I Love Lucy*. American Tobacco & Socony are putting *Trackdown* into Fri. spot . . . Film-for-time barter deals have become "respectable," reports July 22 *Billboard*, which names such big advertisers as Procter & Gamble,

Shell Oil & Lever Bros. as looking into them. The trades even have a new name, notes the publication—they're now "triangle deals," representing the advertiser-film distributor-station participation involved . . . Another TV film producer cuts down pilot film production: In move somewhat similar to recent abandonment of pilot film concept by CNP, TPA announced pilots henceforth will be produced only after extensive study. Producer has set up new "Produce-to-Order" dept., headed by v.p. Bruce Eells, to study client needs in program field, using extensive research to determine advisability of a series before money is thrown into pilot . . . MGM-TV plans new TV dress for its old movie shorts, wrapping them in groups labeled by categories—sports, quiz, documentary, comedy . . . "Boost Britain" scheme developed by Central Office of Information includes purchase of TV newsfilms & documentaries from BBC & commercial producers for distribution abroad.

Annual TV program & talent awards presented by *Billboard*: Network—best program, *Playhouse 90* (CBS-TV); adventure-suspense-western show, *Alfred Hitchcock Presents* (CBS-TV); comedy-variety-music, *Perry Como Show* (NBC-TV); situation comedy & performer, *Phil Silvers Show* & Phil Silvers (CBS-TV); quiz, *Twenty-One* (NBC-TV); news-sports-commentary, *Air Power* (CBS-TV); daytime, *Matinee Theatre* (NBC-TV). Talent, James Arness, *Gunsmoke* (CBS-TV); comedy-variety-music, Sid Caesar, *Caesar's Hour* (NBC-TV); quiz, Groucho Marx (NBC-TV); commentator, Edward R. Murrow (CBS-TV). Syndicated film—adventure, *Highway Patrol* (Ziv); dramatic, *Star Performance* (Official Films); comedy, *Life of Riley* (NBC Film); music, *Rosemary Clooney Show* (MCA-TV); mystery, *Badge 714* (NBC Film); western, *Wild Bill Hickok* (Screen Gems); sports, *Championship Bowling* (Walter Schwimmer); news service, CBS Newsfilm. Syndicated film talent—adventure, Broderick Crawford, *Highway Patrol*; dramatic, Thomas Mitchell, *O. Henry Playhouse* (Gross-Krasne); music, Rosemary Clooney; mystery, Jack Webb; western, Guy Madison, *Wild Bill Hickok*.

LEAST CRITICIZED USIA project—TV programming—will suffer biggest relative cut in fiscal funds, director Arthur Larson disclosed July 22 in detailing how he intends to run agency on \$92,600,000 permitted by Congress instead of \$144,000,000 he wanted for overseas propaganda (Vol. 13:22).

Voice of America broadcasting operations had escaped virtually unscathed from Congressional economy barrage, which was aimed most directly at growing USIA payrolls in western Europe. But Larson told press conference he is slashing TV by 76%—from \$2,380,000 spent in fiscal 1957 to \$567,000 this year.

"This one might surprise you," Larson said as he ticked off drastic TV slice among others he plans to make administratively, including 7% curtailment in VOA's radio schedules—from \$18,000,000 to \$16,800,000. Left untouched is \$1,100,000 specifically earmarked by Congress for expansion of Middle East radio facilities.

"Paradoxically," USIA chief observed, "the most promising new medium we have gets the severest cut practically." Others are 34% in information centers, 29% in motion pictures, 17% in publications—but only about 7% in overall personnel, from 12,050 to 11,150.

Larson explained: Since Congress directed him to

give economy priority to USIA's activities in friendly European countries, and since that is where most of agency's TV programming has been channeled, he figures he should start by saving on available TV money.

As for much-criticized USIA personnel (little touched by TV cut affecting U. S. contract program producers & packagers), Larson said he'd "concentrate on quality" in "head-to-toe examination." Among 900 agency employes to be dropped, 600 are foreigners recruited abroad; 300 are Americans, 200 of them in Washington, where USIA's Direction & Appraisal Div. payroll is to be trimmed from \$3,000,000 to \$2,742,000.

Larson's USIA had few defenders when appropriation bill was debated on Hill. Senate Majority Leader Johnson (D-Tex.), who guided economy axe, spared it when TV-radio operations came under scrutiny on floor, however. He said his Foreign Relations Subcommittee, which unanimously recommended deep budget slashes, wanted radio activity sustained, and "We also felt the agency could properly use the new medium of TV."

TV cut marked out by Larson will hit such USIA programming as *Report from America* series produced for agency by NBC-TV, news shows prepared by Telenews. Other shows packaged here for USIA distribution have included *I Led 3 Lives*, *Passing Parade*, *Concert Hall*, *Industry on Parade*, *Magic of the Atom*.

New and Upcoming Stations: KTVC, Ensign-Cimarron, Kan. (Ch. 6) began programming July 24 with ABC-TV in affiliation with KAKE-TV, Wichita (Ch. 10), also having signed with CBS-TV under Extended Market Plan. On-air box score now is 503 (91 uhf).

KTVC has 5-kw GE transmitter and 600-ft. Liberty tower with 6-bay antenna at site 20 mi. SW of Dodge City. It's picking up KAKE-TV via GE microwave relay installed to Stafford, Kan. *Dodge City Daily Globe* and affiliated radio KGNO (Jesse Denious Jr., pres.) own 17.75% of KTVC; some 600 area residents who own remainder of stock are headed by insurance man Leigh Warner, holding 4.85%. Wendell Elliott is v.p.-gen. mgr. and 5.65% owner; Hershel Holland, ex-KGNO, program mgr.; Ken Karr, ex-KAKE-TV, chief engineer. KTVC base hour is \$100, combination hour with KAKE-TV, \$675. KAKE-TV rep is Katz.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WPTA, Roanoke, Ind. (Ch. 21, allocated to Ft. Wayne) has 12-kw RCA transmitter, plans Aug. 15 test patterns, Sept. 1 programming, writes owner Sarkes Tarzian, electronics manufacturer who also owns WTTV, Bloomington-Indianapolis (Ch. 4). Studio-transmitter building is 85% completed and 724-ft. Stainless tower with antenna is ready. Ron Ross, from WOWO, Ft. Wayne, will be mgr. It will have \$400 spot rate. Rep will be Meeker.

KETV, Omaha (Ch. 7) plans Aug. test patterns, Sept. 17 programming with ABC-TV, reports v.p.-gen. mgr. Eugene Thomas for grantee Herald Corp., publisher of *Omaha World-Herald*. RCA 50-kw transmitter is to be wired in Aug.; 583-ft. Ideco tower with 12-section antenna is ready. Base hour will be \$900. Rep is H-R Television.

WFGA-TV, Jacksonville (Ch. 12), installing 12-section superturnstile antenna on 900-ft. Ideco tower and testing 50-kw RCA transmitter into dummy load, plans test patterns about Aug. 1, programming with NBC-TV Sept. 1,

Newsweek Magazine is buying 46.22% of KFSD-TV, San Diego (Ch. 10) and KFSD from Fox, Wells & Co. in deal involving \$1,502,900. Sale agreement also includes guaranty by Weekly Publications Inc. (*Newsweek*) of 50% of \$1,670,000 loan to KFSD Inc. by Bankers Trust Co., N. Y. Fox, Wells & Co., reducing holdings from 76.6% to 34.15%, retains control through stock pooling agreement with minority owners controlling 19.63%. Sale follows assignment of stock to retiring partners George B. Wells, Robert A. Bernhard and Robert C. Gunnell, who are selling it to *Newsweek* for \$1,236,900, with magazine also buying additional 2000 shares of common, 600 preferred for \$266,000 from KFSD Inc. *Newsweek* principals are Vincent Astor, chairman and 59.07% owner; Malcolm Muir, pres., 6.35%; Theodore F. Mueller, v.p. & publisher, 1.27%; Averill Harriman, non-board member, 13.33%. Magazine's net income after Federal taxes was \$483,121 in 1955, \$607,833 in 1956.

Sale of WMTV, Madison, Wis. (Ch. 33) for \$550,000 to WTVJ Inc. interests by Gerald A. Bartell family (Vol. 13:26) was approved by FCC. New owners are Mitchell Wolfson, pres. & 12.5% owner (also pres. & principal owner of WTVJ, Miami); Sidney Meyer, v.p. & 12.5% (WTVJ secy.); Lee Ruwitch, secy.-treas. & 25% (WTVJ exec. v.p. & gen. mgr.); WTVJ Inc., 25%; radio WMAV, Springfield, Ill. (50% of CP for WMAV-TV), 25%. Gordon Sherman is pres. of both WMAV-TV & WMAV.

reports gen. mgr. Jesse H. Cripe. Owners include Wolfson-Meyer interests with 20% (WTVJ, Miami) and Harold S. Cohn, v.p. & 19% (owner of Jacksonville radio WRHC). Base hour will be \$600. Rep will be Peters, Griffin, Woodward Inc.

WJCT, Jacksonville (Ch. 7, educational) doesn't have target for programming more specific than Sept.-Oct., but plans installation by Aug. 1 of 5-kw transmitter donated by WMBR-TV, reports Dr. Heywood C. Dowling, pres. of grantee Educational TV Inc. Alford antenna is scheduled for installation on WFGA-TV tower in about 3 weeks. Station will use WMBR-TV studios, but film equipment and transmitter will be in WFGA-TV transmitter house.

Translator starts: K70AX, Pinedale, Wyo. began equipment tests July 26, repeating KID-TV, Idaho Falls; K70AQ, Likely, Cal., June 1, repeating KOLO-TV, Reno; K70AW, La Grande, Ore. due to start by Aug. 15, repeating KHQ-TV, Spokane; K79AB & K82AD, Brownlee Trailer Court, Ore., due Sept. 1, repeating KBOI-TV & KIDO-TV, Boise; K70AM & K75AA, Manson, Wash., delayed from July start, now aim for Sept., repeaters of KREM-TV & KHQ-TV, Spokane.

GE shipped used 12-kw transmitter to upcoming WETV, Atlanta (Ch. 30, educational), due on air this summer; 10-kw transmitter to WJMR-TV, New Orleans, for experimental Ch. 12 operation; 5-bay helical antenna July 1 to WEEK-TV, Peoria; 35-kw amplifier June 25 to KIEM-TV, Eureka, Cal., planning boost to 100-kw; 20-kw amplifier to educational WTTW, Chicago, planning 275-kw.

RCA color camera shipments: 3 live, 2 film cameras July 26 to upcoming WHDH-TV, Boston (Ch. 5), due in fall; 1 film, July 26 to upcoming WLWI, Indianapolis (Ch. 13), due in Sept.; 1 film, July 25 to WKZO-TV, Kalamazoo.

RCA shipped 50-kw transmitter July 17 to upcoming WLWI, Indianapolis (Ch. 13), due in Sept.; 12-section superturnstile antenna July 17 to WALB-TV, Albany, Ga. (Ch. 10), planning site change.

Separate FM programming will be started by Westinghouse stations Aug. 5 in move described by pres. Donald H. McGannon as "indicative of our positive conviction that FM is on its way to becoming a major broadcast medium." First stations to schedule classical music programs apart from Westinghouse TV & AM operations will be KDKA-FM, Pittsburgh, and KEX-FM, Portland, Ore., to be followed by WBZ-FM, Boston, and KYW-FM, Cleveland, when transmitter locations are changed and technical facilities improved. All will operate 4 p.m.-midnight initially.

Horace Hildreth's Community Bestg. Co. is buying WAGM-TV, Presque Isle, Me. (Ch. 8) & WAGM, and WABM, Houlton, Me. for \$525,000, it's revealed by application filed with FCC. Selling principal is Harold Glidden, 94.8% owner, who is retiring from broadcasting, turning properties over to Northeastern Bestg. Co. Inc., subsidiary of Community Bestg., which controls WABI-TV, Bangor (Ch. 5). Hildreth is also pres. and 27.7% owner of WMTW, Poland Spring, Me.

Control of CP for WTLM, Laurel, Miss. (Ch. 7) will be held by Mayor Wm. S. Smylie and son W. S. Smylie III, FCC having approved transfer of 16.67% from Jack Rose to Mayor Smylie to bring latter's holdings to 41.67% (Vol. 13:24). Other stockholders are his son, 25%; D. B. Marcus, 16.67%; *Laurel Leader-Call* publisher T. M. Gibbons, 16.67%.

TWO MORE BIG-CITY VHF channels—there aren't many left—were awarded in final FCC decisions this week: Ch. 4, Pittsburgh; Ch. 7, Seattle.

Pittsburgh decision came via merger route—grant going to KQV, with WCAE to acquire 50% interest, KQV to be sold, other 3 applicants dropping out and getting \$50,000 each for expenses (Vol. 13:26). KIRO took the Seattle decision over KXA & KVI.

KIRO's win was narrow. It got 3 votes, Comrs. Doerfer & Lee dissenting, Hyde out of town and not participating. Commission favored KIRO for past performance, local residence, civic participation, diversification of business interests, ownership-management integration, program plans. FCC found no reason to penalize KIRO principal Saul Haas because of opponents' allegations that he threatened radio KOL in order to acquire stock; that he "peddled influence" to get KIRO holdings, etc. Sen. Warren G. Magnuson, chairman of Commerce Committee, holds 3.243% of KIRO.

Another vhf case is winding up, Kenyon Brown dismissing Ch. 7 application in Amarillo, getting up to \$10,000 for expenses from KAMQ principals who will be free for grant.

* * * *

Court of Appeals docket was loaded again, these appeals being filed: (1) Losers in Indianapolis Ch. 13 case challenging grant to WLWI. (2) Sunbeam TV again attacking Ch. 7 grant to WCKT, Miami. (3) WOMI & WVJS, Owensboro, Ky., seeking to stop shift of Ch. 9 from Hatfield, Ind. to educational use in Evansville. (4) Evansville TV Inc. and WLEX-TV, Lexington (Ch. 18) attacking shift of Ch. 7 from Evansville to Louisville. (5) Okla. TV Corp., Ch. 12 applicant for New Orleans, seeking to block experimental Ch. 12 grant to WJMR-TV. (6) WWLP, Springfield, Mass. (Ch. 22), trying to get Ch. 3 out of Hartford.

In allocations actions, the Commission: (1) Finalized assignment of Ch. 8 to Waycross, Ga. (2) Started rule-making to add Ch. 13 to Hibbing, Minn., substituting Ch. 9 for Ch. 13 at Bemidji. (3) Denied petition to shift educational reservation in Biloxi, Miss. from Ch. 44 to Ch. 13.

Three new allocations petitions were filed: (1) By WATR-TV, Waterbury, Conn. (Ch. 53), to swap Ch. 53 with Hartford's Ch. 24. (2) By KHOL-TV, Kearney, Neb. (Ch. 13), seeking shift of Ch. 3 from Cheyenne, Wyo. to Sterling, Colo. (3) By KXOA, Sacramento, asking assignment of Ch. 17 to Bakersfield.

TASO was relieved this week to see letter from Victor R. Hansen, head of Justice Dept. anti-trust div., informing FCC that TASO procedures now "will provide safeguards to minimize the possibility of anti-trust violations arising from the operations of TASO which we considered previously to be lacking." Several substantial industry members of TASO had been shying from participating for fear of anti-trust involvement (Vol. 13:29). TASO exec. director Dr. George Town says he hopes Hansen's letter will now ease their minds. Though some TASO members have chafed at fact FCC provides presiding officers at panel meetings, Town reports procedure now working smoothly.

Staff for probe of FCC and 16 other govt. regulatory agencies by House Commerce Legislative Oversight Subcommittee (Vol. 13:29) was rounded out this week by appointment of NYU professor Bernard Schwartz, specialist on administrative law, as general counsel & staff director. As director of NYU's Institute of Law, Dr. Schwartz has been occasional consultant on Capitol Hill, but this is first full-time Congressional assignment. He is author of recently-published *The Supreme Court* (Ronald Press, N. Y., \$6.50). Others named to staff July 22 by "watchdog" subcommittee for \$250,000 probe are lawyers Stephen England & Francis X. McLaughlin, investigators Oliver Eastland & Joseph P. O'Hara, bringing its payroll to 10. Chairman Moulder (D-Mo.) told us "I'm sure there will be developments that will justify hearings on the FCC," but target date for them is fall or winter—or early next year. Subcommittee is charged by House with determining extent of political & other influences on agencies set up by Congress.

Radio station sales & transfers approved this week: WHIM, Providence, by Frank W. Miller Jr. for \$640,000 to Richard D. Buckley & John B. Jaeger (Vol. 13:26) . . . WHDL, Olean, N. Y., 49% of radio and *Olean Times-Herald* by Gannett Co. for \$213,566 to Olean Times-Herald Corp., stock to be retired to treasury, thereby increasing holdings of pres. E. B. Fitzpatrick from 35% to 68.6% (Vol. 13:28) . . . WJIG, Tullahoma, Tenn. by Col. Raymond L. Prescott Jr. for \$70,000 to M. D. Smith (Vol. 13:25) . . . WKTL, Kendallville, Ind. by Charles R. Palmquist Sr. & Jr. and associates for \$48,000 to Weldon M. Cornell & Paul L. King (Vol. 13:27) . . . WBSE, Hillsdale, Mich. by Lloyd V. Hickok, acting as attorney for stockholders, for \$55,000 to Harmon L. Stevens & John F. Wisner (Vol. 13:28) . . . KWFC, Hot Springs, Ark., 75% by Walter E. & Betty P. Hussman (*Camden News*, 50% owner of KCMC-TV, Texarkana) for \$25,000 to Clyde E. Wilson, who becomes 100% owner (Vol. 13:25).

Radio station sales reported this week: WTAQ, La-Grange, Ill. 50% by Russell G. Salter for \$137,500 to Charles F. Sebastian, who becomes 100% owner . . . KRIG, Odessa, Tex. by Oil Center Bestg. Co. (R. O. Canon, pres.) for \$100,000 cash to Radio Odessa Inc., headed by Carl Goodwin, ex-WCHV, Charlottesville, Va., recently with Dow Chemical, Houston . . . WNBS, Murray, Ky. 77.5% by H. T. Waldrop & Edd Griffin for \$61,275 to Charles R. Shuffett and C. H. Hulse Jr., who are selling WLBN, Lebanon, Ky. (Vol. 13:28) . . . WKTM, Mayfield, Ky. by Fred L. Thomas for \$55,000 to 1/3 owners Charles W. Stratton (1/3 of WKOA, Hopkinsville, Ky.) and H. D. & Mose Bohn, Hopkinsville merchants. Brokers: KRIG, Hamilton, Stubblefield, Twining & Assoc.

TV-radio "censorship" of folk songs to delete such words as "darky" & "massa" was charged in House this week by Southerners in speeches coincident with Senate debate on civil rights legislation. Reps. Watts & Chelf (D-Ky.), Sikes & Matthews (D-Fla.) introduced similar measures (H. Res. 364, 365, 366, 374) for "study & investigation of certain censorship practices of radio & TV networks." All were referred to Rules Committee. In addition, Rep. Herlong (D-Fla.) wrote each FCC member protesting that changes made in TV-radio renditions of Stephen Foster songs are inspired by "professional Negroes trying to make capital out of something which has been a sign of love & affection for the Negro race for years." Rep. Haley (D-Fla.) said "arbitrary censorship" reminded him of Russia.

MBS SALE was finally announced this week, price undisclosed, but rumored at around \$500,000 (Vol. 13:29). Group headed by Paul Roberts takes over Aug. 7, with Roberts as pres., former MBS v.p. B. J. Hauser as exec v.p. Backers identified are Armand Hammer, pres. of Occidental Petroleum Corp., Los Angeles, and Roy Roberts (no relation), Ojai, Cal. realtor & oilman. Theatrical producer Roger L. Stevens isn't in picture.

Also a stockholder is ex-Comr. Frieda B. Henneck, who says she got the backing for purchase. Stevens, she says, signed first but wanted to settle in Sept., whereupon she brought in Dr. Hammer who took over from Stevens. She'll be MBS Washington counsel.

Among other stockholders: A. A. Schechter, former MBS v.p., who will act as consultant; N. Y. attorney Harold Seligson, who handled legal aspects for purchasers. There are a few more stockholders, unidentified. Percentages of holdings weren't disclosed, but Dr. Hammer has voting control.

MBS pres. John Poor, also a v.p. of RKO Teleradio Pictures, will now concentrate on latter duties. In closed-circuit talk to affiliates July 26, he said sale is, in effect, only a change in management, expected to be beneficial. Roberts promised affiliates "action."

Roberts is mgr. of KRKD-FM, Los Angeles, pres. of United FM Corp. (reps), v.p. of Audio Sales. He's a Temple U graduate, once worked for *Philadelphia Record*, in 1951 headed U. S. International Trade Fair in Chicago.

Free time on all networks for U. S. Public Health Service report on relation between cigaret smoking & lung cancer was urged July 23 by Rep. Martha W. Griffiths (D-Mich.). In letter to FCC Chairman Doerfer, she "urgently requested that you authorize public service time" on TV & radio for Surgeon General Leroy E. Burney & Dr. John R. Heller, National Cancer Institute director. They had testified before House Govt. Operations Subcommittee that they aren't sure any cigarette filter can "selectively sort out" tobacco tars which may be cancer-causing. Mrs. Griffiths appealed directly to FCC after Burney said at hearing he'd be willing to go on air with report but didn't think PHS had authority to spend money for broadcasts.

Canadian TV penetration reached 66% of all households (2,657,300 TV households out of 4,051,600) as of June 1, according to estimates by Bureau of Broadcast Measurement, 96 Eglinton Ave. E., Toronto. Excerpted from BBM's Spring area surveys are these TV household totals and percentages of penetration for each province: Alberta, 151,200 (49%); British Columbia, 217,600 (53%); Manitoba, 121,400 (54%); New Brunswick, 59,900 (49%); Newfoundland, 24,700 (30%); Nova Scotia, 100,400 (61%); Ontario, 1,097,700 (76%); Prince Edward Island, 8300 (36%); Quebec, 790,000 (76%); Saskatchewan, 86,100 (36%).

Rate increases: WABD, N. Y., Sept. 1 raises base hour from \$2200 to \$3000, lowers min. \$500 to \$300. WVUE (formerly WPFH), Wilmington, Del. Sept. 7 raises hour from \$1000 to \$1600, min. \$200 to \$270. WOI-TV, Ames-Des Moines, Sept. 1 raises hour from \$500 to \$650, min. \$100 to \$140. CFCL-TV, Timmins, Ont. July 1 raised hour from \$160 to \$180, min. \$35 to \$45.

Pro football teams have grossed \$6,855,270 from TV-radio rights since 1952, National Football League commissioner Bert Bell told Rep. Celler's anti-trust subcommittee this week. He said the seasonal take rose from \$768,709 in 1952 to \$1,719,693 in 1956.

TV-radio broadcasting practices throughout the world will be topic of RCA's Edmund A. Laport, principal speaker at Sept. 27 banquet—highlight of 7th annual fall symposium of IRE Professional Group on Broadcast Transmission Systems Sept. 27-28 at Washington's Willard Hotel. Sept. 27 morning session will be moderated by FCC chief engineer Edward W. Allen Jr., includes papers on: Transistor regulated power supply for video circuits by Dr. Marvin Schorr, Technical Operations Inc.; transistorized intercom system by ABC's Emil P. Vincent; microphone pre-amp with AGC by GE's A. A. McGee; TV film quality standards by CBS-TV's K. B. Benson & J. R. Whittaker. Sept. 28 morning session (CBS-TV's A. B. Chamberlain, moderator): Reduction of image retention in IO cameras by RCA's J. H. Roe, S. L. Bendall & K. Sadashige; TV camera tube developments by RCA's F. S. Veith; TV transmitter operational practices by Westinghouse's Ralph N. Harmon; TV transmitter proof of performance by FCC's James E. Barr; STL & remote pickup on 13,000 mc by American Microwave's F. W. Bailey. Afternoon session (Phillip B. Laeser, WTMJ-TV, Milwaukee, moderator): TASO objectives & progress by Dr. George Town, TASO; progress report on vertical blanking video test signals by ABC's Robert M. Morris & John Serafin; DA maintenance by consulting engineers D. A. Peterson & J. G. Rountree; simplified 5-megawatt uhf antenna by GE's R. E. Fisk; automation of TV master control room & film room by J. L. Berryhill, KRON-TV, San Francisco. Sept. 27 afternoon session will be devoted to tour of Walter Reed Medical Center color TV facilities.

Assistance to commercial telecasters in "raising the level of program content" will be principal function of National Education Assn.'s new TV-radio office at 30 Rockefeller Plaza, N. Y., headed by Richard Krolik, recently associated with NBC-TV's *Wide Wide World* and *Today* and formerly in charge of TV activities for *Life* magazine. New York office, according to NEA exec. secy. Dr. Wm. G. Carr, will cooperate with producers on all aspects of public affairs programming and programs dealing with schools and educators. Future plans include "possibility of a weekly entertainment series based on true stories of outstanding teachers, expanded services in TV-radio spot announcements and programming and cooperation with local stations in the presentation of reports on education to their communities." NEA also plans to give its members "previews" of forthcoming programs of special interest to teachers and students through *NEA Journal* and other publications.

Educational TV station in Schenectady area is proposed in brief filed with FCC this week by Mohawk-Hudson Council on Educational TV, asking that allocations now assigned to WCDA, Albany (Ch. 41) and WTRI, Albany-Troy-Schenectady (Ch. 35) be reserved if they shift to vhf. Mohawk-Hudson said it is negotiating for uhf equipment with WCDA & WTRI and for studio facilities with WRGB, Schenectady (Ch. 6), which is moving to larger quarters, and will file for station on one or more channels if equipment is obtained. Brief also reported agreement with educational WGBH-TV, Boston, to set up first ETV network when microwave is available. Mohawk-Hudson has membership of 135 civic, educational & cultural organizations.

ABC started construction of first new building in its 23-acre \$30,000,000 TV Center July 24 in Hollywood when excavation began on new technical building. Plans for project, scheduled for completion in late 1958 or early 1959, include 8 multi-purpose studios, 90x140x42-ft.

WORLD'S TV stations and sets-in-use, as of July 1, 1957, are listed in this table based on the more detailed information in the Foreign TV Directory section of our forthcoming 1957 Fall-Winter TV Factbook:

Country	Stations	Sets	Country	Stations	Sets
Algeria	1	3,000	Morocco ³	—	5,000
Argentina	1	90,000	Netherlands	6	150,000
Australia	6	60,000	Nicaragua ³	—	500
Austria	5	10,000	Norway ⁴	—	300
Belgium	4	175,000	Panama ⁴	—	3,500
Brazil	7	600,000	Philippines	1	11,000
Bulgaria	1	500	Poland	4	10,000
Canada	40	2,658,000	Portugal	1	500
Colombia	6	100,000	Rumania	1	1,100
Cuba	18	300,000	Spain	1	3,200
Czechoslovakia	3	120,000	Sweden	4	45,000
Denmark	4	76,000	Switzerland	4	25,000
Dominican Rep.	2	7,000	Thailand	1	10,000
El Salvador	1	1,000	Turkey	1	200
Finland	3	5,000	United Kingdom	21	7,450,000
France	19	600,000	Uruguay	1	10,000
E. Germany	10	100,000	USSR	30	3,000,000
W. Germany ¹	39	1,100,000	Venezuela	10	105,000
Guatemala	2	11,000	Yugoslavia	2	4,000
Hong Kong ²	(1)	2,000			
Hungary	1	600			
Iraq	1	1,700			
Italy	90	575,000			
Japan	12	650,000			
Korea	1	1,500			
Luxembourg	1	1,000			
Mexico	10	300,000			
Monaco	1	6,000			
			FOREIGN TOTAL	377	18,388,600
			U. S.	500	44,500,000
			U. S. Military	23	50,000
			GRAND TOTAL	900	62,938,600

¹ Also has 7 low-powered translator stations.
² Closed-circuit cable system; not included in total.
³ Stations have gone off air.
⁴ Viewers watch U. S. Armed Forces stations, Canal Zone.

"All that flickers is not gold," July 21 *N. Y. Times* points out in story by Albert L. Kraus recounting how "banks ran for cover" when TV cut into movie business after "lush decades" in which almost any film was good risk for loan. Now "extremely complex contracts" with theatre movie producers are rule for banks, which find that lending to TV film makers is more stable business. Bankers Trust Co. v.p. Herbert L. Golden, ex-*Variety* motion picture editor hired in 1952 to reshape movie loan practices, is quoted: "A TV film series that runs out of funds with 37 of 39 instalments completed is still salable. But a feature film that lacks 20 minutes of running time—what can you do with that?"

ELECTRONICS PERSONALS: Rear Adm. Frederick R. Furth (USN-ret.) promoted to IT&T director of research; he succeeds Harold H. Buttner who continues as v.p. & technical consultant . . . Sterling C. Spielman promoted to director of engineering, Philco govt. & industrial div.; Frank D. Peltier named director of engineering planning . . . Dr. Thornton C. Fry, ex-Bell Telephone Labs, appointed v.p. and director of Univac Engineering, Remington Rand div. of Sperry Rand Corp. . . . Dr. Daniel Alpert, assoc. director of Westinghouse Research Labs, joins U of Ill. as physics research professor and director of control systems lab, continues as Westinghouse consultant.

GE is moving electronic parts sales offices from Schenectady to Owensboro, Ky., now headquarters for entire electronic components div., to provide centralized marketing organization under distributor sales mgr. John T. Thompson, who has made these key appointments: Louis M. Robb, administrator; George O. Crossland, distributor development & trade relations mgr.; Paul P. Wickman, sales mgr. for dealer products; Charles A. Richardson, sales mgr. for industrial & military products. Field sales force in 27 cities continues.

Paid circulation of *Electronic Technician* has passed 54,000, according to pres. Howard Reed, who reports 49.3% gross income gain first half 1957 compared with 1956.

TV & trials don't mix because lawyers & police become camera-happy outside courtroom, symposium speakers argued July 25 at London meeting of American Bar Assn., giving new twist to Canon 35 ban on TV-radio coverage of proceedings (Vol. 13:29). Attorneys who discuss pending cases on air should be censured and/or disbarred, pres. Joseph Ball of Cal. State Bar Assn. said. Wesley McWilliams, Philadelphia, said entire ethical code needs overhaul because of "headline-happy" lawyers. Charles Carr, ex-U. S. attorney in Los Angeles, said fair trials were difficult because police rushed to TV studios to tell how "I captured this crook." Louis Waldman, N. Y., thought TV-radio spread news so fast that change of venue no longer is effective device to insure fair trials.

"Ad millionaires" rose to 374 in 1956 from 290 in 1955, July 26 *Printers' Ink* reports in tabulation showing that companies spending at least \$1,000,000 for national advertising invested record \$1,837,309,068 last year in 7 media, with TV taking biggest share—as it did in 1955 (Vol. 12:28). "Millionaires" spent \$469,498,389 on network TV plus \$282,403,700 on spot TV vs. \$391,566,669 on network TV alone in 1955. Newspapers took \$457,915,761 vs. \$436,143,690; magazines, \$420,702,347 vs. \$377,431,365; outdoor, \$96,775,122 vs. \$93,886,783; business papers, \$81,697,600 vs. \$68,019,000; farm publications, \$28,316,149 vs. \$27,250,547. Network radio, which received \$92,925,998 in 1955, wasn't counted last year by Publishers Information Bureau.

NTA Film Network, like NBC, plans to present series of spectaculars featuring Shirley Temple next season. While NBC's will feature the current 29-year-old Shirley as narrator and sometime actress in fairytale series, NTA will present the younger Shirley Temple of the 1930's by way of 4 of her old feature films, to be shown Sunday afternoons by most NTA affiliates beginning Oct. 20. Shirley herself—the present-day one, that is—held press conference to announce it.

Paul H. Chapman Co., Atlanta, opens new station brokerage office at 17 E. 48th St., N. Y.

Peacetime nuclear radiation project for industrial uses has been proposed to AEC by new "CEM Group," an association of Emerson Radio, Revere Copper & Brass and General Aniline & Film. Group proposes joint CEM-AEC development of reactor to explore uses of radiation energies in process industries, such as chemical industry. CEM (chemical-electronics-metallurgy) management committee consists of Emerson pres. Benjamin Abrams, Revere pres. C. A. Macfie and General Aniline pres. John Hilldring.

Back to school: RCA is sending 180 executives in its defense electronic products organization to Rutgers U in relays of 36 per week for specialized advanced management courses.

RETMA members voted overwhelming to change name to Electronic Industries Assn. at this week's proxy meeting in Washington. Change becomes effective when state of Ill.—where association is incorporated—approves charter revision. Members also approved by-law changes (Vol. 13:20) with Set Div. becoming Consumer Products Div. and Tube Div. changing to Tube & Semiconductor Div.

Machine tool automation symposium, sponsored by RETMA and directed at aircraft parts manufacturing industry, will be conducted Sept. 17-18 at Ambassador Hotel, Los Angeles. General chairman is Leonard Mautner, pres. of Electronic Control Systems; technical program chairman is Bernerd Gaiennie, Northrup Aircraft.

LATEST ESTIMATE OF SCRAPPAGE RATE: One of hardest figures to pin down, scrappage rate -- number of sets junked -- is tackled again by Frank W. Mansfield, Sylvania director of marketing research, in his comprehensive set production-distribution statistics, prepared for our Fall-Winter TV Factbook.

Precision in scrappage-rate estimates is impossible, as is evidenced by fact Mansfield has had to revise previous years' judgments. But he's the only industry statistician willing to stick his neck out publicly -- so here are his figures:

1,052,000 scrapped in first 6 months of 1957, compared with 1,011,000 in last 6 months of 1956, 674,000 in first 6 months of 1956. Thus, scrappage rate for first 6 months of this year would equal more than one-third of the 2,865,000 sets sold by dealers to public during the period.

* * * *

Turning to other figures, Mansfield (who also serves as RETMA marketing data director) estimates 44,553,000 sets-in-use at end of June, increase of 1,813,000 from total at end of 1956. He places cumulative production since 1946 at 52,804,000, indicating total scrapped during period was 8,251,000.

Color sets sold to public to date total 208,000 as of June 30, according to Mansfield -- 50,000 of these sold during first 6 months of 1957. He figures 2000 color sets scrapped during first 6 months.

Giving breakdown of set sales during first 6 months, according to picture-tube size, Mansfield comes up with: portables -- 17-in., 368,000; 14-in. & less, 334,000; regular sets -- 19-21-in., 1,791,000; 22-in. & over, 206,000; 16-18-in., 116,000.

Taking all sets-in-use today, here's his size breakdown, in percentages: portables 15-in. & less, 3.5%; portables 16-in. & over, 1.6%; regular sets 15-in. & less, 8.4%; 16-18-in., 27.2%; 19-21-in., 54.5%; 22-in. & over, 4.3%; color, .5%.

To show pattern of factory production in recent years, we've excerpted following tables of percentages indicating fluctuations in sizes & types:

Size & Type	1952	1953	1954	1955	1956	1957	
						1st qtr.	2nd qtr.
Portable under 16-in.	-	-	-	3.6%	18.4%	12.5%	6.1%
" over 16-in.	-	-	-	-	6.9	16.9	22.7
Regular under 15-in.	.1	-	.6	-	-	-	-
" 16-18-in.	39.4	26.5	14.8	10.1	5.8	3.6	3.1
" 19-21-in.	60.2	69.1	80.2	75.5	58.3	60.3	59.9
" 22-in. & over	.3	4.4	4.1	10.2	8.6	5.4	4.7
Total Black-&-White	100.0	100.0	99.7	99.4	98.0	98.7	96.5
Color	-	-	.3	.6	2.0	1.3	3.5
Total	100.0	100.0	100.0	100.0	100.0	100.0	100.0

Economic Indices: Gross National Product is estimated at annual rate of \$433.5 billion for second quarter of 1957, Council of Economic Advisers told House-Senate Economic Committee this week. Second quarter rate reflects increase of \$4.4 billion over first quarter -- or about 1% -- with most of increase attributed to inventories which went from \$800,000,000 liquidation rate in first quarter to plus of \$1.5 billion in second quarter.

Retail sales for first five months of year were reported at \$78.2 billion, an increase of about \$4.3 billion over similar period last year. However, TV-radio-appliance sales for the 5 months were estimated at \$1.4 billion, down \$29,000,000 from similar 1956 period.

Consumer survey by U of Mich. Survey Research Center in June indicates weakening confidence in business conditions, more cautious approach to buying. However, consumers were neither pessimistic nor in all-out drive to retrench. Survey says that two-thirds of about 1350 adults interviewed expect good times to continue for coming year, while last year 75% saw current conditions continuing.

Production: TV production was 107,569 week ended July 19, compared with 65,338 preceding week and 94,866 in corresponding week one year ago. It was the year's 29th week and brought TV production for year to date to about 2,955,000, compared with 3,667,901 in same period of 1956. Radio production totaled 188,773 (91,866 auto) week ended July 19, compared with 110,092 (50,197) the preceding week and 166,047 (51,827) in corresponding week year ago. Radio output for 29 weeks totaled about 7,562,000 (3,017,000) vs. 7,084,187 (2,462,574).

Topics & Trends of TV Trade: "Back to School" is theme of appliance dealers as they gather in Washington for NARDA's Third Institute of Management and First Institute of Advanced Management, starting July 28 at American U.

Institutes, which command growing interest and significance, will run full gamut of dealers' needs—from financing through psychology to store locations. Interest of TV manufacturers is reflected in increasing number of top sales, marketing and public relations executives enrolled for courses—both the beginning or basic course and the advanced course for those who have completed basic program. Registered for advanced course are 46, basic 91.

Opening class (9 a.m., July 29) will hear assoc. prof. Wm. R. Davidson, Ohio State U, on "Good Management in Appliance Retailing." Others scheduled to speak during courses include Fred Ogilby, Philco v.p., and Claire B. Ely, Maytag v.p.

Better recognition of electronic industry is shown in Budget Bureau's new *Standard Industrial Classification Manual* which gives separate listing for TV-radio sets, records, receiving tubes, CR tubes, transmitting, industrial and special purpose tubes, electronic components. Manual is used by Govt. in collecting economic data and spokesman told us change will give electronic industry more prominent place, result in issuance of more information. Same is true of broadcasting, which has been changed from a services listing to major group under communications.

Double aspect of Masters Inc. fight against "fair trade" prices is shown in July 20 *Editor & Publisher*, one article saying Masters pres. Steve Masters plans to continue Washington store ads on discount merchandise in N. Y. papers "if they will accept our copy, and we believe they will." On same page, *E&P* quotes Dr. John W. Dargavel, chairman of Bureau of Education on Fair Trade and exec. secy., National Assn. of Retail Druggists, in praise of 6 of 7 N. Y. newspapers' refusal to print Masters ad cutting prices on GE fair-traded appliances.

RETMA of Canada reports following TV distributor sales to dealers for first 5 months and for May: Ontario, 56,336 & 8449; Quebec, 40,443 & 6016; British Columbia, 12,486 & 1057; Alberta, 10,876 & 785; Manitoba 9253 & 517; Nova Scotia 7669 & 735; Saskatchewan 5673 & 486; New Brunswick & Prince Edward Island 4868 & 494; Newfoundland 1611 & 105.

RCA servicemen's manual, *Color TV Pict-O-Guide*, 200-page volume of step-by-step instructions for installation & adjustment of color receivers, is being distributed to authorized RCA tube dealers.

TV shipments by manufacturers in 1956 were reported this week by Dept. of Commerce at 7,374,000, valued at \$897,918,000, compared with 7,678,000 at \$1.025 billion in 1955. Comparable RETMA figures are 7,387,029 worth \$938,596,000 for 1956, 7,756,521 at \$1.071 billion in 1955. Commerce Dept. figures, provided by Census Bureau, show radio shipments, including auto, at 13,880,000 valued at \$289,437,000 in 1956; 14,771,000 worth \$310,201,000 in 1955. RETMA figures were 13,982,000 at \$298,372,000 in 1956, 14,529,000 at \$291,157,000 in 1955. Noting that report indicates only 14,000 color sets sold in 1956, we called fact to Bureau's attention; figure was withdrawn pending recheck.

Hotpoint plans 108,000-sq.-ft. refrigerator compressor plant as first step in what pres. John C. Sharp says will be largest single industrial tract developed by one manufacturer in Chicago area. Employing 300-500 initially, plant will be started in fall on 770-acre site at Elk Grove; company said it is expected to be in operation by early 1959. Sharp said other Hotpoint plants are planned in new development, including TV manufacturing facility (GE now makes Hotpoint sets). He added that new plants will supplement present facilities at Chicago, Cicero, Chicago Heights and Milwaukee. Hot Point's long-range plans for Elk Grove envision up to 15,000 employees, 7,000,000 sq.-ft. of floor space.

Motorola plans Aug. start on \$3,000,000 Chicago expansion program (Vol. 13:19) which chairman Paul V. Galvin describes as 2-phase operation: (1) Addition of 120,000 sq.-ft. building to Franklin Park, Ill., TV & hi-fi final assembly plant (to be completed next year); (2) construction of 110,000 sq.-ft. building at Franklin Park for offices and engineering, consumer products and automotive products divs. (to be started next spring with completion scheduled for 1959). General staff operations will remain at Augusta Blvd. plant on Chicago's west side.

Chairman of RETMA annual awards committee for 1957-58 is Max F. Balcom, RETMA director and Sylvania director-consultant. Other members: Paul V. Galvin, Motorola; Leslie F. Muter, Muter Co.; Robert C. Sprague, Sprague Electric Co.; Robert S. Bell, Packard-Bell; R. E. Carlson, Tung-Sol; Herbert W. Clough, Belden Mfg. Co.; H. J. Hoffman, Machlett Labs; F. R. Lack, Western Electric; A. D. Piamondon Jr.; ex officio, W. R. G. Baker, GE.

New entry in hi-fi manufacture, Capitol Records Inc., more than 90% owned by Electrical & Musical Industries Ltd. of England; offers 11 models at \$30-\$250, made by Symphonic Electronics Corp. and Steelman Phonograph & Radio Co., with distribution through Capitol Records Distributing Corp.

FIRST REPERCUSSION of last week's "electrocution" incident—in which death of 6-year-old child was unofficially blamed on contact with stand supporting a portable TV (Vol. 13:29)—came this week in form of ruling by city of South Bend, Ind. against sale of metal-cabinet series-filament TV sets unless isolation transformer separates cabinet from chassis.

This would, in effect, bar sale of all metal portables in city, unless dealer chose to install the relatively expensive (about \$18) transformers himself. At week's end, GE—which manufactured portable which was said to be involved in the death of Skokie, Ill. child—had requested meeting with South Bend officials, and it was expected that officials of RETMA and possibly Underwriters' Laboratories would also attend session.

Meanwhile, UL said it had checked a number of GE portables since tragedy and found them free of electrical defects. Those of other manufacturers, too, were found to meet safety standards. *N. Y. Times* TV editor Jack Gould, in a second column on set safety, this week urged that portable TV sets and all other metal-clad appliances be equipped with polarized line plugs to prevent any possibility of "hot" cabinets.

Consumer attitudes toward portables—as reflected in sales—apparently were not affected enough to notice. But dealers and servicemen, acutely aware of touchy issue, were stressing safety angles. For example, big Buffalo, N. Y. Philco distributor W. Bergman Co. has ordered its servicemen to be sure to check every metal-cabinet line-connected TV or radio for leakage to cabinet after final assembly but while set is still turned on. Shop ticket on each repaired set is being stamped "tested for shock hazard" with date and repairman's initials.

More facts on the Skokie, Ill. case should be forthcoming next week when "blue ribbon" jury—largely composed of electrical and TV experts—will examine receiver and take evidence in Cook County coroner's office.

RETMA reappoints H. J. Hoffman, Machlett Labs v.p., as chairman of membership & scope committee. Other members: Leslie F. Muter, Muter Co.; Robert S. Alexander, Wells-Gardner; Sidney R. Curtis, Stromberg-Carlson; D. W. Gunn, Sylvania; Wm. J. Morlock, GE; A. D. Plamondon Jr., ex officio; James D. Secrest, secy.

RETMA Industrial Relations Conference for 1958 will be held Feb. 20-24 at Town and Country Hotel, San Diego, Cal., with Jack M. Ferren, Zenith industrial relations v.p. and director of RETMA industrial relations dept., chairman of executive committee.

Philco adv. director Max Enelow is profiled on "Newsmakers" page of July 26 *Printers' Ink*. His advertising objective, he says, "is to make every ad stand on its own feet and that, if individual ads are successful, the whole campaign will be successful."

Sylvania financial analyst Gordon K. Douglass has written new booklet, *Successful Financial Management*, for electronic parts distributors, copies available from Sylvania, 1740 Broadway, N. Y.

NARDA members are being questioned on salesmen's compensation and problems with faulty merchandise, findings to be available in about 3 weeks.

Canadian Admiral announces \$20 price hike on new 14 & 17-in. portables using 110-degree tube.

Trade Personals: Dr. Raymond L. Garman elected General Precision Labs chairman, continuing as technical director of research & development; James W. Murray elected pres. and chief exec. officer, continuing as gen. mgr. . . . George T. Stewart promoted to Sylvania radio-TV div. national sales mgr.; Peter J. Grant to mgr., marketing services; Harley T. Litteral to special accounts mgr. . . . Harold Dietz resigns as Emerson v.p. in charge of sales & marketing to become v.p. of Union Cycle Ltd., Brooklyn bike importer, whose pres. George J. Seedman also heads Times Square Stores (TV-appliance chain) . . . H. F. Bersche appointed mgr., merchandising of new distributor activity, RCA electron tube div.; G. C. Brewster named mgr., administration & controls; W. G. Kelly to mgr., distributor warehousing & traffic; D. M. Branigan continues as mgr., distributor sales; H. S. Stamm as mgr., adv. & sales promotion.

Obituary

James Leslie Finch, 64, RCA Communications asst. chief engineer, died July 22 at Nassau General Hospital, Mineola, L. I., after long illness. A graduate of U of Wash., he joined GE in 1915, was executive officer, U. S. Naval radio station, New Brunswick, N. J., during World War I, joined RCA in 1920. He held 64 patents in communications & electronics. His widow, son and daughter survive.

DISTRIBUTOR NOTES: Westinghouse Appliance Sales appoints C. H. Walroth, district mgr., Ray Maschmeier, district sales mgr., room air conditioners, TV and vacuum cleaners, at new Cincinnati office, 3011 Stanton Ave., for territory formerly covered by Cincinnati, Dayton, O. and Evansville, Ind. branch offices; WAS names R. W. Sanford district mgr., R. N. May, sales mgr., TV and room air conditioners, at new district office, 2515 Dean Ave., Des Moines, for Iowa, Neb., S. D., western Ill. . . . Motorola names Tim Alexander Denver area regional mgr., succeeding Robert Hennessey, appointed Seattle area regional mgr. who replaced Ted Morley, resigned; Pat Calobrisi succeeds Alexander as national service mgr.; Motorola also appoints Howard Gross Distributing Inc., 522 Light St., Baltimore (Howard Gross, pres.), replacing factory branch . . . Zenith appoints Robert C. Wallace gen. mgr., Zenith Radio Distributing Corp. . . . Majestic International appoints Milton Benjamin, ex-Sonora, eastern sales mgr., replacing George Curtis, resigned . . . Jos. M. Zamoiski Co., Washington (Zenith), adds RCA Whirlpool appliance line, replacing Southern Wholesalers Inc. which continues to handle RCA TV-radio-hi-fi & electronics line.

Motorola "Distributor of the Year" is Lofgren Distributing Co., Moline, Ill., receiving trophy from chairman Paul V. Galvin at last week's distributor meeting in Chicago. President's Cup in distributor sales contest went to V. N. Rooke, Porter-Burgess, Dallas, and Frank Dibert, Dibert Radio Co., Altoona, Pa.

Another bill to exempt all-channel sets from Federal excise tax (HR-8860) was introduced this week by Rep. Boland (D-Mass.). Similar measure was proposed last week (Vol. 13:29) by Rep. Ikard (D-Tex.).

Corning Glass reports net income of \$8,288,336 (\$1.22 per share) on first half sales of \$74,142,948 compared with \$9,354,654 (\$1.39) on \$77,675,755 in first 6 months of 1956.

Financial & Trade Notes: Sylvania earned \$4,788,669 (\$1.30 per share) on sales of \$162,520,532 in first 6 months vs. \$7,377,249 (\$2.04) on \$162,360,384 in first 1956 half, while second quarter net was \$1,718,725 (46¢) on \$74,970,858 vs. \$3,127,006 (86¢) on \$75,932,904 year ago. Dip was attributed by chairman-pres. Don Mitchell to "lower volume in some of our more profitable products, and unusually strong price competition in other areas." But he said June earnings exceeded those of combined previous 2 months, "reflecting a decided upturn in the TV industry." Mitchell also emphasized that output & factory unit sales of TV sets in first half "were far ahead of the 1956 comparable period"—largely because of demand for new "Slim Jim" 17-in. portables. And he saw "very encouraging" outlook for second half.

Proposed merger of A. Hollander & Son Inc. with Philips Electronics Inc. was approved this week by Hollander stockholders, now needs endorsement of Philips stockholders at July 31 meeting in Wilmington, Del. Philips Electronics is wholly-owned subsidiary of Philips Industries Inc., in turn owned by Hartford National Bank & Trust Co. as trustee for Philips Incandescent Lamp Works Ltd. of Holland. Merger calls for equal exchange of Hollanders' 243,921 shares of stock for Philips', with additional 652,951 shares being issued to Philips Industries in exchange for old Philips Electronics' stock.

General Transistor Corp. expects second quarter sales and earnings to double those of last year's second quarter, pres. Herman Fialkov told N. Y. Society of Security Analysts this week. Second quarter profits were estimated at \$77,000 (25¢ per share) on sales of \$730,000 compared with \$36,800 (12¢) on sales of \$210,277 in similar period last year. Fialkov predicted second half sales of \$2,150,000 vs. \$767,748 last year and that company should have about 7% of transistor market by end of year.

TV supplied some 20% of Columbia Pictures' gross for year ended June 30, July 22 *Wall St. Journal* reported in interview with v.p. A. Schneider. He was quoted as saying gross for fiscal year rose to at least \$100,000,000 from \$91,100,000 preceding year, with net income slightly lower than the \$2,669,712 of fiscal 1956. He said Screen Gems' gross totaled around \$20,000,000, nearly double the \$11,000,000 of preceding year.

Clevite Corp. describes first 6 months of 1957 as "one of best half-years in our history," reporting earnings of \$2,798,557 (\$1.48 per share) on sales of \$39,684,682 compared with \$1,556,087 (79¢) on sales of \$36,528,043 in first 6 months of 1956. Company expects some drop in second half earnings, but "results for the year as a whole should be good."

Philco earned \$1,613,000 (37¢ per share on 3,828,663 shares outstanding) on sales of \$182,651,000 in first 6 months of year compared with \$831,000 (17¢) on sales of \$166,862,000 in corresponding period last year. Second quarter income was \$506,000 (11¢) on \$83,388,000 sales vs. net loss of \$686,000 on \$74,386,000 in second quarter 1956.

Hazeltine Corp. reports net income of \$893,000 on sales of \$25,696,000 for first 6 months, compared with \$918,000 on \$18,624,000 for similar 1956 period.

Packard-Bell reports earnings of \$463,120 (67¢) for 9 months ending June 30 compared with \$487,847 (71¢) for similar period year ago.

WJR, The Goodwill Station Inc. reports net profit of \$238,766 (44¢ per share) for first 6 months compared with \$269,047 (49¢) for similar 1956 period.

American Broadcasting-Paramount Theatres earned \$957,000 (21¢ per share) in second quarter compared with \$1,632,000 (37¢) year ago, while operating profit for 6 months was down to \$2,700,000 (61¢) from \$4,202,000 (97¢) in corresponding 1956 period. Declines were shown in both broadcasting & theatre divs., pres. Leonard H. Goldenson reporting "seasonal downturn in theatre business in the second quarter [was] somewhat sharper this year than in the past." But he foresaw "good results" for third quarter—"the best theatre period"—and looked to 1957-58 ABC-TV programming to strengthen network's competitive position, reinforced by major market affiliations of WPST-TV, Miami; WHDH-TV, Boston; KETV, Omaha; WAVY-TV, Norfolk.

DuMont Bestg. Corp. showed net income of \$65,234 in 26 weeks ended June 29, including earnings since June 1 from newly-acquired radio WNEW, N. Y. (Vol. 13:20), compared with net loss of \$330,164 in corresponding period last year. WNEW earned \$576,500, of which \$294,166 was set aside for federal & state income taxes, from start of its fiscal year last Nov. 1, 1956 to May 31. DuMont's profit figure contained no income tax provision because of a tax-loss carry-forward.

Stanley Warner Corp., whose operations include movie theatre chain, Cinerama, International Latex Corp., WTRI, Albany (Ch. 35), earned \$691,800 (32¢ per share on 2,153,099 shares outstanding) on revenue of \$28,129,336 in 13 weeks ended May 25 vs. \$400,100 (18¢ on 2,166,800) on \$23,399,952 in corresponding 1956 period. For 39 weeks net profit was \$2,699,591 (\$1.25) on \$83,699,260 compared with \$2,029,190 (94¢) on \$70,758,135 (94¢) year earlier.

Tung-Sol placed new \$5,000,000 issue of 100,000 shares of 5% cumulative preferred stock (Vol. 13:27) on market July 24 at \$50 par. New stock is convertible into common before Aug. 1, 1967 at \$35.09 principal amount of preferred per common share, subject to redemption at \$52.50 per share to Aug. 2, 1959, declining to \$50 par after Aug. 2, 1967. Issue was oversubscribed and books closed within day.

Dividends: Hazeltine, 35¢ payable Sept. 1 to stockholders of record Aug. 1; Storer, 45¢ plus 6¢ on Class "B" Sept. 14 to holders Aug. 30; Consolidated Electrodynamics, \$1 Sept. 13 to holders Aug. 28; P. R. Mallory, 35¢ Sept. 10 to holders Aug. 9; WJR, The Goodwill Station, 10¢ Aug. 30 to holders Aug. 15; Stanley Warner, 25¢ Aug. 26 to holders Aug. 5.

Oak Mfg. Co. earned \$498,200 (76¢ per share) on first half sales of \$10,794,000 compared with \$1,005,396 (\$1.53) on \$12,851,976 in first 6 months of 1956. Second quarter profits were \$359,999 (55¢), first quarter \$138,201 (21¢). Pres. Robert A. O'Reilly said factory employment at end of June was up 10% over a year ago.

Reeves Soundcraft Corp. reports \$349,245 gross profits on first half sales of \$2,440,553, compared with \$40,716 on \$1,667,921 for comparable period last year. Exec. v.p. Frank B. Rogers predicts sales will continue at high level for balance of year, says company will increase ad-promotion budget in fall.

National Telefilm Assoc. reports net income of \$818,593 (\$1.23 per share) on sales of \$7,680,764 in 9 months ended April 30 compared with \$191,397 (29¢) on \$2,259,013 year earlier.

P. R. Mallory reports \$1,586,437 (\$1.20 per share) on first half sales of \$38,690,166 compared with \$1,155,417 (80¢) on sales of \$32,662,728 in similar 1956 period.

IMPORTANT TEST of state's right to regulate community antenna systems as public utilities comes up next month in Wyoming—only state currently regulating them. State Public Service Commission this week ordered 14 of Wyoming's 17 CATV systems to show cause why they shouldn't comply with its regulations on filing rate schedules, annual reports, etc. The CATV systems, which had been awaiting test for nearly 3 years, are expected to argue that they are not common carriers or public utilities and therefore aren't subject to regulation. Case is expected to end up in courts.

National Community TV Assn. is particularly interested in this case because of the clear-cut test it represents. NCTA attorney E. Stratford Smith will represent the Wyoming operators. In previous similar cases, Cal. supreme court ruled CATV systems aren't subject to public utility regulation, as did Utah and Wisconsin public service commissions.

Unusual "scrambled TV" experiment by U of Kansas City and Pfizer Labs (drugs), using facilities of Kansas City's KMBC-TV, was authorized by FCC this week. University plans 4-day TV lecture series on acute coronary occlusion for physicians, who will watch in their homes, offices and medical buildings. Pictures will be "coded" so that they cannot be viewed by unauthorized persons, and sound will be carried by telephone wire to the 100 or so locations where decoding sets will be installed. Scrambling and unscrambling equipment will be supplied by Brach Electronics div. of General Bronze Corp. and won't be of the subscription-TV type, since security is not important. Picture will merely be out-of-sync negative image, easily unscrambled. KMBC-TV's facilities will be used before start of regular broadcast day, 8-9 a.m. Sept. 17-20. According to applicants, purpose of experiment is to explore value of setting up special closed-circuit medical hookup to doctors' homes and offices; they indicated they have no particular interest in a regular scrambled on-air service. Comrs. Bartley & Mack dissented from the experimental grant—the former feeling that TV frequencies shouldn't be used for closed-circuit or common carrier purposes.

Four applications for new TV stations were filed this week with FCC, bringing total pending to 125 (36 uhf). Week's applications were: (1) For St. Petersburg, Fla., Ch. 10, by Nelson Poynter, publisher of *St. Petersburg Times*, with Mrs. Poynter (channel is also sought by St. Petersburg uhf WSUN-TV); (2) for Vail Mills, N. Y., Ch. 10, by WVET-TV, Rochester; (3) for Delano, Cal., Ch. 37, by H. Leslie Hoffman, pres. of Hoffman Electronics who is selling Stockton's KOVR, and Terry Lee, mgr. of KOVR; (4) for Albuquerque, N. M., Ch. 5 (educational), by U of N. M. & Albuquerque Board of Education. No translator applications were filed this week. [For details, see *TV Addenda 24-CC* herewith.]

Signs of the British TV times: Associated British Picture Corp., in financial report for year ended March 31, stated that its commercial TV subsidiary ABC-Television (week end program contractors for Birmingham, Manchester & Yorkshire stations) showed "satisfactory profit." In company's principal business—theatres—report said earnings have been maintained only by increased admission charges.

Entries for "Golden Mike" awards by *McCall's* for "distinguished public service" by women in TV & radio since last Oct. close midnight Oct. 14.

NARTB survey shows typical TV station had \$146,400 profit before U. S. income taxes last year, based on revenues of \$920,700 and expenses of \$774,300. Of 391 stations queried, 218 returned usable questionnaires in which typical broadcaster predicted his total 1957 revenue would increase 4.5%, expenses go up 2.2%. Revenue dollar breakdown: 47¢ from national & regional advertisers, 30¢ local, 23¢ network. Expense dollar: 37¢ for programming, 33¢ general & administrative, 18¢ technical, 12¢ selling. Direct ratio was noted between size of market and station's income-cost-profit position: typical station in market over a million had revenue of slightly over \$3,000,000; in less than 25,000 market, gross was \$331,000. Survey also showed revenue from networks increased proportionately in larger markets; revenue from local advertisers was higher in smaller markets. NARTB says typical station revenue was \$700,000 in 1955, \$920,000 in 1956; estimated \$960,000 this year; expenses were \$650,000, \$775,000 and \$790,000 respectively. Survey is being sent to NARTB members and similar study is being mailed to radio members.

Quoteworthy quote: "We are told daily that the written word is threatened by TV. I, for one, do not believe this. TV is a superb means of communication and, like sex, it is here to stay. We had better adjust ourselves to it, remembering that the turning of the dial is only one more exercise of that selective taste that we employ in reading . . . I feel this—and I feel it passionately: People who deny themselves TV deny themselves participation in life today. They are horse-&-buggy; they are atrophied; they are self-exiled from the world. They suffer from the most painful illiteracy, which is that of the literate. In terms of reporting conversation, ideas or drama, TV can do something that no other medium has done. And for the viewer, the responsibility of self-editing, of selection, is the same as in choosing a book, a play or a motion picture. It becomes an exercise of will; a demonstration of taste."—**John Mason Brown**, author, critic, lecturer & TV panelist, quoted in July 21 *N. Y. Times*.

Stepped-up NBC-TV color schedule for 1957-58 season, 67% more than year earlier, was announced July 22 by NBC pres. Robert W. Sarnoff. Built around key-position nighttime programs, 250 hours of color in fourth quarter will include 24 specials, *Steve Allen Show* (Sun. 8-9 p.m.), *Chevy Show* (Sun. 9-10 p.m.), *Show of Eddie Fisher & Show of George Gobel* (alt. Tue. 8-9 p.m.), *Kraft TV Theatre* (Wed., 9-10 p.m.), *Lever Variety Show* (Thurs. 10-10:30 p.m.), *Perry Como Show* (Sat. 8-9 p.m.). Daytime color will include *World Series*, *Club 60* (Mon.-thru-Fri. 1:30-2:30 p.m.), *Matinee Theatre* (Tue.-thru-Fri. 3-4 p.m.).

"Wireless" drive-in movies will be inaugurated in new Dover, N. J., open-air theatre, scheduled to be opened by Walter Reade theatre chain next Sept. New transistorized wireless speakers, to be marketed by Vido Sound Corp., cost \$25 each, are said to save average drive-in \$50,000-\$80,000 in initial wiring costs. Oscillator-transmitter which puts movies' soundtrack "on the air" is classified as limited radiation device, doesn't require FCC approval.

Singapore's first TV station should be financed by Govt. and operated by publicly owned corporation rather than private enterprise, govt.-appointed TV survey committee has recommended.

Colorado color set sales were 408 in first 6 months, compared with 751 in all 1956, 252 in 1955, according to Rocky Mountain Electrical League.

SUMMARY-INDEX OF THE WEEK'S NEWS — August 3, 1957

LOW-POWERED TV REPEATERS, vhf or uhf, co-channel or off-channel, proposed by FCC in attempt to resolve unlicensed-booster stalemate (p. 1).

COMMUNITY ANTENNA SYSTEMS keep growing, but at slower rate; new Factbook figures show 610 operating now vs. 572 six months ago, 480 year ago (p. 2).

NETWORK CIRCUIT JAM enters crucial period, as networks and other users submit Fall requirements; answer on circuit-rationing due in month (p. 2).

FTC CITES HELENE CURTIS for "false" TV commercial in TV-radio monitoring drive on toiletry claims; company says shampoo ad has "sound basis" (p. 3).

SUBSCRIPTION-TV TEST decision deferred by FCC, which schedules special meeting on issue Sept. 17. AFTRA asks Congress to take over (p. 4).

WIRED PAY-TV FEVER spreads, station owner seeking Los Angeles franchise. "Interested in baseball, not TV," says San Francisco Mayor Christopher (p. 4).

100 TV "SPECIALS" planned by NBC-TV for next season, Sarnoff announces, answering critics of "dull schedule." Nighttime near-sellout claimed (p. 7).

ACCEPTANCE OF NEW TV lines by dealers and public reported by manufacturers; inventories in good shape. Close watch kept for break in prices (p. 9).

NARDA DEALERS hear new Philco plan to sell & finance TV sets to hotels-motels; Westinghouse spokesman criticizes long appliance warranties (p. 10).

LIST OF TOP 500 COMPANIES in U. S. industry includes 31 in electronics, each with 1956 sales of more than \$61,000,000. Summary table (p. 13).

ALL-VHF ALBANY AREA tentatively approved by FCC in busy pre-vacation week which sees big allocations mop-up, 7 new TV station grants (p. 8).

MIAMI'S WPST-TV, owned by National Airlines, makes debut as 504th U. S. TV outlet. Reports on plans of other TV station grantees (p. 11).

INTERSTATE TV SCHOOL network is proposed by Southern Regional Education Board in \$22,500,000 project; microwave needs outlined to FCC (p. 14).

NETWORK TV BILLINGS rise 6.9% in first half to \$250,657,209 vs. \$234,510,312 year ago; CBS leads cumulative increase with 9.6% (p. 14).

FCC PROPOSES VHF BOOSTERS IN SURPRISE MOVE: Just one month after rejecting idea of vhf boosters (Vol. 13:26), FCC turned around this week and asked for comments on proposal to set up "low power repeater stations" operating on vhf or uhf, on channel of mother station or on different channel.

Unexpected move was seen as attempt to end dispute over unauthorized vhf boosters operating in northwest, and was direct outgrowth of July 12 conference between Chairman Doerfer and Colo. Gov. McNichols, who has been encouraging unlicensed booster operators to defy FCC (Vol. 13:28).

Commission announced it was considering McNichols' plea as a petition for reconsideration, and was granting it. FCC cited arguments that uhf translators weren't satisfactory for rugged terrain, that vhf booster supporters should be given chance to prove they can meet engineering standards for a non-interfering service.

Implicit in Commission's notice was put-up-or-shut-up tone toward the 200-plus unlicensed vhf booster operators, directing that comments be addressed specifically to proving engineering feasibility. Rule-making was proposed by a 3-man Commission majority—Doerfer, Mack & Craven—Hyde & Bartley dissenting without written statements, Lee not participating.

Highlights of the Commission's proposed new "low power TV broadcast repeater station" service: Repeaters would be licensed on non-interference basis, with their power limited to 1 watt input to final

radio frequency amplifier—which could yield possibly 2-3 watts ERP (Commission considers this about equivalent of uhf translators' 10 watts).

Remote control operation would be permitted, with first or second-class operator in constant attendance at remote point—or upon "showing of need," automatic operation would be authorized.

Ownership requirements would be similar to those for translators; they would be licensed to anybody "qualified"—station owners, civic groups, etc.—with no limit on the number owned by single licensee in specific area or anywhere else. Repeaters would not be permitted to originate programs.

Comments on proposal (Doc. 12116) are due Oct. 1, counter-comments Oct. 31.

Deadline passed this week for comments on Commission's proposal to permit uhf station operators to set up on-channel boosters to fill holes in their coverage areas—with some 13 comments filed, all favorable (see p. 8). Reflecting more liberal attitude toward repeaters of all kinds, Commission this week killed its own proposal to authorize translators only where regular stations aren't operating and to put translators off air when regular station goes on air.

"Problem of translators operating in competition with regularly assigned TV stations is a complex one" which should be considered on case-to-case basis, said Commission.

CATV SPREAD SLOWS, BUT SYSTEMS KEEP LIVELY: Growth rate of community antenna systems in U. S. & Canada has slowed down, but expansion of this area of TV business still is steady, according to statistical evidence we've gathered from operators & manufacturers for our upcoming Fall-Winter TV Factbook, due off press next week end.

Semi-annual stocktaking of CATV systems shows that 130 have been added since we counted 480 year ago (Vol. 12:28) but number of starters in past 6 months, after Canada came in with rush (Vol. 13:5), is only 38. Nevertheless, total number of homes reached has grown in half-year by nearly 51,000.

Here are some Factbook-derived figures on current CATV status:

- (1) Systems in operation—610 (Canada 89, Alaska 1) vs. 572 in spring.
- (2) Average number of subscribers—681 vs. 866.
- (3) Average potential subscribers, estimated by operators—1600.
- (4) Total homes reached by those supplying figures—415,776 vs. 364,915.
- (5) Total potential, according to operators' estimates—843,350.

Number of current subscribers varies wildly from system to system, ranging from 14,250 in Mahanoy City, Pa. to 3 reported by Deep River TV Enterprises Ltd., Ottawa. Among systems, 126 have 1000 or more subscribers.

Pennsylvania continues to be No. 1 CATV state, followed by Oregon, West Virginia, Washington, California in that order of number of operating systems.

Community antenna directory in new Factbook is completely revised and updated, listing every system known to be in operation. All information is checked directly with system operators, and each listing contains address, key personnel, number of subscribers, estimated potential, starting date, make of equipment and call letters of stations received.

CRUCIAL PERIOD IN NETWORK CIRCUIT JAM: Whether major intercity microwave-cable routes will have to be allocated among network users this fall is now being determined by AT&T—but definitive answers probably won't be available for month or so.

Deadline for submission of requirements passed this week—and though nobody at AT&T will talk about it, there's no reason to believe that demands have tapered off since last June, when it appeared that some network schedules might have to be rejiggered in order to meet demands for use of some important routes (Vol. 13:23-24).

Among reasons for unprecedented demand for intercity hookups are expansion of ABC-TV pro-

gramming, enlarged schedule planned by Sports Network Inc. (which handles live telecasts of sports for stations and regional networks), plans of Pat Weaver's live Program Service network and other prospective entrants into limited live networking, closed-circuit business meetings, etc.

Officially, AT&T was guardedly hopeful this week. While conceding that demands are quite a bit heavier than last year, a spokesman pointed out that new facilities are constantly being added and that prospective microwave-cable users often ask at first for more than they can use, cutting down demands later when schedules firm up.

AT&T's next step will be to analyze all requests for intercity circuits, the spokesman explained, matching them against facilities now available and new facilities scheduled for completion during the coming season. Analysis should take about 2 weeks.

Upon completion of analysis, phone company's long lines officials will hold conferences with each of the prospective users to ascertain minimum firm requirements, squeeze any water out of earlier requests, etc. If allocations of any circuits are required, AT&T sits down again with all users and works out formula.

ANOTHER TV COMMERCIAL was hit this week by FTC in stepped-up monitoring campaign against fraudulent advertising on air. Helene Curtis Industries Inc., 4401 W. North Ave., Chicago, was accused of "false & misleading" TV words & pictures in promoting Enden Shampoo as dandruff cure.

In complaint released July 29, FTC said Helene Curtis violated Federal Trade Commission Act in "typical TV commercial" which showed man "smiling happily" after using Enden Shampoo while announcer says: "I say . . . if you've got dandruff problems, Enden is sure the easiest way to stop them . . . for good."

Truth is, according to FTC, that Curtis product will not "end itching, flaking & scaling," as advertised, that it "will not cure dandruff or have any other lasting effect because the condition will return if the regular use of the product is discontinued."

Prompt rebuttal to FTC came from George Factor, Helene Curtis v.p. in charge of toiletries div., who said "clinical data, research and experimentation relating to our product have provided us with a sound basis for the claims we are making." FTC gave company 30 days to file formal answer to complaint, set hearing for Oct. 14 in Washington.

Curtis TV case was second involving toiletry commercials, first having been charge against Lanolin Plus Inc. that it misrepresented its Lanolin Plus shampoo (Vol. 13:29). It was 6th complaint by FTC since special TV-radio unit started viewing & recording commercials last Oct. FTC investigators are known to regard general cosmetics field as fertile one for additional TV complaints.

Advertiser's reply to earlier FTC complaint in TV campaign was filed July 31 by Whitehall Pharmacal Co., 22 E. 40th St., N. Y., cited in March for commercials promoting arthritis treatment (Vol. 13:13). Whitehall said its ads for InfraRub & Heet were "neither false nor misleading in any respect." Company also said FTC—as "matter of simple fairness"—should hold up complaint "pending proceedings by the Commission against all leading competitive products."

Praise for advertisers & media came meanwhile from FTC Comr. Robert T. Secrest. He told Assn. of Broadcasting Executives of Texas in Dallas Aug. 1 that vast majority of people with products or services to sell adver-

tise them honestly, that TV, radio & press deserve commendation for their efforts to control advertising content and maintain own standards.

Secrest singled out TV & radio networks and NARTB as examples of self-policing by media. Coincidentally, July *Code Bulletin* distributed to members by NARTB reported TV Code Review Board chairman Wm. B. Quarton had written personal letters to all code subscribers urging support of its recommendations against "advertising of intimately personal products which are generally regarded as unsuitable conversational topics in mixed social groups." Code's "not acceptable" category includes "products for the treatment of hemorrhoids and for use in connection with feminine hygiene."

* * * *

Iran is due to get commercial TV next March, with RCA transmitter now awaiting shipment from New York. Project's backer is Iranian businessman Habib Sabet, Iranian agent for RCA (who also represents Pepsi-Cola, General Tires & Studebaker-Packard) who is investing some \$500,000 in station. Station operation will be shared by his son Iradj, who developed interest in commercial TV while attending Harvard School of Business Administration. An American—A. Vance Hallack, formerly of NBC—is due to be retained by Sabet to assist in starting the station and training Iranian personnel. He currently is organizing programs and training personnel at TV outlet in Baghdad, Iraq, under U. S. Govt. foreign aid program (Vol. 12:18). Iran station will use U. S. standards.

Reciprocal TV-radio trade between U. S. & Soviet Union, as proposed here following CBS-TV interview with Communist boss Nikita Khrushchev (Vol. 13:26), isn't likely soon. Kremlin has given qualified "nyet" to program-exchange plan advanced by State Dept., arguing in note released July 27 and repeated by Radio Moscow this week that U. S. is "hampering" cultural & economic contacts too much to make trade feasible now. Russians said all barriers should be lifted before any TV-radio plan is negotiated. "It is to be hoped," Radio Moscow added, "that such an exchange can be arranged." In Washington State Dept. said it was "gratified" that Kremlin "is prepared to discuss" proposals.

Sweden's TV set total of 50,000 will increase to 900,000 by 1965, according to recently completed economic survey quoted by American-Swedish News Exchange. The country now has 4 TV stations, plans 10 more by 1962.

WIRED PAY-TV picture in far west took on aspects of a free-for-all this week with still more applicants for franchises—including one tele-caster and one former TV station owner. Meanwhile, San Francisco Mayor George Christopher told us that his only interest in pay TV lies in getting major league baseball to his city and that Skiatron has “priority” because “they seem to have a contract with major league baseball teams.”

Actually, he told us, neither Skiatron nor International Telemeter-Fox West Coast Theatres has formally filled out the papers needed to file for non-exclusive toll-TV franchise. After this is done, he said, it will take 2-3 months for city to process and grant franchise “if there are no undue delays.” He said he was “not familiar with the operational methods” of either Skiatron or Telemeter, that city officials have met with Skiatron—but not Telemeter—officials.

He said he talked with telephone company officials about month ago and “they were dubious about the whole thing—it’s new to them, too.” He added: “Our interest is not in TV; it’s exclusively in getting major league baseball out here.”

Third application for non-exclusive fee-TV franchise was filed in Los Angeles—this one by Harriscope Inc., Beverly Hills TV film & motion picture producer which operates KTWO-TV, Casper, Wyo. (Ch. 2) and has CP for Ch. 9 Sheridan, Wyo. satellite KTWX. Harriscope also has filed for 6 Los Angeles suburbs, claims to have petitioned for pay-TV rights in Caracas, Venezuela and 4 other foreign countries.

In Denver, meanwhile, Gene O’Fallon, former owner of KFEL-TV (now KTVR) there, applied to Denver city council for non-exclusive 21-year franchise. Skiatron announced it has filed applications in Oakland, Berkeley, San Mateo and 16 other San Francisco Bay area communities. An outfit called Tele Movie Development Co., whose principals—except for attorney Harrison W. Hertzberg—have been kept secret, has been going up and down the coast, claims to be negotiating in 30 cities. And real estate developer Louis Boyar has asked city of Lakeland, Cal.—near Los Angeles—for exclusive franchise there.

USIA budget economies, already scheduled to slice VOA’s TV operations 76% (Vol. 13:30), will reduce effectiveness of Radio in the American Sector of Berlin (RIAS) by 18%, according to director Laurence Dalcher of station which beams programs to Communist East Germany. Fiscal budget for RIAS is \$2,925,000, only \$8000 less than last year, but Dalcher is cutting range, staff & programs in line with general money-saving directives by USIA director Arthur Larson.

“Ground-air road show,” featuring demonstrations of GPL airborne closed-circuit TV equipment in action, will be held in 5 cities next fall by M. P. Odell Co., midwestern engineering representatives for electronic instrumentation. Demonstrating all GPL closed-circuit equipment, public showings will be held Oct. 21-Nov. 7 in Cincinnati, Dayton, Cleveland, Detroit & Pittsburgh.

SUBSCRIPTION-TV test decision was deferred by FCC this week at least until Sept. 17, when Commission plans full-day meeting on issue. On Aug. 1, last meeting day before month vacation, FCC grappled with comments on proposed trial, reached obvious conclusion that decision couldn’t be reached on regular meeting day—particularly in view of overloaded agenda.

Anxious to avoid appearance of stalling on issue, Commission picked first “open” day to hold its special meeting. Decision could possibly be made on that date, but it wouldn’t be surprising if further special meetings were scheduled.

Meanwhile, pro & con pulling-&-hauling on broadcast pay TV continued. AFTRA’s San Francisco convention unanimously voted to urge Congress to take entire issue out of FCC’s hands. Resolution actually was compromise between anti & pro factions, both of which had submitted proposed resolutions. AFTRA officials described final resolution as expressing union’s determination not to let any single govt. agency have power to authorize and regulate pay TV, but rather that Congress conduct thorough inquiry and set up own rules if it decides to approve the service.

Rep. Chelf (D-Ky.), who 2 weeks ago demanded trial of fee TV in letter to FCC Chairman Doerfer (Vol. 13:29), reiterated his position in speech on floor of House this week and took occasion to apologize to Rep. Celler, who he said had accused him of making a “personal attack.” Chelf assured his Judiciary Committee colleague—an outspoken foe of fee TV—that this was not his intention.

New York City Council pres. Abe Stark—inveterate opponent of subscription TV—threatened this week to start court proceedings to block any pay-TV authorization. Nobody but Congress has right to authorize pay TV, he said.

Irish got into act, too, when House Rules Committee opened TV-radio “censorship” hearings Aug. 1 on demands by Southern Democrats that networks & stations be investigated for deleting such words as “darker” from folk songs to avoid offense to Negroes (Vol. 13:30). Rep. Chelf (D-Ky.) suggested things might get to point where broadcasters substitute “Who Threw the Overalls in Mrs. Murphy’s Chowder?” for “My Old Kentucky Home.” Rep. O’Neill (D-Mass.) objected heatedly that chowder ditty is “very insulting song to the Irish race.” Committee took no action. FCC Chairman Doerfer meanwhile wrote protesting congressmen that Commission took neutral position in controversy, which arose suddenly while Senate debated civil rights bill. He pointed out broadcasters “possess a wide range of discretion and freedom” in programming. “I guess no one is taking it very seriously,” NBC continuity chief Carl Watson commented next day, reporting network had received only 8 letters on issue. Networks have been editing racial “slurs” from song lyrics for more than 20 years.

Senate confirmation of Frederick Ford as FCC commissioner (Vol. 13:29) was delayed this week by debate on civil rights bill. Attempt by Majority Leader Johnson (D-Tex.) to proceed with executive business, including nominations, was blocked on floor by objection by Sen. Morse (D-Ore.). Action on Ford is likely next week.

Personal Notes: John I. Edwards named mgr. of KMJ-TV, Fresno, Cal. succeeding Perry Nelson, resigned to enter industrial real estate in Fla. . . . Edward J. Roth Jr., ex-WNDU-TV, South Bend, named program mgr. of WGN-TV, Chicago . . . Smith Binning, ex-Newhouse Newspapers, joins WCAU-TV, Philadelphia, as sales development director . . . Robert E. Newsham, ex-WFIL-TV & WFIL, Philadelphia, named asst. sales mgr. of KYW-TV, Cleveland . . . James L. Barker, ex-KOLN-TV, Lincoln, named promotion & publicity mgr. of KBTB, Denver . . . Frank Boehm promoted to v.p. of rep Adam Young in charge of TV-radio promotion & sales service, N. Y.; James F. O'Grady to v.p. in charge of midwest sales, Chicago . . . Ralph B. Hunter, ex-Katz TV sales exec. and onetime program mgr. of WWJ-TV, Detroit, named north-eastern rep for broker Paul H. Chapman Co. headquartering at 17 E. 48th St., N. Y. (Eldorado 5-6657) . . . Charles Mathis Jr. named chief engineer of KCMC-TV, Texarkana, succeeding Wm. R. Atkinson, now with Gates Radio, Quincy, Ill. . . . Maurice R. Labelle, ex-Mandell-Newman Assoc., Miami Beach, named public service director of WTVJ, Miami . . . James M. Freeman, asst. v.p., Michigan Bell Telephone Co., formerly AT&T Washington news service mgr., named AT&T asst. v.p. for public relations, headquartering in N. Y. . . . Stan Cohen, ex-Ziv, joins WDSU-TV & WDSU, New Orleans, to head expanded research, sales promotion & merchandising operations . . . Mortimer Wormser named v.p. of Columbia Pictures; Bernard Birnbaum asst. treas. . . . Berne Tabakin named v.p. of NTA in charge of west coast div.; Harold Kovner & Joseph H. Moskowitz named directors of NTA Film Network . . . Joseph M. Sitrick, NARTB mgr. of special projects and member participation, resigning to assume duties Aug. 26 as legislative asst. to FCC chairman John C. Doerfer . . . Edward King, ex-NBC, joins Metropolitan Educational TV Assn., N. Y., as staff director . . . Troy Crowder promoted to asst. to pres. H. K. Newburn of Educational TV & Radio Center, Ann Arbor . . . Bob Hanna, ex-WGBS-TV, Miami, named commercial mgr. of upcoming WPST-TV there (Ch. 10), due on air this week . . . Edward L. Smith named gen. sales mgr. of KOVR, Stockton, Cal.; George Ledell, from rep Petry's Los Angeles office, replaces him as TV mgr. of Petry San Francisco office . . . Eldred J. Robinson, ex-v.p. & advertising director of *Green Bay (Wis.) Press-Gazette*, named sales mgr. of WMBV-TV, Marinette-Green Bay . . . Jack Highberger, ex-promotion mgr. of KARD-TV, Wichita, Aug. 5 becomes promotion & publicity director of upcoming WLWI, Indianapolis (Ch. 13) due in Sept. . . . James A. Dearborn elected a v.p. of

Kenyon & Eckhardt . . . Gerald T. Arthur elected a v.p. of Fuller & Smith & Ross . . . Ralph Maitland, ex-Wilding Picture Productions, named mgr. of new midwest div. of Transfilm, headquartering at Carlton House, Pittsburgh . . . Joseph P. Dougherty, ex-KYW-TV, Cleveland, named sales mgr. of WAAM, Baltimore, which becomes WJZ-TV under Westinghouse ownership in Sept. . . . Seymour Reed, Official Films treas., also named exec. v.p.; Grace Sullivan promoted to secy.; Wells Bruen appointed head of new station sales div.; Ray Junkin, head of new agency-sponsor div. . . . Robert A. Dettman v.p. & 10% owner, named exec. v.p. of KDAL-TV, Duluth . . . Roy Meachum, ex-*Washington Post*, named public relations, promotion & adv. mgr. of WBAL-TV & WBAL, Baltimore . . . Augie Cavallaro, ex-DuMont Broadcasting, joins radio WKIT, Mineola, N. Y., as v.p. & gen. mgr. . . . Dr. Keith M. Engar, associate professor of speech & theatre arts at U of Utah, named program director of school's upcoming educational KUED . . . Reed M. Roberts Jr., ex-Cresap, McCormick & Paget, N. Y. management consulting firm, named budget services director of CBS Inc.

Obituary

Rev. B. Bryan Musselman, 66, principal owner, pres. & gen. mgr. of radio WSAN, Allentown, Pa., and pioneer in religious broadcasting, died July 27 in Allentown Hospital. He began broadcasting in 1923 when he was pastor of Bethel Mennonite Brethren in Christ Church, Allentown, and for 34 years had early morning religious program on air. He assumed control of station in 1950. Surviving are widow, son, daughter.

Lawrence K. Elliott, 56, White House radio announcer for CBS in 1932-36, later an announcer on Fred Allen, Andre Kostelanetz & Bob Hawk shows in N. Y., died July 27 of a heart attack in home at Port Chester, N. Y. He was "Voice of the Treasury" in World War II defense bond campaign, more recently was TV script writer & actor. Surviving are widow, son, daughter, 2 sisters, 4 brothers.

Rubey Cowan, 66, Hollywood songwriter, agent, producer & TV promoter, died July 28 in Cedars of Lebanon Hospital, Los Angeles, following brain hemorrhage. He was charter ASCAP member, headed NBC Artists' Bureau in early 1930's, later ran own talent agency. Surviving are widow, 2 sons.

Wm. J. O'Connor, 68, former asst. v.p. of AT&T for public relations who was asst. to pres. Walter S. Gifford when he retired in 1950, died July 26 in Lewisboro, N. Y. home after brief illness.

AFTRA elects Clayton (Bud) Collyer pres., succeeding Frank Nelson. Stan Farrar is new recording secy.; Travis Johnson, treas. Elected v.p.'s were Ken Carpenter, Eleanor Engle, Virginia Payne, Wanda Ramey, Evelyn Freyman, Don Courtney, Gay Batson.

To aid "sick" movie theatre industry, N. Y. Mayor Wagner's administration this week proposed exemption from city's 5% amusement tax of all motion-picture admissions up to 90¢.

Quinn O'Connell, who has been law clerk to Judge John A. Danaher of D. C. Circuit Court of Appeals, joins Washington law firm of Weaver & Glassie.

Iowa Broadcasters Assn. elects Ken Gordon, KBTB, Dubuque, pres.; George Volger, KWPC, Muscatine, as v.p.; Bill White, KFJB, Marshalltown, secy.-treas.

Public relations merger: Rogers & Cowan and Arthur P. Jacobs Inc. form Rogers, Cowan & Jacobs, headed by Henry C. Rogers as pres.

Highest circulation in 28-year history is claimed by Hugo Gernsback's *Radio-Electronics* magazine for first half of 1957. Monthly publication states its average net paid circulation for period was 195,586, with advertising contracts for first 8 months of year topping all comparable periods.

Advertising rates of *Life* go up 4% effective with Feb. 3, 1958 issue, circulation base remaining at 6,000,000. Newsstand price increases to 25¢ from 20¢ at same time. In new schedule black-&-white page costs \$26,275 vs. \$25,275 now; 4-color page, \$39,500 vs. \$37,975.

By-product of TV's success: Full page ad in Aug. 1 N. Y. Times by TV Guide reports circulation up 30%, ad revenue increased 89% in first 6 months of 1957. Magazine plans to expand from 44 to 49 regional editions by year's end, raises circulation guarantee to 5,300,000 in Oct.

Blair TV & John Blair & Co. moved Boston offices this week to 188 Newbury St.

Telecasting Notes: "Show biz's fabulous upstart"—TV film syndication—gets its measurements taken in big 61-page "TV Film Annual" section of July 31 *Variety*. These are some vital statistics of the burgeoning syndication industry reported in special section: There are some 271 series in syndication, costing some \$239,832,200, being peddled by 40 companies; some \$151,505,200 worth of these programs were made specifically for first-run sale in syndication, with \$88,327,000 representing cost of 55 half-hour series that appeared first on networks . . . Largest controller of syndication product, *Variety* figures, is MCA-TV, which has 23 series worth \$33,272,600 in production costs; Ziv is second, with 20 worth \$25,806,500; CBS-TV Film Sales is close third, with 22 at \$20,563,500 . . . Big spot deal for *Annie Oakley*: CBS-TV Film Sales sells alt. sponsorship of film for \$2,340,000 to Corn Products (Bosco) for 52 weeks in 62 markets, starting in Oct., sharing show with Continental Baking . . . Official Films has signed stations—rather than regional or local advertisers—for \$1,350,000 sales of *Decoy*, *Sword of Freedom* & *The Big Story* in past month, indicating strength of stations in first-run TV syndication market . . . Heavy "special" schedule on networks next season is easy to understand, according to July 31 *Variety*: Nielsen ratings for 60-min. & 90-min. shows last season. McCann-Erickson figures that 57 "spectaculars" shown by networks last Sept. through June averaged 34.9 rating vs. 23.1 for 30-min. programs . . . Most widely ballyhooed spectacular since "Peter Pan," NBC-TV's Mary Martin-John Raitt version of "Annie Get Your Gun," should be a highly polished production by Nov. 27 when

the 2-hour musical hits TV screens. Show is scheduled for 5-week theatrical run in San Francisco beginning Aug. 25, will move to Los Angeles Oct. 7 for 5-week stand there before one-shot telecast . . . Labor racket hearings by McClellan Committee of Senate got 5-station live TV coverage this week. Little network was formed by WVUE, Wilmington; WGLV, Easton and WATR-TV, Waterbury, carrying coverage supplied by DuMont's WTTG, Washington, and WABD, N. Y. . . . Dr. Frank Baxter, TV award-winning educator, is closing deal with AT&T to be host for filmed *Telephone Time* anthology series on ABC-TV, replacing John Nesbitt . . . Book promotion by TV is sales gimmick of McDowell, Obolensky Inc., new N. Y. publishing firm which is bringing out *This Was Andersonville* by prisoner in notorious Civil War camp. Georgia locale is featured in 3-min. TV short to be offered to bookstores . . . Return of *Ding Dong School* now slated Aug. 26—but on Chicago's WGN-TV only—to be beamed "later" to Pat Weaver's Program Service network . . . Shirley Temple Doll, hot kiddies' item in 1930's, will be revived in updated dress by Ideal Toy Corp. for partic. sponsorship (thru Grey Adv.) of 4 old movies by child star to be shown by 100 NTA affiliates in fall. Firm was rescued from depression by sales of doll, hopes films will restore popularity . . . Philip Morris renews controversial *Mike Wallace Interviews* for another 6 weeks on ABC-TV Sun. 10-10:30 p.m. . . . CBS-TV goes underwater for national AAU swimming & diving championships Aug. 4 at Philadelphia's Fairmount Park. Special camera requiring 500-lb. weight will be used to catch sub-surface action.

Radio station sales approved this week: WDOD, Chattanooga, by Earl W. Winger for \$200,000 to Interstate Life & Accident Insurance Co. (Vol. 13:26) . . . KUDU, Ventura-Oxnard, Cal. by Voice of Ventura Co. (Wm. H. Haupt, pres.) for \$162,500 in bankruptcy proceeding to Mrs. Virginia Wallace & associates (Vol. 13:27) . . . WNAM, Neenah, Wis. by owners of WFRV-TV, Green Bay, for \$154,000 to S. N. Pickard (Vol. 13:29) . . . KPEG, Spokane, by Robert D. Rapp for \$137,500 to F. Kemper Freeman, Elwell C. Case & Mrs. Florence C. Hayes (Vol. 13:29) . . . KOMA, Tulsa, by John Brown U for \$100,000 to John W. Kluge & Mark Evans (Vol. 13:28) . . . KHMO, Hannibal, Mo. by Lester M. Smith & associates for \$97,500 to Jerrell A. Shepherd (Vol. 13:23) . . . KCIJ, Shreveport, by Lester Kamin & associates for \$75,000 to Edward McLemore (Vol. 13:27) . . . WFYC, Alma, Mich. by L. R. Kamperman & associates for \$70,100 to gen. mgr. David W. Somerville & associates (Vol. 13:27) . . . WLBN, Lebanon, Ky. by Charles Shuffett & Clarence H. Hulse Jr. for \$65,000 to W. Dee Huddleston & associates (Vol. 13:28) . . . WPLY, Plymouth, Wis. by Milton Maltz & Robert Wright for \$65,000 to Charles & Marion Boonstra and associates (Vol. 13:28) . . . WARB, Covington, La. by A. R. Blossman for \$55,269 to brother David & son A. R. Blossman Jr. (Vol. 13:28) . . . KPLK, Dallas, Ore. by Leland M. Tucker & Edward C. McElroy Jr. for \$45,000 to D. H. Meves (Vol. 13:25) . . . KERV, Kerrville, Tex. by Arthur G. Rodgers for \$30,000 to chief engineer Clyde Jones & Albert F. Mason Jr. (Vol. 13:28) . . . WGAD, Gadsden, Ala. by Richard B. Biddle (pres. & 25% of grantee WOWL-TV, Florence, Ala.) for \$25,000 to Rep. Albert M. Rains and associates (Vol. 13:28).

Change in FM rules to permit either horizontal or vertical polarization was proposed this week by FCC on petition of consulting engineer James C. McNary, who argued that vertical polarization would provide better auto radio reception (Vol. 13:18). Comments are due by Oct. 1.

Radio station sales reported this week: WTRY, Troy, N. Y. by station executives Mowry Lowe, Kenneth M. Cooper, C. George Taylor and Robert T. Engles for \$1,400,000 to Victor W. Knauth and Daniel W. Kops, pres. & gen. mgr., respectively, of WAVZ, New Haven, Conn. . . . KMLB, Monroe, La. by Melba Liner Gaston & J. C. Liner III for \$105,000 to WSTV Inc., licensee of WSTV-TV, Steubenville, O. (Ch. 9) & WSTV, part of Friendly Group (Jack N. Berkman, pres.). KXLE, Ellensburg, Wash. by Goodwin Chase Jr. & Joseph B. Kendall for \$80,000 to Willis R. Harpel & Stephen C. Wray, of Los Angeles . . . WCOW, Sparta, Wis. 74% by Nicholas & Victor J. Tedesco for \$46,400 to Zel Rice and wife Vena, whose son John D. is resident mgr. & 24% owner. Brokers: WTRY, Allen Kander & Co.; KXLE, Hamilton, Stubblefield, Twining & Assoc.

Sale of WNOW-TV, York, Pa. (Ch. 49) & WNOW by Helm Coal Co. partners Morgan E. Cousler & Lowell W. Williams for \$255,000 (Vol. 13:27) to Wm. F. Rust Jr. and Ralph Gottlieb was approved by FCC. Also approved was sale of radio WAEB, Allentown, Pa. to Rust & Gottlieb for \$200,000 by WAEB Inc. (Howard Wasserman, pres. & 50% owner). Gottlieb is gen. mgr. and Rust is treas. of Granite State Bestg. Co., operator of N. H. radio stations WKBR, Manchester; WTSL, Hanover; WTSN, Dover; WTSV, Claremont.

Sale of 50% of CP for KHUM-TV, Eureka, Cal. (Ch. 11) to KVIP, Redding (Ch. 7), was approved this week by FCC. Carroll R. Hauser, who has been sole owner of KHUM-TV, is to be reimbursed undisclosed sum for out-of-pocket expenses and KVIP management has tentative Sept. 1 target for new outlet.

Color TV rebroadcast receiver with over-all response extending to 4.25 mc, featuring crystal-controlled high frequency oscillator, was announced this week by Nems-Clarke Inc., Silver Spring, Md.

SPECTACULAR answer to forecasts of dull programming and soft demand for network time next fall was fired at the press this week by NBC's top brass at big full-dress news conference in New York. There, pres. Robert Sarnoff, flanked by network's first-rank programming and business executives, announced what bids fair to be a return to exciting programming—and exec. v.p. Robert Kintner announced near-sellout in evening time.

Yet selling for season hasn't been easy, Sarnoff admitted later.

Program excitement next season will come from "specials," said Sarnoff—and NBC has scheduled 100 of them in every conceivable field. He defined a "special" as "a half-hour, hour, 90-min. or 2-hour show that is not broadcast in the week-in-week-out pattern of regular programs and that is, by its nature, different from standard network entertainment fare." Elaborating on "specials," Sarnoff & Kintner stated:

These shows will account for about 117 hours of programming, 21% increase over last season. At least 26 of them—totaling more than 35 hours—will be in color. Sponsors have signed up for them to the tune of \$40,000,000 gross.

Classified as "specials" are such shows as *Omnibus*, *Wide World*, *NBC Opera*, "Project 20" documentaries, *Hallmark Hall of Fame*, *March of Medicine*, Shirley Temple fairy tale series, as well as spectaculars like Mary Martin in "Annie Get Your Gun" and Standard Oil & General Motors anniversary programs. Virtually all of the shows enumerated had been announced or known previously.

Kintner responded at news conference to story by *New York Times*' Jack Gould that forthcoming season will be networks' "softest" commercially (Vol. 13:30). He said NBC has only about 2 hours of unsold evening time and these may be sold in next 10 days if current negotiations are successful.

It was also pointed out that daytime billings are

stronger than ever—witness NBC-TV's reported 80% sell-out of day hours for next season, vs. 40% last fall.

Sarnoff followed up news conference with refreshingly candid letter to TV-radio editors, distributed Aug. 1. He said Gould's July 25 story in *Times*, which caused "quite an outburst along TV Row," was on right pitch. Instead of joining CBS, ABC & TvB in furious fusillade in reply to Gould, Sarnoff took potshots at rest of industry himself.

"The TV industry is 10 years old and some responsible people in it were cutting up like 10-year-olds last week," NBC pres. wrote in one of his periodic communiques to editors.

"The facts in the [Gould] article were correct. Yet the rebuttals from some network & industry sources sought to bury these facts under an avalanche of non-responsive claims . . . All of them, I thought, were wide of the mark in answering the main point of the article [that] TV is subject to the same stresses of an inflationary, and at times unsettled, economy that every other important American industry is . . .

"No responsible TV executive can look you in the eye and say this has not been a hard-sell season. Network salesmen have worn out more shoe leather this selling season than at any time within my memory . . ."

Sarnoff gave "good reasons" for network prime time-selling difficulties: (1) "More cautious attitude" toward all media by advertisers & agencies, both "caught in the inflationary squeeze." (2) "Same inflationary pressures" are raising program costs. (3) Daytime TV & "specials" probably are siphoning off money from regular nighttime periods.

"Yet," Sarnoff went on, "there is surely no cause for hysteria because a few facts about unsponsored time & late selling find their way into print." He wound up with this "realistic appraisal of TV today":

"Good overall economic health; problems arising from inflationary aspects of economy common to all businesses; selling market tough, somewhat spotty, but picking up hopefully. Needed: more shoe leather, less talk about inflated income."

Control of Cox newspapers goes to 10-year trusteeship under will of late James M. Cox, who died July 15 (Vol. 13:29). Trustees are James Cox Jr.; Robert A. Wolfe, v.p. & gen. mgr. of Dayton Newspapers; Raymond Sadler, controller, and Robert W. Sherman, purchasing agent. Papers affected are *Dayton Journal Herald* and *Daily News* (affiliated with WHIO-TV & WHIO), *Springfield (O.) News & Sun*, and *Miami Daily News*. Cox left his son 6000 shares of Atlanta Newspapers Inc., presumably giving him operating control of *Atlanta Constitution* and *Journal* and licensee of WSB-TV & WSB. James Cox Jr. personally holds 30.5% interest in WCKT, Miami.

Dept. stores use TV for institutional prestige nearly as much as for immediate sales results, according to survey by National Retail Dry Goods Assn. Of stores polled, 48.7% counted on TV prestige, 51.3% on immediate sales, 10.5% plan increased TV budgets, 50% will continue present schedules. Biggest number—31.7%—spend \$100-\$200 per week on TV time & production, but budgets show wide variations, one store in \$75 category using its own talent as models & buyer as commentator.

Power boosts: KVIP, Redding, Cal. (Ch. 7) began with 117-kw Aug. 1; WTTW, Chicago (Ch. 11, educational) has Sept. 3 target for increase to 275-kw.

H-R Television Inc. Aug. 5 opens Detroit office at 1065 Penobscot Bldg., Andrew M. Gent, mgr. (Woodward 1-4148).

Congressional call for aid to uhf (Vol. 13:29) came this week in letter to Chairman Forand (D-R. I.) of House Subcommittee on Excise Taxes asking end of Federal excise tax on all-channel sets. Letter was signed by Chairmen Magnuson (D-Wash.) and Harris (D-Ark.) of Senate and House Commerce Committees. Their letter said "we cannot emphasize too strongly that time is running out. Unless action is taken in the very near future, many areas of the U. S. will be doomed to limited TV service . . ." They said they were concerned because of number of uhf channels falling into disuse. Meanwhile, Reps. Kearns (R-Pa.) and Coad (D-Iowa) introduced 2 more bills to exempt uhf sets from 10% manufacturers excise tax. Bills were referred to Ways and Means Committee. On Senate side, Finance Committee spokesman said it's improbable that Committee will get to major excise tax revision bill (HR-7125) this year, saying 2-3 weeks will be needed for explaining measure, probably followed by hearings.

"How to Use Local TV & Radio in Health Field" is subject of Nov. 7-8 conference at Chicago's Hotel Sheraton-Blackstone. Invited to meeting, sponsored by NARTB and American Medical Assn., are representatives of medical societies, TV-radio stations, voluntary health organizations, medical schools, etc. General discussion topics include: "Mutual Obligations in Public Service Programming" and "The Matter of Taste."

FINAL FCC MEETING before month's vacation mopped up large mass of allocations and miscellaneous actions and produced 7 new TV grants—greatest number in more than year.

Highlighting allocations actions, Commission ordered staff to prepare final draft of order making Albany-Schenectady-Troy area all-vhf, keeping Ch. 10 in Vail Mills, Ch. 6 in Schenectady, moving Ch. 13 from Utica to Albany-Schenectady-Troy, shifting Utica's WKTU from Ch. 13 to new Ch. 2 and permitting Albany's 2 uhf stations to operate on Ch. 10 (WCDA) and Ch. 13 (WTRI) pending any competitive hearings involving other applicants for the new vhf channels. FCC also ordered staff to draft rule-making document proposing addition of "a third vhf channel" to Providence.

These allocations actions were finalized: (1) Ch. 16 added to South Bend from Aurora, Ill., Ch. 73 to Aurora, South Bend's WNDU-TV to switch to 16. (2) Ch. 16 added to Ephrata, Wash., Ch. 31 moved from Richland to Kennewick, Ch. 25 from Kennewick to Richland. (3) Ch. 15 substituted for 41 in Florence, Ala., changing channels in Gadsden from 15 to 37, in Corinth, Miss., from 29 to 41, in Grenada, Miss. from 15 to 44, modifying CP of WOWL-TV, Florence to specify Ch. 15. (4) Ch. 8 shifted from Muskogee to Tulsa, changing community identification of KTVX. (5) Ch. 8 added to Brookings, Ore., Ch. 6 to Eureka, Cal. (6) Ch. 6 assigned jointly to Arecibo-Aguadilla, P. R. (it previously had been allocated to former, then switched to latter).

FCC denied ABC's long-standing petition proposing drop-ins of vhf channels at less than minimum spacings on case-to-case basis as interim allocations measure. It also denied petition by Jacksonville's WJHP-TV (Ch. 36) to free educational Ch. 7 there for commercial use or to replace commercial Ch. 12 (WFGA-TV) with Ch. 46.

Commission asked comments by Sept. 6 on: (1) Proposals to assign Ch. 22 to South Bend or 28 to South Bend-Elkhart by making channel shifts involving Elgin, Ill., Benton Harbor, Mich., Waukegan, Ill., Kalamazoo, Mich. & Plymouth, Ind. (2) Proposals to add Ch. 13 to Fajardo, P. R. by changing assignments in Charlotte Amalie, V. I. and Aguadilla.

Petitions by uhf operators to switch permanently or temporarily to vhf channels were turned down: (1) In Portsmouth & Hampton, Va., where WTOV-TV & WVEC-TV both wanted to operate at least temporarily on Ch. 13.

Radio has overtaken TV in audience size this summer, Sindlinger & Co. reported this week. Basing estimates on 1000 interviews a day with consumers across country by its staff of 186, Ridley Park, Pa. research firm said turning point was reached week of July 6, when 71,335,000 listened to radio, 68,967,000 viewed TV—and trend has continued since, reversing long ascendancy of TV. Radio had audience of 69,106,000, TV 66,892,000 week of July 13; radio 72,795,000, TV 66,401,000 week of July 20, according to Sindlinger. Steady climb by radio toward TV audience had been noted in earlier weeks. And pres. Albert E. Singlinger said interviews in week of July 27 showed radio per capita listening time was "up to about 18 hours per week, while TV viewing per capita is now down to about 15 hours." Except for period of televised national political conventions in 1956, it was first time in 3 years of TV-radio audience measurement that "such a trend has ever developed," Sindlinger said. He attributed it partly to 4% increase in automobile travel in July, estimating that 36% of radio's time came from car listeners.

(2) In Lake Charles, La., where KTAG-TV wanted to switch to Ch. 3. Also turned down was request by Miami's WTVJ, applicant for Ch. 11 in Huoma, La., for interim stay of grant for experimental Ch. 12 operation by New Orleans WJMR-TV (Ch. 20).

In other actions, Commission: (1) Refused to permit KSTP-TV to change designation from St. Paul to St. Paul-Minneapolis. (2) Okayed request by San Antonio's KENS-TV & WOAI-TV to waive mileage separations so they could occupy joint tower site. (3) Granted private microwave to WCBY-TV, Bristol, Va., in place of present off-air pickup. (4) Denied request by Time Inc. & Wayne Coy to "treat as confidential an agreement of May 9" in connection with sale of KOB-TV & KOB, Albuquerque, to KSTP, Minneapolis. Agreement which sellers wanted kept confidential concerned terms of arrangement to sell stations back to original owners if so ordered by FCC or court, together with terms of resale if way were cleared later.

* * * *

The CPs granted this week: (1) Newly assigned Ch. 4, Charleston, S. C., to WTMA. (2) Amarillo, Tex., Ch. 7 to KAMQ principals after Kenyon Brown dropped application (Vol. 13:30). (3) Monahans, Tex., Ch. 9, to Tri-Cities Broadcasting Co., finalizing initial decision. (4) North Platte, Neb., Ch. 2, to Goldenrod Tele-Radio Co. (5) Hay Springs, Neb., Ch. 4, to principals of KOTA-TV, Rapid City, S. D. (6) Gulfport, Miss., Ch. 56, to I. K. Corkern Jr. (7) Kennewick, Wash., Ch. 25 to Columbia River TV Co. However, since Commission also this week substituted Ch. 31 for 25 in Kennewick, it made grant conditional on application from grantee to move to Ch. 31.

Commission granted translators in Show Low, Ariz.; Yosemite National Park, Cal.; Grangeville, Ida. (2); Shelby, Mont.; Hawthorne, Nev.; San Saba, Tex.

More court appeals were filed this week by losers in race for TV grants, TV East Bay and Ch. 2 Inc. appealing Ch. 2 grant to San Francisco-Oakland TV Inc., New Orleans' WNOE & WTPS seeking reversal of Ch. 4 grant to Loyola U's WWL.

Comments favoring uhf booster proposal (see p. 1) were filed by CBS, NBC, EIA (RETMA) & Adler Communications Labs, all of which suggested more liberal rules than proposed by Commission, and Joint Council on Educational TV; KCOR-TV, San Antonio; WNAO-TV, Raleigh, N. C.; WSEE, Erie, Pa.; WTVP, Decatur, Ill.; WBRE-TV, Wilkes-Barre; WANE-TV, Ft. Wayne; WATR-TV, Waterbury, Conn.

Full control of Copley Press Inc. will be held by James S. Copley under terms of family settlement submitted to Circuit Court in Chicago, terminating suit filed in 1955 by Wm. M. Copley of Paris (Vol. 11:29), both men adopted sons of late Col. Ira C. Copley of Aurora, Ill. Under proposed settlement, Copley Press is to buy stock of Wm. Copley and other minority stockholders for undisclosed price. Copley Press, publisher of 16 newspapers in Cal. and Ill., is licensee of KCOP, Los Angeles (Ch. 13), being sold to owners of KFEQ-TV, St. Joseph, Mo. (Ch. 2), headed by Kenyon Brown (Vol. 13:22).

Old WJZ call letters—with "TV" added—were regained this week by Westinghouse, which was licensee of original radio WJZ, Newark, from 1921 to 1923. Westinghouse Broadcasting had requested the call for its recently purchased WAAM, Baltimore (Vol. 13:29). FCC this week assigned WJZ-TV to the station, specifying the 5-letter call "since 3-letter calls are not assigned TV stations." WBC takes over WAAM Aug. 5, changes to WJZ-TV early in Sept.

NEW-LINE ORDERS SPARK SETMAKER OPTIMISM: Manufacturers' confidence in salability of their newly redesigned TV lines is being confirmed by dealers and the public, on the basis of first reports on acceptance of the new sets. "Bullish" would be mild term to express reaction of cross-section of setmakers we contacted this week.

Here are some typical comments:

Edward R. Taylor, Motorola exec. v.p., consumer products: "Orders from our July distributors' convention are everything we expected -- and more. I'm bullish enough to think that we'll have a good fall; we'll be rolling by mid-Aug. or Sept. 1." He said he was gratified to see increasing orders for higher priced sets. As to prices, he feels Motorola line is "competitive," but doesn't know how long price line can be held. "We'll match other leaders," he told us, "and if they raise prices we'll be after them like a flash."

John M. Otter, Philco exec. v.p., marketing, termed TV business "excellent, better than it's been for years -- and I think it's going to keep up." Inventories are in good shape, he said, with sets "moving from distributors to dealers as fast as they come in." He said he's particularly pleased with rate of repeat orders.

Price situation is "tough," said Otter. In almost same words he echoed other industry topkicks: "I don't know if we can hold the price line," particularly in view of recent boosts in steel and tubes -- and with other supplier prices on rise.

GE reports distributor orders to factory for direct shipment to dealers is 50% higher than at this time last year. And Joseph F. Effinger, sales mgr. for TV receivers, predicts industry will enjoy good business climate for rest of year. He said inventories, both distributor and factory, are below those a year ago.

It may or may not be significant, but GE this week boosted factory price of its popular 17-in. portable. Though GE has no suggested nationwide list price, it's anticipated model will rise about \$10 at retail to about \$190 in east.

RCA business is "ahead of last year," Joseph P. Bannon, gen. sales mgr., TV div., told us. He said there has been some retail activity this summer and repeat orders are coming in. He feels these are on the increase.

Inventories at distributor levels are "in good shape," Bannon reported. And he said dealer inventories are quite low. Indications are that prices are about the way they should be, he said, judging from the acceptance of new RCA line as reflected in volume of orders. He said there are no present plans for price increases.

Westinghouse reports "quite a bit of success with new TV merchandise." Thomas B. Kalbfus, gen. TV-radio sales mgr., gave us enthusiastic description of dealer and distributor response, calling it "finest we've had by whale of a margin."

Kalbfus said inventories are in line, "about right for this time of year -- when introducing new merchandise." He said no decision has been reached on whether TV prices will go up, following spiral of increasing costs.

Packard-Bell pres. Robert S. Bell, noting drop in 9-month profits although sales increased, predicted better profits in next quarter due to increased prices, "keeping pace with the general industry trend."

Production: TV production was 123,522 week ended July 26, compared with 107,569 preceding week and 115,581 in corresponding week one year ago. It was the year's 30th week and brought TV production for year to date to about 3,082,000, compared with 3,752,133 in same period of 1956. Radio production totaled 234,034 (84,394 auto) week ended July 26, compared with 188,773 (91,866) the preceding week and 189,151 (59,709) in corresponding week year ago. Radio output for 30 weeks totaled about 7,797,000 (3,097,000) vs. 7,225,862 (2,512,216).

Topics & Trends of TV Trade: Institute of Management for Appliance-TV Dealers, sponsored by NARDA, came to week end close at American U with consensus of 133 "students" giving warm endorsement to both basic and advanced courses. Number of manufacturing officials, including Motorola v.p. S. R. Herkes, Admiral's Ross Siragusa Jr., Philco's John Utz and Paul Burks, had opportunity to examine dealer problems—while dealers peppered TV setmakers with pet peeves.

Among speakers at institute were Frederick D. Ogilby, Philco v.p. marketing, and W. B. Creech, Westinghouse appliance service mgr.—both of whom were students at last year's course. Ogilby discussed history and growth of TV industry, pointing out cost of automation and printed circuit changes resulted in setmakers showing very little net income. He explained need for time in planning new sets, saying it takes 6-12 mo. for engineering and arranging for new components and tubes, then 8-12 mo. to put chassis in production. Production planning during model run must be 6-12 weeks ahead, Ogilby said, adding that any shutdown in less time would result in "tremendous loss."

Ogilby slammed at manufacturers who make private brands for chain stores, describing practice as "more damaging than discount houses." In question period, he defended Philco TV sales to auto appliance stores (Firestone), saying these stores have to pay same prices as other dealers, or more, for merchandise—with result they cannot cut prices below level other dealers can price their sets. Philco hasn't suffered from the affiliation, Ogilby said. He also disclosed that Philco is forming a group to sell TV to hotels and motels through picked dealer arrangement. Philco will set up financing for such deals in package arrangement with other manufacturers (bedding, tables, etc.) so that TV and furnishings of each room will be financed as a unit. Thus, he said, if operator doesn't make payments, TV-furnishings will be removed as unit, putting place out of business. Ogilby said financial institutions will give better interest rates on such deals, with terms extended to 5 years on minimum of \$10,000.

Creech gave dealers outlines of how they can set up service dept. on paying basis, saying Westinghouse did not endorse manufacturer servicing except in special cases. He also decried what he described as too-long warranties on appliances, such as 5-year terms. He suggested TV warranties of 90 days on parts, one year on picture tubes were more realistic—and when he put question to students, he received hearty endorsement of shorter warranties.

Another speaker, Safeway v.p. Seth Shaw was asked about trend of supermarkets handling appliances and non-food items, gave these answers: (1) Customers want one-stop shopping. (2) Distributors haven't kept pace with demands. (3) Store managers want to take advantage of additional traffic. (4) It's a reaction to use of trading stamps, using appliances as premiums. However, Shaw predicted supermarkets eventually will discontinue both stamps and appliance sales.

Lengthy jury report of electronic experts following examination of portable TV set involved in July 14 death of 6-year-old Skokie, Ill. boy (Vol. 13:29-30) has been turned over to Coroner Walter T. McCarron of Cook County. Inquest into child's death has been recessed until next week, at which time jury findings—understood to include some recommendations—may be made public. Jury this week heard Mrs. Paul Erenstein describe accidental death of boy. GE engineer Mertis E. Jones testified set was not dangerous "until it had been dropped and damaged."

Trade Personals: L. J. Collins promoted to gen. sales mgr., sales dept., RCA Victor Radio and "Victrola" div.; A. R. Baggs named mgr., merchandising; R. E. Conley given increased responsibility as mgr., adv. & sales promotion . . . Eugene A. Tracey, ex-Mitchell Mfg. and Zenith, elected Emerson v.p. in charge of sales, succeeding Harold Dietz, resigned . . . Charles McKinney resigns as Zenith adv. mgr. . . John E. Lawrence, Boston cotton merchant, elected GE director, its 19th . . . Paul S. Coomes named district commercial engineer, GE receiving tube dept., with headquarters in Chicago; Sylvester M. Wylie appointed district sales mgr. . . Wm. Wight, ex-Philco, appointed exec. director, Civic Affairs Council, Chamber of Commerce of Greater Philadelphia . . . Marion F. Chetty promoted to mgr. of Sylvania's Fullerton, Cal. TV picture tube plant . . . Richard Deutsch promoted to chief sales engineer, Channel Master Corp. . . Kenneth H. Smith promoted to Westinghouse asst. director, labor relations, and consultant for general products group; George M. Nicholson to similar post for consumer products; G. E. Closson for defense and atomic power groups; W. W. Heimbach for apparatus products group . . . Jack W. Merritt named sales mgr. of Howard W. Sams & Co.'s new electronic distributor div.; Walton G. Wilson promoted to sales mgr., industrial service div., succeeding Joe H. Morin, recently appointed gen. sales mgr. . . Joseph E. M. Conklin appointed Pilot eastern regional sales mgr.; Frank C. Porter, ex-Westinghouse, named western regional sales mgr. . . Goodwin Mills, Knight Electronics gen. mgr., elected v.p. . . Leon L. Adelman appointed Conrac eastern div. sales mgr. . . Jack O'Brine promoted to editor, RCA institutional publications.

Obituary

David E. Scott, 64, mgr. of customer relations, RCA Victor TV div., died July 29 on way to hospital following heart attack. A resident of Moorestown, N. J., he was due to retire Nov. 1. Before joining RCA in 1942 he was territorial sales mgr. for Krich-Radisco Inc., Newark RCA Victor distributor. Surviving are widow, daughter,

Two billion dollars annual gross is how John T. Thompson, distributor sales mgr., GE electronic components div., sizes up electronics service business. He averaged this out at fifth annual clinic and fair of Texas Electronics Assn. to show that nation's 100,000 TV-radio service technicians theoretically do \$20,000 gross business yearly. However, he cautioned that the average "fluctuates violently," at least one independent service dealer doing total volume of more than \$250,000. Plug for trade assn. was voiced by Kenneth Stults, chairman of NARDA service committee, saying "we have no troubles in our industry which the combined efforts of trade associations cannot surmount." He outlined steps committee has been considering to combat service losses: (1) Development of recommended rate chart. (2) Establishment of code of service advertising ethics. (3) Preparation of voluntary code of service ethics to which dealers would subscribe.

Philco charged RCA's patents are "invalid and unenforceable because of RCA's misuse and abuse of the patents and its violation of the anti-trust laws" and asked Philadelphia Federal Court to throw out RCA's treble-damage counterclaim which charged Philco had infringed its patents since Jan. 1955 (Vol. 13:24). RCA counterclaim had been filed in answer to Philco's \$150,000,000 anti-trust suit (which also named GE & AT&T as defendants) charging illegal practices by RCA in its "package" licensing of sets, tubes and commercial electronic equipment.

DISTRIBUTOR NOTES: Admiral Distributors appoints Edward M. Dryden acting gen. mgr. for Cal. and Honolulu, replacing Arthur J. McGettrick who resigned as v.p. and gen. mgr. for Los Angeles, San Francisco, San Diego and Honolulu . . . Westinghouse Appliance Sales appoints John P. Adams San Francisco sales mgr., TV, room air conditioners and vacuum cleaners . . . Sylvania appoints Electric Sales & Service Co., 209 Walton St. NW, Atlanta (A. I. Butts, pres.) for TV-radio; also names following for electronic tube products: Fort Orange Radio Distributing Co., 904 Broadway, Albany, N. Y.; Soundco Electronic Supply Inc., 147 Dwight St., Springfield, Mass.; Wholesale Electronic Supply of Fort Worth, 480 S. Main, Fort Worth . . . Warren F. Hardy resigns as mgr., Emerson-Buffalo Inc. . . . Hoffman appoints Ohio Valley Hardware Co., Evansville, Ind. (Roger K. Becker, pres.) for southwest Ind., parts of Ky. & Tenn. and Clark County, Ill. . . . DuMont appoints LeRoy and McGuire, Phelps, N. Y. as sales reps for TV picture tubes, receiving tubes and replacement parts for N. Y. State outside of metropolitan New York.

Ad plans for Canadian TV are detailed in July 29 *Advertising Age* which calls them "most ambitious" since initial rush of buyers to install sets. Story says ads will use same sort of "obsolescence" buying motivation which booms auto sales each year. Canadian Admiral is said to be upping ad budget by 150%, thru Locke, Johnson agency. Other ad programs expected: Westinghouse, McCann-Erickson; Canadian GE, MacLaren; RCA, Kenyon & Eckhardt; Sylvania, Stanfield.

Electronic Industries Assn. (RETMA's new name) has reappointed J. A. Milling, Howard W. Sams & Co., chairman of Jobber Relations Committee, and Norman A. Triplett, Triplett Electrical Instrument Co., co-chairman; John B. Swan Jr., Philco, chairman, Traffic Committee, and Wm. L. Fogelson, P. R. Mallory & Co., vice chairman.

Sylvania Promotion-of-the-Month for Aug. is picture frame TV wall base at \$5.95 with purchase of "Slim Jim" 17-in. portable. When not used for TV, frame folds against wall, displaying picture on bottom of base.

MIAMI'S THIRD VHF station, National Airlines' WPST-TV (Ch. 10), planned immediate start with ABC-TV programming upon receipt of program authorization Aug. 2. It's year's 16th new starter, brings on-air box score to 504 (91 uhf).

It has 50-kw RCA transmitter and 12-section custom-built superturnstile antenna on 900-ft. Blaw-Knox tower on Honey Hill Rd. at Miami antenna farm, acquired when it purchased land, tower & studios of WGBS-TV (Ch. 23), when Storer took it off air (Vol. 13:14). It's using remodeled WGBS-TV studios at 316 N.E. 21st St. while new 2-story building containing 80 x 50 ft. studio is being built at Biscayne Blvd. and 21st St. Owner, Public Service Television Inc., is subsidiary of G. T. Baker's National Airlines Inc., first transport firm to own TV station. Walter Koessler, ex-WGBS-TV, is gen. mgr.; Bob Hanna, ex-WGBS-TV, sales mgr.; Jack Barry, ex-WGBS-TV, production mgr.; John Holbrook, news director; Wm. R. Needs, ex-WAGA, Atlanta & WGBS-TV, chief engineer. Base hour is \$825. Rep is H-R Television.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WLWI, Indianapolis (Ch. 13), 50-kw RCA transmitter on hand and working on 1016-ft. Ideco tower, plans Sept. 1 test patterns, Sept. 15 debut with ABC-TV, writes John

Members of electron tube industry have scheduled meeting for Sept. 4 in Washington in preparation for informal panel meeting next day with IUE and Labor Dept. which has issued notice of proposed minimum wage for industry. Management is now making survey of minimum wages in industry and may provide definitions of industry at Sept. meeting. At that time Labor Dept. probably will decide whether to collect data on industry's wage practices with view to establishing minimum wage under Walsh-Healey Act which applies to firms having Federal contracts of \$10,000 or more.

Admiral plans 15-20% higher prices this fall on color TV, pres. Ross D. Siragusa told Los Angeles news conference this week. He said new line, starting at about \$700, will be introduced in mid-Sept. Sets will use all-glass tube, he said, permitting higher voltage and resulting in "brighter, sharper picture." He estimated color market at 100,000-150,000 rate for year. Siragusa also disclosed plans to build California TV model in Los Angeles plant with chassis and 110-degree tube being shipped in from Harvard, Ill.

RETMA of Canada reports TV distributors sold 170,672 sets to dealers in first 6 months of year compared with 216,196 for similar 1956 period. Sales for June were 21,457 vs. 27,137 in June year ago. Sales by provinces: Ontario 64,756 for 6 mo., 8420 in June; Quebec 47,856 & 7413; British Columbia 14,040 & 1554; Alberta 12,008 & 1132; Manitoba 10,335 & 1082; Nova Scotia 8290 & 621; Saskatchewan 6188 & 515; New Brunswick & Prince Edward Island 5421 & 553; Newfoundland 1778 & 167.

TV for built-in use has been introduced by Admiral, using 21-in. 110-degree tube. Chassis, picture tube and picture frame are rigidly mounted in one assembly, dual 8-in. speakers come separately. Set has built-in antenna and provision for using outdoor antenna. No list price has been announced.

Canadian 15% excise tax on TV-radios is again criticized by Canadian Retail Federation. July *CRF Bulletin* says new Govt. will have to review remaining excise taxes, adding that TV-radio tax evokes most criticism and there is fear it may become permanent.

T. Murphy, TV v.p. of grantee Crosley Bcstg. Corp. Roof is up on transmitter house, but studio construction hasn't started yet. Base hour will be \$1100. Rep will be Crosley.

KXLJ-TV, Helena, Mont. (Ch. 12), planned as low-power satellite of parent KXLF-TV, Butte, Mont. (Ch. 4), has ordered 250-watt transmitter from Sarkes Tarzian, and plans to be on air next fall, reports pres.-gen. mgr. Ed Craney. It's started construction on studio-transmitter building and 80-ft. Fisher tower, at site near Intermountain College. KXLJ-TV will be sold as bonus with KXLF-TV, which has \$200 base hour. Rep is Walker.

WJPB-TV, Fairmont, W. Va. (Ch. 35), off air since early 1956 (Vol. 12:2), has moved transmitter & tower to Grant & Hill Sts. downtown and "should be on the air by Labor Day," writes owner J. Patrick Beacom. Earlier start was planned, but it experienced difficulties with change to another tower. It also is Ch. 5 applicant in nearby Weston, W. Va. Base hour will be \$200. Rep will be Gill-Perna.

RCA shipped 10-kw transmitter July 31 to upcoming KPAC-TV, Port Arthur-Beaumont, Tex. (Ch. 4), due in Sept.; 5-kw July 12 to upcoming KUED, Salt Lake City (Ch. 7), due in fall; 12-section superturnstile antenna July 30 to upcoming WLWI, Indianapolis (Ch. 13), due in Sept.; 25-kw transmitter July 23 to WRC-TV, Washington (Ch. 4), planning move to new site.

Financial & Trade Notes: Westinghouse earned \$30,615,000 (\$1.77 per share) on record first-half sales of \$982,939,000. In similar period last year, which included 156-day strike, sales were \$606,097,000 with net loss of \$11,713,000. Previous first-half record was \$811,709,000 in 1954. Income for 1957 second quarter was \$16,417,000 (95¢) on sales of \$507,253,000 vs. \$6,862,000 (38¢) on sales of \$380,731,000 in similar quarter last year.

Pres. Gwilym A. Price predicted moderate increase in TV-appliance sales during year's final 6 months. He said apparatus, atomic and general product groups are maintaining backlogs of unfilled orders at very high levels; second-half increases are expected in defense orders and shipments.

* * * *

Trav-Ler Radio reports net loss of \$370,736 on sales of \$13,045,459 for year ended April 30. Because of switch to fiscal year basis in 1956-57, no comparable financial figure is available. In last full calendar year, 1955 (Vol. 12:13), Trav-Ler reported net income of \$222,982 (29¢ per share) on sales of \$17,497,351. In this year's report, pres. Joe Friedman expressed "abiding faith in [industry's] future and in the ultimate growth and development of your company . . . I believe that the operation for the coming year will be profitable."

Muter Co. earned \$152,352 (20¢ per share) on sales of \$6,641,854 in first half compared with net loss of \$79,721 on \$5,775,334 in corresponding period last year, pres. Leslie F. Muter reporting volume up 15% because of new products and increased demand for hi-fi components. He said anticipated increase in TV set manufacture in second half "should be reflected in our progress, provided we are able to increase prices."

Aerovox earned \$332,000 (38¢ per share) on sales of \$11,350,000 in first 6 months vs. loss of \$35,000 on \$13,090,000 year earlier, carry-forward tax credit of \$242,000 being factor in net for period. Lower volume of business was attributed by pres. Wm. Owens to "decrease in purchases for the radio & TV industry and from the discontinuance of some unprofitable lines of products."

Link Radio Corp., 110 Jericho Turnpike, New Hyde Park, N. Y., has filed Chapter XI bankruptcy petition in Federal Court, Brooklyn, listing liabilities of \$461,250, assets of \$466,979. Manufacturer of mobile radio equipment proposes to pay unsecured creditors 10% at 2½% rate 3, 6, 9 & 12 months after confirmation of plan.

Amphenol Electronics had \$944,255 net income (\$1.89 per share on 500,560 shares outstanding) in 6 months ended June 30 vs. \$626,446 (\$1.56 per share on 400,560) in corresponding 1956 period. For June quarter earnings were \$519,061 (\$1.04) vs. \$363,461 (90¢) year earlier.

Tax refunds for 1956, listed this week by Joint Congressional Committee on Internal Revenue Taxation, included: Western Union Telegraph Co., \$7,147,396; GE and affiliated companies, \$1,001,451; Sylvania, \$1,642,348; Western Electric, \$2,290,558. In many cases, refunds covered years when excess profits tax was in effect.

Cohu Electronics, whose Kin Tel Div. makes TV camera chains, remote control systems, monitors, etc., earned \$222,389 on sales of \$2,671,191 in first half vs. \$71,240 on \$1,080,759 year earlier. Backlog of orders June 30 was \$3,327,035 compared with \$1,441,031.

DuMont Labs reports operating loss of \$997,900 on sales of \$19,850,000 in first half compared with operating loss of \$1,092,000, reduced to net loss of \$484,000 by tax carry-back credit, on sales of \$22,471,000 for similar 1956 period.

C&C Super Corp. became C&C TV Corp. in reorganization (Vol. 13:28) approved July 29 at special stockholders meeting in Wilmington, Del., where non-TV operations were spun off into subsidiary National Phoenix Industries Inc. Proxy statement said "it is reasonable to expect that the TV operations of the corporation should experience a comparatively rapid growth in volume & earnings." Elected a director on board reduced from 13 to 8, Matty Fox said C&C has "collected or will collect under firm agreements over \$18,000,000" from TV film rental and time barter deals, principally involving RKO's pre-1948 feature film backlog. Murray Becker of N. Y. ran for director against pres. Walter S. Mack but was overwhelmingly defeated.

Warner Bros. & subsidiaries earned \$3,174,020 (\$1.76 per share on 1,793,996 shares outstanding, excluding 688,251 shares held in treasury) on sales, film rentals & other revenues of \$57,981,312 in fiscal 9 months ended June 1 vs. \$2,165,000 (87¢ on 2,482,275 shares) on \$54,225,898 year earlier. Reporting on TV business, pres. Jack Warner pointed to continuing expansion, including construction of new TV facilities at Burbank studios, and said: "We are optimistic over our prospects for the future." He also noted progress in Warner's music publishing operations (Harms, Remick, Witmark) and in commercial film production for RCA, GE, Lever Bros., Eastman Kodak, etc.

Telestudios Inc. offers 180,000 shares of Class "A" capital stock at \$1.50 per share for over-the-counter public sale, pres. George K. Gould, ex-CBS-TV, stating proceeds would be used to install complete Ampex videotape recording equipment in N. Y. studios, expand sales & promotional programs. He said Telestudios expects to be able to produce video tape shows & commercials by next spring.

Dividends: Television-Electronics Fund, 8¢ payable Aug. 31 to stockholders of record Aug. 1; Westinghouse, 50¢ Sept. 3 to holders Aug. 12; Sperry Rand, 20¢ Sept. 26 to holders Aug. 19; Walt Disney Productions, 10¢ Oct. 1 to holders Sept. 13 plus 3% stock Nov. 11 to holders Nov. 1; Siegler, 20¢ Sept. 1 to holders Aug. 15; Technicolor, dividend omitted.

Globe-Union reports net income of \$690,325 (84¢ per share) on sales of \$28,380,274 in 6 months ended June 30 vs. \$559,745 (68¢) on \$23,249,985 in corresponding 1956 period, which included operations of Wico Electric Co., acquired June 14, 1956.

Webeor reports \$504,000 earnings on sales of \$15,638,000 in first 6 months of 1957 compared with loss of \$235,000, after tax carry-back refund, on sales of \$12,496,000.

W. L. Maxson earned \$191,378 (26¢ per share) on sales of \$15,351,897 in 9 months ended June 30 compared with loss (after giving effect to \$253,957 tax credit) of \$329,151 on \$11,916,598 year earlier.

Litton Industries common stock went on "big board" of N. Y. Stock Exchange July 30. Stock opened at 52¼, closed at 50¼ on 2700-share volume first day.

Technicolor Inc. earned \$710,000 (32¢) in 6 months ended June 30 compared with \$980,692 (49¢) in corresponding period last year.

Phillips Electronics Inc. stock was admitted to American Stock Exchange Aug. 1, opening on 200 shares at 18¾.

Electronic Specialty Co. reports earnings of \$356,000 (99¢ a share) in fiscal year ended March 31 vs. loss of \$13,155 year earlier.

Consolidated Electrodynamics reports net income of \$911,235 (86¢) in first half vs. \$568,147 (60¢) year earlier.

31 ELECTRONICS FIRMS AMONG 500 LARGEST: Third annual Fortune Magazine "Directory of the 500 Largest U.S. Industrial Corporations" runs as 32-page supplement with magazine's July issue, and we're again reprinting, with permission, TV-radio-electronics manufacturers' listings.

Directory includes firms having half their revenues from manufacturing, with a cut-off at a little over \$61,000,000—about \$6,000,000 higher than last year's list (Vol. 12:26). Sales figures are for fiscal years ending no later than Jan. 2, 1957. Only electronics manufacturer new to top-500 list is Magnavox, which ranked 438th in 1956, with total sales of \$70,530,000.

From additional list of 100 largest foreign industrial corporations, we've picked those of prime interest to TV-electronics industry:

ployed in the business. Figures, wherever possible, are consolidated. ³ Profits after taxes and after all deductions. Figures, wherever possible, are consolidated.

Network Television Billings June 1957 and January-June 1957

(For May report see *Television Digest*, Vol. 13:26)

SIX-MONTH GAIN of 6.9% is shown by TV network billings compared with corresponding half of 1956, according to Publishers Information Bureau. Total Jan.-June billings this year were \$250,657,209 vs. \$234,510,312, CBS leading increase with 9.6%. NBC gained 4.8%, ABC 4.2% in 6-month period. For June alone, ABC showed biggest percentage increase over year earlier, up 4.8% to \$6,413,708 from \$6,119,917, while NBC gained 3.9% with \$14,746,537 vs. \$14,186,929, CBS 2.3% with \$18,356,892 vs. \$17,935,789. The complete PIB report for June:

NETWORK TELEVISION						
	June 1957	June 1956	% Change	Jan.-June 1957	Jan.-June 1956	% Change
CBS	\$18,356,892	\$17,935,789	+2.3	\$116,762,487	\$106,499,425	+9.6

* Revised as of July 29, 1957.

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 25%. However, they're generally accepted in the trade as an index.

Progress of Justice Dept. investigations of TV networks probably "will be accelerated in the coming months," Deputy Attorney General Wm. P. Rogers told Senate Commerce Committee Chairman Magnuson (D-Wash.) this week in letter commenting on points raised in last June's Cox report on network practices, issued by Committee as staff study (Vol. 13:26). In answer to request by Magnuson, Rogers made these comments on specific areas of investigation: Inquiry will continue, with probable better rate of progress, on "alleged preferences granted by the networks to their own programs, and the acquisition of financial interests by networks in independently produced programs as a condition to the broadcasting of these programs." As to investigating charges by independent staging services that networks unfairly are usurping their functions, "we intend to do just that"—but inquiry "has not yet been completed." Dept. will "continue to press" investigation of option time and must-buy. And "we shall do our best to comply" with recommendation to investigate alleged "abuse of power" by networks to advance their programming activities unfairly. Magnuson replied to Rogers, requesting further report before next Jan. "so that this material can be considered by the Committee when it is formulating its schedule of activities" for new session.

California will take 5% of promoters' TV-radio proceeds of boxing and wrestling matches, according to provisions of new tax bill signed by Gov. Knight. TV industry and promoters have said such a measure will mean end of televised wrestling in state.

FM Unlimited Inc. is organized as exclusive FM station rep & promotion firm by Charles W. Kline, ex-radio WNIB, Chicago, and Edward Merritt, co-owner of WNIB, with headquarters at 166 E. Superior St., Chicago; temporary N. Y. office at 11 E. 9th St.

EDUCATIONAL TV NETWORK in 16 southern states, covering 309 schools at cost of \$22,500,000, was envisioned July 30 by Southern Regional Education Board at FCC's above-890-mc allocation hearings.

Outlining microwave requirements for ambitious closed-circuit project, Dallas engineer A. Earl Cullum Jr. told FCC courses would originate in 32 schools scattered throughout area. They would be distributed over 6 round-robin circuits into which program material could be fed at any terminal point.

"Specific plans for this network have not been developed yet," Dr. Robert C. Anderson of Atlanta, director of 16-state Board, said in testifying on preliminary 2-year pilot study which was started year ago.

But he said network facilities could be set up at cost of about \$7,000,000 for colleges which now have 600,000 enrollment, provide 50 regular & 25 summer courses for \$100,000 per course. Campus distribution systems to channel network programs into classrooms would cost \$10,000 annually per campus, he estimated.

Dr. Anderson added that \$22,500,000 total cost of establishing network would represent only about 6% of what region now spends on education. No state legislative appropriations for regional TV setup were mentioned as in sight, but Dr. Anderson noted that Fla. legislature has voted grant of \$600,000 for educational TV within state.

Organized in 1949 under interstate compact, Board now operates on \$1,300,000 annual budget. Members appointed by governors represent Ala., Ark., Del., Fla., Ga., Ky., La., Md., Miss., N. C., Okla., S. C., Tenn., Tex., Va., W. Va.

All-out uhf campaign to capture 60,000-home Lancaster County, Pa. market was launched July 29 for 13-week run by Triangle Publications for its WLBR-TV, Lebanon (Ch. 15) with "Operation Bow Tie" contest promoting dealer sales of all-channel sets & converters. Long off air before Triangle took over station in May (Vol. 13:18), WLBR-TV now reaches only about 5% of homes in rich farming area dominated by WGAL-TV, Lancaster (Ch. 8). Campaign started at dinner in Lancaster's Brunswick Hotel for about 75 dealers includes tie-ins with manufacturers, full-page newspaper ads, "I-want-a-bow-tie-in-Lancaster-because" contest for prizes including \$5000 swimming pool, \$1500 Atlantic City vacation, 4 portable all-channel sets & 10 converters per week. WLBR-TV gen. mgr. Frank B. Palmer said he was confident sales drive would "substantially increase" uhf homes—and lift dealer business. Station programs "World's Best Movies"—2500 RKO, MGM, 20th Century-Fox & Warner Bros. films.

Three applications for new TV stations were filed this week with FCC, bringing total pending to 118 (34 uhf). Weck's applications were: (1) For Bemidji, Minn., Ch. 13, by group of Alexandria businessmen who own part of WDAY-TV, Fargo; (2) for St. Cloud, Minn., Ch. 7, by St. Cloud Television Co.; (3) for Mitchell, S. D., Ch. 5, by KORN. No translator applications were filed this week. [For details, see *TV Addenda 25-A* herewith.]

Focal point of United Press Radio News Report moves from N. Y. to Chicago Aug. 11, making city control point for 188,000 miles of wire supplying news to more than 1800 domestic TV & radio stations. U P says move is designed to place origination point of wire in more central location and to achieve better mechanical control over leased circuits.

SUMMARY-INDEX OF THE WEEK'S NEWS — August 10, 1957

"SILVER" TV FACTBOOK—No. 25 in series of TV almanacs—now in mails with 75 departments, including complete station & manufacturer lists (p. 1).

CLOSED-CIRCUIT TV equipment sales total \$2,500,000 for half of 1957, equal to all of 1956. Total for 1957 seen at \$5,000,000; 1958, \$10,000,000 (p. 2).

LOW-POWER VHF BOOSTERS with adequate interference safeguards, as prooposed by FCC, virtually impossible at low cost, Ben Adler says (p. 2).

UHF STATION QUILTS in Tulare, Cal.; Corpus Christi outlet gets FCC permission to leave air, but hopes to continue while reorganizing (p. 3).

LONG-STANDING CASES disposed of by FCC; Biloxi Ch. 13 awarded to WMVI; grants reaffirmed in Charlotte, Raleigh, Jacksonville (p. 3).

PICTURE TUBE SALES pickup heralds large set production boost, with sudden hike in June output. Set rate tops 1956 month for first time in July (p. 8).

FACTORY DAMAGE to portable TV blamed by coroner's jury in death of boy; full texts of reports by coroner and engineering group (p. 10).

TRANSISTOR BOOM rolls on spectacularly; EIA figures show 1957 volume in first 6 months already approaching sales for all of record 1956 (p. 11).

YEAR OF DECISION for color TV may be 1957, says Fortune; sees 1,000,000 sets in use by 1960 as probable "magic figure" to put color over (p. 11).

NBC BUYS PITTSBURGH radio WJAS for \$725,000, giving network access to city for first time since KDKA dropped affiliation in 1956 (p. 12).

FACTBOOK 25—LANDMARK IN INDUSTRY PROGRESS: The 25th volume of the book which grew with the TV industry—our semi-annual Television Factbook, completely revised for Fall-Winter 1957—is being mailed this week end to all full-service subscribers.

This "silver" Factbook is latest in a progression of industry directories which began in TV's infancy with a 4-page supplement to this Newsletter, growing to today's 476-page compendium of TV facts & figures—now including more than 75 directories and departments, each one updated and double-checked for accuracy.

Reference bible of the industry contains listings for every one of the world's 900 TV stations—with data on rates, personnel and facilities for each of the 503 operating in U. S. and 40 in Canada, as well as the 25 stations due to start by fall.

Among directories and features in new Factbook, in addition to 215-page U.S. & Canadian Station Directory and the Foreign TV Directory, are complete lists of applications & CPs, all TV station sales, TV-radio manufacturers with top personnel (U. S., Canadian, foreign), community antenna systems, programmers, color-equipped stations, TV-radio engineers & attorneys, research firms, etc. Tabular items in book include completely up-to-date channel allocations section, TV billings, TV-electronics stock prices, network & station revenues, TV-radio set production, sales, inventories, etc.

Included as insert with Factbook No. 25 is a revised and updated version of our 43x29-in. wall map in color, showing locations of all U. S. & Canadian TV stations and network routes. The quick-reference edge index, a widely praised innovation in Factbook No. 24, has been improved for quicker location of major Factbook sections. Extra copies of the Factbook with map are available at \$5 each, \$3.50 each for 5 or more.

\$5,000,000 YEAR FOR CLOSED-CIRCUIT GEAR: With closed-circuit currently in public eye because of subscription-TV publicity, a look at the closed-circuit TV industry at midyear indicates that equipment sales continue to enjoy their quiet boom, factory sales doubling and redoubling each succeeding year.

Defining closed-circuit equipment as camera chains and closely associated gear for non-broadcast use—industrial, educational, business—best estimates available indicate that factory sales for first 6 months of 1957 totaled nearly \$2,500,000, about equal to sales for entire year of 1956.

Full year 1957 unquestionably will see at least \$5,000,000 worth of closed-circuit gear sold—equaling the total of such equipment sold in all years before 1957. Actually, total bill for closed-circuit systems in 1957 to date would equal far more than the \$5,000,000, since that figure doesn't include standard electronic components used as part of the systems—such as cable, microwave gear, home receivers used as monitors & display units, etc.

The \$2,500,000 closed-circuit equipment bill for first half of 1957 covers more than 600 cameras and about 550 special monitors or display units—bringing total of closed-circuit camera chains in use to well over 2000, at least equaling and probably surpassing the number of live camera chains in use by TV broadcast stations.

Last December we predicted 1957 sales of closed-circuit gear would total at least \$5,000,000 (Vol. 12:52), and first-half figures bear out that estimate. On basis of our knowledge of this new and ever-expanding field, it isn't unreasonable to forecast that this progression will continue, with 1958 sales in neighborhood of \$10,000,000.

ADLER DUBIOUS OF VHF REPEATER FEASIBILITY: Is FCC's mini-power vhf booster proposal an attempt to get off a political hot-seat, or does Commission have new evidence that cheap vhf repeaters can now be built with adequate anti-interference safeguards?

We asked the one man who probably knows more than anyone else about peanut-powered transmitters—Ben Adler of Adler Electronics, who heads EIA (RETMA) broadcast equipment section, formerly chaired its booster & satellite committee and is head of TASO's TV repeater committee. His company has produced every uhf translator now in use and was pioneer in booster-satellite research.

Reviewing technical standards proposed last week by FCC for "low power TV repeater station service" (Vol. 13:31), Adler told us: "They're asking for things which just haven't been invented yet. I don't know if it can be done, but even if it could, these on-channel vhf boosters would cost considerably more than uhf translators or community antenna systems."

FCC's proposed rules are studded with anti-interference safeguards. Adler agrees that these would be absolutely essential in a vhf booster service—but the very need for these safeguards probably will make any such new service an impossibility as a replacement for the extremely low-cost unlicensed boosters now operating in far west.

The 2 provisions which Adler sees as dooming any such system are:

(1) The strict anti-interference monitoring required, both within and without booster's 6-mc bandwidth. This would require expensive equipment not yet developed, he says.

(2) The maximum 80db amplifier gain provided in proposal. While such a rule is necessary to prevent oscillation and possible interference, he says, it would restrict output powers to a point too low to provide TV service except in strong signal areas—where boosters most likely wouldn't be needed.

Powers permitted in Commission proposal are much lower than unlicensed boosters are currently using, he said. Even if equipment could be made—cheaply—he doubts whether unlicensed booster operators would be any more willing to change over to the new service than to uhf translators.

Not that vhf boosters and translators aren't possible and practical. Adler is now making them for South America where vhf spectrum isn't tightly packed with TV assignments—but he says he believes their utility here is extremely limited, and their costs vastly increased, because of necessity of avoiding interference with allocated TV and safety & special service stations within vhf band.

ONE UHF STATION left air this week, and another received FCC authority to go off, though it hopes financial reorganization will permit it to continue telecasting. Suspending operation was KVVG, Tulare-Fresno (Ch. 27), which began in Nov. 1953 and notified FCC Aug. 6 it was going dark until Nov. 6. It's an independent outlet in area served by KFRE-TV (Ch. 12), KJEO (Ch. 47), KMJ-TV (Ch. 24). Station owner, it's 3rd, is independent movie producer James Stacy. CP expires Jan. 1, 1958.

KVDO-TV, Corpus Christi (Ch. 22), also in economic difficulty, decided to remain on air after receiving Commission permission to go off. It hopes to reorganize while continuing on air. Station was taken over last spring from Gabriel Lozano and associates by group of local businessmen headed by E. J. Healey and Hubert J. Schmidt (Vol. 13:14).

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KPAC-TV, Port Arthur-Beaumont (Ch. 4) has 10-kw RCA transmitter, plans Sept. 15 programming with NBC-TV, writes sales mgr. Mack Newberry. It has studio-transmitter house nearly ready, is working on 702-ft. Ideco tower. Superturnstile 12-bay antenna is due Sept. 1. It's equally owned by Port Arthur College and Jefferson Amusement Co. (Vol. 13:22). Base hour is \$350. Rep is Raymer.

KUED, Salt Lake City (Ch. 7, educational), requesting site change to Oquirrh Mts., has changed programming target to Oct. 1, reports mgr. C. Richard Evans. It has 5-kw RCA transmitter on hand and 6-section antenna is due shortly. It will use 140-ft. Ideco tower.

WRIK-TV, Ponce, P. R. (Ch. 7), with 500-watt DuMont transmitter and Alford antenna due Aug. 15, plans Sept. 7 programming, reports 50% owner George A. Mayoral, also exec. v.p. of WJMR-TV, New Orleans, and WORA-TV, Mayaguez, P. R. Studio-transmitter building has been completed. WRIK-TV will use 100-ft. custom-built tower. Base hour will be \$150. Rep will be Forjoe.

— ■ —

Translator starts: K72AI, Libby, Mont. began equipment tests Aug. 3, repeating KREM-TV, Spokane. K71AC & K75AC, Farmington, N. M. began equipment tests July 29, repeating KOB-TV & KOAT-TV, Albuquerque. K77AF, San Saba, Tex. hopes to start Aug. 15, repeating KTBC-TV, Austin. It plans to add 2 more channels, reports mgr. Norman R. Phillips.

Britain's big movie-making J. Arthur Rank Organization, which hitherto has kept aloof from commercial TV, is leader of group tentatively awarded ITA contract to provide programs for upcoming Isle of Wight station, due to begin operations about mid-1958. New program contractor was formed by Rank Organization, Amalgamated Press and Associated Newspapers—the latter a part owner of Associated-Rediffusion, weekday program contractor for London station.

Florida legislature has passed bill providing \$500,000 for microwave network to link WTHS-TV, Miami (Ch. 2), WJCT, Jacksonville (Ch. 7), latter due on air soon, plus projected outlet in Tampa-St. Petersburg (Ch. 3) and those planned in Gainesville & Tallahassee. Bill also provides \$100,000 for system operation and expenses of State Educational TV Commission.

IN BACKWASH of FCC's omnibus before-vacation meeting last week (Vol. 13:31), disposition of several long-pending cases was announced this week. Notable was final decision granting Ch. 13 in Biloxi, Miss. to WMVI after hard-fought 3½-year battle in which there were charges that each group's top backer unlawfully served liquor and permitted gambling in his respective Gulf Coast hotel.

Initial decision in July 1954 picked WMVI; case was later reopened and WMVI was again recommended by examiner. Commission's decision last week picked WMVI on basis of greater experience and "substantial superiority" in ownership-management integration. Chairman Doerfer dissented, voting for WMOX.

Way was cleared for grant of Ch. 6, Butte, Mont., to Copper Broadcasting Co., owned by principals of radio KALL, Salt Lake City, when competing applicant Arthur W. Schwieder dropped out.

In split decisions, Commission reaffirmed 3 TV grants, rejecting petitions for reconsideration. They were to WSOC-TV, Charlotte, N. C. (Ch. 9), Doerfer dissenting, Craven abstaining; to WRAL-TV, Raleigh, N. C., Hyde dissenting and voting to reopen record, Bartley & Craven abstaining; to WFGA-TV, Jacksonville (Ch. 12), Bartley & Lee dissenting, Craven abstaining. Bartley's dissent in latter case favored limited reopening of record.

— ■ —

Young International Ltd. rep firm was taken over Aug. 1 by Intercontinental Services Ltd., headed by Harry M. Engel, owner of KUAM-TV, Guam, and Walter Staskow, owner of radio ZBM, Hamilton, Bermuda, in deal involving over \$50,000, according to Adam Young, pres. of Young Television Corp. and subsidiary Canadian Station Representatives Ltd. Stephen A. Mann is gen. mgr. of Intercontinental, 3 E. 54th St., New York 22 (Plaza 3-7930), which now represents KUAM-TV, Guam, WORA-TV, Mayaguez, P. R. and ZBM, Bermuda, which is building ZBM-TV.

New AIEE chairmen—among 56 named—include: TV and aural broadcasting systems, C. M. Braum, JCET; communications div., John Meszar, Bell Labs; communications theory, R. K. Hellmann, Hazeltine; radio communications systems, R. D. Campbell, AT&T; science & electronics div., J. G. Reid Jr., National Academy of Sciences; electronics, D. G. Wilson, Stromberg-Carlson; magnetic amplifiers, H. W. Lord, GE; solid state devices, S. J. Angello, Westinghouse; automation & data processing, G. W. Heumann, GE.

FCC's full-scale allocations review of 25-890 mc portion of spectrum, which includes TV & FM bands (Vol. 13:14) has been delayed again, Commission this time extending deadline for comments to Nov. 1. FCC announced its above-890-mc hearings will reconvene Sept. 30 to hear final witnesses—Raytheon's Sidney Topol and representative of Electronic Industries Assn. (formerly RETMA).

TV camera "tube saver" devised by pres.-gen. mgr. John H. DeWitt Jr. & chief engineer Aaron C. Shelton of WSM-TV, Nashville, will be marketed for about \$1200 by GE, which has acquired patent rights. Device is intended to prevent burn-in & sticking of images on tubes.

TASO's new Panel 6 on "level of picture quality"—charged with defining different grades of picture in presence of interference—will be headed by Hazeltine's Charles E. Dean. Panel members haven't been selected yet.

Copies of report, *Revision of Atmospheric Noise Data*, by International Radio Consultative Committee (CCIR Report No. 65) are available from office of Secretary General, International Telecommunication Union, Geneva.

Telecasting Notes: Persistent reports of impending spin-off by Columbia Pictures of its highly successful TV subsidiary Screen Gems were given more impetus this week with official announcement that Screen Gems will handle distribution of Universal's 600-feature backlog—thereby becoming largest TV distributor of feature films. Behind the feeling that spin-off may be imminent is fact that new pact ties 2 Hollywood majors, both of which are subject to the movie anti-trust case consent decree . . . Universal's guarantee in Screen Gems feature deal was somewhat higher than had been rumored previously: Minimum of \$20,000,000 over 7-year period, with Screen Gems to receive "graduated scale of distribution fees." Universal retains all foreign rights to the films, and all domestic rights other than TV distribution . . . Screen Gems lost no time in bringing out first package of Universal features, capitalizing on Universal's specialty of the 1930's—horror. First 52-film batch is labeled "Shock" and contains such nostalgic chillers as "Frankenstein," "Dracula," "Invisible Man," "The Cat Creeps" . . . Inflation in talent prices for the many variety shows scheduled next season is pointed up in Aug. 10 *Sponsor* by these examples: A singer whose price was \$1000 last year now is asking \$7500 per appearance; movie singer-dancer "who rated \$5000 a shot last year" is seeking \$55,000 for 4 appearances . . . More than half of NBC-TV's regular fall nighttime shows will be new programs, representing 12½ hours of entertainment, 21 new properties . . . Civil rights debate on *The Big Issue*, simulcast July 23 by NBC from old Supreme Court cham-

ber in Capitol, brought 2773 letters from viewers & listeners, according to network count this week—"only 3 of them negatively critical of the program itself" . . . Cole Porter signed for first TV job—at reported \$75,000—to write music & lyrics for 90-min. "Aladdin" to be sponsored by Du Pont on CBS-TV next Feb. 21. S. J. Perelman is writing book for musical . . . Sen. Kennedy (D-Mass.) is doing Aug. 12-13 stint for ABC-TV as technical adviser on *Navy Log* episode based on his PT boat experiences during 1943 South Pacific campaign . . . **Real public service:** Sicks' Rainier Brewing Co. sponsors 5 hours of Lake Washington gold cup hydroplane races Aug. 11 on KING-TV, Seattle, with no beer commercials whatever. Washington state regulations don't permit them on Sunday. Kaiser Industries sponsors final hour of races on ABC-TV western network . . . **Prime community interest promotion:** Minneapolis' WCCO-TV, Minn. Historical Society and Minn. Statehood Centennial Commission are sponsoring \$1000 TV script-writing contest aimed at half-hour TV program based on state's history . . . **Showcase Productions** plans 90-min. "Preview of the Brussels World's Fair" as 90-min. spectacular next season, featuring musical, dramatic & dancing acts in U. S. program to be presented at international exposition in Belgium—no network commitment reported . . . **Trans-Lux TV** now in 48 markets with 700-unit Encyclopaedia Britannica film library, latest sale being to WOR-TV, N. Y. . . **Producers' Council**, building material trade group, will distribute free documentary series *Building America* this fall to more than 200 TV stations, council promising help in lining up local sponsors.

NAFBRAT's annual report on childrens' TV-radio programs, covering 7 TV & 8 radio stations in Los Angeles in first week of May, lists 20% decrease in "excellent" & "good" shows compared with similar ratings year earlier (Vol. 12:29). "Evaluation committee," said to represent civic, religious & educational groups, counted 46½ hours of favored programs vs. 58 hours in 1956, while 36 half-hour programs were found "objectionable" or "most objectionable." Among TV shows classed as "excellent" were *Captain Kangaroo*, *Disneyland*, *Giant Step*, *Lassie*, *Gumby*, *The Jungle*, *Let's Take a Trip*, *Mickey Mouse Club*, *Youth Wants to Know*, *Zoo Parade*. Among "most objectionable": *Long John Silver*, *Superman*, *Tales of the Texas Rangers*. Copies of report, along with booklet, *Fifteen Reasons Why Crime-Westerns Are Not Acceptable TV Fare for Children*, are available from National Assn. for Better Radio & Television, 882 Victoria Ave., Los Angeles 5, Cal.

Plagiarism suit for \$1,100,000 seeking halt to *To Tell the Truth* on CBS-TV was filed Aug. 6 by Art Linkletter's People Are Funny Productions in Santa Monica, Cal. Superior Court against CBS, Pharmaceuticals Inc., Goodson-Todman Enterprises Ltd., and KNXT, Los Angeles. Suit alleged *To Tell the Truth* is copy of similar show aired by plaintiff in 1948 & 1951.

United National Film Corp. is new name of Dallas Film Industries Inc., whose stockholders elected A. Pollard Simons as chairman at Dallas meeting. Other United National officers include Roy R. McKee, treas.; James N. Landrum & P. B. Garrett, v.p.'s. Robert L. Madden was named a director.

TV makes business for Sunday newspaper magazines, Aug. 3 *Editor & Publisher* reports in roundup by Philip N. Schuyler showing their advertising revenue increased 6.9%-42% in first half of 1957 compared with year earlier. "TV conditioned advertisers to the value of consistent advertising cycles," according to publisher Arthur H. (Red) Motley of *Parade*. "But TV is limited to the hours of the day. It is being further fragmented locally as new competing stations go on the air." So advertisers turn to newspapers & Sunday supplements as "the one mass media with real local impact" in "fantastic growth of 'interurbia.'"

Full control of TPA was assumed Aug. 7 by pres. Milton A. Gordon following his purchase of interest held by chairman Edward Small, who resigned as partner in big TV film production & syndication firm. At same time Gordon announced plan by which stars & producers of new features may acquire TPA stock to share over-all profits of company, which now has 14 programs on air. Gordon said Small's departure—"to have more time for the feature film schedule he now has under way"—was entirely amicable.

TV film was evidence this week in Miami murder trial of father convicted and sentenced to life imprisonment for killing his wife & 2 children. Judge Ray H. Pearson of Dade County Circuit Court permitted prosecution to set up screen & projector in courtroom to show stills of defendant taken by Fred Mooke of WTVJ immediately after slayings last Christmas. Arguing that defendant was insane, his counsel objected to film, which prosecution used to show his calm demeanor.

Wales promoted to local sales mgr. of WWJ-TV, Detroit, Walter A. Schwartz to local sales mgr. of radio WWJ . . . John B. Mauro joins rep Branham as research & promotion mgr. . . Alexander C. Field Jr., ex-WLW-TV & WLW, Cincinnati, joins WGN-TV & WGN, Chicago, as special broadcast services mgr. . . Robert C. Burris, ex-radio KSAN, San Francisco, named sales mgr. of KEYT, Santa Barbara . . . Wm. Boyd, ex-B. T. Babbitt, named business mgr. of Terrytoons div. of CBS TV Film Sales . . . Sig Mickelson, CBS v.p. for news & public affairs, received "great public service" award from Air Force Assn. for CBS-TV's *Air Power* series . . . Wm. Kreitner, from WRCA-TV, N. Y., named local sales mgr. of radio WRCA . . . Wm. Shafer promoted to western mgr. of American Research Bureau, headquartering in Monterey Park, Cal., replacing Roger Cooper, now station relations mgr. at Washington home office . . . Morrie Roizman resigns as supervisor of NTA short subjects to join Transfilm as editorial director . . . Duane X. Riley named news director of WWTW, Cadillac, Mich. . . Donald L. Bennett named London representative of CBC . . . Wm. D. Hamilton named national ABC radio network program director for "live personality" shows in fall . . . Noel Rhys promoted to exec. v.p. of Keystone Bestg. System Inc., radio transcription service headquartering in N. Y.; Edwin R. Peterson elected senior v.p., Charles A. Hammarstrom named a v.p. . . Clifford J. Barborka Jr. promoted to v.p. & Chicago mgr. of radio rep John Blair & Co., succeeding Paul Ray, who retires Sept. 1 . . . Abe I. Feinberg elected pres. of new Authors Research Corp., TV-radio-movies reference service, 1650 Broadway, N. Y.

Herbert T. Kalmus Award of Society of Motion Picture & Television Engineers (SMPTE) for "outstanding contribution" to color film development for TV & theatre use will be given to Wadsworth E. Pohl, technical director of motion picture div. of Technicolor Corp., Hollywood, at association's 82nd convention in Philadelphia Oct. 4. Inventor of processes in such fields as camera optics, Pohl has worked for Technicolor since 1930.

Irish TV programs will be offered to U. S. market by Broadcasting & Theatrical Productions Ltd., 40 Henry St., Dublin, chairman Eamonn Andrews said this week following 2-month visit here. Ireland now has no TV, but company supplying programs to Radio Eireann & commercial radio sponsors there is entering TV production, he said.

Obituary

Ralph W. Hardy, 41, CBS Washington v.p., died Aug. 5 of heart attack after water skiing while on vacation in Ogden, Utah. Before joining CBS in 1955, he was govt. affairs v.p. of NARTB, having joined staff of the trade group as director of radio div. in 1949. He began his 20-year career in broadcasting at radio KSL in his home town of Salt Lake City. He was member of U. S. National Commission for UNESCO, v.p. of National Conference on Citizenship and member of national council of Boy Scouts of America, held several high positions in Mormon Church. He was eulogized on Senate floor this week by majority leader Lyndon Johnson (D-Tex.) who called him "one of the most brilliant business executives of my acquaintance," and by Sens. Bennett (R-Utah), Watkins (R-Utah) & Javits (R-N. Y.).

Soap opera enthusiast Neil H. McElroy, who joined Procter & Gamble as junior clerk in adv. dept. in 1925 and rose to pres. of big TV-radio advertiser in 1948, was named by President Eisenhower Aug. 7 to succeed Charles E. Wilson as Defense Secy. He was in charge of Procter & Gamble promotion by 1929, became adv. & promotion mgr. in 1940 and v.p. for adv. in 1943, helped make soap opera a radio staple, song-&-dance commercial an American art form. McElroy was 1954-55 chairman of White House Conference on Education, once told critics of soap opera aesthetics: "The problem of improving the literary tastes of the people is the problem of the schools." He probably must dispose of holdings in Procter & Gamble and in GE & Chrysler—he's on boards of all 3 firms—before Senate confirms him in post which pays \$25,000 vs. his \$285,000 P&G salary.

Educational TV experiment at U of Detroit, where freshmen will be able to go to school at home next term (Vol. 13:8), merits "national attention" as possible solution to campus overcrowding, Jack Gould says in Aug. 4 *N. Y. Times*. Students who enroll for 5 courses telecast by educational WTVS (Ch. 56) will be offered special tuition rates along with package deals with regular dealers by which they can buy uhf-equipped 14-in. portable receivers for \$145 or convert vhf sets for about \$50. Students get regular credits for TV instruction, go to campus for examinations.

TV is "prime catalyst" of U. S. economy, NBC pres. Robert W. Sarnoff said in Aug. 4 *N. Y. Herald Tribune*, writing guest column for vacationing business & financial editor Donald I. Rogers. Restating network arguments against pay TV, he said TV commercials play big part in "creation of new mass consumption desires in a nation that consumes its way to prosperity, to growth and to strength."

TV techniques will be taught in new course starting in Sept. at American International College, Springfield, Mass., in cooperation with WWLP there. First semester classes in "Introduction to TV Broadcasting," carrying 3 hours' undergraduate credit, will be taught by asst. program director George J. Mitchell.

Big Jergens account, lost in June by Robert W. Orr & Assoc. (now a Fuller & Smith & Ross div.), goes to Cunningham & Walsh Dec. 1, with senior v.p. John S. Williams in charge. Bulk of Jergens advertising expenditures of about \$1,500,000 went to magazines in 1956, but company recently has been heavy TV investor.

Big demand for closed-circuit TV theatre rights to Sugar Ray Robinson-Carmen Basilio middleweight championship fight Sept. 23 in Yankee Stadium was reported this week by TNT, which said 51 theatres already had been cleared for telecast. About 100 more are expected to sign, according to pres. Nathan L. Halpern.

Norwegian state radio has been authorized by Parliament to resume TV tests next fall, with goal of starting regular telecasts by 1960 from stations in Oslo and Bergen.

ADVERTISING AGENCIES: David P. Kaempfer joins Lynch, Hart & Stockton as TV-radio director . . . George Johnston appointed media director of Brooke, Smith, French & Dorrance . . . Wm. L. Gillilan promoted to marketing director of Ketchum, MacLeod & Grove . . . Ralph C. Tanner, v.p. & director of Anderson & Cairns, named creative board chairman . . . Daniel M. Gordon, ex-Ruthrauff & Ryan, joins Donahue & Coe as media director.

Another agency merger: McManus, John & Adams takes over personnel & accounts of Ralph Yambert Adv., Los Angeles.

Financial & Trade Notes: Zenith reports profits of \$2,398,137 (\$4.87 per share) on sales of \$66,486,222 in 6 months ended June 30, 1957, compared with \$2,530,824 (\$5.14) on sales of \$65,370,935 for comparable period in 1956. For quarter ended June 30, 1957, profits were \$747,547 (\$1.52) on sales of \$29,827,712 vs. \$699,659 (\$1.42) on sales of \$27,455,617 in similar 1956 quarter. Zenith said second quarter unit and dollar TV sales were 16.8% higher than in similar 1956 quarter, those for the half were up 5.8% over year ago.

In report to stockholders, Zenith said its increase in TV volume resulted in company gaining "much larger percentage of the total industry volume than the company has achieved in the past. Report said increased phono and hi-fi sales brought second quarter radio-phono-hi-fi dollar volume to 30% above similar 1956 period. Zenith said it has scheduled "an aggressive production, advertising and merchandising program for the third quarter, which could result in record sales for that period." However, it noted increased cost of materials and labor may force fall price boost for TV-radio-hi-fi.

* * * *

Motorola this week reported net earnings of \$3,409,778 (\$1.76 per common share) on sales of \$105,666,759 in year's first 6 months compared with \$3,066,207 (\$1.58) on sales of \$101,801,234 in similar 1956 period. Second quarter earnings were \$1,272,191 (66¢) on record second quarter sales of \$53,384,964 compared with \$1,053,331 (54¢) on sales of \$48,603,693 in same 1956 period. Pres. Robert W. Galvin told shareholders that only TV did not reach company's expected figures, but July 18 introduction of new line should be reflected in third quarter report. He said new fully transistorized, mobile 2-way radio, silicon rectifier and 2-way motorcycle police radios are now on market. He added Motorola expects good sales and earnings in final 6 months.

Hoffman Electronics reports profits of \$864,299 (\$1.18 per share) on sales of \$21,126,038 in first 6 months of 1957 compared with \$783,972 (\$1.07) on sales of \$22,875,561 in similar 1956 period. Second quarter earnings were \$351,497 (48¢) on sales of \$9,632,439 vs. \$315,978 (43¢) on \$10,720,542 in second quarter last year. Pres. H. Leslie Hoffman said all divisions showed earnings in first 6 months of 1957, TV and semiconductor divisions reporting sales increases. He said acceptance of new TV line "has been gratifying and fall business should be at a good level." Letter to shareholders also said Defense Dept. "has indicated that expenditures for electronics equipment will nearly double by 1961."

Admiral reports \$316,513 loss on second quarter sales of \$36,451,382 compared with earnings of \$437,719 on sales of \$37,170,366 in similar 1956 period. For first 6 months of 1957 earnings were \$111,231 (5¢ per share) on sales of \$78,805,521 vs. \$1,748,055 (74¢) on sales of \$85,834,325 a year ago. Exec. v.p. John B. Huarisa said financial statement reflects cost of tooling and getting into production for 1958 TV-radio-hi-fi line. However, he listed substantial profits in June as nearly offsetting April and May operating losses. He also said Admiral inventories are at the lowest level in 5 years.

Dividends: Magnavox, 37½¢ payable Sept. 14 to stockholders of record Aug. 23; Paramount Pictures, 50¢ Sept. 13 to holders Sept. 3; Erie Resistor, 10¢ plus 1% stock Sept. 15 to holders Aug. 30; Minneapolis Honeywell, 40¢ Sept. 10 to holders Aug. 16; General Tire, 50¢ Aug. 30 to holders Aug. 16; Tung-Sol, 35¢ Sept. 3 to holders Aug. 16; C&C TV, 1 share of National Phoenix Industries stock Aug. 9 to holders July 25 of 2 shares of C&C TV stock.

Time Inc., which took over 3 TV & 3 radio stations from Consolidated (Bitner) in May in \$15,750,000 deal (Vol. 13:21), earned \$7,351,000 (\$3.76 per share) on record revenues of \$125,362,700 in first 6 months compared with \$8,627,300 (\$4.43) on \$110,960,300 year earlier. Decline in earnings was attributed by pres. Roy E. Larsen to increase in costs in relation to higher revenue from advertising & circulation, but he said "outlook is good for the full year." Though there was no breakdown midyear report included revenue from newly-acquired WTCN-TV & WTCN, Minneapolis; WFBM-TV & WFBM, Indianapolis; WOOD-TV & WOOD, Grand Rapids. Time Inc. also owns KLZ-TV, Denver, and KTVT, Salt Lake City.

General Tire & Rubber, parent of RKO Teleradio Pictures Inc., which last month sold Mutual Broadcasting System (Vol. 13:30), but still retains profitable TV-radio station holdings along with film syndicate and Don Lee & Yankee Networks, will declare 3-for-1 stock split if proposal voted Aug. 6 by directors is approved by stockholders at meeting Sept. 5. Split would increase authorized common shares from 2,500,000 to 7,500,000. Stock went up to 89¼ from 88½ following announcement of directors' plan, but closed at 86½.

Loew's Inc. earnings dropped to \$34,017 (1¢ per share) on gross sales & operating revenues of \$33,952,000 in 12 weeks ended June 6 vs. \$808,418 (15¢) on \$40,553,000 in corresponding 1956 period, although income was \$2,763,265 (52¢) on revenues of \$121,200,000 in 40 weeks compared with \$2,693,261 (51¢) on \$127,992,000 year earlier. Slight gain for 40 weeks was credited by pres. Joseph R. Vogel to economies he instituted when he took over last Oct., but he said "we continue to feel the impact of pictures produced prior to my administration."

Storer Bestg. Co. earned \$3,143,038 (\$1.27 per share) in second quarter ended June 30 compared with \$1,395,202 (56¢) year earlier, reflecting capital gains of \$2,621,969 before taxes (\$1,966,477 or 79¢ per share after taxes) from sale of WBRC-TV & WBRC, Birmingham (Vol. 13:19) after capital loss deduction from sales of KPVT, Portland, Ore. (Vol. 13:18) and WGBS-TV, Miami (Vol. 13:15). For 6 months earnings were \$4,429,484 (\$1.79) vs. \$2,845,445 (\$1.15) in corresponding 1956 period.

Atlas Corp., big holder of Walt Disney Productions stock (Vol. 13:27), will offer 400,000 shares in secondary distribution to public late this month through underwriters headed by Goldman, Sachs & Co., Lehman Bros. and Kidder, Peabody & Co. Disney will then seek listing on N. Y. Stock Exchange, according to registration statement filed with SEC. At same time Atlas announced it will exercise option in Oct. to apply 153,000 purchase warrants for like number of Disney shares at \$22 per share.

Paramount Pictures reports consolidated earnings of \$2,359,000 (\$1.18 per share on 1,999,316 shares) in first 6 months this year compared with \$2,322,000 (\$1.12 on 2,085,716) in first 1956 half, for which profits did not include non-recurring capital gain of \$2,679,000 (\$1.28). For June quarter earnings were \$1,060,000 (53¢) vs. \$950,000 (45¢) year earlier.

Page Communications Engineers Inc. has sold all interests in subsidiary Rixon Electronics Inc., Silver Spring, Md., to James L. Hollis, exec. v.p. & gen. mgr. of Rixon, who assumes post of pres., holding all common stock. In transaction Aug. 5 Hollis sold his stock in Page and resigned as officer & director.

Tung-Sol earned \$1,602,697 (\$1.75 per share on 866,554 common shares) on sales of \$30,962,132 in 26 weeks ended June 29 compared with \$1,296,654 (\$1.80 on 661,101 shares) on \$25,433,558 in corresponding 1956 period.

Loew's Inc. management slate of 12 candidates for director at special stockholders meeting Sept. 12 was announced this week by pres. Joseph R. Vogel, who faces rebellion by 5 anti-management directors led by Joseph Tomlinson. Vogel's candidates are Loew's financial v.p. Robert H. O'Brien, ex-AB-PT; Helen Hayes; Francis W. Hatch, BBDO; Bennett Cerf, publisher; Gen. Omar Bradley, Bulova; J. Howard McGrath, ex-Attorney General; Charles H. Silver, N. Y. Board of Education; Ellsworth C. Alvord, Washington attorney; Charles Braunstein, importer; Benjamin Melniker, Loew's gen. counsel; George Muchnic, Loew's International v.p.; Benjamin Thau, Loew's v.p. & studio chief.

Collins Radio pres. Arthur Collins told stockholders company expects sales for year ended July 31 to total about \$120,000,000 compared with \$125,000,000 last year, per share earnings continuing at \$1.92 rate. He said order backlog was \$115,000,000 on June 30.

Decca Records earned \$1,742,600 (\$1.08 per share) in 6 months ended June 30 vs. \$1,536,521 (96¢) in corresponding 1956 half. Figures include company's share of undistributed earnings of subsidiary Universal Pictures.

Amphenol is buying Danbury-Knudsen Inc., Danbury & Brookfield, Conn. manufacturer of electro-mechanical connectors, coaxial switches, microwave components.

Capitol Records reports earnings of \$3,239,362 (\$6.80 per share) on sales of \$35,108,401 in year ended June 30 vs. \$1,599,367 (\$3.35) on \$25,647,468 year earlier.

National Theatres reports net income of \$1,365,820 (51¢ per share) in 39 weeks ended June 25 vs. \$1,378,974 (51¢) in similar period year earlier.

Varian Assoc. earned \$661,725 (50¢ per share) in 9 months ended June 30 compared with \$223,007 (20¢) in corresponding period year earlier.

Gabriel Co. earned \$242,072 on sales of \$5,824,086 in 3 months ended June 30 vs. \$30,213 on \$4,698,036 in comparable 1956 period.

Nems-Clarke Inc., Silver Spring, Md. designer and manufacturer of electronic equipment (including some TV broadcast gear), will be acquired in late Aug. by Vitro Corp. of America, Canonsburg, Pa., diversified firm in fields of atomic energy, metallurgy and weapons systems. Nems-Clarke stockholders have already approved the acquisition which will be effected by exchange of 115,000 shares of Vitro common (worth about \$3,000,000) for all assets of Nems-Clarke, which showed profit of \$177,000 on \$4,000,000 sales last year.

Sanders Assoc. Inc., Nashua, N. H. manufacturer of electronic equipment, offered new issue of 100,000 shares of Class "A" common stock for public sale at \$15 per share this week through syndicate headed by Kidder, Peabody & Co. At same time employes were offered additional 10,000 shares at \$13.80. Company plans to reduce bank indebtedness, increase working capital to develop & market flexible printed cabling. Sanders earned \$146,380 (58¢ per share) on revenues of \$4,439,642 in 10 months ended May 27.

Litton Industries reports earnings of \$1,750,000 (\$1.47 per share) on sales of \$27,700,000 in fiscal year ended July 31 vs. \$1,019,703 (97¢) on \$14,920,050 year earlier. Backlog totaled \$49,000,000 compared with \$35,000,000 at end of fiscal 1956, according to pres. Charles B. Thornton. He said sales now are at annual rate of \$34,000,000 and that he is "confident this rise will continue."

General Dynamics earned \$18,479,197 (\$2.32 per share on 7,972,887 shares) on sales of \$726,081,499 in first half compared with \$11,135,145 (\$1.40) on \$414,443,947 year earlier, pres. Frank Pace Jr. noting that income gained 66% and sales 75% in 1957 period despite bigger expenditures for research & development. Backlog June 30 was \$1.989 billion vs. \$2.195 billion at end of 1956.

Muntz TV has been ordered, as part of Chapter X reorganization, to pay \$10,000 to the District Director of Internal Revenue by Sept. 30 in connection with past-due taxes. Order, by Federal Judge W. G. Knoch, calls for balance of tax bill to be paid in 3 monthly installments.

ELECTRONICS PERSONALS: Adm. Frederick R. Furth (ret.) named research & engineering director of IT&T . . . Dr. Thomas H. Johnson resigns Oct. 1 as AEC physical sciences research director to join Raytheon as research div. mgr. . . . Harold F. Wiley named director of new analytical & control instrument div. of Consolidated Electrodynamics . . . Ray Hoover promoted to v.p. of Western Union in charge of plant & engineering . . . G. P. Adamson named engineering mgr. of Canadian Westinghouse electronics div., succeeding S. S. Schenider, appointed switchgear products mgr. . . . Stephen F. Keating named head of new Minneapolis Honeywell military products group, continues as v.p. in charge of aeronautical group . . . Wm. P. Hindman, works mgr. of Milton, Pa. plant of ACF Industries, appointed v.p. of new advanced products div. . . . Roy Baker Snapp elected v.p. of American Machine & Foundry atomics div., headquartering in Washington . . . Dr. Thornton C. Fry named v.p. & Univac engineering director of Sperry Rand's Remington Rand div. . . . Arthur F. Jones, ex-Motorola, appointed Avco v.p.-defense planning . . . P. C. Covich promoted to Sylvania mid-eastern distributor sales mgr.-electronic products, headquartering in Pittsburgh . . . Ralph Dinsmore promoted to International Resistance Philadelphia sales office mgr.; Evon Wells to asst. mgr. . . . Wm. E. Lowery promoted to mgr. of new reliability section of Raytheon Wayland labs . . . Joseph Bambara promoted to v.p. of CBS Labs electronics systems . . . Howard C. Briggs, ex-Hoffman Labs, named Collins Radio govt. relations director, Washington.

Recommended standards for electronics industry, approved by industry representatives, are available through Electronic Industries Assn. Engineering Dept., 11 W. 42nd St., N. Y. 36, N. Y. (minimum order \$1): RS-189—Encoded Color Bar Signals, 30¢; RS-192—Definitions and Dimensional Characteristics of Quartz Crystal Units, 50¢; RS-193—Designation System for Cathode Ray Tubes, 25¢; RS-194—Microwave Relay System Towers, 40¢; RS-195—Mechanical Characteristics for Microwave Relay System Antennas and Passive Reflectors, 50¢.

New IT&T plant for manufacture of semi-conductor & other electronic devices has been opened by components div. at 815 S. Antonio Rd., Palo Alto, Cal. Robert M. Van Valkenburgh is plant mgr. of operations serving 11 western states, supplementing IT&T semi-conductor production at Clifton, N. J.

Science teachers from high schools in 8 states are completing 8-week research study at MIT under \$20,000 general assistance program of Westinghouse Educational Foundation, financed by Westinghouse Electric Corp. Recipients of study grants were 24 teachers from New England, Middle Atlantic States and south.

Siegler Corp. plans to offer 200,000-250,000 shares of common stock for public sale in Oct. to raise \$4,500,000 working capital if stockholders approve merger with Huford Corp. & Unitronics Corp. (Vol. 13:22) at meeting Sept. 11, according to pres. John R. Brooks. Underwriter would be Wm. R. Staats & Co., Los Angeles.

TUBE SALES HERALD BIG TV OUTPUT BOOST: The cheerful talking by TV setmakers lately isn't just for press-release purposes. With a confidence unmatched in the last few years the TV manufacturer this year is really putting his money where his mouth is.

Picture tube sales to manufacturers provide an excellent indicator of future set production trends, being reflected 2-6 weeks later in receiver output. We learn that in June tube manufacturers sold 750,000 picture tubes to TV makers -- 60% more than the 465,000 sold in May. To put this rise into proper perspective, let's look at record for May & June 1956: May's picture tube sales were 590,000, June's 560,000 -- a decline of about 2%.

These figures are even more significant when you consider that TV production for first 7 months of 1957 was nearly 700,000 sets below similar period of 1956, or 3,752,000 last year & 3,082,000 this year. Of particular interest in this connection is authoritative estimate that TV production in the vacation month of July was 360,000, compared with 337,000 in July 1956 -- first time this year that set production has exceeded corresponding month of last year.

All this indicates better inventory position this year -- with production increase due to pipeline-filling following introduction of new models. Inventories at all levels June 30 totaled 2,350,000 -- lowest end-of-June figure in 3 years.

* * * *

Comments of industry suppliers reflect increase in purchasing by setmakers. For example, we talked this week to one of largest independent picture tube makers, who told us his plant is "going like mad," but he still can't come within 1000 tubes a day of filling all orders from manufacturers. "All of our big customers are behind in their orders," he said, "and they're working overtime to fill them."

Tube season has changed, this tube maker told us. Whereas heavy production season used to extend from Oct. to Feb. or March, this year the pickup began in June, "and our plant was running at top speed for the 2 non-vacation weeks of July." He added: "Right now there's a shortage of quality tubes, and of quality guns."

Tube replacement market is now almost as big as original equipment market, he added parenthetically -- "about 6,500,000 each this year, for 13,000,000 tubes; that's healthy." He predicted that industry would finally standardize on 110-degree tubes, in 17 & 21-in. sizes, with a few 24s & 14s. "And we're going to think twice before we change over to anything else -- unless it's something radically new like a flat tube, a simple color tube or a transparent-phosphor tube." Freezing of sizes & shapes, he predicted, would restore healthy profit margins to tube business.

Table Models Decline: Production mix for July shows portable percentage remaining close to last year -- 105,000 sets or 29% of total, vs. 102,000 or 30% in July 1956.

Brunt of this year's production drop was borne by table models, with only 1,000,000 sets made in first 7 months -- just slightly more than half the 1,952,000 in similar 1956 period. Consoles & combinations dropped from 1,372,000 Jan.-July last year to 1,168,000 this year. Only portables went ahead, 915,000 vs. 428,000.

Retail Sales: TV retail sales in June showed effect of summer doldrums, dropping to second lowest total in year's first 6 months -- June's 389,770 higher only than April's low of 337,965. June retail sales figure also was lower than comparable figure for last year when 439,362 were sold. Radio retail sales, meanwhile, enjoyed the second highest month in June for home radios. Total sold in June was 729,421, topped only by 730,584 in March. March of 1956 also was only month in last year's first half to exceed June 1957 total.

Following is a recapitulation of TV and home & auto radio sales for first 6 months of 1957:

	<u>TV Retail Sales</u>		<u>Home Radio Sales</u>		<u>Auto Radio Sales</u>	
	<u>1957</u>	<u>1956</u>	<u>1957</u>	<u>1956</u>	<u>1957</u>	<u>1956</u>
January...	623,359	614,213	563,363	531,206	521,624	519,648
February..	525,437	530,554	525,029	454,867	522,859	437,611
March.....	534,115	544,411	730,584	527,649	597,532	478,272
April.....	337,965	347,630	543,092	471,193	380,452	299,253
May.....	399,757	392,080	547,480	566,357	396,151	282,611
June.....	<u>389,770</u>	<u>439,362</u>	<u>729,421</u>	<u>839,830</u>	<u>416,058</u>	<u>296,256</u>
Totals..	2,810,403	2,868,250	3,638,969	3,391,102	2,834,676	2,313,651

Production: TV output was 117,438 week ended Aug. 2, compared with 123,522 preceding week and 128,157 in corresponding week one year ago. It was year's 31st week and brought TV production to year to date to about 3,200,000, compared with 3,905,365 in same period of 1956. Also this week, Electronic Industries Assn. (formerly RETMA) officially estimated first half year production at 2,722,139 compared with 3,415,202 in similar 1956 period. June production was 543,778 (72,766 uhf), compared with 342,386 (41,596) in May, 553,025 (78,512) in June 1956.

Radio production was 180,608 (61,537 auto) week ended Aug. 2, vs. 234,034 (84,394) preceding week and 205,697 (132,121) in corresponding week year ago. Radio output for 31 weeks totaled about 7,977,000 (3,158,000) vs. 7,473,574 (2,561,738) in 1956 period. First 6 months' production was placed at 7,187,294 (2,834,676) compared with 6,659,165 (2,313,651) in similar period last year. June production totaled 1,088,343 (416,058), compared with 1,023,771 (396,151) in May and 1,073,775 (296,256) in June 1956.

Trade Personals: Richard T. Orth resigns as Westinghouse v.p. & gen. mgr., electronic tube div. to take executive post with Sanders Associates Inc., Nashua, N. H.; he's one time RCA tube div. v.p.; B. W. Sauter, mgr. of Westinghouse's Bath, N. Y. receiving tube plant, succeeds him . . . Charles A. Daly, Jr. promoted to RCA gen. purchasing mgr.; Thompson H. Mitchell, pres., RCA Communications, adds post of gen. mgr. of new telecommunications div., RCA industrial electronics products; A. R. Hopkins promoted to mgr., industrial electronics marketing dept. . . . Richard F. Gorman promoted to new post of Admiral adv. mgr. . . . David G. Cowden promoted to mgr., special purpose tube operations, Sylvania TV picture tube div. . . . Jerome G. McCormick promoted to DuMont Labs asst. gen. credit mgr. . . . Joel J. Zimmer promoted to asst. national sales mgr., Symphonic Radio & Electronics Corp. . . . Edward Moreau promoted to Olympic regional sales mgr. for 11 western states . . . John J. Moran, ex-Jet Ignition Co. and Philco, named asst. to Norge v.p. Harold Bull . . . James Ewing named sales v.p. of Gabriel Co., succeeding Wm. Klein, appointed merchandising v.p. . . . Wilfred G. Caldwell, ex-National Cash Register, onetime RCA attorney and formerly with Lipincott & Smith, San Francisco—where he authored patent application for Lawrence color tube, appointed CBS-Hytron senior patent attorney.

Sylvania is stepping up radio-hi-fi production—aiming, says TV-radio gen. sales mgr. Robert L. Shaw, at “greater sales to our present distribution and . . . units for other manufacturers.” John R. Suor was named product mgr., radio and hi-fi, for new program. Initial step will be introduction in early fall of 3 new transistor portable radios.

New chairman of Electronic Industries Assn. service committee is Kenneth H. Brown, Westinghouse, who succeeds Joseph A. Hatchwell, DuMont Labs.

DISTRIBUTOR NOTES: Emerson appoints Cincinnati Appliance Wholesalers, 3920 Reading Rd., Cincinnati, replacing Johnson Electric Supply Co. . . . Sylvania appoints Charles Ilfeld Co., 200 First St. N. W., Albuquerque, N. M. (Frank Mapel, pres.) for TV-radio-hi-fi in 24 N. M. counties including Albuquerque, 11 W. Texas counties including El Paso area, 4 southwest Col. counties; G. M. Nutter Inc., 2905 Chester Ave., Cleveland (Emory F. Kloha, pres.) for Cleveland-Akron and 18 northeast Ohio counties; Emory-Waterhouse Co., 1111 Candia Rd., Manchester, N. H. (Charles Hildreth, pres.) for 12 Vt. and 2 N. H. counties . . . Hoffman appoints Bohman-Warne Inc., Hagerstown, Md. (A. H. Warne, pres.) for TV-radio-hi-fi in western Md., eastern W. Va., north-central Va., 3 counties in southern Pa. . . . Westinghouse appoints Ackermann Radio Sales, 3861 N. 35th St., Milwaukee, for CR, receiving and industrial tubes . . . Elliott-Lewis Corp., Philadelphia, appoints Leonard Schwartz sales mgr. of its Motorola div. . . . Penn Appliance Distributors (Motorola), Harrisburg, Pa. promotes James B. Spangler to gen. sales mgr., Motorola div. . . . Westinghouse Appliance Sales names Charles N. Bock N. Y. TV sales mgr., replacing Jules Roth, resigned.

GE award for TV servicemen, based on outstanding community service, includes trophy and \$500 check for charity or public service to be given to 11 servicemen selected by panel of judges. Called “1957 All-American Awards,” selection will be determined by benefits to public in 2 years prior to Sept. 30, 1957. Nominations, by individuals or organizations, should be addressed to All-American Awards Committee, GE, Owensboro, Ky. before Oct. 19, 1957.

GE Appliance Park, Louisville, is on 3-week shutdown, Aug. 5-24—first two weeks for vacation, third week for inventory adjustment. Some 12,000 production workers are affected.

Topics & Trends of TV Trade: TV electrocution of 6-year-old child (Vol. 13:29-31) was tentatively blamed on damage to set during factory assembly this week. Engineering committee of blue ribbon jury in Howard Erenstein inquest found set defective and reported its belief that "during the factory assembly, the 135-volt DC bus was accidentally pinched and wedged between the mounting bracket and the vertical holding control."

Herbert Riegelman, gen. mgr., GE TV receiver div. which made set, issued statement saying ". . . we have been unable to determine how this could have escaped our rigid factory tests, but we are proceeding in a positive fashion to eliminate any possibility of recurrence."

Riegelman went on to say that "we have added extra checks to the stringent manufacturing controls already in existence at the factory. Our distributors, and through them our dealers, are prepared to make an electrical check at no charge on any GE TV portable brought to them, and we urge all owners of our portables to use this opportunity to assure themselves about the safety of their sets."

Other facets of case: (1) UL spokesman said it was "premature to make statement now," that he hadn't received coroner's report. (2) Setmakers continued to describe extra safety precautions beyond UL requirements. (3) Meeting with South Bend Mayor resulted in understanding proposed restrictions on sale of portable TVs would be cancelled (Vol. 13:29) and none imposed without further consultations with Electronic Industries Assn. (4) Westchester County (N.Y.) officials reported spot check of childrens' amusement rides, such as rocket ships, horses, planes, etc., following April electrocution of child, showed 26% dangerous, 49% potentially hazardous, 25% safe; Washington, D. C. officials ordered tests of similar devices in Nation's Capital.

* * * *

Full text of Cook County Coroner McCarron's verdict in electrocution death:

Howard Erenstein came to his death on the 14th day of July A.D., 1957 in St. Francis's Hospital, Evanston, Illinois, from and as the result of electrocution by contact with a television set (in kitchen) of the home of the deceased herein, by the deceased—premises commonly known and described as 9356 North Tripp Avenue, Skokie, Illinois, on July 14th, A.D., 1957—at or about 12:30 p.m.

From the testimony presented, we—the jury find said occurrence to have been accidental:

However, in view of the circumstances surrounding this occurrence, and the many factors involved therein—plus our responsibilities as jurors at this inquest—we, the

Changing pattern in discount house operations is reviewed in Aug. 4 *N. Y. Times* article. It recalls Masters Inc. statement several years ago that the discount house's cost of operation was only 11.2% of sales compared to about 33% for NRDGA members. Citing from stock prospectus, story says "Two Guys from Harrison" discount chain lists 1952 operating costs at 8.8%, 1954 at 10.9%, 1956 at 15.4% and 8 months ended April 30, 1957, at 16.5%. Contributing to discounters' problems, item said, are higher salary costs, advertising expenditures, general decline in sales of major appliances in last 2 years.

Sears, Roebuck's new catalog list prices about same as in spring book: 21-in. table models, \$115-\$190; 21-in. console, \$130-\$250; 24-in. console, \$260-\$280; combinations, \$300-\$310; 17-in. portables, \$93-\$143.

Two-hour closed-circuit telecast is planned Sept. 4 to introduce new RCA color line and announce NBC fall color programming plans. Show will originate in N. Y.

jury make these additional findings and or recommendations:

(1) The television set involved in this accident was found to be defective, in such manner that lethal voltages exist between its cabinet and ground. The probability is very great that the deceased died of electric shock from simultaneous contact with the television set and the grounded metal trim on the kitchen counter-top.

(2) Since many kinds of portable electrical appliances are being used in the American home in ever increasing numbers, and since many new types of portable appliances are marketed, it is desirable that the safety codes and practices used by the industry be strengthened.

(3) The public should realize that, in spite of all safety measures, there always remains the possibility for an accident.

(4) As far as electric shocks are concerned, certain locations in the house are more hazardous than others, namely, the kitchen, bathroom, laundry, basement, and utility room. Any room in which grounded objects, such as water or gas pipes are located, makes possible a low resistance return path for electric current. Therefore, portable appliances should be used with care in such locations.

(5) In case of electric shock, the immediate application of artificial respiration is of great importance, while waiting for the arrival of a physician. The public is urged to become familiar with methods of artificial respiration.

* * * *

Full text of report of engineering committee of "blue ribbon jury":

Statement of Facts—The set was found defective.

A metal part of the case of the vertical holding control was found squeezed through the insulation of the 135-volt DC bus. The connection thereby established caused a combination of DC and 120-volt AC supply voltage to appear between the outside metal cabinet of the television set and ground.

The cabinet was found with the upper right rear corner dented and a supporting brace in the interior out of position.

In comparing a new set with the one involved in the accident, the corresponding 135-volt DC bus was found to be in a slightly different position.

Interpretation of findings—The committee found no relationship between the mechanical damage to the cabinet and the observed electrical defects. The Committee believe that, during the factory assembly, the 135-volt DC bus was accidentally pinched and wedged between the mounting bracket and the vertical holding control.

Sylvania has doubled the number of its TV dealers in past 7 months, Robert L. Shaw, TV-radio div. gen. sales mgr., told Aug. 8 sales seminar sponsored by Research Institute of America at New York's Waldorf-Astoria Hotel. He said "Sylvania's leadership in the development of 110-degree TV sets and our unique marketing and sales promotion methods" also resulted in record first-half factory sales. Shaw gave credit for upsurge to "buy now" approach in advertising, putting emphasis on retailer, and monthly factory promotions designed to increase retail traffic.

Excise tax committee has been set up by NEDA to tell Congress of "hardships that excise taxes have created on the electronic distributor." Alex Brodsky, Allied Radio Corp., is chairman.

TV Week is being observed in Canada Sept. 8-14—same time as in U. S.—by Canadian Assn. of Radio & TV Broadcasters and Canadian Broadcasting Corp.

BOOM IN TRANSISTORS gets bigger, record month by record month. It's heading toward volume which by end of 1957 may be nearly 24 times what it was 3 short years ago.

Figures released Aug. 8 by Electronic Industries Assn. (formerly RETMA) show transistor unit sales for first 6 months this year shot up close (11,199,300) to 12,840,000 total for all 1956, compared with 3,647,000 in 1955 & 1,318,000 in 1954. And any cautious projection of industry statistics indicates 1957 total should reach 30,000,000.

Transistor unit sales hesitated momentarily in April in up-&-out spread this year, according to EIA chart which otherwise shows steady monthly advance from 1,436,000 in Jan. (vs. 572,000 year earlier) to 2,245,000 in June (vs. 1,130,000).

Dollar volume of sales is nearly as spectacular: \$31,249,000 for first half of 1957 compared with \$37,352,000 total for all 1956. In 1955 total was \$9,860,000; in 1954, \$4,760,000.

Increases in unit production are being accompanied by reductions in prices. Latest announced cuts by manufacturers include 15% slice by Motorola in automobile radio power transistors; 33% cut by Philco in high frequency microalloy transistors, 31% cut in entire Philco line of power transistors in production quantities.

Prediction of billion-dollar annual sales within 10 years in over-all tube-replacing semiconductor field, including transistors, came this week from marketing mgr. James H. Sweeney of GE's semiconductor products div.

He told Air Force Reserve Officers Assn. in Dayton Aug. 6 that total semiconductor sales this year alone should top \$140,000,000—increase of 82% over \$77,000,000 last year, 40% more than what most market analysts predicted last Dec. for 1957.

Here is EIA's compilation of transistor sales for first half of 1957, compared with similar 1956 period:

	1957 Sales (units)	1957 Sales (dollars)	1956 Sales (units)
January	1,436,000	\$ 4,119,000	572,000
February	1,785,300	5,172,000	618,000
March	1,904,000	5,321,000	708,000
April	1,774,000	4,880,000	832,000
May	2,055,000	5,636,000	898,000
June	2,245,000	6,121,000	1,130,000
TOTAL	11,199,300	\$31,249,000	4,758,000

Cumulative manufacturers' sales of receiving & TV picture tubes declined in first half of 1957 compared with corresponding 1956 period, according to EIA. Totals for receiving tubes in 6 months this year were 221,175,000 worth \$190,461,000 vs. 227,656,000 worth \$184,856,000; for picture tubes, 4,814,659 worth \$86,987,031 vs. 5,152,743 worth \$94,795,945. June was up over May this year, however. EIA's monthly breakdown:

	Picture Tubes		Receiving Tubes	
	Units	Value	Units	Value
January	760,860	\$13,594,525	37,571,000	\$31,170,000
February	728,363	13,134,778	44,460,000	36,631,000
March	833,257	14,850,847	43,010,000	37,007,000
April	628,338	11,394,043	27,970,000	25,384,000
May	758,328	14,031,519	32,836,000	28,955,000
June	1,104,013	19,981,319	35,328,000	31,314,000
Total	4,814,659	\$86,987,031	221,175,000	\$190,461,000

Sylvania TV cabinet plant at High Point, N. C. was sold this week to Dwight L. Phillips, Charlotte builder and investor, for \$325,000. Sylvania plant mgr. R. C. Jenkins will continue as plant mgr. for new owner.

TV-electronics servicing will be \$8 billion business by 1975, RCA tube merchandising mgr. H. F. Bersche predicted this week. He also told Texas Electronic Assn. that replacement tube market may hit 185,000,000 in 1957.

COLOR TV story in Aug. Fortune describes RCA as reorganizing for profit—"for the kind of profit that will make the corporation the blue chip RCA must be if it is to raise the money that will be needed for leadership in this growth industry."

Article by Wm. B. Harris is fourth and final in series on electronic industry. It says RCA admits loss of \$14,000,000 before taxes on color last year—bringing total RCA cost of color to over \$100,000,000.

New RCA pres. John L. Burns is quoted as giving this estimate of his job: "(1) To get color off our backs. (2) Institute a major internal profit improvement program. (3) Plan where we go from here."

Story details battle over color with RCA on one side, GE, Philco, DuMont on the other, so-called "neutral" manufacturers preferring to sit on sidelines until winner is named. Article says "GE, while working independently on its own color system, has also bought a license on Philco's one-gun tube, called Apple."

"Make-or-break" year for RCA color drive could be 1957, as story points out up to 130,000 color sets had been sold up to this year—110,000 by RCA. "If 225,000 sets are sold up to this year—110,000 by RCA. "If 225,000 sets are into homes, it would require only modest sales increases over the next three years to give the country one million sets in use sometime in 1960."

Million mark, article says, is probably close to magic figure that will attract advertisers and force nearly full-time broadcasting of color. Story then envisions rapid growth to production rate of 750,000 color sets a year, adding that "unless GE-Philco axis can bring its system to market well before 1960, its chances of cutting down RCA are slim. By 1960, RCA should have improved product enormously and reduced prices radically . . ."

One advantage already gained by RCA color drive, says story, is that 257 of nation's broadcasting stations, reaching 96% of TV homes, have color-broadcasting facilities.

Radio station sales and transfers reported this week: KLAD, Klamath Falls, Ore. by Phil Jackson for \$175,000 to Burt Levine and associates (Levine is gen. mgr. & principal owner of WROV, Roanoke, Va., also principal in KOA, Oklahoma City) . . . KEOK, Ft. Dodge, Ia. by H. W. (Dutch) Cassill and associates for \$150,000 to American Bestg. Stations Inc., licensee of WMT, Cedar Rapids (Wm. B. Dolph, pres.), which has interlocking ownership with WMT-TV, Cedar Rapids and radio stations KJBS, San Francisco & KMYR, Denver . . . WABR, Winter Park, Fla. 60% by Ray H. Gunkel Jr. for \$126,500 to James H. Sawyer, increasing holdings from 40% to 100%; WABR also holds CP for WEAL-TV, Orlando (Ch. 18) and Sawyer controls radio WKKO, Cocoa, Fla. . . WWRI, West Warwick, R. I. by Paul Oury for \$109,000 to Grelin Bestg. Co., its principals being Melvin C. Green, now with *Time's* Twin State Bestg. Inc., and Lester W. Lindow, on leave from WFDF, Flint, as exec. director of AMST . . . KSON, San Diego, by C. Fredric & Dorothy Rabell (keeping KSON-FM) to Jack O. Gross, ex-KFMB-TV & KFMB stockholder, in deal which involves swap of KSON for Gross' KXOC, Chico, with Rabells also getting \$60,000 . . . KHUB, Watsonville, Cal. by Wm. & Dorothy Morgan for \$60,000 to F. T. Crennan of San Francisco. Brokers: KLAD & KEOK, Blackburn & Co.; KHUB, Hamilton, Stubblefield, Twining & Assoc.

NBC BOUGHT WJAS-AM-FM, Pittsburgh, this week, filling out its ownership limit of 7 radio & 7 TV stations under FCC rules and giving network a Pittsburgh outlet for first time since Westinghouse withdrew KDKA affiliation in June 1956 (Vol. 12:28).

On air since 1921, 5000-watt WJAS was purchased from pres. H. Kenneth Brennen of owner Pittsburgh Radio Supply House Inc. for reported price of \$725,000, subject to FCC approval.

NBC also owns WRCA-TV & WRCA, N. Y.; WNBC & WKNB, New Britain-Hartford; WBUF, Buffalo; WRC-TV & WRC, Washington; WNBQ & WMAQ, Chicago; WRCV-TV & WRCV, Philadelphia; KRCA, Los Angeles; radio KNBC, San Francisco.

Los Angeles wired pay-TV franchises for Skiatron and International Telemeter-Fox West Coast Theatres were held up by city council after Skiatron Electronics & TV (developer of pay-TV system being promoted by separately incorporated Skiatron TV) urged that it look into anti-trust angles of Telemeter-Fox application. Council has scheduled receipt of formal bids on the franchises for Aug. 21, but wire from Skiatron Electronics—citing fact that both Telemeter's parent Paramount Pictures and Fox West Coast's parent National Theatres were operating under anti-trust consent decrees—prompted it to postpone receipt of bids until after special council hearing Sept. 18.

Surprise walkout by NABET members in 5 cities temporarily disrupted ABC-TV night network schedules Aug. 5, forcing substitution of western movie for *Lawrence Welk Show* originating in Hollywood. Union technicians started "writing grievances" in N. Y., Chicago, Philadelphia, Hollywood & San Francisco in protest against local handling of network premiere of *American Bandstand* from WFIL-TV, Philadelphia, NABET complaining station employes took work away from network-employed union members under contract. Dispute was settled before midnight.

"Operation Shoestring"—do-it-yourself closed-circuit TV set-up for less than \$3000 in Euclid Elementary School, Schenectady—was described this week by Bernard F. Haake, asst. to supt. of schools, as answer to educators who think \$20,000-\$40,000 investment is needed for system. School employes themselves installed cables for GPL vidicon camera with interchangeable lenses, picked up 3 used TV sets for \$40 each, utilized existing movie sound amplifier for independent sound system. Special lessons were televised in one classroom, carried to 3 other classrooms, with 150 sixth grade children participating.

MBS changed hands officially Aug. 8, RKO Teleradio Pictures turning over radio network to group headed by mgr. Paul Roberts of KRKD-FM, Los Angeles, and Los Angeles oilman Armand Hammer (Vol. 13:30), former becoming pres., latter chairman. Other directors are treas. H. Roy Roberts (no relation), Ojai, Cal. oil & real estate operator; secy. Frank B. Barton, Los Angeles lawyer; exec. v.p. Bertram J. Hauser, ex-MBS & NBC; Arthur Brown, pres. of Starrett Corp., N. Y.; L. M. Halper, pres. of Halper Construction Co., Los Angeles.

Failure of negotiations with AFM by major motion picture producers for reduction of 5% fee on TV sales of post-1948 features was reported this week. AFM pres. James C. Petrillo, was said to have told producers he could make no concessions in existing contracts, calling for payment of 5% of gross sales into union's Music Performance Trust Funds, unless they made concessions in employment of musicians. Talks may be resumed.

TV spot expenditures totaled \$118,870,000 in second 1957 quarter for 320 stations compared with \$116,935,000 for 321 surveyed in first quarter (Vol. 13:21), according to TvB. On gross-time rate basis TvB found 10% increase over corresponding 1956 quarter in spot spending on 279 stations reporting for both quarters. Biggest increase was in partic. expenditures. "Many advertisers are taking advantage of plan discount buys available on most stations, pres. Norman E. Cash observed. Top 5 TV spot spenders in second quarter were Procter & Gamble (\$6,518,900), Brown & Williamson Tobacco (\$3,322,300), Continental Baking (\$2,695,000), General Foods (\$2,419,000), Sterling Drug (\$2,197,300). Complete quarterly report is available from TvB, 444 Madison Ave., N. Y. 22.

TV's audience is up, radio's down, TvB reported this week in analysis of Nielsen figures for March showing "4,300,000 more families tuned to TV each week and 1,000,000 fewer families to radio" compared with year earlier. "Despite radio's larger number of homes (47,400,000 vs. 39,300,000 in March 1957), TV reached more than twice as many homes per minute in a 24-hour period (9,500,000 vs. 4,200,000 homes)," TvB report said. This estimate of TV gain over radio was in apparent contradiction to trend noted last week by Sindlinger & Co., which said radio listeners (71,335,000) outnumbered TV viewers (68,967,000) in week of July 6, that radio audience has continued to surpass TV's this summer (Vol. 13:31).

FTC consent order approved this week prohibits Schick Inc. from misrepresenting "free" home trials of its shavers and from selling used razors as new in promotion campaigns on TV and in other media. In agreeing to order, based on FTC complaint issued April 30, 1956, Schick did not admit any violation of Federal Trade Commission Act alleged by Commission, which had charged that all dealers were not required to provide "free" trials and that company advertised reconditioned shavers as new & unused. Case predated FTC's TV-radio monitoring drive against fraudulent advertising on air (Vol. 13:31).

NARTB will enter precedental "equal-time" libel suit in Jamestown, N. D. as friend of court, filing brief next month. Background of case: Farmers Union is appealing district court ruling which cleared radio WDAY of libel charge based upon statements made by 1956 minor party congressional candidate speaking over station under equal-time rules of Communications Act (Sec. 315). NARTB chief attorney Douglas Anello will participate in arguments scheduled for Oct., with final decision due by late fall.

Two applications for TV stations and 7 for translators were filed with FCC this week, bringing total to 120 (34 uhf) for stations, 43 for translators. Station applications: For Duluth, Ch. 10, by principals of WREX-TV, Rockford, Ill., which is being sold to Bob Hope & associates; for Idaho Falls, Ida., Ch. 8, by radio KIFI. Translator applications were for Ukiah, Cal. (2); Durango & Salida, Colo.; West Richmond, Wash.; San Saba, Tex.; Cottage Grove, Ore. [For details, see *TV Addenda 25-B* herewith.]

Senate confirmed appointment of Frederick W. Ford to FCC by unanimous consent Aug. 5. He probably won't be sworn in until late this month, however, since Commission won't resume meetings until Sept., and because of necessity to complete his work at Justice Dept., where he is asst. deputy attorney general.

NTA is negotiating for purchase of KMGH-TV, Minneapolis-St. Paul, now 75% owned by investment group headed by TV film distributor Sy Weintraub, 25% by Loew's Inc. NTA refused comment this week on deal.

SUMMARY-INDEX OF THE WEEK'S NEWS — August 17, 1957

OVER-HORIZON TV HOP to Cuba may be ready for World Series, full TV operation by year's end. Mexico striving for live link in time for series (p. 1).

PHILCO PROTESTS renewal of NBC Philadelphia stations, questioning fitness because of anti-trust charges against RCA, must-buy, option-time (p. 2).

JACKSONVILLE'S WFGA-TV goes on air Sept. 1 as NBC-TV affiliate, bringing third outlet to city. TV stations now total 504-90 uhf. (p. 5).

PUBLIC SERVICE PROGRAMS grow in advertisers' favor; Monsanto's \$2,000,000 sponsorship of CBS-TV's new science series shows acceptance trend (p. 4).

RETAIL TV SALES at July record, considered upswing sign; 7-month figures show declines of 200,000 in inventory, production 18%, sales 3% (p. 6).

TV PRODUCTION hits weekly high level for year in week ended Aug. 9. Week's total of 169,148 shows set-makers' confidence in fall sales (p. 6).

NARDA SURVEY shows average TV-appliance salesman makes \$102.50 weekly on salary-commission basis; average monthly net sales \$6664 (p. 6).

CBS INC. HAS BEST FIRST HALF in history with consolidated earnings up to \$10,199,193, nearly double income in 6 months of 1956 (p. 7).

'SCATTER' TV LINK TO CUBA 'BY FIRST OF YEAR': The "when" of U. S.-Cuba live TV link is still uncertain, but it seems almost sure thing by first of 1958, might even be tried for World Series in Oct. That's what we gleaned from trip to Miami this week to inspect 185-mi. "scatter" link which goes into operation for telephone Sept. 12.

The joint AT&T-IT&T venture will handle TV all right, said AT&T general methods engineer Fred G. Hollins, "but we're in no position yet to entertain TV requests for time." Nonetheless, AT&T this week filed TV tariff with FCC, calling for \$600 first hour, \$150 for each additional hour. Hollins stated that "we expect to get TV quality as good as the TV networks."

Networks are champing at the bit to use link for TV. NBC's Wide, Wide World topkick Barry Wood told us he's "dying to do it," said the "potential is fantastic." Emanuel Sacks, NBC-TV v.p. for network programs, said "we've been thinking about it" but that regular U. S.-Cuban programming isn't likely until "around the first of the year" at least. At any rate, NBC-TV will give baseball-mad Cubans World Series if facilities are ready—and the betting is that they will be. Spokesmen for CBS-TV & ABC-TV expressed wait-&-see attitudes toward project.

Joint system costing \$3,000,000 will be operated on 840 & 880 mc by AT&T at Florida City, 35 mi. south of Miami, and by Radio Corp. of Cuba (IT&T) from Guanabo, 14 mi. from Havana. Sites will have conventional microwave to Miami & Havana, respectively.

System is capable of carrying 200 telephone calls and 2 TV programs in each direction, will be limited initially to 36 phone circuits (supplementing 50 existing cable circuits) and one TV channel.

"New era in international communication" was hailed by pres. Henri Busignies of IT&T subsidiary Federal Telecommunications Labs which engineered much of the over-horizon equipment. "The perfection of the technique to a point where we will have world-wide TV," he said, "is no longer an idle fancy."

IT&T is now building these additional non-TV scatter systems: Sardinia-Minorca, Puerto Rico-

Dominican Republic, Spain-Morocco, Norway-Arctic, NATO countries in southern, central & northern Europe—latter 3 military.

A competitive scatter system to Cuba has been authorized by FCC, but its principals are silent on progress. Grantee is Florida Micro Communications Inc., headed by Miles DuKet of Miami, proposing 800-mc link from Tavernier, Fla. to Matanzas, Cuba (Vol. 13:22). It said it would charge \$500 an hour.

Mexico, too, is anxious to complete network circuit to U. S. before World Series begins. However, plans now are tentative and are being studied by engineers, completion expected in week.

Survey is being made to determine feasibility, but if current plans work out country's 5 interconnected stations will be able to carry programs from U. S. for first time. As disclosed to us by officials of Telesistema Mexicano, Mexico's TV chain plan is to install receiver and microwave transmitter at Ciudad Victoria to pick up off-air transmissions from Harlingen, Tex.—about 220 mi. away.

Ciudad Victoria microwave would then beam signal to 8000-ft. Mt. Zamorano TV transmitter near Queretaro. From there, signals would be picked up off-air at 14,000-ft. Cortez Pass transmitters, thence by Mexico City's local stations.

Series thus would be available to 10 or 11 of Mexico's most populous states via 5 TV stations. If installation is found feasible, Telesistema intends to maintain it permanently with hopes of making link reversible so that special programs from Mexican capital may be seen in U. S., Canada & Cuba.

PHILCO CONTINUES NEEDLING RCA-NBC: Resuming jabbing at RCA, Philco began new round this week. Having started \$150,000,000 treble-damage anti-trust patent suit against RCA in Jan. (Vol. 13:3), Philco probed for new opening this week by filing protest with FCC against renewal of licenses of NBC's WRCV-TV-AM-FM, Philadelphia.

NBC isn't a fit licensee on its own or as subsidiary of RCA, Philco charged, iterating patent-monopoly charges against RCA by Justice Dept., questions of "pressure" by NBC against affiliates on option-time and must-buy practices, etc.

Philco insists that hearing must be held on NBC Philadelphia stations' renewals. Reason that only Philadelphia stations were picked, among all NBC owned-&-operated stations, apparently, was that it was "ripe" (protest must be filed within 30 days of FCC action) and because it's in Philco's home town. Philco pioneered the TV station as WPTZ, later sold it to Westinghouse (claims NBC forced it), which in turn sold it to NBC.

Whether FCC is absolutely obligated to hold hearing on Philco allegations isn't certain. Up to now, in similar cases, Commission has held that Justice Dept. has primary jurisdiction on anti-trust matters and has granted license renewals in questioned cases contingent on outcome of Justice action. Philco asserts law requires Commission to act on its own in such cases, irrespective of Justice moves. Law requires FCC to make up its mind within 30 days on such protests; Philco's was filed on Aug. 14.

Basically, Philco alleges that it "is injured both as a manufacturer competing with RCA in the sale of its products and as an advertiser affected by the restrictive practices of NBC and the broadcasting stations which NBC owns and operates." It claims that NBC stations "afford RCA a vast amount of preferential publicity which is not available to Philco or other manufacturers who compete with RCA."

For example, Philco says: (1) NBC stations play up news of RCA activities out of proportion to their news value. (2) NBC constantly refers to RCA as the "pioneer and developer of compatible color." (3) "Today" program emphasizes its origination in "RCA Exhibition Hall." (4) NBC stations include "RC" in their call letters.

In addition, Philco alleges, NBC's option-time and must-buy practices have "rendered the sponsorship of a network program in the preferred listening periods prohibitively expensive, and has foreclosed the use of those periods to Philco on any non-network basis other than spot advertising."

Protest goes on to list all litigation pending against RCA—by Zenith, Justice Dept., ASCAP, et al. It also refers to Congressional committee questions raised about network practices.

Philco's conclusion: "It is clear that the Commission is required by statute . . . to find affirmatively that the public interest will be served by any renewal such as was here granted without hearing. That responsibility can not be shifted to the Dept. of Justice and the courts simply because there is an anti-trust litigation problem involved."

Commissioners (only Lee & Mack on hand) and staff are naturally cautious about commenting on protest. Our guess is that there will be a split vote, more likely against holding hearing than for it. Commission usually hates to get into middle of these things.

Personal Notes: Ralph S. Hatcher promoted to national mgr. of ABC-TV station relations . . . Leslie A. Harris promoted to new post of national spot sales coordinator for ABC-TV o-&o stations . . . Oliver Treyz, head of ABC-TV, named chairman of Brand Names Week (April 13-20) . . . Gunnar O. Wiig resigns as exec. v.p. of radio KQV & TV City Inc., Pittsburgh, to join WROC-TV, Rochester, N. Y., as gen. mgr. . . . Wm. Bloom, ex-20th Century-Fox & Columbia Pictures, joins NTA as exec. producer . . . Ben Baylor resigns as gen. mgr. of WANE-TV, Ft. Wayne; R. Morris Pierce, managing director, assumes his duties; John Keenan, ex-WNEM-TV, Bay City-Saginaw, named sales director . . . James J. Kilian, program mgr. of WAAM, Baltimore, named operations mgr. of Westinghouse station which becomes WJZ-TV in Sept.; Joel Chaseman succeeds him as program mgr. . . . Charles W. Brodhead, ex-CKLW-TV, Windsor-Detroit, named program director of upcoming WLWI, Indianapolis (Ch. 13), due in Sept. . . . James T. (Jim) Ownby, owner of radios WJXN, Jackson, Miss., and KONI & KELA, Phoenix, named MBS station relations field director . . . Joseph Kahnke named engineering director of WTCN-TV, Minneapolis; Warren Fritze succeeds him as chief engineer . . . Byron (Barney) Ogle, ex-NARTB station relations, joins Hamilton, Stubblefield, Twining brokerage firm, headquartered in Chicago as midwest & northeastern rep, succeeded at NARTB by Russ Severin who has served on staff of several TV & radio stations . . . Mike Schaffer, ex-WDBJ-TV, Roanoke, named promotion director of upcoming WAVY-TV, Portsmouth-Norfolk (Ch. 10), due in Sept. . . . Charles Payne, ex-Bloom Adv., Dallas, heads new Dallas office of rep Peters, Griffin, Woodward at 335 Merchandise Mart (Riverside 7-2398) . . . Clarice Bradley, ex-Holdrege (Neb.) *Daily Citizen*, named sales development director of KSBW-TV, Salinas-Monterey, and KSBY-TV, San Luis Obispo . . . Dale L. Moudy, ex-Mid-Continent Bestg. Co., joins ABC as radio network director of special stations services . . . Benjamin B. Bauer, ex-Shure Bros. Inc., Chicago, heads audio & acoustical research section of CBS Labs . . . Aaron Beckwith resigns as business development director of NTA . . . John D. Hymes resigns as research-merchandising director of KGO-TV, San Francisco, to join Gordon-Hymes & Staff public relations firm.

Obituary

Wm. T. Kilborn, 59, Pittsburgh industrialist who was a director of American Broadcasting-Paramount Theatres, died Aug. 14 in West Penn Hospital there. He was pres. of Fort Pitt Mfg. Co., Pittsburgh, and Flannery Mfg. Co., Bridgeville, Pa. His widow survives.

Charles M. Gowdy, previously legal asst. to former FCC chairman George C. McConaughy, named compliance officer of Federal Housing Administration.

Radio Station Sales Reports: WTMV, East St. Louis, Ill. by On The Air Inc., also licensee of WGBF, Evansville, Ind. (Alvin Eades, pres.) for \$212,500 to Robert W. Day (90%) of Albert Frank-Gunther Law N. Y. adv. agency and Donald H. Richardson, D. C. realtor . . . KANV, Shreveport, by Travis T. Hailey for \$100,000 to John M. McLendon, also 100% owner of radio KOKY, Little Rock and 50% of WNLA, Indianola & WOKJ, Jackson, both Miss. . . . KTKT, Tucson, 50% by Thomas J. Wallace for \$90,000 to Art Linkletter & John Guedel . . . KAFP, Petaluma, Cal. by partners A. T. Shields, Corinne Shields, G. M. Hauser & A. D. Thomas for \$75,000 to Dr. A. T. Shields (50%), v.p. & mgr. of radio KYA, San Francisco, Irving C. Phillips (25%), Cal. drug chain owner Thomas J. Long (12.5%); Hamlin Co. real estate (12.5%), controlled by O. D. Hamlin, Federal District Court Judge, San Francisco . . . WSKI, Montpelier, Vt. by Paul Perreault for \$75,000 to Ellis E. Erdman & Nayte Schoonover, each also owner of 25% of WEBC, Owego, N. Y.; Erdman also owns 32% of WTKO, Ithaca, N. Y. . . . WLBG, Laurens, S. C. by J. R. Dalrymple Jr. and associates for \$63,000 to Charles W. Dowdy, ex-owner of AMs in Bainbridge, Ga. & Gainesville, Fla. . . . KTNM, Tucumcari, N. M. 55% by David R. Worley, Lloyd Hawkins & Bruce Zorns for \$63,000 to KTNM mgr. Howard L. Maudlin, who will hold control, 4 minority owners retaining stock . . . KHAM, Albuquerque, by Rex A. Tynes for \$50,000 to ½ owners J. L. Anderson, KHAM mgr. and Carl Hedges and son Carl, local businessmen. Brokers: WSKI & WLBG, Allen Kander & Co.

Speaker's guides on key broadcasting questions have been sent to TV-radio members by NARTB. TV topics: "Advertising and the General Welfare," "Freedom Under License," "In the Public Interest," "The Public's Right to Know," "The Business of Broadcasting," "Careers in TV," "The TV Code," "The TV Generation," "TV Looks to the Future." Similar radio topics are included.

Big merger afoot: Ruthrauff & Ryan Inc. and Erwin, Wasey & Co. were reported in negotiations this week for one of biggest mergers in advertising industry which would make combined agency one of 10 largest in country. Each billed estimated \$40,000,000 in 1956.

Ga. Assn. of Bcstrs. elects these officers: John W. Jacobs Jr., WDUN, Gainesville, pres.; Frank Gaither, WSB, Atlanta, 1st v.p.; Ralph N. Edwards, WWGS, Tifton, 2nd v.p. Ben Williams, WTOC-TV & WTOC, Savannah, was named a director.

Caravel Films Inc. opens new production center in Sept. at 20 W. End Ave., N. Y. Midtown headquarters will include offices, 75x100-ft. stage, facilities for set construction, animation, special effects, cutting, etc.

Henry Geller leaves FCC litigation div. to join Justice Dept. appellate branch, anti-trust div., Sept. 3.

Telecasting Notes: Growing sponsor acceptance of "poor-cousin" public service programming is underscored by sale this week (for reported \$2,000,000) of 10 *Conquest* shows on scientific achievement to Monsanto Chemical Co. by CBS-TV for upcoming season. National Academy of Sciences & American Assn. for Advancement of Science are cooperating in 60-min. program series supervised by CBS public affairs director Irving Gitlin. Other indications of new recognition by advertisers that public service can pay: Eastman Kodak is likely sponsor of *Let's Take a Trip* in fall, Prudential Insurance is underwriting forthcoming *Twentieth Century* series, both on CBS-TV . . . "Multi-million dollar" daytime deal has been closed by ABC-TV with Sweets Co. of America (Tootsie Rolls, etc.) for 4 action-adventure series starting in fall. Sweets will be partic. sponsor of *Superman*, alt. sponsor of *Wild Bill Hickok*, *The Buccaneers*, *Tales of the Texas Rangers* . . . Million-dollar house ad campaign on NBC-TV sustaining shows and o-&o stations features network's "August Theme" promotion for fall programs. Dozen one-min. filmed spots clipped from kines of past & upcoming shows repeat: "Remember what was on last year? But stop! Let's look ahead . . . There's something for everyone!" . . . 50-Girls-50: "Miss America" contest will get live CBS-TV coverage in Atlantic City's Convention Hall Sept. 7, Sat. 10:30 p.m.-midnight, sponsored by Philco thru BBDO. "For the first time," CBS-TV announces, "TV audiences will see in person all of the beautiful contestants." . . . "Business Service TV"—giving employers chance to catch employes in their homes Sat. mornings to talk things over—is unique proposal offered by WOR-TV, N. Y. Idea is to sell pre-program schedule hours to companies whose business messages would be carried to home sets

instead of to closed-circuit screens in hotels, theatres, etc. Unlike regular closed-circuit operation, audiences wouldn't be selective, but WOR-TV thinks there'd be public relations advantages for business groups in letting public in on intra-company workings. And station may provide scrambling device if privacy is required. Brochure put out to adv. agencies offers 30 min. for \$1500, hour for \$2500, 2 hours for \$4000 . . . *Invasion from Mars*, which came close to panicking country when Orson Welles did it on CBS radio network Oct. 20, 1938 in dramatization of H. G. Wells' *War of the Worlds*, will be reenacted in "The Night America Trembled" on *Studio One* sponsored by Westinghouse on CBS-TV Sept. 9, Mon. 10-11 p.m. Edward R. Murrow will be narrator for show written by Nelson Bond . . . Durable consumer goods: Rock of Ages Corp., Barre, Vt., buys 6 one-min. parties. on NBC-TV's *Today* starting Sept. 20, thru Harold Cabot & Co., Boston, urging viewers to look for its brand name first when buying tombstones . . . Queen Elizabeth II makes first North American TV-radio appearance Oct. 13 on CBC, Ottawa, addressing nation on visit to Canada with Prince Philip; no U. S. network pickup has been scheduled yet, according to Canadian Embassy in Washington . . . Foreign TV market now accounts for 20% of gross business of CBS TV Film Sales, which reports 12 recent deals in 5 countries . . . *Cops & robbers chase* was filmed this week for news show on WBZ-TV, Boston, by victim—station's own cameraman Phil Galligan. He saw 2 youths breaking into his parked car, chased them to subway station, shooting film as he ran until 2 policemen cornered them.

■
CBS-TV Affiliates Assn. directors meet Aug. 29-30 in Colorado Springs.

Electronic bird calls, deadliest lure yet for geese & ducks in hunting season, probably will be banned by Fish & Wildlife Service, according to grim story by James A. Reynolds in Aug. 15 *Wall St. Journal*. Tape recordings of babble of waterfowl while feeding, amplified & played back across hunting grounds through directional speakers, are so effective that "preservation of the species" is threatened, Asst. Interior Secy. Ross L. Leffler says. Use of recordings by hunters at one east coast spot last fall brought 2000 geese hovering over blind, where limit was downed in 90 minutes. Other hunters lured geese from federal bird refuge 500 yards away by playing calls. *Journal* story says "typical outfit" in electronic bird call market is Electronic Engineering Co., Easton, Md., which produces transistor-equipped device distributed by Animal Trap Co., Lititz, Pa.

Survey of classroom TV uses will be conducted by National School Boards Assn. under \$68,000 grant by Ford Foundation's Fund for the Advancement of Education.

Single unit closed-circuit TV camera weighing 12 lbs. is offered by GPL (Model PD-500) for \$1250. Designed to complement GPL's Model PD-150 camera chain, self-contained unit is 5x7½x12-in.

New rep: KTLA, Los Angeles, to Peters, Griffin, Woodward Aug. 15 (from Raymer).

Jack Benny's radio show, unsponsored 2 years in period when sales of half-hour or hour nighttime radio programs to single sponsors have been rare, resumes on CBS Sept. 29, Sun. 7-7:30 p.m.—fully sponsored by Home Insurance Co. "This may well mark a high point in network radio's upsurge," said John Karol, v.p. in charge of radio network sales, pointing also to \$5,000,000 CBS-Ford package radio deal in May (Vol. 13:18). Price of Benny radio series, which will repeat earlier shows, wasn't mentioned. Comedian's TV show will continue to be sponsored on CBS-TV by American Tobacco Co.

TV solves overcrowding at Bethel Lutheran Church, Madison, Wis., where GE closed-circuit system carries services to two 24-in. receivers in adjoining chapel and to third-floor nursery room. Camera equipped with viewfinder & 3-lens rear-controlled turret is mounted on control console in church balcony. Church was built in 1941 to seat 750, but parish has grown from 1100 to 5073 members.

NARTB kit, containing promotion and program ideas for National TV Week, goes to each of 3 networks and 503 TV stations for use in Sept. 8-14 campaign. Broadcasters' theme is "Television—a Member of the Family" (Vol. 13:28). Other sponsors are Electronic Industries Assn. (formerly RETMA), NARDA, TvB.

New KIRO-TV, Seattle (Ch. 7), becomes primary CBS affiliate effective next Feb. 8.

New and Upcoming Stations: WFGA-TV, Jacksonville, Fla. (Ch. 12) started test pattern operation 3 p.m. Aug. 14, makes debut as NBC-TV affiliate Sept. 1. It's third outlet in city already served by pre-freeze WMBR-TV (Ch. 4) and WJHP-TV (Ch. 36), which began in Dec. 1953. On-air total now stands at 504 (90 uhf).

WFGA-TV's new building at 1070 E. Adams St. houses 50-kw transmitter and equipment includes 2 live and 2 film color cameras. It has 900-ft. Ideco tower with 12-section superturnstile antenna. Owners are contractors George H. Hodges & Alexander Brest, each with 26%; Harold Cohn, 19% (also owner of Jacksonville radio WRHC); Wolfson-Meyer Theatre Enterprises Inc., 10% (same interests operate WTVJ, Miami); Mitchell Wolfson, 5%; Sidney Meyer, 5%.

Jesse H. Cripe, ex-asst. operations mgr. WTVJ, is gen. mgr.; Ralph W. Nimmons, ex-mgr. of WFAA-TV, Dallas, gen. sales mgr.; Willard (Bill) Franker, ex-sales mgr. of WJHP-TV, local sales mgr.; Carl Bruton, ex-WTVJ, production & acting program mgr.; Harold S. Cohn, v.p. for news, sports & public affairs; Harold Baker, ex-WSM-TV, Nashville, news & special events director; Bill Walker, ex-KBTB, Denver, promotion mgr.; H. L. Wingfield, chief engineer. Base hour is \$600. Rep is Peters, Griffin, Woodward Inc.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WTIC-TV, Hartford, Conn. (Ch. 3), with Sept. 1 target for start as independent, notified FCC it began equipment tests Aug. 16. It has 25-kw RCA transmitter and 440-ft. self-supporting Ideco tower with 100 ft. 6-section superturnstile antenna on Talcott Mt., 7 mi. W of downtown Hartford. Temporary TV and radio studios on 6th floor of 2 adjoining buildings owned by grantee Travelers Insurance Co. connect with transmitter via microwave. Base hour will be \$800. Rep will be Harrington, Righter & Parsons.

WAVY-TV, Portsmouth-Norfolk (Ch. 10), has Sept. 1 target for ABC-TV programming, reports exec. v.p. & gen. mgr. Carl J. Burkland. It has 12-section superturnstile antenna installed on 1050-ft. Ideco tower and 50-kw RCA transmitter was due to be wired this week. Base hour will be \$700. Rep will be H-R Television.

WBOY-TV, Clarksburg, W. Va. (Ch. 12) now plans to be on air late in Oct. with NBC-TV and ABC-TV, reports Peter Lyman, production mgr. It has requested change to 131.04-kw using 25-kw RCA transmitter on Pinnickinnick Mt., where transmitter house and tower base for 380-ft. Ideco tower are nearly completed. It's part of Friendly Group (Jack N. Berkman, pres.), operator of WSTV-TV, Steubenville, O. (Ch. 9) and KODE-TV, Joplin, Mo. (Ch. 12). Base hour will be \$250. Rep will be Avery-Knodel.

WEEQ-TV, La Salle, Ill. (Ch. 35) will be outfitted as a "complete entity, capable of broadcasting from its own studios," reports v.p.-gen. mgr. Fred C. Mueller of parent WEEK-TV, Peoria (Ch. 43). It will operate as affiliate rather than out-and-out satellite of WEEK-TV. Mueller adds: "When we built WEEK-TV, everybody was eager for us to get on the air with WEEQ-TV. We are going thru this experience again and our work in the LaSalle area convinces us that we would make a mistake to simply feed everything from WEEK-TV to WEEQ-TV." WEEQ-TV, with summer target, has studio-transmitter building ready for 1-kw GE transmitter. Stainless 400-ft. tower and antenna are up. WEEK-TV hour is \$475. Rep is Headley-Reed.

KDUH-TV, Hay Springs, Neb. (Ch. 4), planned as satellite of owner KOTA-TV, Rapid City, S. D., has ordered 6-kw RCA transmitter and 25-kw Standard Electronics amplifier, reports KOTA-TV business mgr. Wm. F. Turner, who doesn't give target date. KDUH-TV will have studio film chain, 500-ft. Ideco tower. KOTA-TV base hour is \$150. Rep is Headley-Reed.

KTWX-TV, Sheridan, Wyo. (Ch. 9) now plans Nov. 1 programming, reports Burt I. Harris, pres. of owner Harriscope Inc., also owner of KTWO-TV, Casper, Wyo. (Ch. 2). It hasn't ordered transmitter, will use 30-ft. Ideco tower on mountain top. Rep will be Meeker.

Tri-Cities Bcstg. Co., holding CP for Ch. 9, Monahans, Tex. expects to get on air first part of 1958, reports J. Ross Rucker, pres.-gen. mgr. & 1/3 owner, who also is pres. & owns 36% of Monahans radio KVKM. Transmitter hasn't been ordered, but station will use 619-ft. Ideco tower. Rep not chosen.

WMVS-TV, Milwaukee (Ch. 10, educational) has changed target to Oct., reports H. E. Barg, asst. executive director. RCA 10-kw transmitter is being installed in transmitter house near WITI-TV at Port Washington & Donges Bay Rds. Alford 4-bay antenna is to be side-mounted soon at 700-ft. level of WITI-TV tower.

WMUB-TV, Oxford, O. (Ch. 14, educational) will be delayed until summer of 1958, grantee Miami U having filed application to change transmitter location from campus to Oak at Spring St., where new building to house radio WMUB (FM) and TV is planned. RCA 1-kw transmitter and other equipment is on hand. It will use 320-ft. Truscon tower with 6-section helical antenna.

CFTM-TV, Trois-Rivieres, Que. (Ch. 13), planned as CBC French Network affiliate, expects to start Nov. 1, reports pres.-gen. mgr. Henri Audet, who has been CBC regional engineer for Quebec. Experiment hasn't been reported, but it will have 300-ft. tower on Mont Carmel, site of studio-transmitter building. Rep not chosen.

RCA shipped two 10-kw transmitters, one for standby, Aug. 15 to upcoming WHDH-TV, Boston (Ch. 2), due in fall; 25-kw transmitter Aug. 16 to upcoming WINR-TV, Binghamton, N. Y. (Ch. 40), due in Sept.; 6-section superturnstile antenna Aug. 12 to KVSO-TV, Ardmore, Okla. (Ch. 12), which got permission this week to change site.

John Day, Ore. translator K77AC began Aug. 10 repeating KIDO-TV, Boise, giving community 2nd outlet—K72AG having started June 2.

Foto-Video Labs appoints new reps: Peninsula Assoc., Redwood City, Cal.; K & M Electronics, Minneapolis; Moore Sales, Detroit.

Japanese TV helps spark country's "almost unbelievable comeback" from World War II, Aug. 16 *Printers' Ink* reports in roundup on commercial progress reflected by 6-fold increase in advertising investment percentage of national income in past 10 years. Introduced in 1953, commercial TV now takes only 2.5% of total Japanese advertising budget, but "TV is certain to occupy in Japan the same position it now holds in the U. S.," according to Juichi Odani of Dentsu Adv. Ltd., Tokyo. *Printers' Ink* says 90% of TV programs on commercial stations are sponsored, that Japanese sets-in-use are expected to total more than 1,000,000 by end of year.

Saudi Arabian TV station being constructed at Dhahran by Arabian American Oil Co. will be represented for program material and other services by Intercontinental Services Ltd., 3 E. 54th St., N. Y., which recently took over Young International Ltd. rep firm (Vol. 13:32).

JULY RETAIL SALES RISE TO RECORD HIGH: Another sign of hoped-for upturn in set sales made appearance this week in preliminary estimate of about 425,000 July TV sales at retail -- best July since record keeping started in 1951.

July figures compare with these for previous years: 1956, 414,587; 1955, 387,509; 1954, 368,634; 1953, 340,406; 1952, 235,038; 1951, 280,525.

The July record marks third time this year retail sales have exceeded comparable 1956 month. Jan. had 623,359 vs. 614,213 in 1956; May had 399,757, compared with 392,080 in May 1956.

July is no great shakes as retail sales month, of course, but this year's nice surge is considered significant by industry statistical experts who feel it's prelude to big fall-winter season. They tell us it may well be first harbinger of trend reversing last year's deceleration -- which saw lower retail sales Aug. through Nov., compared with similar 1955 months.

Healthy inventory figure of about 2,250,000 for all levels of industry at end of July also brings smiles from the graph watchers. Last year it was 2,450,000. Production for first 7 months is down 18% from 1956 but sales are off only 3%.

Many industry leaders are predicting 7,000,000 set sales for 1957, compared with 6,804,000 in 1956. At end of July, sales amounted to about 3,235,000, meaning some 3,765,000 are needed to be sold in last 5 months to reach 7,000,000 -- or an average of about 750,000 per month, not much higher than last year's.

Production: TV output hit new weekly peak for year with 169,148 week ended Aug. 9, compared with 117,438 preceding week and 146,546 in corresponding week one year ago. New high mark tops weekly production totals for every week back to Nov. 16, 1956 and is another sign of setmakers' confidence in sales prospects for balance of year. It was the year's 32nd week and brought TV production for year to date to about 3,369,000, compared with 4,058,597 in same period of 1956. Radio production totaled 192,877 (61,299 auto) week ended Aug. 9, vs. 180,608 (61,537) preceding week and 261,937 (42,491) in corresponding week year ago. Radio output for 32 weeks totaled about 8,171,000 (3,220,000) vs. 7,721,286 (2,611,260) in 1956 period.

Topics & Trends of TV Trade: NARDA survey, based on reports from 141 dealers, shows salesmen average \$102.50 per week income with range running \$80-\$122.50. Average dealer had 4.12 salesmen.

Average monthly sales volume after trades was \$6664 per salesman with most dealers (73) paying salary plus commission; 32 pay straight commission; 13 salary only; 12 salary and annual bonus; 11 commission, salary and annual bonus. Paid vacations were offered by 94% of dealers, 75% group insurance, 12% paid sick leave, 6% retirement plans.

Majority of dealers reported no varying commission scale between TV, major appliances, etc. Most stores based compensation on net sales where trade-ins were included. Few offered long range plans to hold salesmen, only 26 of 95 dealers having definite programs.

Most of salesmen covered (403) work both inside and outside on sales, 162 inside only, 25 outside. Car allowances are provided by 48 dealers, 85 do not. Expense accounts are supplied by only 14 of the respondents.

* * * *

Transparent phosphor "Penetron" tube, including 2-color version, designed for military & industrial uses, will be shown by GE at WESCON in San Francisco Aug. 20-23.

Sales exceeding expectations are reported for new DuMont TV-hi-fi line by pres. David T. Schultz, adding that operations in year's last half "are expected to produce a profitable result for the full year in our receiver operations." He said that DuMont factory inventory was at lowest point in years; that distributor sales to dealers increased for each of last 8 weeks; that last 6-month production quotas will be reached by Nov. 1. He added that sets were moving through normal trade channels, with no liquidations or specials, thus offering "opportunity for normal profit" at all levels.

Sales of \$46,593,000 were chalked up by 41 TV-radio-appliance exporters in 1954, reports U. S. Census Bureau. Operating expenses were 7.7% of sales, including \$1,501,000 for year's payroll. Report also shows there were 13 TV-radio-appliance importers with total sales of \$12,888,000 in same year, operating expenses of 14.9% of sales, annual payroll of \$819,000.

Distributor sales of TV-radio-appliances-electronic parts for first 6 months of 1957 are estimated by U. S. Commerce Dept. at \$1.9 billion compared with \$1.87 billion for similar 1956 period. Sales of retail stores for first half of 1957 are estimated at \$1.85 billion vs. \$1.87 billion in like 1956 period.

Trade Personals: Arnold M. Henderson promoted to Emerson director of sales . . . O. R. Coblantz, ex-Westinghouse and DuMont, appointed Hoffman Radio div. marketing mgr. . . . Robert F. Bender elected IT&T exec. v.p.-finance . . . John J. Kingan, ex-Canadian Marconi v.p.-gen. mgr., appointed RCA Victor Ltd. v.p. and asst. to pres. P. J. Casella; John Moulding, ex-Canadian Westinghouse, named v.p.-technical products, replacing J. L. McMurray who is retiring but continuing as consultant to pres. . . . Morris Sobin, Olympic Radio-TV pres., named N. Y. area chairman of National TV Week promotion . . . Robert T. Scott returns to Westinghouse as community relations mgr. . . . Arthur F. Baldensperger Jr., ex-Sylvania, appointed CBS-Hytron management development coordinator, sales . . . Charles G. O'Brien promoted to Zenith district sales rep for territory including Cincinnati, Jackson, Little Rock, Louisville, Memphis, New Orleans.

Policy committee of Electronic Industries Assn. marketing data dept., appointed this week: Chairman Frank W. Mansfield, Sylvania; Robert S. Bell, Packard-Bell; Russell E. Cramer Jr., Radio Condenser Co.; D. W. Gunn, Sylvania; W. J. Morlock, GE; C. B. Thornton, Litton Industries; Lester Bogen, David Bogen Co.; Bruce R. Carlson, Sprague Electric; James E. Harrison, Texas Instruments; D. J. McCarty, RCA; W. S. Parson, Globe Union; E. R. Sliger, Westinghouse.

New trade association, "Producers of Associated Components for Electronics Inc." (PACE) has been formed in N. Y. as successor to informal Sales Managers Club. Officials of 150-member group: pres., Sidney Harmon, Harmon-Kardon; exec. v.p., David Susser; 1st v.p., Leonard Carduner, British Industries Corp.; 2nd v.p., Edward Rothenstein, Arco Electronics; secy.-treas., Walter Jablon, Mark Simpson Mfg. Co.

Demonstration fee of \$15 for color TV is being charged by Bruno-N. Y., RCA distributor, payment credited toward cost if set is bought. Bruno spokesman said public is hesitant to accept free offers, that experiments with \$15 fee had worked well.

Financial & Trade Notes: CBS Inc. earned \$10,199,193 (\$1.33 per share on 7,651,461 shares outstanding) on revenues of \$186,798,814 in 26 weeks ended June 29 compared with \$5,308,990 (71¢ on 7,487,337) on \$174,274,387 in first 6 months of 1956, when approximately 35¢ per share was applied to losses on discontinuance of CBS-Columbia set manufacturing div. Revenues & sales for period, representing 7% gain over corresponding 1956 half, were highest in CBS Inc. history. Earnings were highest for any first 6 months, second only to record \$10,-974,472 in second 1956 half.

* * * *

Magnavox reports sales of about \$87,500,000 in year ended June 30 compared with sales of \$70,529,646 for comparable period year ago. Profit figures were not available, pres. Frank Freimann said, but noted that 9-month earnings were \$3.53 per shares vs. \$3.04 in similar 1956 period. He attributed sales increase to nearly 20% jump in TV set sales for year, saying June sales—up 30% from preceding June—were record for month. Fourth quarter sales, he said, were about \$19,000,000, an increase of more than \$500,000 from similar 1956 quarter.

Wells-Gardner showed net loss of \$250,000 on sales of \$4,300,000 in first half of 1957 compared with earnings of \$264,000, sales of \$9,677,000 in similar 1956 period, as disclosed in report to SEC.

DISTRIBUTOR NOTES: Hoffman appoints Billings & Schattinger, Fresno, for TV-radio-hi-fi in San Joaquin Valley, replacing discontinued Hoffman Sales div. of Fresno; Momsen Dunnegan Ryan Co., Phoenix, for Ariz. . . . Westinghouse appoints John F. Tigue as north Pacific radio sales mgr., succeeding Lee Chism, transferred to Westinghouse Appliance Sales, Portland, Ore., as sales mgr. of TV, room air conditioners and vacuum cleaners . . . Raymond Rosen & Co. (RCA), Philadelphia, v.p. & co-founder Joseph Wurzel resigns . . . Whirlpool Elisha Gray award goes to Elmer A. Hamburg, pres. of Hamburg Bros., Pittsburgh, for "outstanding individual contribution to the Whirlpool Corp. success" . . . Gough Industries (Sylvania) appoints James Smith acting mgr. of San Diego branch . . . Bruno-N.Y. (RCA) adds RCA Whirlpool kitchens.

TV dumping by companies which discontinued operations was blamed by Trav-Ler pres. Joe Friedman for company's loss of \$370,736 last year (Vol. 13:31). He told stockholders meeting this week that "we are bucking unrealistic competition" in this dumping and added that industry also suffered from production exceeding sales. Small group of stockholders offered resolution making officers' pay ceiling \$12,000. Friedman—who owns more than half of company stock and earns \$75,000 per year—said next board meeting would consider suggestion.

Independent service group formed in Detroit area to handle manufacturers and distributors warranty service, Telectro Service Assoc., 8225 Woodward Ave., reports contract for service on Philco units distributed by Graybar in 5 Mich. counties.

"First exclusive RCA Whirlpool and RCA Victor dealer in America" is claim of Delgato's Home Appliances, Buffalo, which says it is displaying every RCA model produced.

Bombay TV station, proposed by Indian Ministry of Information and Broadcasting, has been called off due to economy drive, reports U. S. Commerce Dept. *Foreign Commerce Weekly*.

General Precision Equipment earned \$2,662,253 (\$2.10 per share on 1,125,806 shares outstanding) on sales of \$93,299,678 in 6 months ended June 30 vs. \$1,154,559 (84¢ on 1,066,579) on \$74,124,196 in first 1956 half. June quarter earnings were \$1,554,521 (\$1.25) on \$49,762,065 compared with \$807,585 (64¢) on \$41,445,373 in corresponding period last year. Backlog totaled \$165,660,000 June 30 vs. \$167,660,000 at end of 1956, according to pres. Hermann G. Place.

Dividends: CBS Inc. "A" & "B," 25¢ payable Sept. 13 to stockholders of record Aug. 30; Magnavox, 37½¢ Sept. 14 to holders Aug. 23; Cornell-Dubilier, 30¢ Sept. 23 to holders Sept. 12; General Precision Equipment, 60¢ Sept. 15 to holders Aug. 28; Famous Players Canadian, 37½¢ Sept. 12 to holders Aug. 22; Indiana Steel Products, 30¢ Sept. 10 to holders Aug. 23.

Texas Instruments reports profit of \$1,719,406 (52¢ per share) for first 6 months compared with \$1,029,847 (31¢) in similar 1956 period. Second quarter earnings were \$930,010 (28¢) vs. \$488,275 (15¢).

Airborne Instruments Labs earned \$190,498 (96¢ per share) in period ended June 30, 1957, compared with \$154,000 (78¢) in similar 1956 half year.

Eitel-McCullough earned \$533,515 (68¢ per share) in first 6 months of 1957 compared with \$817,167 (\$1.04) in similar period last year.

Spectrum-use analysis by special 3-man commission is unnecessary, Office of Defense Mobilization director Gordon Gray has informed Sen. Potter (R-Mich.) and Rep. Bray (R-Ind.), sponsors of bill to establish commission (Vol. 13:16). He said that group would duplicate work already being done; that study of 50-300 mc by special group showed Govt. could give no more vhf to TV; that Govt. needs what it has. However, he said, if Congress wants to study spectrum anyway, it should also examine non-Govt. uses. Rep. Bray tells us he's not satisfied with Gray's answer; that he's sure military has designs on TV Ch. 2-6; that "a professor in Indiana alerted me to it"; that he was unaware military spokesman had flatly denied such intentions (Vol. 13:15); that he was thinking of asking Secy. of Defense point-blank whether military wants to get TV channels; that he wanted to "smoke out" the military.

One application for station and 3 for translators were filed this week, producing total of 121 (35 uhf) pending for stations, 46 for translators. Station application was for uhf Ch. 34, Los Angeles, sought by theatre seat salesman Frederick J. Basset and food firm personnel mgr. Wm. E. Sullivan, latter ex-WKNX-TV, Saginaw. Two translators for Cottage Grove, Ore., on Ch. 74 & 77, were sought by South Lane TV Inc. (F. L. Morris, pres.), while Ch. 75 application for N. Warren, Pa. was resubmitted by Conewango Valley TV Inc. [For details, see *TV Addenda 25-C* herewith.]

Grant of Ch. 6, Butte, Mont. to KOPR is recommended in initial decision issued this week by FCC examiner J. D. Bond after competitor Arthur W. Schwieder dropped out on payment of \$7500 for expenses. Note: Last week's report of decision granting Ch. 13, Biloxi, Miss. to WVMI should be corrected to indicate that Comr. Bartley was the dissenter, favoring WLOX.

Experimental Ch. 6 station in Miami is sought by WITV, Ft. Lauderdale (Ch. 17), which seeks to emulate WJMR-TV, New Orleans. Latter received FCC permission to compare vhf-uhf propagation from same transmitter site; WITV asks same with newly assigned Ch. 6. It specifies construction costs of \$228,275, yearly operating \$70,000.

Newsweek's purchase of 46.22% of KFSD-TV, San Diego (Ch. 10) & KFSD from Fox, Wells & Co. interests in deal involving \$1,502,900 (Vol. 13:30) was approved this week by FCC. Fox, Wells & Co. retains 34.15% of stock, but keeps control by means of stock pooling agreement with minority owners who hold other 19.63%.

Single sideband transmission will be tried experimentally by WABC, N. Y., ABC engineering v.p. Frank Marx stating system provides equivalent of double power, increased fidelity, less distortion in fringe area signal fading.

FTC stipulation agreed to this week by radio KGBX, Springfield, Mo., that it was first to operate there "or otherwise represent its relative position with other stations not in accordance with the facts." Agreement did not constitute admission by station that it violated any law.

First Scottish TV station of ITA system begins transmission Aug. 31 at Black Hill, Lanarkshire, using Marconi equipment. It's fifth ITA station, serves Edinburgh, Glasgow, Dundee, central industrial belt of Scotland.

Cancelling its CP for KSPS, Hot Springs, Ark. (Ch. 9), grantee Video Independent Theatres told FCC it concluded market couldn't support the station.

Upcoming WINR-TV, Binghamton, N. Y. (Ch. 40), due on air Oct. 1, will be optional affiliate of NBC-TV.

MPO TV Films Inc., headed by Judd L. Pollock, has taken over ATV Film Productions Inc.

Advertisers are signing less-than-52-week contracts with TV networks despite "impression" among some national sponsors that full-year agreements are "unalterable requirement," Assn. of National Advertisers reported Aug. 15. Survey in which 69 advertisers responded to questionnaires showed 67 instances in which they "were obliged to make a firm commitment for facilities on a 52-week basis," but in 17 instances agreements were for 26, 35 or 39 weeks. Asked if they preferred shorter periods, 61 said "yes," 3 "no," with 13-week agreements favored by 27. NBC commented that "52-week contracts are normally desired, both by advertiser & network, for prime time periods & programs," but that "naturally, all networks have certain time periods & programs which need not have a 52-week contract."

Pay-TV baseball would have 40% of N. Y. home viewers as customers if it is started there, according to Pulse sampling of 800 TV homes among 5,000,000 in that No. 1 market. No similar poll has been undertaken by Pulse on west coast, where Dodgers & Giants may move for ventures into pay TV (Vol. 13:29-31). But rating service, applying results of N. Y. survey, figures that Dodgers may find "a mint" in No. 2 market in Los Angeles (2,600,000 TV homes) and Giants may find "a mirage" in No. 7 market in San Francisco (1,350,000). Pulse estimates Dodgers would gross \$20,000 more per game through pay TV in Los Angeles than they do now at Ebbetts Field from ticket sales & TV-radio rights, whereas Giants would earn \$10,000 less than they average now at Polo Grounds.

Plumping for toll-TV tests, Aug. 14 *Variety* editorializes: "To condemn it for the reason that it may ultimately affect free video, simply because it'll catch on with the public, is hardly in the spirit of American free and competitive enterprise. There are plenty of considerations on which home-toll can be legitimately attacked but to argue that it should not be tried since it could affect established methods of sponsored telecasting may be doing the anti-toll cause more harm than good."

Regional uhf strategy conference on repeal of 10% manufacturers' excise tax on all-channel TV sets (Vol. 13:29) at next session of Congress will be held Aug. 28 in Erie, Pa. by Committee for Competitive TV. CCT chairman John W. English, treas. Tom Chisman (WVEC-TV, Hampton-Norfolk), exec. director Wallace Bradley and pres.-gen. mgr. Wm. L. Putnam of WWLP, Springfield, Mass., will lead sessions for uhf operators of Pa., Ohio, N. Y., Ill. and New England.

Rate increases: WTTG, Washington, Sept. 1 raises base hour from \$720 to \$1000, min. going from \$132 to \$120. WDSM-TV, Duluth-Superior, July 1, raised hour from \$400 to \$450, min. \$80 to \$101.25. WJTV, Jackson, Miss. Sept. 1, hour \$360 to \$400, min. \$80 to \$90. WMAZ-TV, Macon, Ga. Sept. 1, hour \$360 to \$400, min. \$72 to \$80. Spot increase: WISN-TV, Milwaukee, has raised base min. from \$200 to \$240.

"Man in white suit" TV commercials by American Chiclé Co. for "Roloids" alkalizer, cited as false by FTC's TV-radio monitoring unit (Vol. 13:20), neither misrepresent product nor disparage competing preparations, company said this week in formal answer to complaint filed by agency May 13. American Chiclé asks FTC to dismiss charges.

National TV network advertising increased 2% in first 6 months of year compared with similar period in preceding year, Aug. 16 *Printers' Ink* reports. During same period all national measured media went up 4%. June activity generally was unchanged over May, but TV network showed 3% decline.

SUMMARY-INDEX OF THE WEEK'S NEWS — August 24, 1957

- | | |
|---|---|
| <p>ABOUT 100 NEW STATIONS in sight, based on CPs outstanding and applications pending. Only drastic change in economics seen changing prospects (p. 1).</p> <p>GIANTS MOVE TO SAN FRANCISCO said to have wired pay-TV factor, but nothing is clarified. Jerrold new contender for Bay area cable franchise (p. 2).</p> <p>TOOLS FOR ADVERTISING industries provided in excellent and exhaustive compilations published by Advertising Age and Printers' Ink (pp. 3 & 5).</p> <p>DYNAMIC GROWTH of TV station-network revenues & profits delineated in official FCC figures for 1956. Revenues up 20.4%, profits 26.2% (p. 4).</p> <p>BMI ASSAILED IN SENATE as music monopoly; Sen. Smathers demands ban on broadcasters engaging in music publishing or recording (p. 8).</p> | <p>BREAKDOWN OF PICTURE TUBE SALES—new-set, replacement, export, size. Tube makers' evaluation. No increase in deflection angle seen (p. 10).</p> <p>TV WEEKLY PRODUCTION hits new high for second straight week with total of 179,615, gain of 19,000 over similar 1956 week (p. 10).</p> <p>TV SHIPMENTS to dealers total 2,503,966 in first half of 1957, some 220,000 less than production; 1956 first-half shipments were 2,775,022 (p. 10).</p> <p>WTIC-TV, HARTFORD, plans Sept. 23 start as independent after month of test patterns; other upcoming station reports (p. 7).</p> <p>PAY-TV PROMOTERS scored by Sen. Potter for "aggressive & calculated" campaign to turn TV into "domestic slot machine operation" (p. 14).</p> |
|---|---|

TV ECONOMICS POINT TO 600-STATION CEILING: The vhf spectrum has been squeezed almost dry, in terms of today's station economics. Matter of fact, there's still question whether U.S. could support any huge addition to the 504 stations (vhf & uhf) operating now.

Careful study of existing grants and applications indicates only about 100 more vhf stations in prospect in addition to the 414 vhf operating—if demand by applicants is any criterion, and we think it's the best one going.

Uhf is another story. There are 90 uhf stations on air, plus 123 CPs unbuilt and 37 applications pending. As everyone knows, it would take something drastic to augment the uhf on-air total noticeably—despite ready availability of uhf channels in substantial markets.

Free play of economic forces hasn't had chance to operate fully in TV because of built-in ceiling caused by vhf channel scarcity in desirable markets. So far, however, analysis by CBS economist Sidney Alexander 2 years ago holds up surprisingly well. At that time (Oct. 1955, Vol. 11:42), he estimated country would support only about 600 stations (vhf and uhf), regardless how you sliced engineering standards to drop in more vhf stations. He doesn't look wrong yet.

As of today, only 105 additional vhf stations are in sight. These comprise the 58 vhf CPs unbuilt and 47 channels sought by 85 vhf applicants. Thus: 504 operating stations (vhf & uhf) plus 105 vhf possibilities equal 609. (New uhf construction is likely to be negligible.)

Most of the 47 channels being sought today are in smaller cities. Here's FCC's latest list of cities for which final decisions are yet to come: Alliance, Neb.; Beaumont, Tex. (2 channels); Bowling Green, Ky.; Buffalo, N. Y.; Butte, Mont.; Cheboygan, Mich.; Elk City, Okla.; Elko, Nev.; Flint, Mich.;

Greenwood, Miss.; Hatfield, Ind.; Lubbock, Tex.; Mayaguez, P. R.; Ogden, Utah; Parma, Mich.; Rochester, N. Y.; Toledo, O. Sole uhf hearing listed is for Baton Rouge's Ch. 18.

In addition to foregoing, quite a few significant vhf channels are being litigated in Court of Appeals. However, almost all grantees have been permitted to build and operate pending resolution of litigation. Furthermore, blunt fact is that FCC almost never reverses itself, regardless how badly it gets spanked by court. Incidentally, one long-litigated case washed out this week, when Hartford Telecasting moved to dismiss its appeal against grant of WTIC-TV, Hartford (Ch. 3).

■ ■ ■

Mere numbers of stations are only part of the story, of course. Where they are counts more. Addition of 25 vhf stations in the 25 top markets might be dynamite, while same number in prairie towns would have little impact on TV's economics.

ABC-TV's "full network status" is good evidence of that. Within last 1-2 years, it's beefed up its major-market full-time affiliations to point where it can really talk clearances with sponsors. ABC's fast footwork in Washington to reach this status isn't generally appreciated. It did this through promotion of mergers in dragged-out hearings, vhf drop-ins, vhf channel shifts, deintermixture, etc.

■ ■ ■

CBS's Alexander based his 600-station ceiling on number of homes needed to support stations. He figured 4-station market needed minimum of 139,000; 3-station, 83,000-139,000; 2-station, 50,000-83,000; 1-station, 22,000-50,000. Then, discussing shorter radii of stations (possible through mileage-power-height cuts or shift to uhf), he said: "Larger radii permit fewer stations to cover a given area, and shorter radii reduce the number of market centers that can support a station. That is, many market centers which can support a station with a 50-mi. radius of coverage can no longer support one with a 25-mi. radius of coverage . . . If the power is to be reduced, or uhf to be generally adopted, while more stations would be needed to cover the country, fewer could be supported economically."

GIANTS GO WEST—BUT PAY TV REMAINS FOGGY: The muddled pay-TV situation in San Francisco & Los Angeles remains muddled—as N. Y. Giants baseball team finally announced plans to move to San Francisco and its pres. Horace Stoneham said pay TV was a factor in decision to move, though not necessarily a big one. Meanwhile, Sen. Potter (R-Mich.) assailed pay-TV proponents for "one of the most aggressive & calculated publicity campaigns" in industrial history (see p. 14).

Jerrold Electronics Corp. this week went into competition with Skiatron and the combination of International Telemeter & Fox West Coast Theatres as a seeker to wire up San Francisco for pay system, said it has a "practical" proposal, in contrast with the "irrational" concepts of others.

Puzzler in situation is who is to wire the city and how. Mayor George Christopher has indicated city is prepared to grant "non-exclusive" franchises for those prepared to put in cable systems. Does this mean any number of promoters can duplicate each other's work, as far as city is concerned? Apparently.

Actually, Pacific Telephone & Telegraph Co. will have to provide answers, for it has the poles to which to attach cables—and it would be silly for anyone to put up his own poles. Real situation is simple: PT&T doesn't know what to do yet, is sitting tight, "studying."

Jerrold emphasized intention of tying up with movie exhibitors in San Francisco, just as it did with Video Independent Theatres in Bartlesville, Okla., where town is wired up ready to go with feature movies Sept. 3. Jerrold pres. Milton J. Shapp, after talking to Mayor Christopher, stated cautiously:

"Because of our experience in the cable TV business, we recognize the enormous complication of wiring a city such as San Francisco and the tremendous problems facing the telephone company in making technical decisions in this respect. Contrary to the irrational statements issued by others, we do not feel that the job can be done with a handful of dollars and within a few months' time. There is no magic promotional wand that can be waved over the Bay area to create this service for the residents of San Francisco immediately. To construct a system of this size will take time." He proposes flat monthly fee to subscribers, as in Bartlesville.

Skiatron v.p. Jerome Doff, after Giants' announcement, said company will be ready with system at start of 1958 baseball season if city grants franchise. City council is due to act about Sept. 16.

Skiatron has indicated inexpensive open-wire system will do trick in San Francisco & Los Angeles (Vol. 13:30), but Bell System's best TV brains view idea with great skepticism. One of its ablest and most respected engineers tells us: "I don't see how we could go for it. Theoretically, if you ran open wire in a straight line in open country, it would be fine. But with turns, with taps, with outside interference, you'd have to raise the level above FCC's radiation limits. I know of no one of responsibility in the Bell System who'd buy it."

Video Independent Theatres, meanwhile, kicking off drive for customers in Bartlesville, is easing into project slowly, pres. Henry S. Griffing asserting: "From our past experience with community antenna systems, we know this thing won't go off all at once like a firecracker. The people of Bartlesville are going to have to be sold on it, one family at a time, and it will take a while. We're sure it will be a year or more before the public learns the pleasure of telemovies in the home." To date, VIT is only organization known to have commitments from movie producers for first-run features—backbone of programming fare, and presumed to be backbone of any pay-TV project, cable or telecast.

FCC plans to take up question of toll-TV test authorization Sept. 17 but there's absolutely no telling when final decision will come. Roughly speaking, commissioners are split 3-3 on concept, so new member Frederick Ford may wind up the tie-breaker. Leaning in favor of tests are Chairman Doerfer, Lee, Craven; against—Hyde, Bartley & Mack. But these aren't all firm or fixed.

Informed that he may be key man, Ford expressed surprise. "You can be sure, if that's the case," he said, "I'm going to study this thing mighty carefully before I vote. Actually, I haven't had any time to study FCC problems. This office [at Justice Dept.] is at its busiest now, with Congress winding up session; it has the liaison with Congress." Ford is due to be sworn in Aug. 29; he'll take vacation then, doesn't know how long, says he hasn't had one for 2 years.

From the advertising fraternity, that group so strangely unperturbed by prospects of pay TV, came a comment this week. For those commercial-baiters among TV critics who've been panting for commercial-less toll TV, here's remark from Wm. B. Lewis, pres. of Kenyon & Eckhardt ad agency, quoted in Aug. 17 Editor & Publisher: "What has interested me as a bystander in all this argument is that neither side has considered the possibility of combining commercially-sponsored TV with pay TV. Why not run advertising with pay TV? That seems logical, and certainly worthy of study." Paramount's International Telemeter, for one, has given it study, considers it logical (Vol. 13:23).

PROFILES' OF THE TOP 100 ADVERTISERS: Advertising Age Magazine has come up with a tour de force in its Aug. 19 issue—exhaustive "marketing profiles" of nation's 100 largest advertisers in 1956.

Handy reference runs nearly 100 pages, includes not only specific breakdowns of spending by top 100 in "measured" media of TV, newspapers, magazines, outdoor, but investments in "unmeasured" media such as radio, direct mail, point-of-purchase.

Beyond advertising statistics themselves, study includes short description of companies, ranking in respective industries, new products & campaigns, personnel changes, marketing programs & organization.

General Motors again led advertisers by "country mile," study shows—having spent \$162,499,248, a drop from the \$170,381,860 in 1955. Procter & Gamble again was runner-up with \$93,000,000 vs. \$85,000,000 in 1955. Ford was close third, up to \$88,650,000 from \$72,942,694 in 1955. (For 1956 & 1955 estimated expenditures of the top 100, see p. 5).

"Much of the information in the 100 profiles has never been published before," magazine says, reporting that trade biography material was gathered directly from firms & agencies—or from "great variety of sources to fill in the gaps" when they were reluctant to furnish some information for competitive

reasons. (Copies of issue are available for 15¢ from Advertising Age, 200 E. Illinois St., Chicago, or 480 Lexington Ave., N. Y.)

Printers' Ink is out, too, with its "Advertisers' Guide to Marketing for 1958," showing that total U. S. ad expenditures are expected to reach \$10.2 billion, 7.7% above last year's \$9.9 billion.

Magazine tallies 1956 expenditures of top 100 advertisers in 7 major media—magazines, newspapers, farm papers, network radio & TV, spot TV, business publications, outdoor: General Motors, \$115,899,205; Procter & Gamble, \$79,355,592; Ford, \$56,649,005; Chrysler, \$48,293,288; Colgate-Palmolive, \$44,480,906; General Foods, \$41,761,075; General Electric, \$38,937,754; Lever Bros., \$30,208,313; R. J. Reynolds, \$23,607,526; Distillers Corp.-Seagrams, \$23,145,742.

Included in "Guide" are compilations covering direct mail, outdoor, transportation, budgeting, salaries, TV-radio, mail order, business & farm publications, list of 374 million-dollar advertisers, etc.

FCC FIGURES EMPHASIZE TV AS GROWTH INDUSTRY: Though telecasting industry has been fairly "mature" for several years, in terms of audience reached and increase in number of stations, it remains one of the most dynamic growth industries in the country. Fact is clearly emphasized in FCC's official revenue-expense-profit figures for 1956, released this week.

No word other than "dynamic" can be applied to a big industry that increases its revenues 20.4%, profits 26.2%—in one year. Specifically, total network-station revenues rose from \$744,700,000 in 1955 to \$896,900,000 last year, while profits before federal income taxes went from \$150,200,000 to \$189,600,000.

Figures released by Commission this week include only major breakdowns. Detailed tables, which enable individual operators to match their performance with others in similar markets, are due in 4-6 weeks—as fast as FCC staff can process them.

Standing out in Commission's compilation is fact that exceptional improvement was achieved by networks themselves, post-freeze vhf stations and even uhf operators—while pre-freeze stations' improvement was good but more modest.

For example, the 3 networks and their 15 stations had before-tax profits of \$85,400,000 in 1956—compared with \$68,000,000 in 1955, \$36,500,000 in 1954. The 95 pre-freeze vhf stations, by contrast, had profits of \$89,700,000 in 1956, up only modestly from the \$81,900,000 in 1955, \$67,600,000 in 1954.

Post-freeze vhfs are coming into their own. They brought in \$16,400,000 profits in 1956, as against \$4,800,000 in 1955, loss of \$3,800,000 in 1954.

The uhf operators, garnering bigger chunk of business while holding expenses down, cut total losses to \$1,900,000 last year, compared with loss of \$4,500,000 in 1955, \$10,000,000 in 1954. Thus, there's every indication that 1957 will see uhf operators, as a group, breaking even or achieving small profit.

(For FCC's complete table, see p. 7).

Acquisition of KWK-TV, St. Louis (Ch. 4) by CBS, which would in turn relinquish CP for Ch. 11, is under discussion, no agreement yet. Advantages are that CBS would gain ready-made station, wouldn't have to build, while KWK-TV, now holding CBS affiliation, would avoid exigencies of independent operation. KWK-TV came to CBS with the idea. Informed of plan, the 3 losers of Ch. 11 hearing who have appealed decision giving Ch. 11 to CBS are considering whether to merge to take over Ch. 11 CP from CBS. If they don't, there's legal question whether Ch. 11 is then up for grabs.

Hi-fi recording companies and AFM will join in producing single long-play disc of dozen or more versions of "Star Spangled Banner" by nation's top symphony orchestras. Public service project, intended to supply TV & radio stations and public schools with first hi-fi record of national anthem, is sparked by industrialist Louis Schweitzer, who recently bought WBAI (FM), N. Y. Listening to playing of "Star Spangled Banner" at sign-off time, he found that station used recording from old shellac disc; that hi-fi records weren't produced because music takes less than 3-in. grooving.

Former President Truman heads list of speakers at 8 NARTB regional conferences Sept. 16-Oct. 25. He'll share platform with pres. Charles N. Kimball of Midwest Research Institute at Region 5 meeting Oct. 10-11 in Muehlbach Hotel, Kansas City. Other speakers at sessions which will have theme of "A Time for Decision": Governor Averell Harriman of N. Y. & GE chairman Philip D. Reed—Region 1, Van Curler Hotel, Schenectady, Sept. 16-17; Sen. Charles E. Potter (R-Mich.) & Ben R. Donaldson, director of Ford institutional advertising—Region 4, Hotel Statler, Cleveland, Sept. 19-20; Rep. Hugh Scott (R-Pa.)—Region 5, Grove Park Inn, Asheville, N. C., Sept. 23-24; Sen. Warren G. Magnuson (D-Wash.) & Gov. Robert D. Holmes of Ore.—Region 8, Hotel Multnomah, Portland, Ore., Oct. 14-15; Sen. Gordon Allott (R-Colo.) & ABC radio network pres. Robert E. Eastman—Region 7, Brown Palace, Denver, Oct. 17-18; Sen. Ralph Yarborough (D-Tex.) & v.p. Arthur A. Smith of First National Bank of Dallas—Region 6, Baker Hotel, Dallas, Oct. 22-23; Rep. Oren Harris (D-Ark.) & Frank R. Ahlgren, editor of *Memphis Commercial Appeal*—Region 3, Peabody Hotel, Memphis, Oct. 24-25.

Canadian TV billings gained bigger share of all-media advertising investment in 1956, grossing 16.6% of \$204,580,522 total reported by 100 agencies compared with 13.5% of \$177,240,355 in 1955, according to Dominion Bureau of Statistics. In 1954, TV billings were only 5.5% of Canadian advertising budget. Radio's share in Canada last year slipped to 10.3% from 11.9% in 1955.

Hassle over TV rights threatened this week to cancel Sugar Ray Robinson-Carmen Basilio middleweight championship fight scheduled for Yankee Stadium Sept. 23. Trouble arose suddenly Aug. 20 when Robinson said he would withdraw from bout because International Boxing Club had signed closed-circuit TV theatre contract with TNT (Vol. 13:32), whose pres. Nathan L. Halpern guaranteed equivalent of 250,000 admissions. Robinson said he hadn't consented to arrangement, wanted to sign with Teleprompter instead because Teleprompter pres. Irving Kahn "offered me more money" on 400,000-seat basis. N. Y. Athletic Commission summoned principals to meeting Aug. 26 to try to settle argument. Halpern told newsmen he already had signed 161 theatres with seating capacity of 413,500 seats. Kahn stated: "Based on my discussions with exhibitors, I believe it's possible for us to line up 500,000 seats."

Newspaper market surveys made by newspapers themselves, newspaper groups and ANPA's Bureau of Advertising are catalogued in 30-page *Newspapers at Your Service*, published by Bureau and available to agencies & advertisers at its N. Y., Chicago, San Francisco & Los Angeles offices.

Mutual TV Purchasing Corp. has been organized by TV Clearing House Inc. as subsidiary with resident buyers in N. Y. & Hollywood for pool buying of TV station equipment & furnishings. Louis J. Dahlman, majority stockholder in parent firm of program consultants, is pres. of new company.

Personal Notes: Joseph H. Ream, 1947-52 CBS exec. v.p. who retired to Florida farm in 1952, returns to CBS as Washington v.p., succeeding late Ralph Hardy. Ream is native of Iowa, 1925 graduate of U of Kansas, 1927 graduate of Yale, joined CBS in 1934 as general attorney, became secretary in 1938, vice president in 1942. For past year he has been deputy director of the National Security Agency in Washington . . . Harry C. Folts, from ABC Radio, and Aaron Beckwith, ex-NTA, named ABC-TV account executives . . . Robert Schultz named film service sales supervisor for California National Productions' Calnatron system . . . Manfred Gottfried appointed by Time Inc. to develop news resources in TV, radio & film; Emmet J. Hughes succeeds him as chief of correspondents in foreign news service . . . Eliot Hyman elected pres. of Associated Artists, succeeding Louis Chesler, who continues as chairman . . . Larry Surles promoted to mgr. of NBC-TV new spot business . . . Richard W. Hubbell, ex-Carlos Franco Assoc., named INS business representative in N.Y. & New England areas; John A. Buning, ex-radio WHOO, Orlando, appointed INS business representative in southern div., Atlanta . . . James J. Hawkins promoted to gen. mgr. of KTVW, Tacoma . . . Dave Dash, ex-Cornell Films, named pres. of newly-organized Carousel Films . . . A. H. (Chris) Christensen, from Westinghouse radio KEX, Portland, Ore., named adv. & sales promotion mgr. of WJZ-TV (WAAM), Baltimore . . . Wells H. Barnett Jr. promoted to station operations mgr. of radio rep John Blair & Co., N. Y.; Albert C.

Long to sales development director, Mary H. Mason to sales development station service mgr. . . Wm. R. Nutt promoted to promotion & publicity director of KGW-TV & KGW, Portland, Ore. . . Rex King promoted to regional sales mgr. of upcoming WBOY-TV, Clarksburg, W. Va. (Ch. 12), due in Oct., coming from Pittsburgh sales office of owner WSTV-TV, Steubenville . . . Allen M. Woodall, pres. of WDAK, Columbus, Ga., named exec. committee chairman of RAB . . . H. Dewitt (Judge) Landis elected a v.p. of Hamilton, Stubblefield, Twining & Assoc. brokerage firm . . . Gerald W. Elbers joins NARTB public relations staff, resigning as asst. to exec. director of President's Committee on Education Beyond the High School . . . S. Wm. Aronson promoted to administrator of ABC cost control unit . . . Jack M. Barrington named public relations director of Theatre Owners of America . . . Leon Kagan, ex-ABC Film Syndication, joins NBC International Ltd. as Latin American operations mgr., headquartering in Mexico City.

Sid Shalit is resigning as TV-radio news editor of *N. Y. Daily News* after nearly 25 years with paper to enter music business as executive of independent-label record firm. Miss Kay Gardella, feature writer in *News* dept., succeeds him in No. 2 job under critic Ben Gross. Meanwhile, TV-radio critic John Crosby of *N. Y. Herald Tribune* Syndicate, who will conduct CBS-TV's upcoming *Seven Lively Arts* program, was reported planning to shift to general news column after he returns from vacation.

ADVERTISING AGENCIES: Charles V. Skoog Jr. elected pres. of Hicks & Greist, replacing E. Harold Greist, named chairman to succeed H. Leslie Hicks, now vice chairman . . . Robert C. Mack promoted to Grant Adv. v.p. in charge of TV-radio, Detroit . . . Jerome J. Cowen, senior v.p. of Cunningham & Walsh, named gen. mgr. of San Francisco office; Franklin C. Wheeler continues as exec. v.p. there . . . Hal James, ex-Ellington & Co., joins Doherty, Clifford, Steers & Shenfield as v.p. & TV-radio programming & production director.

Sale terms for KCOP, Los Angeles (Ch. 13), being sold to Kenyon Brown-Bing Crosby group in \$4,000,000 deal (Vol. 13:22) are revealed in application filed with FCC this week. They're paying \$150,000 down, paying Dorothy Schiff \$537,931 still owed by Copley Press, then \$3,312,068 in 32 installments. New owners, each with 25%, will be Bing Crosby Jr., chairman; Kenyon Brown, pres.; George L. Coleman, v.p.; Joseph A. Thomas, v.p. June 30 balance sheet for Television div. of Copley Press Inc. lists cumulative profit from operations at \$26,384, with additional profit from operations since Jan. 1 at \$12,326. It had \$344,943 current assets, \$960,652 investments & fixed assets, \$270,372 prepaid and/or deferred charges; \$281,740 current liabilities, \$530,358 long term liabilities, \$989,350 investment by Copley Press.

Kenyon Brown-Bing Crosby group is selling KFEQ-TV, St. Joseph, Mo. (Ch. 2) & KFEQ for \$841,091 to Jesse D. Fine theatre family, former owners of WFIE-TV, Evansville, Ind. (Ch. 14). Jesse D. Fine will be pres. & 32.5% owner; Isadore J. Fine, v.p., 20%; Oscar K. Fine, treas., 32.5%; Eugene P. Fine, secy., 12.5%; Marvin Cohen, director, 2.5%. Combined KFEQ-TV & KFEQ balance sheet for June 30 shows earned surplus of \$31,338, with additional surplus earned up to June 30 of \$27,984. It lists \$92,981 current assets, \$567,292 broadcasting investment (\$442,050 for TV); \$12,454 current liabilities, \$552,677 long term debts.

NTA has purchased 75% of KMGW-TV, Minneapolis (Ch. 9) for undisclosed price from United Television Inc. (Sy Weintraub, pres.), which acquired it as KEYD-TV, with radio KEYD, from Morris T. Baker's Minneapolis Tower Co. in 1954 for \$1,500,000, then sold radio KEYD for \$35,000 (Vol. 12:21). Loew's Inc. retains 25% acquired in 1956 for about \$750,000 (Vol. 12:44). Sellers include Thomas P. Johnson and Larry H. Israel (gen. mgr. of WJZ-TV, Baltimore), who also have holdings in WENS, Pittsburgh (Ch. 16); Oliver Tyrone Corp. (Wm. H. Rea, pres.), which has minority interest in WENS and WMTW, Poland Spring, Me. Oliver Tyrone ownership interlocks with WABI-TV & WABI, Bangor, Me.

Mrs. A. Scott Bullitt will own 40%, her KING Broadcasting Co. 60% of KREM-TV, Spokane (Ch. 2) and AM & FM affiliates, it's revealed by transfer application filed this week. Louis Wasmer, who is getting \$2,000,000 for properties (Vol. 13:28), will remain as pres. of new KREM Bestg. Co., but without stock interest. KREM stations balance sheet dated June 30 lists \$244,382 current assets, \$438,041 fixed assets; \$55,263 current liabilities; \$629,250 proprietorship.

Suit over sale of KERO-TV, Bakersfield (Ch. 10) for \$2,150,000 to Wrather-Alvarez Bestg. Inc. (Vol. 13:29) has been settled out of court, terms undisclosed. Robert K. Straus, 10% owner of WITI-TV, Milwaukee, had filed suit, alleging existence of prior contract to sell station to him. Sale has been approved by FCC.

KSHO-TV, Las Vegas (Ch. 13) has been sold for "around \$200,000" to Merv Adelson, Las Vegas market chain operator, by Albert Zugsmith interests, according to pres. Frank Oxarart. Selling group acquired station in late 1956 from Moritz Zenoff (Vol. 12:48).

Grant of \$25,000 to Metropolitan Educational TV Assn., N. Y., for operating expenses was awarded this week by N. Y. Foundation, which made same contribution in 1956 & 1955.

Notes on Upcoming Stations: WTIC-TV, Hartford (Ch. 3) began Mon.-Fri. test pattern schedule Aug. 23 (9 a.m.-noon & 7-9 p.m.), with programming scheduled to start Sept. 23. It will be independent outlet in area already served by CBS's WHCT (Ch. 18), NBC's WNBC (Ch. 30) and Triangle Publications' ABC-TV affiliate WNHC-TV, New Haven (Ch. 8). We're not counting it on air yet, so on-air score remains 504 (90 uhf). WTIC-TV has 25-kw RCA transmitter and 440-ft. self-supporting Ideco tower with 100-ft. 6-section superturnstile antenna on Talcott Mt. Studios in downtown Hartford, scheduled to be ready Sept. 10, connect via microwave with Talcott Mt., 7 mi. W. Owner is Travelers Insurance Co., also operator of radio WTIC. Base hour will be \$800. Rep will be Harrington, Righter & Parsons.

WOWL-TV, Florence, Ala. (Ch. 15), authorized to change Sept. 6 from Ch. 41, expects to have 1-kw GE transmitter wired and ready by Sept. 15, and hopes to begin before end of month, reports pres.-gen. mgr. & 25% owner Richard B. Biddle. It has 300-ft. tower due from U. S. Tower Co. Sept. 1 and GE antenna was scheduled to arrive Aug. 24. Studio-transmitter building at 800 Cyprus Mill Rd. has been ready 3 months. Network affiliation hasn't been announced yet, nor has base hourly rate been reported. Rep will be announced Sept. 1.

WIPR-TV, San Juan, P. R. (Ch. 6) has again changed target; it's Nov. 1 now, reports R. Delgado Marquez, gen. mgr. of TV-radio for Puerto Rico Dept. of Education. It has 25-kw RCA transmitter, which was to have been ready this month. RCA 6-bay antenna has been installed on

200-ft. Blaw-Knox tower at site of elaborate TV-radio plant 15-mi. from San Juan.

CHCA-TV, Red Deer, Alta. (Ch. 6) expects to order Canadian GE equipment, plans early Nov. start—earlier if microwave connection is completed on schedule—writes G. A. Bartley, pres. of CHCA Television Ltd. It expects to use 300-ft. Stainless tower with 2-slot coaxial antenna. Base hour not set. National sales rep not chosen; regional reps will be John N. Hunt (Vancouver) and A. J. Messner (Winnipeg).

KXGN-TV, Glendive, Mont. (Ch. 5) plans test patterns by Sept. 15, programming by Sept. 30, reports gen. mgr. Dan C. Palen for owner Lewis Moore, local theatreman, also owner of radio KXGN. It has 5-kw DuMont transmitter wired and ready and 1-bay GE antenna has been installed on 192-ft. Fisher tower. Network affiliation is being negotiated. Base hour will be \$125. Rep will be Grant Webb.

RCA shipped 25-kw transmitter Aug. 22 to upcoming KGHL-TV, Billings, Mont. (Ch. 8), which hasn't reported starting date; 25-kw transmitter Aug. 20 to WESH-TV, Daytona Beach (Ch. 2), planning boost to 100-kw.

Facility changes: WJTV, Jackson, Miss. (Ch. 12) began with 316-kw Aug. 19; WALB-TV, Albany, Ga. (Ch. 10) began using new 12-section superturnstile antenna Aug. 17.

RCA shipped 3-V color film camera Aug. 20 to upcoming WLWI, Indianapolis (Ch. 13), due in Sept.

WISN-TV, Milwaukee (Ch. 12) begins telecasting Aug. 26 from new \$1,250,000 two-story Broadcast Center.

FCC FINANCIAL DATA on station & network performance in 1956 are final and official. First table, covering over-all figures, is the only one released this week. Other tables, giving exhaustive breakdowns of stations by markets, market size, revenues, loss or profit station, etc., will follow in 4-6 weeks. Herewith is Commission's complete Table I:

	1956	1955 ²	1954 ¹
Broadcast Revenues (in millions of dollars)			
3 Networks (including 15 owned and operated stations*)	\$442.3	\$374.0	\$306.7
95 Pre-Freeze television stations	260.7	230.0	200.9
Subtotal	703.0	604.0	507.6
Post-Freeze television stations:			
269 VHF stations	161.4	112.2	60.0
95 UHF stations	32.5	28.5	25.4
Industry total	\$896.9	\$744.7	\$593.0
Broadcast Expenses			
3 Networks (including 15 owned and operated stations*)	\$356.9	\$306.0	\$270.2
95 Pre-Freeze television stations	171.0	148.1	133.3
Subtotal	527.9	454.1	403.5
Post-Freeze television stations:			
269 VHF stations	145.0	107.4	63.8
95 UHF stations	34.4	33.0	35.4
Industry total	\$707.3	\$594.5	\$502.7
Broadcast Income (Before Federal Income Tax)			
3 Networks (including 15 owned and operated stations*)	\$ 85.4	\$ 68.0	\$ 36.5
95 Pre-Freeze television stations	89.7	81.9	67.6
Subtotal	175.1	149.9	104.1
Post-Freeze television stations:			
269 VHF stations	16.4	4.8	(3.8)
95 UHF stations	(1.9)	(4.5)	(10.0)
Industry total	\$189.6	\$150.2	\$ 90.3

() Denotes loss.

¹ 1954 data cover 4 networks and 16 owned and operated stations; 92 pre-freeze and 302 post-freeze stations (177 VHF and 125 UHF).

² 1955 data cover 4 networks and 16 owned and operated stations; 93 pre-freeze and 328 post-freeze stations (225 VHF and 103 UHF). Three networks after September 15, 1955 when DuMont ceased network operations.

* Includes two post-freeze stations (UHF).

Radio station sales and transfers reported this week: WOBS, Jacksonville, by Robert W. Rounsaville for \$500,000 to new owners of WSTN, St. Augustine, Fla.—Simpson R. Walker Jr., Harry C. Powell Jr. & Lawrence R. Picus . . . WMRY, New Orleans, by Lester Kamin and associates (also with interest in uhf CP WCKG, there) for \$250,000 to Robert W. Rounsaville, operator of southern radio chain and holding uhf CPs for WATL-TV, Atlanta; WQXL-TV, Louisville; WQXN-TV, Cincinnati . . . KTBS, Shreveport & KTBS-FM, by owners of KTBS-TV (E. Newton Wray, pres.) for \$200,000 to B. R. McLendon and associates—McLendon family also being principal stockholders of KLIF, Dallas; KILT, Houston; KTSA, San Antonio . . . WSLB, Ogdensburg, N. Y. by St. Lawrence Bestg. Corp. (Joseph R. Brandy, pres.) for \$190,000 to George W. Bingham (56%) and associates—Bingham also holding control of WKIP, Poughkeepsie and WGNV, Newburgh, N. Y. . . . KLIL, Estherville, Ia. by Wm. E. & Edward Schons and A. G. Bush for \$15,000 (plus 10 year lease aggregating \$120,000) to station mgr. Jack W. Turnbull & wife. Bush (Minnesota Mining & Manufacturing Co.) is board member of KSTP-TV, St. Paul, and with Schons owns WKAI, Macomb, Ill.; Schons also have interest in KRSI, St. Louis Park, Minn. and KRBI, St. Peter, Minn. . . . WMEG, Eau Gallie, Fla. 50% by Washington attorneys Scymour Krieger & Norman Jorgensen for \$32,000 to gen. mgr. A. V. (Chic) Catterton and commercial mgr. Victoria C. Martin, increasing holdings to 50% each. Brokers: KTBS, Hamilton, Stubblefield, Twining & Assoc.; WMEG, Paul H. Chapman Co.

Correction: Sports Network Inc. listing on p. 317 of *TV Factbook No. 25* should indicate following personnel: Richard E. Bailey, pres.; Roylance H. Sharp, v.p.; Thomas J. Schilling, secy.-business mgr.; Wm. N. Creasy Jr., director of publicity; Marie C. Wilber, asst. business mgr. Organization specializes in TV & radio regional sports networks. Saul J. Turell has no connection with company.

Telecasting Notes: Upcoming TV season may look like "dull stuff" to viewers, but for industry it "promises to go down as the most bitterly competitive programming year in history," *Variety* said this week. And "reputations as well as millions" will be "riding on every rating point." Witness: NBC-TV "starting virtually from the ground up," ABC-TV offering "immensely sharpened competition," CBS-TV facing dire threats from both . . . Add sponsored public service: Bell System's science series on NBC-TV next season includes "The Unchained Goddess," Frank Capra's explanation of what makes weather . . . Former President Truman would conduct network TV seminars in history—complete with pictures, maps & charts—in series which National Farmers Union wants to sponsor. He's been cool to previous network TV offers . . . Shock therapy: Universal-International's "Shock!" package of 52 old horror films (Boris Karloff, Bela Lugosi, Lon Chaney, Peter Lorre et al.), distributed by Screen Gems, has been bought for about \$750,000 by KTLA, Los Angeles, and for reported similar price by WABC-TV, N. Y. . . . Anybody for pool? One-shot "Pocket Billiards Stars" will be tried out by ABC's WBKB, Chicago, Sept. 8, Sun. 10-11 p.m., to see if it can stir viewer interest as bowling did few years back . . . Walt Disney starts 4th year on ABC-TV Sept. 11, Wed. 7:30-8:30 p.m., with "spectacular" performance of "Peter & the Wolf." New 26-program season includes *The Saga of Andy Burnett*, adventure series starring Jerome Courtland & Jeff York . . . Extra-period running time stretched to 75 min. planned for first of five 60-min. Lucille Ball & Desi Arnaz shows sponsored by Ford on CBS-TV in fall. Arnaz insists yet-untitled opening film, already edited to 75 min., can't be cut without impairing continuity . . . International party line is planned by co-producers Edward R. Murrow & Fred W. Friendly of CBS-TV's *See It Now* for new *Small World* film series tentatively scheduled by

network to start in Oct., Tue. 10:30-11 p.m. Eric Sevareid would be moderator of telephone-hookup show in which participants might be in Hollywood, London, Far East where they'd be filmed as they talk . . . Another Mike Wallace? Martin Agronsky starts new live interview show—*Look Here!*—on NBC-TV Sept. 15, Sun. 3:30-4 p.m. His purpose is to "get at the wellsprings of a subject's personal philosophy," to find out "why he is what he is and acts the way he does" . . . Still ticking: *Beat the Clock*, reported running down few weeks ago on CBS-TV Fri. 7:30-8 p.m., is wound up again for Sun. 6-6:30 p.m. starting Oct. 6 as replacement for *The Last Word*, which CBS-TV may reschedule for Sat. 7-7:30 p.m. Stunt program also gets daytime CBS-TV run Mon.-thru-Fri. 2-2:30 p.m., effective Sept. 16 . . . Another casualty: *Kukla, Fran & Ollie* is discontinued by ABC-TV Aug. 30, succeeded by *Sports Focus* starting Sept. 2, Mon.-thru-Fri. 7-7:15 p.m. . . . British commercial TV goes western, too, new imports of U. S. films for ITA in fall including *Sheriff of Cochise* & *Zane Grey Theatre* along with such staples as *Rosemary Clooney Show*. British viewers already get *Wyatt Earp*, *Roy Rogers*, *Gun Law* . . . "She was my first love," says caption under blow-up of Shirley Temple, aged 8, in newspaper promotion this week by NTA for Oct. 20-Dec. 8 Sun. showings of "Rebecca of Sunnybrook Farm," "Heidi," "Wee Willie Winkie," "Capt. January"—child star's "greatest motion picture triumphs." Free copies of photograph, "suitable for framing," are offered in ads . . . Ballyhoo stunts, ranging from sky-writing to tour of newspaper offices by troupe (giant, dancing girl, midget) bearing refreshments, won first prize for KTTV, Los Angeles, in NTA *Premiere Performance* film series exploitation contest. Trip to Paris for 2 goes to publicity director Reavis Winckler; adv. & promotion director Jack O'Mara gets tickets for 2 to Bermuda.

BMI "monopoly"—already attacked in court by ASCAP and denounced in House by Celler anti-trust subcommittee (Vol. 13:23)—was subjected to fresh assaults Aug. 21 on Senate floor.

Excoriating networks and stations for holdings in BMI, Sen. Smathers (D-Fla.) introduced sweeping bill (S-2834) to prohibit broadcasters from engaging "directly or indirectly" in music publishing or recording business.

BMI's "musical empire" represents "beginning of the end of the public's freedom to listen to all types and kinds of music unrestricted by monopolistic practices," Smathers asserted.

Member of Senate Commerce Committee, Smathers said "our entire musical heritage" is threatened by continued existence of BMI under "broadcasters' influence & control."

"This legislation is designed to save them [TV & radio broadcasters] from their own excesses," he told Senate. It would amend Sec. 310 of Communications Act to bar FCC from granting CPs—and station owners from holding licenses—if applicants or licensees have any interests in music publication or in manufacturing or selling records.

Chairman Magnuson (D-Wash.) of Commerce Committee welcomed Smathers' bill as "matter which has long been considered to be a subject necessary to be gone into" by Committee, to which it was referred.

"This is a matter of such importance to the people of America that I am sure by next Jan. there will be very favorable consideration by the Committee at least with

regard to having hearings and discussing the bill fully," Magnuson said.

Spokesmen for CBS, NBC & ABC said at week's end that networks had no comment.

Fresh TV appraisals are needed by advertisers for fall spot buying in which "old yardsticks will be out the window," pres. Edward Petry of rep Edward Petry & Co. said this week in review of these factors: (1) "ABC-TV has at last come into its own." (2) "All-out program reshuffle" by 3 networks. (3) "New looks in local programming." (4) "Deluge of new film." (5) Most coverage data for other seasons is "completely obsolete" now. Petry urged advertisers to "take a longer look" at each station's: standing in its community; fall programming plans; local talent stature; "press ties, promotion prowess, and merchandising muscles;" "honesty, reputation & sincerity" of management.

Retaining 2 TV stations, John H. Perry Jr. has disposed of his remaining 3 radio stations in Fla. in \$550,000 sale negotiated by Blackburn & Co. WDLP, Panama City & WCOA, Pensacola, are being sold as \$400,000 package to Denver T. Brannen, also owner of WDEB, Gulfport, Miss. and KCIL, Houma, La. Perry's WTMC, Ocala, has been sold for \$150,000 to Ray Herbert Gunkel, who awaits FCC approval of his sale of 60% of WABR, Winter Park & CP for WRAL-TV, Orlando (Ch. 18) to James H. Sawyer (Vol. 13:32). Perry stations now comprise WJHP-TV, Jacksonville (Ch. 36) and WESH-TV, Daytona Beach.

Venard, Rintoul & McConnell moves Los Angeles office to 1901 W. 8th St. (Dunkirk 8-4151).

PICTURE TUBES—EVALUATION OF OUTPUT & SALES: Pursuing picture tube production and sales, two of the industry's better indexes to manufacturers' evaluation of the market, we've obtained from EIA some further breakdowns of first 6 months' sales, along with comment from cross-section of tube producers.

EIA reports that sales of 4,815,000 tubes during first 6 months comprised 3,008,000 for new sets, 1,408,000 for renewal market, 399,000 export. This compares with 5,153,000 total for similar 1956 period, breaking down to 3,492,000 for new sets, 1,397,000 renewal, 264,000 export.

These do not include sales by tube rebuilders -- estimated by EIA at 1,500,000 in first half of this year, 1,264,000 same period of 1956.

Here's EIA's size breakdown for this year: 21-in., 1,903,000; 17-in., 714,000; 15-in. & under, 252,000; 24-in. & over, 139,000. For last year's first half: 21-in., 2,346,000; 17-in., 456,000; 15-in. & under, 420,000; 24-in. & up, 270,000. EIA does not provide breakdown by deflection angle.

* * * *

Here's current sizeup of tube production by some top producers:

L. Berkley Davis, gen. mgr. of GE electronic components div., reports 60% of GE's output is 21-in., most of balance divided between 17-in. & 14-in. -- with 17-in. having slight edge -- plus "very small number of 24-in." All GE's production for new sets is 110-degree, he said, and new-set production outnumbers replacement output by 2-1.

Davis noted that industry had some difficulty adapting 110-degree tubes; that there had been some trouble with focusing & sweep. However, he said, public's excellent acceptance of 110-degree sets demonstrates its willingness to overlook slight technical difficulties.

"Industry will stay put with 110-degree tubes," he said, adding that he could see no advantage in greater deflection because slight gains would be achieved only at much greater cost.

* * * *

W.W. Watts, RCA exec. v.p.-electronic components, also reported that RCA's production is heavily 110-degree tubes for new-set market but added that "we're continuing to build all sizes, shapes and deflection angles for replacement."

No significant price changes are in prospect, Watts said. Tube makers have about all the business they can handle at the moment, he reported, but was quick to add: "No one is getting rich in the kinescope business; few are making any money -- and those few are making very little."

There's overcapacity in the business, on year-round basis, Watts said, with capacity at 15,000,000 and demand at 12,000,000. Export market, which he termed "a rat race of the first water," is an outlet for some overproduction. He said he'd heard of few imports, noting "it's not economical to ship a lot of glass and air."

No increase in deflection angle above 110-degree is seen by Watts, who said there'd be no gain in appearance by making TV sets shallower.

D.W. Gunn, gen. sales mgr. of Sylvania TV picture tube div., reported company's production is 35% 110-degree, 65% 90-degree. James Rolando, of Sylvania International div., reported receipt of European orders for samples of 110-degree, said company's exports of 21-in. 90-degree tubes "have grown markedly."

The only price increase mentioned by the foregoing is boost of about 5% on aluminized tubes for replacement market, effective about Sept. 5.

Production: TV output again advanced to new high ground for year with total of 179,615 for week ended Aug. 16, compared with 169,148 preceding week and 160,479 in corresponding week one year ago. It was year's 33rd week and brought TV production for year to date to about 3,548,000, compared with 4,211,829 in same period of 1956. Radio production totaled 294,091 (96,206 auto) for week ended Aug. 16, vs. 192,877 (61,299) preceding week and 256,777 (53,599) in corresponding week year ago. Radio output for 33 weeks totaled about 8,465,000 (3,316,000) vs. 7,968,998 (2,660,782) in 1956 period.

Topics & Trends of TV Trade: Shipments of TVs to dealers totaled 2,503,966 in first half of 1957, when production was 2,722,139, according to EIA state-by-state report. They compare with shipments of 2,775,022, production of 3,415,202 in first six months of 1956. June shipments were 382,699, compared with 333,921 in May and 388,914 in June 1956. Here's 6-month report (county-by-county tables available to EIA members):

State	Total	State	Total
Alabama	38,609	New Jersey	88,039
Arizona	15,471	New Mexico	10,386
Arkansas	22,283	New York	297,382
California	241,253	North Carolina	49,884
Colorado	21,079	North Dakota	8,417
Connecticut	41,449	Ohio	140,700
Delaware	5,920	Oklahoma	26,815
District of Columbia	24,806	Oregon	26,082
Florida	89,341	Pennsylvania	168,141
Georgia	52,246	Rhode Island	13,978
Idaho	7,879	South Carolina	21,192
Illinois	147,044	South Dakota	8,597
Indiana	62,017	Tennessee	43,628
Iowa	26,719	Texas	140,532
Kansas	27,543	Utah	10,992
Kentucky	41,613	Vermont	5,126
Louisiana	48,534	Virginia	39,878
Maine	12,998	Washington	38,845

Mississippi	23,023	U. S. TOTAL	2,496,792
Missouri	55,632	Alaska	1,697
Montana	12,100	Hawaii	5,477
Nebraska	17,817		
Nevada	3,995	GRAND TOTAL	2,503,966
New Hampshire	6,852		

NATESA members were told at last week's Chicago convention that two most important things in managing a service business are wages and materials. R. C. Hansen, service coordinator, RCA Service Inc., basing figures on his own experience, said minimum for wages should be 40% of income, maximum 45%. Materials should be held to 20% minimum, 25% maximum, he declared, adding that other costs should range: rent, insurance, light, etc., 12-15%; truck-car, 6-8%; employment benefits, 5-7%. E. P. Atcherley, asst. mgr., Sylvania electronic products distributor sales dept., opined TV servicemen need "fewer or a single strong nationally known organization" to insure adequate exchange of ideas and information about rapidly expanding electronics industry. Convention adopted resolution reiterating its opposition to pay TV, calling it violation of viewers' rights and threat of competition for servicing sets. Group was told FCC now recognized NATESA as representative of service, asked its help on TASO. Directors voted unanimously to participate, sending out questionnaire on reception conditions.

New NATESA pres. is Russell Harmon, Weber's TV, Cincinnati, who succeeds Robert Hester, Hester TV, Kansas City. Others elected at annual convention in Chicago's Sheraton Hotel: Secy.-gen., Mac Metoyer, A-One TV Service, Kansas City, succeeding Bob Koepner, Certified TV, Houston; Nelson Burns, Memphis, Tenn. and Frank Moch, Chicago, chosen again as treas. and exc. director, respectively.

RCA adds 24-in. 110-degree picture tube (RCA-24AHP4) with 15 $\frac{3}{8}$ -in. length, 28-lb. weight.

Denial of FTC charge of unlawful price discrimination (Vol. 13:6) was filed this week by Hamburg Bros., RCA distributor in Pittsburgh, saying "any difference in the prices it charges customers is justified by its selling costs." Firm says FTC Feb. 5 complaint fails to allege facts which constitute a violation of the amended Clayton Act. Complaint charged Hamburg with giving some customers \$2-\$32 reduction per set, contending this "may lessen competition." Hamburg replied that its pricing practices promote rather than destroy competition; that variances result from "differing methods and quantities" of sets sold; that some prices were made in good faith to meet competition. Saying it would be forced out of TV business if it had to discontinue pricing practices, company asked that effective date of any order forbidding it to continue its pricing be postponed until its competitors are subject to same orders.

Big upsurge in business is reported by Olympic pres. Morris Sobin, saying first 6 months' dollar volume is 30% higher than for comparable period last year and that profits—when figures are available—probably will show corresponding increase. He described fall production as "geared to turn out 80% more units than our output in the comparable period last year and 1957 will easily be Olympic's biggest year." Company has order backlog of more than 6 weeks production and has just added 100,000 sq. ft. of warehouse space, Sobin said.

Govt. is understood to be devising new rules for gov't. agencies using business advisory committees in effort to make Senate action unnecessary on House-passed (Vol. 13:28) bill spelling out functions of such committees. New rules are expected to be announced before Congress returns for Jan. session. Main objection raised to such committees was that they could exert influence in policy matters without being held accountable. Opponents of House bill said its red tape would discourage membership.

Local campaigns for National TV Week are in the works for 47 major cities in 29 states, reports NARDA exec. v.p. A. W. Bernsohn who is also chairman of the manufacturing-retailing steering committee for the Sept. 8-14 drive. Saying "this is the largest number of local campaigns the retailing phase of National TV Week has ever had," he predicted successful promotion for the event. Meantime, campaign and publicity plans were sent to local chairmen in major cities.

Tape-maker ORRadio and its founder Herbert Orr are profiled in Aug. 26 *Time* business section which reports company sales are expected to hit \$2,500,000 this year, up from \$1,600,000 last year, likely to quadruple next year. Magazine reports that Orr will shortly announce new tape designed for storage of valuable documents; it's supposed to last up to 100 years, be unerasable.

Cigarette lighter radios is the newest wrinkle being introduced by RCA. Table model set has pop-up lighter in cabinet top, automatic turn-off fuse in case of overheating, \$40 list (model 9XL1). RCA also is marketing swivel-base table model at \$35 (model 9X10).

Trade Personals: Dale O. Akridge promoted to adv. & sales promotion mgr., GE TV receiver div., replacing Thomas Fielder, resigned . . . Richard D. Kennedy promoted to adv. & sales promotion mgr., GE receiving tube dept. . . . Stanley Seltzer promoted to Olympic Radio & TV national field sales mgr., succeeded by Jack Wolff, ex-Emerson of Providence, as northeast regional sales mgr. . . . Robert M. VanBrundt, ex-Motorola, named adv. mgr. of Zenith hearing aid div. . . . Dr. L. Malter, RCA semiconductor div. chief engineer, also becomes engineering programs coordinator; D. H. Wamsley promoted to mgr., engineering dept.; R. M. Cohen, mgr., entertainment product development; Dr. R. B. Janes, mgr., industrial product development; L. R. Shardlow, mgr., engineering services; Dr. W. M. Webster, mgr., advanced development . . . John T. Jackson, director of IT&T planning & organization dept., elected asst. v.p. of IT&T . . . Richard A. Wilson, ex-Magnavox, elected Daystrom v.p. for new Avionics group.

Obituary

Dr. Irving Langmuir, 76, died Aug. 16 at Falmouth, Mass., following Aug. 14 coronary thrombosis. Winner of 1932 Nobel Prize in chemistry, he had been on GE Research Labs staff from 1909 until retirement in 1950. His research was estimated to have saved American public \$1 billion yearly on electric bills. He helped accelerate growth of TV-radio broadcasting through development of high-vacuum power tube, pioneered in artificial rainmaking. His widow, son, daughter survive.

Dr. Donald MacKenzie, 69, who helped develop sound track for motion pictures while employed in Western Electric engineering dept. in 1920's, died Aug. 20 in hospital at Albuquerque, where he was patents mgr. for Sandia Corp. He joined Bell Labs in 1920 after teaching physics at Johns Hopkins, subsequently worked for Bureau of Standards and Electrical Research Products, for which he was consultant on film recording. Surviving are his widow, 2 sons.

Automation symposium Sept. 17-18 at Los Angeles Ambassador Hotel, under sponsorship of EIA, is called "Numerical Control Systems for Machine Tools." Closing day luncheon speaker will be Ralph E. Cross, exec. v.p., Cross Co. Other trade groups taking part: National Electrical Mfrs. Assn., National Machine Tool Builders Assn., Aircraft Industries Assn., Office Equipment Mfrs. Institute.

Admiral advertising plans are outlined by Edmond I. Eger, v.p.-adv., in Aug. 17 *Editor & Publisher*, listing ad budget as about 20% higher than last year's (Vol. 13:27), with 50% in newspapers, balance between magazines, outdoor billboards, radio & trade publications—and some local co-op money for spot TV.

Trav-Ler Radio pres. Joe Friedman expects fiscal year ending April 30 to be profitable, with sales up 10-15% over 1956 volume of \$13,045,460, basing optimism on new accounts and introduction of hi-fi models, expected to account for 20% of business in year's first 6 months.

Hallicrafters names Raytheon International Operations exclusive export distributor for communications equipment. George E. Magrath, ex-National Co., will head division handling Hallicrafters equipment.

Color sets being added to RCA line Sept. 4 reported to have brighter picture due to all-glass CR tubes and added circuitry. Spokesman also said use of darker safety glass will give better contrast.

DISTRIBUTOR NOTES: Admiral Distributors names Jack Somber sales mgr. for N. Y. metropolitan area . . . Canadian Admiral opens Winnipeg factory sales branch, 801 Berry St., St. James, replacing Allan Lyone as distributor in Manitoba-Lakehead area; Wm. O. Hoskinson named mgr. of new branch . . . Westinghouse Appliance Sales opens Columbus, O. district office (Neil C. Davis, district mgr.) . . . Warren-Connolly Co. (Motorola), N. Y., appoints Harry Scheeter, ex-Motorola regional mgr. for N. Y., Philadelphia, Atlantic City areas, as gen. mgr.; he replaces Dan Jacobs who resigned to become partner in Louis R. Goldman & Co. national sales rep in N. Y. . . . Kenrow Inc. (Motorola), Atlanta, appoints Bruce Woodcox exec. v.p. . . . Olympic Radio & TV opens 12th factory branch, Olympic of Southern New England, 148 Amity Rd., Woodbridge, Conn. (Ted Bloom, gen. mgr.); also appoints Washington Wholesalers, 3515 V St. NE, Washington (M. David Dubb, pres.) . . . Sylvania appoints Swan Distributing Co., 724 Fifth St., Columbus, Miss. for tubes.

Magnavox has entered categorical denial to suit of National Sales Co., Rochester, N. Y. charging "conspiracy and agreement in restraint of trade" to eliminate competition between Magnavox and Sentinel Radio products. Magnavox asked U. S. District Court, Buffalo, to dismiss \$900,000 treble damage suit (Vol. 13:29) and award it costs of action. Magnavox answer also denies charges that it produced, sold or distributed defective sets to compel withdrawal of Sentinel TV from market or that its purchase of Sentinel tended to create a monopoly and lessen competition.

Preliminary list of imports for which valuation procedures will be unchanged under new Customs Simplification Act was published Aug. 22 by U. S. Treasury. List includes TV apparatus and parts, radio receiving tubes, radio phonographs made mainly of metal. Domestic manufacturers have 60 days to request additions to list—or deletions.

Times Square visitors can be sure of getting correct time, temperature, weather forecasts—courtesy of Admiral Corp.—for another 5 years. Admiral has renewed original 5-year sponsorship of 2600-sq. ft. electric sign at 47th St. & Broadway-7th Ave.

International dept. of Electronic Industries Assn. has same executive committee, section and subcommittee chairmen for 1957-58 with exception of Traffic Subcommittee where Paul E. Romberg, Philco International, replaced Howard Spellman, RCA, resigned.

Radios shipped to dealers in first 6 months of 1957 totaled 3,436,428 compared with 3,270,809 in similar 1956 period, EIA reports. June shipments were 765,719 vs. 503,693 in May and 798,414 in June 1956.

Unusually heavy TV sponsorship schedule by Los Angeles discount chain Wm. E. Phillips Co. calls for thrice-weekly, 13-week series of 2½-hour feature film showings at cost of some \$90,000-\$100,000.

NARDA's "Costs of Doing Business Survey" (Vol. 13:24) is now available in booklet form at NARDA, 1141 Merchandise Mart, Chicago, at \$1 for 1-49 copies, 50¢ for 50-99, 25¢ for 100 or more.

Electronic Industries Assn. has reappointed its tax committee under chairmanship of Lewis D. Spencer of Motorola.

Jerrold announces new multi-set couplers—2-set couplers for strong signal areas at \$3.50, 2-set for fringe areas \$4.50, 4-set couplers \$5.75.

ELECTRONICS PERSONALS: Dr. Arne Wikstrom appointed special technical asst. to Avco research & advanced development div. pres. Dr. Lloyd P. Smith . . . Roswell C. Peavey resigns as administrative officer of U. S. staff for International Geophysical Year to join Page Communications Engineers as joint ventures mgr. in charge of international telecommunications projects in Korea, Libya, Southeast Asia . . . Quentin G. Turner, ex-Johns Hopkins Applied Physics Lab coordinator for Motorola & Convair work on Terrier missile, named asst. mgr. for organization of Motorola's western military electronics center, Phoenix . . . James B. Williams promoted to director of weapon system engineering, Philco Govt. & Industrial div.; Herman A. Affel to director of computer & control engineering; John Colocousis, chief mechanical engineer . . . John P. Taylor promoted to mgr., marketing plans and services, RCA Industrial Electronic Products; Herman R. Henken succeeds him as mgr., adv. and sales promotion . . . Albert Coumont, one-time EIA (RETMA) service coordinator, and Kenneth Price promoted to Sprague regional sales mgrs. . . . Borge Hansen-Moller, Cal. investment banker, elected a director of Paramount Pictures subsidiary Chromatic TV Labs and named exec. committee chairman to supervise organization of facilities for Lawrence color TV tube; Barney Balaban, Paramount pres., also named a Chromatic TV director . . . Dr. Dean Allen Watkins, Stanford U, receives IRE western regional electronic achievement award for "basic contribution in reducing noise in microwave electron tubes" . . . Thomas H. Armstrong, ex-Underwood Corp., named RCA Bizmac sales plans & programs mgr. . . . J. E. Schlener promoted to Sylvania semiconductor div. eastern district sales mgr., Woburn, Mass. . . . M. J. Leonard, ex-Hughes Aircraft, named Hycon v.p.-customer relations . . . Leonard T. Donnelly, ex-W. L. Maxson Corp., appointed DuMont Labs component sales mgr. . . . Howard S. Gleason promoted to asst. gen. mgr. of Stromberg-Carlson electronics div. . . . Henry Schumer promoted to chief engineer of Asheville, N. C. plant of International Resistance Co.; James Wilkes to quality control mgr. of Philadelphia plant.

Govt. contracts totaling more than \$10,000,000 have been awarded Admiral Corp. in 60-day period ended June 30, reports exec. v.p. J. B. Huarisa: Navy Bureau of Aeronautics, \$4,500,000 plus for airborne radio receiver-transmitters; Army Signal Corps, \$3,469,000 for receiver-transmitters for helicopters; Navy Bureau of Ships, over \$2,000,000 for radar system.

Tribute to electronic industry was paid Aug. 21 by Army Secy. Brucker in San Francisco speech to West Coast Electronic Mfrs. Assn. He said it is "vital to our national security to reduce to the absolute minimum the lead time between the inception of an idea and the moment when the item involved is ready to be put to work for our defense."

Forward scatter link using 2180 mc has been operated successfully in tests in 124-mi. path from transmitter at Cedar Grove, N. J. to receiver at Somers, Conn., DuMont Labs reports. Transmitter capable of 72 voice channels with 2.5-mc bandwidth has dish 18 feet wide mounted on 24-foot tower, utilizes Eimac 1-kw klystron tube. Receiver has two 10-foot dishes on 25-foot towers.

Changing to a weekly Jan. 1, *Electronics Magazine* (McGraw-Hill) will alternate business and engineering issues. Early this year, magazine went from monthly to thrice monthly, adding 2 business editions to its basic engineering issue. *Electronic Design* (Hayden) goes bi-weekly, from twice monthly, starting Jan. 8.

Basic radar patent under which Govt. has royalty-free license has been awarded to Col. Wm. R. Blair (ret.) of Signal Corps 20 years after he first demonstrated complete workable set, Army announced Aug. 20. Blair conceived pulse-echo method of direction finding & ranging in 1920's, developed it in '30's at Signal Corps Labs, Ft. Monmouth, N. J., showed Congressmen how it worked in 1937. Plans for set then were turned over to manufacturers to build equipment for Army, but due to "high degree of secrecy" surrounding device, Signal Corps didn't file Patent Office application until June 1945. Patent had been pending since.

Litton Industries is combining subsidiaries Litton Components and U. S. Engineering to promote USECO brand line of standardized electronic hardware, printed circuits, precision potentiometers, microwave components. Sales director will be Richard W. Griffiths, ex-Graybar. Production, engineering, administration and sales will be in Los Angeles, manufacturing and shipping in Culver City & Glendale, Cal., Mt. Vernon, N. Y.

Electronics research reports, *Common-Base Transistor Equivalent Circuits for Wideband Amplification* by J. M. Mathias of Stanford U for Office of Naval Research (PB 121752, 50 pp., \$1.25), and *The Backward Wave Amplifier, A Voltage Tunable Microwave Amplifier* by D. G. Dow, Wright Air Development Center (PB 121797, 16 pp., 50¢), are available from Commerce Dept.'s Office of Technical Services, Washington 25, D. C.

Integrated Bizmac system—"first commercial network installation" of kind—will be made by RCA for Travelers Insurance Co., Hartford. When completed in 1963, installation will include 4 Bizmac units with own computers, linked in central exchange. RCA states it will reduce months of insurance paper work to minutes of electronic processing.

Army Signal Supply Agency has ordered some \$10,000,000 worth of FM multi-band radio relay units and parts from Philco govt. & industrial div. for use as connecting stations for multi-channel field telephone circuits where cable is not practical.

RCA was awarded CAA contract for 20 airborne transponder radar beacons for delivery early next year, to be used in evaluation study to determine applications in air traffic control.

Electronic components plant costing \$20,000,000 is to be built by Western Electric 15 mi. SE of Kansas City, Mo., construction to start early next year. Plant will also produce 2,000,000 telephones per year, employ 3500-4000.

Industro Transistor Corp. opens initial transistor manufacturing facilities at 87-31 Britton Ave., Elmhurst, N. Y.

Amphenol buys 48-acre site at Broadview, Ill. for \$1,000,000 from Broadview College & Theological Seminary.

Clarostat Mfg. Co. reports earnings of \$110,376 (26¢ per share) on sales of \$3,658,655 for first 6 months of 1957 compared with \$76,817 (18¢) on sales of \$3,511,990 in similar 1956 period.

Fleetwood Securities Corp. has filed statement (File 2-13543) with SEC seeking registration of 3 systematic investment plans aggregating \$15,000,000 for accumulation of Electronics Investment Corp. shares.

American Electronics has acquired assets of Atlantic Instrument Corp., Norwood, Mass., through exchange of 30,000 common shares, will operate Atlantic as wholly-owned subsidiary.

Financial & Trade Notes: Electronics Investment Corp., San Diego, in quarterly report of July 31, lists these portfolio additions since April 30, 1957 (Vol. 13:22): 500 Beckman Instruments, 10,000 Epsco, 1000 Fansteel Metallurgical, 350 G. M. Giannini, 15,000 Ling Electronics, 10,000 Ling Industries, 6000 Midwestern Instruments, 20,000 Tracerlab, 25,000 Unitronics, 1000 General Precision Equipment 6% pfd., 1000 Tung-Sol 5% pfd., \$100,000 Airborne Instruments 5¼% debentures, \$50,000 Emerson Electric 5½% debentures. Sold during quarter were these total holdings: 5000 Litton Industries, 4000 Otis Elevator. Also sold were 500 Airborne Instruments, leaving 3500; 4188 Boeing Airplane, leaving 300; 1000 Consolidated Electrodynamics, leaving 7000; 3000 Daystrom, leaving 10,000; 2995 P. R. Mallory, leaving 8000. Common stockholdings as of July 31 were valued at \$13,679,803; preferred holdings, \$267,625. Total net assets increased to \$15,553,859, compared with \$14,352,695 as of April 30 and \$11,408,689 at end of corresponding 1956 quarter.

* * * *

Amphenol filed registration Aug. 21 with SEC (File 2-13558) for 200,000 shares of \$1 par common stock for public sale through underwriting group headed by Hornblower & Weeks. Statement said proceeds would be used for plant expansion at Broadview, Ill. at cost of \$4,100,000 and for \$1,800,000 acquisition of stock of Danbury-Knudsen Inc., manufacturers of connectors & electronic specialties at Danbury & Brookfield, Conn.

Meredith Publishing Co., whose subsidiaries own WHEN-TV & WHEN, Syracuse; WOW-TV & WOW, Omaha; KPHO-TV & KPHO, Phoenix; KCMO-TV & KCMO, Kansas City, reports consolidated earnings of \$4,644,417 (\$3.59 per share) on revenues of \$53,071,711 in year ended June 30 vs. \$4,047,146 (\$3.14) on \$48,459,633 in preceding fiscal year.

Officers-&directors stock transactions for June, as reported to SEC: American Bosch Arma—Edmund D. Gittens sold 600, holds 150; Wm. S. Wasserman sold 100 through holding company, holds 13,900 in holding company, 4969 in trusts, 12 personally. AB-PT—Herbert B. Lazarus sold 500, holds 1000; Robert H. O'Brien sold 500, holds 5100. American Electronics—David Van Alstyne Jr. sold 1600 through Val Alstyne Noel & Co., holds 8050 in partnership, none personally. American Machine & Foundry—George S. Hastings sold 500, holds 685; G. A. Ingalls exercised option to buy 832, holds 2709. Bendix Aviation—Henry A. Gossner exercised option to buy 500, holds 1250; W. H. Houghton exercised option to buy 2000, holds 4383; Charles Hummel exercised option to buy 1000, holds 1714; Raymond P. Lansing exercised option to buy 400, holds 4598; Louis F. Polk bought 10, received 566 more in Sheffield Corp. stock exchange, holds 77,490. Consolidated Electrodynamics—Harold W. Washburn sold 100, holds 7290. Daystrom—Carlton S. Proctor bought 100, holds 500. DuMont Labs—Armand G. Erpf bought 1100, holds 6900; David T. Schultz bought 800, holds 5000. Electronics Corp.—Frederick R. Dent Jr. bought 200, holds 1100. Friden Calculating—Stanley M. Friden sold 1500, holds 37,981; P. R. Samwell sold 300, holds 638. Gabriel Co.—Frank M. White sold 2500, holds 25,000. GE—John W. Belanger exercised option to buy 1125, holds 12,263; Ralph J. Cordiner sold 400, holds 13,655; George L. Irvine exercised option to buy 900, sold 300, holds 2648; Roy W. Johnson exercised option to buy 3225, holds 12,275; H. A. MacKinnon exercised option to buy 1400, holds 5927; Gerald L. Phillippe exercised option to buy 3088, sold 1000, holds 5769; Philip D. Reed sold 1200, holds 6900; Harold

Dividends: Sylvania, 50¢ payable Oct. 1 to stockholders of record Sept. 10; Whirlpool, 35¢ Sept. 10 to holders Aug. 30; Time Inc., 75¢ Sept. 9 to holders Aug. 26; American Bosch Arma, 25¢ Oct. 15 to holders Sept. 16; AT&T, \$2.25 Oct. 10 to holders Sept. 10; Clevite, 25¢ Sept. 12 to holders Aug. 30; Canadian Westinghouse, 25¢ Oct. 1 to holders Sept. 13; Globe-Union, 30¢ Sept. 10 to holders Aug. 30; Oak, 35¢ Sept. 13 to holders Aug. 30; 20th Century-Fox, 40¢ Sept. 28 to holders Sept. 13; Sprague Electric, 30¢ Sept. 13 to holders Aug. 30.

Telecomputing Corp. & Wm. Whittaker Co. Ltd., Los Angeles, have agreed to merger subject to stockholders' approval. Plan calls for exchange of one Whittaker share for 4 Telecomputing common, Whittaker to cancel 679,790 Telecomputing shares it already owns in share-for-share exchange of new issue of new Telecomputing 6% cumulative preferred. Surviving company would be Telecomputing.

Twentieth Century-Fox reports consolidated income of \$4,069,865 (\$1.54 per share) in 26 weeks ended June 29 compared with \$2,156,670 (82¢) in same 1956 period. Gross for 6 months was \$64,276,712 vs. \$56,779,826. June quarter earnings were \$1,898,185 (72¢) vs. \$56,779,826 (65¢) year earlier.

General Transistor earned \$129,363 (43¢ on 301,066 common shares outstanding) on record sales of \$1,228,859 in first 1957 half compared with \$78,000 (42¢ on 183,066 shares) on \$364,143 in corresponding 6 months last year, pres. Herman Fialkov noting that earnings in 1957 period reflected plant expansion costs.

Granco Products Inc. earned \$46,022 (14¢ per share) on sales of \$2,453,000 in year ended June 30 compared with \$23,683 (7¢) on sales of \$2,229,000 for preceding fiscal year.

F. Smiddy exercised option to buy 1875, holds 7500; Arthur F. Vinson exercised option to buy 2352, sold 690, holds 7036. Hoffman Electronics—Bruce L. Birchard sold 100, holds 100. Litton Industries—Charles R. Abrams exercised option to buy 800, holds 3908; Roy L. Ash sold 2532 through partnership, holds 16,812 in partnership, 52,415 personally; Lewis W. Howard sold 900 through trusts, 1000 more personally, holds none in trusts, 3762 personally; H. W. Jamieson sold 2532 through partnership, holds 16,812 in partnership, 52,590 personally; Norman H. Moore exercised option to buy 2000, holds 9900; Joseph A. Thomas bought 5000 through Lehman Bros., holds 24,500 in Lehman Bros., 100 in trust, 6795 personally. Magnavox—Richard A. O'Connor sold 1700, holds 56,243. Minneapolis-Honeywell—Richard P. Brown sold 500, holds 63,534; Gerry E. Morse exercised option to buy 100, holds 775; Charles B. Sweatt sold 1000, holds 9250 in trusts, 70,470 personally; J. J. Wilson sold 1200, holds 73,970. Raytheon—N. B. Krim exercised option to buy 1000, holds 4500. Sperry Rand—H. C. Landsiedel sold 300, holds 5620; Harry Landsiedel sold 8000 through partnership, holds 18,960 in partnership, 13,904 personally. Sylvania—Leon C. Guest Jr. sold 100, holds 361; Arthur L. B. Richardson exercised option to buy 200, sold 38, holds 810. Texas Instruments—S. T. Harris bought 1000, holds 16,604. Westinghouse—Bruce D. Henderson bought 100, holds 700; Reese H. Taylor bought 200, holds 400.

Note: Matty Fox, listed as beneficial owner of more than 10% of Guild Films stock, sold 107,246 in May & June through 6 holding companies "to satisfy indebtedness," holds 144,468 in holding companies and 900 personally "as collateral against loans," according to SEC.

PAY-TV PROPOSALS “run absolutely counter” to “basic theory of the legislation which established America’s broadcasting system,” Sen. Potter (R-Mich.) of Senate Commerce communications subcommittee said in speech delivered on floor Aug. 23.

Consistent opponent of subscription TV, Potter denounced its promoters and said “further growth of TV to its full potential as a medium of vital influence on our republican form of life will depend upon the availability of more space to be allocated to free TV if we are to have a fully competitive system.”

Pay-TV proponents, he said, are engaged in “one of the most aggressive & calculated publicity campaigns in the history of American industry” to supplant free TV with “a sort of domestic slot machine operation which would require the people to pay for something they are now receiving without charge.”

Potter warned that promoters of pay-TV seek “an opportunity to go into business on a permanent basis” through tests sought from FCC. He said that courts will finally decide whether FCC has jurisdiction to authorize tests, but “American people certainly have jurisdiction, too—and their representation resides in this Congress.”

“On balance,” Potter maintained, “it seems to me that the people themselves have voted resoundingly for TV

home entertainment & education which has been designed along lines that are consistent with our traditional high regard for free media.” He said viewers already had invested \$15 billion in sets, on assumption they’d get free programs “without further assessment.”

Defending networks against charges that they control broadcasting “to the point of monopolistic practice,” Potter restated his faith in them:

“I do not happen to believe this is true, and I am confident that an analysis of the ownership of America’s 510 TV stations would reveal that they are held by diversified interests covering a wide span of social, political, economic & religious persuasion.

“Conversely, however, any system of subscription TV closely held & controlled by the purveyors of specified types of boxoffice programs could in time develop into the kind of monopolistic practice with which our Dept. of Justice has had to deal in the past in the field of entertainment.”

Moreover, Potter said: “If there is a sufficient number of people in this country who wish to convert their homes . . . into theatres where they will pay for certain types of entertainment, there are ways in which these promoters can devise systems that will perform efficiently and perhaps economically.

“But there is little justice in the concept that we should take from 40,000,000 families any fractional opportunity they have to receive these same productions of entertainment & information free of charge.”

Red China coverage ban was lifted Aug. 22 by State Dept. to permit 24 U. S. reporters—but not TV cameramen—to go there on 6-month experimental basis. Decision represented qualified reversal of policy by Secy. Dulles, who had resisted demands by broadcasters & press (Vol. 13:29) for free access to Communist country. State Dept. specifically listed 24 news-gathering organizations, including the networks, as authorized to assign one reporter each to China. Govt. will not object if reporters carry cameras with them, but photographers will not be included in passport validations. It’s “great step forward in giving the American people detailed accurate information about world affairs,” pres. Ted Koop of Radio-TV News Directors Assn. said, but he added: “We regret, however, that the Dept. did not see fit to include cameramen in the group, because TV news film is an integral part of modern presentation of news.” One of first to get China assignment was NBC’s James Robinson, already in Southeast Asia.

Lament for young playwrights in TV is sounded by dramatist N. Richard Nash (“The Rainmaker”) in Aug. 18 *N. Y. Times Magazine*. Repelled by economic hazards of legitimate theatre, they turn to TV to write “memos for millions,” Nash says. “Not only for millions of dollars but for millions of people.” And they don’t write plays at all, but “trade jargon, a shorthand patois of life, a set of top-of-the-cortex cliches, filed & forgotten.” Result is that talented writers are making TV money—and theatre is losing plays they should be writing, even at risk of failure. Nash has no solution, but somebody had better do something: “For their sake, we have to pull them away from the memo pads. For the theatre’s sake, we’d better.”

Video tape will have greater impact on telecasting than sound magnetic tape had on radio broadcasting, CBS-TV engineer Howard A. Chinn predicts in Aug. *Journal of the SMPTE*.

New reps: KFSA-TV, Ft. Smith, Ark. Aug. 1 to Venard, Rintoul & McConnell (from Pearson); KOAT-TV, Albuquerque, to Bolling (from Hollingbery).

Closed-circuit theatre TV is “worth our best try” to develop TV-Broadway partnership and revivify legitimate stage, according to co-producer Howard Erskine of “The Happiest Millionaire” & “The Desperate Hours.” Writing as guest columnist for critic Walter Kerr in Aug. 18 *N. Y. Herald Tribune*, Erskine rules out network telecasting of Broadway shows or pay-TV performances as profitable means of promoting stage. Both are likely to “kill the Broadway box office, and, more probably, any possibility of a movie sale,” he says. But in closed-circuit TV “risk of losing potential audiences is considerably lessened, and the limited number of people played to should in no way hinder a movie sale. With all this, profit rears its beautiful head . . .”

Equal TV-radio status in news coverage of official proceedings will be demanded in fall legislative campaign by N. Y. Radio-TV Broadcasters Assn. Special policy meeting of broadcasters in Van Curler Hotel, Schenectady, approved draft of principles & plans for drive to repeal Sec. 52 of state’s Civil Rights Law, which forbids TV-radio coverage of public court sessions, etc., at which subpoenaed testimony may be taken. Program will be submitted to organization’s convention Sept. 18 in Schenectady.

Two applications for TV stations were filed with FCC and one dismissed this week, bringing total to 122 (37 uhf). Applications: For San Diego, Ch. 21, Sherrill C. Corwin, west coast theatre man who owns 15% of KAKE-TV & KAKE, Wichita, and holds uhf CP for KBAY-TV, San Francisco; for Erie, Pa., Ch. 66, by Jet Bestg. Co., operator of WJET, Erie, and applicant for Ch. 45, Youngstown. Dismissal: For Elko, Nev., Ch. 10, Elko Bestg. Co.

Marconi TV equipment has been ordered by Danish Posts & Telegraphs Dept. for new stations at Aalborg, Vestjylland & Naestved, all due on air in 1958. State-owned stations now operate at Copenhagen, Aarhus, Odense & Sonderjylland.

New ABC-TV primary affiliate is KVIL-TV, Amarillo (Ch. 7), due on air before end of year.

SUMMARY-INDEX OF THE WEEK'S NEWS — August 31, 1957

FCC TV DECISION-MAKING deplored by Harvard law professor who also indicts Congress for lobbying and failing to supply statutory guidance (p. 1).

CABLE TOLL TV takes all the play away from telecast systems as Congressional opposition mounts, Bartlesville starts, exhibitors envision role in TV (p. 2).

HAGERSTOWN CLOSED-CIRCUIT educational TV project assessed by Saturday Review after year's operation. Enthusiasm higher than ever (p. 2).

TV NOSING OUT DIRECT MAIL for 2nd place among media in Printers' Ink compilations. Take of \$1,209,900,000 includes talent & production (p. 3).

TV STATION BUYERS can't write off network affiliation & spot contracts as depreciation, Govt. rules in \$5,000,000 Westinghouse tax claim (p. 6).

GOOD FALL SALES, bringing year's total to about 7,000,000 sets, is view of major setmakers; several note record summer business (p. 9).

FEWER BUT BETTER trade shows desired, according to EIA survey; average cost of exhibit increased \$200 from 1955 (p. 10).

NEW STATION STARTERS: Vhfs in Pittsburgh, Portsmouth-Norfolk, St. Paul-Minneapolis educational, Casper, Wyo. Accelerated building activities (p. 5).

PHILCO SEEKS "SCAPEGOAT" for poor business by protest on Philadelphia station renewals, NBC says, alleging "vendetta" against RCA (p. 7).

TV NETWORK BILLINGS run 6.3% ahead of 1956 in first 7 months this year with \$289,478,303 total; ABC-TV leads July percentage gain (p. 12).

LAW PROFESSOR ATTACKS FCC TV 'GIVEAWAYS': "The Scandal in TV Licensing" titles one of most scathing attacks to date on FCC's TV granting practices—and on Congress' own alleged laxities and lobbying with Commission. It's in Sept. Harper's Magazine, by Louis L. Jaffe, Bryne professor of administrative law, Harvard Law School, and it's subtitled: "How seven men in Washington are giving away broadcasting channels worth millions of dollars—apparently with no clear guide except their personal whims and political pressure."

Jaffe asserts that problem is lack of "a well-informed, imaginative, disinterested bureaucracy operating in a judicial spirit." He states that Congress has given FCC no guidance in selecting among applicants; that Commission has developed good criteria. He goes on: "But [these criteria] are unfortunately extremely imprecise, and they are capable of infinite manipulation. They can become—and, in my opinion, the record shows that they have become—spurious criteria, used to justify results otherwise arrived at."

To illustrate his contentions, Jaffe picks media diversification. He notes that Commission awarded channels in Clarksburg, W. Va. and Boston to newspaper-radio interests, indicating diversification wasn't prime factor—yet it held media ownership against McClatchy in denying it Sacramento channel.

Pointing out that Herald-Traveler's good radio record was important factor in its winning Boston decision, Jaffe asks: "Is this not the very heart of contradiction? If, on the basis of its past performance, one already in the communications business is to be preferred, what room is there for [diversification]?"

Jaffe blames Congress, primarily, for leaving its TV-radio statutes wide open: "It has not in all these years made a single contribution to policy, except through threats of committees and pressure exerted over the telephone."

What's the solution? Jaffe says Congress might pass clarifying laws: "But it must be confessed

that such legislation would not substantially narrow the range of administrative discretion." He concludes that climate of public opinion should be developed so that: "Congressmen, high officials of the Administration, and party politicians must refuse to approach commissioners. The commissioners in their turn must close their doors and ears to everything except the record made openly before them. A litigant would not dare procure his Congressman to intercede with a judge. We must establish a tradition which makes the show of influence equally unthinkable in an administrative proceeding. It would be an important step in the building of such a tradition for Congress by statute to give authoritative expression to these principles."

CABLE PAY TV CAPTURES FULL SPOTLIGHT: Pay-TV emphasis is more & more on cable, as more & more obstacles to telecast toll appear. If FCC even authorizes "tests," it will have to do so over irate opposition of plenty of Senators & Congressmen. For example, Sen. Lausche (D-O.) showed his staunch opposition publicly for first time during Sen. Potter's blast last week (Vol. 13:34). Lausche, Potter & Thurmond (D-S. C.) joined in a sort of contrapuntal fugue in Senate floor discussion, agreeing about the dangers of pay-as-you-see. There's mighty little pro-pay sentiment expressed on the Hill. Apparently, the law-makers just can't cotton to something that offers possibility of requiring people to pay for something they now get free. Other toll developments:

(1) Bartlesville, Okla. cable system starts Sept. 3 with 300 subscribers. After a few months, it will provide most eagerly awaited statistics in industry.

(2) Paramount's International Telemeter continued reporting there would be imminent announcement of exhibitor franchise grants for its pay system. John J. Fitzgibbons, pres. of 379-theatre Famous Players Canadian Corp., a Paramount associate, said he'd start cable theatre in several unspecified Canadian cities next year.

(3) VFW convention in Miami Beach unanimously denounced pay TV because it would deprive low-income families of chief form of entertainment, eliminate free defense-promotion spots & programs, reduce effectiveness of networks as communications media in times of national emergency.

(4) San Francisco Labor Council endorsed cable-TV concept but demanded that full hearings be conducted before franchises are awarded and that no commercials be permitted on the cables.

(5) Applications for cable franchises in Los Angeles were approved for Fox West Coast Theatres-International Telemeter and for Harriscop Inc. by Public Utilities & Transportation Commission. These 2, along with Skiatron, go before City Council for final approval about Sept. 18.

(6) Noted producer David O. Selznick plumped for pay TV as a possible "salvation for U. S. film production" as he complained bitterly about high costs of film distribution. Toll TV would be a "dream" from producers' standpoint, he said.

EDUCATIONAL TV—FREEING TEACHERS TO TEACH: "Automated education," through use of TV—closed circuit or telecast—induces no fear among educators that students will become automatons, any more than industry fears automation will eliminate need for human skills. Rather, educators' experience with TV to date shows, TV permits widest possible use of best teachers.

Stimulated by encouraging progress reports, such as lead article in August 24 Saturday Review covering "year-after" study of Hagerstown, Md. pilot experiment (Vol. 13:2, 3, 11), closed circuit TV may well expand so that investment in equipment exceeds that of commercial telecasting itself.

Almost nothing but enthusiasm is reflected in Saturday Review article by Carl Bakal, editor of Real & See magazines—and you may be sure Saturday Review would be among the first to detect any "dehumanization" of teaching.

Basic advantage pointed out in article is still the fundamental one: Best qualified teachers can reach most students. Most teachers can handle elementary subjects easily, but they're happy to turn over to specialists such subjects as science, music and art. For example, science teacher effectively reaches 554 students, arithmetic teacher 512—yet there's national tradition that there should be at least one teacher for every 30 pupils.

Some 6000 Hagerstown pupils now get televised instruction. By the end of next month, 6200 will be added—and by 1958-59 all 20,000 students in Washington County's 48 schools will be covered.

Supplementary nature of TV is made clear by superintendent Wm. M. Brish, who states: "To understand what we are trying to do it is important to discard the popular notion that TV is just a gadget. It is no more a gadget than the textbook. In fact, it deserves a place alongside the textbook as the most important educational advance of the century." Regular teacher is still on hand in each class, handling "warmup," homework, exams, etc. In fact, there's talk of using non-teacher "aides" to take over non-professional tasks—just as nursing aides do.

Cost of program, supported by EIA (formerly RETMA) and Ford Foundation Fund for Advancement of Education, is \$1,000,000 spread over 5 years. This compares with the \$5,099,585 spent on Washington County schools in 1956 alone. "Actually, in the long run," Bakal writes, "because of the anticipated savings in building facilities, material expenses, and teacher salaries, it is more than likely that such a program would be self-supporting."

The kids like it, too, for TV has "a certain intimacy and magnetic eye-compelling quality that helps rule out the distractions common in a classroom and fix the attention of its viewers." As one youngster said: "Do you mean to say, Mommy, that there was no TV when you went to school?"

Enthusiasm for TV among southern educators and legislators shows no letup. Meeting in Williamsburg, Va. this week end, some 100 legislators from 16 southern states were to hear long-range plans for 16-state TV network. One of south's most vigorous TV proponents, Fla. Gov. Leroy Collins, told group that TV could provide "the very finest instruction to additional thousands of college students at a cost of \$2.80 per student semester hour, compared with the current instruction cost of between \$12 and \$18."

Another happy marriage of electronics and education is being tried in Whittier, Cal. schools, where IBM cards are used to provide class rosters, seating arrangements, score I.Q. tests, tabulate reports—thus making teachers freer to teach.

TV PRESSES HARD FOR 2ND PLACE AMONG MEDIA: In addition to FCC's official figures on TV revenues for 1956 (Vol. 13:34), further authoritative documentation of TV's upsurge is contained in Printers' Ink's newly published "Advertisers' Guide to Marketing for 1958."

While Commission limits itself to figuring revenues received by stations and networks, Printers' Ink extends its estimates (prepared under direction of McCann-Erickson's Robert J. Coen) to include everything spent on TV by advertisers—including expenditures for talent & production.

Commission showed 1956 network-station revenues rising 20.4% to \$896,900,000, while Printers' Ink calculates total TV expenditures by advertisers rose 18% to \$1,209,900,000—a percentage rise greater than that of any other medium—while total for all advertising was up 7.7% to \$9,904,700,000.

Having rudely thrust magazines out of 3rd place in 1954, TV is now hot on heels of direct mail for 2nd place. Newspapers held lead with \$3,235,600,000, while direct mail garnered \$1,419,200,000.

Breakdown of TV expenditures was estimated as follows: network, \$629,700,000; spot, \$325,000,000; local, \$255,200,000.

A slight toning down took place between Printers' Ink's early estimates and those now published. Its preliminary judgment in Feb. (Vol. 13:6) was that total 1956 spending was \$9,982,000,000 and that TV captured \$1,255,000,000 of it.

Radio's comeback is documented, too, showing 4.7% gain to \$570,700,000—first upturn since peak of \$624,100,000 in 1952. Radio breakdown: local, \$340,800,000; spot, \$158,900,000; network, \$71,000,000.

For the over-all picture in 1957, Printers' Ink sees \$10.2 billion total—but it doesn't attempt to provide a breakdown by media. (For Printers' Ink table covering all media, see p. 4).

Annual Volume of Advertising in United States

Personal Notes: Edward J. DeGray, ABN v.p. in charge of station relations, assumes new title of v.p. in charge of stations; Betty Boucher promoted to director of combined sales service & station clearance depts.; John A. Stearns named an exec. producer . . . Fred Lyons named eastern mgr. of NBC radio spot sales, Richard Arbuckle central div. sales mgr. . . . Paul Roberts, MBS pres., becomes NARTB director replacing ex-MBS pres. John B. Poor . . . Harold M. Wagner named MBS program director, Joseph F. Keating program operations mgr., Henry R. Poster research & sales promotion director . . . Herbert J. Cutting, chief accountant of MBS, also named administrative services director . . . Glenn Fannin named NTA south central div. sales mgr. . . . Henry S. White promoted to new Screen Gems post of program procurement director . . . Jules A. Renhard, ex-RCA, joins Page Communications Engineers in systems engineering & project planning capacity . . . Neale V. Bakke named sales mgr. of WTMJ-TV, Milwaukee; Joseph W. Killeen promoted to sales mgr. of radio WTMJ, in separation of TV & radio sales depts. . . . John J. Edwards promoted to mgr. of KMJ-TV, Fresno . . . Joseph L. Scanlan, ex-H-R Representatives Inc. & KCCC-TV, Sacramento, joins San Francisco staff of rep Peters, Griffin, Woodward; Martin F. Connelly, ex-radio KVSM, San Mateo, joins Hollywood staff . . . Doug Thomp-

son, ex-KCTC, San Angelo, named program mgr. of upcoming KPAC-TV, Port Arthur-Beaumont (Ch. 4) due in fall; John Stegall, ex-KFJZ-TV, Ft. Worth, production mgr. . . . John Utley, ex-KABC-TV, Los Angeles, joins KLAS-TV, Las Vegas, as continuity & promotion director . . . Victor Reed resigns as news & public relations director of KGO-TV & KGO, San Francisco . . . Don Peterson promoted to national sales mgr. of WOI-TV, Ames-Des Moines, succeeded by Ron Scott as program-sales service mgr. . . . Ross Newby, ex-KDUB-TV, Lubbock, Tex., named national sales mgr. of KOSA-TV, Odessa.

Frederick W. Ford, sworn in as FCC commissioner Aug. 29, with oath administered by D. C. District Court Judge John J. Sirica, planned vacation until Sept. 12.

ADVERTISING AGENCIES: Emerson Foote, who resigned in Feb. as exec. v.p. of McCann-Erickson, planning return to agency business by Nov. 1, says he won't start own agency . . . Robert C. Durham, ex-Ruthrauff & Ryan, opens own office at 290 Park Ave., N. Y., as advertising management consultant . . . Norman Traynor promoted to TV-radio director of Brooke, Smith, French & Dorrance, Detroit . . . Charles G. Mortimer Jr., ex-ABC-TV, joins TV dept. of Wm. Esty, N. Y.

New and Upcoming Stations: Three new stations which began programming over Labor Day week end, Pittsburgh's lone uhf station going off the air, and belated on-air report from station in small western market bring this week's on-air box score to 507 (89 uhf). Week end starters: WIIC, Pittsburgh (Ch. 11), WAVY-TV, Portsmouth-Norfolk (Ch. 10) & KTCA-TV, St. Paul-Minneapolis (Ch. 2, educational). KSPR-TV, Casper, Wyo. (Ch. 7) reports it started operation Aug. 12. WENS, Pittsburgh (Ch. 16) went dark Aug. 31.

WIIC made debut Sept. 1 with NBC-TV programming, has 100-kw RCA transmitter at 341 Rising Main St., new GE helical antenna developed for hilly terrain and 840-ft. Truscon tower. Studios are at 700 Ivory Ave. Owner is *Pittsburgh Post-Gazette's* radio WWSW (Oscar M. Schloss, pres.). Same interests also publish *Toledo Blade*, Ch. 11 applicant. Option for 50% of WIIC is held by Kenneth Brennen and members of his family, who are selling radio WJAS & FM to NBC for \$725,000 (Vol. 13:32). Brennen family also controls radio WHJB, Greensburg, Pa. Robert A. Mortensen, ex-N. W. Ayer & Son, Philadelphia, is gen. mgr.; Roger D. Rice, ex-KING-TV & KTVW, Seattle, sales mgr.; Shelton Weaver, ex-WSM-TV & WSIX-TV, Nashville, production mgr.; Warren Gerard, national sales service; Caley E. Augustine, promotion mgr.; Henry R. Kaiser, from WWSW, chief engineer. Base hour is \$1800. Rep is Blair-TV.

WIIC is Pittsburgh's 2nd commercial vhf, other being Westinghouse's KDKA-TV (Ch. 2), pre-freeze outlet acquired in 1955 from DuMont (Vol. 11:2). Other area vhf outlet, which hasn't reported starting date, is Ch. 4, McKeesport, equally owned by Television City (Earl F. Reed & Irwin D. Wolf Jr.) and Hearst radio WCAE. Pittsburgh's only uhf outlet WENS (Ch. 16) left air Aug. 31, as planned (Vol. 13:22), after 3 years of operation. Previously, it dropped litigation opposing grant to WIIC after agreement was reached whereby it was reimbursed \$500,000 for expenses and sale of real estate to WIIC.

WAVY-TV began commercial operation Sept. 1 with ABC-TV, 4th outlet in area already served by WVEC-TV (Ch. 15), WTAR-TV (Ch. 3) and WTOV-TV (Ch. 27). It has 50-kw RCA transmitter, 12-section superturnstile antenna on 1050-ft. Ideco tower at Drivers, Va. Ownership is in hands of 61 stockholders, none holding as much as 10%, with control held by 11 voting trustees, including pres. Hunter C. Phelan, exec. v.p.-gen. mgr. Carl J. Burkland, v.p. George T. McLean & secy.-treas. Henry C. Hofheimer II. Richard Fraser is program & production mgr.; Mike Schaffer, ex-WDBJ-TV, Roanoke, promotion director; Wm. M. Manrov, from radio WAVY, chief engineer. Base hour is \$700. Rep is H-R Television.

KTCA-TV aired first telecast Sept. 2. Although it had test pattern on the air last March 8 (Vol. 13:13), programming was delayed until studio building was ready, land and buildings on St. Paul Agricultural Campus being donated by U of Minn. It has 25-kw DuMont transmitter and 450-ft. Stainless tower with 6-bay antenna at site 1 mi. N. of Agricultural Campus. Grantee is non-profit Twin City Area Educational Television Corp. John C. Schwarzwald, ex-director of educational KUHT, Houston, is station director; Harold O. Bergman, asst. to director; Paul Owen, ex-KUHT, program director; Berten A. Holmberg, from U of Minn. radio KUOM, chief engineer.

KSPR-TV began as CBS-TV affiliate Aug. 12, reports owner & gen. mgr. Donald Lewis Hathaway, also owner of radio KSPR. It's 2nd station in town where KTWO-TV (Ch. 2) started last March (Vol. 13:9). KSPR-TV has

5-kw DuMont transmitter and 3-bay GE antenna installed on 300-ft. tower of radio KSPR. Marcus R. Nichols, from KSPR, is national sales mgr., with Richard Frech local sales mgr. Base hour is \$120. Rep is Walker.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WHDH-TV, Boston (Ch. 5) expects to have construction completed by Sept. 3 and plans Oct. 22 start with test patterns, Nov. 2 programming with ABC-TV, reports v.p. & managing director Wm. B. McGrath for owner *Boston Herald-Traveler*. Its two 10-kw RCA transmitters (1 for standby) are to be ready by Sept. 9 at Chestnut St. site in Newton, Mass. Construction on 1082-ft. Ideco tower began Aug. 26 and 12-bay antenna is to be installed Oct. 3. Alexander Tanger, from WHDH, is v.p. in charge of sales; Les Arries Jr., TV director; Joe Levine, from WHDH, chief engineer. Base hour (network) will be \$2500. Rep will be Blair-TV.

WKXP-TV, Lexington, Ky. (Ch. 27) has 1-kw RCA transmitter, plans Sept. 1 test patterns, Sept. 15 programming, although network affiliation hasn't been signed yet, reports commercial mgr. Miller Welch. It has begun work on 553-ft. Stainless tower, has transmitter house 80% completed, studios 60%. Fred Gregg, ex-Young & Rubicam account exec., is pres.-gen. mgr. and 1/3 owner. Other 1/3 owners are Charles Wright, General Dynamics accounting exec., and Harry Feingold, owner of Superior Distributing Co., Kansas City. They acquired radio WLAP and CP for Ch. 27 from Gilmore N. Nunn for \$346,000 early this year (Vol. 13:3). Base hour will be \$251.30. Rep will be Pearson.

KVII-TV, Amarillo, Tex. (Ch. 7) has ordered RCA equipment, plans Dec. 1 start with ABC-TV, reports gen. mgr. Murry Woroner, ex-KFDA-TV, Amarillo, also commercial mgr. & 2.6% owner of Amarillo radio KAMQ. It will have 833-ft. Andrews tower, and work has begun on transmitter house on US Hwy. 287, N of city. KAMQ studio building at 1301 Polk St., being modified for TV, was scheduled to be ready for equipment about Sept. 1. Ownership interlocks with radio KAMQ. Jerry Gardner, from KAMQ and ex-KFDA-TV, will be production mgr.; (Vol. 13:3). Base hour will be \$251.30. Rep will be Venard, Rintoul & McConnell.

WKST-TV, New Castle, Pa. (Ch. 45) plans return in Oct. with ABC-TV, transmitter now located in Youngstown, reports pres. Sam W. Townsend. New RCA equipment has been ordered and station will have studios in Youngstown & New Castle. Station began operation April 4, 1953, left air Jan. 14, 1955 while awaiting FCC approval of move (Vol. 11:2). Base hour will be \$350. Rep will be Everett-McKinney.

WEEQ-TV, La Salle, Ill. (Ch. 35), status changed from satellite to affiliated station (Vol. 13:33) by owner WEEK-TV, Peoria (Ch. 43), has Sept. 15 programming target, writes v.p.-gen. mgr. Fred C. Mueller. It's installing 1-kw GE transmitter; 400-ft. Stainless tower and antenna are ready. WEEK-TV hour is \$600. Rep is Headley-Reed.

RCA shipped 12-section superturnstile antenna Aug. 26 to upcoming KPAC-TV, Port Arthur-Beaumont (Ch. 4), due in mid-Sept.; 25-kw amplifier Aug. 27 to KROC-TV, Rochester, Minn. (Ch. 10), planning boost to 240-kw; 6-section superturnstile antenna Aug. 29 to WESH-TV, Daytona Beach (Ch. 2), planning boost to 100-kw.

RCA shipped live color camera Aug. 26 to WLWT, Cincinnati.

TAX DEPRECIATION for TV network affiliation & spot contracts acquired with station purchases—as claimed by Westinghouse Bestg. Co. in 1953 Philadelphia deal—was disallowed this week by Internal Revenue Service.

Ruling (No. 57-377 published in Aug. 26 *Internal Revenue Bulletin*) applied immediately only to \$5,000,000 which Westinghouse wanted to write off in 5 years on NBC affiliation and advertising contracts accompanying its \$8,500,000 purchase of WPTZ (now NBC's WRCV-TV) from Philco.

IRS said it knew of no similar pending claims by station buyers for amortization of intangible assets, and possible extent of decision on station buying-&-selling market was uncertain. Westinghouse case will be appealed to Tax Court. Final determination of issue, never before raised on Washington level, may not come for several years.

TV station brokers with whom we talked this week were divided on implications of ruling. "Effects won't be widespread," one told us. "Very few sales are predicated on depreciation of intangibles." Another said: "It's going

Sale price of KOVR, Stockton, Cal. (Ch. 13) is \$3,487,500 plus \$75,000 for land and building in Stockton and \$100,000 for net assets of off-air KCCC-TV, Sacramento (Ch. 40). First to transfer holdings will be H. Leslie Hoffman with 555,830 shares (78.65%) and Terry Lee with 55,574 (7.86%), with minority owners to turn over holdings later. In addition, Lincoln Dellar also has opportunity to sell unissued stock on which he holds option (not exercised as yet), obtained as part of deal whereby he took KCCC-TV off air (Vol. 13:20). Buyer Hudson Valley Bestg. Co. (Lowell Thomas-Frank Smith interests) operates WCDA, Albany, N. Y. (Ch. 41) with satellites WCDB & WCDC and this week filed application for merger with WTVD, Durham, N. C. (Ch. 11), in which it acquired controlling interest this spring (Vol. 13:21). KOVR June 30 balance sheet shows \$835,206 operating loss to date. It lists \$341,226 current assets, \$1,184,464 fixed assets, \$112,533 property investment; \$2,186,335 current liabilities—largest being \$731,374 in debentures, \$637,171 note to Bank of America, \$247,610 equipment contract, \$237,792 film contracts. May 31 balance sheet for Hudson Valley Bestg. shows \$60,694 net gain for 5 months, reducing deficit to \$848,600.

Full control of WCHS-TV, Charleston, W. Va. (Ch. 8) is now held by the Tierney Co. (owner of radio WCHS), which has purchased 40% of stock held by Capital TV Inc. (Sam G. Rahall & family) for undisclosed price. In Jan. 1954, Capital withdrew application for Ch. 8 and grant was made in Feb. after merger gave it 40% interest in WCHS-TV Inc. Tierney officers are Hawthorne D. Battle, pres., and John T. Gelder Jr., v.p.-gen. mgr.

Canadian TV applications to be considered by CBC Board of Governors at Sept. 26 meeting in Ottawa: Yorkton TV Co. Ltd. for Ch. 3, Yorkton, Sask.; CJCB-TV, Sydney, N. S. for Ch. 2 satellite at Inverness, N. S.; CFCL-TV, Timmins, Ont. for Ch. 2 satellite at Elk Lake, Ont.—CFCL-TV also requesting that Ch. 3 grant for satellite at Kapuskasing be changed to Ch. 70 translator.

Canadian TV-radio market is covered by Aug. 24 *Sponsor* in 7th annual report including 7 pages of charts & statistics.

to depress prices, I think." Another figured that decision "might have a temporary effect of depressing prices—but it won't hold in the long run."

IRS held that "network affiliation contract is of distinct benefit to the station as well as to the network," that station "can reasonably expect a substantial amount of revenue" through network sponsors. Intangible assets are subject to tax depreciation if they have value "for only a limited period," IRS said, but: "The very existence & profitability of a network arrangement depend upon a fairly permanent relationship between the network & station."

Local & national spot advertisers "want their programs & spot announcements associated with and adjacent to the more popular network programs," IRS pointed out. "Viewed in this light, these contracts constitute goodwill of the broadcasting station; as such, it is not subject to depreciation."

IRS withheld any opinion on "(1) whether any portion of the excess of the purchase price of the broadcasting station over the value of the tangible assets is properly allocable to the network affiliation contract, or (2) whether a taxpayer sustains a deductible loss upon termination or cancellation of a network affiliation contract where it continues in the broadcasting business."

Radio station sales reported this week: KQV, Pittsburgh, by trustees Earl F. Reed & Irwin D. Wolf Jr. for \$700,000 to AB-PT—sale of station by Reed & Wolf required under terms of merger whereby they hold 50% of Ch. 4 CP in McKeesport, Pa., Hearst's radio WCAE other 50%. Other AB-PT stations are WABC-TV, New York (WABC), KABC-TV, Los Angeles (KABC), KGO-TV, San Francisco (KGO), WXYZ-TV, Detroit (WXYZ), WBKB, Chicago, and 50% of radio WLS, Chicago . . . KRMG, Tulsa, by Western Bestg. Co. (Harrington Wimberly, pres.) for approximately \$500,000 to Meredith Publishing Co., owner of KPHO-TV, Phoenix (KPHO), KCMO-TV, Kansas City (KCMO), WOW-TV, Omaha (WOW) & WHEN-TV, Syracuse (WHEN) . . . WSRC, Durham, N. C. by John C. Greene Jr. for \$95,000 to Robert A. Monroe (30%), Seymour Schneidman (27.5%), Philip Nadler (27.5%) and associates; Monroe is also 50% owner of WAAA, Winston-Salem . . . KATI, Casper, Wyo. by John L. Breece for \$65,000 to banker John R. Burrus (51%) and commercial mgr. K. G. Prather (49% with wife).

Rate increases: WLAC-TV, Nashville, Sept. 1 raises base hour from \$750 to \$825, min. \$150 to \$175. WEEK-TV, Peoria, Aug. 1 raised hour \$475 to \$600, min. \$95 to \$120. WFBC-TV, Greenville, S. C. Sept. 1, hour \$450 to \$525, min. \$112.50 to \$120. WLBT, Jackson, Miss. Sept. 1, hour \$360 to \$400, min. \$80 to \$90. WABI-TV, Bangor, Aug. 15, hour \$300 to \$350, min. \$60 to \$70. Spot increase: KRON-TV, San Francisco, raises 20 sec. from \$425 to \$500.

Translator activities: (1) Richard R. Hayes, running experimental Ch. 70 KK2XGG, San Antonio, has designed own transmitting equipment, may bring it to FCC for type approval preliminary to manufacture. (2) Blonder-Tongue is exploring possible equipment production. (3) TV Allocations Study Organization plans study of translator coverage.

Translator starts: K70AW, La Grande, Ore. began equipment tests Aug. 22, repeating KHQ-TV, Spokane; K77AE, Madras, Ore. July 15, repeating KPTV, Portland; K70AS, Salmon, Ida. Aug. 24, repeating KID-TV, Idaho Falls; K79AA, Blythe, Cal. July 20, repeating KVAR, Phoenix.

NBC COUNTER PUNCHES were thrown at Philco this week in latest round of fight in which Philco, plaintiff in \$150,000,000 anti-trust damage suit against NBC's parent RCA, tried to jolt NBC with protest to FCC that network is unfit to continue operating its Philadelphia stations (Vol. 13:33).

Philco's blows aimed 2 weeks ago at WRCV-TV-AM-FM were just another "maneuver in its vendetta against RCA," NBC told FCC, asserting: "It is clear that Philco's management is seeking a scapegoat for its own business deficiencies & weaknesses."

In 1-2-3 jabs of its own, NBC said FCC should dismiss Philco's protest against renewal of affiliate licenses because (1) it's "an attempt to pervert the protest procedure" of Communications Act, (2) Philco's not "party in interest," (3) issues raised by Philco "are patently sham." In short, said NBC, it's case of "bad faith."

"Root of Philco's continuing & vindictive attack on RCA," NBC said, is RCA's refusal over years to give Philco "preferential treatment in royalty payments so that it could obtain an advantage over its competitors who were also licensed by RCA."

So now, according to NBC, Philco "seeks to abuse the processes of this Commission in an effort to divert attention from its admitted poor past performances"—pre-tax earnings of \$33,703,616 in 1950, only \$557,690 in 1956.

As for Philco's specific complaints to FCC that WRCV licenses shouldn't be renewed because Philco "is injured both as a manufacturer competing with RCA" and "as an advertiser affected by restrictive practices" of NBC and its stations, NBC didn't deny option & must-buy practices but answered Philco can't qualify as "party in interest":

"Philco is not a broadcaster, nor does it compete for

advertising revenue within the area served by the NBC stations in Philadelphia. Indeed, it does not claim to compete with the licensee in any manner . . .

"Philco attempts to satisfy this requisite by asserting that it is an advertiser injured by certain network practices and a competitor of RCA injured by assistance to RCA from NBC. Extending the scope of 'party in interest' to either of these classes would . . . open the floodgates to protests from tens of thousands of persons who have heretofore not had standing . . .

"Any one of these advertisers who felt aggrieved by any practice of a broadcaster could require the Commission to hold a hearing upon a license renewal. In addition to these advertisers the Commission would be faced with the prospect of protests from tens of thousands of persons who compete with anyone having an interest in a broadcast license . . .

"Moreover, on the theory urged by Philco, it and any other set & appliance manufacturer would have standing to protest license renewals to such companies as Westinghouse, General Electric or Crosley, all of whom are engaged in manufacturing as well as broadcasting . . .

"Obviously, Congress never intended to impose such an intolerable burden upon the Commission . . ."

NBC also said "reckless nature" of Philco's licensing protest was indicated by allegations that it was "coerced" by RCA in 1953 into selling its WPTZ (now WRCV-TV) to Westinghouse, which in turn sold it to NBC. WPTZ & other assets were bought by Philco in 1946 for \$38,959, sold for \$8,500,000—"highest price paid up to that time" for TV station, NBC said, asking how "willing seller" in 1953 "can be converted by 1957 into a coerced vendor who sold at a distress price."

NBC concluded: "The protest is sham in its entirety and an imposition on the Commission. It has been filed as publicity weapon by one who has no interest in the license renewal and no standing to protest it."

NARTB convention committee for April 27-May 1 meeting in Los Angeles, starting work at Sept. 6 session in Chicago's Conrad Hilton Hotel: Co-chairmen, J. Frank Jarman, WDNC, Durham, N. C. and W. D. Rogers Jr., KDUB-TV, Lubbock, Tex.; Thomas C. Bostic, KIMA, Yakima, Wash.; Wm. C. Grove, KFBC, Cheyenne, Wyo.; Merrill Lindsay, WSOY-FM, Decatur, Ill.; Robert O. Reynolds, KMPC, Hollywood, Cal.; John E. Fetzner, WKZO-TV, Kalamazoo, Mich.; C. Howard Lane, KOIN-TV, Portland, Ore.; James D. Russell, KKTU, Colorado Springs, Colo.; Harold P. See, KRON-TV, San Francisco. Russell will be TV liaison with Broadcast Engineering Conference.

NARTB position in precedental "equal-time" libel suit appeal (Vol. 13:32) involving radio WDAY, Fargo, N. D. will be that broadcasters cannot be sued for libel growing out of political broadcasts because Communications Act proscribes censoring by stations. Station had been sued by Farmers Union which charged it had been libeled by 1956 broadcast over station by minor party Congressional candidate, under equal time section (315) of Communications Act. Court ruled in favor of station and Farmers Union appealed to State Supreme Court which is expected to hear case first week of Oct.

National TV Week (Sept. 8-14) statement issued by FCC Chairman Doerfer pays tribute to TV industry for "spectacular growth" to 44,500,000 sets, notes more than "80% of the public has available the offerings of 3 or more TV stations" while "in most other countries, the people have only one, or at best two program choices."

Facility changes: WWLP, Springfield, Mass. (Ch. 22) has moved to new tower and boosted power to 219-kw; WTTW, Chicago (Ch. 11, educational) got authorization to boost power Sept. 3 to 275-kw; WVUE, Wilmington (Ch. 12) was authorized to start over Labor Day week end using new 900-ft. tower at new site; WJTV, Jackson, Miss. (Ch. 12) on tests since Aug. 19, started programming Sept. 1 with 316-kw; KROC-TV, Rochester, Minn. (Ch. 10) plans Oct. 1 boost to 240-kw.

Recorded bird calls used with devastating effect by hunters to lure game in recent seasons (Vol. 13:33) will be banned effective Sept. 23, Fish & Wildlife Service reported this week. Regulation applied to "use or aid of recorded bird calls or sounds"—and to amplified imitations of them—carries penalties of \$500 fine and/or 6 months in jail for violations. It covers all game birds, but is intended primarily for protection of geese & ducks which find electronic frauds irresistible.

TV will rescue stalled motorists in new \$10,000,000 Ft. Pitt Tunnel under construction at Pittsburgh. Closed-circuit system in split-level tubes will train 8 cameras on traffic to spot disabled vehicles. Police will dispatch tow trucks to pick them up immediately.

New symbol for American Bestg. Network, modern trylon-shaped "A," was designed by Hank Levinson of ABN sales development & research dept.

Blackburn & Co. opens new station-newspaper brokerage office at 333 N. Michigan Ave., Chicago (Financial 6-6460), Wm. B. Ryan in charge.

Telecasting Notes: "It's going to be a great 1957-1958 season on the TV networks"—particularly for "specials," Aug. 31 *Sponsor* says. Totting up 177 such shows already planned by CBS-TV & NBC-TV, magazine says record total of \$38,000,000 has been committed by sponsors for that category alone . . . Impertinent question put to NBC pres. Robert Sarnoff by Marie Torre for Aug. 30 *N. Y. Herald Tribune* column: "Why doesn't NBC have as many shows in the top 10 as CBS?" Answer: "If you'll wait awhile maybe this question will become academic." . . . It's "beastly time" for TV news, according to NBC commentator Chet Huntley in *N. Y. Herald Tribune* guest column for vacationing John Crosby. Huntley says TV newsmen contend "with a period of political & social blandness, when it is next to impossible to generate excitement about anything." . . . Looking ahead: ABC-TV plans prestige entry in 1958 fall season with 60-min. filmed dramatic series produced by Writers Guild of America in deal involving reported \$4,000,000 . . . "Data-dulled dictums" imposed on TV writers by "chart-minded agencies & agency-minded producers" are "dooming the industry to patterns of hopeless mediocrity," TV-radio branch board of Writers Guild of America, West, protests in Hollywood manifesto. It calls for emancipation of writers from "sanctity of statistically-inspired & research-blessed scripts." . . . Top secret areas will be invaded in "The Challenge of Space" by NBC-TV's *Wide Wide World* Sept. 15, Sun. 4-5:30 p.m. Show will take in Army rocket centers, missile sites, Washington computing base . . . Peripatetic CBS-TV crews will follow Marian Anderson through Korea, Philippines, Indonesia, Burma, Thailand, Vietnam, India, Pakistan to film contralto's Sept.-Dec. tours under auspices of State Dept. and American National Theatre & Academy. Film is planned for 60-min. or 90-min. *See It Now* show in Dec. or Jan. . . . John Foster Dulles opens Martin Agronsky's new NBC-TV *Look Here!* interview show Sept. 15, Sun. 3:30-4 p.m. . . . Big open space in ABC-TV fall schedule is filled with *West Point Story* starting Oct. 8, Tue. 10-10:30 p.m. Recently threatened with abandonment (Vol. 13:30), show shifts from CBS-TV, Van Heusen Shirts having come to rescue as sponsor . . . Kinsey Report will figure in "The Changing Ways of Love," first show in CBS-TV's new *The Seven Lively Arts* series Nov. 3, Sun. 5-6 p.m., which network describes as "witty & penetrating" review by S. J. Perelman. Show is intended to reflect boy-&-girl behavior patterns since

1920's, sampling movies, stage, novels, popular songs, advertising, in addition to Kinsey . . . U. S. networks plan to line up with CBC for TV coverage of Queen Elizabeth's Oct. 12-22 tour starting in Ottawa (Vol. 13:33) and ending in N. Y. Ottawa events alone will be picked up by 23 cameras at 19 locations already marked out by CBC, which will have 30 English & French commentators on assignment . . . Pessimistic thought comes from England, where Sir Kenneth Clark, retiring ITA chairman, told *Kent Messenger* that TV commercials already are "wearing thin" on British public which saw them as novelty when ITA set up shop 2 years ago. TV advertising boom won't last, he thinks . . . Warner Bros. has sold "large group" of movies, including several Academy Award winners, in British deal with Associated TV Ltd. for reported \$250,000 . . . "Bandwagon is rolling" for year-old Australian TV, according to mgr. James H. Oswin of ATN, Sydney. It's been slow, but "it's clear now we're involving every business & show business interest in Australia in TV's growth." . . . Final split: Dean Martin signed corporate papers Aug. 24 divorcing himself from Jerry Lewis and their joint York Productions, formed in 1948.

Promotion of awards in TV, radio & other fields to give them "maximum amount of prestige" is unique business of Sylvia Spence Assoc., new consulting firm organized at 527 Lexington Ave., N. Y. (Plaza 5-2584) by Mrs. Sylvia Spence. She managed Fund for Republic TV script competition, for 2 years has been director of Fund's Robert E. Sherwood TV Awards.

Mike Wallace column for daily newspaper syndication may be new side job for conductor of ABC-TV's *Mike Wallace Interviews* Sun. 10-10:30 p.m. Hall Syndicate, N. Y., is negotiating with Wallace to write Q. & A. feature for which he'd interview persons other than those on his TV program.

Live vs. taped TV was demonstrated by KRON-TV, San Francisco, in special "Sight & Sound" show in which parts of program in progress were recorded on Ampex videotape and played back almost immediately. Delivery of station's first Ampex equipment is expected by mid-winter.

Equal time in Thailand for opposition politicians has been offered by Bangkok Govt. on its TV station. Previously, TV appearances were restricted to govt. party members.

ELECTRONICS PERSONALS: Col. J. R. Martin, ex-Baldwin, Lima Hamilton Corp., named operations v.p. of Hycon Eastern . . . H. Ronald Eldridge elected controller of IT&T industrial products div. . . Richard G. Freeman, ex-Empire Coil, appointed v.p., Todd Products Co., Mt. Vernon, N. Y. (transformers) . . . Clifford A. Busse, ex-Farnsworth div. of IT&T, joins electronics div. of Rheem Mfg. Co., Rivera, Cal., as engineering mgr. . . Laurence A. King, ex-Rola div. of Muter Co., appointed management consultant of International Resistance Asheville and Boone, N. C. plants . . . Maj. Gen. C. Rodney Smith (ret.) named v.p. of IT&T subsidiary International Standard Electric Corp. in charge of communications network installation for SHAPE . . . Bernard R. McCarthy promoted to sales engineer, Sylvania semiconductor div., covering Pa., Del., Md., D. C., Va., N. C., S. C., Ga., Fla. . . Donald R. Burrus named marketing research mgr. of Texas Instruments, Dallas.

New Bizmac office to serve govt. agencies has been set up by RCA at 1625 K St., Washington, with Robert Bruce, ex-Underwood & IBM, as mgr.

Reduced demand for engineers, as evidenced at San Francisco's Western Electronic Show, is reported in Aug. 30 *Wall St. Journal* which points out, however, that "top engineers" are still hard to find. Story quotes Litton v.p. Norman Moore: "We are using a rifle now instead of the old shotgun." In contrast to last year's show that saw recruiters snapping up almost every job-seeking engineer no matter what his qualifications, this year's recruiting effort was "over half off," estimated convention secy. H. Myrl Stearns, pres. of Varian Assoc. One reason given by aircraft spokesman was recent lay-offs in southern Cal. plants connected with defense work.

Revised Air Force "Handbook of Piezoelectric Crystals for Radio Equipment Designers" by J. P. Buchanan, Philco Corp., for Wright Air Development Center (PB 111586R, 702 pp., \$7) is available from U. S. Dept. of Commerce Office of Technical Services.

Directories of military electronics procurement personnel and firms engaged in guided missile projects are compiled in Sept. *Electronic Industries & Tele-Tech.*

SETMAKERS' OPTIMISM CONTINUES STEADFAST: With two-thirds of year gone, biggest selling season yet to come, our sounding of setmakers' sentiments reveals nary a crack in industry-wide feeling that Sept.-Dec. will see strong market.

"Really excellent" is the description of business given by Admiral pres. Ross D. Siragusa, just returned from 12,000-mi. trip around U.S.

Reaction he got in talking to dealers and distributors was "quite good, quite encouraging," he said, adding that they "showed more interest in higher priced merchandise than in 7-8 years." And besides, he went on, "they're soft-pedaling lower-end merchandise and cheaper portables." Another good sign, he declared, is the "old merchandise is pretty well washed away."

Similar sentiments were voiced by Robert A. Seidel, RCA exec. v.p., consumer products, who told us "business is generally good, all of our people are quite optimistic toward fall." He placed heavy emphasis on big color push in fall, saying "rest of RCA's business is booming, including radios, records and black-&-white TV."

Seidel detailed "big RCA stepup in sales in July" and described Aug. sales as "running about neck and neck with last Aug. which was a very good month." It will be close, he feels, but he thinks Aug. will top last Aug. And he parlayed this into sure increase in Sept., describing last Sept. as no standout month.

"A good year for RCA and for the industry" is the way Seidel sized it up, saying predictions of 7,000,000 sales this year probably would come true. He put it this way: "There's more money out there than ever before and I haven't heard a single bad reaction to the new sets. There's no reason TV shouldn't get its share of the money unless we don't sell our product as well as others sell theirs." Only possible sour note he could think of was tightening of credit -- and he didn't think that would have any marked effect on this year's sales.

Color TV is going well, he reported, listing ratio as 3-1 over last year -- and he added he had checked this figure out with RCA Service Co., both on installations and consumer purchases.

* * * *

Motorola also came in with testimony to support summer sales surge and fall follow-up. Edward R. Taylor, exec. v.p., consumer products, told us some May specials they produced "went in and out of the pipeline so fast you couldn't even see them." He still thinks this year's retail sales will hit about 7,000,000 with "last 4 months of year considerably higher than in 1956."

Taylor gave these reasons for greater TV sales in fall: Increased political activity increasing viewer interest; networks producing better shows to counter threat of pay TV; national economy moving upward again. He stated that people can only save money so long, "then it burns a hole in their pockets."

* * * *

"Best TV summer we've ever had" is way John M. Otter, Philco exec. v.p. for marketing, put it, saying June was record sales month and same is probably true for July. He declared Philco had not experienced typical summer slowdown -- and said general pace of business had been "phenomenal."

"We're looking forward to excellent third and fourth quarters," he told us and illustrated his point by saying "we won't be able to make all of the Slender Seventeeners we have orders for by the end of the year."

Robert L. Shaw, Sylvania gen. sales mgr., TV-radio div., said "this is the earliest start of the sales season that I've ever seen." Sylvania sales are about double what they were last year at this time, he declared, and the "surprising thing is the number of dealer re-orders that are coming in already."

Consumer Income: Improvement in John Q. Public's income position was reported this week by U.S. Dept. of Commerce and Federal Reserve Board -- in cooperation with U of Mich. Survey Research Center. Personal income in July was at annual rate of \$345.5 billion, almost \$1 billion higher than previous month and \$20 billion more than July 1956, Dept. of Commerce reports in Survey of Current Business. Business activity showed little change since midyear, Commerce says, with pattern of year's first half extending through July, showing "sustained high levels of employment and volume of total output," with "continuing gradual rises in prices and incomes."

"Consumer incomes have risen to new highs in recent years both in dollar amounts and in purchasing power," says Federal Reserve-U of Mich. survey. It reports "holdings of liquid assets and marketable securities have also risen" as have debts of consumers which "reached new highs, largely in connection with purchases of houses, automobiles, and household durable goods." Survey, based on 3041 interviews, discloses mean reported income -- that is total consumer income divided by number of spending units -- rose from \$4650 in 1955 to \$5140 in 1956.

Production: Reflecting setmakers' optimism, order volume, stepped-up business (see p. 9), TV output climbed to new high for year for third straight week with total of 205,881 for week ended Aug. 23 -- highest total since week ended last Oct. 5 when 215,480 were turned out. New 1957 high compared with 179,615 preceding week and 169,462 in corresponding week one year ago. It was year's 34th week and brought TV production for year to date to about 3,755,000, compared with 4,365,060 in same period of 1956. Radio production totaled 292,626 (79,962 auto) for week ended Aug. 23, vs. 294,091 (96,206) preceding week and 278,871 (71,716) in corresponding week year ago. Radio output for 34 weeks totaled about 8,760,000 (3,390,000) vs. 8,216,707 (2,710,303) in 1956 period.

Topics & Trends of TV Trade: Booming business of trade shows is pinpointed by EIA survey, based on returns from 132 member companies, which shows average electronic firm received 20 invitations to exhibit products in 1956, compared with 14 such offers in 1955. Report says average company took part in only 5 trade shows in 1956, same number as in previous year.

Survey was authorized by previous board action (Vol. 13:14) of EIA. Next step will be for EIA Trade Show Committee to discuss report, already sent to members, during Sept. 10-12 quarterly meeting in Los Angeles and decide what action should be taken, if any.

Cost of each exhibit for average company was \$1916 in 1956, report shows, while in 1955 average company expense for each trade show was \$1712. Other findings: 70% rated trade shows of limited value; 27% of very great value; 3% of no value. Number of shows recommended: two, 29%; one, 25%; three, 24%.

Following is grouping of comments (some supplying several comments): National shows becoming too large, 44%; increasingly difficult to demonstrate products effectively, 28%; cost of shows exceeding benefit received, 24%; attempt to attend all shows where there is an opportunity to explain products to reasonable number of customers, 18%; strong supporter of trade shows, would like to see at least 50 per year, 1%.

High regard for GE is evinced in *Scholastic Magazine* survey of 5855 teen agers who were asked: "If you were asked to select the nationally known company whose name and products or services you most respect, which one would you select?" Results: GE by 26.4% boys, 25.5% girls; General Motors 17.2% & 8.6%; Du Pont and U. S. Steel about 7% each. Also named: Westinghouse, Standard Oil, Ford, Bell System.

Rocky road for discounters is outlined in Sept. 2 *Time*, which reports dozens of small operators have fallen by the wayside, with part of blame placed on general slump in appliance market with overall sales down about 10%. Other discounter problems cited: Price cutting by conventional retailers; warehouse sales; change in customer attitude with demands for liberal credit, free delivery, repairs, returns, etc. Story says big discounters have cash reserves needed for growth, smaller ones do not. Whirlpool pres. Elisha Gray analyzes appliance situation thus in recent report to stockholders: "Many manufacturers have been extremely sensitive to competitive price reductions, with price cutting and lower profit margins. Consumer response to 'bargains,' in most markets, has been sluggish. The public reaction to price appeal alone as the major sales feature of a major appliance appears to be negative. There seems to be a trend in the industry, presently, to acknowledge increased costs realistically. This is a healthy sign. This is indicated in the introduction of new appliances with announced price increases ranging up to 5%. While admittedly price levels are always tentative, and dependent finally upon consumer acceptance, we are hopeful that we have passed the trough of what has been termed a creeping demoralization of the major appliance market."

RCA and Four Roses Distillers Co. are joining forces for Sept.-Oct. color TV promotion showing Four Roses flowered emblem on screen of RCA Victor color receiver on lithographs to be displayed in 5000 liquor stores. Promotion kits, featuring reprints of full-page color ads in Sept. 16 *Life* and Oct. 1 *Look*, will go to 10,000 taverns. Window displays will include cards urging public to see color TV at RCA dealers.

Recurring rumor that GM Delco div. is planning to enter TV manufacturing field categorically denied this week by Delco spokesman.

Trade Personals: Eric M. Farr promoted to manufacturing services mgr., Westinghouse TV-radio div. . . . Neal T. Johnson promoted to adv. supervisor, Sylvania TV-radio div. . . . H. N. Muller, Canadian Westinghouse chief engineer, elected v.p. . . . W. R. McAllister promoted to Capehart national sales mgr.; Leon Knize appointed special products mgr. . . . C. Charles Hathorn promoted to public relations mgr. of Avco's Crosley div., replacing Robert Bartow, resigned . . . Charles W. Breunig promoted to administrator, labor relations, RCA electron tube div.; H. F. Randolph continues as mgr., receiving tube operations, entertainment tube products; H. R. Seelen named mgr., kinescope operations; M. J. Carroll, mgr., marketing.

Regional chairmen, acting as liaison with NARDA headquarters, have been chosen for 12 Federal Reserve districts: (1) Frank Murphy, Murphy Electric Co., Bristol, Conn.; (2) Morris Levy, Levy Bros. Furniture Co., Niagara Falls; (3) Robert L. Painter, Chester, Pa.; (4) Wm. P. Hoermle, Columbus, O.; (5) A. H. Warne, Bohman-Warne Inc., Hagerstown, Md.; (6) Richard A. Palmer, Palmer Tire Co., Macon, Ga.; (7) Earl T. Holst, Des Moines, Ia.; (8) Ed Kuehn, Kuehns Inc., Belleville, Ill.; (9) Hardy Rickbeil, Worthington, Minn.; (10) A. Murillo, Hill Electric Co., Wichita, Kans.; (11) V. Bourland, Ft. Worth; (12) Carl Hagstrom, General Appliance Co., San Francisco.

Mutual agreement has ended \$900,000 treble damage anti-trust suit by Central TV Inc., Chicago, against Admiral Corp., Appliance Distributors Inc. and The Reuben Donnelly Corp. Federal Judge Walter La Buy dismissed 1953 suit without prejudice or costs. Suit had charged Admiral and Appliance Distributors with attempting to monopolize installation, service, repair, etc. of parts for Admiral TV sets. They also were charged with having conspired with Donnelly to keep independent contractors from being listed in Chicago classified directories as servicing Admiral sets.

First quarterly meeting of EIA under its new name will be held Sept. 10-12 at Los Angeles' Ambassador Hotel. Speaker at Sept. 11 luncheon will be Gen. Edwin W. Rawlings, commander of Air Materiel Command, Wright-Patterson AFB. Closed committee sessions are to take up FCC allocation hearings, Walsh-Healey Act effect on part of industry, growth of electronics in national defense, Hagerstown educational TV program.

Analyzing trend in boards of directors toward selection of more members outside firm, Sept. 2 *Time* includes this comment from Philco pres. James M. Skinner Jr.: "Any further changes in board membership will be toward outsiders. We don't want the kind of board where the officers are auditing their own work, sitting around admiring what they've done as officers."

Fair Trade knell sounded this week in South Carolina as State Supreme Court ruled S. C. Fair Trade Act unconstitutional in appeal by GE from lower court finding. High court opinion singled out Act's application to non-signers, saying this "constitutes a deprivation of property without due process of law" in violation of S. C. constitution.

"Television Comeback" is a major article in Aug. 26 *Barron's* which says "the battered setmakers profess to see signs of hope." While still "keeping their fingers crossed," story says, they "are becoming more and more confident that the recent upsurge in buying is more than a seasonal flurry."

Printer's error resulted in mixup in figures for 3 months in EIA Monthly Reports of TV-Radio set sales and inventories on pp. 434-435 of *TV Factbook No. 25*. Correct figures are: July 1955 Factory Sales, 449,782; Factory Inventories End of Month, 813,804; Distributor Purchases, 443,840; Distributor Inventories End of Month, 724,047; Shipments to Dealers, 465,160; Retail Sales, 381,567. For Sept. 1956: Factory Sales, 1,020,930; Factory Inventories at End of Month, 438,221; Distributor Purchases, 1,001,591; Distributor Inventories End of Month, 1,311,495; Shipments to Dealers, 829,126; Retail Sales, 763,908. For Nov. 1956: Factory Sales, 630,682; Factory Inventories at End of Month, 446,859; Distributor Purchases, 618,856; Distributor Inventories at End of Month, 1,314,894; Shipments to Dealers, 617,516; Retail Sales, 560,391. Also, for Factory Sales in Dec. 1955, 584,964; Retail Sales for Oct. 1955, 746,274 & Dec. 1955, 933,467; July 1956, 405,310.

Switch to color TV to avert layoffs in Canadian TV manufacturing industry is asked by United Electrical Radio & Machine Workers of America Union in telegram to George Nowlan, Canada's Minister of Revenue. Urging start of CBC color programming, group told Nowlan TV set production is scheduled to halt in Oct. at Toronto plants of Canadian GE which told union it "anticipates 11 of 22 set manufacturers will close down."

Westinghouse new major appliance models, featuring "fit in to look built in" appearance, were introduced this week, to be backed up with 30-day "blitz" advertising campaign through Oct. 22. Plans call for TV network (*Studio One*), newspapers, *This Week*, *Parade*, *Family Weekly*, *Saturday Evening Post*, *Life*, 2800 billboards. Westinghouse will not set national list prices, leaving job to distributors.

Anti-trust suit against GE Supply Co. has been filed by ex-Hotpoint dealer N. L. Stuver, Johnstown, Pa. charging GE discriminated against him in favor of his competitors, forcing him out of business with damages estimated at more than \$100,000. Suit alleges GE aided his competitors in demonstrating appliances to employ groups and allowing 25% discounts.

Olympic fall advertising plans, up about 20% over last year, call for full-page ads in *Home Furnishings Daily*, *Mart*, *Electrical Merchandising*, *Radio & TV Weekly*, 4-color page in Sept. 22 *N. Y. Times Magazine*, ½-page black-&-whites in *Life*, *Saturday Evening Post*, *Look*, *House Beautiful*, *Ebony*.

Sale of "Color V" screens has been discontinued, reports Harry G. Kriegel, in answering FTC complaint that plastic adapters had been misrepresented by Superior Products, N. Y. (Vol. 13:16) as capable of producing color TV or eliminating glare. Kriegel denied he owned company, said it had gone out of business "on or about June 1, 1956."

NARDA regional meetings open Sept. 13 at Wichita, followed by Sept. 18, Rockford, Ill.; Sept. 25, Salt Lake City; Sept. 27, Seattle; Sept. 29, Bakersfield, Cal.; Oct. 6, Macon—last including semi-annual executive committee session.

Philco is adding cherry finish cabinets to two 21-in. consoles in new line at \$270 & \$290. Other additions: walnut 24-in. "Miss America" console, \$475; blonde 21-in. console on casters, \$350; 21-in. console, \$258; 21-in. table model, \$200.

Extra copy price of NARDA's "Costs-of-Doing Business Survey" (Vol. 13:34) has been reduced to 35¢ each for those ordering 50-99 reprints. Other prices remain: \$1 for 1-49; 25¢ for 100 or more.

Network Television Billings

July 1957 and January-July 1957

(For June report see *Television Digest*, Vol. 13:31)

STEADY ADVANCE in TV network billings was recorded in first 7 months this year, rate of gain over 1956 running at 6.3%—\$289,478,303 vs. \$272,257,826—according to Publishers Information Bureau. CBS paced increase in period with 8.3% jump from \$124,981,144 to \$135,299,556. In July, ABC led in percentage gain, lifting its billings 14.8% to \$6,348,496 from \$5,532,030 in July 1956. NBC was up 1.5% for month (\$13,935,529 vs. \$13,733,765), CBS .3% (\$18,537,069 vs. \$18,481,719). The complete PIB report for July:

NETWORK TELEVISION						
	July	July	%	Jan.-July	Jan.-July	%
	1957	1956	Change	1957	1956	Change
CBS	\$18,537,069	\$18,481,719	+ 0.3	\$135,299,556	\$124,981,144	+8.3
NBC	13,935,529	13,733,765	+ 1.5	107,735,033	103,263,497	+4.3
ABC	6,348,496	5,532,030	+14.8	46,443,714	44,013,185	+5.5
Total	\$38,821,094	\$37,747,514	+ 2.8	\$289,478,303	\$272,257,826	+6.3

1957 NETWORK TELEVISION BY MONTHS

	ABC	CBS	NBC	Total
Jan.	\$ 6,715,581	\$ 20,231,474	\$ 16,554,941	\$ 43,501,996
Feb.	6,175,488	18,309,088	14,900,631	39,385,207
March	6,848,848	20,172,173	16,631,974	43,652,995
April	6,682,786	19,385,098	15,154,388	41,222,272
May	7,258,807	20,307,762	15,811,033	43,377,602
June	6,413,708	18,356,892	14,746,537	39,517,137
July	6,348,496	18,537,069	13,935,529	38,821,094
Total	\$46,443,714	\$135,299,556	\$107,735,033	\$289,478,303

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 25%. However, they're generally accepted in the trade as an index.

TV commercials for Enden Shampoo should be "interpreted as a whole," Helene Curtis Industries Inc. told FTC Aug. 29, denying charges instituted by agency's TV-radio monitoring unit (Vol. 13:31) that claims for dandruff treatment were false. Helene Curtis said that typical commercial cited in complaint doesn't "fairly represent the effect of the sequence upon the viewer"; that advertising "is reasonably understood to mean" that use of Enden "will inhibit the growth of bacteria commonly found where dandruff problems exist"—not that it is dandruff cure. FTC had objected to such claims as that Enden is "new proven way to end your dandruff problems once & for all." Curtis asked dismissal of complaint.

Celebrating 84th birthday Aug. 26, inventor Lee DeForest told reporters: "Now I'm shooting for 94." The alert and forward-looking inventor of the 3-element vacuum—and holder of some 300 patents—is still inventing, his main current project aimed at producing electricity from gas flame. He's taking things only slightly easier, because of mild heart trouble brought on, he believes, by heat and too much playing of shuffleboard during recent cruise to Panama.

TV is no place for liquor ads, adv. & sales promotion v.p. Alynn Shilling of National Distillers Products Co. told sales conference last week. "It is horrifying," he said, "to picture what commercials might be like if liquor advertising appeared on TV or radio." He deplored "flamboyant claims made by non-liquor advertisers," urged more "good sense, good taste, honesty & believability in ad copy."

Campaigning for lifting of excise tax on combination vhf-uhf sets, Committee for Competitive TV met at studios of WSEE, Erie, planned additional regional meetings, authorized "missionary" tour by exec. director Wm. M. Bradley.

Preliminary TV bout for closed-circuit rights in Sept. 23 middleweight fight at Yankee Stadium (Vol. 13:34) was won this week—at least on points—by champion Sugar Ray Robinson & Teleprompter Corp. Robinson, who had threatened to call off fight unless Teleprompter was substituted by International Boxing Club for TNT in TV contract, took \$255,000 guarantee from TNT, whose exclusive agreement had called only for percentage payment. Teleprompter, which had offered champion cash guarantee, won concession to book theatres in Amarillo, Orlando, Duluth, Medford, Ore. Carmen Basilio, Robinson's opponent who took no part in TV hassle, also won. He will get \$110,000 from theatre showings. TNT will handle production at Stadium, carry fight to 165 theatres in 122 cities. IBC agreed to all terms after week which saw "more caucuses than at a political convention," according to AP. *N. Y. Times* observed that "huge collection of lawyers" representing principals would themselves make up sizable gate for fight.

Quoteworthy quote: "Can you get selectivity into a mass medium? Certain people have been admired by the masses and have been on a very high level, such as Shakespeare, for instance. It speaks well for the masses of his day. But is it possible to produce enough to keep the level up on TV? I think that's an insoluble problem. I don't anticipate that it will get better or worse. You can't change the factors. The minute you have to fill 16 hours a day the demand on writers is such that it puts them on the verge of an asylum. This is very serious. TV is a kind of Moloch with human sacrifices being poured into the belly of this brazen god."—Aldous Huxley, interviewed by Richard F. Shepard in Aug. 25 *N. Y. Times*.

Advertising agency men who see themselves engaged in "glamorous game" are likely to "find themselves gradually changing from the romantic fellows of the Madison Ave. legend into sober-minded businessmen of a more conventional mold," ex-McCann-Erickson v.p. John McCarthy warns in Sept. *Harper's*. "Is the Bloom Off Madison Avenue?" he asks in article. He thinks it is, pointing to such "far-reaching changes" as (1) comparison shopping by big advertisers, (2) "increasing influence of outside consultants," (3) "increasing pressure against the long-established 15% commission system."

Bamboo curtain on Red China coverage by U. S. newsmen, lifted last week by State Dept. in policy switch (Vol. 13:34), was lowered again this week by Communists themselves. Radio Peking said U. S. plan to permit 24 reporters (including network representatives) to go there "is completely unacceptable," that they'd act as "spies," that in any event equal number of Chinese correspondents should be accepted here. State Dept. rejected reciprocal demand, leaving American newsmen all packed up and still no place to go in China.

Three applications for TV stations were filed with FCC this week, bringing total to 122 (35 uhf). Week's applications were: (1) For Miami, Fla., Ch. 6 by Publix Television Corp.; (2) for St. Petersburg, Fla., Ch. 10 by Suncoast Cities Bestg. Corp.; (3) for Terre Haute, Ind., Ch. 2 by group including Truth Publishing Co. (10.71%), licensee of WSJV, Elkhart, Ind. Ch. 52 and 60% owner of WKJG-TV, Ft. Wayne Ch. 33. No translator applications were filed this week. [For details, see *TV Addenda 25-E* herewith.]

Payment of license fees to Govt. by stations, repeatedly suggested by various congressmen but rejected by Congress, came up again this week in form of bill introduced by Rep. Vanik (D-O.).

SUMMARY-INDEX OF THE WEEK'S NEWS — September 7, 1957

BARTLESVILLE TELEMOTIVE test-tube wired pay-TV system begins, under scrutiny of telecasters, theatre-men, Govt. & press for portents of future (p. 1).

RCA-NBC COLOR CAMPAIGN built around strengthened receiver line, increased network programming, hiked national promotion (p. 3).

NEW ORLEANS finally gets second commercial vhf, WWL-TV beginning programming; uhf WJMR-TV begins equipment tests for Ch. 12 experiment (p. 5).

2 VHF CHANNELS added to Albany area, one proposed for Providence, heat generated by Erie deintermixture proposal, as FCC reconvenes (p. 6).

MOON CAN BE USED AS RELAY station for microwave signals, Naval Research Lab scientists report after 6-year radar experiments. Voice signal used (p. 8).

HIGH COST OF FOREIGN TV SETS, in terms of buyers' income, big factor in slow TV growth. Set prices & income compared for major TV countries (p. 9).

METAL-CABINET PORTABLES discontinued by Magnavox as result of electrocution scare. Other set makers satisfied with metal, plan no change (p. 9).

NATIONAL TV WEEK off to flying start; sponsoring spokesmen predict more successful campaign than last year, see better planning & organization (p. 10).

ELECTRON TUBE spokesmen object to proposed definition of industry in Walsh-Healey hearing, suggest exclusion of tube parts, semiconductors (p. 11).

TELEVISION-ELECTRONICS FUND net assets increase to \$156,743,659, with 12,557,000 shares outstanding. Changes in investment portfolio are listed (p. 13).

SUBSCRIPTION TV—AFTER BARTLESVILLE, WHAT? The watchword in movie and TV industries this week was "Watch Bartlesville"—as world's first pay-TV home-movies system began operation in that oil-rich Oklahoma city of 25,000.

From standpoint of movie producers and exhibitors, riding on Bartlesville trial is hope of a new day for the depression-ridden industry—fighting broadcast TV for the first time on TV's home grounds.

Conversely, telecasters are watching experiment nervously, as foreshadowing first serious threat to on-air home entertainment—by a closed-circuit system, free from FCC regulation.

FCC, ready to grapple again with issue of broadcast pay-TV tests at Sept. 17 meeting, thus far has taken no official notice of Bartlesville or any other wired fee-TV plans. Nevertheless, there's possibility that Commission will send observers to Bartlesville after the 17th.

Congress may have onlookers at the scene, too—probably including Senate Commerce Committee's communications counsel Nick Zapple. Among Senators and Congressmen who have spoken on issue recently, sentiment has been unanimously against toll TV in any form.

Latest to blast fee TV was Sen. Curtis (R-Neb.), who endorsed recent anti-subscription speech by Sen. Potter (Vol. 13:34-35)—and went further, to urge hearings to determine whether wired systems should be regulated and whether broadcasters should be permitted to enter field.

Bartlesville itself had a county-fair atmosphere this week—with so many newspaper and magazine reporters present that it was hard for them to keep from interviewing each other. Among those represented: wire services, Time and Look magazines, New York Times, Wall St. Journal, Movietone News. Representatives of large theatre circuits were there or planning to have a look-see—as were at least a few telecasters.

Press coverage was heavy—and gist of news accounts was that most residents liked idea of movies-in-the-home, though service in Sept. is being given free and they won't feel the \$9.50-a-month bite until end of Oct. Fee gives them privilege of seeing 13 first-run and 17 second-run films on 2 channels, continuous performances, 1 p.m. to midnight (first-run premiere, "Pajama Game").

Technically, picture quality was excellent, everyone agreed—largely due to fact that new 35mm prints were fed into new GPL film cameras. Project's operators assured public that even Cinemascope prints pose no problem, thanks to GPL electronic cropper-compressor which fits wide-screen pictures into home-screen dimensions with little loss of subject matter and no noticeable distortion.

Behind Bartlesville's Telemovie project is Video Independent Theatres chain, owner of some 150 southwest theatres, including the 2 conventional & 2 drive-in houses in Bartlesville. Live-wire VIT also operates 6 community antenna systems, is constructing more, and is 12½% owner of Oklahoma City's KWTV and grantee of upcoming KVIS, Santa Fe, N. M.

VIT declined to announce initial number of homes receiving premiere program—but it was believed to be somewhat over 200, with 6 crews working to hook up more homes at reported rate of 50 a day. VIT pres. Henry J. Griffing estimates break-even point should come with about 2000 subscribers, hopes to have project on paying basis in year.

Bartlesville experiment highlights split among wired-TV proponents over method of payment for home entertainment—per-program or flat fee. System was designed and engineered by community antenna builder Jerrold Electronics, principal flat-fee exponent.

Almost the sole complaint registered by Bartlesville residents as Telemovies made debut concerned the \$9.50-a-month bill (no installation fee), which some thought too stiff. That VIT and Jerrold could meet these objections by retreating from fixed-fee position is indicated by Griffing's statement this week that if public prefers it, he will install "metering system" that registers which programs are being viewed in each home so subscribers may be billed only for movies they watch.

Jerrold pres. Milton J. Shapp confirmed that his company is working on device which would register viewer connections in much the same way as telephone company keeps track of long-distance calls.

Griffing continues to oppose coin-box approach, however, pointing out that pay telephones disappeared from homes 20 years ago, that public forced hotels and hospitals to abandon coin-box TV sets. He's convinced subscribers want to be billed monthly for their entertainment, as they are for telephone and other utility services.

Bartlesville receives good signal from Tulsa's 3 TV stations—with programs of all networks—and Telemovie subscribers will still be able to get broadcast programs in competition with 2 movie channels (and one proposed sound channel).

The telecasters closest to first commercial toll-TV project—those in Tulsa & Oklahoma City—generally viewed experiment with alarm. Sample quotes:

James C. Richdale Jr., v.p.-gen. mgr., KOTV, Tulsa: "This is a serious matter not to be taken lightly by broadcasters." He added that a fee-TV system might run as many as 5 channels with entertainment, information and even advertising—but he expressed doubt that Bartlesville could be considered "typical" community, since its per capita income is among highest in U. S.

Kieth Mathers, operations mgr., WKY-TV, Oklahoma City, called wired TV "serious threat to the TV industry as a whole." He said: "We're quite concerned and intend to follow it very closely. There's no indication yet whether people will pay to see programs. In the end it boils down to who presents the best programs. We intend to fight with the best."

In contrast, exec. v.p.-gen. mgr. C. B. Akers of Tulsa's KVOO-TV—who also is an official of VIT—told us "only time will tell" whether project will succeed and what effect it will have on telecasting. But he ventured that its principal effect may be to "make more 2-set homes." He said this already was

happening in Bartlesville. Also, "there's a tremendous rural audience which can never be reached by cables," he added. "And even in the city—is it any worse than a fourth station?"

■ ■ ■
Movie exhibitor chains have eyes glued on tests. AB-PT's Interstate Circuit, with headquarters in Dallas, exemplifies their watchfulness. It has applications for cable theatre franchises pending in most of the 21 southwest cities where it has theatres.

"You can describe us as poised," Interstate's John Adams told us. "We already have made a careful study and collected information. But we'll watch Bartlesville for a while, then decide whether to go into it and where."

At least one TV set manufacturer is watching tests closely—Motorola, which recently did some decoder development work for Skiatron, now has group of observers in Bartlesville. It also supplied receivers to VIT for monitoring purposes, and is providing TV set to be awarded as prize in "First TV Family" promotion there.

■ ■ ■
Though Bartlesville stole the spotlight, there was renewed excitement on big-city wired-TV front this week as New York Giants announced they had signed pay-TV contract with Skiatron for 1958 when team moves to San Francisco. Deal provides for \$2,000,000 in payments to team, giving Skiatron exclusive TV rights.

Its curiosity aroused by fantastic franchise-jockeying by pay-TV advocates, Calif. state legislature has decided to have look-see at whole situation, scheduling Sept. 10 hearing on "the business franchise racket"—announcing it will give particular scrutiny to closed-circuit TV. Pay-TV people have been invited to testify at hearing to be conducted by state assembly public utilities & corporations committee's subcommittee on corporation law.

RCA-NBC COLOR DRIVE STRONGER THAN EVER: Much improved color sets, heavy network color schedule, powerful promotional drive—these are the characteristics of RCA-NBC's 1957-58 color campaign. Re-emphasizing company's conviction that color can and will be put across, RCA-NBC this week demonstrated in detail its plans to add heavily to the estimated \$100,000,000 it has spent on color.

Plans were unfolded via 2-hour Sept. 4 closed-circuit colorcast, largest ever—first hour reaching some 15,000 dealers in 91 cities, second hour fed to 150 cities for affiliates and newsmen.

Show was very carefully prepared, elaborate, costly. In dealer portion, stress was laid on profits to be made in color sets and unlikelihood of any price break via technological developments. As RCA pres. John L. Burns put it:

"Color is ready, color is right, color is here. While we have all read of alleged startling developments in the color field by others, none of these dreams have been forthcoming or offered commercially."

Five new color models were introduced, priced \$550-\$795—\$50-\$100 more than current models—and it was emphasized that these are additions to line, not replacements (for details of sets, see p. 11).

Among facts & figures brought out during program: 200,000 color sets have been installed; 65% of sets have been sold by 25% of dealers; 70% of TV set shoppers ask to see color; 75% of public hasn't seen color yet. A second-year warranty was announced—\$35 for tube without labor, \$40 for tube installed, \$60 for all tubes & parts, without labor.

RCA officials participating in presentation, in addition to Burns: Robert A. Seidel, consumer products exec. v.p.; Martin Bennett, merchandising v.p.; Allan B. Mills, RCA Victor merchandising mgr.; Joseph P. Bannon, RCA Victor gen. sales mgr.; D. H. Kunsman, RCA Service Co. v.p. & operations mgr.; Jack Williams, RCA Victor adv. & sales promotion mgr.

■ ■ ■
NBC-TV portion of show was lively, peppered with hilarious intra-industry jokes, emphasized program schedule generally in addition to heavy color schedule. Color will run more than 2 hours daily, up to 3-4 frequently. In addition to big, blockbuster "specials," regular programs in color

include shows of: Steve Allen, Eddie Fisher, George Gobel, Dinah Shore, Rosemary Clooney, Perry Como, Hit Parade. Daily daytime color shows are Matinee Theatre and Club 60. There will also be World Series—at least games played in American League park, plus 4 football games—including Army-Navy.

NBC pres. Robert W. Sarnoff and exec. v.p. Robert E. Kintner emphasized the new programs in schedule, Sarnoff stating: "We've never gone into a season with such a restyled program wardrobe," stressing broad range of program appeal.

Personal Notes: Simon B. Siegel, AB-PT treas. since 1953, elected financial v.p. . . . Louis A. Novins, v.p. & secy. of Paramount Pictures, elected pres. of subsidiary International Telemeter . . . John Pearson, ex-Katz Agency, joins ABN in new post of station program executive to help affiliates with local programming . . . Frank Atlas promoted to program director of WBBM-TV, Chicago, succeeding Bill Ryan, Scott Young to asst. program director . . . Theodore Berrier, asst. v.p. of AT&T in Washington office (Govt. liaison), retires after 43 years with Bell System . . . Lawrence Eisenberg, ex-WABD, N. Y., named public relations director of WABC-TV & WABC . . . Marvin Schlaffer named asst. gen. mgr. of NTA's Famous Films—Programs for TV . . . Bill Fox promoted to station mgr. of KFMB-TV, San Diego . . . Roy W. Pratt promoted to chief engineer of WHO-TV, Des Moines, succeeding late Reed E. Snyder . . . Roger Van Duzer, gen. mgr. of KTVK, Phoenix, joins KNTV, San Jose, Cal. Sept. 15 as station mgr., reporting to gen. mgr. Fran Conrad . . . H. W. (Dutch) Cassill, ex-KTRI, Sioux City, and KQUE, Albuquerque, joins Blackburn & Co., Chicago . . . George W. Steffy promoted to exec. v.p. of Yankee Network . . . Donald Beggs, ex-radio WFLN, Philadelphia, and Brooklyn Academy of Music, joins Westinghouse as program coordinator of its FM stations.

Obituary

Herbert Pulitzer, 61, third & last surviving son of late publisher Joseph Pulitzer, died of uremic poisoning Sept. 4 in Paris, where he had been on vacation. He was pres. of *N. Y. World* and *Evening World* when they were sold in 1931 to Scripps-Howard, but since then had not been active in management of Pulitzer properties, which include *St. Louis Post-Dispatch* and KSD-TV & KSD. His death will result in dissolution of family Newspaper Trust, set up in father's will to control stock of Pulitzer Publishing Co., which owns newspaper & stations. Control will go to Voting Trust headed by nephew Joseph Pulitzer, *Post-Dispatch* editor. Surviving are son, daughter, step-daughter, sister.

Robert W. Orr, 60, founder & pres. of Robert W. Orr Assoc. Inc., which became separate div. of Fuller & Smith & Ross Inc. last year, died Sept. 4 at home in Southampton, N. Y. Surviving are his widow, 2 daughters.

FCC engineering changes: Otis T. Hanson, ex-rules & standards div., named asst. supervisor of Conelrad; McIvor L. Parker, ex-technical & allocations branch, joins rules & standards div.

ADVERTISING AGENCIES: Lawrence R. McIntosh, exec. v.p. of Grant Adv., Detroit, appointed supervisor of all domestic operations in staff realignment; John E. Gaunt named v.p. in charge of all TV, headquartering in Hollywood; Frederick E. Spence promoted to exec. v.p. in charge of international div.; Paul L. Bradley, west coast v.p., transferred to N. Y. as office mgr.; Christopher Cross given added v.p. responsibilities as asst. to pres. Will C. Grant . . . Ken Jones, ex-Leo Burnett, appointed TV-radio creative director of Campbell-Ewald . . . Hal H. Thurber, ex-Ewell & Thurber, elected exec. v.p. and a director of Wade Adv., Chicago . . . Laurence J. Jaffe, ex-Erwin, Wasey, joins Kastor, Farrell, Chesley & Clifford as senior v.p. and marketing & research director . . . Robert R. Burton, ex-Needham, Louis & Brorby, named Chicago mgr. of Kenyon & Eckhardt . . . Edward Ratner promoted to v.p. of Friend-Reiss Adv. in charge of TV-radio, Bud Muhleman to v.p. for account servicing.

Formal merger of Ruthrauff & Ryan and Erwin, Wasey & Co. (Vol. 13:33) into Erwin Wasey, Ruthrauff & Ryan Inc. with combined billings of \$80,000,000 was announced this week. David B. Williams, who was pres. of Erwin, Wasey, is pres. of new firm.

Deal for sale of KWK-TV, St. Louis (Ch. 4) to CBS, latter turning its Ch. 11 CP over to 3 applicants it had defeated in hearing (Vol. 13:34), appears to have good chance of completion. CBS would pay about \$2,500,000 for station, plus \$1,500,000 for building owned by *Globe-Democrat*, which is 23% owner of KWK-TV. Ch. 11 applicants would dismiss court appeal contesting award to CBS; Ch. 11 grant would be turned over to 220 Television Inc. which would give debentures of \$200,000 each to St. Louis Telecast and Broadcast House. Latter 2 would be in positions of lenders, wouldn't hold interest in station.

Reports that Cox & Knight factions, owning 42½% each in WCKT, Miami (Ch. 7), aren't "hitting it off" and that Cox is therefore interested in buying out Knight, are denied by the principals. Cox spokesman says: "We're always interested in bettering our position and that could include an interest in expanding our holdings in Miami—but there have been no discussions between James Cox and John Knight." Ex-NBC pres. Niles Trammell holds remaining 15%, is pres. & gen. mgr.

CP for KTRB-TV Modesto (Ch. 14) passes to J. E. O'Neill's KJEO, Fresno (Ch. 47), FCC having approved sale by radio KTRB (Wm. H. Bates Jr.) for \$5000 out-of-pocket expenses (Vol. 13:23). Modesto outlet will be satellite.

C. Sterling 3-1755. Subscription rates: Weekly Television Digest Only, \$75 per year; Full TV Subscription, \$100 per year; Full TV plus AM-FM Subscription, \$150 per year. Application for second class mail privileges pending at Post Office, Washington, D. C. COPYRIGHT 1957 BY RADIO NEWS BUREAU

New and Upcoming Stations: One of last big cities to get its second commercial vhf station, New Orleans now has WWL-TV (Ch. 4) in addition to pre-freeze WDSU-TV (Ch. 6) and uhf WJMR-TV (Ch. 20). In addition, city has educational WYES (Ch. 8)—and WJMR-TV is now on equipment tests with experimental Ch. 12, plans to duplicate uhf schedule.

WWL-TV has 25-kw RCA transmitter, 6-kw standby unit and 6-section superturnstile antenna on 750-ft. Ideco tower near Gretna, La. across Mississippi River from New Orleans. Studios are at 1023 N. Rampart St. Owner is Loyola U (Rev. Patrick Donnelly, S.J., pres.), also operator of radio WWL. Coming from WWL are gen. mgr. W. H. (Slim) Summerville, program mgr. Ed Hoerner, chief engineer J. D. Bloom. Base hour is \$900. Rep is Katz.

Note: KTCA-TV, St. Paul-Minneapolis (Ch. 2, educational) reports it went on air with single special program Sept. 3, day later than we reported (Vol. 13:35). Regular Mon.-Fri. schedule begins Sept. 16. It will operate about 40 hours weekly at start—with 1:30-3:30 p.m. used by Minneapolis-St. Paul public school systems, 3:30-8 p.m. by local civic and cultural groups, 8-9 p.m. by state's 14 private colleges, 9-10 p.m. by U of Minn.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WLWI, Indianapolis (Ch. 13) has all construction finished and is conducting performance tests with 50-kw RCA transmitter, plans Sept. 15 programming with ABC-TV, writes John T. Murphy, TV v.p. of grantee Crosley Bestg. Corp. RCA 12-bay superturnstile antenna was installed Aug. 31 on 1016-ft. Ideco tower. John Babcock, from WLWT, Cincinnati, will be asst. gen. mgr. Base hour will be \$1100. Rep will be Crosley.

WPTA, Roanoke, Ind. (Ch. 21, allocated to Ft. Wayne) expects to sign with ABC-TV and plans Sept. 21 programming, reports gen. mgr. Ronald R. Ross for owner Sarkes Tarzian, also owner of WTTV, Bloomington-Indianapolis (Ch. 4). It's installing 12-kw RCA transmitter in virtually completed studio-transmitter building, with transmitter tests scheduled for Sept. 6. Stainless 724-ft. tower and antenna are ready. Richard D. Morgan, ex-Louis E. Wade Agency, Ft. Wayne, is sales director; Art Hook, ex-WSEE, Erie, program director. Base hour will be \$360. Rep will be Meeker.

WMBD-TV, Peoria, Ill. (Ch. 31) has begun construction of studio building and transmitter house, both scheduled for completion Nov. 1, plans Dec. 15 test patterns, Jan. 12 programming with CBS-TV, reports v.p. Robert O. Runnerstrom. Owners of TV and radio WMBD are Charles C. Caley (66.67%), who also owns 38% of radio WDZ, Decatur, Ill. and John E. Fetzer (33.33%), who also owns WKZO-TV, Kalamazoo (WKZO), KOLN-TV, Lincoln, Neb. and radio WJEF, Grand Rapids, Mich. Microwave equipment for studio-transmitter link is due Sept. 15; Ideco 500-ft. tower and stand-by antenna Oct. 15; 25-kw RCA transmitter and studio equipment Nov. 1; Supergain RCA antenna Dec. 15. Rep not chosen as yet.

KMOT, Minot, N. D. (Ch. 10), planned as affiliated station by parent KFYZ-TV, Bismarck (Ch. 5), expects to begin with test patterns Oct. 25, programming Nov. 1, reports pres.-gen. mgr. Wm. Ekberg. DuMont transmitter is on hand and studio-transmitter building shell has been completed at site SW of city. Ideco 400-ft. tower will have RCA antenna. KFYZ-TV, also operator of satellite KUMV-TV, Williston (Ch. 8), has \$275 base hour. Rep is Blair Television Assoc. Inc.

KDUH-TV, Hay Springs, Neb. (Ch. 4), to be satellite of parent KOTA-TV, Rapid City, S. D. (Ch. 3), plans Nov. 1 start, reports KOTA-TV business mgr. Wm. F. Turner. It will use 6-kw RCA transmitter with 25-kw Standard Electronics amplifier, 500-ft. Ideco tower. KOTA-TV base hour is \$150. Rep is Headley-Reed.

KRSD-TV, Rapid City, S. D. (Ch. 7) has 5-kw DuMont transmitter on hand and 370-ft. self-supporting Ideco tower ready, but hasn't target, reports partner Eli Daniels, who with John & Harry Daniels also holds CP for KDSJ-TV, Deadwood, S. D. (Ch. 5). Studio-transmitter building on Skyline Dr. is 50% completed. Network affiliation hasn't been signed; base hour hasn't been set; rep not chosen.

WJCT, Jacksonville, Fla. (Ch. 7, educational) has changed target to "before Jan. 1" from previous Sept.-Oct. date, writes Heywood A. Dowling, pres. of grantee Educational Television Inc. GE 5-kw transmitter donated by WMBR-TV has been installed in WFGA-TV transmitter house and Alford antenna is on WFGA-TV tower at 843-ft. level. It will use WMBR-TV studios, but film equipment will be with transmitter. Dr. Wm. K. Cumming, ex-Stephens College, Columbia, Mo., will be station mgr. & program director. Ernest Vodermark, of WMBR-TV, will act as studio engineer and Harry Wingfield, WFGA-TV, will serve as transmitter engineer—in addition to their commercial jobs.

CHBC-TV, Kelowna, B. C. (Ch. 2) is wiring 2-kw RCA transmitter and plans to meet Sept. 21 programming target, reports gen. mgr. Roy G. Chapman. It's assembling batwing antenna for installation on 100-ft. Stainless tower. Construction has started on transmitter houses for satellites CHBC-TV-1, Penticton (Ch. 13) and CHBC-TV-2, Vernon (Ch. 7), which are due on air shortly after parent outlet gets going. Two 75-watt RCA transmitters are on hand for use by satellites. CHBC-TV base hour will be \$170. Reps will be Weed and All-Canada.

CKBL-TV, Matane, Que. (Ch. 9) has ordered RCA equipment for delivery in April 1958, plans July test patterns, commercial operation in Aug., reports Rene Lapointe, managing director of radio CKBL. Construction has begun; 250-ft. wavestack antenna will be used. Rep will be Jos. A. Hardy & Co. Ltd.

RCA shipped antenna Sept. 6 to upcoming WKXP-TV, Lexington, Ky. (Ch. 27), due in mid-Sept.; 6-kw driver Sept. 5 to WRCV-TV, Philadelphia (Ch. 3) to replace 5-kw unit—6-bay superturnstile antenna having been shipped Aug. 30 to station planning move to new site; 6-bay custom-built antenna Aug. 30 to WFIL-TV, Philadelphia (Ch. 6), planning change to 1111-ft. tower.

NBC-TV aims to be first with live network program over AT&T's new Cuba-U. S. "scatter" link (Vol. 13:33). It's hoping to carry interview with Cuban dictator Juan Batista in Havana on Martin Agronsky's new *Look Here* show Sept. 29, Sun. 3:30-4 p.m. Uncertainties include (1) whether 185-mi. "over-horizon" relay will be ready and (2) whether Batista will agree to the show.

Wind Turbine Co. of Canada reports order for 300-ft. Trylon tower from upcoming CHCA-TV, Red Deer, Alta. (Ch. 6), due on air in Nov.; 485-ft. Trylon from CKBI-TV, Prince Albert, Sask. (Ch. 5), target not reported; 670-ft. Trylon tower for early Oct. delivery to CKRN-TV, Rouyn, Que. (Ch. 4), with fall target.

Translator starts: K72AJ, Susanville, Cal. began Aug. 16 repeating KCRA-TV, Sacramento; K74AG, Newport, Ore. Aug. 18, repeating KOIN-TV, Portland.

AMONG FCC's first actions, in initial meeting following month's vacation, was further consideration of some substantial channel shifts. It came up with final action adding 2 vhf channels to Albany-Schenectady-Troy area and a new proposal for adding one vhf to Providence.

In first case, Ch. 10 is assigned to Vail Mills, N. Y., Ch. 13 is shifted from Utica to Albany area, Ch. 2 is added to Utica. WKTV, Utica, is required to be shifted to Ch. 2. WCDA goes to Ch. 10, from Ch. 41, WTRI to Ch. 13 from Ch. 35—but both latter shifts are temporary, FCC stating authorizations "will expire automatically upon commencement of regular operations by a permittee so authorized by final action of the Commission on any application or applications for such regular operation." Both uhfs are hopeful that their record of operation in area will give them leg up if competing applications for the new vhf's appear.

Shifts proposed for the Providence drop-in are extensive: Ch. 8 & 13 would be added to Providence, Ch. 12 shifted from Providence to New Haven, replacing Ch. 8; Ch. 12 replacing Ch. 13 in Portland, Ch. 11 replacing Ch. 12 in Orono, Me. This requires WPRO-TV, Providence to shift from Ch. 12 to Ch. 8 or Ch. 13; WNHC-TV, New Haven, from Ch. 8 to Ch. 12; WGAN-TV, Portland, from Ch. 13 to Ch. 12.

Proposal to shift Ch. 12 from Erie, Pa. to Cleveland-Akron area and give Erie's WICU a uhf channel has precipitated a fight as bitter as those attending earlier deintermixture proceedings. Arguments are similar, too. For example, WICU argues that FCC has no legal power to attempt to equalize competition through deintermixture; that removal of vhf would deprive areas of service; that public would suffer costs of conversion, etc. WAKR-TV, Akron (Ch. 49) argues need for local vhf service; WSEE,

Erie (Ch. 35) asserts removal of Ch. 12 would leave no white areas.

Albany channel changes produced dismissal of Ch. 64 application in Pittsfield, Mass. by WWLP, Springfield, applicant informing Commission it couldn't operate with vhf competition from Albany.

Different reason for dismissal was given by KWJB, Globe, Ariz. It had sought Ch. 34 but said it saw no chance of going forward now that Commission has declined to guarantee translators will be kept out of town.

Crescent City Telecasters, owned by principals of KTBS-TV, Shreveport, has dropped application for Ch. 12, New Orleans, while CP for WQIK-TV, Jacksonville (Ch. 30) has been given up by Carmen Macri.

Affirmation of March 11, 1953 grants to WHEC-TV & WVET-TV, Rochester, N. Y. (share-time Ch. 10) and denial of protest by radio WSAY, Rochester are in the works—Commission announcing instructions to staff to draft decision with those conclusions.

Fiery rebuttal was fired by Philco at NBC Sept. 4 in 33-page brief replying to NBC's answer to Philco protest against renewal of licenses of network's WRCV-TV & WRCV, Philadelphia (Vol. 13:33, 35). Philco reiterated charges that NBC is unfit "in the public interest" to operate stations, repeated demand for FCC hearing on "predatory practices of NBC itself, those of its parent, RCA, and those of the 2 in combination." Denying allegations by NBC that Philco's \$150,000,000 anti-trust damage suit against RCA motivated FCC protest, Philco said they were "unverified, intemperate & highly questionable assertions of irrelevant fact." Moreover, Philco said, NBC engaged in "vilification" and "grossly inaccurate" recital of Philco's financial history to support assertion that Philco also was motivated in renewal protest by own "poor past performance" in industry.

Radio station sales reported this week: WCSI, Columbus, Ind. by Syndicate Theatres Inc. (Joseph P. Finneran & Trueman Rembusch) for \$150,000 to *Findlay* (O.) *Republican-Courier* (WFIN & WFIN-FM), owned by Heminger family . . . WWIL, Ft. Lauderdale, by Missouri Bestg. Corp. (Lester A. Benson, pres.), also owner of WIL, St. Louis, for \$130,000 to Carmen (Jim) Macri, also owner of WZOK, Jacksonville, WWOK, Charlotte . . . WMOO, Milford, Mass. by Milford Bestg. Corp. (James W. Miller, pres.) for \$96,000 to Joseph L. Rosenmiller Jr. (60%) and Peter A. Bordes (40%)—Rosenmiller also owning control of WESO, Southbridge, Mass. and WCTC, New Brunswick, N. J., Bordes also having interest in both. Milford Bestg. has applied for new 250-watt on 1490 kc in Milford and Miller also controls WCAT, Orange, Mass. and WSBS, Great Barrington, Mass. . . WERI, Westerly, R. I. by Ted Estabrook for \$85,000 to Wm. Sweeney, v.p. of Telebroadcasters Inc. . . WSYL, Sylvania, Ga. by Robert H. Thompson Sr., owner of WWNS, Statesboro, Ga. for \$45,000 to chief engineer & mgr. Edwin H. Bass. Brokers: WCSI, Allen Kander; WERI, Blackburn & Co.

Burl C. Hagadone, once operator of KNEW, Spokane, has purchased *Flagstaff* (Ariz.) *Sun* in partnership with Scripps League, western newspaper publisher, for approximately \$300,000 in sale negotiated by Hamilton, Stubblefield, Twining & Assoc. Inc.

Wm. H. Bauer, ex-FCC patent adviser, establishes TV-radio & patent practice with offices at 422 Washington Bldg., Washington (Sterling 3-3480).

Time slide-chart for 1957-58 season, showing when contracts expire, is offered by NBC Spot Sales.

Radio station sales & transfers approved this week: WXRA, Buffalo, by Thaddeus Podbielniak for \$150,000 to John W. Kluge, owner of 6 other AMs (Vol. 13:29) . . . WABR, Winter Park, Fla. & CP for WEAL-TV, Orlando (Ch. 18), 60% by Ray H. Gunkel Jr. for \$126,500 to James H. Sawyer, now 100% owner (Vol. 13:32) . . . WWRI, West Warwick, R. I. by Paul Oury for \$108,750 to Grelin Bestg. Co., principals being Melvin C. Green & Lester W. Lindow (Vol. 13:32) . . . KANV, Shreveport, by Travis T. Hailey for \$100,000 to John M. McLendon, owner of 3 other AMs (Vol. 13:33) . . . KRIG, Odessa, Tex. by Oil Center Bestg. Co. (R. O. Canon, pres.) for \$100,000 to Carl Goodwin and associates (Vol. 13:30) . . . WNBS, Murray, Ky. 77.5% by H. T. Waldrop & Edd Griffin for \$61,275 to Charles R. Shuffett & C. H. Hulse Jr. (Vol. 13:30) . . . KSEO, Durant, Okla. by B. F. & Bennett Story for \$60,000 to U of Okla. journalism professor Robert V. Peterson & family, who also bought *Durant Daily Democrat* from Storys (Vol. 13:29) . . . WCOW, Sparta, Wis. 74% by Nicholas & Victor J. Tedesco for \$56,400 to Zel Rice, whose son John will be resident mgr. & 24% owner (Vol. 13:31).

Session on bilingual films & international TV will highlight 82nd semi-annual SMPTE convention Oct. 3-9 at Philadelphia's Sheraton Hotel. Among papers scheduled for session are BBC presentation on international TV compatibility, USIA on its international TV network, with other papers on techniques of phonetic language translation and simultaneous bilingual telecasting. Other TV sessions will be devoted to closed-circuit TV & video tape recording, military uses of TV, large-screen and color TV.

Telecasting Notes: Another package of post-1948 features from a major studio has been cleared for sale to TV by the 3 major Hollywood talent guilds—but again the negotiations were conducted on basis of individual pictures and carefully avoided establishing a basic formula for mass release of late movies. Pact involved 10 Warner Bros. features to be sold to TV by AAP, with total of \$354,000 in the deal . . . How the unions came out: Screen Directors Guild receives total of \$87,500 on basis of percentage of directors' original compensation for the 10 films. Screen Writers Guild sold rights for "flat sum of \$6000 against the first \$100,000 TV gross of each picture, plus 8% of all subsequent earnings," including those from fee TV. Screen Actors Guild gets total of \$207,000 for the same 10 pictures plus 2 others not cleared by the other guilds . . . Only previous major-studio films cleared for TV by the unions have been the 82 recent RKO features owned by Matty Fox's C&C TV Corp. (Vol. 12:51) . . . Foreign language programming by WATV, Newark-N. Y., is turning it gradually into country's first multi-lingual TV station, and it's "currently trying to shake off whatever major English language programming it has," says Sept. 4 *Variety*. Faced with stiff 6-station competition in metropolitan area, WATV already plans 50 hours per week in Italian, Spanish, Yiddish, Polish, Greek, Russian "to make itself as specialized as possible in order to survive." Schedule aimed at nationality groups in market area includes foreign-produced as well as dubbed U. S. filmed shows . . . "Today's track odds" for pilot TV film sales to agencies by producers are listed this way in Sept. 2 *Billboard*: Crime & mystery shows—"almost even." Action-adventure—"1 in 8." Westerns, musicals and anthologies—"about 1 out of 3." Comedies—"1 out of 4" . . . Silent treatment will be given Pablo Picasso when he & art are shown on NBC-TV's *Wisdom* Sept. 15, Sun. 2:30-3 p.m., "first of 26 filmed visits with outstanding figures of our time." Longtime member of French Communist Party, Picasso will be shown in color—but mute—at work in Vallauris studio. "We have no sympathy with his politics but we cannot dismiss his art," says film commentary

Pilot TV project in teacher education supervised by Texas Education Agency has resulted in "recruitment of high-quality teachers, 56 of whom are now in classrooms," according to *New Directions in Teacher Education*, published by Ford Foundation's Fund for the Advancement of Education, which granted \$95,700 for program in April 1956. All teachers' colleges and universities in state cooperate in continuing project, to which TV stations donate time for series of graduate courses leading to permanent certification of teachers.

New programming pattern for ABC radio is live music "with a romantic slant," according to ABN pres. Robert E. Eastman, who this week announced group of 60-min. variety shows, devoted mainly to instrumental and vocal music. First of 5 full-hour shows began this week, daily 10-11 a.m.; others will be 1-2 p.m., 2-3 p.m., 8-9 p.m. and 7-8 or 9-10 p.m. weekdays; 9-12 a.m. planned Sat.

Good TV primer for advertising newcomers, 49-page *An Introduction to Commercial TV Advertising*, touching on most aspects of the business, has been prepared by H. B. Humphrey, Alley & Richards agency, N. Y., offered primarily to existing and prospective clients.

NBC TV & radio affiliates meet Sept. 11-13 in New York's Waldorf-Astoria, with TV station workshop scheduled Sept. 11, TV affiliates exec. committee election of officers Sept. 12, luncheon with network officials Sept. 13.

by director Daniel Catton Rick of Chicago Art Institute . . . Double exposure: CBS-TV's *Phil Silvers Show* will be on network in upcoming season simultaneously with repeats of earlier series syndicated by CBS TV Film Sales . . . Add casualties: After 4 years NBC-TV discontinues *Zoo Parade* Sun. 3:30-4 p.m., although 2 or 3 Amazon expedition color "specials" are planned for 1957-58 season. Exit of Marlin Perkins show follows end of *Kukla, Fran & Ollie* on ABC-TV (Vol. 13:34) after 10 network years . . . Clare Booth Luce may be hostess in new CBS-TV 30-min. film series on Foreign Service adventures, tentatively titled *The Diplomat*. State Dept. is cooperating in series, proposed as network feature for fall of 1958 . . . "Salute to the Queen" is 60-min. special planned by NBC-TV 5:30-6:30 p.m. Oct. 20 attuned to Queen Elizabeth's visit to U. S. and featuring top British stars . . . "Men of Achievement" TV project peddled by promoters to Hollywood businessmen "appears to be little more than a clever scheme to sell film clips for \$1600 to \$4000 to manufacturers, food processors and other business firms," according to Los Angeles Better Business Bureau. Prospective participants in purported TV series were told they must supply 4-min. films "acceptable in program content," then were persuaded to pay for clips provided by promoters.

Products development board has been formed by NBC's Cal. National Productions to work with manufacturers in promotion & marketing. Headed by CNP merchandising div. mgr. Robert R. Max, board includes Serge Valle, NBC-TV Films research & sales development mgr.; Mario Trombetta, CNP art dept. mgr.; Selwyn Rausch, ex-Terrytoons; Gladys Murray, ex-Eagle Lion Films.

Network TV audience increased by 21% for Jan.-July nighttime programs compared with corresponding period last year, averaging 1,308,000 more homes (8,262,000 vs. 6,954,000) than in 1956, according to Nielsen survey released this week by TvB. Average daytime audience was up 11%, with 294,000 more homes (3,037,000 vs. 2,743,000) than year earlier.

TASO board met in Washington Sept. 3, heard exec. director Dr. George R. Town report that 162 engineers from 85 organizations are participating in work of its 6 panels. New Panel 6, "Levels of Picture Quality," has been organized—with Charles E. Dean, Hazeltine, chairman, and Henry E. Rhea, WFIL-TV, Philadelphia, vice chairman.

Winner of SMPTE medal for sound motion picture engineering is pres. Col. Richard H. Ranger of Ranger-tone Inc., Newark. Samuel L. Warner Memorial Award for "invention, development & application of a method of electronically synchronizing sound recorded on magnetic tape" will be presented to him at Society's 82nd convention Oct. 4 at Sheraton Hotel, Philadelphia.

Product protection policies for network commercials are being revised by CBS-TV to provide at least 15-min. separation of commercials for competing products and to prevent competitive conflict within programs having multiple sponsors. Rules will not necessarily apply to "exchange" commercials by sponsors which trade placements on programs with co-sponsors.

Rep. Celler (D-N. Y.), chairman of House Judiciary Committee and lively critic of TV network business practices, BMI and fee TV, will be speaker at Sept. 24 luncheon of Academy of TV Arts & Sciences at New York's Harvard Club.

Electronics Reports: Moon can be used as radio relay station, Naval Research Lab scientists reported this week in detailing 6 years of experimentation culminating in "the most significant discovery made by radar." Announcement was made in reports by James H. Trexler & Benjamin S. Yaplee to meeting of International Scientific Radio Unions (URSI) in Boulder, Colo. Both voice and radar messages have made the 500,000-mi. round-trip (which takes 2½ seconds), the scientists reported.

First communications "bounce" was made Feb. 24 this year with radar signal in 3000-mc band, using NRL's 600-in. radio telescope in place of conventional receiver. In addition to indicating that many types of communication can be conducted via the moon, the research—started in 1951—also showed distance from earth to moon as calculated by radar is different from that estimated from optical observances. Investigation is continuing, with aim of obtaining accurate moon-earth distance measurement, information on absolute sizes of earth and moon in addition to communications possibilities inherent in moon-bounce phenomena.

* * * *

Industro Transistor Corp., organized in 1953 as Industro Inc., has filed SEC registration for public offering of 150,000 shares of 10¢ par value common stock for \$2 per share through officers, directors & employes. Company has offices at 649 Broadway, N. Y., plant at 87-31 Britton Ave., Elmhurst, L. I. Most of \$300,000 proceeds from stock sale would go to working capital and additional machinery & equipment. Industro principals include pres. Mark Schindler, secy.-treas. Ira R. Becker, v.p. Charles A. Tepper (all also officers & directors of State Labs Inc.) and v.p. Charles A. Prawdzik, ex-General Transistor, which seeks injunction to prevent him & Industro from using manufacturing processes allegedly acquired while he was General Transistor employe.

World's first over-horizon microwave link in regular commercial service was inaugurated Sept. 4 when IT&T and its associated Spanish and Italian companies began operation of first direct telephone service between Italy & Spain, with tropospheric scatter spanning 230-mi. gap between Mediterranean islands of Sardinia & Minorca.

Electronic Specialty reports earnings of \$93,000 (26¢ per share) in 3 months ended June 30 compared with \$21,000 (6¢) year earlier.

TV is "most used" medium for obtaining political campaign information, special analysis by U of Mich. Survey Research Center and Dept. of Journalism reports, being favored by 54% of respondents with high school education, 46% grade school, 41% college. Next choice was newspaper: 26% high school, 16% grade school, 32% college. Radio was third: 7% high school, 18% grade school, 7% college. Report also showed ¼ of nation's newspaper readers feel press does not give equal play to both political parties, ⅔ feel treatment is equal.

Rate increases: WNHC-TV, New Haven-Hartford, Sept. 1 raised base hour from \$1000 to \$1200, min. \$225 to \$270. KTRK-TV, Houston, has raised hour from \$900 to \$1000, min. \$180 to \$220. KBTB, Denver, Aug. 1, hour \$650 to \$750, min. \$175 to \$200. KARK-TV, Little Rock, Sept. 1, hour \$450 to \$500, min. \$100 to \$110. WILK-TV, Wilkes-Barre, Sept. 1, hour \$375 to \$425, min. \$75 to \$85. WCTV, Thomasville, Ga.-Tallahassee, Fla., Aug. 1, hour \$300 to \$350, min. \$80 to \$100. Spot increase: WABC-TV, N. Y., Sept. 1 raised base 20 sec. from \$750 to \$825.

ELECTRONICS PERSONALS: Walter W. Bachman promoted to mgr., Motorola contract relations; A. Ross Simpson appointed engineering mgr.; Marlin G. Korger, chief engineer, research and development; Ralph F. Waldon, chief engineer, production design and development; Robert D. Andreasen, mgr. of engineering services; Edmund Ross, mgr., field engineering; Russell A. Kasmar, mgr., technical publications . . . Col. Robert P. Haffa assigned to Evans Signal Lab at Ft. Monmouth Labs as director . . . C. Graydon Lloyd promoted to gen. mgr., GE specialty electronic components dept., Auburn, N. Y., succeeding Edward L. Hulse, transferred to missile & ordnance systems dept., Philadelphia . . . O. H. Mackley appointed v.p. & gen. mgr. of Hycon Electronics Inc. . . . Ralph L. Clark, ex-staff director of President's Advisory Committee on Telecommunications, named mgr. of Stanford Research Institute's Washington office, succeeding George T. Hayes, now asst. director of Stanford physical sciences research div., Menlo Park, Cal. . . . Robert E. Thomas promoted to regional merchandising mgr., Westinghouse electronic tube div., San Francisco . . . Cecil J. Harrison, ex-DuMont Labs, appointed sales v.p. of Rixon Electronics Inc., Silver Spring, Md. . . . Roy E. Wendahl named v.p.-sales of Hughes Aircraft Co., headquartering in Culver City, Cal. . . . Rein Narma named mgr. of production and engineering divs., Fairchild Recording Equipment Co., continues as chief engineer . . . Robert F. Bender, ex-Minute Maid, elected IT&T exec. v.p. for finance.

CBS will break ground next month for \$1,000,000 CBS Labs building at Stamford, Conn. to house research & development div. which has been headquartered in N. Y. since 1936. Construction scheduled for completion next summer is part of expanded CBS electronic research operations described by pres. Frank Stanton as "intensified search for new & improved audio & video techniques, broader development of electronics projects under govt. contract for military & other purposes, and more comprehensive applied research for industry."

Sylvania has broken ground for 34,000-sq. ft. wing to Bayside, N. Y. Physics Lab, to be completed in summer of 1958. Two-story building will be used for advanced electronics and lighting studies, employing more than 250.

Electronics Corp. of America reports net profit of \$128,145 (16¢ per share) in 6 months ended June 30 compared with loss of \$151,578 in similar 1956 period.

Educational TV network of at least 23 stations will carry 5 new series of live shows starting Oct. 29 in second phase of joint programming initiated in spring by NBC and Educational TV & Radio Center, Ann Arbor (Vol. 13:10). International Geophysical Year, American resources, current affairs and creative arts will be among themes of programs whose production & costs (about \$700,000 for both spring & upcoming series) are shared by NBC-TV & ETRC. Each of new series will include 10 programs over 10-week period, presented 6-6:30 p.m. each weekday by 23 affiliates of Center, which expects to add 4 more on air in time for live pickups from NBC-TV lines.

College TV course in American literature will be taught in fall over WMTW, Poland Spring, Me., and WABI-TV, Bangor, by Dean Robert E. L. Strider of Colby College, Waterville. His 15-week course for academic credit is fourth in which stations & Colby have cooperated.

Flamingo Telefilm Sales Inc. is formed by Herman Rush & Ira Gottlieb to act as exclusive sales agent for Flamingo Films Inc.

FOREIGN TV SETS—MAN-IN-THE-STREET ECONOMICS: It's not too difficult to see reasons for slow growth of TV in foreign countries if you add to dull & meager programming the fact that receivers are still priced out of Mr. Average Man's range. Really, though, situation isn't drastically different from what it was in early days of TV here. We've attempted to pin down, as well as we can, some rough figures showing just what TV sets cost in major foreign TV countries -- in terms of workers' income. Figures are hard to come by here, but our findings represent a consensus.

To provide comparison, here are U.S. figures: Average set costs about \$200; average production worker earns \$82.99. Thus, it takes typical American consumer about 2½ weeks' work to pay for his set.

We've consulted U.S. exporters, Dept. of Commerce, Bureau of Labor Statistics and embassies, came up with these figures for representative TV countries -- as expressed in terms of U.S. dollars:

United Kingdom: Typical set -- \$205-\$210. Average worker's income -- \$24 weekly. Set cost -- about 9 weeks' work.

Australia: Price, \$500; income, \$30; about 17 weeks' work.

France: Price, \$300; income, \$33; about 9 weeks.

Italy: Price, \$320; income, \$16; about 20 weeks.

Japan: Price, \$220; income \$11; about 20 weeks.

West Germany: Price, \$200-\$250; income, \$28-\$37; 5-9 weeks.

Mexico: Price, \$300; income, \$12; about 25 weeks.

Figures from behind Iron Curtain are even more difficult to find. There are news reports that 14-in. set runs about \$110 in Russia. Average salary is said to be about \$20, meaning 5½ weeks' work.

Most figures represent purchases of sets made in the respective countries. Just how many include imports from other foreign countries is unknown. U.S. exports few; EIA reports we shipped 174,000 in 1956, 51,000 through June this year. No figures are available on U.S. TV imports.

MAGNAVOX DROPS METAL CASE, CITES SHOCK SCARE: As aftermath of Skokie, Ill. electrocution (Vol. 13:29, 31-32), Magnavox has announced discontinuance of metal-cabinet portable production -- and irked its manufacturing colleagues who quickly asserted they see no reason for such action.

In letter to dealers, Magnavox pres. Frank Freimann stated that "we plan to discontinue the manufacture of metal case TV sets in the light of the accidental electrocution in the Chicago area and the sales resistance we believe will develop as the result of this and other factors." Another Magnavox spokesman said company will bring out portable with heavy wallboard cabinet, which may permit price cut. Following are typical reactions of other set makers:

Herbert Riegelman, gen. mgr., GE TV receiver dept.: "We have no quarrel with any TV manufacturer who wishes to alter his product line. However, we would like to point out that millions of metal TV sets, table and consoles as well as portables, have been sold since the inception of the industry. The performance record of these sets over the years is evidence of the safety of the product."

RCA spokesman: "Ever since the Chicago incident we have said all along that we do not have the same problem. We have met no consumer resistance to our metal cabinets for portable TV sets."

Robert L. Shaw, Sylvania TV-radio div. gen. sales mgr.: "It is unfortunate that any manufacturer would make an unwarranted and baseless attack against a prod-

uct which has given millions of hours of safe, dependable entertainment to the public. If properly manufactured a portable TV set is not an electric shock hazard any more than electric mixers or any other normal household appliance."

Coincidental to debate, we note advance pages of fall Sears, Roebuck catalog lists 17-in. portable with fiber glass cabinet at \$142.95.

* * * *

National TV Week: There certainly seems to be lots more steam behind National TV Week, which runs Sept. 8-14, than there was last year. We've skimmed the cream of comment from spokesmen of the 4 sponsoring groups -- NARDA, EIA, NARTB, TvB -- plus plans of major set manufacturers. Here's what they say:

James D. Secrest, EIA exec. v.p., sees better preparation for this year's TV Week, better organization among sponsoring groups, more interest by manufacturers. He says this year's drive should be more successful than last year's, but probably not as good as the year before that when TV and Radio Week were combined.

NARDA exec. v.p. A.W. Bernsohn came out flatly: "We know more TV sets will be sold this year than last year." He added that you can't expect uniform activity in all parts of the country -- but that 50 major cities and many smaller communities have joined in campaign which he said "will surpass last year and equal the year before." A lot depends, he said, on local interest and the support of electrical dealers, distributors and electric leagues.

NARTB pres. Harold E. Fellows put it this way: "Broadcasters' plans for TV Week indicate they will support this industry observance in a manner far exceeding anything done in the past. Networks and individual national shows will tell the story of TV's role as a member of the family. We have had responses from dozens of stations across the country telling how they plan to present the 'Report to the People' program suggested by NARTB."

TvB pres. Norman E. Cash told us TV Week is "too short a period of time to inform the public of the services that the industry really renders." He said that TvB is starting a "year-round campaign telling the public of free TV contributions to the public interest" and to tell businessmen "how TV helps move products."

Most major TV manufacturers are quite active. GE has been urging dealers and distributors to be as diligent as possible on local TV Week committees and is using TV Week theme in local ads. RCA has sent streamers, posters, counter cards and co-op ads to its dealers and distributors; TV Week logotype will be included in some national advertising, including TV. Philco is mailing 9,000,000 copies of 8-page TV color tabloid with TV Week symbol featured. It also sent 6000 TV Week banners and 10,000 buttons. Motorola tied in with EIA & NARDA programs, supplied window display materials and buttons. Sylvania's promotion of the month is tied to National TV Week and it is sending dealers promotional material, plans to incorporate observance in ads. Westinghouse is providing dealer displays, while Hoffman plans special mailings and gifts.

Retail Sales: TV retail sales figures of 426,294 for July confirm earlier estimate (Vol. 13:33) of 425,000 and bring total TV retail sales to 3,236,697 for year -- some 37,000 less than the 3,273,560 sold in first 7 months last year. Radio sales at retail, excluding auto sets, totaled 4,236,453, compared with 3,967,555 sold in similar period of 1956. Sales in July were 597,484 vs. 576,453 in July 1956.

Production: TV output was 199,954 week ended Aug. 30, compared with 205,881 preceding week and 174,093 in corresponding week one year ago. It was year's 35th week and brought TV production for year to date to about 3,955,000, compared with 4,543,902 in same period of 1956. Also this week, EIA officially estimated first 7 months production at 3,082,799 compared with 3,752,133 in similar 1956 period. July production was 360,660 (55,401 uhf), compared with 543,778 (72,766) in June, 336,931 (41,803) in July 1956.

Radio production was 287,190 (83,448 auto) week ended Aug. 30, vs. 292,626 (79,962) preceding week and 257,815 (62,340) in corresponding week year ago. Radio

output for 35 weeks totaled about 9,047,000 (3,473,000) vs. 8,480,545 (2,780,261) in 1956 period. First 7 months production was placed at 7,799,882 (3,090,955) compared with 7,225,862 (2,512,216) in similar period last year. July production totaled 612,588 (256,279), compared with 1,088,343 (416,058) in June and 566,697 (198,565) in July 1956.

Topics & Trends of TV Trade: Labor Dept., EIA and IUE reached no agreement Sept. 5 on definition of electron tube industry for possible minimum wage determination under Walsh-Healey Act (Vol. 13:31) which deals with Federal contracts of \$10,000 or more. Issue was referred to technical subcommittee of 3 groups, which probably will meet next week.

Hearing before Wage and Hour and Public Contracts div. was preliminary one to which union and management representatives were invited by Labor Dept. to discuss definition proposals. EIA ad hoc Walsh-Healey committee of 35 members, led by chairman Edward J. Danneberg (Tung-Sol) and gen. counsel Wm. Reynolds, proposed narrowing definition by excluding: (1) Electron tube parts, (2) All semiconductor devices, (3) X-ray tubes, (4) Electron beam (beta ray) generator tubes, (5) Rectifier and associated tubes designed specifically for use in equipment which operates at or above X-ray spectrum.

IUE objected to EIA's proposed exclusion of semiconductors and parts, called for additional information. Final determination of issue probably will take 6-12 months.

* * * *

RCA adds 5 color TV models (see p. 3) with prices ranging \$550-\$795—\$50-\$100 higher than current line. Sets feature improved chassis and 21-in. tri-color glass picture tube with new mask structure called "graded aperture mask" which provide increased brilliance, allowing use of dark safety glass for better contrast. Unusual new feature is use of color gradations around color-intensity and "tint" (formerly "hue") dials; with pointers, they give easy method of setting dials to positions known to be satisfactory. The new models: Abington (21CD872) table model, mahogany or lime oak grain metal cabinet, \$550; Sanford (21CD877) console with front speaker sound, in mahogany, walnut, limed oak grains, \$650; Anderson (21CD886) console in mahogany, walnut, limed oak grains, \$725; Wentworth (21CD888) console in mahogany, walnut or birch wood, \$795; Townsend (21CD890) lowboy console in walnut or oak woods, \$795.

Color set sales are "beginning to make the difference in the dealer's profit margin," RCA color TV market development mgr. Roger L. Drew said in speech prepared for regional meeting of National Appliance & Radio-TV Dealers Assn. Sept. 8 in St. Louis. He said high sales records were reported from cities where RCA is conducting special promotion campaigns, that even before campaigns Cincinnati RCA dealers attributed 22% of total dollar volume to color; Detroit, 31%; Philadelphia, 28%.

Consent order approved by FTC prohibits Alrich Mfg. Co., Great Neck, N. Y. (Vol. 13:16) from claiming its plastic sheet gives effect of color TV. Company also agreed to order which rules it must not say it manufactures device, or that it eliminates glare or eyestrain and will not burn.

EIA technical symposium Sept. 17-18 in Ambassador Hotel, Los Angeles (Vol. 13:34), will be keynoted by Lt. Gen. C. S. Irvine, deputy Air Force chief of staff for materiel. He will discuss \$60,000,000 Air Force purchase of numerically-controlled machine tools.

July picture tube sales by manufacturers were lowest of any 1957 month, totaling 491,935 worth \$9,835,586 vs. 589,070 at \$12,043,831 in July 1956. Cumulative sales for 7 months were 5,306,594, worth \$96,822,617, reports EIA, compared with 5,738,123 at \$105,657,579 for similar 1956 period. Totals for receiving tubes for 7 months this year were 254,252,000 valued at \$217,503,000 vs. 259,056,000 at \$209,637,000 for similar period last year. July receiving tube sales were 33,077,000 worth \$27,042,000 compared with 31,400,000 at \$24,781,000 sold in July 1956. EIA's monthly breakdown:

	Picture Tubes		Receiving Tubes	
	Units	Value	Units	Value
January	760,860	\$13,594,525	37,571,000	\$ 31,170,000
February	728,363	13,134,778	44,460,000	36,631,000
March	833,257	14,850,847	43,010,000	37,007,000
April	629,838	11,394,043	27,970,000	25,384,000
May	758,328	14,031,519	32,836,000	28,955,000
June	1,104,013	19,981,319	35,328,000	31,314,000
July	491,935	9,835,586	33,077,000	27,042,000
TOTAL	5,306,594	\$96,822,617	254,252,000	\$217,503,000

Transistor sales continued record pace in July, EIA reporting month's total of 1,703,000 which nearly doubled 885,000 sold in July 1956. Total for first 7 months of year is 12,902,300 valued at \$35,465,000, compared with 5,643,000 at \$16,057,000 in similar 1956 period. EIA's monthly breakdown:

	1957 Sales (units)	1957 Sales (dollars)	1956 Sales (units)
January	1,436,000	\$ 4,119,000	572,000
February	1,785,300	5,172,000	618,000
March	1,904,000	5,321,000	708,000
April	1,774,000	4,880,000	832,000
May	2,055,000	5,636,000	898,000
June	2,245,000	6,121,000	1,130,000
July	1,703,000	4,216,000	885,000
TOTAL	12,902,300	\$35,465,000	5,643,000

Canadian TV distributor sales to dealers totaled 194,155 for first 7 months of 1957 compared with 252,227 in similar 1956 period, reports RETMA of Canada. July sales were 23,483 vs. 36,031 in July 1956. Portable TV sales amounted to 11,069 in May-June-July period, first 3 months such records were compiled. Here's breakdown of total sales by provinces: Ontario, 9500 in July, 74,256 for 7 months; Quebec, 5958 & 53,814; British Columbia, 2601 & 16,641; Alberta, 1647 & 13,655; Manitoba, 1629 & 11,964; Nova Scotia, 836 & 9126; Saskatchewan, 661 & 6849; New Brunswick & Prince Edward Island, 565 & 5986; Newfoundland, 86 & 1864.

British TV trends, as evidenced by exhibits at National Radio Show, marking 21st anniversary of TV service in England: Sets are cheaper—17-in., still the most popular size, averaging slightly over \$210 (including tax), down about \$36 from last year; 21-in. dropped \$140 to an average \$280. British sets now boast "wide-angle" 90-degree picture tube, cutting 3-4 inches from depth of 21-in. set. In spotlight at show were portables, averaging 27 lbs., with lightest a 9-in. model weighing 17 lb. With BBC rapidly opening new FM stations, many TV manufacturers are offering combination TV-FM sets at about \$15 above cost of TV alone.

FM band converter for TV sets will be marketed by Regency div., IDEA Inc., at \$19.95. Transistorized gadget, powered by 3 penlight batteries, contains tuner to "make any TV set an FM receiver."

Trade Personals: George D. Macbeth elected honorary v.p. of Corning Glass on retirement as v.p. and controller, continuing to serve as director and member of exec. committee; Charles D. LaFollette elected financial v.p.; Thomas Waaland, treas.; John L. Ward, controller; Robert W. Foster, asst. controller; Norman J. Vang, v.p. & director of industrial relations; Richard M. Clifford, mfg. mgr., electrical products div. . . . John G. Copelin, v.p., International Standard Electric, IT&T subsidiary for foreign operations, given area responsibility for ISE activities in West Indies, Central & South America, Australia, Canada, Far East; Arthur J. Schmitt succeeds him as comptroller . . . Robert W. Sarnoff, NBC pres., elected an RCA director; Andre Meyer, Lazard Freres, and Paul M. Mazur, Lehman Bros., both N. Y. investment bankers, also elected directors . . . John R. Halligan promoted to Hallicrafters treas., succeeding Joseph J. Frendreis, resigned; Edward Bishop Jr. named senior financial officer, continuing as controller; Edward J. Corcoran promoted to secy. . . . Henry B. Graham, ex-DuMont govt. sales mgr., named National Union electronics div. sales mgr. . . . Maury Freeman, ex-Arrow Electronics, named sales mgr. of Gray Mfg. audio & hi-fi div., replacing Harry McKenzie, resigned.

Obituary

Raymond S. Pruitt, 70, Avco director who retired in 1955 as v.p., secy. & gen. counsel, died Sept. 1 at summer home, St. Joseph, Mich. Native of Gettysburg, S. D., he was a founder of Cord Corp. in 1929, became gen. counsel of The Aviation Corp. (now Avco) when Cord gained control of it in 1932-33.

Dismissal of FTC complaint against National Home Study School Inc., 52 E. 19th St., N. Y., for alleged misrepresentation of TV-radio technological course was recommended Sept. 4 by examiner J. Earl Cox. He found no reliable evidence that correspondence school and its officers sold course by exaggerating quality of instruction and job & salary possibilities for students, as alleged by FTC in 1956. Still pending is similar complaint against affiliate Radio TV Training Association Inc. and same officers at same address.

Automatic tuning will be featured in Westinghouse's record fall advertising running Sept. 16 to Dec. 9 on network TV, *Life*, *Saturday Evening Post*, *This Week*, *Parade*, *Family Week*, and in local media. Copy will use theme: "Now! No More Tuning. New Westinghouse TV Does It For You," illustrated by blindfolded girl getting "perfect picture and sound automatically."

Portable TV promotion, in conjunction with United Air Lines' radar-equipped "Mainliners," starts this month, features display material and counter cards for RCA Victor dealers and UAL ticket offices. Theme: "In air travel fly United, the radar flight line . . . in TV enjoy RCA Victor 'Flight-Line' portable TV." UAL uses RCA radar.

Further diversification is planned by P. R. Mallory, manufacturer of electronic, electrical & metallurgical products, which is forming jointly-owned firm with Sharon Steel Corp. and National Distillers & Chemical Corp. New firm will be Mallory-Sharon Metals Corp. and spokesman says it will be largest fully integrated producer of titanium and zirconium.

TV Blue Book for 1958 will be distributed by National Appliance Trade-in Guide Co., Madison, Wis. in about a week.

DISTRIBUTOR NOTES: Philco Distributors appoints John Ryan gen. mgr. of its N. Y. div., succeeding J. J. Harris, resigned; no successor yet named to Ryan's previous post of regional mgr., Philco Distributors Atlantic div. . . . RCA Victor Distributing Corp. dedicates 46,000 sq.-ft. distribution center in Davenport, Ia. for eastern Ia. and western Ill. . . . Westinghouse Appliance Sales names Walter Mulcahey asst. to N. Y. major appliance sales mgr.; Sidney Schwartz succeeds him as adv. & sales promotion mgr. . . . Graybar appoints following operating mgrs.: K. H. Coyner, Norfolk, Va.; E. H. Helms, Asheville, N. C.; F. D. Masten, Durham, N. C. . . . DuMont appoints General Distributing Corp., 150 Front St., Bangor, Me. for Vermont with exception of Windham, Bennington and Franklin counties; Sydlee Electronic Supply Co., Springfield, Mass. for Windham and Bennington, Vt. counties . . . Capehart appoints Charles P. Culbert Organization of Los Angeles for Cal., Nev., Ariz. . . . Stuart A. Falk resigns from Philco Distributors; his last post was mgr. of now discontinued Detroit branch . . . Andrea Radio appoints Dimond-Gross Assoc. (Lee A. Dimond & Alfred M. Gross Jr.) for TV-radio-hi-fi in New England.

Service management school, under sponsorship of NARDA, is being planned for dealers and their service mgrs. NARDA director Frank Pieratt says aim is to have school on week end (Fri.-Sat.-Sun.) in some midwestern state, tuition about \$75. NARDA members are being asked to suggest school site.

Electronic Industry Show Corp. elects Charles Golenpaul, Aerovox v.p., pres., succeeding Wilfred L. Larson, Switchcraft pres. Others elected at Honolulu meeting: Mauro E. Schifino, Rochester Radio Supply Co., v.p.; Lew W. Howard, Triad Transformer, secy.; Roy S. Laird, Ohmite Mfg. Co., treas.

RCA Whirlpool appliance sales in Latin American and Caribbean areas will be handled starting Oct. 1 by expanded Whirlpool international operation. European, Asian, African sales will continue under RCA International.

Record Aug. factory TV sales, 115% higher than last Aug., are reported by Robert L. Shaw, gen. sales mgr., Sylvania TV-radio div. He termed dealer reaction "exceptional," adding "this is the first year in which we have experienced new line reorders so early and in such volume."

Acquisitions reported in the works: Litton Industries Inc. negotiating for purchase of Aircraft Radio Corp.; Gosnet div. of L. A. Young Spring & Wire Co. said to be discussing acquisition of Link Radio Corp., currently operating under Chapter XI of bankruptcy act.

Fifth annual "profit clinic" of Northwest Appliance & TV Assn. will be held Sept. 27 at Seattle's Benjamin Franklin Hotel. Speakers include Ken Stucky and Mort Farr, NARDA pres. and chairman, respectively.

Emerson ad account goes to new agency, Gore, Smith & Greenland, as Martin L. Smith who had account with Bogley-Smith Inc., becomes exec. v.p. of firm (formerly Gore-Serwer).

Capehart introduces British-made hi-fi, priced at \$599 in African mahogany, \$619 in walnut or blonde. Deliveries will start this month.

New transistor books: Second edition of GE's *Transistor Manual* (112 pp., 50¢); *Transistor Circuits*, by Rufus P. Turner (160 pp., \$2.75), Gernsback.

Minneapolis-Honeywell now sampling \$25 power tetrode transistor for hi-fi.

Financial & Trade Notes: Television-Electronics Fund reports net assets of \$156,743,659 and 12,556,998 shares outstanding in third quarter ended July 31, compared with assets of \$148,650,002 and 12,218,644 shares as of April 30. During quarter these were changes in its portfolio:

New stocks added: 5000 shares Aerojet General, market value \$1,650,000; 16,800 Allegheny Ludlum, \$877,800; 20,000 Carrier, \$1,050,000; 22,500 GM, \$1,012,500. Also added were \$296,000 worth of Tung-Sol 5% cumulative convertible pfd.; \$550,000 Ampex 5% debentures, due July 1, 1972; \$164,050 Collins Radio 5% convertible debentures, due June 1, 1977; \$104,000 Emerson Electric 5½% convertible debentures, due July 15, 1977; \$97,563 General Telephone 4½% convertible debentures, due June 1, 1977; \$221,000 NTA 6% notes, due June 15, 1962; \$127,000 Topp Industries 6% convertible debentures, due May 1, 1977; \$2,484,287 CIT notes, due Oct. 1, 1957; \$1,485,146 General Finance Corp. commercial paper, due Oct. 31, 1957; \$1,496,738 GMAC commercial paper, due Aug. 23, 1957; 2 groups of \$2,500,000 govt. bonds each, due Sept. 19 & Oct. 17, 1957.

Stocks eliminated: 10,400 Bell & Howell, market value \$395,200; 13,800 George W. Borg, \$362,250; 4000 Electronics Corp., \$49,500; 10,000 Photon, \$347,500; 12,600 Raytheon, \$239,400; 5000 Smith-Corona, \$188,750; 5000 Union Carbide, \$578,750.

Holdings were increased in American Bosch Arma, American Machine & Foundry, AT&T, Barry Controls, Beckman Instruments, Bendix Aviation, Columbia Pictures, Consolidated Electrodynamics, Eitel-McCullough, Electronics Assoc., Emerson Electric, Fansteel Metallurgical, General Bronze, Harris-Intertype, Hazeltine, Hoffman Electronics, IBM, IT&T, Leeds & Northrup, Magnavox, P. R. Mallory, Marchant Calculators, Mergenthaler Linotype, Minnesota Mining & Mfg., Philco, Robertshaw-Fulton, Royal McBee, Servomechanisms, Storer Bcstg., Sylvania, Texas Instruments, Thompson Products, Varian Assoc., Walt Disney Productions, Westinghouse Air Brake, Westinghouse Electric.

Part of holdings were sold in Aircraft Radio, Allis-Chalmers, AB-PT, American Chain & Cable, Amphenol, Babcock & Wilcox, Bell & Gossett, Boeing Airplane, Borg-Warner, Bullard, Bufova, Burroughs, Carborundum, Chance Vought Aircraft, Cincinnati Milling Machine, Clark Controller, Cleveite, CBS 'A', Corning Glass, Curtiss-Wright, Cutler-Hammer, Douglas Aircraft, Dresser Industries, Eastern Industries, Eastman Kodak, Emerson Radio, Ex-Cell-O, Friden Calculating, Garrett, General Dynamics, GE, General Railway Signal, General Telephone, Globe-Union, Goodyear, Hammond Organ, International Nickel, Lockheed Aircraft, Martin Co., W. L. Maxson, Minneapolis-Honeywell, Motorola, National Acme, National Cash Register, Neptune Meter, North American Aviation, Northrop Aircraft, Oak, Otis Elevator, Penn Controls, Reliance Electric, Ryan Aeronautical, Sangamo, Sperry-Rand, Square D, Taylor Instrument, Tung-Sol, 20th Century-Fox, United Aircraft, United-Carr Fastener, Vitro, Walt Disney Productions warrants, Western Union, Zenith.

Unchanged during quarter were holdings in ACF Industries, Addressograph-Multigraph, Admiral, Ampex, Conrac, Consolidated Electronics, Cornell-Dubilier, DuMont Labs, duPont, Eaton, Elgin National Watch, Elox Corp., Food Machinery, General Mills, General Precision Equipment, General Tire, G. M. Giannini, Indiana Steel Products, Industrial Electronics, Johnson Service, Liquidometer, Litton Industries, Machlett Labs, Paramount Pictures, Pullman, RCA, Sprague Electric, Stewart-Warner, Technicolor, TelAutograph, Telecomputing, TV Assoc., United Utilities.

[For status preceding quarter, see Vol. 13:21.]

* * * *

Walt Disney Productions stock, 400,000 shares held by Atlas Corp., has been offered for public sale at \$21.75 per share for Atlas account through syndicate headed by Goldman, Sachs & Co., Lehman Bros., Kidder, Peabody & Co. (Vol. 13:32). Offering, which does not represent Disney company financing, is intended to widen public ownership prior to applications for N. Y. and west coast stock exchange listings. Atlas would remain biggest Disney stockholder next to Disney family.

Walt Disney Productions reports consolidated net income of \$2,347,745 (\$1.57 per share on 1,492,725 shares outstanding) on total revenues of \$23,449,821 in 39 weeks ended June 30 vs. \$2,091,975 (\$3.20 on 652,840) on \$20,371,831 in corresponding 1956 period. For all 1956, earnings equaled \$1.60 per share after adjustment for stock split last Aug.

Hal Roach Productions, organized in May, has filed registration with SEC (File 2-13525) for public offering of 375,000 shares of \$1 par common stock at \$3 per share through underwriting group headed by S. D. Fuller & Co., N. Y. Part of proceeds may be used to lease N. Y. studio to expand production of TV film commercials.

Cornell-Dubilier earned \$525,068 (95¢ per share) on sales of \$24,958,419 in 9 months ended June 30, compared with \$718,093 (\$1.32) on \$25,484,898 in similar period year ago.

Additional officers-&directors stock transactions reported to SEC for July (Vol. 13:34): AB-PT—Leonard H. Goldenson exercised option to buy 3000, sold 1700, holds 54,000. American Electronics—Warren H. Crowell bought 2448 through Crowell, Weedon & Co., sold 2350 through firm, holds 98 in firm, 4995 personally. Beckman Instruments—Frederick L. Ehrman donated 500, sold 2500, holds 3365. Electronic Communications—C. Kenneth Baxter bought 1500, holds 9500. General Dynamics—Frederick de Hoffmann exercised option to buy 7500, holds 7530; Earl D. Johnson sold 8700, holds 21,300; Robert B. Watts sold 3500, holds 3640. General Precision Equipment—H. G. Place sold 5000, holds 20,000. General Transistor—Max Fialkov sold 2500, holds 18,868. International Resistance—Edward A. Stevens exercised option to buy 600, holds 5700. Loew's—Charles C. Moskowitz sold 17,500, holds 3000. Minnesota Mining & Manufacturing—Wm. L. McKnight sold 10,000, holds 955,510. National Theatres—B. Gerald Cantor bought 10,000, holds 45,000. Skiatron Electronics & TV—Kurt Widder sold 1000, holds 7900. Unitronics—David Bogen bought 3000, holds 3000; Lester H. Bogen bought 2000, holds 2000; John G. Brooks sold 4210, holds 3000; Abraham Cooper sold 500, holds 235.

Dividends: Hoffman Electronics, 25¢ payable Sept. 30 to stockholders of record Sept. 13; Arvin Industries, 50¢ Sept. 30 to holders Sept. 9; Bendix Aviation, 60¢ Sept. 30 to holders Sept. 10; Loew's Theatres Ltd., \$1 Sept. 30 to holders Sept. 9; Zenith, 75¢ Sept. 27 to holders Sept. 10; Columbia Pictures, 30¢ Oct. 30 to holders Sept. 30; Universal Pictures, 25¢ Sept. 27 to holders Sept. 14; Decca Records, 25¢ Sept. 30 to holders Sept. 16; Corning Glass, 25¢ Sept. 30 to holders Sept. 16; Wells-Gardner, no action.

Erie Resistor earned \$443,753 (64¢ per share) on sales of \$12,180,707 in first 24 weeks of year compared with \$394,758 (57¢) on sales of \$10,548,000 in similar 1956 period. Pres. G. Richard Fryling said electronic component, electro-mechanical and foreign operations continue satisfactory, while expansion in pre-assembled components and plastics have "adversely affected" profits. However, he added that Erie's business outlook "continues to be favorable."

Midwestern Instruments reports first half earnings of \$474,377 (50¢ per share) on sales of \$3,474,000 compared with \$154,659 (16¢) on sales of \$1,691,000 in similar 1956 period. Current sales figure includes \$788,000 from Magnecord div., merger also resulting in \$2,500,000 loss carry-over available for federal income tax purposes.

Audio Devices Inc. has placed 100,000 shares of common stock and 3-year warrants for purchase of additional 20,000 with Carl M. Loeb, Rhoades & Co. for private sale. Proceeds will be used for plant facilities and working capital for new div. for electronic components manufacture.

Aircraft Radio Corp. is selling \$1,600,000 long-term notes to Prudential Insurance Co. of America to refund short-term obligations. Notes carry 10,000 warrants for purchase of Aircraft Radio common stock at \$3 above Sept. 3 market price.

Hycan Mfg. Co. & subsidiaries report earnings of \$514,000 on sales of \$7,134,000 in 6 months ended July 31 compared with deficit of \$1,507,161 on \$5,021,000 in corresponding 1956 period.

Lear Inc. reports earnings of \$326,051 (14¢ per share) in 6 months ended June 30, compared with \$1,017,044 (44¢) in similar 1956 period.

Standard Coil reports net income of \$770 on 6-month sales of \$27,194,279 compared with net loss of \$1,206,184 on \$28,724,243 in similar 1956 period.

Color TV will come to Cuba—first country outside U. S.—Oct. 24, when new all-color all-film station will be opened in Havana on Ch. 12 by TV-radio pioneer Gaspar Pumarejo, according to RCA, which announced that shipment of equipment has already begun. New station, Canal 12 S. A., has ordered 10-kw transmitter and 60-ft. antenna to be mounted atop 400-ft. Hilton Hotel in Havana. Pumarejo, who founded CMUR-TV (now CMBF-TV) in 1951 as Cuba's first TV station, has been operating Escuela de Television which produces 8 hours of daily programming over Telemundo Network. For his new station, he plans continuous-performance 24-hour showing of 2-hour color film program. He predicts that 1000 color sets will be installed by Oct. 24 opening, with 10,000 to be sold during first year of telecasting. When 20,000 are in use, he plans to start live programming. His reasoning in starting color station: Color sets now can be sold for about \$700 in Cuba, about same price as black-&-white when first station was inaugurated there.

Nielsen Radio Index is being cancelled by ABN because survey "is unable to place full value" on out-of-home radio set circulation which represents "roughly 40% of our medium," ABN pres. Robert E. Eastman announced Sept. 4. He said ABN has "thorough respect" for A. C. Nielsen Co., that dropping of subscription "is in no way a reflection of any lack of appreciation of values inherent" in Nielsen research, but that "our product is too valuable to have it appraised by a method which is far more limiting than those applied to other major media." Eastman added that it's "fabulous task" to try to measure radio audience in "mobile population in a wide variety of places."

"Taking a crack at TV," Aug. 30 *Advertising Agency Magazine* tartly observes, "is in danger of becoming the newspaper man's favorite pastime." Citing TV critics on newspapers who "set themselves up as crusaders out to clean up TV," contributing editor Bill Tyler says: "This is, to our mind, about as disingenuous a bit of do-goodism as we have yet to encounter. Obviously, the crusader's zeal stems from the fact that it gives him an opportunity to blast a competing medium." Tyler wonders: "What would happen if telecasters started a little retaliatory crusade of their own on the sensationalism of the press and its effect on young minds?"

Cable theatre experiment at Bartlesville, Okla. (see p. 1) and other pay-TV developments will be reviewed at NCTA western regional conference in Ambassador Hotel, Los Angeles, Sept. 24-26, speakers including: Matthew Fox, pres. of Skiatron TV Inc.; Milton J. Shapp, pres. of Jerrold Electronics Corp.; Jack D. Wrather, pres. of Wrather TV Productions Inc.; Lloyd G. Hallamore, v.p. of Hallamore Electronics Co. Technical requirements of Bartlesville installation will be discussed by Jerrold supervising engineer Caywood C. Cooley.

TV relay which can handle "several hundred" programs simultaneously will be ready for testing "within a few years," AT&T exec. v.p. Clifton W. Phalen told Chicago marketing symposium this week. Based on information theory advances, system will be advanced form of computer with transistorized electronic switching system.

Equal broadcast time for all West German political parties, however small, must be provided by radio stations before Sept. 15 elections, Administrative Court in Munich ruled Sept. 3.

Maximum Service Telecasters board meets at Westchester Country Club, Rye, N. Y. Sept. 9-10 primarily to discuss technical program of propagation measurements, antenna performance evaluation, etc.

Four TV programmers were ordered by Federal judge this week to supply FCC network study committee with subpoenaed confidential financial data. N. Y. Federal Judge Bryan, in upholding FCC's right to subpoena such information, said it seemed "to me to come within the framework of powers of inquiry granted by Congress to the FCC upon subject matter which vitally affects the public interest." At same time he warned Commission to treat the information confidentially. The 4 program companies which had held out against FCC subpoenas for more than 4 months (Vol. 13:17-18, 20-24, 26) are MCA-TV and its affiliated Revue Productions, Screen Gems, Ziv TV.

First program venture by Metropolitan Educational TV Assn., N. Y., will be *Problems of Everyday Living* series of mental health discussions on WPIX starting Sept. 25, Mon., Wed. & Fri. 11:30 a.m.-noon. Teachers, psychiatrists, social workers, marriage counselors will be presented in programs for adults, station donating time & facilities. META also will produce *The Living Blackboard* in cooperation with N. Y. Board of Education on WPIX starting Sept. 30, Mon.-thru-Fri. 11-11:30 a.m.

One of biggest sunspot explosions on record virtually blacked out aircraft radio communications in many parts of world this week—and surprised southern British televiewers with French TV programs on their home screens. Unable to pick up pictures from London, they received images from across the channel—possible because French 819-line system has a measure of compatibility with British 405 lines since it has very close to twice the number lines, same field frequency and same positive picture modulation.

TV tampers with juries. At least, that's what was averred by panelists at 12th annual convention of National Assn. of County & Prosecuting Attorneys in San Francisco. They complained jurors get wrong ideas of justice by watching TV courtroom dramas in which prosecutors are trick artists. "We lost 50% of our cases last year," said St. Louis circuit attorney Thomas Eagleton. "Why? Some of the jurors thought we didn't present the evidence the way they'd seen it done on TV."

Full-scale TV teaching started this week at Port Chester, N. Y. high school after year of closed-circuit experimentation in which 60% of 1200 students participated. Lectures & demonstrations carried over system installed by General Precision Lab cover science, industrial arts, history, music, other courses in program supervised by TV director Clement Rathgeb, instructor in industrial arts. Equipment is manned by members of school's TV Technicians Club.

Closed-circuit colorcasts planned by Closedcircuit Telecasting System: Oct. 15, hour-long presentation of Pepsi-Cola Co., originating from New York's Ziegfeld Theatre, to be seen by Pepsi-Cola bottlers from coast to coast on 6x8-ft. screens in hotel ballrooms; Dec. 12, for N. Y. Dental Society; Jan. 29, for Northwestern U.

Dispute with judge over attempted courtroom use of tape recorder to cover hearing brought contempt citation and \$10 fine for news director Arthur Selikoff of radio KVOX, Moorhead, Minn. "You are not fair to anybody," Selikoff had remarked to police magistrate Roscoe S. Brown when he banned recorder.

Sole TV application filed with FCC this week was for Ch. 73 translator in McGill, Nev., by non-profit group—bringing total of translator applications to 43, station applications to 119 (33 uhf). [For details see *TV Addenda 25-F* herewith.]

Licensed TV sets-in-use in Britain totaled 7,169,509 at end of June, increase of 50,811 during month.

SUMMARY-INDEX OF THE WEEK'S NEWS — September 14, 1957

RCA-ZENITH SETTLEMENT, ending 11-year legal "grudge" battle between industry titans, seen as prelude to settlement of govt. anti-trust suit (p. 1).

CRAVEN PLAN DROPPED, probably indefinitely, as FCC decides to wait for data from TASSO. EIA and AMST urge study of spectrum uses (p. 3).

NO FINAL FEE-TV ACTION expected at Sept. 17 FCC meeting. Doerfer pledges quick decision, says Commission won't wait for Congress to act (p. 4).

ANTENNA FARMS NOW THE RULE in tall-tower approvals by airspace panel, which designates farm sites for towers. FCC rule due soon (p. 4).

EDUCATIONAL TV SPONSORS sought by new Chicago group to finance programs; ex-chairman Edward L. Ryerson of Inland Steel leads drive (p. 5).

FCC REJECTS PHILCO protest against renewal of NBC Philadelphia station license; examiner again recommends Flint grant to WJRT (p. 7).

PHILCO EXPECTS bigger share of 1957 TV market, sees factory sales running about 6,500,000. Aug. retail sales estimate declines to 550,000 (p. 10).

PRIVATE LABEL TV production reported contributing to Aug. upsurge in set output; producers neither confirm nor deny (p. 10).

EIA ENDORSES proposal for long-range spectrum study, votes to compile tape recorder statistics, names group to study set sales promotion (p. 11).

GIVE-A-SET TV drive proposed by ABC's Oliver Treyz is plan to collect outmoded receivers, send them abroad for goodwill—and business (p. 12).

PHILADELPHIA'S EDUCATIONAL WHYY-TV begins programming after year's delay due to money troubles; uhf outlet is 27th non-commercial station (p. 8).

BARTLESVILLE CLOSED-CIRCUIT project to begin installing third channel. Franchise application filed in Washington; other closed-circuit news (p. 9).

BEHIND THE RCA-ZENITH SETTLEMENT: A "gentlemen's agreement" this week ended the bitter 11-year legal battle between 2 titans of the TV-radio industry.

Though terms of the settlement of Zenith's challenge to RCA's industry-wide TV-radio-electronics patent licensing practices weren't announced—haven't, in fact, been put on paper yet—this week's action was understood in Washington to be prelude to a possible consent decree settlement of the Govt.'s 1954 civil anti-trust suit aimed at RCA package licensing practices (Vol. 10:47-48). Discussions between RCA and Justice Dept. are currently in progress.

All parties to agreement are being extremely close-mouthed, since documents won't be submitted to court until Sept. 30 or later. However, terms of complicated agreement—as we understand it—involve no changes in RCA's patent structure, set no precedent for other manufacturers to seek changes in their licensing agreements with RCA.

The agreement, in fact, was not nearly so one-sided as it would appear from newspaper accounts quoting Zenith counsel. Settlement will follow complex formula, under which Zenith is paid approximately \$11,000,000 in cash—with RCA contributing major amount, co-defendants token sums. But dependable sources indicate there is a second part to the agreement:

Zenith will take out an RCA patent license—the very concept it has fought in the 11-year suit—and will make its own patents available to RCA. Monies the 2 companies owe each other (royalties, back license fees, etc.) will be determined by arbitration.

Presumably this will include a reckoning of back fees Zenith owes RCA for the nearly 11 years it has been operating without RCA license—so RCA stands to be heavy gainer in this part of settlement.

Best guess by savvy observers is that—in entire transaction—Zenith will come out considerably ahead cash-wise. But Zenith, in the future, will be making substantial annual payments to RCA, based on value of Zenith production—same as rest of set manufacturing industry.

Most significant previous patent litigation involving RCA—also settled out of court—involved DuMont's 1948-50 challenge of RCA patent authority. In this settlement, DuMont was forgiven license fees for period of the legal action, took out RCA license and threw its substantial TV patents into RCA pool.

Long series of suits and countersuits involving Zenith and RCA began in Dec. 1946—Zenith's last month as an RCA licensee (Vol. 2:52)—and was in every sense a grudge fight between 2 strong-minded men who bitterly dislike each other personally and whose approaches to TV-radio have been diametrically opposed:

RCA's Brig. Gen. David Sarnoff—pioneer in broadcasting itself, in radio, in TV, in color, in other electronic fields—a man with strong ideas, who has surrounded himself with many of the industry's best organizational and engineering brains.

Cmdr. Eugene F. McDonald—one of the industry's great merchandising driving forces—who built up a sales organization second to none, based on a good product, and who persistently bucked almost every industry trend.

The 2 men have continually clashed personality-wise and over basic industry principles. McDonald differed with Sarnoff over the potential of TV, over color, over FM, over subscription TV—to name a few historic battles.

Despite his merchandising skill, McDonald never had a great following in the trade itself. He rarely uses TV-radio as an advertising medium, leaving that to his distributors. He promoted Phone-vision first on basis that advertising couldn't support TV, then with the implication that advertising is degrading; broadcasters, almost to a man, have always bitterly resented him.

The major legal battles between the two started with a Delaware suit by Zenith challenging certain patents owned or administered by RCA, with GE & Western Electric named as co-defendants. RCA filed counterclaim charging patent infringements by Zenith and its tube-making subsidiary Rauland. Zenith-Rauland followed with anti-trust suit in Chicago Federal Court, charging among other things that illegal patent practices had barred Zenith from foreign markets, and adding to the list of defendants Westinghouse and 14 foreign electronics firms.

Hard-fought preliminary skirmishes went as high as U. S. Supreme Court—in 1954, when Adlai Stevenson was of counsel for RCA (Vol. 10:49).

Trial of anti-trust suit was to begin in Chicago court this week—when both sides asked for postponement to Sept. 30 so that terms of settlement could be drawn up.

RCA is said to have spent \$6,000,000 preparing for trial, to have taken 83 depositions; Zenith said it spent \$2,000,000, had taken 110 depositions throughout world. Litigants had retained about 100 patent experts to testify at trial, as well as dozens of lawyers.

Treble-damage claims by Zenith totaled \$61,750,000. In its patent infringement suit, RCA was seeking undisclosed amount in back license fees.

Announcement of agreement was made by Zenith counsel Thomas McConnell—known as one of nation's most astute anti-trust attorneys. He said settlement would include issuance of patent licenses to Zenith, thereby removing "blockades" against company in foreign markets. He added that moves toward settlement had been under way 6 months, with agreement finally reached Sept. 9, day of scheduled opening of trial.

"The parties are in complete agreement and there are no loose ends," he said. Boards of the companies will have to approve final settlement.

RCA and others involved refused comment on settlement, Gen. Sarnoff telling us: "It still hasn't been formalized. It would not be proper to discuss it while it is before the court."

■ ■ ■

Thus RCA has disposed of the first—and perhaps most vexing—of a number of important suits besetting it. Other anti-trust suits pending:

(1) Govt.'s civil anti-trust patent suit, now being negotiated (see above).

(2) Philco's \$150,000,000 treble-damage suit against RCA, GE & AT&T, aimed principally at RCA patent practices (Vol. 13:3 et seq.). When Zenith takes out RCA license, Philco will be only major TV-radio manufacturer which isn't a licensee, having failed to renew license when it expired at end of 1954.

(3) Govt.'s civil suit against RCA & NBC, charging violation of Sherman Act in swap of Philadelphia & Cleveland TV-AM stations between NBC & Westinghouse (Vol. 12:49 et seq.).

At least one more govt. anti-trust suit in TV-radio-electronics may be imminent. Federal Grand Jury currently is winding up New York hearings which have been looking into allegations of division of world markets among radio manufacturers via patent licensing. Some Washington sources predict indictments will be forthcoming.

■ ■ ■

Note: RCA further solidified its position in burgeoning computer field this week by signing non-exclusive agreement with IBM exchanging patent licenses for data-processing machines.

ALLOCATION PLAN STAYS, RULE-MAKING DROPPED: Craven Plan is out of the picture until next summer at least, probably indefinitely. FCC this week announced intention of dismissing rule-making which had looked toward elimination of TV allocations table.

Comr. T. A. M. Craven himself suggested dropping the proposal, and his colleagues agreed with him unanimously. Here are his reasons:

"I've read all the comments. The original proposal was sound, but the time isn't ripe. First, the matter is being contested in the courts. Second, a large segment of the industry, which supports the work of TASO (TV Allocations Study Organization), is afraid of it. Third, if any fundamental change in policy is made, it should be done in one big package, with all the facts—and we should wait for TASO to produce the data on uhf & vhf propagation, etc.

"We need ground rules for service, and TASO has a June 1958 target to complete its work. I agree we should have the information. Another thing: Congress is considering easing the excise tax on combination uhf-vhf sets. We should see what it's going to do—whether uhf is going to be helped.

"I thought more of the industry would support the plan. But they were afraid of the lack of engineering service standards, afraid the plan would lead to a breakdown of station separations—even though we said the engineering standards would remain as they are. I suppose it's natural for them to worry about an eventual breakdown."

■ ■ ■

Another commissioner now sees almost inevitable change in engineering standards, to permit vhf drop-ins, unless uhf is made to work somehow. "Eventually," he said, "the pressure for more competition, from the public and from Congress, could prove irresistible. People just won't be satisfied with the limited competition permitted by the present setup."

Two of TASO's major components, meanwhile, have gone on record endorsing establishment of an agency to study govt. & industry use of spectrum—along lines of bills introduced by Sen. Potter (R-Mich.) and Rep. Bray (R-Ind.), who fear encroachment of military on TV channels (Vol. 13:16, 25, 33). EIA, in Los Angeles meeting this week, proposed joint govt.-industry committee (see p. 11); AMST board, at session in Rye, N. Y., recommended study by "an appropriate governmental body."

FCC CAUTIOUS IN RESUMING PAY-TV DISCUSSION: FCC meets on pay-TV again Sept. 17 — but don't expect anything final; look for "another step." As previously, it may take form of instructing staff to draft something acceptable to majority. Least Commission might do is continue discussions, while most would be to get some agreement on conditions under which it would accept applications from stations to test toll, looking toward authorization of tests on case-to-case basis.

That Commission will continue to work on subject was made clear by Chairman Doerfer in speech at Sept. 12 luncheon of Radio & TV Executives Society in N. Y., attended by most commissioners. If Congressional action ("as distinguished from a Congressman's action") were imminent, he said, FCC would hold up. However, he noted, pay TV has been pending before Congress for 4 years without action and "there comes a time for decision" and "we cannot have progress without definiteness."

Doerfer reiterated Commission's eagerness to preserve free TV, and other commissioners' attitudes indicate any test would be very carefully circumscribed.

Drawing on his long experience with utility regulation, Doerfer also warned wired pay-TV entrepreneurs that there's probability of govt. regulation—even though they may now be exempt.

"Historically," he stated, "few business enterprises which use public highways for a substantial portion of their plant investment and charge the public for a service have escaped regulation. Witness the experience of the telephone companies, the power companies, the gas & pipeline companies and the motor carriers . . . Anyone who envisions huge profits in wired TV had better look over his shoulder. That warm feeling of a golden glow may merely be the hot breath of regulation." (For Bartlesville, Okla. cable-TV progress and other closed-circuit developments, see p. 9.)

ANTENNA FARMS BECOMING A PATTERN: Recent broadcasting-aviation-govt. agreement to limit most future tall TV towers to specially designated antenna farm areas (Vol. 13:22-23) is quietly being implemented by Washington airspace panel, the intragovernmental agency which screens proposed tower locations for possible aviation hazards.

Guided by criteria established by Joint Industry-Govt. Tall Structures Committee (JIGTSC), the panel in recent actions has been designating farm areas—common antenna sites—for communities on a case-to-case basis as tower applications come up.

Disposing of year-old requests for different antenna farm locations by KRON-TV and KGO-TV, (Vol. 12:32-33), the panel this week selected site for San Francisco's antenna farm—choosing KRON-TV's San Bruno Mt. site over KGO-TV's proposal for Mt. Sutro. Both stations had made unusual proposals for single structures which could support antennas of all stations in city.

Willingness of both aviation and telecasting interests to compromise made possible the solution of San Francisco problem. Aviation people weren't keen on either proposed site—but no others were available, and they chose San Bruno as lesser of 2 evils. In turn, KRON-TV was willing to move tower slightly from originally proposed location and trim its height somewhat.

Last week the panel designated an antenna farm site for Columbia, S. C., approving 1522-ft. tower for WIS-TV approximately 18 mi. northeast of city. Panel spokesmen say that first approved tall tower in any location will set precedent, and subsequent antennas to serve same communities generally will have to be constructed in same area.

FCC is expected soon to approve its proposed rule—pending for 1½ years—requiring future tall antennas to be located in farms wherever possible (Vol. 12:13, 27). Commission had withheld

Published every Saturday, with TV Factbook Numbers (53rd and 54th issues) issued in February and August and AM-FM Directory (55th issue) published in January, by Radio News Bureau, Wyatt Bldg., Washington 5, D. C. Sterling 3-1755. Subscription rates: Weekly Television Digest Only, \$75 per year; Full TV Subscription, \$100 per year; Full TV plus AM-FM Subscription, \$150 per year. Application for second class mail privileges pending at Post Office, Washington, D. C. COPYRIGHT 1957 BY RADIO NEWS BUREAU

action pending JIGTSC agreement on tall-tower criteria. But FCC rule or no, airspace panel is already enforcing the criteria and designating farm areas.

KRON-TV's tower on San Bruno Mt. will be history-making structure. Measuring 734-ft. from tip of antenna to ground and rising 2049-ft. above sea level, it will have platform at 564-ft. level capable of supporting 12 TV transmitting antennas.

KRON-TV will invite all other San Francisco stations to locate on new tower. To be built by Ideco, tower together with new antenna will cost about \$1,400,000, take 6-12 months to build.

COMMERCIAL SPONSORSHIP of educational TV programs to improve their "quality & status" is objective of new Organization for National Support of Educational TV (ONSET), headed by pres. Edward L. Ryerson of Chicago Educational TV Assn.

Former chairman of Inland Steel Co., Ryerson said in announcing ONSET's establishment Sept. 10 in Chicago that "appropriate patrons" from business world are needed if educational TV is to realize its potential. Sherman H. Dryer of Sherman H. Dryer Productions, an ONSET director, added that such sponsors would exercise no control over program content.

Ryerson said his group will offer help to existing educational TV agencies in strengthening programming and broadening financial resources.

Other ONSET directors are CETA exec. director John W. Taylor, Robert L. Foote of law firm of Sidley Austin Burgess & Smith, chairman Irving B. Harris of Science Research Assoc.

"During the early stages of educational TV," Ryerson said, "viewers are attracted through sympathy with its potential for the public good. As the movement progresses, however, this potential must be realized in programs of increasing significance and production quality.

"ONSET is the outgrowth of experience in production of educational programs financed through industrial grants and was formed in recognition of the fact that there should be an organization established devoted to developing educational programs and to matching such programs with appropriate patrons." Dryer said:

"By financing on a national basis with patrons from the business world, through the facilities of educational TV, ONSET hopes to advance significantly the quality & status of educational TV programming, both on educational stations and as a public service of commercial stations."

Such patrons, Dryer explained, would be accepted only on ONSET's invitation to participate.

Educational TV's future is in closed-circuit classroom instruction rather than in broadcasting studios, asst. v.p. & treas. John K. Weiss of Ford Foundation's Fund for Advancement of Education says in Sept. 14 *Saturday Review*. It's a "natural development," Weiss writes, because "broadcast time is so expensive, and the mass transmission of educational material so hard to administer." But he thinks commercial broadcasters, cooperating with educators, will continue to help answer "chronic problem of American education: growth [of numbers of students] by geometric progression."

Record closed-circuit network of 170 theatres in 127 cities is already scheduled for Sept. 23 theatre-telecast of Robinson-Basilio bout, and requests from more theatres are still being received, Theatre Network TV reports.

NTA is paying \$650,000 for 75% of KMGH-TV, Minneapolis (Ch. 9), according to application for transfer filed with FCC this week (Vol. 13:34). Seller is United Television Inc. (Sy Weintraub, pres.), which in 1956 sold 25% of station to Loew's Inc. for about \$750,000 (Vol. 12:44). In acquiring 75%, NTA also takes over these assets: \$662,500 due from Loew's Inc.; \$318,750 debentures of United Television; \$152,500 in demand notes. As of June 30, station had deficit of \$634,536, total assets of \$1,195,142. For 4 months ended June 30, station's net loss was \$163,610 on gross income of \$288,884; loss for May totaled \$35,730; loss for June \$42,306. NTA, meanwhile, is negotiating for other TV station properties, including Newark-New York's WATV, and agreement on \$3,500,000-\$4,500,000 sale is expected to be reached soon. Also said to be subject of NTA negotiations are Denver's KTVR (on which Loew's has option to buy 25%) and Milwaukee's WITI-TV.

TV is heavy favorite as advertising medium for automobiles, according to survey of dealers, shoppers & buyers for NBC by Advertest Research. Results of 4500 interviews in 39 states & D. C. showed 56%-60% preference for TV commercials over newspaper & magazine ads for cars, although automotive industry spends little more than third of advertising budget on TV. Asked what kind of national advertising does "best job," 69.6% of dealers picked TV over newspapers and magazines. Asked what kind did most to "get you interested in looking," 45.3% of shoppers listed TV, 16.4% magazines, 10.8% newspapers. Asked what kind "made you most interested in buying," 39.7% of purchasers chose TV, 17% magazines, 11.4% newspapers. Increase in TV advertising was recommended by 55.6% of dealers, while only 2.7% suggested cutback.

"Dangerous lives" are led by networks, NBC pres. Robert W. Sarnoff told NBC-TV affiliates meeting Sept. 13 in N. Y., citing such hazards as Congressional investigations, ASCAP-BMI litigation, pay TV. "Some attacks on networks are founded on business rivalry," he said. "Others reflect the attitude that anything big is bad, and if it's big and also popular, it's even worse. Still others arise from a lack of knowledge of how a network functions." But Sarnoff concluded "we need not fear dismemberment" so long as public has understanding of "how & why we operate."

Enthusiastic tribute to National TV Week is theme of "Topics of The Times" column in Sept. 11 *N. Y. Times*. It states: "Watching TV hour after hour is by now a well established habit, not infrequently accompanied by a guilty feeling . . . Why should there be such a feeling? Is it not that TV introduces us to many interesting people, interesting because of their actions or utterances? Would anyone on either side of the Atlantic dispute the fact that TV could and should be, and often is, an opportunity to extend our knowledge and experience . . . ? None, the way we see it."

Personal Notes: Robert W. Sarnoff, NBC pres., will receive American Legion's Americanism Award at Atlantic City convention Sept. 17 for "vision & leadership in launching the NBC educational TV project" . . . Robert H. Hinckley, ABC v.p., elected to AB-PT exec. committee . . . Arthur W. Carlson, ex-radio WDGY, Minneapolis, appointed ABN station research specialist . . . Wm. Wood, ex-educational WTVS, Detroit, now teaching TV news & public affairs at Columbia U's graduate school of journalism, named TV-radio director of Crusade for Freedom public information dept. . . . Knox Manning, 1950-51 pres. of AFTRA and news broadcaster & commentator in Hollywood since 1937, appointed special asst. to Henry Kearns, Asst. Secy. of Commerce for International Affairs . . . J. S. (Dody) Sinclair promoted to station mgr. of WJAR-TV, Providence . . . George Stantis promoted to program supervisor of KFMB-TV, San Diego, Mrs. Shirley Dixon to traffic supervisor . . . Baylen H. Smith promoted to program director of WISN-TV, Milwaukee; James Van de Velde to production director, Mel Quinn to public service director, Patt Barnes to farm director . . . Gene Lewis, ex-KCEN-TV, Temple, Tex., named sales mgr. of KFDA-TV, Amarillo; George Davis, ex-Da-Cal Sales, Aurora, Ill., local sales mgr. . . . Walter (Spanky) Reese, ex-WDMJ-TV, Marquette, Mich., and WTVN-TV, Columbus, named production mgr. of WEHT, Evansville . . . Floyd E. Weidman, ex-WEWS, Cleveland, named v.p. & account exec. of Hubbell Adv., same city . . . Wm. H. Fineshriber Jr., ex-TPA & NBC, joins Screen Gems as international operations director, headquartering in N. Y. . . . Phil Cowan resigns as Screen Gems publicity director to form own Phil Cowan Assoc. . . . Michael M. Sillerman, exec. v.p.; Leon Fromkess, production v.p., and Bruce Eells, western div. v.p., elected directors of TPA; Walt Plant named central div.

v.p., Kurt Blumberg sales coordination v.p. . . . Myron Elges, ex-ABC, joins TPA sales dept., assigned to northern Cal. & northwest; John Morgan transfers from midwest to southern Cal. . . . Louis J. Aurelio, ex-Paramount Pictures, named NTA div. mgr. for Chicago, Milwaukee, Minneapolis, Detroit . . . Wm. Gargan Jr., west coast sales mgr. of Van Praag Productions, moves Oct. 1 to N. Y. to head up national sales . . . Alfred J. Stalker appointed west coast operations director of station broker Kidder, Peabody & Co., headquartering in Los Angeles; he'll become gen. partner Jan. 1 . . . Frank Tuoti promoted to research, sales promotion & adv. director of WPIX, N. Y. . . . Wm. E. Coyle, public relations, promotion & adv. director of WRC-TV & WRC, Washington, also named WRC-TV sales director, succeeding Joseph W. Goodfellow, promoted to station mgr. of WRC . . . Ben B. Baylor Jr., ex-WANE-TV, Ft. Wayne, joins Triangle Publications as station mgr. of WNHC-TV & WNHC, New Haven-Hartford; Frank Palmer appointed gen. mgr. of WFBG-TV & WFBG, Altoona; Joe Zimmerman promoted to gen. mgr. of WLRB-TV, Lebanon, Pa.; Edward Scala named sales development director of WFIL-TV & WFIL, Philadelphia . . . Theodore H. Cook Jr., ex-sales mgr. of Westbury Electronics and Tarc Electronics, named asst. mgr., broadcast TV equipment sales, Foto-Video Labs, Little Falls, N. J.; C. E. Underwood promoted to production mgr., Foto Products div.

Obituary

Howard W. Rapport, 49, TV-radio supervisor of Tatham-Laird Inc., Chicago, died following heart attack Aug. 31 at home there. He joined Tatham-Laird 7 years ago after work with Dorland Inc., N. Y.; Graceman Adv., Hartford; Celotex Corp., Chicago.

ADVERTISING AGENCIES: New agency—Keyes, Madden & Jones Inc.—will be formed Oct. 1 as successor to Russel M. Seeds Co., Chicago, Freeman Keyes continuing as chairman. Others in new partnership are pres. Edward D. Madden, ex-International Latex & McCann-Erickson, and exec. v.p. Howard A. Jones, ex-Grant Adv., Lord & Thomas and Blackett, Sample & Hummert. David Hale Halpern, ex-Joseph Katz & Biow, will be senior v.p. & mgr. of N. Y. office at 4 W. 58th St. New office also will be opened in Hollywood . . . Hendrik Booraem Jr., ex-C. J. LaRoche, joins Ogilvy, Benson & Mather as a v.p. & TV director . . . Gene Fox resigns as v.p. & western broadcast director of Foote, Cone & Belding, Los Angeles . . . Kenneth L. Walter, ex-General Foods & Fleishmann Distilling, named Brand Names Foundation business mgr.; Fred B. Newell Jr., ex-Orr's dept. stores, Easton & Bethlehem, Pa., and John Wanamaker, N. Y., appointed retail relations director.

AP Radio & TV Assn. elects 8 radio station representatives to fill vacancies on 16-member board: Tom Eaton, WTIC, Hartford; Jack Shelley, WHO, Des Moines; James M. Gaines, WOAI, San Antonio; John R. O'Meallie, WSMB, New Orleans; Nathan Lord, WAVE, Louisville; Richard O. Lewis, KTAR, Phoenix; Wm. W. Grant, KOA, Denver; Ken Nybo, KBMY, Billings.

NBC Radio affiliates executive committee elects 5 new members: Ray Welpott, WKY, Oklahoma City; Douglas Manship, WJBO, Baton Rouge; Wm. Grant, KOA, Denver; Kenneth Hackathorn, WHK, Cleveland; Willard Schroeder, WOOD, Grand Rapids.

Advertising Federation of America opens new Washington office at 734 15th St. NW, headed by Wm. P. Tidwell.

Top IRE honors for 1958, announced Sept. 11, will go to GE v.p. Dr. W. R. G. Baker, who receives special Founders Award, and consultant Dr. Albert W. Hull of GE Research Lab, who receives Medal of Honor. Dr. Baker will be cited at IRE convention next March in N. Y. for "wise & courageous leadership in the planning & administration of technical developments" in electronics, Dr. Hull for "outstanding scientific achievement and pioneering inventions & developments" in electron tube field. Other IRE honors: Stanford U professor Edward L. Ginzton, Morris Liebmann Memorial Prize for "creative contribution" to microwave applications; FCC chief engineer Edward W. Allen Jr., Harry Diamond Memorial Award for "technical & administrative contributions" to radio spectrum utilization; Ampex engineer Charles P. Ginsburg, Vladimir K. Zworykin TV Prize for "pioneering contributions to the development of video magnetic recording." New IRE prize—Scott Helt Memorial Award, named in memory of late patent administrator of DuMont Labs—will be given for best paper published in *Transactions*.

Robert F. Lewine promoted to NBC v.p. for TV network programs, reporting to Manie Sacks, who takes title of v.p. for TV network talent & programs, in executive realignment which also brings these changes: Alan D. Courtney named nighttime program director; Julian Bercoveci & Joseph P. Cunneff, nighttime program operations mgrs.; Ernest V. Theiss, nighttime program administration mgr.; David Sontag, nighttime program services supervisor; Carl Lindemann Jr., daytime program director; Robert F. Aaron, daytime program administration mgr.; Frederick L. Wilson, daytime program operations mgr.; John C. Greene, daytime program services supervisor; Thomas O. Loeb, special program director.

PHILCO'S bitter attack on RCA-NBC in protest against renewal of license of NBC's WRCV-TV, Philadelphia, and scathing response it evoked (Vol. 13:33, 35), were weighed in RCA-NBC's favor this week when FCC denied protest, renewed license.

Commission said Philco "fails to make any showing as to the probability of substantial immediate injury to Philco if the protested grant is made final. The NBC Philadelphia station, to the extent profitable, will aid NBC financially, and thus indirectly increase the profits of NBC's parent RCA, with which Philco is in competition in another line of commerce. But certainly this is not enough to give Philco standing, any more than it would give standing to a manufacturer of washing machines—a product of another subsidiary of RCA."

Regarding Philco's complaints about NBC's "must buy" practices, etc., Commission said: "It is clear that Philco would be in exactly the same position if NBC owned no station in Philadelphia and its programs were carried over an independently owned affiliate"—even assuming practices did injure Philco.

* * * *

Commission made progress with several complicated contested cases. In 100-page supplementary initial decision, examiner Herbert Sharfman reaffirmed recommendation of grant of WJRT, Flint (Ch. 12), rejecting objections to WJRT's selection of site near Saginaw.

Grant of WPST-TV, Miami (Ch. 10) was again affirmed, Commission turning down opponents' claims of grantee's financial disability, etc.

KVI's plea that grant of KIRO-TV, Seattle (Ch. 7) be held up because of procedural errors was turned down; KXA's is still pending.

CPs granted: KOPR, Butte, Mont., Ch. 6; Ch. 83 translator in Globe, Ariz., Ch. 71 in Cedarville, Cal. Three CPs were turned in: KOLF-TV, Flagstaff, Ariz. (Ch. 9); KSEI-TV, Pocatello, Ida. (Ch. 6); KAMT-TV, Alpine, Tex. (Ch. 12).

KTVX (Ch. 8) was authorized change from Muskogee to Tulsa, increase to full 316-kw, while WNDU-TV, South Bend, Ind. was granted shift from Ch. 46 to Ch. 16.

Plans to deny requests to commercialize Ch. 2, Longview, Tex., were announced—in "instructions to staff."

— ■ —

Another magazine attack on FCC came this week, Sept. 19 *Reporter* supporting salvo fired by Sept. *Harper's* (Vol. 13:35) with barrage aimed at alleged lack of public interest displayed by commissioners. "The FCC—Who Will Regulate the Regulators?" is title of *Reporter* article by Robert Bendiner, who says "FCC appears to have only a reluctant & apologetic interest in the particular law it administers." Bendiner thinks that recent FCC vacancies "have successively been filled by men to whom the whole idea of regulation is clearly as distasteful as integrated swimming pools to a Daughter of the Confederacy."

NAFBRAT complaint to FCC charges KCOP, Los Angeles (Ch. 13), "has consistently and repeatedly violated minimum program standards," citing children's programming, advertising and alleged bias in news broadcasts. Jack Heintz, KCOP v.p. and gen. mgr., termed charges "complete surprise" and added "we are carefully studying the complaint." He said many of the programs listed in complaint, aimed at revocation of station's license, are movies carried on some 200 other TV stations. KCOP is being sold to Kenyon Brown, Bing Crosby, George L. Coleman & Joseph A. Thomas for \$4,000,000 (Vol. 13:34).

Radio station sales and transfers approved by FCC: KTBS, Shreveport & KTBS-FM by owners of KTBS-TV (E. Newton Wray, pres.) for \$200,000 to B. R. McLendon and associates (Vol. 13:34) . . . WTMV, E. St. Louis, Ill. by On The Air Inc. (WGBF, Evansville) for \$212,500 to Robert W. Day (90%) & Donald H. Richardson (13:33) . . . KMLB, Monroe, La. by Melba Liner Gaston & J. C. Liner III for \$105,000 to WSTV-TV, Steubenville (Ch. 9), part of Friendly Group (Vol. 13:31) . . . KSON, San Diego, by C. Fredric & Dorothy Rabell (keeping KSON-FM) to Jack O. Gross in deal involving swap of KSON for Gross' KXOC, Chico, with Rabells also getting \$60,000 (Vol. 13:32) . . . KHAM, Albuquerque, by Rex A. Tynes for \$50,800 to ½ owners KHAM mgr. J. L. Anderson and Carl Hedges and son Carl (Vol. 13:34).

Radio station sales & transfers reported this week: WNGO, Mayfield, Ky. by R. B. Ligon (92%) and gen. mgr. T. E. Brewer (8%) for \$120,000 to Charles W. Stratton and H. D. & Mose Bohn, who will drop WKTM there . . . WRAD, Radford, Va. by educator Perry E. Gresham & Alice Gresham for \$95,000 to Dix family's *Wooster* (O.) *Record*; Raymond E. Dix and 3 other members of family also hold 7.5% of WTRF-TV, Wheeling, 8.8% of radio WWST, Wooster . . . WFMF (FM), Chicago, with functional music service by Field Enterprises for about \$100,000 to Chicago attorney Maurice Rosenfield.

FCC is assailed by Senate Small Business Committee in Sept. 11 report accusing it of failing for 12 years to act on requests by daytime radio broadcasters to operate beyond present sunrise-to-sunset limits. Based on hearings by subcommittee headed by Sen. Wayne Morse (D-Ore.), report says that instead of resolving issue FCC has been "ignoring it and hoping it will go away." Committee calls FCC's explanations of delays in acting "half-hearted" and "unsatisfactory," threatens to recommend legislation by Congress itself unless Commission moves promptly, adds that it "has absolutely no quarrel with clear-channel stations" which oppose daytimers' demands.

Check for \$3500 for new tower & antenna equipment to help start WGTE-TV, Toledo (Ch. 30, educational) has been given to Greater Toledo Educational Foundation Inc. by Edward Lamb, whose Unity Corp. Inc. lost initial FCC decision in contest for Ch. 11 there (Vol. 13:12). In letter to Foundation secy. Dr. E. L. Bowsher, Lamb said he's "great advocate of educational TV," wants WGTE-TV to have "great success." Lamb won renewal of license for his WICU, Erie, in June after long FCC fight (Vol. 13:24), holds CP for WMAC-TV, Massillon, O. (Ch. 23), operates radio WHOO, Orlando.

Strike by IBEW against *St. Louis Post-Dispatch* and *Globe-Democrat* shut newspapers last week end and forced *Post-Dispatch's* KSD-TV off air when TV & radio engineers refused to cross picket lines. Radio KSD continued broadcasting from auxiliary facilities in E. St. Louis, Ill. Walk-out by maintenance electricians at newspaper plants was settled Sept. 9 by acceptance by union of 2-year contract with wage increases of 18¢ per hour first year and 12¢ second year. IBEW had demanded 35¢ package.

Closed-circuit TV boom—"writing a new & spectacular chapter in the history of electronic communication"—is described by FCC in general information bulletin (Mimeo No. 49583) issued Sept. 10. Survey cites closed-circuit uses in medicine, education, industry, entertainment, politics, includes explanation of "What CC-TV Is and How It Works."

Color TV seminar on equipment & techniques will be conducted Sept. 19-20 by RCA for west coast telecasters at Clift Hotel, San Francisco.

New and Upcoming Stations: Philadelphia educational station WHYY-TV (Ch. 35), on equipment tests since Labor Day, begins programming Sept. 16 on Mon.-Fri. 9 a.m.-3:15 p.m. schedule. Delayed for a year by financial troubles since first test pattern went on air last Oct., it becomes 27th non-commercial educational outlet. It's owned by corporation comprising educational and cultural institutions in area, with Wm. Goldman as pres. Richard S. Burdick, ex-WUNC-TV, Chapel Hill, N. C., is managing director.

The new starter brings on-air box score to 509 (90 uhf). It has 12½-kw RCA transmitter and 500-ft. Blaw-Knox tower at 17th & Sansom Sts., site of WHYY-FM. Offices and studios are in former WCAU-TV & WCAU studios at 1622 Chestnut St.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WINR-TV, Binghamton, N. Y. (Ch. 40) has space nearly ready for 25-kw RCA transmitter, begins wiring up shortly, has Oct. 15 target for test patterns and starts programming with NBC-TV shortly thereafter, reports gen. mgr. Dale Taylor. Owner is *Binghamton Press* (Gannett), which bought CP with radio WINR from Mayor Donald W. Kramer and associates (Vol. 13:2). Sept. 20 is target for installing 52-gain pylon antenna on 398-ft. tower. Base hourly rate is \$300. Rep is Hollingbery.

WBOY-TV, Clarksburg, W. Va. (Ch. 12) has set Oct. 27 target for start with NBC-TV and ABC-TV. It has requested change to 25-kw RCA transmitter and 860-ft. tower & antenna at site on Pinnickinnick Mt. It's part of Friendly Group (Jack N. Berkman, pres.), operator of WSTV-TV, Steubenville, O. (Ch. 9) and KODE-TV, Joplin, Mo. (Ch. 12). Base hour will be \$250. Rep will be Avery-Knodel.

KXLJ-TV, Helena, Mont. (Ch. 12), to be low-power satellite of parent KXLF-TV, Butte (Ch. 4), hasn't changed fall target, reports pres.-gen. mgr. Ed Craney. Fisher 80-ft. tower is ready for RCA 2-bay antenna. Construction of studio-transmitter building is well under way, and 250-watt Sarkes Tarzian transmitter is due Sept. 20, to be installed Oct. 1. Barclay Craighead, from radio

Three new Cuban TV stations—owned and operated by newly reorganized CMBF Cadena Nacional network—are now under construction and are scheduled to be on air in next 90 days. New stations, in Santiago (Ch. 5), Holguin (Ch. 8) & Ciego de Avila (Ch. 2) will bring number of outlets in CMBF network to 7. New network took over facilities of defunct Television Nacional network, combining them with Goar Mestre's all-film CMBF-TV, Havana (Ch. 7). Latter station switched to Ch. 4. CMBF Cadena Nacional stock is owned 50% by Cuban RCA distributors Julian Lastra & Miguel Humara and Jose I. de Montaner, publisher of Havana newspaper *Informacion*—former owners of Television Nacional. Another 25% is held by Havana contractor Alberto Vadia, the remaining 25% by Goar, Luis Augusto & Abel Mestre, principal owners of competing CMQ network. CMQ & CMBF jointly own Cuban microwave system, claimed to be largest outside U. S. New gen. mgr. of CMBF-TV network is Alberto Hernandez Cata, formerly in charge of advertising operations for Sterling Products International in Cuba, Mexico & Brazil. CMBF-TV network is represented in U. S. by new Latin American Networks Co. (510 Madison Ave., N. Y.), headed by Vicente Ramos, ex-TPA.

KXLJ, will be resident mgr. It will be sold as bonus with KXLF-TV, which has \$200 base hour. Rep is Walker.

WSUR-TV, Ponce, P. R. (Ch. 9) now has Oct. 15 target, reports gen. mgr. Mariano Angelet Escudero for owner Perez Perry, operator of radio WKVM, San Juan, also holding CP for WKBM-TV, Caguas (Ch. 11). It has Adler transmitter and 200-ft. Lehigh tower with RCA antenna on Mt. Maravilla. Base hour will be \$150. Rep will be Pan American Bestg.

KUED, Salt Lake City (Ch. 7, educational) has had to postpone Oct. 1 target, pending completion of 140-ft. Ideco tower, reports mgr. C. Richard Evans. RCA 5-kw transmitter is wired and ready, studio is 50% completed. RCA 6-section antenna is to be shipped Sept. 6.

WMVS-TV, Milwaukee (Ch. 10, educational), is wiring 10-kw RCA transmitter and expects to start in Oct. with programming, reports operations mgr. Paul K. Taff for owner Board of Vocational & Adult Education. Alford 4-bay antenna has been installed at 700-ft. level of WITI-TV tower.

WIPR-TV, San Juan (Ch. 6, educational) started equipment tests of 25-kw RCA transmitter Aug. 30, plans Nov. 3 programming, reports gen. mgr. R. Delgado Marquez for Puerto Rico Dept. of Education. It has 6-bay RCA antenna on 200-ft. Blaw-Knox tower at site of elaborate TV-radio plant 15-mi. from San Juan.

CKRN-TV, Rouyn, Que. (Ch. 4) now plans to start Nov. 15, reports pres. David A. Gourd. Work has begun on first floor of studio-transmitter building, 35-kw GE transmitter and 670-ft. Trylon tower (from Wind Turbine) are scheduled to arrive first week in Oct. GE 4-bay antenna is scheduled for installation third week in Oct. Base hour will be \$160. Reprs will be Weed and Joseph Hardy & Co.

Facility changes: KSIX-TV, Corpus Christi, Tex. (Ch. 10) to 316-kw Sept. 12; KGBT-TV, Harlingen, Tex. (Ch. 4) started operating from new site near LaFeria, Tex., Sept. 10, using 5-kw transmitter.

WMBD-TV, Peoria, Ill. (Ch. 31), due in Jan., names Peters, Griffin, Woodward Inc.

RCA shipped pylon antenna Sept. 11 to upcoming WINR-TV, Binghamton (Ch. 40).

Teleprompter devices provide "Sure Cure for Stage Fright," according to title of article by Rufus Jarman on speech-aiding achievements of company and pres. Irving B. Kahn in Sept. 14 *Saturday Evening Post*. Jarman reports devices are becoming "as familiar on the speakers' rostrum as the old water pitcher used to be," that Kahn hopes they'll help make all speakers "eloquent, witty, poised and self-possessed, unlimited in vocabulary, and skilled in the graceful execution of forceful gestures."

"Non-commercial sponsorship"—purchase of time to keep commercials off TV—has been approved by Motion Picture Assn. for March 1958 Academy Awards telecast on NBC-TV. MPAA pres. Eric A. Johnston and Motion Picture Academy pres. George Seaton disclosed that movie company presidents had agreed to contribute ¼% of annual gross domestic film rentals—principally to keep commercials out. Oldsmobile sponsored last 4 telecasts.

Broadcasters' Promotion Assn. holds second annual convention Nov. 1-2 in Sheraton Hotel, Chicago, with Ell Henry of ABC, Chicago, as chairman. Seminars, with moderators: "Trade Paper Advertising," Joe Zimmermann, WFIL-TV & WFIL, Philadelphia; "On-Air Promotions," Gene Godt, WCCO-TV, Minneapolis; "Sales Presentations," Charles Wilson, WGN-TV & WGN, Chicago.

BARTLESVILLE "Telemovie" closed-circuit TV project entered second week with 6 installation crews still running about 2 weeks behind schedule in hooking up homes for service—and owner Video Independent Theatres claiming almost uniformly favorable comment by subscribers.

Next week VIT begins setting up its "third channel"—music and news. The 2 channels now in operation carry first-run and not-so-recent movies, respectively. Unique specially designed equipment for Ch. 4 is now being shipped by Foto-Video Labs, Little Falls, N. J. Third-channel gear includes vidicon camera chain and special control panel, permitting virtually unattended operation. While background music is fed to subscribers' homes on new channel, vidicon camera will be trained on clock and instruments showing temperature, humidity and barometric pressure, while a news scroll trails across screen. Virtually only human assistance needed by equipment is changing of news tapes every 15 minutes.

Meanwhile, there were these other developments in the closed-circuit TV picture this week:

Latest big-city franchise application was made in Washington, D. C., where owners of WOL-AM-FM applied to D. C. Commissioners for permission to install closed-circuit equipment to present "feature films, Broadway plays, operas, concerts and outstanding sporting events"

Telecasting Notes: What's wrong with television? Alistair Cooke, master of ceremonies of *Omnibus* and chief U. S. correspondent of *Manchester Guardian*, gave his own novel and refreshing analysis in John Crosby's Sept. 11 *N. Y. Herald Tribune* column. Differing with Crosby's other "guest columnists" who lambasted TV for its program content, Cooke said: "TV is a medium of communications, no more and no less culpable in itself than the invention of printing" . . . But Cooke does have one real gripe about TV. "What is wrong with TV," he said, "is that at the moment the image, the picture you see, is fit only for visual morons . . . It cannot cope with the slightest chiaroscuro. It cannot safely discriminate an animal from a vegetable or a mineral in anything further than a medium shot. We have a noticeably worse image than the British and the French. And I am shocked to hear, from a Republican of certified loyalty, that the Russians have the best image of all" . . . "Now here is really something for the Senate to investigate," says Cooke. "For it surely must have something to do with the control of patents; with the overproduction of millions of the huge ugly boxes we call TV sets; with our cheerful, all-American skimping on fundamental research. Once we can see what's going on, once we can distinguish a tray of pepper grains from the Confederates advancing at Bull Run, that will be the time to start up the debate between *I Love Lucy* and *Oedipus Rex*. Till then, I am paging Sen. Kefauver" . . . TV's "intellectual ghetto" is Sunday afternoon, writes *Variety* TV-radio editor George Rosen in Sept. 11 issue, pointing to these past, present & future "enlightenment programs" tarred by the "Sunday stigma": *7 Lively Arts, Adventure, Odyssey, Search, Last Word, Omnibus, Wide Wide World*. He pleads with networks to slot at least one such show in prime evening time, where it can get respectable ratings—and a sponsor . . . When it comes to big-money giveaways, no salable by-product is wasted. Now Entertainment Productions Inc. (*\$64,000 Question*, etc.) and film producing TPA have joined to produce *Turning Point*, 30 min. series based on private lives of big-money winners (and losers)

on a monthly charge basis. Group didn't specify whether it wanted exclusive or non-exclusive franchise, said it had begun preliminary discussions with telephone company about installation of "the necessary wires."

A committee of California's state legislature held preliminary hearings in Los Angeles to determine if state should regulate local pay-TV franchises. Representatives of Telemeter, Skiatron and Jerrold argued that matter should be handled locally, and committee members decided they needed more information, would hold further hearings.

Majority of film industry fears implications of closed-circuit fee TV, commented experienced movie reporter Fred Hift in excellent size-up of that industry's reaction in Sept. 11 *Variety*. He summed up:

"There is a tendency in the trade to brush off Bartlesville as meaningless, though dangerous. Yet, even in the film business, there are those who predict that the concept of electronic distribution of film will eventually supersede present-day thinking. Primarily, however, they hold, it is the service-in-the-home logic that will eventually revolutionize the business and bring it into line—regardless of turmoil and economic upheaval—with the changed needs of the audience."

Microwave relay from St. Louis in 200-mi. multi-hop community TV system operated by Black Hills Video Corp. with Philco equipment will link Poplar Bluff & Dexter, Mo., and Paducah, Ky. early in fall.

on quiz shows . . . Widely-praised scoop for ABC-TV: last Sunday's top-of-the-news interview with Ark. Gov. Faubus—to be followed up this week end by special Mike Wallace interview with the governor . . . Philip Morris renews *Mike Wallace Interview* on ABC-TV for 13 weeks, changing time to Sat. 10-10:30 p.m. . . . First N. Y. newspaper to sign major TV sponsorship deal is *N. Y. Times*, buying one-fifth of 9 National Football League football games on WCBS-TV beginning Sept. 29 . . . Guild Films has acquired the 1200 RKO shorts from C&C TV; they go into TV distribution immediately . . . Biggest TV film producer, according to Sept. 11 *Variety*, is now MCA's Revue Productions, with 16 series in works on total budget of some \$25,000,000. Desilu, formerly in first place, is now No. 2, though it has 17 series; Screen Gems is third . . . Record high in renewals of a syndicated property, according to Ziv: 97% of sponsors have renewed *Highway Patrol* for its third year . . . Reruns of *4-Star Playhouse*, originally seen on CBS-TV, have grossed nearly \$3,500,000 . . . MGM's total take from TV rentals of its feature library: \$43,000,000 . . . Color coverage of college football games planned by NBC-TV: Army-Navy, Oklahoma-Notre Dame, 2 Big Ten games.

Telecasting took \$9,500,000 of Westinghouse's \$35,000,000 ad budget in 1956, exec. v.p. Mark W. Cresap Jr. told Baltimore Advertising Executive Club Sept. 12 at luncheon held in connection with week-long ceremonies marking official change in call letters of Westinghouse's newly acquired WJZ-TV (formerly WAAM). Attending special program climaxed huge local build-up were most top Westinghouse executives, ad agency personnel, industry trade press, TV stars, etc.

Kindergarten French will be taught this fall over educational WCET, Cincinnati, in schedule of courses running 30 hours per week—doubling last year's programming. Other TV courses for pre-school children, children in classrooms and adults in homes include music, art, biology, economics, drama, automobile driving.

PHILCO CLAIMS BIGGER SHARE OF SMALLER MARKET: Sitting down this week with Philco's top executives in Philadelphia and analyzing the TV market, we found them with 2 firm convictions: (1) Industry won't sell the much-predicted 7,000,000 sets, but it will be a good year, nonetheless. (2) Philco is getting greater share of the market than last year, and its TV profits are showing it.

"Factory sales of 6,500,000 would be more accurate, and that's not a bad year," asserted pres. James M. Skinner Jr.

Buttressing Philco's cautionary word is unofficial estimate that Aug. retail sales dropped to 550,000 from 581,000 in Aug. 1956. But inventories at all industry levels were estimated at 2,400,000, slightly below Aug. 1956.

Elaborating on Philco's sizeup for 1957, John M. Otter, exec. v.p.-marketing, said there just isn't enough time left to reach 7,000,000. "Look at the figures," he said. Here's what they show:

Retail sales in first 8 months are estimated unofficially at 3,787,000; that leaves 3,213,000 -- better than 800,000 per month -- to be sold to reach 7,000,000. Last year's retail sales in final 4 months were 2,965,065, so if 1957 matches that pace the year-end total would be about 6,752,000. In 1955, final 4-month sales were 3,249,945; if that pace can be matched, a 1957 total of more than 7,000,000 would be certain. In 1955, retail sales ran this way: Sept. 978,838; Oct. 746,274; Nov. 591,366; Dec. 933,467.

Philco's top echelon reported enthusiastic reception of TV line, said factory is hard pressed to keep up with orders on some models. They emphasized belief Philco is garnering larger share of market than last year. Skinner also pointed out that Philco inventories were in good shape -- and he added that this is generally true of the industry.

Philco is in good position profit-wise, as well as volume-wise, said Larry F. Hardy, exec. v.p.-consumer products. He told us TV has been in the black since July and "will have a successful year."

* * * *

Less-than-7,000,000 year is forecast also by Frank W. Mansfield, Sylvania director of marketing research, who sees retail sales of 6,640,000 this year, compared with 6,804,783 in 1956. He estimates 1957 retail value at \$1.212 billion vs. \$1.360 billion last year.

This year's portable sales, Mansfield says, will total 2,260,000, table models 2,130,000, consoles 2,165,000, combinations 85,000. Last year's figures: 1,252,380 portables, 2,954,226 tables, 2,518,176 consoles, 80,001 combinations.

Private Label: Record TV production of 754,598 in Aug. (Vol. 13:33-36), the only Aug. to exceed 700,000, with exception of 1950's 720,600, has been attributed to general optimism of setmakers to new lines and firmer market. However, we learn there was unusually high percentage of private label sets produced that month. Private label producers play it exceptionally close to the chest -- so a check among them this week produced no clearcut confirmation or denial of speculation they may be capturing larger-than-usual chunk of the market.

Albert S. Wells Jr., mfg. v.p. of major private label producer Wells-Gardner, tells us business is up about 10% from same period last year -- but he said that production curve has "higher peaks and lower valleys" than usual. Westinghouse, a prime supplier of Montgomery Ward, reports business has been "quite good." TV-radio div. gen. mgr. Edward J. Kelly says that there hasn't been any slack production period; that pattern followed industry; that factory inventories are very low.

Wells-Gardner supplies 8-10 firms, produces mostly 21-in. short-neck 90-degree sets, with prices up slightly because of "quality requirements." Next week, it starts pilot run of 17-in. 110-degree portables.

Spokesman for Sears, Roebuck -- largest merchandiser of private label sets -- said company's buying is usually spread out over year to give manufacturers chance to fit output into regular production schedules.

Spokesman for Montgomery Ward -- also a top merchandiser of private label TV -- told us unit sales are about the same this year as last year. Buying pattern, he said, is to estimate year's business in advance, then give manufacturers firm order for 2 months, followed by renewals for similar periods. Initial order for year probably would be in summer to allow for fall delivery of new line. For 1958 line, he sees about same dollar volume as last year, possible unit increase due to popularity of portables and smaller ticket sets. Prices will be about the same, although some price leaders may be lower.

Production: TV output was 146,288 week ended Sept. 6, compared with 199,954 preceding week and 155,571 in corresponding week one year ago. It was year's 36th week and brought TV production for year to date to about 4,101,000, compared with 4,722,744 in same period of 1956. Radio production totaled 256,292 (58,451 auto) for week ended Sept. 6, vs. 287,190 (83,448) preceding week and 223,303 (47,275) in corresponding week year ago. Radio output for 36 weeks totaled about 9,303,000 (3,531,000) vs. 8,744,383 (2,850,219) in 1956 period.

Topics & Trends of TV Trade: Quarterly meeting of EIA, Sept. 10-12 in Los Angeles, endorsed proposal for industry-govt. long range study of entire spectrum, will select committee to recommend plan. Proposed study would include military & civilian frequencies, would be first such undertaking since Radio Technical Planning Board study in 1944-45. Sen. Potter (R-Mich.) and Rep. Bray (R-Ind.) have introduced resolutions calling for setting up 3-man committee to examine all allocations of radio frequencies (Vol. 13:16, 25, 33).

EIA session also: (1) Voted to change 1958 convention dates from May 14-16 to May 21-23. (2) Scheduled next west coast meeting in San Francisco Sept. 1958. (3) Reviewed report on National TV Week indicating more activity than in previous years and established committee to consider public relations program to promote TV sales. (4) Approved plan for semiconductor standardization program at Syracuse U. (5) Elected Wm. C. Scales, DuMont TV receiver div. sales mgr., to consumer products exec. committee. (6) Authorized marketing data dept. to collect statistics on tape recorder production & sales. (7) Urged membership in Defense Dept. scientific advisory groups be broadened to include industry representatives.

EIA spokesman said considerable attention during meetings was paid to military problems—some brought on by cutback in Defense Dept. budget. However, EIA members were reported to be generally optimistic on both military and TV-radio outlook.

Gen. Edwin W. Rawlings, commander of Air Materiel Command, Wright-Patterson AFB, told Sept. 11 luncheon that the Air Force is spending about \$3.5 billion a year for electronics—nearly 20% of its budget. He said industry's role of supplier to Air Force would continue to grow but that equipment reliability must be improved. He cited recent study reporting "cost of maintaining electronic equipment in the Air Force is about twice as much per year as the first cost of the equipment."

* * * *

Analysis of TV—past, present and future—is provided in excellent editorial, "TV's Fabulous Decade," by Laurence Wray, editor of *Electrical Merchandising* in Sept. issue.

Billion-dollar sales for recorded home music industry—40% in hi-fi—were predicted for 1958 by James M. Toney, v.p. & gen. mgr., RCA Victor Radio and "Victrola" div. At Cambridge, O. ceremonies Sept. 11 dedicating 355,000-sq.-ft. plant capable of turning out 6000 hi-fi sets in 8-hour day, he said hi-fi growth by 1958 will have helped boost "home-music industry's sales by 200% over a period of 5 years, while spending for all recreation was rising by only about 17%." Toney estimated 1958 packaged hi-fi sales at \$407,000,000, records and pre-recorded tapes \$400,000,000, standard phonographs \$140,000,000, tape-recorder-players \$120,000,000, totaling \$1.067 billion. Demand for hi-fi instruments, he said, "has grown almost overnight to enormous proportions . . . we have great confidence that this booming market will continue its growth pattern through the development of new hi-fi products." He cited rising interest in stereophonic sound, saying "certainly stereophonic sound is the direction in which we are moving and since these systems require 2 separate speaker systems, we can expect the average amount spent on hi-fi per customer to increase . . ."

Industry pirating of engineers—particularly electronics & aircraft specialists—from rival firms and college campuses is described in "inside" story by anonymous company recruiter in Sept. 14 *Saturday Evening Post*. Article titled "I Am a Kidnaper of Sorts" details "tricks of talent hunters" for industry. Meanwhile, in Detroit, Midwest College Placement Assn. adopted code of ethics for recruitment of engineering graduates. One rule is that employers mustn't make special payments to third parties (such as college officials) to influence students to take jobs.

RCA has received U. S. Treasury Dept. citation for enrolling more than 52% of its 80,000 employes in 1957 national savings bond program. Mrs. Ivy Baker Priest, U. S. Treasurer, presented award to pres. John L. Burns; citations also went to 20 RCA plants, labs & offices.

Raytheon dealers are being offered group life insurance up to \$10,000 based on number of receiving tubes purchased. Insurance, to be handled through distributors, doesn't require physical examination. If dealer falls below monthly quota he can pay for policy.

GLOBAL TV DEVELOPMENT could be spurred quickly by donations of obsolete but workable U. S. TV sets to people abroad who can't afford to own receivers now, ABC v.p. Oliver Treyz asserted Sept. 9 in unique proposal outlined in speech to Hollywood Ad Club. Quite impressed by cost of foreign sets in terms of average man's income (Vol. 13:36), he said:

"If such a program could be implemented, I think perhaps 10 years from now we might be celebrating not only National TV Week in the United States, but International TV Week—worldwide."

Treyz suggested that "collective cooperation of leading cities throughout the nation" be enlisted in give-a-set program. He cited industry estimates that 5-6,000,000 outmoded small-screen sets are on hand in homes here now, said this stock is ready to be tapped in countrywide campaign.

To his Hollywood audience, Treyz pointed out that in foreign countries—particularly those using American standards—these sets could be used easily as additional outlets to amortize Hollywood programming investment.

"The market is limitless if—and that's a big if—the instrument for getting the story (and picture) is available," he said.

"In West Germany, for example, TV is growing very slowly, because to purchase a set requires a large investment on the part of the German people, who are laboring to restore their nation's as well as their personal economy.

"Our old sets of 15-in. or less—outmoded here, but still in excellent working condition—would be a boon to these people, although adjustments would be necessary to adapt the sets to the local systems not utilizing our American system."

Treyz saw Far East & Middle East—where U. S. TV standards are in general use—as areas where his plan could be applied most readily. "If the public were to donate these small-screen sets to the people of, say, Tokyo, under the leadership of civic authorities, the benefits to all would be immeasurable."

Idea has been cleared with Commerce Dept., which assured ABC-TV no export licensing would be needed to send donated sets abroad, and with State Dept., which said it fits in with U. S. foreign policy.

Median salaries of engineers increased 21% to \$9490 in 1956 from \$7850 in 1952, according to survey by National Society of Professional Engineers. Chemical engineers led median earnings in 1956 with \$11,000, followed by mining & metallurgical, \$10,000; mechanical, \$9780; electrical, \$9460; civil, \$8750. Biggest relative 1952-56 increase was reported by engineers employed by educational institutions, smallest by those employed by federal agencies.

Triple amputee Earl Wilkerson, Memphis, Tenn. says he hasn't come across a TV set yet which he couldn't fix. A 28-year-old Korean War veteran, he lost both legs and an arm in 1953 farm accident. After 37 months in VA hospital, he took TV repair course, passing with better than average marks.

Higher TV prices are noted by Bureau of Labor Statistics Consumer Price Index, which shows June level was 90.1, compared with 89.2 in March and 85.5 in June 1956. Index also reports TV repair costs up to 128.5 in June vs. 126.3 in March and 122.4 in June 1956. Dec. 1952 is base of 100 for both categories.

Trade Personals: Frank M. Folsom, RCA exec. committee chairman, named head of N. Y. Heart Fund campaign . . . Jack S. Parker appointed GE v.p. in charge of public & employe relations; he succeeds Lemuel R. Boulware who will continue as v.p., member of exec. committee and consultant to Parker . . . Loren E. Gaither, ex-Magnavox, appointed communications engineering director of Philco govt. & industrial div. . . . Gerald J. Clarke named controller of Canadian Admiral Corp., continuing as chief accountant & office mgr. . . . James A. Griffin promoted to purchasing agent, GE communication products dept.; Earl E. Ackley named supervisor of materials . . . Jack E. Mounter promoted to western region sales engineer, Corning Glass electronic components dept.; Jack L. Rhodes succeeds him as div. mgr., quality control; John D. Illig becomes production supt., pressware plant, replacing Rhodes; Leon G. Peao succeeds Illig as production supt. of Albion, Mich. plant . . . Lloyd Dopkins, ex-Crosley, Majestic and Zenith, resigns as v.p.-sales, Granco Products Inc., and pres. of subsidiary Granco Sales Corp. . . . Lynn Dickerson, ex-Sparton and Jewel, appointed Capehart merchandiser for southeastern states.

DISTRIBUTOR NOTES: Westinghouse Appliance Sales appoints John W. Vogt as mgr., sales administration . . . Admiral Distributors appoints Joseph I. Nathan as asst. gen. sales mgr. of metropolitan N. Y. div. . . . Interstate Supply Co. (RCA), St. Louis, appoints Robert Clark color TV sales mgr. . . . Graybar appoints W. D. Anderson and W. B. McGhee Jr. as operating mgrs. at Corpus Christi and Jackson, Miss., respectively; J. H. Gordon Jr. as supervisor of Santa Ana, Cal. sub-branch; C. R. Downing Jr. appointed Tulsa mgr., succeeding F. L. Cummings who becomes Denver mgr. . . . DuMont appoints Electronic Service Supply Co., Calgary, as Canadian distributor for land mobile radio equipment . . . Symphonic Radio & Electronic Corp. appoints W. D. Alexander Co., Atlanta.

New lineup in GE distribution finds Hotpoint Appliance Sales Co. (Hasco), reporting directly to Hotpoint div., Chicago. Hasco, with headquarters in Bridgeport, Conn. and about 130 distribution centers throughout the country, has been under GE Supply Co. (Gesco), Bridgeport. Gesco's appliance & TV receiver dept. also is switching from reporting to Bridgeport to GE appliance and TV receiver div. in Louisville. Roy W. Johnson, exec. v.p.-consumer products, says change "will enable Gesco to concentrate on handling complete" GE line of housewares, apparatus and supplies.

Fall sports is theme of "one of largest concentrated ad campaigns" for GE TV sets starting in Sept. 23 *Sports Illustrated*, magazine cooperating in promotion with displays, counter cards, etc. All GE dealers will tie in with promotion and theme will also be featured on TV's *GE Theater*, ads in *Life*, *Saturday Evening Post*, *Reader's Digest*, Sunday supplements.

Service clinics on Sylvania 110-degree sets for 20,000-30,000 servicemen are planned this fall. Robert L. Shaw, TV-radio div. gen. sales mgr., says service experience has "exceeded all expectations" and sets have been "enthusiastically accepted" by servicemen for comparative ease of servicing.

GE TV assembly workers in Syracuse start back to work Sept. 16 following settlement of strike at Allentown, Pa. plant of L. F. Grammes Co. which supplies cabinet trim. About 1880 who were laid off last week are scheduled to return by Sept. 18. Grammes employes accepted 30¢ hourly, 2-year wage package.

Financial & Trade Notes: Officers-&-directors stock transactions for Aug., as reported to SEC: American Bosch Arma—Wm. S. Wasserman sold 1500 through holding company, 300 in trusts, holds 12,400 through holding company, 4669 in trusts, 12 personally. AB-PT—Herbert B. Lazarus sold 900, holds 100. Audio Devices—C. J. Lebel sold 11,000, holds 85,204. Consolidated Electrodynamics—Harold Washburn sold 100, holds 7190. Friden Calculating—L. B. Taylor sold 4000, holds 2950; James A. Trainor sold 400, holds 6300. General Dynamics—J. V. Naish exercised option to buy 7000, holds 7200. Gabriel—Frank M. White sold 500, holds 24,500. GE—F. J. Borch bought 345, holds 1628; Wm. S. Ginn exercised option to buy 1817, holds 3167; Wm. Rogers Herod sold 100, holds 8076; Edwin H. Howell sold 400, holds 1135; Clarence H. Linder bought 2070, holds 8440; Ray H. Luebbe bought 2070, holds 8460; Wm. V. O'Brien exercised option to buy 1600, holds 5610; Robert Paxton bought 3225, holds 20,502; Charles R. Pritchard sold 1000, holds 4754; Carter L. Redd exercised option to buy 450, holds 3654; Charles K. Rieger exercised option to buy 1725, holds 3459; Glenn B. Warren exercised option to buy 1668, holds 3953. General Telephone—Thomas A. Boyd bought 412, holds 6412. General Tire & Rubber—Dan A. Kimball sold 1200 in property settlement, holds 1669. General Transistor—Max Fialkov sold 2500, holds 18,868. Litton Industries—Roy L. Ash sold 1094 in partnership, holds 15,702 in partnership, 52,415 personally; Lewis W. Howard sold 500, holds 3262; H. W. Jamieson sold 1094 in partnership, holds 15,702 in partnership, 52,390 personally; Glen McDaniel bought 4000, holds 5000; Joseph A. Thomas sold 5000 through Lehman Bros., holds 19,500 through Lehman Bros., 200 in trust, 6795 personally; Charles B. Thornton sold 2402 in partnership, holds 34,543 in partnership, 123,758 personally. Magnavox—Richard A. O'Connor sold 300, holds 55,793. Minneapolis-Honeywell—J. H. Binger exercised option to buy 800, holds 8190; Charles B. Sweatt sold 200, holds 9230 in trusts, 70,270 personally; John J. Wilson sold 2400, holds 71,570. RCA—Mildred McA. Horton bought 100, holds 400. Skiatron Electronics & TV—Frank V. Quigley sold 400, holds 535. Sperry Rand—G. W. Banks sold 1000, holds 1000; H. C. Landsiedel sold 700, holds 4920; Harry Landsiedel sold 6500 in joint account, holds 12,460 in joint account, 13,904 personally; Bernard O. Reuther sold 5000, holds 20,000; John Sanderson sold 9000, holds 1149; J. A. W. Simson sold 3000, holds 7232. Texas Instruments—Cecil H. Green bought 1500, holds 351,210; J. E. Jonsson bought 24,651, holds 468,339. Unitronics—Frederick L. Anderson bought 3300, holds 24,930; Louis Haber bought

1102, holds 1102. Warner Bros.—Serge Semenenko bought 1000 in trust, holds 2000 in trust, 160,000 personally. Webcor—Everett Meyer sold 1000, holds 11,800. Westinghouse—Tomlinson Fort bought 500, holds 1557; John F. Myers bought 300, holds 1019.

* * * *

Siegler-Unitronics merger was approved by stockholders Sept. 11 on basis of 1 share of Siegler for 2 shares of Unitronics—Siegler Corp. the surviving firm. Pres. Brantz Mayor of Unitronics, parent of Olympic Radio & TV, David Bogen & Co. & Presto Recording Corp., told us more than 80% of stockholders at Unitronics meeting in N. Y. and Siegler meeting in Dover, Del. voted for merger which will become effective over the week end as lawyers clear up involved paperwork. More than 66% of holders of \$1,400,000 Unitronics' debentures also approved changes in debentures necessary to permit merger. On Sept. 16, Siegler stock will be traded on American Stock Exchange, Unitronics discontinued; Siegler previously had been traded over the counter. Mayor said Olympic TV sales are running 50% ahead of last year, production 5 weeks behind meeting orders but new financing from merger should permit greater expansion.

IT&T reports consolidated income of \$12,989,254 (\$1.81 per share) on sales of \$295,189,958 in first 6 months vs. \$12,487,250 (\$1.74) on \$223,136,059 in corresponding 1956 period. Foreign sales in first half this year were \$167,961,944 of total compared with \$142,098,386 year earlier. Parent company alone earned \$8,676,310 (\$1.21) to June 30 vs. \$7,829,084 (\$1.09) in 1956 half. Orders on hand June 30 totaled \$468,000,000 compared with \$459,000,000 year earlier.

Dividends: Motorola, 37½¢ payable Oct. 15 to stockholders of record Sept. 30; AB-PT, 25¢ Oct. 19 to holders Sept. 27; RCA, 25¢ Oct. 28 to holders Sept. 20; GE, 50¢ Oct. 25 to holders Sept. 20; IT&T, 45¢ Oct. 15 to holders Sept. 20; Clarostat, 5¢ Oct. 1 to holders Sept. 23; Dynamics Corp., dividend omitted.

Consolidated Electronics earned \$1,716,367 (\$2.18 per share) on sales of \$21,526,829 in 9 months ended June 30 compared with \$1,555,648 (\$1.97) on \$20,318,305 in corresponding period year earlier. In 6 months ended March 31 income was \$1,154,803 (\$1.47) vs. \$1,174,441 (\$1.49) year earlier.

Amphenol offered new issue of 200,000 common shares (\$1 par value) for public sale (Vol. 13:34) at \$27.50 per share Sept. 10 through underwriting group headed by Hornblower & Weeks.

ELECTRONICS PERSONALS: Delbert L. Mills, ex-A. O. Smith Corp., elected exec. v.p. of Federal Telephone & Radio div. of IT&T . . . John T. Jackson, IT&T planning & organization director, elected asst. v.p. . . . Harry M. Stephey, ex-Philco, named mgr., advanced sales, missile guidance section, GE heavy military electronic equipment dept. . . . Dr. Bernard Jacobs, ex-Sperry-Rand, named research v.p. of General Transistor . . . O. H. Mackley promoted to v.p. & gen. mgr., Hycon Electronics Inc. . . . James K. Nunan, gen. mgr. of Clevite Research Center, elected Clevite Corp. v.p.-electronics . . . Robert E. Honer promoted to chief engineer, Convair-San Diego plant of General Dynamics . . . Larry Stineman, ex-Merit Coil, appointed chief engineer, Gramer-Halldorson Transformer Corp. . . . Clarence A. Wetherill promoted to Stromberg-Carlson engineering staff specialist . . . Capt. Wilfred B. Goulett (ret.), ex-director of naval communications, elected exec. v.p. of Armed Forces Communications & Electronics Assn.; M. C. Richmond, Western Electric, named treas.

Daystrom Inc. has formed new corporate unit called Daystrom Controlonics Group to produce complete electronic systems for instrumentation and automatic control of industrial processes. New group includes subsidiaries Weston Instrument, Daystrom Systems div. & Daystrom Electric. Daystrom marketing v.p. Thomas Allinson has been named operating v.p. of new group.

Black-background CR tube has been developed by DuMont for radar and other uses, permitting viewing in bright light. Tube operations v.p. Stanley J. Koch said new technique is immediately adaptable for airborne cockpit radar and other equipment requiring use in open areas and in brightly lighted places.

Hallamore Electronics Co. div. of Siegler Corp. has been licensed by AT&T subsidiary Western Electric to manufacture telephone amplifier equipment to be used in banks of up to 150 units by operating telephone companies. License is one of first to go to firm outside Bell System.

Worldwide TV-radio censorship by Catholic agencies was called for Sept. 11 by Pope Pius XII in 16,000-word encyclical—first from Vatican to be directed specifically at broadcasting. Encyclical titled “Miranda Prorsus” (“Remarkable Inventions”) suggested that ecclesiastical authorities should model TV-radio agencies on Legion of Decency, formed in U. S. in 1934 to monitor & rate motion pictures. Pope exhorted episcopacy “not only to exercise a watchful care but also to use positive action & authority” to combat TV & radio programming which clergy judges to be objectionable. He warned against dangers which “can beset Christian faith & morals if the powerful inventions of motion pictures, radio & TV are perverted by men to evil uses.” Unless moral safeguards are applied by church to TV & radio as well as movies, Pope said, “they will restrict the people’s true development and weaken their morals.” Over-all Catholic authority under encyclical is given at Vatican to Pontifical Commission for Motion Pictures, Radio & TV, headed by Most Rev. Martin John O’Connor, rector of Pontifical North American College.

Ultimate in soft sell, or “deep” sell—“invisible advertising” flashed on screen so rapidly that viewers aren’t consciously aware that they’ve seen commercials—was claimed by new Subliminal Projection Co. Inc. at N. Y. press conference Sept. 12. Spokesmen for firm headed by pres. Francis C. Thayer of U. S. Productions Inc. were secretive about details of advertising method, for which patents are sought by motivational researcher James M. Vicary, who has own N. Y. firm specializing in product names. But they said screen projection device has been tried out in movie theatre in unspecified N. J. town to plug Coca Cola & popcorn. Result, they said: lobby vending machine sales of Coca Cola went up 18.1%; popcorn, 57.7%. “Subliminal advertising” inventor Vicary said: “We believe its commercial use eventually may have to be under regulation of some sort, either voluntarily by the industries which use it or by the Govt.” He thought major customers for his system, in which commercials were said to be repeated at 5-sec. intervals without interrupting program on screen, would be TV networks as well as theatre chains.

TV is prime weapon against illiteracy, members of new non-govt. National Commission for Adult Literacy agreed Sept. 9 at Washington planning session for campaign to help estimated 2.7% of U. S. population who can’t read or write. “I’m sure that they watch TV, and the approach to them would have to be visual,” v.p. Richard J. Crohn of D. L. Mazel Inc., N. Y., said. Organized in June by Adult Education Assn. with cooperation of U. S. Office of Education, group of 20 business, religious & labor leaders will meet again in Oct. to explore TV possibilities in projected drive to be financed by private contributions. CARE pres. Murray Lincoln is Commission chairman.

TV stimulates reading, according to conclusions in survey by staff of Washington, D. C. Public Library. “TV has had no adverse effect on reading,” librarian Harry N. Peterson reported. “On the contrary there is reason to believe that TV—along with radio, movies & plays—may actually be contributing to the increased use of library resources.” He said demand for such works as *Man & Superman*, *Romeo & Juliet*, *The Great Gatsby* soars after they are presented on TV.

Baghdad TV assignment for International Cooperation Administration to help integrate broadcasting with Iraq’s educational system will be undertaken next week by Merrill McClatchey, TV-radio teacher & producer at U of Michigan. He’ll spend 2 years in Baghdad, where govt.-operated TV station went on air May 1956.

Miami-Havana “scatter” relay (Vol. 13:33, 36) was opened for business by AT&T and IT&T Sept. 12, but no TV customers were lined up either in U. S. or Cuba to be first to use only “over-horizon” live TV link. TV tests run this week both ways were successful, according to AT&T, which operates Florida end of \$3,000,000 telephone-TV installation. Pictures were described as “good, clean, excellent” by Joseph H. Kline, engineering director of WTVJ, Miami, who witnessed tests. However, no orders by networks or stations for use of relay (at \$600 for first hour) were reported at week’s end. CBS-TV & ABC-TV said they still had no immediate plans for “scatter” programming. NBC-TV said live transmission of World Series to Cuba next month was on tentative agenda, but no decision on it or other potential schedules had been made. City of Miami was planning local show for relay to coax Cuban tourists to Florida, but even that wasn’t expected before next spring.

“Serious slowdown in consumption growth” this year is being overlooked by govt. economists who predict constantly expanding economy, senior v.p. Arno J. Johnson of J. Walter Thompson Co. told fall convention of Premium Advertising Assn. of America Sept. 10 in Sheraton-Astor Hotel, N. Y. He warned that sales to consumers must be increased by \$140 billion—or more than 50%—just to keep pace with increased production which is expected to bring \$650 billion economy in 10 years, requiring doubling of advertising expenditures to \$17-\$21 billion annually. Johnson urged “reexamination of the sales organization and the advertising budgets to see if they are adequate for the job to be done and for the opportunity that exists.”

Broad Soviet program for TV-radio, cultural & scientific exchanges with U. S. was outlined Sept. 12 in formal meeting between Russian embassy counselor Sergei R. Striganov and Wm. S. B. Lacey, State Dept.’s East-West specialist. Details of Kremlin plan, stemming from CBS-TV’s celebrated interview with Communist boss Nikita Khrushchev (Vol. 13:31), were not disclosed, but State Dept. said “this thing covers the waterfront.” Proposals were submitted as Russian suggestions for agenda for high-level Washington talks tentatively set for late Oct.

Reciprocal news coverage of Red China & U. S. was proposed Sept. 12 in Geneva in plan to lift bamboo press curtain (Vol. 13:35), but State Dept. here quickly rejected new Chinese offer as scheme for backdoor recognition of Communist regime. Wang Ping-nan, Chinese ambassador to Switzerland, submitted press exchange terms to U. S. ambassador U. Alexis Johnson which would have required treaty-like agreement. Continuing stalemate left U. S. correspondents, including TV-radio, no closer to Chinese border.

Two applications for TV stations were filed with FCC this week, bringing total to 118 (33 uhf). Applications: For Alexandria, Minn., newly allocated Ch. 7, by local group, headed by Thomas A. Barnstuble, which is also applicant for Ch. 13 in Bemidji and which includes E. C. Reineke, pres. & 54% owner of WDAY-TV, Fargo, N. D.; for Wailuku, Hawaii, Ch. 8, by KULA-TV, Honolulu, for proposed satellite operation. No translator applications were filed this week. [See *TV Addenda 25-G* herewith.]

NARTB spot TV films promoting National TV Week—but intended for continuing use to inform public about its stake in TV—have been sent to all members. First of two 20-sec. spots reviews memorable events seen on TV—from coronation of Queen Elizabeth to sinking of Andrea Doria. Other uses baseball, football, boxing clips to illustrate sports coverage. Films were prepared by Robert Lawrence Productions.

SUMMARY-INDEX OF THE WEEK'S NEWS—September 21, 1957

PAY TV SUFFERS SETBACK as House Commerce Committee calls hearing following inconclusive FCC action "looking toward" trial (p. 1).

RCA-ZENITH SETTLEMENT: Set makers wonder if it's prelude to changes in patent licensing structure. Some details of agreement reported (p. 2).

TV CIRCULATION AUDIT, for standard set census and station viewer figures, now awaits approval of telecasters as NARTB reveals plans (p. 3).

MARKET-BY-MARKET TV station financial data for 1956 released by FCC (p. 4). Complete table of 64 multiple-station markets (p. 5).

NEW STATIONS START in Hartford, Omaha & Lexington, Ky.; 2 new stations & 3 satellites begin programming in Canada. U. S. total is 512 (p. 6).

FREQUENCY SWAP between FCC & Govt. allows Ch. 2 for scatter in Pacific. ODM emphasizes TV broadcast service will be protected (p. 6).

GE LAYS OFF 700 TV employes. Motorola finds market "disappointing." But RCA, Sylvania, Emerson, Philco report good production and sales (p. 9).

TV SET SAFETY standards need no overhaul, EIA committee decides, noting TV-radio safety record excels other home electrical appliances (p. 10).

RECORD PROFIT & SALES reported by Magnavox for fiscal year. Olympic parent Siegler Corp. emerges as \$75,000,000-a-year firm (p. 8).

CONGRESSIONAL PROBERS urge lawyers and employes to become "confidential informants" in investigation of FCC and other govt. agencies (p. 7).

FCC REJECTS PROTESTS against St. Louis grant to CBS. WKBW-TV recommended for Buffalo Ch. 7, Texas Tech College for Lubbock Ch. 5 (p. 7).

SECOND LIVE EDUCATIONAL TV series beamed at non-commercial stations announced by NBC & ETRC, with more ambitious programs (p. 7).

CONGRESS INTO PAY-TV PICTURE; DELAYS CERTAIN: The cause of pay TV suffered a net loss this week. Everything that happened spells delay. FCC came out with an inconclusive, amorphous action that both invited and defied Congress to take over. Pleased to accept, Rep. Oren Harris (D-Ark.), chairman of Commerce Committee, stepped in and announced that his committee would conduct hearings starting "early next year."

Harris' action came shortly after Sen. Potter (R-Mich.), member of Senate Commerce Committee, and Rep. Celler (D-N. Y.), chairman of House Judiciary Committee, attacked Commission for what they decided was another step toward approving toll TV.

Commission's action came Sept. 18, in form of very brief announcement of "instructions to staff" reading as follows:

"The Commission, at a special meeting on September 18, directed preparation of a document looking toward acceptance and consideration of applications from present or proposed television stations requesting authorization to conduct trial subscription TV operations on a limited basis, for a period of three years, subject to the furnishing of pertinent detailed information and controlled conditions to be set forth in the document (Docket 11279). Applications will not be acted upon prior to March 1, 1958. This action does not constitute a commitment that any applications will be granted nor does this action constitute adoption of a final order. (Commissioner Hyde voted "no" on the approval of this notice; Commissioner Bartley dissented; Commissioner Ford abstained from participation.)"

Note the March 1 date. This was clearly a nod toward Congress, and Congress acknowledged it.

Commission is most unlikely to do anything definitive while pay TV is actively being considered by Harris committee—which could take quite a bit of time.

The uncertainties contained in FCC's announcement are enormous. Three-year period certainly is big disappointment to proponents. How stringent will test limitations be? Will Commission accept applications, then set them for hearings? FCC staff is expected to come up in 2-4 weeks with draft of final document which commissioners will then debate.

Commission's proposal looks toward putting burden on TV stations & applicants, the only entities it controls. Few stations have expressed favorable interest in toll TV, and NARTB this week continued efforts to keep it that way. At regional meetings in Schenectady & Cleveland, pres. Harold E. Fellows called for "unity," insisted FCC hasn't legal authority to authorize pay operations.

Week's events throw more emphasis on cable-pay concept. Matter of fact, rumor has it that Skiatron and Telemeter would just as soon see telecast toll forgotten—since they're keeping wire hot.

As long anticipated, more pay systems are cropping up as Commission resumes deliberations. Two came in this week. Blonder-Tongue Labs, Newark, submitted to Commission concept of 2 signals being imposed on present 6-mc channels, to be separated by varied polarity. One could be used for conventional signal, other for pay TV, educational TV, etc. Solomon Sagall, much heard from in TV's early days, when he headed big-screen Scopphony of London, proposes simply that picture be telecast without sound; that sound be brought in by wire—with subscribers paying for the sound.

PATENT PORTENT IN ANTI-TRUST SETTLEMENT? RCA patent licensees—and at the moment that includes virtually every TV-radio manufacturer except Zenith & Philco—this week hungrily latched onto every available scrap of information about the yet-unfiled settlement of the long patent litigation between RCA & Zenith (Vol. 13:37).

They were looking, of course, for any indicators of impending changes in RCA's patent licensing structure or charges—any changes which might be launched by RCA voluntarily or in a consent-decree settlement of govt.'s civil anti-trust suit against its "package" royalty policies.

Philco topkicks weren't talking, but they seemed quietly optimistic—although it's not believed that any overtures have been made on either side for a settlement of Philco's patent litigation with RCA.

More details of the as-yet-unwritten and still incomplete agreement were leaked to press this week from Zenith sources, while RCA kept mum—and they provided some RCA licensees with food for thought, particularly those who like to read between lines.

The unverified reports which came out this week provided this supplementary information:

RCA and Zenith-Rauland are to exchange royalty-free licenses for TV & radio—excluding color TV—for term ending Jan. 1, 1963.

Patent infringement claims between Zenith-Rauland and RCA are to be arbitrated—RCA's claims against Zenith limited to \$2,800,000-\$4,700,000, Zenith's against RCA to \$1,700,000-\$2,100,000. Some industry observers saw in this reported provision a possible portent for change in RCA "package" licensing, since negotiations apparently are to be on a per-patent, rather than a patent package, basis.

Defendants RCA, GE & Western Electric are to pay Zenith approximately \$10,000,000 in 10 yearly instalments, first payment to be made Oct. 1—day after settlement is scheduled to be filed in Chicago Federal court. Payments by GE & Western Electric would be token sums (Western Electric reportedly already has made its payments to the specified Chicago bank) and lion's share would be borne by RCA.

GE and Zenith would exchange royalty-free licenses for TV, radio and tubes, excluding color TV and tubes used in color TV.

Indication that Zenith plans to enter microwave equipment business was seen in provision that Zenith, Western Electric and Bell systems are to exchange royalty-free licenses for "equipment used by common carrier communications."

One long-time TV manufacturer expressed opinion—on basis of published reports about settlement—that “this will cause some disturbance in the industry.” He said manufacturers will be particularly interested in fact that there’s ceiling on Zenith payments to RCA for back use of patents, whereas “other licensees have no ceiling,” since license fees are based on value of their total production.

“This will set a lot of people to thinking as to whether you are penalized by being a nice fellow,” he said, “when by not being a nice fellow and fighting RCA you can get a competitive advantage.”

TV CIRCULATION AUDIT NOW UP TO STATIONS: Long awaited standard all-industry TV set census and station circulation figures are now within reach. All that’s needed is support by perhaps 40% of TV stations and a little over a million dollars.

Thanks to several years’ study and tests by NARTB’s Audit Circulation Study Committee and 2 private research organizations, industry now appears within stone’s throw of standard and reasonably reliable figures on station circulation, comparable to ABC audit in magazine field.

Some details are now being revealed to broadcasters at current series of NARTB regional conferences—first 2 having been held this week at Schenectady and Cleveland. After conferences are over, it’s expected that NARTB will send letters to all telecasters—both members and non-members—to determine whether survey can be supported.

First usable figures probably wouldn’t be available before late 1959—since audit would be made on annual basis to give full-year statistics. Assuming sufficient stations were to subscribe early in 1958, there would still be many details to iron out: Presumably a contract would be let to one or more private research organizations; pilot or “shakedown” study would have to be conducted, etc.

While NARTB officials didn’t reveal details of methodology—they will be kept secret until bids are sought from research groups—it did unwrap enough information to give stations an idea what they would get and what it would cost. For example, subscribing stations would receive 4 statistical tables:

(1) TV census. This would contain county-by-county estimates of TV households for entire U. S., with such breakdowns as percentage of TV penetration in each county, percentage of TV homes able to receive uhf, percentage of homes with color sets.

(2) Circulation report. Arranged by state & county, this table would show circulation of each station putting a signal into the county—on average-day and average-week basis. As “unit of circulation,” survey would use 15 minutes or more of continuous viewing in any one day. Circulation probably will be listed for any station with more than 100 units of circulation in county.

(3) Station report. This would be interpolation of data from tables 1 & 2, arranged by station circulation area rather than state & county.

(4) Socio-economic data. Households in each county would be classified by basic characteristics such as age of housewives, number of children, home ownership, etc.

First year’s study probably will cost about \$1,200,000—costs going down somewhat in subsequent years. NARTB recommends that subscribers be charged on basis of their card rates, as best current indicator of circulation and ability to pay.

Scale of charges can’t be worked out until it’s known how many stations will subscribe, but NARTB research mgr. Richard M. Allerton estimates that if 60% of presently operating TV stations participate, cost would range from \$1100 for smallest station to \$25,000 for biggest, with average payment about \$4500. If only 40% were to sign up, minimum payment would be slightly less than \$2000.

Survey would be conducted using telephone technique, meter method having been discarded as too expensive after committee conducted tests using 125 specially built meters. There would be about 1,900,000 phone calls yielding 800,000 completed interviews—covering all counties, with minimum sampling of 300 TV homes in any county, maximum of 1200.

NARTB’s survey tests were conducted in High Point, N. C. (where 12 TV stations can be received) and in Paterson, N. J. (with “at least 7” signals).

TV'S MARKET-BY-MARKET FINANCIAL PERFORMANCE: FCC's most-wanted statistical table—individual TV market revenue-expense-income figures for 1956—was released this week, giving station operators another good yardstick for judging how they stack up with local competition and with comparable markets. Reprinted on opposite page, table gives lumped figures for each of the 64 markets with 3 or more stations. Lumping is done, of course, to avoid disclosure of any specific station's figures. No city-by-city breakdown is provided for markets with 1 or 2 stations, for same reason. However, this doesn't prevent a shrewd operator from making some mighty good guesses in markets with 3 stations or more.

Table provides first opportunity for assessing station performance, as completely disassociated from networks. FCC's over-all table, including networks' figures, was released last month (Vol. 13:34).

Not shown in this week's table are comparable figures for 1955. We've dug them up to show increases. In 1955, there were 466 stations in operation; 436 reported figures to Commission. They showed total revenues of \$462,309,096 (to be compared with figure at bottom of column 8), expenses \$346,055,220 (col. 9), income (profits) before Federal income tax \$116,253,876 (col. 10). Thus, 1956 revenues were up 19.3% from 1955, expenses up 17.1%, income up 25.8%.

Personal Notes: Leonard H. Goldenson, AB-PT pres., named to Motion Picture Assn.'s 1958 Production Code Review Board . . . John H. White, ex-Ziv TV, named ABN national sales mgr. . . Thomas H. Bateson, national sales service director of Boston's WNAC-TV & WNAC and Yankee Network, promoted to v.p., Yankee div., RKO Teleradio . . . Murray M. Kaplan, ex-Warner Bros. and United Artists, named NTA sales mgr. . . Charles T. Lipscomb Jr., former pres. of J. B. Williams Co. and one-time pres. of Pepsodent div., Lever Bros., named pres. of ANPA's Bureau of Advertising, succeeding Harold S. Barnes . . . Walter Kingsley, former Ziv mgr. of national sales, appointed to new post of gen. sales mgr. in charge of syndication sales to stations & advertisers; he's succeeded as mgr. of national sales by James Shaw, promoted from central div. national sales mgr.; Jerry Kirby, from national sales dept., succeeds Shaw . . . Paul Garrett, retired GM public relations v.p., elected a director of Teleprompter . . . Alvin G. Flanagan, asst. gen. mgr., KCOP, Los Angeles, becomes gen. mgr., succeeding Jack Heintz, when sale of station to Kenyon Brown-Bing Crosby group (Vol. 13:34) is consummated . . . Robert M. Riley Jr. named sales manager of upcoming WMBD-TV, Peoria . . . Gustave Nathan appointed director of sales development at WNBC, New Britain-Hartford . . . Gene Gaudette, ex-WRAL-TV, Raleigh, named gen. sales mgr., WAVY-TV, Norfolk . . . Dick Jolliffe promoted to KTLA eastern sales rep with headquarters in N. Y. office of Peters, Griffin, Woodward Inc. . . . Dick Walker, ex-KWTV, Oklahoma City, appointed sales service coordinator of KCMO-TV, Kansas City . . . Stuart Hall named production mgr., WCAX-TV, Burlington, Vt. . . . Norman Boggs elected v.p.-gen. mgr., Don Lee Radio div. of RKO Teleradio . . . Irv Lichtenstein, publicity-promotion-research v.p. of radio WWDC, Washington, next month becomes ABN director of promotions & exploitation . . . Robert J. Smith, ex-MBS, named asst. to exec. v.p., *Family Circle Magazine* . . . Frank Miller, from WOR, N. Y., named MBS N. Y. production mgr. . . Wm.

Doerr, WEBR, Buffalo, elected pres., N. Y. State Assn. of Radio & TV Broadcasters, succeeding E. R. (Curly) Vadeboncoeur, WSYR-TV & WSYR, Syracuse.

ADVERTISING AGENCIES: Edwin Cox, Kenyon & Eckhardt vice chairman, elected chairman, succeeding Thomas D'Arcy Brophy, retired . . . Ted Bergmann, ex-McCann-Erickson, elected pres. & chief exec. officer, Parkson Adv.; Franklin Bruck, exec. v.p., elected chairman . . . Edwin H. Sonneck, ex-Ford Motor Co., named exec. v.p. & gen. mgr., McCann-Erickson's Market Planning Corp. . . . Charles A. Holcomb, ex-pres. of H. B. Humphrey, Alley & Richards, joins Kudner as special asst. to pres. J. H. S. Ellis . . . Tevis Huhn, ex-Warwick & Legler, elected Bryan Houston v.p. . . . Robert J. Fierst promoted to v.p. & member of exec. staff, Edward H. Weiss & Co. . . . Alfred Steckman becomes Bryan Houston Inc. v.p. and mgr. of plans board . . . Robert R. Ferry named Fletcher D. Richards creative planning director . . . Everett L. Thompson named TV-radio director, Runrill Co. Inc. . . . Harry W. McMahan, ex-McCann-Erickson, named Leo Burnett Co. v.p. in charge of TV commercials and member of plans supervisory committee, headquartered in Los Angeles . . . Richard W. Tully, Foote, Cone & Belding v.p., appointed gen. mgr., Chicago office.

Charles P. Ginsburg, mgr. of advance videotape development, Ampex Corp., wins SMPTE David Sarnoff Gold Medal Award "for his work in the development of a practical video recorder," to be presented Oct. 4 at society's Philadelphia convention. Last week IRE selected Ginsburg for its Vladimir K. Zworykin TV Prize.

NBC-TV Affiliates Executive Committee unanimously reelected its chairman Walter J. Damm, WTMJ-TV, Milwaukee. Other officers are Jack Harris, KPRC-TV, Houston, vice chairman (basic affiliates); Harold Essex, WSJS-TV, Winston-Salem, vice chairman (optional affiliates); Harold Stuart, KVOO-TV, Tulsa, secy.-treas.

Leon Ames nominated for pres. by Screen Actors Guild's nominating committee, to succeed Walter Pidgeon.

WPTA, Ft. Wayne (Ch. 21) becomes ABC-TV primary affiliate as of Sept. 21, ABC-TV station relations v.p. Alfred R. Beckman stating that addition of the Sarkes Tazarian station in all-uhf area adds 575,000 families to network's live coverage; that ABC-TV's live coverage will be extended to 85% of U. S. TV homes this season.

Pat Somerset of Screen Actors Guild Sept. 24 becomes pres. of Hollywood AFL Film Council, composed of unions & guilds in film industry, succeeding Henry C. Wadsworth.

Rate increases: WAGA-TV, Atlanta, has added Class AA min. only rate (8-10 p.m. daily) at \$275; Class A min. remains \$250 . . . KCRA-TV, Sacramento, Sept. 1 raised base hour from \$800 to \$900, min. \$200 to \$225 . . . WJMR-TV, New Orleans, has raised base hour from \$400 to \$600, 20 sec. \$58.75 to \$90 . . . WNOW-TV, York, Pa., new rate card has base hour of \$150, min. \$28.50, drops Class C . . . KTVI, St. Louis, drops Class D rates, changes Class C to "all other times."

New and Upcoming Stations: Bumper crop of new TV starters, traditional around harvest time as new-season programming begins, this week includes 3 stations in U. S.—and in Canada, 2 originating stations and 3 satellites. U. S. starters are Hartford's WTIC-TV (Ch. 3), Omaha's KETV (Ch. 7) and Lexington's WKXP-TV (Ch. 27), bringing on-air total to 512 (91 uhf). Canadian stations starting programs are CHAT-TV, Medicine Hat, Alta. (Ch. 6) and CHBC-TV, Kelowna, B. C. (Ch. 3), with satellites at Penticton (Ch. 13) & Vernon (Ch. 7).

WTIC-TV, Hartford, begins first broadcast day at 7 p.m. Mon., Sept. 23 after month of equipment tests. It will be independent outlet in area already served by CBS's WHCT (Ch. 18), NBC's WNBC (Ch. 30) and Triangle Publication's ABC-affiliated WNHC-TV. Owned by Travelers Insurance Co. (radio WTIC), it starts with full 100-kw ERP. Base hour is \$800. Rep is Harrington, Righter & Parsons.

KETV, Omaha, started regular commercial schedule Sept. 17 as ABC-TV affiliate in 3-station market. It's owned by *Omaha World-Herald*, gets under way with 316-kw ERP. Eugene S. Thomas is gen. mgr. Base hour is \$900. Rep is H-R Television.

WKXP-TV, Lexington, Ky., now on air with test patterns, begins programs Sept. 23 with 15.5-kw ERP. No network affiliation has been announced for this second uhf in city. Base hour is \$251.30. Rep is Pearson.

CHAT-TV, Medicine Hat, began programs last week end with 5.7-kw ERP. Live network interconnection is due about Dec. 15. R. J. Buss is v.p.-gen. mgr.; Jack Oldham, Merv Stone & Sid Gaffney—all from radio CHAT—are sales mgr., program director & chief engineer, respectively. Base hour is \$100. Reps are Weed and H. N. Stovin & Co.

CHBC-TV, Kelowna, is poised for Sept. 21 programming start, with ERP of 3.7-kw. With its 2 satellites—CHBC-TV-1, Penticton, and CHBC-TV-2, Vernon—it will be sold as a "station group." Satellites have ERP of about 300 watts. Base hour rate is \$170. Reps are Weed and All-Canada.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KIRO-TV, Seattle (Ch. 7) with construction of studio-transmitter building underway, starts erection of Truscon tower this week, expects delivery on GE transmitter at end of month, reports v.p. Lincoln W. Miller. Test pattern target is Dec. 15, with CBS-TV programming due Feb. 8. Rep is now being chosen.

WOWL-TV, Florence, Ala. (Ch. 15), authorized to change Sept. 6 from Ch. 41, has set test pattern target for Sept. 23, limited programming for Oct. 7, says pres.-gen. mgr. Richard B. Biddle. GE transmitter is ready, and installation of GE antenna on 300-ft. U. S. Tower Co. structure was expected to be completed by week end. Base hour will be \$200. Rep will be Forjoe.

KXGN-TV, Glendive, Mont. (Ch. 5) has signed with CBS-TV, reports gen. mgr. Dan Palen, with programming scheduled to start Oct. 1 after 2 weeks of tests. Additional personnel, all veterans of KXGN radio, include Karl Johnson, sales director; Donald J. Powers, chief engineer; Lewis W. Moore, film buyer. Base hour will be \$125. Rep will be Grant Webb.

WMAY-TV, Springfield, Ill. (Ch. 36) hopes to get on air in spring of 1958, reports gen. mgr. Gordon Sherman. Transmitter has not been purchased but negotiations are underway with several manufacturers. Guyed 650-ft. Stainless tower will be utilized. Although talks have been going on with John E. Pearson Co. and others, rep has not been chosen.

Equipment shipments: RCA reports Sept. 19 shipment of 10-kw transmitter with used 25-kw amplifier (from KOVR, Stockton, Cal.) to WBOY-TV, Clarksburg, W. Va. (Ch. 12); 6-section superturnstile antenna Sept. 13 to upcoming non-commercial KUED, Salt Lake City (Ch. 7); 12-section Sept. 18 to WHDH-TV, Boston (Ch. 5).

KTVX changes to KTUL-TV with switch of city designation from Muskogee to Tulsa.

Translator starts: K77AF, San Saba, Tex. began Sept. 13 repeating KTBC-TV, Austin.

New reps: WNOW-TV, York, Pa. to Adam Young Inc. (from Robert S. Keller Inc.).

GOVT. USE OF CH. 2 in the Pacific, west of Oahu, Hawaii, was authorized by FCC this week in swap of frequencies giving industrial radio users valuable space just below 152 mc. FCC and Office of Defense Mobilization were quick to point out that the Pacific use (54-54.4 mc, for "scatter" on Midway Island) won't encroach on TV. In attempt to forestall alarmist reactions, ODM stated:

"ODM officials emphasized that, in the selection of the bands, extreme care was taken to avoid interference with the TV broadcast service. They said that protection to this service is provided for, and encroachment on TV service is not contemplated."

Also being turned over to Govt. for scatter are 46.6-47 and 49.6-50 mc, the present industrial users to be moved eventually to 150.8-152 mc. In addition, Commission proposed greater splitting of industrial channels to accommodate more users.

At NARTB regional meeting in Cleveland this week, Sen. Potter (R-Mich.) reiterated demand for impartial survey of govt. uses of spectrum. He suggested that survey be done by commission of "laboratory scientists," that commission exclude Congressmen, FCC, military services and broadcasters.

First commercial use of "scatter" link to Cuba was more imminent than networks were prepared to indicate (Vol. 13:37), for NBC-TV on Sept. 13 sent *Cavalcade of Sports* boxing match to Cuba where it was carried by CMBF-TV network. Goar Mestre, part-owner of CMBF-TV, said fights would be carried regularly and that his CMQ network would take World Series via scatter. First Cuba-to-U. S. TV use of link may come Sept. 29, 3:30-4 p.m., when Martin Agronsky has scheduled live interview with Cuban President Fulgencio Batista from Presidential Palace in Havana on his *Look Here*. The link will be used for closed-circuit telecast Sept. 24 when IT&T pres. Maj. Gen. E. H. Leavey speaks from studios of NBC's WRC-TV, Washington, to audience of communications ministers from more than 20 Latin American countries assembled in Havana's Hotel Nacional. The 15-min. program will be produced by NBC Telesales. Meanwhile, engineers of Mexico's Telesistema Mexicano abandoned efforts to connect to U. S. via two-hop relay from Harlingen, Tex. to Mt. Zamorano, near Queretaro (Vol. 13:33). A Mexican TV official told us: "Everything was fine from Harlingen to Ciudad Victoria, but the long stretch between Victoria and Mt. Zamorano, which calls for another relay, is a matter for the future. Signal tests have been far from satisfactory."

CONFIDENTIAL INFORMANTS will play large part in Rep. Moulder's House Commerce legislative oversight subcommittee's investigation of independent govt. regulatory agencies, including FCC. That was made crystal clear by newly appointed chief counsel-staff director Bernard Schwartz on 2 separate occasions this week:

(1) In personal letters to attorneys practicing before such agencies as FCC, Schwartz appealed for information, which he said would be treated "on a wholly confidential basis." The letters stated: "The success of the investigation will ultimately depend upon instances of improper agency action being brought to our attention by persons who may have knowledge of such action."

(2) In address to Washington convention of Federal Bar Assn. Sept. 20, Schwartz appealed to "lawyers who have lost cases, they believe wrongly," to give information—on a confidential basis, if desired—to any of the subcommittee's 10 professional staffers. He also urged "civil servants whose loyalty to the country is greater than their loyalty to their immediate superior" to bring facts to subcommittee.

He said investigation will cover only "the 6 most important independent commissions"—CAB, FCC, FPC, FTC, ICC, SEC—adding that since Labor Day his subcommittee has had at least one staffer gathering data within each of the agencies.

Inquiry will cover vast amount of territory, he indicated, purpose being to determine whether these agencies, "which are in a sense part of the legislative branch," are subject to pressures from executive branch or from regulated industries, and whether they are operating within statutes which govern them.

While he went into no details about specific agencies, it's understood that his subcommittee's investigators have been delving into facts surrounding specific FCC cases—including TV grants in Boston & Miami.

LIVE EDUCATIONAL program series beamed to non-commercial stations—the joint NBC-Educational TV & Radio Center project which was so widely praised last season—resumes Oct. 28 for 10-week run Mon. thru Fri. at 6 p.m. using NBC-TV facilities and expected to be carried by nearly 30 educational stations.

New series was announced simultaneously by ETRC and by NBC pres. Robert W. Sarnoff—the latter in address to American Legion convention in Atlantic City as he accepted 1957 Americanism Award for his "vision and leadership in launching the NBC Educational TV Project."

Each of 5 series will be presented one day a week. As outlined by Sarnoff and ETRC, they will include: (1) Study of functions of executive branch of Federal Govt., originating in Washington and using "national leaders" as instructors in many cases. NBC news commentator Bill Henry will conduct show. (2) Series based on International Geophysical Year, hosted by NBC commentator Frank Blair, discussing significant features of present knowledge about the earth and current geophysical projects. (3) Mathematics series, hosted by Clifton Fadiman. (4) American resources series, conducted by Prof. Albert Burke and dealing with natural resources. (5) Greek mythology series, probably to be produced at New York's Metropolitan Museum.

PROTESTS against CBS Ch. 11 St. Louis grant were turned down by FCC this week on grounds they were filed too late. Meanwhile, progress is reported in project whereby CBS would buy KWK-TV, turning over Ch. 11 CP to applicants whom it beat (Vol. 13:36).

Two more hearing cases advanced—Ch. 7, Buffalo, and Ch. 5, Lubbock, Tex. In Buffalo case, examiner H. Gifford Irion again recommended WKBW-TV Inc. get grant, holding that it's financially qualified. In Lubbock case, examiner Millard F. French proposed that Texas Tech College get Ch. 5, resolving questions of legal & financial qualifications in its favor.

In Greenwood, Miss., WABG will be free for Ch. 6 grant, now that Delta TV Corp. has decided to pull out.

CPs granted: Champaign-Urbana, Ill., Ch. 33, to Plains TV Corp.; Tampa, Fla., educational Ch. 3, to Fla. West Coast Educational TV Inc.; Durango, Colo., Ch. 72 translator, to Durango TV Translator. CP for KRTV, Walla Walla (Ch. 8) was cancelled.

Allocations actions: (1) Finalized addition of Ch. 13 to Hibbing, Minn., substitution of Ch. 9 for Ch. 13 in Bemidji. (2) Finalized addition of Ch. 9 to Wausau, Wis., substitution of Ch. 8 for Ch. 9 in Iron Mountain, Mich. (3) Denied proposal to add Ch. 9 to Hancock, Mich. (4) Issued rule-making proposing to swap educational Ch. 24, Hartford, with commercial Ch. 53, Waterbury—WATR-TV, Waterbury, to shift to Ch. 24. (5) Issued rule-making proposing reconsideration of decision to add Ch. 8 to Ainsworth, Neb. and Ch. 3 to McCook, Neb.—proposing instead to add Ch. 8 to McCook, shift Ch. 3 from Cheyenne, Wyo. to Sterling, Colo.

Sale of KFEQ-TV, St. Joseph, Mo. (Ch. 2) & KFEQ by Kenyon Brown-Bing Crosby group for \$841,091 to Jesse D. Fine theatre family was approved by FCC this week. (Vol. 13:34). Fine family operates chain of theatres in Indiana and formerly owned WFIE, Evansville, Ind.

Again this season, kinescope recordings of programs will be made available to NBC affiliates.

Meanwhile, New York's Metropolitan Educational TV Assn. announced completion of its production center in the Carnegie Endowment building—nucleus for an eventual non-commercial TV station. Studio will originate programs for live presentation on local stations and filmed use by educational outlets. Covering 44x42-ft. area, it is equipped with 3 image orthicon cameras, kine recording facilities.

This week, META was offered 4 one-hour time periods on WCBS-TV—3:30-4 p.m. Sundays this fall and winter when the New York station is blacked out of CBS-TV's pro football coverage. For first period—Oct. 27—META will present TV debut of famed Budapest String Quartet, which is contributing its services. Other periods haven't been scheduled.

In addition, META will present 4 regular series totaling 3½ hours weekly over WPIX (Vol. 13:36)—mental health series, applications of school subjects to daily life, series on such public institutions as museums & libraries, adult discussion series.

"Golden Mike" TV awards presented by American Legion Auxiliary at Atlantic City convention this week to: *This Is Your Life* (NBC-TV) for "greatest woman appeal," *Lawrence Welk Show* (ABC-TV) for "freshest entertainment appeal," *Disneyland* (ABC-TV) for "widest informational appeal" to youth.

Financial & Trade Notes: Magnavox reports new highs in net income and sales—\$3,759,226 and \$87,467,864—for fiscal year ended June 30. These compare with earnings of \$3,100,442 on sales of \$70,529,646 in previous fiscal year. Per share earnings this year were equivalent to \$3.90 on 890,140 shares outstanding compared with \$3.54 on 841,234 shares year ago. Company said increased number of outstanding shares was due largely to 5% stock dividend.

Increase of 24% in net sales was due mainly to hi-fi sales which chairman Richard A. O'Connor and pres. Frank Freimann said were nearly double those of previous year. Company statement also said "TV sales reflected a substantial increase in spite of the fact that industry sales generally were considerably lower than in the preceding year." Military products sales also were up over previous year.

"While total sales were well ahead of last year," Magnavox statement said, "they were slightly below management expectancy due in part to the company's inability to manufacture sufficient products to meet the peak demand last fall and to the thin market for color TV." It said it had expanded its plant "to meet the expected large demands for its product this fall," anticipating increased sales in all lines.

* * * *

Special stockholders meeting of Skiatron Electronics & TV Co., called to approve new wired pay-TV royalty agreement with Matty Fox's Skiatron TV Inc., was adjourned until Sept. 25 for lack of quorum. Company said approval of proxy statements was received from SEC too late to solicit proxies. Principal purpose of Sept. 25 meeting will be to approve contract with Fox's firm, whereby Skiatron Electronics receives 2½% in royalties from closed-circuit use of its system. It already has contract calling for 5% for broadcast use of its fee system. Stockholders will also be asked to approve increase of 250,000 shares of common stock, and issuance of warrants for these shares to Fox's Skiatron TV at \$5 a share, to run until April 30, 1967. Skiatron closed Sept. 27 at 7¾.

GE has been awarded \$5,000,000 Air Force contract for production of over-horizon single-sideband scatter communications equipment capable of spanning 700 miles in one hop—longest distance to be regularly achieved by scatter. System will be used as main line of communications at advance Arctic bases and was developed and tested under previous \$4,600,000 Air Force contract. Group of 50 leading tropospheric scatter experts will be briefed on new GE scatter system Sept. 26 in meeting at Syracuse GE plant.

FCC relaxed remote control rules this week to permit remote operation of AM directional and FM stations operating with powers higher than 10-kw. Commission said it would consider applications on case-by-case basis, that satisfactory showing of stability directional antennas must be made. No changes were made in requirements for operators—first class operators still being required for directional and over-10-kw stations.

Radio station sales and transfers approved by FCC: WSLB, Ogdensburg, N. Y. by St. Lawrence Bcstg. Corp. for \$190,000 to George W. Bingham and associates (Vol. 13:34) . . . KSEI, Pocatello, Ida. sold 88.9% by Florence M. Gardner for \$118,915 to Pioneer Bestrs. Corp. (Vol. 13:26) . . . KATI, Casper, Wyo. by John L. Breece for \$65,000 to banker John R. Burrus, 51%, and commercial mgr. K. G. Prather, 49% with wife (Vol. 13:35).

Siegler Corp., Anaheim, Cal., which last week merged with Unitronics Corp. through exchange of stock (Vol. 13:37)—taking over latter's Olympic Radio & TV plant in Long Island City, with its 1100 employees making TV-radio-phonos; its Bogen plant in Paramus, N. J., making amplifiers, pre-amplifiers, tuners; its Presto div., making background music, disk & tape recording and playback equipment—emerges as "a corporate entity doing business at an annual rate of approximately \$75,000,000," mostly in the field of electronics "divided nearly equally between commercial and military contracts [with] major manufacturing facilities on both the East and West coasts."

So states Siegler pres. John G. Brooks in supplement to annual report this week, showing sales during fiscal year ending June 30, 1957 rose to \$32,719,078 from \$15,375,034 in 1956 while net income was \$1,036,681 (\$1.36 per share on 761,082 outstanding) vs. \$1,053,059 (\$1.50 on 700,696 shares then outstanding). Stock is traded on ASE. Siegler also is parent of Hallamore Electronics Co., Anaheim, Cal., making closed circuit TV equipment, guided missiles instruments, etc.; Centralia Heater div., Centralia, Ill., gas & oil heating equipment; Consolidated Machinery & Supply Co., Los Angeles (Comet woodworking machinery), into which General Water Heater Corp., Costa Mesa, Cal., was integrated when acquired year ago; Baby Mate Inc., Los Angeles, maker of baby strollers, also acquired last year; Holly-General Corp., Burbank & Pasadena, Cal., recent consolidation of Holly Mfg. Co. and General Water Heater Co., making heating, air conditioning and water heating equipment.

Currently, Siegler is also absorbing Hufford Corp., El Segundo, Cal., said to be world's largest manufacturer of stretch-forming equipment used in making air frames and missiles. Hufford recently acquired Sancor Corp., Santa Barbara, Cal., making ground handling & support equipment for aircraft and missiles; Vac-U-Lift Co., Salem, Ill., Vacuum handling systems; Fonda Corp., El Segundo, maker of film developing machines.

* * * *

IT&T reports net income of \$12,989,254 (\$1.81 per share) on first half net sales of \$295,189,958 and total income of \$326,916,997 compared with net profit of \$12,487,250 (\$1.74) on net sales of \$223,136,059 and total income of \$251,662,490 in similar 1956 period. U. S. sales totaled \$127,228,014 vs. \$81,037,673 in first half of 1956; foreign sales were \$167,961,944 vs. \$142,098,386. Unfilled U. S. orders were \$178,000,000, foreign \$290,000,000, as of June 30.

Emerson reports net profit of \$54,753 (3¢ per share) for 39 weeks ended Aug. 3 compared with \$46,048 (2¢) for similar period last year.

Fox, Wells & Rogers is new name of investment firm formerly called Fox, Wells & Co., as these changes take place: James G. Rogers, pres. and 15% owner of KFSD-TV, San Diego, becomes gen. partner; George B. Wells withdraws as gen. partner; Dr. R. Bowling Barnes changes from general to limited partner; Francis D. Rogers becomes limited partner.

NBC applied for FM station in Philadelphia this week. A company spokesman explained that move was intended to give network "complete facilities" in Philadelphia, as companion to its WRCV-TV & WRCV there.

"Do Radio Networks Have a Future?" is subject of discussion between ABN v.p. Stephen Labunski and radio-man Gordon B. McLendon at Sept. 25 RTES luncheon at Hotel Roosevelt, N. Y.

LITTLE 'TREND' SEEN IN GE LAYOFFS: GE's announcement of plans to lay off 700 employees, candidly stating purpose is to "curtail production of TV sets to keep pace with current and anticipated sales," elicited only one slight echo from major producers -- Motorola, which conceded its set movement wasn't up to expectations.

Spokesmen for other top producers were unrestrained in their reports of sales. These included RCA, Sylvania, Emerson, Philco.

GE production of 1958 sets started earlier than usual this year, gen. mgr. Herbert Riegelman of TV receiving dept. said, noting production stayed at relatively high level during summer. Pointing to Aug. drop in industry's retail sales (Vol. 13:37), he said "we feel that our present level of production must be reduced in line with our sales expectations for the balance of this year."

Layoff is effective Oct. 4 and affects workers on second shift, on subassembly lines making speakers, components, etc. As result, spokesman said, number laid off will not have proportionate effect on production cutback since many of the parts they made could have been stockpiled, and probably were. Riegelman's announcement made no mention of re-hiring.

Motorola pres. Robert W. Galvin provided us with frank statement: "Our market has been disappointing. Our merchandise had apparently been delightfully accepted by the trade, but it was not backed up by wholesale or retail sales in last 2 weeks of Aug. or first 2 weeks in Sept."

Galvin couldn't offer any reason for company's disappointing TV sales position, saying only that the market was not opening up the way it was expected to and people apparently are not buying TV sets.

Responding to our questions, he said Motorola is not thinking now about cutting back production, "but if condition continues this would be an eventuality." He added that he didn't think Motorola's experience in the market has been unique in the industry and that he didn't think prices -- up about 5% from last year -- played significant part in public's failure to buy at expected rate.

"It's difficult to predict what sales will be," Galvin declared, giving as examples years where Aug. & Sept. were good and "Oct. fell on its face," while in other years Oct. turned out to be a banner month.

* * * *

Opposite tack was taken by RCA consumer products exec. v.p. Robert A. Seidel who summed it up this way: "Our business is extremely good -- as a matter of fact we stepped up production a little last week." He said RCA has more orders for recently introduced color sets than "we can ship," but added that factory will catch up with orders in a few weeks.

Aug. retail sales were described by Seidel as "not quite as good for RCA or the industry as we had expected, but Sept. has started off with a bang" -- and no production cutbacks or layoffs are in sight.

"I've felt right along that the industry would go ahead in the fall; that's still the way I see it," Seidel said, pointing to rising rate of spendable income.

Sylvania's Marion E. Pettegrew, operations v.p. in charge of TV-radio div., painted a strong picture of Sylvania sales as being "at a record rate of more than double a year ago and we see no possibility whatsoever of a production cutback." As a matter of fact, he said, demand for Sylvania's new line "is so great we are operating on a 6-day week" and plan to continue the overtime schedule "at least through Oct." His full year estimate: "We expect both record production and sales."

Emerson pres. Benjamin Abrams gave us this view: "I've noted considerable improvement in the market in the last couple of weeks." He sees industry sales running

about the same as last year and added that "this is true also for Emerson." Abrams said he had figured industry's retail sales for the year would be about 6,000,000, but now had revised his estimate to 6,500,000. Only explanation he could give for GE cutback was that it may have overproduced and run up a lot of inventory.

Philco spokesman made clear to us there's been no change in estimate pres. James M. Skinner Jr. gave us last week, namely: That Philco is getting larger share of market than in preceding year; that industry factory sales for year would be closer to 6,500,000 than the 7,000,000 (Vol. 13:37).

To emphasize Philco position, spokesman said company has been hiring TV production workers right along, no cutback is in sight, TV lines are going full blast.

Another facet of layoff was statement by IUE pres. James B. Carey that union will attempt to get a supplemental unemployment benefit program started next Aug. 1 when GE contract provides negotiation on employment security.

Note: During week Whirlpool set Oct. 1 layoffs for 1600 of 7200 employes at Evansville, Ind. plant which turns out refrigerators, freezers, dehumidifiers, air conditioners. GE dropped 1614 workers at household refrigerator div., Louisville, Ky. On other hand, Westinghouse said it had hired 950 employes since Aug. 1 at Mansfield and Columbus, O. making refrigerators, freezers, washers, etc.

Production: TV output was 161,749 week ended Sept. 13, compared with 146,288 preceding week and 157,946 in corresponding week one year ago. It was year's 37th week and brought TV production for year to date to about 4,263,000, compared with 4,901,586 in same period of 1956. Radio production totaled 327,829 (91,068 auto) for week ended Sept. 13 vs. 256,292 (58,451) preceding week and 245,060 (48,177) in corresponding week year ago. Radio output for 37 weeks totaled about 9,631,000 (3,623,000) vs. 9,008,221 (2,920,177) in 1956 period.

Topics & Trends of TV Trade: Current electrical safety standards for TV sets are more than adequate, EIA Engineering Dept.'s Safety Standards Committee has decided after review of safeguards prescribed by Underwriters Labs for TV manufacturers. Chairman J. T. Brothers, of Philco, told Consumer Products Div. at last week's quarterly meeting in Los Angeles that Committee feels there is no need for any change in UL requirements or inspection standards for portable sets. UL requirements for TV & radio sets, he said, are far more severe than for other electrical appliances and TV-radio safety record is better than that of any other electrical devices used in homes. In other actions, EIA board:

(1) Approved recommendation by exec. v.p. James Secret that special committee of EIA directors review industry's part in Hagerstown closed-circuit educational TV project to determine how equipment requirements may be met and to look into potential educational market.

(2) Received progress report from Educational Coordinating Committee indicating "an increasingly alarming situation in future technical manpower needs."

(3) Was told by Service Committee that EIA lab manual, *Basic TV & TV Receiver Servicing*, with accompanying instructors' guide, will be published in few weeks.

* * * *

EIA membership applications approved at Sept. 12 board meeting in Los Angeles: Bureau of Engraving Inc., Industrial div., Minneapolis; Entron Inc., Bladensburg, Md.; Eraser Co. Inc., Syracuse; Greman Mfg. Co. Inc., Wakefield, Mass.; G-V Controls Inc., E. Orange, N. J.; Insul-8-Corp., Electronics div., San Carlos, Cal.; International Electronics Corp., N. Y.; Kentron Hawaii Ltd., Honolulu; Lockheed Aircraft Corp., Missiles System div., Sunnyvale, Cal.; Pomona Electronics Co. Inc., Pomona, Cal.; Science-Electronics Inc., Cambridge, Mass.; Temco Aircraft Corp., Dallas.

TV shipments to dealers totaled 2,969,251 in first 7 months of 1957, when production was 3,082,799, according to EIA state-by-state report. They compare with shipments of 3,225,180, production of 3,752,133 in similar 1956 period. July shipments were 465,285, compared with 382,699 in June and 450,158 in July 1956. Here's 7-month report (county-by-county tables available to EIA members):

State	Total	State	Total
Alabama	44,235	New Jersey	108,289
Arizona	18,391	New Mexico	12,175
Arkansas	25,989	New York	357,835

Radios shipped to dealers in first 7 months of 1957 totaled 4,018,236 compared with 3,912,693 in similar 1956 period, EIA reports. July shipments were 581,808 vs. 765,719 in June and 641,884 in July 1956.

Excise taxes on TV-radio-phonographs-components, etc. amounted to \$34,475,000 in quarter ended June 30, compared with \$34,909,000 in same 1956 quarter, reports Internal Revenue Service. Total for year ended June 30 was \$149,192,000 vs. \$161,098,000 in 1956 fiscal year.

Trade Personals: J. B. Dow elected pres. of Hazeltine Corp. electronics div.; W. H. Wilson, exec. v.p. for operations; R. L. Beam, exec. v.p. for engineering; W. Kes, asst. v.p. & head of mechanical engineering dept.; J. P. Hansen, asst. v.p. & head of project administration dept.; R. K. Hellmann, asst. v.p. & head of test engineering dept. . . . Allen B. DuMont Jr. promoted to mgr. of DuMont TV receiver div. . . . Rear Adm. Richard S. Mandelkorn (USN ret.) named mgr. of operations, Philco's Lansdale Tube Co. . . . Roy A. Juusola, ex-Sylvania, appointed CBS-Hytron marketing administration mgr. . . . John Reine, Graybar central district mgr., elected v.p., joins N. Y. headquarters staff Jan. 1 . . . George Gemberling promoted to sales mgr., Alliance Mfg. Co. consumer products div.; Ray Buhrman to asst. sales mgr., consumer products div., retaining post of adv. mgr. . . . Wm. T. Marx, ex-Celanese Corp., named Raytheon director of personnel relations . . . Stanton Ruby resigns as Emerson district sales mgr. for Tex. and southwest . . . Dr. James G. Buck, ex-Sylvania, named Erie Resistor director of research & development; Frederick E. Lehman, ex-Hughes Aircraft and Hamilton Watch Co., appointed chief mechanical engineer . . . J. P. Gordon named gen. sales mgr. of Pye Canada, replacing sales director I. H. Nixon, resigned.

Dr. W. R. G. Baker, GE v.p. and EIA pres., is reported continuing very satisfactory progress at St. Joseph's Hospital, Syracuse, where he's taking physical therapy following June 9 arterial spasm. He's expected back on job as EIA pres. in few months.

DISTRIBUTOR NOTES: Westinghouse Appliance Sales appoints H. M. Gansman Jr. as sales mgr. for TV, room air conditioners and vacuum cleaners for Philadelphia branch . . . Sylvania appoints Siebert and Willis Inc., 149 N. Rock Island, Wichita, Kan. (Carrol Willis, pres.) for TV-radio . . . Philco appoints Lehr Distributors Inc., 16 W. 61st St., N. Y., for radios, including transistor radios . . . Raymond Rosen & Co. (RCA), Philadelphia, sales promotion mgr. Robert Boyle resigns . . . Admiral appoints Anthony Jannicelli to adv. & sales promotion mgr., N. Y. div.

National TV Week campaign reports from 50 major cities show TV sales increased "30% above normal sales for the period," says NARDA exec. v.p. A. W. Bernsohn, chairman of week's steering committee. Local chairmen were given credit for week's success and Bernsohn pointed out that some of same group are continuing to push TV Fall Festival "to increase TV's share of the consumer dollar."

Magnavox non-metal 17-in. portable is planned for Oct. 1, says merchandise mgr. George H. Fezell who states that set has been under consideration since May 1—long before Skokie accidental electrocution (Vol. 13:29, 31-32, 36). He said new sets will be superior to metal-cabinet receivers not only because they eliminate shock hazard but because of more attractive decor and improved sound.

RCA-NBC closed-circuit telecast (Vol. 13:36) Sept. 4 went over "extremely well" with only one exception, reports Robert A. Seidel, RCA exec. v.p. for consumer products. Only mishap was at Columbus, O. where someone opened swinging door, cutting cable and interrupting sound for 40 minutes.

First TV-equipped auto to be offered on U. S. market is Rolls-Royce, now beginning American sales drive. As an optional extra with both the \$12,800 Silver Cloud and the \$19,500-up custom-built Silver Wraith, rear-seat TV will be provided for \$650.

ELECTRONIC PERSONALS: Curtis B. Hoffman named gen. mgr. of Clevite's Brush Instruments div., James D. Lightbody gen. mgr. electronics components div., Thomas E. Lynch gen. mgr. ordnance div. . . . Dr. Bernard Jacobs, ex-Sperry-Rand semiconductor div., appointed General Transistor v.p. in charge of research . . . Vernon L. Haag, ex-Gray Mfg. v.p., joins Farnsworth Electronics as v.p. in charge of missile test equipment . . . Marvin Hobbs, ex-American Bosch-Arma Corp., named marketing director, Stewart-Warner Electronics . . . J. Vance Holdam, asst. to pres., promoted to operations v.p., Lab for Electronics . . . Dr. Wm. F. Ballhaus, ex-chief engineer of Hawthorne div., promoted to gen. mgr. of Nortronics, new electronics div. of Northrop Aircraft Inc., Hawthorne, Cal.

TV industry is described by S. R. Herkes, Motorola merchandising v. p., as one in which increased labor and material costs have put the squeeze on in one direction, while competition pressures against raising prices at other end. In Sept. 18 talk to 5th marketing conference of National Industrial Conference Board in N.Y., Herkes said "cost slicing is an obvious and constant necessity." He gave as example Motorola's "Tube Sentry" program of reducing tube failures, saving \$250,000-\$500,000 annually in warranties.

Litton Industries is purchasing Maryland Electronic Mfg. Corp., College Park, Md. by payment of undisclosed amount of Litton stock. Maryland firm has 335 employes, produces air navigation aids, radar antennas and telemetering equipment. Total Litton employment will amount to 3000 in 12 plants in 5 states; its sales for year ended July 31 are estimated at \$28,000,000. Wm. R. Morse will continue as pres. and chief operating officer of Maryland Electronics.

Olympic Radio & TV reports Aug. unit factory sales up 48% over last Aug., radio sales up 69%, hi-fi up 383%. Morton M. Schwartz, sales v.p., says "our back order position is now over 8 weeks normal production, necessitating third quarter production step-up of 80% over third quarter of 1956."

Madison Ave. dealer, Schramm Service Corp., drops other lines, retains DuMont TV & hi-fi, marking "first time an independent dealer has taken on the DuMont line exclusively," says DuMont N. Y. gen. mgr. Paul A. Hilton.

First portable-auto radio will be offered as optional equipment, at undisclosed price, with 1958 Oldsmobile. Transistorized set can be plugged into dashboard compartment or removed and used as self-contained portable.

Magazine merger: *Mart* publisher Buttenheim Pub. Corp. buys *Electrical Dealer* from Haywood Pub. Corp., *Mart* the survivor. Buttenheim bought *Mart* from Caldwell-Clements last year.

Transparent flat CR tubes developed by Kaiser electronics div. are currently being tested on military aircraft, Chief of Naval Research Rear Adm. Rawson Bennett told American Legion group in Atlantic City last week end.

Reports of GE color TV production and promotional step-up brought this comment from spokesman: "We are going to continue to try to sell color TV and have provided dealers with promotional material."

Westinghouse boosts portable TV prices by \$10, with three 17-in. 90-degree carryover models going from \$160 to \$170; three 17-in. 110-degree sets from \$180 to \$190.

Sylvania Promotion-of-the-Month for Oct. is \$35 electric blanket to be given with any Halolight set.

Sylvania adds 17-in. 110-degree non-ion trap picture tube (17BWP4) for renewal market.

Muzak is added to impressive list of properties held by expansion-minded Jack Wrather, who this week joined with investment banker John L. Loeb, of Carl M. Loeb, Rhoades & Co., to buy the background music organization for \$4,350,000. Relative holdings of Wrather and Loeb weren't disclosed. Sellers were ex-Sen. Wm. Benton and Muzak pres. H. E. Houghton. Among oilman Wrather's other holdings: KFMB-TV & KFMB, San Diego; KERO-TV, Bakersfield, Cal.; *Lassie, Lone Ranger, Sergeant Preston of the Yukon*, Disneyland Hotel. Included in Muzak purchase are WBFM (FM), N. Y.; 146 Muzak franchises in U. S., Canada & Europe; N. Y. tape recording plant; 10,000 recordings. Announcing the purchase, Wrather stated: "We believe the future of Muzak is limitless, not only in the field of background music, where we intend to work toward strengthening our franchisers' operations, but also in the area of electronic tape development for sound & TV and in the utilization of its outstanding research facilities and talents for the development of hi-fi, audio communication, and other electronic equipment for the public." Muzak founder Benton said principal reason for selling was to devote more time to "politics and public service." Allen Kander & Co. negotiated sale.

War scare in Hartford, Conn. this week as result of extremely realistic telecast on CBS-owned WHCT was reminiscent of nationwide "invasion from Mars" panic caused by Orson Welles' 1938 radio broadcast—except there apparently was no panic and scare subsided almost immediately after first half of 30-min. telecast marking National Civil Defense Week. Program, *Eye on Connecticut* (noon, Sun. Sept. 15), was introduced as documentary show and audience was told "This is what would happen in case of an attack." Then an announcer "interrupted" program to announce report of unidentified planes approaching North America over North Pole. Rest of show was filmed, showing evacuation of Hartford (from civil defense drills), launching of Nike missiles, fighter planes taking off, etc. Newspapers, TV stations and police headquarters immediately were bombarded with worried inquiries, offers to help, queries as to quickest way out of town. Puzzled police sent squad car to WHCT to investigate, and station made announcements to assure viewers there was no war.

After failing to find source of TV interference plaguing London's Lavender Hill section, British Govt. electronics experts this week put Scotland Yard detectives on case. Sleuths traced TV noise to basement of a home, where they discovered the appliance causing the interference was a printing press—engaged in process of printing up reasonably accurate facsimiles of British £5 notes. About £200,000 (\$560,000) in spurious bills were found on scene, biggest haul of forged currency ever made in Britain. The 4 printers were arrested, the charges including suspicion of causing TV interference.

Broadcast color studio camera, based on conventional 3-tube image orthicon design, will be introduced by GE early next year. Said to be smaller and easier to operate than currently available cameras, pilot model will be installed within a month at new studios of GE's WRGB, Schenectady. GE spokesman said price would be "extremely competitive." GE's "Chromacoder" color camera, developed several years ago and exhibited to telecasters, has been shelved.

Closed-circuit industrial TV still isn't a full success, notes Sept. 14 *Business Week*, because of lack of substantial sales effort and difficulty of engineering individual installations. But, feature article notes, "there's a strong feeling that the industry is about to pop, and everyone wants to be there when it does."

"What's With Color TV Sales?" titles Marie Torre's column in Sept. 19 *N. Y. Herald Tribune*, an interview with noted TV producer Max Liebman who states. "There are many reasons why color TV has not 'taken' with the American public as rapidly as had been anticipated, but a striking one is the sheer lack of dramatic exploitation. Oh, sure, NBC & RCA have exerted a great deal of sweat and strain, plus money, to hypo the dealers into a high pitch of selling fervor. But what's been done to excite the general public?" His solution: "Now, if RCA were to designate a 'Color Week,' and in this week, an exciting color spectacular could be seen each night, the impact would be tremendous. If shows similar to *Peter Pan, Babes in Toyland, Marco Polo* . . . could be viewed one night after another for a week, and if this 'Festival of Color' were ballyhooed and promoted to the hilt, a viewer would feel he was missing something if he did not own a color set." Liebman conceded this would be enormous job but claimed it could be done. He concluded: "If this doesn't result in encouraging more reaction from public . . . it's doubtful if anything will."

Good series of papers lined up for Oct. 8 broadcasting session during AIEE fall general meeting in Morrison Hotel, Chicago: color & monochrome CR tube performance tests, by Charles F. Otis, Philco; TV station coverage prediction & measurement, D. W. Peterson, RCA Labs; video tape, Howard A. Chinn, CBS-TV; telecasting radiating system, Andrew Alford & Harold Leach, Alford Mfg.; TASO, George R. Town, TASO exec. director; the systems approach to determination of TV coverage, Robert M. Bowie, Sylvania; performance of vhf & uhf transmitting & receiving equipment, Wm. J. Morlock, GE, and Wm. O. Swinyard, Hazeltine Research; measurement of TV field intensities and relationship between field intensity & picture quality, Howard T. Head, A. D. Ring & Assoc.

Network radio again was "fastest growing" national medium as reflected by *Printers' Ink* index for July, published in Sept. 20 issue. It was up 14% from June, 21% from July 1956 and for first 7 months of 1957 was up 10% over similar 1956 period—leading all media in each category. Network TV was up 6% from June, 2% from July 1956 and 6% for first 7 months of this year over last. All media were up over July 1956 except newspapers (which were unchanged) & general monthly magazines (down 2%).

First two of 8 NARTB regional meetings, Sept. 16 at Schenectady and Sept. 19 at Cleveland, heard pres. Harold E. Fellows urge broadcasters to take unified and vocal stand to preserve freedom of American broadcasting, particularly on such matters as pay TV (see p. 1). At Schenectady session, GE chairman Philip D. Reed called for improvement of business climate, telling broadcasters to encourage leading businessmen "to get from behind their desks and in front of your microphones and cameras to give the people their views on public issues of local or national consequence."

RCA announces "tube savers" to eliminate burn-in and sticking in monochrome and color image orthicon cameras: (1) Orbital Wedge, now available, for color studio cameras. (2) Orbiter, for monochrome cameras, to be delivered later this year. Both are \$750.

Investigation of Justice Dept. policies in negotiating consent decrees in disposing of anti-trust suits was announced by House monopoly subcommittee, Chairman Celler (D-N. Y.) setting 4 days of public hearings to begin Oct. 1.

Single application for TV station filed with FCC this week was for Erie, Pa., Ch. 66, by owners of WERC there—bringing total to 116 (33 uhf). Translator total stands at 39. [For details see *TV Addenda 25-H* herewith.]

SUMMARY-INDEX OF THE WEEK'S NEWS — September 28, 1957

FCC NETWORK STUDY staff report—about 1500 pages—due next week, described as "tough." Commission sets up permanent network study (p. 1).

CABLE TOLL TV takes spotlight as telecasters, movie industry eye profit potentials and astronomical starting costs (pp. 2 & 5).

NETWORK CIRCUIT JAM for fall-winter eased by give-&-take among networks; circuit allocations on 3 minor routes only (p. 3).

CBS BUYS KWK-TV, St. Louis, for \$4,000,000, turning over Ch. 11 CP to competitor. FCC approves NBC buy of Pittsburgh's radio WJAS (p. 6).

FCC ADDS VHF CHANNEL to Portland, Ore., opens educational channel in Eugene to commercial applicants; considers other proposals (p. 6).

TV-RADIO SERVICE will be \$3.97 billion business in 1966, Sylvania's Mansfield predicts; sees 53,760,000 monochrome, 18,840,000 color sets then (p. 9).

SARNOFF PREDICTS MORE electronic wonders: Cigarette-pack radiotelephone, electronic "doctor," typewriter which takes dictation (p. 10).

COMMERCIALS IN COLOR up to 1½ times more effective than monochrome, Schwerin Research study indicates. Color seen best for "taste" products (p. 9).

TV AS EDUCATIONAL TOOL continues to amaze with startling demonstrations of power. 6:30 a.m. show causes run on bookstores in New York (p. 7).

NEW UHF STATION goes on air in all-uhf Ft. Wayne—WPTA, owned by TV pioneer Sarkes Tarzian, bringing on-air total to 512 stations (p. 8).

FCC NETWORK REPORT DUE—AND IT'S TOUGH: Next week FCC's high-powered network study group hands over to the Commission the fruits of its 2-year labors—a report said to comprise about 1500 mimeographed pages.

Group headed by U of Cincinnati law school dean Roscoe L. Barrow has worked in secrecy—but speculation is that it will be a "tough" report, a very tough one, possibly with recommendations even less palatable to networks than those of Celler subcommittee.

Barrow's document will be labeled "staff report," to be released Oct. 3 to press and to FCC's Network Study Committee (Comrs. Doerfer, Hyde & Bartley), which will consider it and make recommendations to full Commission.

■ ■ ■

FCC this week set up permanent Office of Network Study "to assist the Commission in dealing with problems relating to radio & TV networks"—and, according to Dean Barrow, to help "implementation of the report." It will have total staff of 8 or 9, understood to comprise economist, 2 lawyers, statistician, clerical help—drawn from present network study personnel. It will have chief—yet to be named—who will report to Broadcast Bureau chief Harold Cowgill.

Dean Barrow and most of the other outside experts hired for the study will leave shortly, having completed job. Barrow will return to his post at U of Cincinnati, but says he will continue to be available to Commission as consultant.

■ ■ ■

As FCC wound up its investigation of broadcasting industry, Congress' investigation of FCC began to gather steam. Chief counsel Bernard Schwartz of Rep. Moulder's legislative oversight subcommittee told us his appeal to TV-radio attorneys and others to supply him with information (Vol. 13:38)

has had "surprisingly good results" so far, resulting in "very useful information—much more than we thought we'd get."

He confirmed that subcommittee staffers are checking through every comparative hearing TV case since freeze-end in search of leads, but said that tips from "interested public" would dictate which cases would be investigated in detail. He said he still hopes for hearings early next year.

A grizzled veteran in the TV investigation field—Rep. Celler (D-N. Y.)—this week let loose some of bitterest invective against TV industry that has ever come from a lawmaker. Addressing N. Y. ATAS luncheon, he fired volley after volley at network programming practices, which he described as "the rape of the airwaves."

He accused networks of "grubbing for gold at the end of the TV spectrum" through sameness of programming and lowest-common-denominator appeal. "The goal is not the integrity of performance but the clink of coin into the sponsor's coffers, the smell of the green bill," he said.

Turning to another of his favorite subjects, he predicted that fee TV (which he called "gas meter television") would be converted to an advertising medium if it became entrenched. He also predicted Congress would pass his bill to make advertising subject to Robinson-Patman act, thereby regulating TV-radio sponsorship discount structures. While he was at it, he denounced program rating systems.

Another Congressional critic of FCC has appeared in form of new Sen. Wm. E. Proxmire (D-Wis.), who inserted in Sept. 19 Congressional Record reprint of Harper's Magazine article "The Scandal in TV Licensing" (Vol. 13:35). Proxmire states: "The possibilities for arbitrary bureaucratic decision—and monopoly in a powerful medium of communication—exist in the structure of the FCC and the laws affecting that agency. There is some evidence that authority has been abused." In same issue of Record, Rep. Wm. G. Bray (R-Ind.) attacks FCC's award of Indianapolis' Ch. 13 (WLWI) to Crosley.

CABLE TOLL TV TAKING CENTER STAGE: With on-air pay TV due for more delays because of Congressional intervention (Vol. 13:38), the wired toll-TV enthusiasts are attracting more attention than ever.

While cautious optimism was being expressed about progress of the only pay system extant, in little Bartlesville, Okla. (see p. 5), telecasters and movie people are uneasily eyeing astronomical expenditures required to wire up big cities, wondering if this will ever come to pass and who will inherit it.

NARTB's Charles H. Tower, describing hypothetical wire setup, and warning that figures are full of "ifs," gives this projection for system (using decoders) covering 106,875 TV homes in city of 500,000: Equipment investment, \$10,721,875 (\$100.32 per home); yearly operating (excluding programming costs), \$3,226,563 (\$30.19 per home). Of revenues, Tower says: "There is some reason to believe that an average expenditure of \$70-\$75 per household per year is possible if there is a desire to spend it for this service." Assuming \$72.50 per home, gross revenue could be \$7,748,438. Programming cost is assumed to be one-third of intake, leaving net revenue of \$5,165,625. Deducting operating costs leaves \$1,939,062, which, after taxes, produces about 10% return on investment.

In Hollywood, speaking before Screen Producers' Guild Sept. 24, Jerrold Electronics pres. Milton J. Shapp compared non-decoder wired system with decoder setups. For 150,000 subscribers in city of 1,000,000, non-decoder system would run \$11,000,000 for equipment (\$73.50 per home) and \$5,250,000 annual operating costs (\$35 per home), excluding programming costs. Shapp said Skiatron system would cost \$15,250,000 to install (\$102 per home), \$11,400,000 to operate (\$76 per home). Telemeter is listed at \$18,100,000 installation (\$122 per home), \$11,550,000 operating (\$77 per home).

Shapp reiterated his reasons for believing telecast toll would fail (code-breaking, collection problems, etc.), said he hopes subscription TV will be authorized so that it can "fall flat on its face."

Pay TV is inevitable," station operator and TV film producer Jack Wrather told meeting of National Community TV Assn. in Los Angeles this week, and he urged telecasters to control it—rather than let it go over to movie exhibitors on a wired basis. He opined that exhibitors would then stifle pay TV because they wouldn't want to compete with themselves.

In San Francisco, KRON-TV mgr. Harold P. See was moved to announce continued opposition to telecast toll but to add: "While KRON-TV has instituted exploratory action toward taking part in [cable pay TV], we have not officially applied for a franchise and are watching developments with interest. If it seems necessary and desirable, we may eventually decide to become an operator of this kind of wired pay TV."

In Washington, meanwhile, FCC staff continued polishing up proposal to invite applications to test toll (Vol. 13:38). Commission may meet on subject late next week, more likely week after. (For other subscription TV developments, see p. 5).

GIVE-&TAKE EASES NETWORK CIRCUIT JAM: AT&T, the networks and other intercity video users this week reached agreement on a plan for fall-winter cable-microwave use which—by the skin of its teeth—avoids a throwback to circuit allocation on principal "backbone" routes.

Allocations—or rationing among networks—will be necessary on a regular basis only along 3 side links. Two of these legs (locations undisclosed) serve one station each and allocations will be made between 2 networks; the third serves 3 stations, and route will be shared by 4 video circuit users.

Agreement on plan was reached only after months of meetings among networks and other AT&T video contract customers. AT&T said avoidance of major allocations was due to "additional facilities."

Certainly AT&T has done amazing job of adding to video circuits, but nobody—least of all AT&T—had been prepared for the deluge of requests for network lines which piled up by the July 29 deadline for filing requirements (Vol. 13:23-24). We learn that, in addition to the new facilities (which, of course, had been taken into account this summer when situation looked so alarming), major circuit-rationing was avoided only through great deal of give-&-take among users, including the toning down of some grandiose plans.

Avoidance of allocations applies in the case of "contract" users of long-lines facilities only. "Occasional" or "special" uses—such as originations of some unscheduled sports, special events or closed-circuit telecasts from out-of-the-way or unusual places—will meet really formidable problems and will have to be negotiated on case-by-case basis.

■ ■ ■

Agreement covers circuit use through end of standard time period April 26. These are some factors which helped make it possible:

(1) Some new network video users dropped their requests for contracts. These are understood to include at least one closed-circuit network—but its not known whether closed-circuit toil-TV interests such as Skiatron were involved in the negotiations or whether all closed-circuit applicants were of the occasional-use business-meeting & theatre-TV stripe.

(2) Also dropping out of race for time being was Pat Weaver's Program Service network, which has—at the very least—postponed its plans for any extensive intercity video routes. It's believed that another "fourth network" also is delaying or cutting back plans for live programming.

(3) Ancient L-1 coaxial cable will be used for TV again to solve networking problems in some areas, though its narrow bandwidth degrades picture somewhat.

(4) Networks toned down original demands considerably. Keyed to video tape recorders, their first contract requests had envisioned heavy employment this season of clock-time programming—involving maximum of 4 separate transmissions of each program for the 4 time zones. There was some speculation that development of Ampex recorders—with their great possibilities—was largely responsible for severity of jam-up in network circuit requests.

■ ■ ■

Networks will do quite a bit of tape repeating for western areas—but complete clock-time plans have been shelved for time being. CBS, for example, currently has 25 hours of taped programming a week on air, some of the tapes being run twice for different time zones. Central and mountain time zones

currently receive many CBS shows one hour later than eastern zone 6 nights a week, are on New York time schedule one night.

AT&T video circuit users already are girding for an even tighter situation next spring, complicated by regional baseball pickups—particularly if Los Angeles & San Francisco baseball games are relayed to east coast. Networks are understood to be planning meetings among themselves in next few weeks to adjust their circuit requirements for next spring before bringing them to AT&T.

In agreement this week, regional TV baseball coverage from beginning of ball season to April 26 couldn't be fitted into circuit-use schedule, and will have to be jigsawed in later.

■ ■ ■
Note: Rumors this week—neither verified nor denied by principals—had color tape recording nearing testing stage, with CBS-TV reportedly planning to begin program experimentation before year's end. Presumably, development will be in cooperation with Ampex. Because of stony silence on both sides, best guess is that rumor isn't 100% false.

Personal Notes: Russell Clancy and Charles W. Goit named national sales directors, with equal responsibilities, in national sales & production step-up by TPA . . . B. Gerald Cantor of Cantor, Fitzgerald & Co. (investments), Robert I. Westheimer, Cincinnati stockbroker, and Jack M. Ostrow, Cal. attorney & entertainment industry business mgr., added to NTA board . . . John B. Soell, mgr. of WISN-TV & WISN, Milwaukee, adds title of v.p. of parent Hearst Corp. . . . Glen Joseph Porter, ex-ABC Films, and John Ettelson, ex-KGW-TV & KPTV, Portland, named NBC TV Films sales reps for Fla.-Ga.-Ala. and Pittsburgh-western Pa., respectively . . . King Horton, ex-McCann-Erickson, named v.p., Teletudios Inc. . . . Bill Barron resigns as public relations director, KHJ-TV, KHJ & Don Lee Broadcasting System, Hollywood . . . H. Lloyd Taylor Nov. 1 becomes mgr. of adv. & promotion, du Pont film dept., succeeding Leroy B. Steele, retiring . . . Andrew J. Murtha, asst. secy.-asst. treas., Twin States Bcstg. Inc. (WFBM-TV, Indianapolis & WTCN-TV, Minneapolis) named business mgr. of WFBM-TV . . . Karl Nelson, ex-WICU, Erie, named director of sales development, WTAR-TV, Norfolk; Patrick Arnoux, ex-WRAL-TV, Raleigh, appointed production mgr. . . . Elmer Alley, ex-WSAV-TV, Savannah, appointed exec. producer, Charles H. Cash Jr., ex-WTVD, Durham, promotion mgr., WSM-TV, Nashville . . . James G. Wharton, ex-WLAC-TV, Nashville, named adv.-promotion director of WSIX-TV, same city . . . Robert W. Cochran promoted to Los Angeles district sales mgr., GE TV-radio broadcast equipment, succeeding F. R. Walker who moves to similar post with GE closed-circuit TV.

Associated Press Radio & TV Assn. elects Daniel W. Kops, WAVZ, New Haven, pres., succeeding Jack Shelley, WHO, Des Moines. Other officers chosen at Sept. 23 board meeting: Tom Eaton, WTIC, Hartford, 1st v.p.; Joe H. Bryant, KCBD-TV, Lubbock, Tex., 2nd v.p.; Jack Dunn, WDAY-TV, Fargo, N. D., 3rd v.p.; Wm. W. Grant, KOA, Denver, 4th v.p. AP asst. gen. mgr. Oliver Gramling was reelected secy.

Rapidly expanding NTA, whose gross annual sales climbed from \$350,000 to \$18,000,000 in 3 years, announces executive reorganization: Pres. Ely A. Landau moves up to new post of chairman & chief exec. officer; exec. v.p. Oliver A. Unger becomes pres.; v.p. Harold Goldman becomes exec. v.p.; operations-administration v.p. Edythe Rein gets title of senior v.p.

Obituary

Wayne Coy, 53, former FCC chairman who died in Indianapolis of heart attack Sept. 24, played strong role in laying foundation of today's TV structure during his 1947-52 tenure. It was under his leadership that pattern of station allocation, as it exists today, was established. He also headed Commission during its consideration of color TV standards, concluding with adoption of incompatible CBS system—which never got going commercially and was replaced with current compatible standards. During color fight, in which Coy provoked opposition of most of industry, he was accused of being "anti-industry." On other hand, he was also charged with being too meticulous in giving all parties their full "day in court" in Commission hearings—thus prolonging the famous TV freeze from an expected few months to some 3½ years. Extremely quick-witted, rather hot-tempered, Coy delighted in debate, was a shrewd parliamentarian in Commission meetings. Native of Indiana, he was a newspaperman before becoming asst. to Gov. Paul V. McNutt in 1933. In 1941, he became President Roosevelt's liaison with Office of Emergency Management, was appointed asst. budget director in 1942. In 1944, he joined *Washington Post* as asst. to publisher and as director of its WINX. During FCC tenure, he attracted attention of *Time Magazine* executives. When *Time* bought KOB-TV & KOB, Albuquerque, for \$900,000 in 1952, he was made 50% owner, pres. & gen. mgr. After *Time's* purchase of Bitner stations (Vol. 13:16), Coy came to Indianapolis to head local WFBM-TV & WFBM and Minneapolis' WTCN-TV & WTCN. After leaving Commission, he was ill frequently, sometimes seriously. Surviving are his widow, 2 sons, mother, brother, sister.

ADVERTISING AGENCIES: Frank L. Henderson, ex-Young & Rubicam, appointed v.p., account supervisor & member of plans group, Sullivan, Stauffer, Colwell & Bayles . . . Nathan Schiller, ex-Politz Research, appointed director of sampling & statistical dept., McCann-Erickson's Market Planning Corp. . . . Wm. Wylie, TV-radio account executive, named assoc. director, program services div., McCann-Erickson . . . Wm. L. La Cava, ex-Compton Adv., named exec. producer, Cunningham & Walsh radio-TV dept. . . . E. J. Owens resigns as v.p., Kudner Agency . . . Philip C. Kenney, assoc. media director, & Robert R. Burton, mgr. of Chicago office, named v.p.'s, Kenyon & Eckhardt . . . Eric A. Jensen, ex-J. Walter Thompson, becomes producer, director & business mgr. of Warwick & Legler TV dept.

BARTLESVILLE wired pay-TV operation to date was described in detail, and with considerable candor, by Henry S. Griffing, pres. of owner Video Independent Theatres, in New York press conference Sept. 23.

He reported system has 472 subscribers plus 271 more waiting to be hooked up—toward estimated break-even point of 1500-2000 subscribers, among the 5200 families in town.

Reiterating that "survival" was sole objective of trying cable TV, Griffing reported that admissions to his 150-theatre chain were down 40% in Aug. from 1952. He said VIT has franchises in Oklahoma City, Tulsa, Albuquerque, Lubbock & Midland, Tex.—will consider cable theatre in those cities if Bartlesville is successful.

Comparing cable movies with VIT's conventional community antenna system operations in other towns, Griffing said he expects similar pattern of development—with "a year of hard sell to put it across." He said that \$9.50 monthly charge was arrived at by taking VIT's usual \$7 CATV fee and adding expected cable movie programming costs.

Capital cost of system: \$106,000 for primary cable and amplifiers, \$100,000 for studio (or "booth") equipment, plus about \$35 for each tap from main cable to home. System employs 2 projectionists, 2 engineers, one supervisor—operating 2 shifts. Cost of leasing cable from phone company is \$38,000 annually for 5 channels, under 5-year contract.

Considering a metering system, primarily to calculate payments to movie producers, Griffing said development of equipment is about a year off. He said he'd sought to

experiment with Skiatron coinboxes but none have been produced.

Griffing stated that on-air scrambled systems are "entirely impractical;" that "open wire" systems (as opposed to shielded coaxial cable) are inadequate; that no advertising on system is contemplated because setup is regarded solely as extension of theatre; that VIT leaves set servicing strictly alone.

* * * *

Other subscription TV developments:

(1) Skiatron Electronics reports that its franchise holder, Matty Fox's Skiatron TV Inc., has contracts to acquire film for its proposed San Francisco closed-circuit operation; that Fox will pay it 2½% of gross returns on closed circuit, compared with 5% for on-air.

(2) Writers Guild of America, West, served notice it would seek extra payment for films played on cable theatre.

(3) NATESA, national receiver servicemen's organization, called on FCC not to okay toll tests, stating subscription TV would be "mortal blow" to servicemen because pay-TV operators would want exclusive rights to service sets.

(4) International Telemeter placed full-page ad in Sept. 25 *Variety*, stating it has received so many requests for franchises that it begs applicants to be patient while waiting for reply.

(5) Editorially, Sept. 22 *Washington Star* (WMAL-TV) congratulated FCC for moving cautiously, while Sept. 24 *N. Y. Herald Tribune* called Commission move "overly cautious" but a "real step" forward.

(6) Poll of uhf stations by Committee for Competitive TV showed operators 10-to-1 opposed to toll TV.

Telecasting Notes: Is there a correlation between a show's popularity and the presence or absence of an exclamation point in its title? This may be a matter best left to motivation researchers, but we can't help noticing that as of this week NBC-TV no longer has a single show using the exclamatory appendage, while CBS-TV still has 2 (we haven't researched ABC yet) . . . NBC has been quietly snipping the "!" from its titles, presumably on basis of well documented depth research. Last summer, in fact, when the "new" *Tonight!* was doing badly in billings and ratings, the "!" was removed (accompanied by a format & cast change) and all reports indicate the show is now a hit. This week, same network removed its last exclamation point—from Martin Agronsky's 2-week-old *Look Here!* (now known as *Look Here*)—immediately alerting industry to rating improvement possibilities . . . CBS-TV, on other hand, has determinedly held over its 2 "!" shows without title change—*Climax!* and the unique internally-exclaimed situation comedy *Oh! Susanna*. There were trade rumors this week that network was considering changing latter to *Oh Susanna!*, or possibly even *Oh! Susanna!*, but spokesmen(!) were silent, explaining that the situation is highly competitive(!) . . . Networks' thorough and analytical coverage of Little Rock integration story received near-universal kudos from critics . . . No more picture copy airline plugs on CBS-TV, which Sept. 15 put its new policy into effect. From now on, the cuffed "transportation provided by" mention will be confined to mere line in crawl, along with other credits . . . \$3,000,000 gross daytime business has been placed by 5 advertisers since first of month, NBC-TV announces . . . CBS-TV has turned Sat. 10:30-11 p.m. period back to stations for local sale . . . "Largest TV package in Canadian history" has been bought by GM on CBC—60 min. weekly

on English-language network and 30-min. on French network, featuring Canadian talent, plus U. S.-originated *Chevy Show*, *Big Record* & *Patrice Munsel Show* . . . Ford's new Edsel div. signs \$3,200,000 deal for alt. sponsorship of 60-min. NBC-TV *Wagon Train* 26 weeks beginning Oct. 23 . . . Mike Wallace goes on film for overseas interviews which he hopes will include such diverse and controversial celebrities as Charlie Chaplin, Bertrand Russell, King Farouk, Ingrid Bergman & Sophia Loren . . . Fremantle of Canada to represent NBC TV Films . . . First new-season Trendexes indicate close 3-way battle in many time segments, Sept. 25 *Variety* headlining "End of the Run-away Ratings" . . . More members of Congress watch NBC-TV news programs than those of other networks, network announced on basis of poll by independent research firm. According to NBC-TV, results were 43.8% for NBC-TV, 41.1% for CBS-TV, 12.3% for ABC-TV . . . Basic TV training course for ad agencies and sponsors will be offered by Los Angeles' KNXT in form of two 6-hour sessions, probably starting next month.

Color TV's impact on newspapers is theme of ad in Sept. 21 *Printers' Ink*, placed by ink manufacturer Geo. H. Morrill Co. div. of Sun Chemical Corp. It states in part: "It will take color to sell color TV sets and create an audience for color programs. The color impact in TV commercials is certain to lead advertisers to use color in newspaper ads too. No question about it . . . color TV will provide the impetus to boom newspaper color advertising."

New reps: KERP-TV, El Paso, Tex. to Forjoe TV Inc. (from Young Television Corp.); KIVA, Yuma, to George P. Hollingbery Co. (from Paul H. Raymer Co.).

NBC-TV adds *Steve Allen Show* to list of programs telecast regularly in color, beginning Oct. 6.

PURCHASES OF TV or radio stations by 3 networks were in various stages of the FCC processing mill simultaneously this week: (1) CBS filed for purchase of St. Louis' KWK-TV (Ch. 4) for approximately \$4,000,000, turning over its Ch. 11 grant to applicants which it beat in hearing. (2) FCC approved NBC's \$750,000 purchase of radio WJAS & WJAS-FM, Pittsburgh, with 2 dissenting votes. (3) AB-PT filed application for purchase of Pittsburgh radio KQV for \$700,000 (Vol. 13:35).

Complicated CBS St. Louis deal, under negotiation for more than month (Vol. 13:34, 36), has these provisions: KWK-TV would be sold to network for approximately \$2,500,000 by owners, including *St. Louis Globe-Democrat* (23%) & KSTP Inc. (23%). CBS would pay additional \$1,500,000 to *Globe-Democrat* for TV studio and real estate.

CBS also has entered into agreement with losers in Ch. 11 hearing—220 Television Inc., St. Louis Telecast Inc. and Broadcast House Inc.—whereby they will terminate all litigation challenging CBS's right to Ch. 11, for which CBS agrees to assign its CP to 220 Television. Latter will issue \$400,000 in debentures, other 2 losing applicants each receiving \$200,000 as reimbursement for costs incurred in connection with their applications. Radio KWK isn't directly involved in transaction, but agreement provides that 220 Television has first refusal on purchase if stockholders agree it's to be sold. CBS owns radio KMOX in St. Louis.

Approval of WJAS transfer to NBC (Vol. 13:32) was accompanied by stipulation that action is without prejudice to any Commission action which might follow termination of pending anti-trust actions involving NBC. Comrs. Bartley & Lee voted for hearing on transfer, Bartley in dissent raising issues of impact of network-owned station in Pittsburgh on competitive broadcast structure and imminence of FCC, Justice Dept. & Congressional studies which have bearing on network and multiple ownership of stations.

Purchase of KOVR, Stockton, Cal. (Ch. 13) by Hudson Valley Bestg. Co. (Lowell Thomas-Frank Smith interests) from Television Diablo Inc. for \$3,487,500 plus \$75,000 for land and building in Stockton and \$100,000 for net assets of off-air KCCC-TV, Sacramento (Ch. 40) was approved by FCC this week (Vol. 13:28, 35). At same time, FCC approved stock transaction to transfer control of WTVD, Durham, N. C. (Ch. 11) from Durham TV Co. Inc. to Hudson Valley Bestg. Co., which acquired controlling interest last spring (Vol. 13:21).

Merger of WGR Corp. into Transcontinent TV Corp., bringing WGR-TV, Buffalo (Ch. 2) & WGR under one corporate roof with WROC-TV, Rochester (Ch. 5) and involving total consideration in excess of \$5,000,000, was approved by FCC this week (Vol. 13:27). Transcontinent also owns 50% of WSVN-TV, Harrisonburg, Va. (Ch. 3).

Sale of WAGM-TV, Presque Isle, Me. (Ch. 8) & WAGM, along with WABM, Houlton, Me., was approved by FCC last week. Purchaser is Horace Hildreth's Community Bestg. Co., seller Harold Glidden, price for 94.8% \$525,000. Final transfer awaits sale of WABQ, Presque Isle, by Community Bestg. subsidiary.

Sale of KREM-TV, Spokane (Ch. 2) and AM & FM affiliates by Louis Wasmer for \$2,000,000 to KREM Bestg. Co. (Mrs. A. Scott Bullitt, 40%; KING Bestg. Co., 60%) was approved by FCC this week (Vol. 13:34). Wasmer will remain as pres. of new company, but without stock interest.

ALLOCATIONS actions of FCC this week include 2 substantial moves in Oregon—addition of Ch. 2 to Portland, commercialization of Ch. 7 in Eugene. In preferring Portland to smaller cities in area vying for Ch. 2, Commission stated that Portland's needs for more competition outweigh other cities' demands for local outlet.

In "unreserving" Eugene's educational channel, Commission said it couldn't hold channel forever; that educators hadn't formulated plans firm enough to justify continued reservation. Eugene's is the 3rd vhf educational channel to be commercialized since end of freeze in 1952. Others: Ch. 5, Weston, W. Va.; Ch. 3, College Station, Tex. Comrs. Bartley & Mack dissented from Eugene action; Ford abstained.

In other actions, FCC: (1) Denied petition by WOCN to move WRCV-TV's Ch. 3 from Philadelphia to Atlantic City. (2) Denied petition for reconsideration of decision which had refused to move Ch. 7 from Spartanburg to Knoxville.

Rule-making petitions received: (1) From Ch. 4 CP-holder WTAE, McKeesport, Pa. to move its channel to Pittsburgh. (2) From off-air WWOR-TV, Worcester, Mass. (Ch. 14) to move Ch. 11 from Durham, N. H., to Worcester and commercialize it.

Translator CPs granted: Ch. 71, Salida, Colo.; Ch. 71, 74 & 77, Cottage Grove, Ore.

Note: Report of Buffalo Ch. 7 initial decision last week (Vol. 13:38) should have indicated that Great Lakes TV Inc. remains the proposed grantee.

Comments deadline on low-power vhf booster rule-making (Vol. 13:31-32) has been extended from Oct. 1 to Dec. 15, FCC acting on petitions of NCTA and Colo. Gov. Steve McNichols. A late filer for extension, Ben Adler, pres. of uhf translator manufacturer Adler Electronics, this week told Commission that as result of survey he's "convinced that small so-called 'reflector' stations will never be in a position to comply with any set of FCC rules for direct licensing that will give proper protection to existing services in the vhf portion of the TV broadcast spectrum." He said that he's developing over-all vhf-uhf plan for remote and shadowed areas; that plan "will combine ideas and requirements of the various opposing factions in this controversy and it is believed that it will be workable and practicable."

TASO field strength & picture quality tests in Baton Rouge area start Oct. 1, comparing signals of WABF-TV (Ch. 28) and WBRZ (Ch. 2). Field strength measurements will be directed by consulting engineer Howard T. Head, using Assn. of Maximum Service Telecasters' equipment. Home observation studies will be directed by Wm. L. Hughes, Iowa State College. Similar tests are planned for Madison, Wis. later in Oct. First such studies covered New Orleans.

Latest book by U of Ill. Prof. Dallas W. Smythe, former FCC economist, is *The Structure and Policy of Electronic Communications* (103 pp., \$1.50, Office of Publication, U of Ill., Urbana), designed to present fundamentals. Sample chapter headings: "Unification of Wire-Telegraphy," "Nature and Scope of Radio Services," "Theory of Radio Spectrum Allocation," "Emergence of International Radio Allocation Policy."

First miniature TV camera chain designed to military specifications is claimed by DuMont. Unit's camera head measures 5x4x7-13/16-in., is accompanied by control unit, monitor, power supply and remote control unit.

COMMERCIALS in color—"when it is used properly"—enjoy a large advantage over the same commercials in monochrome. This is one of principal conclusions reached in 2 years of pre-testing experience by Schwerin Research Corp., as described by pres. Horace S. Schwerin in current (dated Aug.) issue of RCA's *Broadcast News*.

However, notes Schwerin, the products which could gain most from color TV are undergoing least amount of preparation for it. These are the "sensory" products—products with taste appeal, for example, "are doing only about one-fifth as much research in color as they are in black-&-white." Article is based on pre-testing using kinescope recordings of commercials before representative cross-section audiences at special screenings. The researcher makes these points on basis of his tests involving color commercials:

(1) Color, while it increases commercial effectiveness, tends to decrease remembrance of sales ideas. Taking RCA Victor commercials as example, he said tested effectiveness of color commercials was about 1½ times as strong as its monochrome counterpart. But at same time, color seemed to diminish the amount of sales points viewers remembered.

(2) Natural settings are more effective than "showcase" or off-beat settings.

(3) Distracting use of color diminishes effectiveness of commercial.

(4) Commercials in "middle range" of effectiveness benefit most from use of color. Tests showed that a poor monochrome commercial isn't benefited much by putting it in color, and "a monochrome commercial that is highly effective in its own right can get little additional value from color."

(5) Color helps some product types more than others. Generally, the more familiar the product, the less benefit it will gain from color, while new brands stand to gain much.

"Color center of the nation" is term applied by RCA color TV coordinator Wm. E. Boss to Ohio Valley service areas of Crosley's WLWT, Cincinnati; WLWD, Dayton & WLWC, Columbus. Addressing Advertisers' Club of Cincinnati Sept. 25, he said area enjoys more local & network color TV broadcasting than any area in U. S. and is experiencing fastest rate of color TV set sales in nation. "What has made the Ohio Valley story so different from the others," he added, "is the simple fact that we did not originate it." He said color set sales "shot up nearly 800%" during one 4-week promotion campaign and that "nearly one in every 2" RCA TV sets sold in Cincinnati, Columbus & Dayton is a color set.

First 2 World Series games, starting Oct. 2 in N. Y., will be colorcast by NBC-TV, while 3rd, 4th & 5th (if necessary) games in Milwaukee will be in black-&-white because of insufficient time to move color equipment. If 6th or 7th games are needed in N. Y., they'll be colorcast. Milwaukee dealers are renting color sets for \$75, black-&-white for \$40, during Series.

Curb on TV-radio stations' right to broadcast immediate reports of disasters was urged by International Assn. of Fire Chiefs. At New Orleans convention, group adopted resolution asking FCC to bar stations from broadcasting disaster reports until at least 15 minutes after they occur, to prevent traffic congestion.

Color TV sales in Kansas City were 29 in Aug., bringing total to 2158, reports local Electric Assn.

POWER of educational TV again amazed educators, newspapers and even telecasters this week—this time in New York, at the unlikely hour of 6:30 a.m. NYU and WCBS-TV this week began *Sunrise Semester*, city's first full college credit TV course (comparative literature), consisting of 72 half-hour telecasts.

Before program series began, NYU had received nearly 10,000 requests for information and at least 500 applications to take course for college credit (at \$75). It was after first pre-dawn lecture that educational TV's pulling power became apparent to booksellers—when there was sudden rush on copies of Stendahl's *The Red & the Black*, the novel under discussion for first week. Brentano's reported sellout of 1000 copies, all other bookstores said they, too, were out of the book, and publisher Random House called WCBS-TV to say it had been receiving rush orders from dealers all over area.

End result: Educational series got a "sponsor." Bookseller Barnes & Noble placed unsolicited order for 10-sec. spots before and after 6:30-7 a.m. series to announce that books discussed on the program will be available at its stores. Nobody was more surprised than WCBS-TV, whose sales staff hadn't even thought of trying to sell announcements around the educational series.

Another commercial telecaster, meanwhile, prepared to tackle a tough schoolroom subject to see if it couldn't be turned into fun. Westinghouse Broadcasting Co. began preparations for series of 9 shows intended to teach junior high school mathematics. For telecasting during school hours on WBC's 5 TV stations, series will use Bil Baird marionettes, probably will also be made available to some non-WBC stations.

NBC announced related project intended to boost interest in public schools. Combined facilities of its 13 TV-radio stations in 8 cities will concentrate on single 6-week public service project—"Know Your Schools"—donating more than \$1,000,000 in time and program costs. Each city's stations will undertake own local projects and programs using same theme, with report on techniques and results to be made available to broadcasting industry.

Biggest closed-circuit theatre-TV hookup in history fed Sept. 23 Basilio-Robinson middleweight title bout to 173 theatres in 130 U. S. & Canada cities, with combined seating capacity of 500,000. Though no estimates of attendance or grosses were available from Theatre Network TV, principal networkers involved, Sept. 26 *Variety* published results of partial canvass of movie houses participating, reported sellouts in some, so-so results in others. Admission prices ranged from \$3 to \$6.60.

Radio station sales and transfers approved by FCC: KEOK, Ft. Dodge, Ia. by H. W. (Dutch) Cassill and associates for \$150,000 to owners of WMT, Cedar Rapids (Vol. 13:32) . . . WSRC, Durham, N. C. by John C. Greene Jr. for \$95,000 to Robert A. Monroe, Seymour Schneidman, Philip Nadler and associates (Vol. 13:35) . . . KXLE, Ellensburg, Wash. by Goodwin Chase Jr. & Joseph B. Kendall for \$80,000 to Willis R. Harpel & Stephen C. Wray (Vol. 13:31) . . . KAFP, Petaluma, Cal. by A. T. Shields, Corinne Shields, G. M. Hauser & A. D. Thomas for \$75,000 to Broadcast Associates Inc. (Vol. 13:33).

Keystone Broadcasting System signs 1000th radio affiliate—KAGE, Winona, Minn.

New and Upcoming Stations: Second TV station owned by veteran pre-freeze telecaster and equipment manufacturer Sarkes Tarzian—WPTA, Ft. Wayne-Roanoke, Ind. (Ch. 21)—is now on air with test patterns, and was scheduled to start programming Sept. 28. Ronald R. Ross is gen. mgr. for Tarzian, owner of WTTV, Bloomington-Indianapolis (Ch. 4). Station has 12-kw RCA transmitter, 724-ft. tower, is expected to be ABC affiliate in all-uhf area. Base hour rate is \$360. Rep is Meeker.

New Ft. Wayne station brings on-air total to 512, of which 92 are uhf. Next starter may be WEEQ-TV, La Salle, Ill. (Ch. 35), which began equipment tests last week end.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WETV, Atlanta (Ch. 30, educational) has been delayed by "tardy equipment delivery" and target date (previously Aug. 15 for test patterns) is now a matter of guesswork, writes Haskell Boyter, director of TV-radio education for Atlanta Board of Education. Building is complete and 12-kw GE transmitter is wired and ready. Footings were to be poured this week for 470-ft. Truscon tower, and GE antenna is due shortly.

CHCA-TV, Red Deer, Alta. (Ch. 6) has studio-transmitter building 40% completed, has GE 5-kw transmitter due Oct. 15, plans early Nov. start, reports pres. G. A. Bartley. Erection of 300-ft. Trylon tower from Wind Turbine Co. will begin when transmitter arrives. C. G. Harju, ex-radio CKRD, Red Deer, will be commercial mgr., Ray D. Torgrud, ex-CHCT-TV, Calgary, production supervisor; Ted Wadson, ex-CFRN-TV, Edmonton, chief engineer. Base hour will be \$160, subject to CBC approval. Rep will be announced shortly.

■

New powers & towers: WTTV, Bloomington (Ch. 4) now operating from new 1250-ft. tower near Trafalgar, Ind.; KSIX-TV, Corpus Christi (Ch. 10) now at 316-kw ERP; KGBT-TV, Harlingen, Tex. (Ch. 4), Sept. 19 went to full 100-kw ERP from new 990-ft. tower; WHP-TV, Harrisburg (Ch. 55) Sept. 23 boosted to 1 megawatt ERP; WANE-TV, Ft. Wayne (Ch. 15) Sept. 19 to new site at 2915 W. State Blvd.

Equipment shipments: RCA shipped live color studio camera to WLWI, Indianapolis, and 24-gain pylon antenna to WNDU-TV, South Bend (Ch. 16), both Sept. 24.

■

TV talent costs are "approaching the point of diminishing returns," a major TV advertiser warned telecasters this week. Said Bowman Gray, exec. v.p. of R. J. Reynolds Tobacco Co., in address to NARTB regional meeting in Asheville, N. C.: "Since talent expenditures continue to rise through escalation, competitive bidding for properties and union increases." He continued, "the only way I can see to preserve continuing efficiency of this most important medium is to hold the line on facilities costs." Gray also rapped requirement of guaranteeing film repeats in summer months, saying popular TV shows are "forcing away a good part of their following" by this practice. Color TV growth, he said, "has been disappointingly slow." Citing advertisers' standpoint, he declared "we do not see how we can divert money from other color media to invest in color TV until such time as the circulation would warrant such a diversion." Another speaker, Rep. Scott (R-Pa.), said broadcasting of congressional debates "is certainly going to be done at some future time and should be given a trial now," despite House leadership's lack of enthusiasm about his bill to permit TV-radio coverage of House debate.

Radio station sales & transfers reported recently: WVDA, Boston by Vic Diehm & Assoc. for \$252,500 cash plus \$206,000 payment of stockholder's notes to ex-Secy. of Commerce Charles Sawyer . . . WGCM, Gulfport, Miss. by Hugh O. Jones (who plans to develop community antenna system franchise there) for \$150,000 to Miss. broadcaster E. O. Roden and associates . . . KWG, Stockton, Cal. by Douglas D. Kahle for \$85,000 to group headed by engineer Robin Hill . . . WCHI, Chillicothe, O. by Norman M. Glenn for \$78,450 to ex-station rep J. H. McGillvra & wife . . . WRKE, Roanoke, Va. by Elmore & Reba Heins for \$75,000 to Sherwood J. Tarlow, Allan W. Roberts, Dr. Bertram M. Roberts & Joseph Kruger . . . KWLK, Longview, Wash. by Twin City Bestg. Corp. for \$65,000 to Triad Bestg. Co. (Merton Glant, pres.) . . . WOKE, Oak Ridge, Tenn. by Air Mart Corp. (Frank Corbett, Harry J. Daly, Harry C. Weaver, & Owen J. McReynolds) for \$64,000 to WOKE Inc. (50% owned by Carter M. Parham, pres. & 22% owner of WDEF-TV & WDEF, Chattanooga) . . . KLMO, Longmont, Colo. by Grady F. Maples for \$63,000 to Arline H. Steinbach, ex-owner of KBMO, Benson, Minn. . . KRIZ, Phoenix, by Howard Loeb for \$215,000 to ex-Sen. Burton K. Wheeler and sons . . . KBUC, Corona, Cal. by Radio Broadcasting Inc. (Henry Fritzen) for \$150,000 to group headed by James Hadlock . . . WXRA, Kenmore, N. Y. by Thaddeus Podbielniak for \$150,000 to John W. Kluge . . . WPFA, Pensacola, Fla. by Wm. O'Connor for \$115,000 to Richard C. Fellows & Robert Thorne . . . WOOW, New Bern, N. C. by Paul Reid for \$50,000 to Leo Hoarty and associates of WBOF, Virginia Beach, Va. . . KPIG, Cedar Rapids, by Dakota County Realty Co. for \$49,295 to Cedar Rapids Bestg. Corp. . . WIPA, Annapolis, Md. by WASL Broadcasting Co. Inc. for \$49,200 to Robert J. Kent, USIA employe . . . WWXL, Manchester, Ky. by Clifford Spurlock, 140 shares of stock (46.67%) for \$32,450 to J. L. Tighe and associates . . . Brokers: WGCM, KWG, KWLK, KLMO, WPFA & WOOW, Hamilton, Stubblefield, Twining & Assoc.; WCHI, Allen Kander; WRKE, Blackburn & Co.; WVDA, R. C. Crisler & Co.

■

Rate changes: WMAL-TV, Washington, has new Class A hour rate of \$1200, up from \$700, 20 sec. \$240 from \$140. KMGM-TV, Minneapolis, new rate effective Sept. 30 has Class AA hour at \$1000, down from \$1500, min. \$200 from \$225. WTRF-TV, Wheeling, Oct. 1 raises Class AA hour to \$600 from \$500, min. \$120 from \$100. WSPA-TV, Spartanburg, S. C., has raised Class A hour to \$500 from \$450, min. \$100 from \$90. WANE-TV, Ft. Wayne, has new Class A hour rate of \$500, up from \$400, min. \$110 from \$80. KTVW, Tacoma, Wash. new rate card effective Oct. 1 has Class A base hour of \$425, min. \$85; decrease from \$600 & \$125, respectively. KRCG, Jefferson City, Mo., Oct. 1 raises Class AA hour to \$300 from \$250, min. \$60 from \$50. KVIP-TV, Redding, Cal., Sept. 1 raised base hour from \$225 to \$250, min. \$35 to \$42.50. WCNY-TV, Carthage-Watertown, N. Y. Sept. 30 raises base Class A hour to \$250 from \$200, min. \$50 from \$40. WATR-TV, Waterbury, Conn., has new rate card effective Sept. 1 which retains base hour of \$200, changes min. from \$60 to \$40, deletes Class C and changes Class B hour to \$140 from \$180, min. \$30 from \$54. Note: WJMR-TV, New Orleans, reports that its increase (Vol. 13:38) was effective March 1.

Communications attorneys in Washington have become so well known to judges of Court of Appeals because of numerous contested TV cases that they're being tapped frequently to defend indigents—gratis. Currently, for example, Leon Brooks and Harry Plotkin are spending lunch hours, evenings, etc. on rape case.

1966 VIEW OF SERVICE INDUSTRY, SETS-IN-USE: Dimensions of the huge TV-radio servicing industry, actually larger in dollar volume than factory sales of TV & radio sets, have been measured by Frank W. Mansfield, Sylvania marketing research director, who also undertakes the difficult chore of projecting its growth through 1966. His figures show some intriguing color and black-&-white sets-in-use projections.

Mansfield shows, for example, rise of repair parts & servicing volume from \$477,000,000 in 1948 to \$2.554 billion in 1957, estimated \$3.971 in 1966. He shows black-&-white sets-in-use at 46,720,000, color 315,000, as of end of 1957 -- going to 53,760,000 and 18,840,000, respectively, at beginning of 1966.

Breakdown provides costs of repair parts, service & installation from 1948 to present and projections of same categories for every year through 1966. For example, the 1957 total is split up this way: \$889,900,000, repair parts (including tubes); \$587,300,000, distribution revenue (66% markup on parts); \$1.077 billion total service and installation.

* * * *

Other details of 1957 estimate: Renewal receiving tubes, 171,400,000 at average factory price of 80¢, for total of \$137,100,000; black-&-white picture tubes, 6,200,000 at \$22.50, total \$139,500,000; color picture tubes, 20,000 at \$75, total \$1,500,000; "other parts" total, \$611,800,000. Figure for "other parts" is determined by multiplying value of tubes by factor of 2.20.

Reviewing survey's chart for TV-radio repair parts and services and EIA's factory value of TV-radio sets for 1948-1956 period, we note total set value exceeded repair parts and service costs through 1953 when the 2 figures were almost identical; \$1.523 billion for parts & services, \$1.528 for sets.

Noteworthy is the drop in number and total value of receiving tubes in Mansfield's projections from 1959 through 1966. Spokesman attributed drop to: (1) Ever-increasing use of transistors. (2) Reduced price of tubes due to competition from transistors, cost of which is reflected in "other parts."

Mansfield's estimates for total repair parts and services are: 1958, \$2.676 billion; 1959, \$2.837; 1960, \$2.952; 1961, \$3.114; 1962, \$3.226; 1963, \$3.472; 1964, \$3.558; 1965, \$3.747; 1966, \$3.971.

Survey uses following averages for number of service calls: Color TV, 6 per year; black-&-white, 3; home radio, 1; auto radio, 0.5.

* * * *

Analysis of Sylvania figures shows this to be its estimate of color and black-&-white sets, respectively, in use at beginning of each year: 1957, 160,000 color, 42,580,000 black-&-white; 1958, 315,000 & 46,720,000; 1959, 705,000 & 50,965,000; 1960, 1,280,000 & 53,610,000; 1961, 2,260,000 & 56,040,000; 1962, 3,705,000 & 57,495,000; 1963, 6,100,000 & 58,070,000; 1964, 9,430,000 & 57,870,000; 1965, 13,680,000 & 56,320,000; 1966, 18,840,000 & 53,760,000.

Number of repairmen in 1957 is set at 132,970, estimate for 1958 is 140,357, --number rising about 5% yearly to 206,640 in 1966.

Production: TV output was 155,751 week ended Sept. 20, compared with 161,749 preceding week and 187,852 in corresponding week one year ago. It was year's 38th week and brought TV production for year to date to about 4,420,000, compared with 5,080,428 in same period of 1956. Radio production totaled 356,290 (105,965 auto) for week ended Sept. 20 vs. 327,829 (91,068) preceding week and 285,798 (74,178) in corresponding week year ago. Radio output for 38 weeks totaled about 9,993,000 (3,732,000) vs. 9,272,059 (2,990,135) in 1956 period.

Topics & Trends of TV Trade: RCA chairman David Sarnoff took another peek into the electronic crystal ball this week, in talk to Life Office Management Assn. in Washington, and came up with more wonders in his continuing series of electronic marvels of future:

After outlining growth of electronics, he gave these prospects for the future: (1) Electronic medical diagnosis—stethoscopes giving way to diagnostic robots with years of medical skill “built in;” other electronic devices which will relieve doctors of need to perform routine tests. (2) Personal radio communications—using tiny gadget, about size of cigarette pack, to communicate with others anywhere in the world. (3) Electronic stenographer—basic studies already have led to the development of a rudimentary phonetic typewriter that can type a few simple words and phrases spoken into a microphone.

Gen. Sarnoff attempted to allay fears that automation will cause widespread unemployment. Rather, he said, “it will free millions from arduous and hazardous toil. It will increase employment, reduce hours of labor, and increase our leisure time.”

In comparison with other advances, the RCA chairman recalled “when TV emerged, it faced the scorn of many people in the movie industry. They referred to it derisively as ‘that little peep-hole.’ Well, today motion picture companies are producing products for television and some of them are making more money from their sales to television than they are from their sales to theatres. Indeed, some movie men have become so enamored with television that they would like to take it over and care for it—‘as their very own.’”

* * * *

“Guaranteed satisfaction” is fulcrum of RCA color TV offer to Buffalo purchasers of black-&-white sets. Field test, to be duplicated in Grand Rapids, Lansing & Saginaw, will be expanded nationally if successful. Spokesman said program works this way: After customer buys black-&-white set, he is offered 10-day trial of color set; if customer isn’t satisfied with color set, dealer delivers original selection without obligation.

Today’s economy is described as “uncertain” by Edward R. Taylor, Motorola exec. v.p.-consumer products, who adds that TV, appliance, automobile, residential construction businesses have not rocketed as expected in 1957. However, he told Austin Executives Club, Chicago, last week that he was still optimistic due to high rate of personal savings, employment, wages and income. And he feels 1958 will bring some tax relief.

“Evaluation” trip to Japan by Motorola purchasing v.p. Frank J. O’Brien and Jack Davis, engineering v.p. for consumer products, who returned Sept. 26, was described by gen. sales mgr. Allan G. Williams as similar to previous trips to England and continent. Purpose of trips, Williams said, is to enable Motorola to “keep up to snuff on the industry in other parts of the world.” He added that company isn’t interested in buying Japanese components.

Commerce Dept.’s biennial publication, *Business Statistics*, 1957 edition, described as a “scoreboard for business” and containing data on significant economic indicators on national income, business expenditures, sales, inventories, orders and industrial production is available at \$2 from Govt. Printing Office, Washington, or from Commerce Dept. field offices.

Sylvania schedules stepped-up fall advertising for TV sets with 14 ads in *Life* and *Saturday Evening Post*, 14 network TV commercials in 16 weeks preceding Christmas. Plans also call for use of local and trade newspapers, billboards, direct mail.

DISTRIBUTOR NOTES: RCA Victor Distributing Corp., Chicago, names Jack Gilhooly sales mgr., color TV receivers . . . Bergman Rochester Corp., formed by W. Bergman Co., Inc., Buffalo, (Philco), takes over Beaucaire Inc. (Philco), Rochester, with Charles R. Breckheimer in charge . . . Samuel Jacobs Distributors (Blaupunkt, Bell & Howell), Philadelphia, appoints Martin Mannin, ex-Emerson Radio of Pa., as sales mgr.

CBS-Hytron plans further expansion of independent service-dealer advertising and sales promotion following survey which showed 85% of dealers questioned wanted program continued and expanded. CBS-Hytron is distributing booklet, “The Independent Service Business and Your Future,” explaining program and showing how to use supporting material such as TV-radio scripts, ad mats, etc.

Puerto Rico has 155,710 TV sets, according to Chamber of Commerce estimates as reported in new *Time & Space* house organ-newsletter published by El Mundo Inc. (WKAQ-TV & WKAQ, San Juan). Chamber reports 11,143 TV sets imported into Puerto Rico in first 7 months of 1957, and breaks down major brands thus: GE 4883, Sylvania 1236, Emerson 917, Hotpoint 571, RCA 513.

Seven marks of successful TV-appliance dealer are listed by NARDA chairman Mort Farr in Sept. *Electrical Merchandising*: (1) Love for business. (2) Readiness to change. (3) Salesman training. (4) Service to customers. (5) Participation in dealer and community activities. (6) Financial acuity. (7) Open mind.

New Philco lab, costing \$1,000,000 and covering 50,000 sq. ft., has been started on 24-acre site at Palo Alto, Cal.; it will replace temporary labs at Redwood City, retain name of Western Development Labs. It will be part of Philco govt. and industrial div. under v.p. & gen. mgr. Henry F. Argento.

RCA’s “outstanding cooperation” was cited by Defense Dept. in presenting Reserve Award last week to Theodore A. Smith, exec. v.p., RCA industrial electronic products. RCA was praised in citation for personnel policies which encourage and facilitate participation in Reserve activities.

Revised booklet, “Things You Should Know About the Purchase and Servicing of Television Sets,” is being distributed by EIA and National Better Business Bureau. Copies are available from EIA, manufacturers, dealers.

Dealer franchise study is being considered by NARDA, pres. Ken Stucky told meeting of 200 dealers in Salt Lake City Sept. 25. He said study “could get to the root of many of the dealers’ basic problems.”

Pushbutton-dialing radio telephone system has been developed by Motorola for Rural Electrification Admin. It permits automatic direct dialing by home and mobile radio users in areas with dial phone exchanges.

Guide to professional servicing of color and black-&-white receivers, *Profitable Television Troubleshooting*, by Eugene A. Anthony (488 pp., \$6.95) has been published by McGraw-Hill.

CBS-Hytron engineer’s handbook, with 650 pages covering more than 1000 tubes, is now available from CBS tube distributors—along with technician’s handbook.

Emerson raises TV-radio-hi-fi prices \$1-\$10, effective immediately, sales v.p. E. A. Tracey attributing increases to higher manufacturing costs.

“Hi-fi,” that much-abused word, may be headed toward a definition—EIA members believing industry may be settled sufficiently to come to agreement.

Westinghouse employment reached all-time high of 128,916 in Aug.—a 2% increase over Aug. last year.

Trade Personals: Conrad R. Odden appointed mgr., general quality control, RCA Victor Radio and "Victrola" div., succeeded by Rolland L. Shoemaker as mgr., commercial service, RCA Service Co.; Clint E. Walter takes over Shoemaker's former post of mgr., commercial service, field administration . . . C. J. Hollatz promoted to mgr., commercial operations administration, RCA electron tube div.; R. B. Sampson named mgr., market research; P. P. Roudakoff, administrator, trade publicity & relations; H. S. Gwynne, administrator, commercial coordination; R. L. Kelly, administrator, technical coordination . . . Jose D. Dominguez appointed exec. engineer, IT&T telephone & radio operating dept., succeeded by Clyde E. Dickey as pres. of IT&T's Puerto Rico Telephone Co.; Dickey has been traffic supt. for Telefonos de Mexico, S. A., in which IT&T has substantial interest; Walter D. Siddall named pres., Radio Corp. of Cuba; Kenneth M. Barbier elected pres., Radio Corp. of Puerto Rico . . . Vin Zeluff, managing editor of *Electronics*, resigns . . . Fred Petersen appointed sales mgr. of Admiral's new Hospital Service div. which produces disposable plastic products for medical use . . . Brock P. Hayes promoted to Syracuse district mgr., CBS-Hytron Sales Corp. . . . Hugh H. Engelman promoted to mgr., Motorola TV advertising & sales promotion . . . Adm. Arthur W. Radford (USN ret.), ex-chairman of Joint Chiefs of Staff, elected to Philco board.

Wells-Gardner, which showed net loss of \$250,000 on first half sales of \$4,300,000, reports to stockholders that primary reason for loss was drop of defense sales to \$600,000, compared with \$3,800,000 in similar 1956 period, and that civilian sales were also "considerably less" than year ago. Third quarter dividend was omitted, and pres. R. S. Alexander stated: "Although Wells-Gardner enjoys an enviable net worth and cash position, it has been the policy of the directors . . . to pay dividends out of current earnings and not from surplus." Backlog of civilian offers was reported "materially greater" than year ago.

Siegler Corp., which merged with Unitronics and acquired Hufford Corp. (Vol. 13:37-38), proposes to offer 300,000 shares of its \$1 par common stock and borrow \$5,250,000 from banks and an insurance company, according to statement filed Sept. 23 with SEC. Proceeds from both would be used to retire \$4,729,350 of Siegler and subsidiaries long-term debts, \$1,900,000 short term bank debts of Unitronics and Hufford, and reduce Unitronics accounts payable by \$2,300,000. Siegler said balance would be used for working capital and general corporate purposes.

Victoreen Instrument Co., Cleveland, has purchased Jordan Electronics Inc., Alhambra, Cal., reportedly for less than \$200,000. Jordan makes nuclear radiation instruments and industrial radiation detection instruments, had about \$800,000 sales in 1956. Victoreen produces radiation measuring instruments, electronic component parts, etc. and had 1956 sales of about \$1,600,000, has \$3,000,000 order backlog.

Columbia Pictures reports, for year ended June 29, net income of \$2,350,000 (\$1.80 a share) vs. \$2,670,000 (\$2.17) year ago. No sales figures were given, nor was there a breakdown of earnings by TV subsidiary Screen Gems, whose income has been recorded this year on accrual basis to conform with company's regular accounting policy.

American Electronics has signed agreement to exchange 46,110 shares of its common stock for outstanding shares of Teller & Cooper Inc., Brooklyn electronics firm, and to pay it \$2,225,000 for more than 60 patents. If merger is approved, Teller & Cooper will be operated as wholly-owned subsidiary.

ELECTRONIC PERSONALS: Lionel H. Orpin promoted to director of Stromberg-Carlson plans & programs . . . Richard A. Norman promoted to administrator of patent properties, GE semiconductor products dept. . . . Robert O. Vaughan promoted to mgr., west coast marketing, RCA Defense Electronic Products . . . Michael Cieplinski, pres. of Champlain Adv. Co. & Interracial Press of America, elected to board of Haydu Electronic Products Inc., Plainfield, N. J. . . . Richard W. Mitchell rejoins I.D.E.A. Inc. as v.p.-mfg. . . . Alan H. Bodge elected Audio Devices v.p. . . . Robert A. Darrow, appointed sales engineer, Hughes Aircraft semiconductor div., Palo Alto . . . Wm. G. Fockler promoted to mgr., DuMont Labs technical products engineering, succeeding Arthur J. Talamini who resigned to join Electro Tec . . . Lynn C. Homes, Stromberg-Carlson director of research & advanced development, appointed secy.-treas. of new AIEE Empire district, comprising all of upstate N. Y.

Example of British competition with U. S. electronics manufacturers was news conference in Washington this week, conducted by Solartron Inc., U. S. distributor for Solartron Electronics Group Ltd. Company demonstrated "Transfer Function Analyser" for servo testing, particularly for missiles. Some 20-30 of the \$5600 devices have been sold in U. S., v.p. Eric E. Jones reported. About 300 are in use in England; Russia ordered 350, was turned down by NATO ruling.

New Navy report, *Twelve Guides to Reliable Electronic Design* (PB 121123, 57 pp., \$1.50) by G. G. Johnson, U. S. Naval Ordnance Lab, is available from Office of Technical Services, Commerce Dept.

Barnes Engineering Co., principally owned by Fox, Wells & Rogers (investments), reported that its profit from 6 months operation of Clarksburg, W. Va. community antenna system accounted for \$138,980 of the total \$142,269 Barnes profit for entire year ending June 30, 1957. Community system was sold as of Dec. 31, 1956 to NWL Corp. for \$879,000 (Vol. 13:11). Proceeds of the sale were listed as reduction in investment in the system, weren't included in profit-loss statement. For fiscal year ended June 30, 1956, the community system earned \$263,988 (Vol. 12:37).

A. Hollander & Son Inc. listing and registration on N. Y. Stock Exchange was ordered dropped by SEC effective Sept. 30. Exchange had asked SEC to approve action, saying further dealings in Hollander stock on exchange was "inadvisable" since merger with Philips Electronics Inc. (Vol. 13:30-31) left fewer than 1500 stockholders and fewer than 300,000 shares distributed (exclusive of concentrated holdings). Capital stock of merged company is listed on American exchange.

Consolidated Electronics Industries Corp. subsidiary, Forestville Industries Inc., has been authorized to buy—mainly for cash—operating assets of Mepco Inc., including patent portfolio, land and buildings. Mepco, which makes specialty precision resistors, has headquarters in Morristown, N. J., employs about 190. Pres. G. Arthur Erickson and sales & engineering v.p. Leonard Kirby continue in Mepco posts.

Awards for financial reports in electronics industry, sponsored by *Financial World*, went to Sylvania, RCA, Philco in that order. Sylvania pres.-chairman Don G. Mitchell accepts trophy at banquet in N. Y. Oct. 28.

Dividends: Packard-Bell, 12½¢ payable Oct. 25 to stockholders of record Oct. 10; Amphenol, 30¢ Oct. 25 to holders Oct. 11; Warner Bros., 30¢ Nov. 6 to holders Oct. 11; Howard W. Sams & Co., 10¢ Oct. 25 to holders Oct. 11.

Canadian Broadcasting Corp., govt.-owned but supported by commercial sponsorships, 15% excise tax on TV-radio sets and broadcast license fees charged private stations, reports net operating deficit of \$1,561,211 on income of \$49,288,965 for year ended March 31. This compares with deficit of \$1,358,621 on \$38,942,402 during 1955-56 fiscal year (Vol. 12:30). CBC took in \$23,899,280 from TV-radio sponsors (TV \$21,453,017, radio \$2,446,263), paid out \$4,050,350 in agency & network commissions, \$3,465,287 to private stations on its networks, \$5,203,703 in production costs, leaving \$11,179,940 net revenues (TV \$9,841,638, up from \$7,403,438 previous year; radio \$1,338,302, down from \$1,731,507). CBC income from Federal treasury included \$12,586,189 representing TV excise taxes, down 29% from previous year; \$6,336,840 radio excises, up 25%; \$12,000,000 parliamentary grant towards anticipated TV operating deficit; \$6,250,000 parliamentary grant for radio service. CBC again warned that it may have to curtail services sharply in face of rising costs and decreasing TV receiver tax revenues as major markets approach set saturation.

FCC must reexamine its decision permitting ABC-TV to affiliate XETV, Tijuana, Mex., which serves San Diego, Court of Appeals ruled this week. Acting on appeal by KFMB-TV, San Diego, Judges Bazelon, Washington & Bastian (Bazelon writing) ruled: "We do not suggest that such programming imperfections as would militate against an American station applicant in a comparative proceeding are necessarily relevant in deciding whether a foreign station is to be permitted to affiliate with an American network. We hold only that, in making the latter decision, the Commission may not altogether exclude from consideration such serious defects of the foreign station's programming as would affect the public interest." Court added: "Our action is without prejudice to any steps which the Commission may lawfully take, pending reconsideration, to provide continuity of service by ABC to San Diego viewers."

Ten Canadian stations will be added to live microwave network for coverage of Queen Elizabeth's visit to Canada, CBC announced this week. Hookups will be temporary, through cooperation of U. S. & Canadian telephone companies and with ABC for Maritime provinces just north of New England. Cities to be added for the temporary service are Vancouver, Victoria, Calgary, Lethbridge, Edmonton, Moncton, St. John (N. B.), Halifax, Sydney, Charlottetown.

Worldwide TV network using broadband over-horizon scatter relays was predicted by IT&T pres. Maj. Gen. E. H. Leavey in first closed-circuit telecast to Cuba. Speaking from WRC-TV studios in Washington, he addressed Latin American ministers of communications assembled at Havana's Hotel Nacional (Vol. 13:38).

Annual outing of Federal Communications Bar Assn. will be held at Washington's Congressional Country Club Oct. 15.

TvB's active membership now totals 238 stations, WGN-TV, Chicago, latest to join.

Pakistan may be next country to "go American" in TV standards. So said RCA director of communications engineering Edmund A. Laport in review of broadcasting practices around world at Sept. 27 banquet of IRE's 7th annual broadcast symposium in Washington. He noted that these countries have officially adopted U. S.-style 525-line standards: Japan, Philippines, Thailand, Cuba, Mexico, Guatemala, Colombia, Cuba, Venezuela, Brazil, Peru, Chile, Argentina & Canada. Another country which recently made its choice is New Zealand, which picked British 405-line standard for its future TV system, though its neighbor and commonwealth partner Australia uses European 625-line method. Discussing post-war radio developments, he noted that "FM is on the march in all populous areas," particularly in Europe. Germany's completely rebuilt broadcast service—FM—has had "spectacular success," Finland now has some 30 FM stations, "with almost the whole network operating with off-the-air pickups from adjacent stations," Denmark & Sweden are following suit.

Bankruptcy petition by Clemons, Esau & Gericke, house ad agency for William Tell Productions, lists liabilities of \$142,811, assets of \$7.99, principal creditor being *TV Guide* with unpaid bills totaling \$46,844. Agency has estimated it owes money to 113 TV stations & 240 newspapers. William Tell Productions and agency both were operated by Wm. T. Clemons, John Esau & Karl H. Gericke. Latter two, according to bankruptcy petition, tendered resignations Aug. 8. Production firm and agency handled filmed giveaway show, *The Hidden Treasure*, produced in cooperation with Disabled American Veterans, which appeared on 121 TV stations. Esau, in TV-radio since 1934, was half-owner & pres. of KTVQ, Oklahoma City (Ch. 25, now off air), is a former NARTB board member. Gericke is one-time ABC asst. director of network program sales and Guild Films program mgr. Clemons says he is considering starting another company to produce *Hidden Treasure*, perhaps in Mexico where costs are lower.

New repressive measures have been aimed at TV-radio stations by Cuban minister of Communications Ramon Vasconcelos. Included in new govt. decree are: (1) Ban on criticism of govt. authorities. (2) Prohibition against running films not approved by Govt. (3) Outlawing of "any form of monopoly" in TV-radio station ownership. (4) Limit of one editorial per day on stations. (5) News-casts cannot last longer than one hour, no news items can be broadcast more than once an hour or 4 times a day (apparently aimed at CMQ Network's Radio Reloj which broadcasts news and time signals continuously 24 hours daily). (6) Political programs can be broadcast only for groups approved by Govt. (7) Stations must devote at least 5% of total time to educational or cultural programs.

Two applications for TV stations and 5 for translators were filed with FCC this week, bringing total to 117 (34 uhf) for stations, 42 for translators. Station applications: For San Diego, Cal., Ch. 21, resubmitted by Sherrill Corwin; for Perrine, Fla., Ch. 6 (assigned to Miami), by Hallandale & Dania, Fla. drive-in theatre operators. Translator applications were for Leadville, Colo.; Ely, Nev. (2); McGill, Nev. (2). [See *TV Addenda 25-1*.]

SUMMARY-INDEX OF THE WEEK'S NEWS—October 5, 1957

FCC NETWORK STUDY report recommends multiple ownership clampdown, hearings on station sales, ban on option time (p. 1 & Special Report).

NEW RALLYING FORCE for opponents of networks provided by Barrow report. Study seen as more influential factor in Congress than within FCC (p. 3).

RCA REVISING PATENT licensing for TV-radio receivers; notifies set makers of changes "in near future." End of litigations seen (p. 4).

"VISUAL DECEPTION" CHARGES by FTC against TV commercials get first hearing; FTC wins right to isolate Roloids spots as evidence (p. 4).

NETWORKS' 1956 PROFITS from broadcasting shown in report: CBS \$40,733,000, NBC \$34,910,000, ABC \$9,727,000—before taxes (p. 6).

TOP TV BRANDS in 23 cities, as listed in survey by newspaper members of Consolidated Consumer Analysis, shown in table listing 14 makes (p. 10).

ELECTRONIC DEVELOPMENTS sparking U. S. economy seen by Hoffman pres. H. Leslie Hoffman; engineering center's staff to double in 2 years (p. 12).

PAY-TV DEVELOPMENTS: FCC to finalize proposal on test applications in next 2 weeks; San Francisco delays closed-circuit action (p. 7).

ALLOCATIONS ACTIONS stand as FCC turns down pleas for Evansville, St. Petersburg, Presque Isle. Go-ahead for Ch. 12, New Orleans (p. 8).

BILLINGS DOWN 9.5% for TV networks in Aug. vs. year earlier, when political conventions upped totals. Cumulative 1957 gain is 4.2% (p. 14).

I—NETWORK STUDY REPORT, WHAT IT SAYS: Staff report on "Network Broadcasting," submitted this week to FCC Network Study Committee by Dean Roscoe Barrow's study group, is so significant a document that we recommend close reading of at least its "summary and recommendations" by everyone whose livelihood or important decisions are geared to TV.

For this reason we have reprinted that portion of the 1400-page mimeographed report in handy supplement form for permanent reference, and enclose it herewith as a Special Report to all subscribers.

Probable long-range meaning of Barrow report is discussed on page 3. Here are highlights of the far-reaching changes in TV station and network regulation recommended as result of 2-year Congress-mandated study:

Station ownership & licensing policies—FCC should seek eventually to approach as close as possible a limitation of "one station to a customer"—but in order to reduce concentration with minimum dislocation it should specify that no owner be permitted more than 3 vhf stations in top 25 markets, while retaining present numerical ownership ceiling of 7 stations of which not more than 5 may be vhf. It's suggested that 3 years be allowed for affected owners to get rid of excess stations.

Under proposal, these owners would be required to sell stations: ABC, 2 stations; NBC, 2; CBS, 1; Westinghouse, 2; Storer & Crosley, possibly 1 each, depending on whether Storer's WVUE is considered Philadelphia or Wilmington outlet, and on market rank assigned to Columbus, O. (Crosley's WLWC).

Multiple owner divested of a station would be permitted to seek one in smaller market, but Commission rules would be stacked against his getting it. It would be even more difficult for network—which would have to prove acquisition is essential to prevent financial distress.

Diversification policy should be made far stronger—FCC adopting rule to establish "presumptions"

in favor of local applicants owning no other stations, placing on multiple and non-local applicants the "burden of rebutting the presumption."

Any station transfer application could be thrown into competitive hearing under proposal to repeal McFarland amendment to Communications Act and restore old "Avco procedure" which required that proposed station sales be advertised and anyone willing to meet offered price be entitled to compete in hearing. In transfer hearings, same "presumptions" against non-local and multiple owners would be applied.

To discourage "trafficking," station purchasers would be limited to ownership of only one station for first full 3-year license term, then permitted to apply for one additional station each year (subject to multiple ownership limits).

■ ■ ■
Option time—It should be prohibited. There is no indication that it's necessary to network operations, and there's strong evidence it may violate anti-trust laws.

"Must-buy"—Practice should be banned, but "minimum-buy" requirements—stated in terms of dollar purchase (ABC's practice), number of stations, circulation coverage, etc.—should be permitted without specific FCC regulation, at least at outset.

Rates—Networks should be required to publish rate-making procedures, including circulation credited to each affiliate and all changes in network rates of affiliates, but FCC shouldn't attempt rate regulation "at this time."

Affiliation & compensation—Operations should be conducted in goldfish bowl, Commission making public all affiliation contracts filed with it. Criteria for affiliation and disaffiliation should be filed with FCC by networks, along with reports on all affiliation changes, requests for affiliation and disposition of these requests. Two-year maximum affiliation term should not be extended.

Network sponsors should have access to unaffiliated stations where affiliates can't provide satisfactory clearance. FCC should seek comments on proposal to permit unordered affiliates to carry network shows with commercials deleted by paying reasonable price.

Spot sales reps—Networks should be barred from acting as sales reps of stations other than their owned-&-operated outlets.

Network regulation—To simplify regulatory procedure, FCC should ask Congress to authorize it to apply rules & regulations directly to networks, rather than regulating networks indirectly through affiliates and owned stations.

Enforcement—Commission should seek power to levy monetary fines on stations & networks for infractions of rules not serious enough to warrant license revocation.

Programming—Because of delay caused by legal battle with group of programmers over study group's right to obtain business and financial information, there wasn't time for complete study of programming ownership, etc. Study should be completed by newly constituted FCC Office of Network Study (headed by economist Warren Baum, a member of network study group).

■ ■ ■
Alternatives—Barrow states his report is attempt to "achieve effective competition" within framework of existing broadcasting system. However, he warns, if this stated goal isn't accomplished "within the next few years" through the recommended measures, "it may be necessary to consider basic structural changes in the system"—such as:

- (1) National TV service available to any subscribing station, as AP serves newspapers.
- (2) Rationing of station time among programmers and advertisers.
- (3) Commission regulation of rates.
- (4) "Recapture of monopoly profits or economic rent in the use of valuable frequency channels allocated to the large commercially desirable markets."
- (5) "Recapture of the value of the frequency itself upon [sale of] scarce, viable station facilities."

Summary and Recommendations of

FCC Staff Report on Network Broadcasting

From 1400-page Document Submitted Oct. 3, 1957 to FCC Network Study Committee by Network Study Group Headed by Roscoe L. Barrow, Dean of Law College, U of Cincinnati

Concluding 2-Year Study Ordered by Congress in June 1955

I. SUMMARY

A. Introduction

The Network Study was initiated by the Federal Communications Commission to determine whether the present operation of television and radio networks and their relationships with stations and other components of the broadcasting industry tend to foster or impede the development of a nation-wide, competitive television system.

The last comprehensive study of broadcasting by the Commission was conducted from 1938 to 1941. The results were incorporated in the Report on Chain Broadcasting of 1941. On the basis of that study, the Commission issued, in 1943, the Chain Broadcasting Rules governing relations between networks and stations. The rules were initially adopted for radio and, upon the advent of television as a commercial system, they were applied to it as well. No substantial changes have been made in the Rules, with respect either to radio or television, since their adoption. Since 1943, television has developed rapidly, and radio, due in part to the growth of television, has undergone fundamental change. The Network Study has undertaken a systematic reappraisal of the Chain Broadcasting Rules in the light of these developments. It has made recommendations for new regulations or legislation as required to effectuate Commission policies under the conditions existing in broadcasting today.

It was initially intended that the Network Study be addressed to both radio and television. During the course of the Study it became apparent, however, that the problems most urgently requiring Commission attention were in the television medium. Faced by limitations of budget and staff, the Network Study Staff concentrated its resources on the problems in television broadcasting. A brief survey of the current situation in radio is set forth in the Report. It is recommended that the Commission conduct a further study of radio for the purpose of determining whether modification of the rules is necessary in the light of current conditions in the industry.

A substantial portion of the Staff's time has been expended on a study of programming. Due to objections by some independent program producers to supplying the competitive business information required, and the attendant extended negotiations and litigation, some of the issues relating to programming are not considered in this Report. It has been recommended that these issues be studied as promptly as the information is available and that the results be made the subject of a supplemental report.

A few other problems initially were included in the study but were not covered because of limitations of time and staff. It is recommended that these be the subject of further study by the Commission.

At the outset, it was determined that the interest of the public and the Commission in a comprehensive and

objective appraisal of television broadcasting could best be served through the adoption of a "study" technique rather than a formal investigative hearing or proceeding. This technique has included a series of conferences with all of the components of the industry, during which background information was obtained on the operations and problems of each component; more intensive staff interviews with selected groups of stations, advertising agencies, station representative agencies, independent program producers, and with each of the network organizations; and a spot check of the networks' files. In addition, a series of questionnaires were sent to the television networks and a questionnaire was sent to all commercial television stations, approximately 60 advertising agencies and 34 national station representatives, and to all known non-network program producers. Through this technique, a large volume of information and statistics bearing on the problems under study has been acquired by the Network Study Staff. These materials have been analyzed in the body of this Report. The findings and recommendations of the Network Study Staff in its Report on Network Broadcasting will now be summarized.

B. History and Description

The report begins with a brief history of the development of television and a description of the principal components of the industry. The rapid development of television as a commercial service reaching a high proportion of American homes is traced, together with the principal policies of the Commission directed towards the establishment of the television service. Among the components of the complex broadcasting service are: the advertiser who provides the financial support for the industry; the advertising agency which assists the advertiser in his advertising campaign; the network, which provides substantial programming and an interconnected chain of affiliated stations over which the advertiser can broadcast his program to a national audience; the independent program producer and distributor, which develops programs for sale to advertisers, networks and stations; the American Telephone and Telegraph Co., which owns and leases to networks the coaxial cable and microwave relay facilities by which affiliated stations are linked; the stations, which are licensed to operate on frequencies assigned by the Commission and most of which, in television, are affiliated with one or more networks; the station representative agencies, which act as agents for individual stations in the "spot" sale to national and regional advertisers of portions of station time not used to carry network broadcasts; and the public, who owns the airways and is served by the industry.

C. Statement of the Public Interest

The touchstone of the Communications Act is broadcasting in the public interest. The Federal Communica-

tions Commission is empowered to establish rules and policies to further the "public interest, convenience, and necessity" with respect to broadcasting and also to "generally encourage the larger and more effective use of radio (television) in the public interest." The Report examines the various doctrines, policies and procedures through which the Commission has given substance to the "public interest" and which have guided the evaluation and recommendations of the Network Study Staff.

Specific definition has been given to the public interest standard in various decisional contexts by court opinions and by the Commission in both rule making and adjudicatory proceedings. In attempting to secure the maximum benefits of broadcasting to all the people of the United States, priority has been given by the Commission in its allocation plans to providing service to all areas. Additional objectives have been to provide for a local TV outlet in as many communities as technically feasible and for multiple services to the maximum number of communities so as to provide program choice and to encourage competition among all components of the TV industry.

Service to the public is the ultimate goal of the broadcast regulatory function. This policy is ordinarily phrased in terms of making available a broadcast service filling the needs and desires of the community served by each broadcast facility. In the implementation of this overall policy, the Commission has concentrated on three basic supporting policy themes: competition, diversification, and licensee responsibility.

Commission Encouraged New Stations

Various Commission actions have been taken for the purpose of encouraging the development of a nationwide, competitive broadcasting system. The Commission has undertaken to promote competition by encouraging new entry at the local station level, particularly in the "economic-injury" cases where it has refused to protect an existing licensee against possible economic loss through the establishment of a new station in the market. The rule prohibiting duplicate ownership and the policy of favoring applicants unassociated with other communications media within the community in comparative hearings have also contributed to increased competition at the local level. The competitive element has also been implemented by actions taken to equalize competitive opportunity at the station level through the VHF-UHF deintermixture proceeding and at the network level by the rule prohibiting dual network ownership in the same medium and by the ABC-UPT merger decision.

The Commission has also attempted to encourage competition among networks for affiliates and competition among stations for network affiliations. Several Commission policies are framed in terms of preventing concentrations of economic control which may be inconsistent with the public interest. This has been attempted by limiting the number of broadcast facilities which can be owned or controlled by the same person, by selecting licensees in comparative hearings so as to prevent monopolistic situations in mass media control of specific markets, by favoring autonomous operation of each broadcast facility where the licensee controls multiple facilities and by favoring autonomous operation of the broadcast facility where the licensee controls other communications media. The licensee is expected to give primary attention to the operation of the broadcast facility. Such facilities are not to be used as a mere promotion appendage to the operation of other commercial interests of the licensee. The Commission has also voiced strong disapproval of the employment of restrictive practices by network organizations with respect to affiliated stations. Such anti-competitive practices as forced combination advertising rates for two or more broadcast facilities or for a broadcast facility and other news and advertising media and the wielding of influence by network organizations on the non-network rates of affiliates have also been disapproved by Commission decisions and rules. Increased competition has usually been

associated with improved program service to the public.

It has been a basic policy objective of the Commission to encourage a large group of qualified persons to participate in television in order to obtain a high level of diversified service and program viewpoints. Competition in service and program viewpoints has been encouraged by prohibiting duplicate ownership at the individual community level and by limiting the overall number of broadcast facilities which can be owned or controlled by the same person. Further, in comparative hearings those applicants un-associated with or having the lowest degree of ownership and control over other broadcast facilities and non-broadcast communications media have been favored, particularly where such media are located in the same community as the television facility.

The Commission has defined the responsibility of the broadcast licensee as that of rendering the best practicable service to the community reached by his broadcasts. A preference has been recognized, therefore, for local ownership and control. Where two or more applicants are competing for the same channel, favorable consideration has also been given to the diversification factor. But since service to the public is the overriding criterion for selection, a good performance record of past programming which shows an ability to effectuate program proposals is also considered a strong basis for preference in comparative proceedings. The programming responsibility of the licensee is to be discharged within the broad framework of presenting a well-rounded program service suited to the needs and desires of the community served.

Within the broad limits of the well-rounded program doctrine, the licensee has the primary responsibility for selection of the programs presented over his station. Presentation of local live programming frequently has been emphasized by the Commission. Delegation of programming authority to non-licensees has been strongly disapproved. The Commission has recognized, however, that the network system of program distribution is an essential element in the American system of broadcasting. In discharging his public interest responsibility, therefore, the licensee of an affiliated station must have the privilege of final decision in the acceptance of network programs in order to maintain his ability to select programming consistent with a well-rounded program schedule for the particular community served. In pursuance, thereof, the Commission has established by rules and case doctrine limits to network control over affiliated stations so as to preserve for the affiliate a degree of freedom of selection which is consistent with utilization of broadcast facilities in the public interest.

D. Network Concentration and Control

The first issue considered in the report is whether the degree of concentration of control by networks within the telecasting industry is consistent with the public interest.

The essential business function of a television network is to provide a national advertising medium. Among national advertising media, television is the only one which makes it possible to convey the advertising message by a combination of sight, sound and motion. Television is sufficiently distinct from, and non-comparable to, radio, magazines, and other national media that most national advertisers look upon television as a complement to, rather than as a substitute for, their other forms of national advertising. The most appropriate "market" in which to measure network concentration is therefore the national television advertising market.

In addition to national television advertising on the networks, advertisers may obtain national television exposure on a "national spot" basis from a composite of individual stations. The concentration of control in this market which the network organizations have by virtue of their ownership of stations is not high. The networks have contractual relationships with affiliated stations that permit them, in effect, to act as the sales agent for the affiliates in connection with network time sales. Networks

also act as sales representatives for a small number of affiliated stations in connection with national spot sales. The concentration of control by networks in their capacities both as owners of stations and agencies is comparatively high; collectively, the three networks account for close to 70 percent of national television time sales, with CBS and NBC accounting for over 60 percent.

Network concentration is also measured in other relevant market dimensions. In terms of their share (by ownership) of total industry assets, total industry revenues, or the production of programs shown on the network, network concentration is not particularly high. In terms of one significant measure—the proportion of network programs during prime evening hours on television stations throughout the country—network concentration is very high. During the three prime evening hours subject to network option, the three networks account for close to 80 percent of the total programs carried by commercial TV stations. The proportion is over 90 percent in the case of the “basic” stations of the CBS and NBC networks.

There is little prospect that a new national network can gain entry and approach the size of the existing networks until there are substantially more comparable station facilities than now exist in the top 50 or 100 markets of the United States. In markets with few firms and high profit levels, the entry of new firms is essential as a means of assuring a more effectively competitive situation. While “networking” profits, notably those of CBS and NBC, have risen to high levels in recent years, these are major obstacles to the entry of new firms. These barriers arise in part from the nature of the network-station affiliation arrangements and the mutual benefits derived therefrom, from the existing structure of A. T. & T. rates for interconnecting stations, and from certain economies of large-scale operations in “networking.” The principal factor, however, accounting both for the high concentration in “networking” and for the effective barriers to the entry of new networks is the shortage of competitive TV station facilities in the VHF spectrum. These factors suggest that, absent a major technological change in the nature of the television industry or in the form of telecasting, “networking” will continue to be characterized by a small number of firms enjoying substantial profits without the possibility that new networks will be able to enter and compete for these profits. It is generally agreed that, the lower the degree of concentration and the more numerous the firms, the greater is the possibility of effective competition.

Specialized “Networks” May Add Competition

While there is little prospect in the near future that more effective competition can be obtained through additional nationwide networks, an additional competitive element exists in that the networks are in competition for national advertising business with the national spot system of advertising made up of national station representatives and independent program suppliers. Also, there is a prospect for the development of more limited or specialized “network” organizations such as National Telefilm Associates (NTA), Program Service, and the Sports Network. Although the existing degree of network concentration in the national television advertising market is high, whether or not the present structure of networking is compatible with the public interest in an effectively competitive television system cannot be conclusively determined until the possibilities of greater competition from national spot and specialized networking systems are examined. The concentration analysis, however, highlights the fact that the public interest in a workable system of competition can be achieved in part by encouraging competition between network and national spot television. In this connection, the network practices in affiliation, rates, option time, compensation, and other relationships with affiliated stations play a vital part, since they bear directly on the ability of non-network organizations to compete effectively with the networks.

E. Affiliation

Affiliating with a network has very significant effects upon the operation of a station. It determines in substantial measure the program service which the station offers to the public. It also determines in large measure the economic well-being of the station. Most stations consider network affiliation to be their most important single asset, next to the Commission license. The importance of network affiliation to station operation is such that a searching appraisal of network affiliation practices has been undertaken by the Network Study Staff. The broad policy issue involved is whether these practices properly serve the public interest.

In selecting affiliates, the general objective of the networks is to provide an advertiser with potential access to practically all television homes in the United States at a reasonable cost. To implement this objective, networks have developed criteria with respect both to the selection of markets and of the individual stations within a market, and regular procedures for processing affiliation decisions. The choice of markets has been based essentially on economic considerations with respect to market size, buying power, and growth potential. Selection of the affiliates within a market, in cases where alternative stations are available, has turned on a variety of complex factors, among them station ownership (by newspapers, multiple station owners, radio affiliates of the network), the physical facilities of the stations, and past broadcasting experience. A major criterion in affiliation decisions is the size of a station's unduplicated circulation. Duplicate coverage is considered wasteful and disadvantageous to the advertiser, and networks seek to maximize the extent of unduplicate coverage. Many affiliation decisions have turned on the circulation factor. However, the criterion of unduplicated circulation is not applied uniformly; in a number of affiliation decisions offsetting considerations may be involved. Moreover, a station's circulation is far from being a simple or readily determined measure, and the networks exercise considerable latitude and business judgment in applying this criterion.

One of the criticisms directed against networks is that they have “discriminated” against UHF stations, thus impeding the development of the UHF service and the possibility of achieving a nationwide, competitive television system. In the face of widespread ownership of sets equipped to receive VHF signals only, UHF stations have needed substantial network programming as an incentive to the public to invest in UHF equipment. However, until UHF stations could deliver circulation, they were unable to compete effectively with VHF stations for advertiser acceptance or network service. Within the context of a competitive market system, the networks preferred VHF stations, with larger circulation, to UHF stations as the most economical way of reaching a large audience at a low unit cost. Many UHF stations were unable to obtain network affiliation or, if affiliated, to obtain sufficient network commercial orders from advertisers. This has been an important factor in the limited development of the UHF service. The VHF band was the first to be utilized and television sets were equipped to receive signals broadcast only in this portion of the spectrum. A high stage of technological and economic development was reached in this frequency band before allocations to television were made in the UHF band. The more advanced development of VHF has made it difficult to achieve comparable development of UHF. The UHF problem was aggravated by the assignment of VHF and UHF stations in the same markets and by the continued manufacture of sets equipped to receive VHF only. Given this situation, the business interests of national advertisers, and hence of the networks, dictated primary reliance on VHF facilities.

Another criticism of networks has been their alleged unwillingness to affiliate with stations in small markets. As in the case of UHF, a conflict exists between the public interest in maximizing the number of communities with

local TV outlets and the economic interests of network advertisers. Network advertisers are most concerned with access to the top 75 markets; their interest in markets below this level decreases proportionately to market rank. As a result, it may be unprofitable for networks to affiliate with stations in some of the smaller markets. Even if the small-market stations do obtain affiliation, they are ordered for, and therefore receive, only a minor proportion of the network's commercial programs. CBS and NBC have established plans designed to extend affiliation to small market stations and to increase the opportunities for these and other affiliates to carry network programs. In some respects, however, they illustrate the underlying economic difficulties of aiding small market stations and of increasing the access of affiliates to the network's commercial program service.

Network Affiliation Criteria Reviewed

Another issue is the soundness of the network criteria governing affiliation with stations in communities within service range of affiliates located in nearby communities. Unavailability of affiliation may deprive "overshadowed" communities of local television outlets, despite the fact that these cities may be of substantial size. There is some doubt whether the networks have followed well-defined and consistent affiliation criteria in these cases. There is a question whether the influence in these affiliation decisions of discussion with existing affiliates in the "overshadowing" communities is consistent with the Commission rule requiring that network affiliation in such cases be a unilateral decision. In addition, there is a question whether appropriate measures of overshadowing are used; whether, for example, consistent consideration is given to the quality of service available to the public, or undue attention is given to protecting the service areas of basic stations.

In choosing among stations competing for affiliation, the networks, particularly CBS and NBC, have, as a matter of policy, strongly preferred those television licensees who were also their radio affiliates in the same market. This policy has served the radio and television interests of the networks and of their radio affiliates. However, the joining of radio and television interests in the affiliation process has not served to promote competition among stations for network affiliation, nor among networks for affiliates. Thus, the late DuMont Television Network, which was not in radio "networking," was at a competitive disadvantage in seeking access to television stations which were also long-time NBC or CBS radio affiliates.

At least one of the networks has demonstrated, in its affiliation criteria and decisions, a preference for multiple-station owners over single-station owners. The basis for this preference is the advantages that may accrue to the network from affiliation with other of the stations held by the multiple owner. This preference is contrary to the Commission's policies of promoting local ownership and the widest diversification of ownership in the television medium. Also, the preference granted to multiple owners effectively hinders competition among stations for affiliation; a licensee having a scarce facility in one community thereby obtains an unwarranted advantage in the competition for affiliation in another community.

A network expects its affiliates to cooperate in clearing time for network commercial programs. This cooperation is well understood by the stations entering into an affiliation agreement. On some occasions, however, at least one of the networks has sought to exact a promise from a prospective affiliate in a market with scarce facilities that he would serve as a "primary" affiliate of that network and grant the bulk of his clearances to it rather than to other networks. This practice appears to contravene the intent of Chain Broadcasting Rule Sec. 3.658(a) which prohibits any agreement or understanding, express or implied, preventing or hindering a station from accepting programs from more than one network.

Another issue closely tied in with the general affiliation process is what the length of the term of affiliation should be. The Commission currently prescribes that each term shall not exceed two years, although no limit is placed on the number of times the contract may be renewed. Each of the networks has different policies with respect to the effective term of its contracts, both in the "standard" contracts and in the many exceptions that are made. Some persons in the industry have expressed the view that the Commission should permit a longer affiliation term. At issue are two different policy approaches. On the one hand, a longer affiliation term is advocated, by some stations, on two grounds: it would provide the affiliate with greater security, so that he could make the long-term capital investments necessary for programming in the public interest; and it would strengthen the bargaining position of affiliates in relation to the networks. On the other hand, a longer contract term tends to lessen the competitive opportunities for changes in affiliation. A two-way competition among networks for affiliates and among stations for network affiliation should stimulate networks and stations to improve their service to the public.

Network affiliation contracts grant the affiliate a "right of first call" with respect to network programs offered in its community. The intent of this policy is to have the affiliate serve, insofar as possible, as the exclusive distributor of network programs in the station's coverage area. An affiliate is, in effect, the network's "chosen instrument" in a community. While this relationship serves the interest of both network and affiliate, it severely limits the access of unaffiliated stations to network programs. In the view of the Network Study Staff, the "right of first call" is an essential feature of network operations, and elimination of it might undermine the network system and jeopardize the supply of popular and public service network programming. On the other hand, once a program has been rejected by the primary affiliate, it should be made available to another station in the market if the network advertiser so desires. In these circumstances, the networks have sometimes sought to discourage the advertiser from placing his program on another station in the market. Occasionally, the networks have had discussions with their primary affiliates with respect to such program placement that appear to be incompatible with the Chain Broadcasting Rules. Similarly, the networks attempt to protect the territorial exclusivity of their affiliates by discouraging advertiser placement of the same program on more than one station in the same general area.

F. Option Time

The standard affiliation contracts provide that the affiliate will accept and broadcast all network programs offered to it during certain hours of the broadcast day, known as network "option time." Under Section 3.658(d) of the Commission's Chain Broadcasting Regulations, network option time is restricted with respect to the number of hours that may be made subject to the network option, the amount of advance notice required before the option may be exercised, and the rights of the affiliate to reject network programs for specified reasons or to substitute therefor a program of outstanding importance. Also, a network cannot exercise the option right to preempt time in which the station is broadcasting the programs of another network.

The option-time arrangement has been the subject of considerable controversy. Film syndicators, national station representatives, and an independent station manager have appeared before Congressional Committees or the Network Study Staff to attack the practice as a *per se* violation of the antitrust laws or as a competitive restraint. The three networks, and representative groups of their affiliated stations, have defended option time as essential to the functioning of the existing system of network broadcasting and as consistent with the station's responsibilities to program in the public interest.

The option time right of the networks is a limited one. Only three hours in each of the four segments of the broadcast day may be optioned by a station to any or all networks. Legally, the station retains the power to reject network programs if deemed unsatisfactory, unsuitable or contrary to the public interest. In practice, network programs are frequently rejected without any specification of the reasons involved. Programs straddling option and station time fall into a special category. Technically, problems of time zone differences and daylight saving time make it difficult to utilize the option-time hours to maximum advantage in some markets.

The networks very seldom invoke their option-time rights, and there has never been a legal contest of these rights. Option time does not generally play an important part in the network's efforts to obtain station clearances for its programming, for a variety of reasons. From a mechanical standpoint, option time has no appreciable effect on the time required to complete the clearance process. Emphasis on option time might complicate the network's efforts to arrange clearances for its programs originating outside of option-time hours. Also, the network is aware that stations have many affirmative reasons for desiring a large schedule of network programs, and in this situation it has other and, in the aggregate, more influential bargaining powers in its efforts to effectuate clearance. Finally, the network-affiliate relationship is, to some extent, looked upon by both parties as a "partnership" arrangement. Mutual cooperation is required, and this necessitates that the option time clause be administered, flexibly.

Option Time and Clearances

Despite these qualifications, most affiliated stations feel a stronger obligation to clear for programs originating in option time than for those originating in station time. Option time is more frequently alluded to in station responses to network requests for clearance, and is used by the stations as a means of safeguarding the hours specified as station time from further "encroachment" by network programming. Option time, therefore, has some effect on the network's ability to arrange program clearances, as is confirmed by a comparison of average program clearances during option and non-option hours. However, it does not appear to be the most important factor in the clearance process. Program quality and the programming of competing networks bring about substantial variations in the clearance record of individual programs, both within and outside of the option-time hours.

Since the contractual provision of option time has created some obligation on the part of affiliated stations to clear for network programs, the station licensee is not entirely free to exercise his judgment with respect to program selection. Most stations do not simply "plug into" the network but act with considerable discretion in accepting or rejecting network and other programs. Nevertheless, as a result of the option time provision, affiliated stations accept some network programs that they would not otherwise carry, or else that they would otherwise carry on a delayed basis. To this extent, the station licensees have relinquished some of their programming responsibility to the networks. If this were not the case, option time would be of no effect in the clearance process and the networks would have no reason for including option time clauses in the affiliation contract.

Other business groups competing with the networks or with advertisers using network television have been placed at a competitive disadvantage through network option time. Producers and distributors of syndicated film programs (designed specifically for television) have had only very limited access to the broadcast schedules of affiliated stations during the most desirable viewing hours. For this and other reasons, these producers and distributors have tended to favor direct sale to the networks or to network advertisers, and the quality and quantity of syndicated film programming have been reduced below what they would

otherwise be. Similarly, national station representatives have been handicapped in their efforts to sell program time periods in competition with the networks, since the most desirable periods are under option to the networks. National, regional, or local advertisers seeking access to television in competition with network advertisers have also been placed at a competitive disadvantage. Although other (and in some cases more important) factors are also involved, option time has acted to some extent to restrain competition in a manner contrary to the public interest in each of these areas.

It is not apparent that option time is necessary or essential to network operations. Since stations clear more readily during the option-time hours, the arrangement is clearly a business convenience of some usefulness to the networks. That it is not essential is evidenced, among other things, by the fact that both CBS and NBC are now programming to a considerable extent in station-time hours. Some "erosion" of clearances might occur without option time, as stations made their programming decisions with greater freedom. On the other hand, there are many reasons for believing that program clearances would remain at high levels, particularly if the quality of network programming is maintained. Relatively few programs require the simultaneous live clearances for which option time is most useful. It is also possible that network clearance outside of option time would be improved if the distinction between "network option" and "station time" were no longer recognized.

Acceptance of the argument that option time is "essential" to networking would necessitate various forms of direct network regulation—however undesirable some of them might appear—to make certain that the quasi-monopoly power conferred on the networks was exercised in the public interest.

An antitrust analysis of option time on the basis of court decisions reached subsequent to the promulgation of the Chain Broadcasting Rules indicates at least a strong possibility that it would be found to be a *per se* violation of Section 1 of the Sherman Act on analogy to the motion picture "block-booking" practice condemned in the *Paramount* case. Substantial support for each of the elements of the "block-booking" formula can be demonstrated. While there is clearly a large area of mutuality of interest in network-affiliate program transactions, there is also an area of conflict. At least a limited number of network programs are apparently forced upon some stations. This situation might prove sufficient to satisfy the elements of the "block-booking" doctrine.

For the reasons given above, the Network Study Staff has concluded that the option time arrangements have operated in television in a manner contrary to the public interest.

G. Rates

One of the most significant functions attributed to networks under the affiliation contract is that of establishing the time rate of each affiliate for sales to network advertisers. The network setting of rates raises a number of important policy issues, the first of which is whether it is appropriate or necessary for the networks to exercise this function. The Network Study Staff concludes that network determination of the level of network rates appears to be necessary for several reasons: to handle overlapping circulation between affiliated stations so that the advertiser does not pay twice for the same circulation; to provide a uniform method for estimating circulation in order to avoid arbitrary rates on the part of individual stations which might prejudice the interests of other affiliates; and to translate circulation data into a rate structure that is competitive with other networks and other advertising media. At the same time, the financial stake of the network in obtaining the highest possible level of network rates provides some assurance that it will set rates in a manner compatible with the general interests of the affiliates as a whole.

Another issue considered is whether the networks act arbitrarily with respect to individual stations or otherwise against the public interest in their determination of the network time rates of affiliated stations. The available evidence indicates that networks have attempted to establish objective bases for measuring circulation and translating circulation data into rates through the use of a rate formula. In addition, the networks have taken into account various other qualitative factors in setting rates, and these factors have influenced both the timing and magnitude of particular rate changes. Some of these factors, such as the competitive situation with respect to other networks and advertising demand, appear to be reasonable. However, the practice, extensively followed by each of the networks, of using rate decisions as a lever for obtaining clearances from affiliates is, in the view of the Network Study Staff, contrary to the public interest. Moreover, it appears that the networks, on occasions, have used their rate-making powers to influence affiliates in respect to their clearance of programs of competing networks. Such a practice appears to be contrary to Section 3.658(a) of the Commission's rules. In addition, networks do not appear to have kept their affiliates adequately informed of their rate criteria and rate procedures. Some stations have engaged in the practice of making the acceptance of a network program or programs conditional on the granting of a network rate increase; this practice is also inconsistent with the public interest.

Rate-Fixing Restrictions

As a result of the Chain Broadcasting Investigation of 1938-41, the Commission adopted a rule prohibiting a station from entering into any contract or agreement with a network that hindered it from fixing or altering its national spot or local rates. The broad purpose of the rule was to prevent the networks from taking actions that would influence or restrict the freedom of the station to fix independently its rates for competitive non-network business. All of the networks have engaged in practices which are contrary to the broad purpose of this rule and to the public interest in the maintenance of free competition. These practices have acted to restrict the freedom of the station to fix its national spot rate at will and to enter into competition with the network should it choose to do so. In the case of CBS and ABC, evidence exists that the networks have used their power to fix network rates in order to influence the level of the stations' national spot rates in a manner which raises a question with respect to violations of the Chain Broadcasting Rules, and possibly also of the antitrust laws. In addition, NBC and CBS have adjusted the level of national spot rates of their owned and operated stations in order to influence the national spot rates of their affiliates.

In attempting to influence, directly or indirectly, the level of national spot rates fixed by their affiliated stations, the networks have had two objectives in view: 1) to reduce competition between national spot and the networks for the business of national advertisers; and 2) where a direct loss of business to national spot was not involved, to maintain a rate relationship that would not provide network advertisers with a basis for seeking a reduction in the level of rates set by the network.

There is no specific Commission rule with respect to rate competition among the networks, but the relevant portions of the antitrust laws are applicable to network activities in this area. The CBS and NBC networks compete freely with each other with respect to the establishment of network rates. The Network Study Staff has found no evidence of any understanding or agreement between the networks that would interfere with or restrain this competition. The ABC network competes with CBS and NBC by setting lower rates for its affiliated stations. ABC has sometimes engaged in the practice of consulting with the other networks with respect to their rate plans prior to taking action on the network rates of its own affiliates. The other networks have cooperated in providing the de-

sired information. This practice among the three networks is not compatible with the Commission objective of preserving free competition and may have antitrust implications.

H. Compensation

The revenue obtained from network time sales is shared between the network and its affiliates on the basis of a compensation formula which is specified in each affiliation contract. Typically, the station agrees to waive compensation for a designated number of commercial broadcasting hours, called "free hours." After the free-hour waiver, the station receives a specified share of the gross network time billings or of its card rate for commercial-network broadcasts. Each network has one or more "standard" compensation formulas, to which a number of exceptions are made in particular cases.

It has sometimes been alleged that the networks, by virtue of their bargaining position, retain an unreasonably large share of the receipts from network time sales. On the average, the station receives less than 30% of the proceeds from the sale of its time by the network. However, from the network's share must be deducted discounts to the advertisers, commissions to the advertising agency, and the substantial costs incurred by the network in leasing the interconnection facilities of the A. T. & T. In addition, the network incurs financial losses in its program service, most of which is provided to the station without direct charge. Network affiliated stations in the large markets of the country have earned substantially higher profits than the networks, or than the networks and network-owned stations combined. The available evidence, therefore, does not indicate that the network's share of network time sales is unreasonably large.

The differences in compensation arrangements within each network have resulted in some cases in substantial differences in revenues received by individual stations. To some extent, these differences are based on the relative cost, or on the relative profitability, of the station to the network. The networks tend to provide more favorable compensation to the larger stations, from which they, in turn, earn a larger profit. However, there is no systematic relationship between cost and/or profitability to the network and the observed variations in compensation provided to particular affiliates. Other considerations are also involved, which relate to the bargaining strength of particular affiliates and to the competitive situation with respect to program clearances. Affiliates in important single-station markets, as well as large multiple owners, have succeeded in obtaining more advantageous terms than the standard formula. The networks have agreed to these terms, or in some cases initiated them, in order to protect and improve their station clearances at the expense of competing networks or other program sources.

To some extent, preferential compensation arrangements are inherent in the business framework of the industry, and all differentials in compensation provided to individual stations could not be eliminated without imposing a serious competitive handicap on the smaller networks and network-type organizations. On the other hand, preferential compensation arrangements can have practical competitive disadvantages, as when they are given to multiple-station owners. In addition, there is an objection in principle to having program clearances based on financial rewards rather than program suitability in the public interest. Sliding-scale or "incentive" types of compensation formulas—which, except for the "free hours" arrangement, are thus far used by the networks only to a limited degree—are potentially open to serious abuse through their effect on the programming freedom of the station licensee.

I. "Must Buy"

The CBS and NBC networks have a sales policy that requires network advertisers to order a specified minimum group of stations. These are referred to as "basic" or "basic required" stations, and the sales practice is commonly known as the "must buy" policy. The ABC net-

work has a somewhat different arrangement, called the "minimum buy" requirement. The latter requirement is fixed in terms of gross dollar cost, that is, the network advertiser must purchase stations the aggregate rates of which are at least equal to the prescribed dollar minimum, but is not required to purchase any designated station.

The "must-buy" practice dates from the early days of radio. With the rapid economic changes in the radio medium since the war, the radio networks have virtually abandoned the practice. Recently the "must-buy" requirement of network television has been criticized as a violation of the antitrust laws and a restraint upon the advertiser and the independent station. The question has also been posed whether the network's power to select the affiliates to be included in the "basic" group has been used in a manner consistent with the public interest. Whether or not the "must-buy" requirement may be considered to be "essential" to the network operation is also a pertinent question.

NBC and CBS have established objective criteria for the selection of the particular affiliates that comprise the "basic" groups. These criteria, which relate primarily to the importance of the station as part of a national advertising medium, are followed closely in most cases. A few stations have been included in the list although not qualified under the principal standards. Exceptions to the requirement have been granted to individual advertisers, in infrequent instances.

NBC and CBS Basic Groups

The large majority of network advertisers order substantially more than the required minimum number of basic stations. A few network advertisers have probably been required to order a somewhat larger line-up of stations as a result of the "must-buy" policy. However, these advertisers are clearly in the small minority. A greater problem for advertisers has been created by the requirement of NBC and CBS that a designated group of basic stations be purchased. In some cases, the basic stations have been selected by the network on grounds that do not reflect the relative value of the station to national advertisers. Also, not all national advertisers have sufficient distribution in all of the basic markets to warrant their inclusion in the network order. However, the large majority of network advertisers are willing to order the large majority of the basic stations.

Small national advertisers may be placed at a slight additional handicap relative to larger national advertisers as a result of the "must buy" and "minimum buy" requirements. Fundamentally, however, there are other and more important economic reasons why relatively few small advertisers use network television.

The final decision regarding the inclusion of stations in the basic list rests with the network. There may be considerable discussion with individual stations concerning their inclusion in the list. Except in the largest markets of the United States, stations receive more orders as a result of their inclusion in the basic group than they would otherwise. Stations are therefore anxious to be included and retained on the list. This situation gives the network an additional bargaining advantage in its relationship with affiliated stations, an advantage which the network may use in order to obtain better clearances for network programs. As a consequence, some affiliates are led to accept network programs that they might not otherwise be disposed to carry, or would otherwise carry only at a delayed time.

There is no evidence that independent stations are placed at a competitive disadvantage to a significant degree as a result of the "must buy" policy. The principal reason that most independent stations have very little opportunity to carry network programs is that the network's primary affiliate in the area has a right of first call with respect to all network programs.

The networks have taken the position that the "must buy" practice is necessary in order to define the contours of a national network and to prevent the fragmented sale of the network on an uneconomical basis. Little support

can be found for this position. While fragmented sales that would not permit recovery of the network's fixed costs would clearly be uneconomical, it is not the "must-buy" policy that prevent such sales from taking place. The size of advertiser orders is determined primarily by the economics of the television market, and has little to do with the basic-required policy. At present, most network advertisers voluntarily order considerably more than the required line-up. If most advertisers were prepared to order only much smaller line-ups, the networks could not, through the "must-buy" practice, compel them to do otherwise. Without the "must-buy" requirement, networks would still be free to require that all orders must be acceptable to the network. Presumably only orders which represented a reasonable national coverage would be acceptable.

There is no direct relationship between the revenue from the basic-required list and the fixed costs of the network operation. The list is selected on the basis of criteria unrelated to these costs, and the revenues obtained are in fact far in excess of the overhead or fixed costs of networking. In general, there is no apparent need for the network to select the particular affiliates to be included in the required group. The principal reason for originally doing so—the need to recover the expense of costly segments of the transcontinental cable—ceased to be an important factor several years ago. It is possible that there is a somewhat greater need for the network to be able to designate required stations in connection with multi-weekly programs sold in small time segments and sponsored by a considerable number of different advertisers.

An anti-trust analysis of the "must buy" practice creates serious doubt as to its legality. At least three doctrinal variations of a *per se* violation under Section 1 of the Sherman Act appear applicable to the "must-buy" practice: "tie-in" arrangements as described in *Times-Picayune Publishing Co. v. U. S.*; "tie-in" arrangements as described in *United States v. Northern Pacific Railway Co.*; and the "block-booking" formula of *United States v. Paramount Pictures, Inc.*, based on the finding that the grant of a broadcast license involves the conferral of a limited monopoly. The "must-buy" practice, therefore, presents a substantial antitrust question.

It cannot be said that the "must-buy" practice constitutes a major problem, from the point of view of networks, stations, advertisers, or the public. Nevertheless, the practice has been found to be a restraint on the freedom of some advertisers. Of particular significance, it has given the network a bargaining power in its relationship with affiliated stations that has not always been exercised in a manner consistent with the public interest.

J. Network Representation of Stations in National Spot Sales

NBC and CBS operate spot sales services in radio and television. These spot sales organizations represent the networks' owned and operated stations and a small group of affiliated stations in national spot business. ABC does not have a spot sales organization. In the national spot field its owned and operated stations are handled by independent national representatives.

The propriety of network representation of stations (other than network owned and operated) in national spot business was not discussed during the Chain Broadcasting Investigation of 1938-41 and is not the specific subject of any Commission rule. In 1948-1949 the Commission held a hearing pursuant to a complaint from the National Association of Radio Station Representatives to the effect that network representation in national spot sales was contrary to the purposes of the Chain Broadcasting Rules and otherwise against the public interest. The Commission decided that no violation of the rules was involved, but made no finding as to whether the practice was otherwise contrary to the public interest or whether new rules should be adopted.

The broad policy issue involved is whether the public interest is served by having the networks engage in the representation of stations in the national spot field, which

is in direct competition with network television for the business of national advertisers. In this connection, two issues are examined: a) whether the networks, by virtue of their strong bargaining position in relations with affiliated stations, restrain competition with independent national representatives for the business of representing affiliated stations, in a manner contrary to the public interest; and b) whether the networks restrain competition for national advertising business by their national spot activities with respect to rates and/or programming, in a manner contrary to the public interest.

The networks do not occupy a dominant position in the national spot representation business. Only a small number of stations are represented by the networks, about half of which are network owned and operated stations. Because of their strong position in affiliation and other relations with many stations, the networks are clearly in a position potentially to restrain competition by soliciting or accepting the representation of substantially more stations than at present. As a matter of deliberate policy, first enunciated by CBS in 1948-1949, the networks have not exercised this latent power and have never represented more than 15 TV stations.

No affirmative reasons have been found for permitting networks to engage in national spot representation other than for their owned and operated stations. The networks state that their national spot and network organizations are administered separately and compete actively with each other. There is a strong *prima facie* case that a corporation cannot compete effectively against itself. In practice, the spot sales and network units have worked together cooperatively on some rate matters. In the case of CBS, this cooperation embraced a "campaign" to equalize national spot and network rates for the purpose, and with the effect of restraining competition between network and national spot sales. In these instances the network's spot sales organization was acting in the interest of the network and contrary to the interest of the represented stations. There is no evidence that a similar situation has prevailed with respect to the limited part played by the networks' spot sales organizations in station programming decisions.

K. Interconnection

A central element in networking is the interconnection of stations, which permits simultaneous broadcasting of network programs in communities throughout the nation. The networks, themselves, do not provide the interconnection facilities but are customers of the AT&T System, which interconnects most network affiliates by coaxial cables or by microwave radio relays. The three television networks in total paid approximately \$35 million for use of these facilities in 1956.

The ready availability of program transmission facilities at reasonable rates is essential to the growth of "networking" and to the development of a competitive television industry. Stations in smaller communities and less populous areas must somehow economize on interconnection costs if they are to obtain network affiliation and network programming on a remunerative basis. A number of stations have objected both to the rate level and to the rate structure of the AT&T. In connection with the latter, it is alleged that the rate for occasional use is unduly high, thus hampering stations in obtaining network business and developing local, live, remote programming. Moreover, smaller networks and other organizations with limited program offerings appear to require a rate structure more closely tailored to the realities of their initial programming schedules, as well as equitable access to the interexchange facilities.

The reasonableness of the rate level and the rate structure of the AT&T for interconnection facilities are before the Commission in Docket No. 8963. As another solution, at least in part, for the need of smaller stations to economize on line costs, it is proposed in Docket No. 11164 that stations be permitted to construct and operate private

relay facilities, despite the availability of AT&T facilities.

Since these matters are now before the Commission, the Network Study Staff has not attempted an appraisal of the conflicting views of the broadcasters and the Telephone Company with respect to the issues either of rates or of private relay facilities. The Study Staff is of the view, however, that the issues involved have substantial implications for network entry and access of stations in small markets for network programming. Hence, they merit Commission resolution at an early date.

L. Multiple Ownership

One of the principal problems confronting the Commission is that of determining the number of television stations which any one interest should be permitted to own.

A number of Commission doctrines point to a policy of limiting the extent of station ownership by any party. One such doctrine is that broadcasting stations should be locally owned. The Commission has sought to achieve for stations the character of local institutions having a "grass roots" interest in the service and program needs of the community. A second Commission doctrine limiting multiple ownership is that ownership of stations should be diversified in order that the variety of opinion, program, and service viewpoints may be maximized. Closely related to the diversification doctrine is a third Commission doctrine designed to prevent monopoly or concentration of economic power contrary to the public interest.

Carried to their logical conclusion, these doctrines would result in a "one to a customer" limit on station ownership. However, the Commission has balanced these doctrines with that of favoring an applicant having a sound record of past performance, and with other competing doctrines. This equipoise of doctrines has resulted in the current Multiple Ownership Rule, under which a maximum of seven TV stations may be owned by one licensee, no more than five of which may be in the VHF band. Within this seven-station limit, the rule envisages consideration of applicants of station owners for the acquisition of additional stations on a case-by-case basis. In practice, however, no applicant having less than the prescribed maximum has been denied an additional station on multiple-ownership grounds. In part, this is due to the fact that in cases where a licensee seeks to purchase an additional station, the Commission is precluded, under the MacFarland Amendment, from considering the qualifications of other potential purchasers in a comparative hearing.

Notwithstanding the limitation imposed by the Commission multiple ownership of television stations has grown greatly and the trend is toward a multiple-unit system of station broadcasting. Of the 468 commercial stations on the air in November 1956, over 40 percent were held by multiple station owners. Multiple owners tend to concentrate their holdings in the top markets of the country, where station ownership is the most profitable. In the top 25 markets, serving half the population of the United States, 70 percent of the stations were held by multiple owners. Indications are that, to the extent permitted by Commission Rules, the proportion of multiple ownership in desirable markets will continue to rise. The image of an individual station owner, devoting his efforts in television to serving a single community which he has been licensed to serve, is a myth for most large cities, and, hence, for a majority of the listening public of the United States.

Multiple-station owners, by bargaining with networks, national spot representatives, and independent program suppliers for their group of stations as a whole, have been able to obtain more favorable terms, which give them a competitive advantage over single-station owners in the same communities. This is the principal manner in which multiple ownership has had an impact on competition in the market place. The competitive advantage of multiple owners may be one of the factors encouraging the trend toward multiple ownership and further concentration of control in the broadcasting industry.

While the capabilities of particular multiple owners to perform broadcasting service are difficult to appraise em-

pirically, or to compare with those of single-station owners, there is not strong evidence that multiple owners, *per se*, serve the public interest more effectively than single-station owners. The character, ability, resources, and interest in the community served may be of greater significance than the broadcaster's status as a multiple- or single-station owner. Any realistic comparison can be made only in a factual setting involving a comparative contest between a multiple- and a single-station owner for a station license in a specific market. All broadcasters were at some time inexperienced persons seeking entry to this field of service. While it is appropriate to give some weight to past favorable performance, this should not be given such weight that multiple ownership is increased and other entrepreneurs desiring to make a contribution to broadcasting are denied entry. Permitting licensees to own two UHF stations in addition to the five VHF stations has not resulted in an encouragement of the UHF system to a significant degree.

Networks are now subject to the same Multiple Ownership Rule which applies to non-network multiple owners. The networks state that network ownership of stations is essential because of the need to obtain a stable source of financing to support high-risk networking operations. Network-owned stations are also said to be laboratories for program ideas and talent, and are said to serve the local community interest well.

On the other hand, there may be an area of conflict of interest between the networking operation and the network's ownership of stations which it would be in the public interest to avoid. Also, network ownership of stations may impede the entry and growth of new networks and program services. In addition, since the network-owned station automatically becomes the network's outlet in the market, acquisition of a station by a network may result in the displacement of an existing affiliate even though it has been properly serving the network and the viewing public.

The need for income from station ownership in order to support the networking operation is much less apparent today, in the case of CBS and NBC, than it was during the developmental years of television. The substantial income earned by the networks on network time sales has more than offset the risks and losses in programming and made it possible to earn high profits on networking as such. Also, to the extent that additional capital resources may be required, conventional means of financing and the resources of the parent companies of the networks are available. On the other hand, the need for station ownership as a source of income to support networking may be greater, at least temporarily, in the case of ABC or new networks or network-type organizations seeking entry. Also, it is important that caution be exercised lest the ability of the networks to provide quality programming and to experiment with new program concepts be reduced below a level consistent with the public interest.

M. Radio

The Network Study Report has been concerned primarily with television because of its relative newness, the urgency of the problems associated with it, and the absence of any Commission regulations designed especially for television.

A cursory review of changes that have occurred in the field of AM radio broadcasting since 1938 reveals a very marked increase in competition. In the case of radio stations, increased competition has resulted both from a large increase in the number of stations and from the development of television. In the case of radio networks, increased competition has come from the growth of television and the greater independence of radio stations as a result of low-cost program alternatives to the networks.

The kind of competition that has developed appears to be healthy. While it has reduced the power of networks, there appears to be nothing in the current situation to suggest the demise of radio networks. It is reasonable to believe that the ingenuity of networks will provide new

methods for servicing station affiliates and the radio listening public—and at a profit to themselves.

The Congress and the Commission have historically placed major dependence upon competition as a regulator of radio broadcasting in the public interest. In the case of radio, it has been possible to provide a plentiful supply of frequencies for local use. These have been available to qualified entrepreneurs willing to compete with others for audience and advertiser favor. Results of the past several years would indicate that rules established by the Commission have helped to provide an environment which has been conducive to effective competition. It should be recognized, however, that the Network Study Staff has not undertaken an exhaustive study of the current status of radio and all of its components. There are important problems in the radio field that require detailed study by the Commission.

N. Application of Commission Rules and Regulations to Network Organizations

The Chain Broadcasting Rules apply directly to stations and indirectly to networks. However, they are intended, for the most part, to achieve for stations freedom from undue network influence in designated respects, so that the stations may exercise their duty to broadcast in the public interest. An issue has arisen as to whether the Commission's public interest objectives can be achieved by applying its rules to stations or whether they can only be achieved by applying them directly to networks.

Various Commission policies are infringed in some degree by the network structure and practices. For example, the responsibility of stations to broadcast in the public interest is affected by network practices which contribute to the very high percentage of station time occupied by network programming, particularly during prime viewing hours when the audience is greatest. The Congressional and Commission policies of achieving regulation through competition among components of the industry are affected by the strong position of the networks in bargaining with many affiliates, by the technical barriers to new network entry due to the scarcity of viable VHF outlets, and by the limited opportunities for competition between network and non-network program sources due in part to the option time and other network practices tending to restrict competition. While some network activities have helped to develop a nationwide television system, others have operated in a contrary direction.

The touchstone of Commission policy is encouragement of broadcasting in the public interest. Just as the stations serve a public interest of their communities, the networks serve a national public interest in broadcasting.

The Chain Broadcasting Rules are addressed specifically to stations in some instances. They provide for the revocation of a station's license if, in effect, the station permits itself to be influenced by a network in designated respects. The proscribed conduct is, with few exceptions more likely to be initiated by a network than by a station. The recommendations in this Report for amendment to the Rules or adoption of additional rules, are likewise directed, for the most part, to conduct or potential conduct of networks. There are administrative and practical difficulties in effectuating Commission policy through application of some of these recommended rules to stations. With respect to the recommended rules relative to "must buy," there are legal difficulties, as well, in the absence of authority by the Commission to apply the rule to networks. There are similar difficulties in connection with any rule which might be proposed, as the result of a subsequent study of programming, in connection with the national public interest served by networks. Moreover, effective enforcement of rules is made more difficult when the party to which the sanction applies, the station, is not the party responsible for the conduct, and when the stations may be obliged, in the interest of the affiliation relationship, to submit to the inducement of the networks.

Power and responsibility go hand in hand; not weakness and responsibility. Decisions are more responsible when those who make them are answerable to those affected

by the decision and to the public. The networks, which are the strongest decision making component in the television industry, should be answerable to the viewing public through Commission policies expressing the public interest.

Application of Commission rules directly to networks does not affect the jurisdiction of the Department of Justice in anti-trust matters. However, it may have the practical effect of making antitrust actions more difficult to prosecute. This is because approval of industry practices through promulgation of rules by the agency charged with regulatory responsibility is a factor to which a court or jury is likely to give conscious or sub-conscious weight in determining whether such practice constitutes a violation of the antitrust laws. However, the Commission not only recognizes that it is under the obligation of maintaining a broadcasting system compatible with the antitrust laws, but also to promote the broader degree of competition among various components which assures the development of the broadcasting industry in the public interest. The gain from maintaining this public interest level of competition outweighs the possible loss in effectiveness of antitrust prosecution which application of Commission regulations to networks may entail.

Application of Commission rules to networks should be made only in those areas in which Commission objectives are infringed by network structure and practices. Whether effectuation of Commission policy requires a rule in a particular public interest area depends upon the circumstances in the industry, which undergo continual change. Hence, it is not possible to predict the complete range of potential future regulation. However, it would not appear that application of Commission rules to networks would involve the establishment of station rates, the division of compensation between networks and stations, or rules relevant to programming which go beyond balanced programming within the national public interest context.

It is very doubtful that the Commission has authority to apply rules and regulations directly to networks. In view of this and the fact that the Commission has for the past 15 years disclaimed this authority and has regulated networks indirectly through rules addressed to stations, the Commission rules should not be applied directly to networks unless and until the Congress expressly authorizes the Commission to do so.

The Network Study Staff concludes that the Commission's rules and regulations relating to network-station relations should be applied both to stations and networks; those applying only to network conduct should be applied exclusively to networks. Because of the problem of overlapping jurisdiction of the Department of Justice and the Commission relative to Communications matters having antitrust aspects, it is suggested that the official views of the Department of Justice be requested. Unless the adverse effect on prosecution of antitrust matters is greater than anticipated in this study, the applicable parts of the Commission's rules should, after appropriate authority has been obtained from Congress, be applied directly to networks.

II. RECOMMENDATIONS

In formulating the general philosophy underlying its evaluation and recommendations in the various areas under study, the Network Study Staff has been guided by the several doctrines through which the Commission, in the course of its administration of the Federal Communications Act, has given substance to the "public interest, convenience, and necessity." The fundamental objective of Commission policy is the best possible service to the public. The implementation of this primary objective has been sought through the policies of: 1) promoting competition and preventing undue concentrations of economic control; 2) diversifying ownership and control of broadcast facilities, and 3) fortifying the independence of station licensees in order that they may exercise a high degree of discretion in providing a service consistent with the needs and desires of the community reached by their broadcasting. In implementing these objectives, the framework of

certain physical and operational conditions existing in the industry must be recognized. These are: 1) that television channels are limited, and that, in all probability, the present VHF structure constitutes the major portion of available broadcast facilities, 2) that the television industry will continue to be supported by advertising revenue, and 3) that the interconnected network organization will continue to be an essential component of the TV broadcast system. The task becomes one, therefore, of adjusting the primary regulatory policy objectives to the limits imposed by these basic conditions in order to attain optimum performance in the public interest.

The Commission's doctrines emphasize competition as the means through which the public interest in broadcasting can best be assured. The dominant theme of this Report is the importance of achieving or maintaining the conditions necessary for effective competition in the television industry. To this end a number of recommendations are made for the removal of practices, principally on the part of networks, which restrain or otherwise interfere with the free play of competitive forces. The option time and "must buy" practices, and the use of network rates, including those of network-owned stations, to influence national spot rates are examples of practices of this kind. Some of the proposals of the Network Study Staff with respect to the prohibition of competitive restraints are designed to promote competition among the existing networks and to increase the possibility of competition through the entry of new networks. Other proposals are designed to increase the effectiveness of competition between "networking" and the national spot "system" of telecasting. Since there are only three major national networks, with little prospect for a fourth in the near future, the principal thrust of policies aimed at providing more effective competition must be in this direction.

FCC Rate Regulation Rejected

Consistent with this basic reliance on the competitive process as the best means of safeguarding the public interest, the Network Study Staff has recommended that the Commission not become directly involved in reviewing, with the purpose of approving or disapproving, the detailed business decisions of the networks. The Staff believes that such day-to-day judgments must be left to the forces of the market place, and that the role of the Commission should be confined, to the extent possible, to the prohibition of practices which restrain competition or are otherwise contrary to the public interest. Thus, the Network Study Staff has rejected such alternative recommendations as a rationing of the time of stations among the existing networks and other program suppliers, and Commission review of individual network decisions with respect to network rates, compensation arrangements, and affiliation or disaffiliation actions.

It must be recognized, however, that even if all of the existing competitive restraints were removed, the bargaining positions of the various parties would remain disparate. Although networks and their affiliated stations have a large area of mutual interest or "partnership," they also have conflicting interests. In this area of conflict, where use of the stations' facilities for competing with non-network groups may be involved, the major networks are likely to be in a strong bargaining position in many market situations. When disparate positions exist, it is imperative to insure that bargaining power is not used in ways that are incompatible with the public interest and impinge upon Commission policy. The prohibition of restrictive practices, as summarized below, will serve this end. In addition, the Network Study Staff has recommended that the salutary effect of publicity of network policies be used, in lieu of specific regulations prohibiting restraining practices, whenever it appears that publicity will achieve the objectives of the public interest. The possibility of arbitrary, discriminatory or restrictive action in such areas as affiliation, disaffiliation, rates, and compensation can be substantially reduced if adequate publicity is given to network actions. In this way, these in-

dustry practices will tend to be self-regulating, and bargaining power may be kept within reasonable bounds without further Commission action.

Another fundamental Commission doctrine, to which the Network Study has sought to give added strength through its recommendations, is that the station licensee must ultimately bear the responsibility for programming in the public interest the facilities licensed to him by the Commission as a public trust. This responsibility cannot be delegated to another party, nor should it be restrained by contractual or other relationships which interfere with its free exercise by the station licensee. Specific recommendations with respect to the option time and "must buy" practices and to network-station relations in the rate area reflect this underlying philosophy. Also, it has been recommended that, through its policy on the renewal of station licenses, the Commission insure that this responsibility is exercised in a manner consistent with the public interest.

A third Commission objective on which particular recommendations of the Network Study Staff are based is the establishment of a nationwide television system, providing the largest possible proportion of the population with at least one facility and as many additional communities as possible with two or more facilities. To a major extent, the establishment of a nationwide television system along these lines depends upon allocation policies with which this Study has not been concerned. Within the scope of the Study, attention has been focused on preserving the essential features of the "networking system," which has provided the best basis for extending a quality program service to stations reaching a very high proportion of the nation's television homes. This consideration underlies, for example, recommendations made with respect to the "right of first call" of network affiliates, to the "must buy" policy, and to the network ownership of stations within prescribed limits. In addition, various proposals are made concerning the access of independent stations and of stations in smaller markets to network programs and Commission action on the structure of AT&T rates with the intention of strengthening the financial and programming base of some of the station outlets required for a nationwide television system.

Another set of Commission doctrines with respect to the public interest have guided recommendations addressed to the growing problem of multiple ownership of stations. This includes the doctrine that the station, in order to fulfill its role as a local community institution, should be owned by local interests with roots in the community to be served; the doctrine that the public interest is best served by a diversity of opinions and program sources; and the doctrine that a concentration of economic control in the hands of a small number of ownership units is inconsistent with the public interest.

Against this background of the "public interest," the following recommendations are made with respect to Commission policies and procedures in the various areas embraced in this Study:

A. Affiliation

1. Networks should be required by rule to file with the Commission a full and detailed statement of the criteria governing their affiliation policies.

2. Networks should be required by rule to file reports with the Commission setting forth changes in affiliation as they occur and the basis of each change. The networks should also be required to report to the Commission all requests for affiliation and the disposition of such requests, including the specific factors used by the networks in granting or denying the requests.

3. A rule should be drawn specifying that networks may not use as a basis for affiliation the fact that a licensee is a multiple owner of television stations.

4. In connection with the proposed study of radio networking, particular consideration should be given to the effects on competition of the practices of the networks of holding open regular television affiliation until their radio affiliates have obtained competitive television facilities.

5. The practice of one of the networks of requiring certain applicants for affiliation to promise to serve as its primary outlets, to the exclusion of other networks, should be referred to the Commission for appropriate inquiry in the light of Section 3.658(a) of the Commission's rules. Similarly, further inquiry should be made by the Commission as to the policies and practices of the networks with respect to holding discussions with existing affiliates concerning the granting of affiliation to other stations.

6. The Commission should seek comments from all interested parties with respect to a proposal that networks be required to provide affiliated stations in markets not ordered by the advertiser the opportunity to carry the program with commercials deleted, upon reasonable payment by the stations to the network and the advertiser.

7. The Commission should not extend the present two-year maximum affiliation term.

8. The networks should be required by rule to report to the Commission their specific criteria for disaffiliation and should report each disaffiliation action and the bases thereof.

9. Pursuant to Recommendation numbered 3 above, the Commission should require by rule that networks may not use the criterion of multiple ownership as a factor in disaffiliating with a station, in order to affiliate with another station held by a multiple-station owner.

10. The networks should be permitted to continue to grant first call and territorial exclusivity rights in a community to an affiliated station.

11. The Commission should require by rule that if an affiliate is ordered for a network commercial program, but does not provide clearance satisfactory to the sponsor, the network in good faith should undertake to place the program in another station in the community, if the sponsor so chooses. If a clearance suitable to the advertiser can be obtained, the network should not, for a reasonable period of time, be permitted to recapture the program in order to place the program on its regular affiliate.

12. The Commission should require by rule that if an affiliate is carrying a network commercial program, but the advertiser wishes to have the program carried also on a station in another community, the network should undertake to place the program on the other station.

13. The practice of the networks of discussing with affiliated stations the proposed placement of network programs on non-affiliated stations should be examined by the Commission to determine whether such practice is consonant with Section 3.658(b) of the Commission's rules.

B. Option Time

14. The option-time arrangement between networks and affiliated stations should be prohibited by Commission rule. The proscription of option time should not be accompanied with any proposal to ration or otherwise limit the amount of programming that a station licensee may accept from any source. The language of the Commission rule should be phrased so as to preclude similar or more restrictive arrangements which might appear if option time is abolished.

C. Rates

15. A rule should be adopted requiring the networks to publish currently their rate-making procedures, including the circulation credited to each affiliate, the formula used for rate purposes, and all changes made in the network rates of individual affiliates.

16. The Commission should watch the development of the rate situation closely and continuously, but assume no responsibility for reviewing individual or general network rate decisions at this time.

17. New rules should be adopted, or current rules expanded, to prohibit any attempt by a network organization to influence the non-network rates of affiliated stations, and any attempt by a network to use the setting of network rates to influence station decisions with respect to program clearances.

18. The evidence with respect to possible infractions of Chain Broadcasting Rules 3.658(a) (through the use of

network rates to influence the station's acceptance of programs from another network) and 3.658(h) (through the use of network rates to influence the national spot rates of affiliated stations) should be referred to the Commission for appropriate action.

19. The evidence concerning possible violations of the antitrust laws with respect to network-national spot rate competition and inter-network rate competition should be referred to the Department of Justice.

D. Compensation

20. The Commission should make public the affiliation contracts which licensees are required to file with it, including the compensation provisions of these contracts.

21. The Commission should make a regular and continuous study of compensation arrangements between networks and their affiliated stations. While a potential for abuse exists, the present compensation practices of the networks do not require the adoption of a more specific rule at this time.

E. "Must-Buy"

22. The "must-buy" requirement of the CBS and NBC networks should be prohibited through a Commission regulation. No objection should be raised to the adoption of some form of "minimum-buy" analogous to the present ABC practice. In the course of rule making, the Commission should consider whether or not an exception would be desirable permitting the "must buy" practice in the case of multi-weekly programs sold in small time segments to a considerable number of different advertisers. The opinion of the Department of Justice should be requested on this subject.

23. The Commission should not undertake at this time to regulate the particular minimum requirements adopted by the networks. However, the situation should be followed closely and continuously, so that the Commission will be in a position to take action promptly at a later date, should the "minimum-buy" practice require regulation.

F. Network Representation of Stations in National Spot Sales

24. The Commission should adopt a rule prohibiting the networks from representing stations other than their owned and operated in national spot sales. A reasonable period of time, such as two years, should be allowed for the stations to transfer their representation to a non-network organization.

G. Interconnection

25. The Commission should resolve at the earliest practicable date the issues involved in Docket No. 8963 and Docket No. 11164.

26. The Commission should examine closely the procedures for allocating scarce AT&T program transmission facilities to determine whether they are fair and equitable and otherwise in the public interest.

H. Multiple Ownership

27. In the long run, the Commission should seek through its regulation a pattern of ownership which approaches as closely as circumstances permit the objective of limiting station ownership to one station for each licensee.

28. With respect to the grant of original applications for station licenses, the Commission should promulgate a rule relative to local ownership and diversity of ownership which establishes presumptions that a local applicant will serve the community interest better than an absentee licensee and that an applicant who owns no other station will be in a better position to serve the local community than an applicant who is already licensed to serve one or more other communities.

29. In connection with the renewal of station licenses, a similar presumption should not be established. However, in instances where a multiple owner is providing only marginal service and other entrepreneurs are contesting for the channel at renewal time, the Commission

should give appropriate weight to the local ownership and diversity of ownership factors.

30. With respect to the transfer of station licenses, the Commission should recommend to the Congress the repeal of the MacFarland Amendment so that applicants other than the proposed transferee may also be considered in a comparative hearing context. If the Amendment is repealed, it is further recommended: a) that the Commission apply in such cases the presumption in favor of local ownership and diversity of ownership, mentioned in recommendation numbered 28 above; and b) that the Commission require that all proposed sales of stations to existing station owners be on a cash basis, so that other applicants may have the opportunity to make a comparable offer.

31. The Commission should require that each person acquiring a television station be limited in ownership to one television station until such station had been operated for a full license term. Thereafter, the owner might apply for an additional station each year, subject to the other limits of the Multiple Ownership Rule, including the presumptions recommended herein.

32. The present numerical limitation that no licensee may own more than 5 VHF stations and 2 UHF stations should be retained. In addition, it is recommended that the Multiple Ownership Rules be amended to provide that no licensee be permitted to own more than 3 VHF stations in the top 25 markets of the United States. To the limited extent that divestiture is required by this proposed rule, a reasonable period of time, such as three years, should be permitted for the sale of the stations.

33. Networks should be treated on the same basis as other multiple-station owners with respect to all of the above-recommended rules. However, in the event that networks, having disposed of station holdings in excess of three in the top 25 markets, should seek to acquire additional stations in lower-ranking markets up to the permissible limits of 5 VHF and 2 UHF stations, the presumptions against a network multiple owner on local ownership and diversity grounds should, in a comparative hearing context, be overriding unless it can be demonstrated that acquisition of the station or stations is essential to the financial welfare of the network and that financing from conventional capital sources is not available.

I. Radio

34. The Commission should undertake a detailed study of network radio and of other components of the radio industry.

J. Application of Commission Rules Directly to Networks

35. The Commission should recommend to Congress that it be expressly authorized to apply the pertinent parts of its rules and regulations directly to networks. The official views of the Department of Justice should be requested before such a recommendation is made.

36. Pending any such recommendation or express grant of authority to apply its rules directly to networks, it is recommended that the existing Chain Broadcast Rules continue to be applied to stations, and that all changes in the rules or new rules recommended in this Report be made applicable to all stations, or to stations owned by the networks, as the circumstances warrant.

37. Should express authority be granted to the Commission by the Congress to apply its rules directly to networks, the Commission should then review its Chain Broadcasting Rules, as they may have been amended or expanded, with a view to making them applicable to networks only, to both networks and stations, or to stations only, as the conduct reached by each rule indicates.

III. ENFORCEMENT

It is axiomatic that no rule can be effective unless it is properly enforced. In the past, several factors have complicated the Commission's task of effectively enforcing the existing Chain Broadcasting Rules. One of these factors is that the sanctions applicable under the rules have not

generally been suited to the types of infractions against which the rules are addressed. This problem has two aspects: some of the rules are directed against the injured parties rather than against the parties most likely to have been responsible for the infraction of the rule; and the penalties imposed under the rules are excessive for most of the infractions involved. Another factor is that the Commission has been able, because of other and more pressing tasks, to devote only limited staff and funds to the continual observation of industry practices necessary for effective rule enforcement.

As has already been pointed out, the Chain Broadcasting Rules are framed in terms of station licensees, and provide that no license shall be issued to a station which engages in any of the proscribed practices. The types of practices against which the rules are directed generally involve a contract, understanding, or agreement between a station and a network, and the rule could thus be directed against either party. In practice, however, there is little reason why a station should wish to engage in most of the proscribed practices, while there is a greater incentive for a network to do so in order to limit competition from other networks or from non-network sources. In cases where a station licensee has violated a Commission rule at the instance or insistence of a network organization, penalization of the station rather than the network clearly poses a problem of equity which can interfere with effective rule enforcement. A rephrasing of some of the existing and proposed rules to address them to networks as well as, or in lieu of, stations, as recommended in Chapter 14 of this Report, would make it possible to apply sanctions directly against those parties most likely to be the moving parties in violations of some Commission rules.

Regulations directed against stations may have a considerable, if indirect, influence on the networks with which they are affiliated. In instances where a rule infraction has been initiated by a network organization, it would presumably not require revocation of many station licenses for strong pressures to be brought to bear by affiliates on the network to discontinue the practice in question. Nevertheless, the Commission may understandably be reluctant to revoke the license of a station in such circumstances. On the other hand, if the evidence should indicate that the network had instigated the rule infraction, this would presumably reflect on the network's qualifications as a licensee of its owned and operated stations. This raises the question, however, whether the penalties involved are appropriate for rule infractions, by stations or networks.

Revocation "Drastic"

There can be no question that revocation or non-renewal of a station's license, whether the license is held by a network or by a non-network organization, is a drastic penalty for the Commission to impose. Such action clearly reflects on the character of the licensee and his ability to perform in the public interest. The financial penalty involved may be quite substantial. In most cases the licensee will have made a substantial investment in plant and facilities, program materials, etc. It is not unlikely that there would be a financial loss in the forced sale of the station's facilities to the new licensee authorized by the Commission to operate on the assigned frequency. As previously indicated, in the *Don Lee* case in which the Commission was dealing with clear-cut violations of the Chain Broadcasting Rules by a radio network, the Commission concluded that revocation of any of the station licenses of the network would be too extreme a penalty.

In addition to its power to revoke, or not to renew, a station's license, the Commission, under authority granted to it by the 1952 Amendment to the Act §312(s) may issue a "cease and desist" order in cases when the licensee has violated any provision of the Act or any Commission rule or regulation. The "cease and desist" order, in certain circumstances, can be a useful tool in rule enforcement. The effectiveness of this sanction may be limited, however, for the reason that the only remedy provided by the Act for failure to observe a "cease and desist" order

is the extreme penalty of license revocation. Also, this penalty applies to failure to observe the "cease and desist" order, rather than to engagement in the practices violative of the Commission's rules, which are the subject of the order.

It appears, therefore, that the Commission's vital function of effective rule enforcement would be aided if it were empowered to impose penalties (other than revocation of a station's license) for practices which, after proper investigation by the Commission, were found to be infractions of the existing rules. In any case where the Commission is authorized, pursuant to § 312(a)(b) to revoke a license, or to revoke a permit, or to issue a cease and desist order, the Commission, after the hearing required by subsection 312(c), or waiver thereof, in lieu of revoking a license, or revoking a permit, or issuing a cease and desist order, or in addition to issuing a cease and desist order, should be authorized to order the licensee or permittee to forfeit to the United States a specified sum for each day during which the Commission finds that any offense set forth in the order to show cause issued pursuant to subsection 312(c) occurred. Since the magnitude and importance of the rule infractions are likely to vary from case to case, the Commission should be permitted some latitude, within prescribed limits, in relating the amount of each forfeiture to the nature of the infraction and the particular circumstances involved. Such a system of forfeiture would give the Commission more flexibility in applying its rules to varied and changing situations.

The Network Study Staff therefore recommends that the Commission request Congressional legislation that would empower it to adopt a system of forfeitures in the case of demonstrated infractions of Commission rules. This procedure for handling alleged violation of Commission rules is preferable to considering such complaints in the license renewal context.

Continued Surveillance Recommended

In the past, the main thrust of Commission activity in the broadcasting area has necessarily been in the assignment of frequencies for the development of radio and television broadcasting and in licensing of stations to operate on the assigned frequencies. These were clearly the most urgent of the Commission's tasks and, with the limitations of budget and staff, required a heavy concentration of Commission personnel. Now that the Commission has succeeded in getting a substantial number of television stations on the air, and has issued licenses for virtually all commercial assignments in the VHF portion of the spectrum, it is possible for the Commission to devote more of its resources to some of the other problems before it. With respect to a number of practices which it has examined, the Network Study Staff has discovered apparent violations of existing Commission rules. The mutuality of interest between stations and networks in many areas, and the overriding importance to stations of affiliation with a network, may make it unlikely that some stations will inform the Commission in cases where the network has been seeking to influence station behavior in ways that may be contrary to the Commission's rules. For these reasons, the Network Study Staff concludes that continued and close surveillance by the Commission of such practices is essential, including field investigations, where appropriate, in connection with alleged violations.

Television is a dynamic industry, and its structure and practices will undoubtedly undergo numerous changes with the passage of time. The Network Study Staff therefore recommends that the Commission take such administrative steps as it considers necessary in order to insure an adequate staff organization both for the effective enforcement of the existing and proposed rules and for a continued reexamination of the rules in the light of their impact on the industry and of other developments. Only in this way can the Commission insure a broadcasting system that is serving the public interest through effective competition.

IV. CONCLUSION

The Report on Network Broadcasting recognizes the great contribution of the networks to television. It was the nationwide, interconnected network system of broadcasting, providing free program service through national advertiser support, which made possible the phenomenal growth of television. In this way, national program service was brought to virtually all our people in a brief span of years. Through this system, public service programming as well as popular entertainment is provided and simultaneous broadcast to a nationwide audience of events of national interest is made possible. The network system also provides a vital means of linking together our people in the event of national emergency. In these and other respects, network activities are consistent with, or help to promote the public interest and to effectuate Commission policy.

On the other hand, there are respects in which the networks' concentration of control, and the practices in which they engage, have been found incompatible with the public interest. An important Commission policy impinged upon by network structure and practices is that of making the station licensee responsible for broadcasting in the public interest. As has been seen, stations are highly dependent on the network program service, and the network affiliate carries a large schedule of network programs. The networks, through their use of the contractual right of option time, and other practices, have persuaded affiliated stations to accept a larger schedule of network programs than they would otherwise be disposed to carry. In this way, network practices have, to some extent, restricted the programming responsibility of the station licensee and limited the licensee's opportunities to program according to the specific needs of his local community. They have also curtailed the availability of alternative program sources to the station and thus to the public which it serves.

Another statutory and Commission policy directly affected by networking is that of preserving effective competition in broadcasting. Networks have a high concentration of control over important facets of the telecasting industry. The principal factors accounting for the high concentration of control by networks are the shortage of competitive station facilities in the VHF spectrum and the economic advantages, to networks and stations, inherent in the affiliation relationship. Despite the very high network profits of CBS and NBC, there is little prospect for the immediate entry of a fourth network. While the three existing networks compete among themselves in many areas, the small number of networks and the formidable barriers to new network entry are limitations on the effectiveness of competition at the network level. The encouragement of greater competition between networks and national spot telecasting, therefore, holds out the principal hope of providing more effective competition in the public interest. However, a number of network practices have served to restrain competition between network and national spot advertising and to place the station representatives, program suppliers, and advertisers using national spot, at a competitive disadvantage. These practices, in combination, have restrained competition between networking and the national spot "system" to a significant degree.

A third policy of the Commission is that of providing a nationwide television system, with one or more broadcast services available to as high a proportion as possible of the people of the United States. The network system has done much to foster the realization of this objective. But some practices of the networks designed to protect the area of their primary affiliates, especially in the larger and more profitable markets, have impeded rather than assisted this Commission policy.

This Report accepts the network system as a necessary and highly desirable component of the American broadcasting system. The recommendations which have been

made are designed to provide effective competition in television by removing those competitive restraints which impinge upon Commission policy relating to the public interest in broadcasting. It is the opinion and hope of the Network Study Staff that the present system of broadcasting, in which the networks play so large a role, will be rendered more competitive by adoption of these recommendations, and thus will better serve the interest of the public at large.

It should be recognized, however, that the high concentration of control exercised by networks, the barriers to the new network entry, the strong bargaining position of the networks in their relations with stations in many markets, and the limited opportunities for non-network groups to compete, present in combination a serious problem for the realization of the objectives of the Commission. Should measures recommended in this Report, together with technological change in the industry within the next few years, not achieve effective competition in the broadcasting system, it may be necessary to consider basic structural changes in the system. The changes which might have to be considered under these circumstances include such alternatives as: a national television service available to any subscribing stations, as national news sources now make their services available to all newspapers; rationing of station time among program suppliers and advertisers; Commission regulation of rates; recapture of monopoly profits or economic rent in the use of valuable frequency channels allocated to the large commercially desirable markets; and recapture of the value of the frequency itself upon the sale of scarce, viable, station facilities.

Designed to Improve Structure

In lieu of considering such basic structural changes, the Network Study Staff has followed the policy of working within the framework of the existing network system and recommending the minimum changes necessary to remove competitive restraints and to effectuate Commission policy relative to licensee responsibility, diversity of ownership and control, and broadcasting in the public interest. Thus, it has been recommended that the self regulating value of publicity as to affiliation practices, rates, and compensation be relied upon to the extent possible. Where this is not feasible, it has been recommended that the restraints on station freedom and the competitive opportunities for non-network groups, resulting from option time, "must-buy," the use of affiliation and rate decisions to influence station behavior and other practices, be prohibited or further limited. The recommendations are designed to improve upon the existing structure rather than to provide a substitute for it.

Through these recommended changes, stations will have additional freedom in programming to meet the needs of their local communities; there will be somewhat greater opportunity for access to the valuable television medium of non-network groups, such as program producers and national station representatives provided a wide range of program choice; some greater access of local and regional advertisers to television will be provided; multiple ownership will be reduced and more entrepreneurs will be brought into broadcasting, thus increasing opinion sources and the opportunities for local community service; and the networks will be subject directly to the Commission's rules so that any restraining conduct in matters affecting the public interest may be more effectively administered. Adoption of the recommendations should result in a greater degree of competition in broadcasting, programming which is more responsive to community needs, and a more nearly nationwide service. The viewing public would have available a wider variety of television services and a more varied program fare.

In the opinion of the Network Study Staff, these recommendations, if adopted, will bring about important and substantial improvements in television broadcasting service to the people.

II—NETWORK STUDY REPORT, WHAT IT MEANS: No one in Washington—or at the networks—is attempting to minimize importance of Barrow report as portent of stepped-up drive to substantially stiffen network and multiple-ownership rules.

By same token, it goes almost without saying that any major administrative or legislative proposals would probably take years to put into effect—either via FCC rule-making or Congressional law-making.

Report is classified as “unofficial”—not a report OF the Commission, but TO the Commission, or more properly to Commission’s Network Study Committee (consisting of Comrs. Doerfer, Hyde & Bartley). This Committee could accept report, change it, order more study, pass it on as is to full Commission—even sit on it.

But despite its unofficial status, Barrow report carries much weight: It was administered by outside experts selected by ex-Chairman McConnaughey, on express mandate from Congress, which twice appropriated funds for the network study. You can expect legislators to take proprietary interest in it, to prod & poke Commission to start translating recommendations into rules.

And you can expect introduction of legislation to carry out some of the proposals almost as soon as Congress reconvenes—from Congressmen who don’t choose to wait until FCC decides whether to “request” changes in Communications Act.

Impact of report is multiplied when considered in terms of cumulative effect—coming on top of Senate Commerce Committee’s Plotkin and Jones reports of 1955 (Vol. 11:6-8), testimony by Justice Dept. officials concerning possible network anti-trust violations in 1956 (Vol. 12:9, 37), House anti-trust subcommittee’s Celler report and Senate Commerce Committee’s Cox report in 1957 (Vol. 13:23, 26).

Barrow report shows more similarity to the extremely tough Plotkin report than any of the others—though in some cases (i.e., return to “Avco procedure”) it goes beyond Plotkin, and in others (rejection of principle of rationing station time among networks) it doesn’t go as far. Many of Barrow’s recommendations are common to most of the previous “network practices” reports.

Current FCC network study report is far more carefully documented, more thorough, than any to date—and fact that vast 2-year study reached many of same conclusions will add considerably to its influence, particularly in Congress.

Like all previous network researchers, Barrow found one area in which he was unable to reach any conclusions—the allegations of network tie-ins of time sales with program sales. This is one field of inquiry in which Justice Dept. has been most active—and is known to be one of focal points of its network anti-trust investigation. It’s understood Justice feels it has already uncovered extremely significant information in this area.

All networks declined immediate comment on Barrow’s report or recommendations, stating they hadn’t had time to study it completely.

Congressman Celler is known to be extremely pleased with it.

Former FCC asst. gen. counsel Harry Plotkin—as might be expected—thought report “excellent,” and added: “The Commission is not going to have much choice” but to go along with recommendations.

Barrow’s group worked in extreme secrecy, shunning the usual “leaks” and trial balloons so common in Washington. Indicative of his way of working is fact that he never permitted any member of his staff to accept free lunch from anyone in industry.

Dean Barrow returned this week to his post as head of U of Cincinnati law school. Value of his contribution to theory and practice of TV regulation will be hotly debated for many months—but there’s no question that it is destined to become the new rallying point for those in and out of Congress who would chip away at power of the networks.

NEW DEAL FOR RCA TV PATENT LICENSEES: In wake of settlement of bitter 11-year RCA-Zenith patent litigation (Vol. 13:37-38), all TV-radio manufacturers who hold RCA "package" patent licenses received this letter, signed by RCA commercial dept. v.p. R. A. Correa:

"Subject: Broadcast receiving set licensing agreement.

"This is to advise you that changes in our patent licensing are now under active consideration by us and we hope to reach a conclusion in the near future.

"The purpose of this letter is to inform you that as soon as a conclusion is reached we will promptly communicate with you and advise you of the manner in which our licensing relations with you may be affected. We believe you will find our proposal of benefit to your company."

Big RCA, TV-radio industry's patent landlord, thus confirms industry speculation that Zenith settlement is prelude to liberalization—and perhaps some rather drastic changes—in its licensing procedures (Vol. 13:38).

As is traditional when questioned about patent matters, RCA sources are refusing any comment on subject—but it's believed new proposal is just few weeks away, despite fact that current "package" licenses don't expire until end of 1959.

■ ■ ■

All litigation between RCA & Zenith now has been dismissed ("with prejudice") in both Chicago & Wilmington Federal courts. Terms of settlement, though not filed in courts nor made "public record," conform closely to earlier reports.

Some set makers looked at this clause in settlement agreement as possible clue to RCA's future licensing intentions:

"RCA to grant Zenith & Rauland, and Zenith & Rauland to grant RCA, royalty-free licenses for radio & TV receiving sets, including tubes therefor (except color TV, color tubes and Phonevision) for a term beginning on the dates hereof and extending to Jan. 1, 1963, under all U. S. & foreign patents issued prior to Sept. 1, 1957, to the extent to which each of them has the right to grant such licenses [other than licenses granted to Zenith & Rauland by GE & Western Electric under terms of settlement]."

To settle past claims for infringement between RCA & Zenith, agreement proposes that Supreme Court Justice Minton "or a man of comparable standing" be selected as arbitrator.

Still not revealed is how much of the \$10,000,000 payment to Zenith is to be paid by RCA, how much by GE & Western Electric. Latter company has already paid to bank which is handling transaction the full amount required of it; other 2 companies will make 10 yearly payments. There has been some "educated guessing" that 85-90% of total amount will be paid by RCA.

■ ■ ■

RCA pres. John L. Burns this week confirmed some more industry speculation: He said RCA hopes to clear up litigation in which it is involved—but each dispute will be considered separately and no settlement will be accepted which conflicts with best interests of stockholders or industry.

GOVT. WINS 1ST ROUND IN FTC VS. TV ADS: Milestone FTC unfair-TV-advertising case, first to be tied directly to "visual deception" by commercials, reached govt. hearing phase this week in what promises to be long litigation—and FTC won initial point.

Over strenuous objections by defendant American Chicle Co., FTC examiner John D. Poindexter ruled that two 60-sec. TV spots, picked out of program content, constituted evidence in themselves to support charges by FTC's monitoring unit that advertiser misrepresented Roloids alkalizer and falsely disparaged competitors (Vol. 13:20, 33).

FTC is trying to establish guilt by implications which viewer might draw from spots alone, without reference to whole continuity on TV screen, argued defending attorney H. Thomas Austern.

Asserting that any TV commercial must be judged within context of program, Austern said that "projection of a fragment of a TV presentation is a complete departure from what the TV viewers see,

hear, and read, and therefore cannot be made the basis for determining what, if any, fact representations are impliedly made by any TV continuity."

This argument was called "reductio ad absurdum" by FTC counsel Daniel J. Murphy, who said Roloids commercials alone were in issue.

But Austern entered vigorous exceptions for case record when examiner Poindexter ordered spots screened for him in hearing room. One showed man in white coat, addressed as "doctor," who extolled remedy as preferable to "old-fashioned alkalizers." Other showed "beaker test" for "stomach acid." Question of claims for Roloids wasn't reached at hearing, which continues next week.

Personal Notes: Edward P. Shurick resigns as CBS v.p. & station relations director to join Blair-TV as exec v.p. . . . Martin Codel, publisher of *Television Digest*, has returned to his desk following a long illness . . . Dr. George Gallup & Dr. Claude E. Robinson step down as chairman & pres., respectively, of Gallup & Robinson Inc., succeeded by v.p.'s L. E. Purvis & Dr. Paul I. Lynes . . . Robert Lemon, ex-WTTV, Bloomington-Indianapolis, named program director of WRCV-TV, Philadelphia; Bob Benson promoted to program director of radio WRCV . . . John H. Hanna named business mgr. of WTIC-TV, Hartford . . . John Scuoppo promoted to field exploitation mgr., NBC . . . George C. Castleman, new TV business development mgr. of rep Peters, Griffin, Woodward, elected a v.p. . . . Robert S. Jones, ex-CBS, joins MBS as midwest operations mgr., Chicago; John Irish promoted to field representative, headquartering in N. Y.; Norman Baer, ex-Lewin, Williams & Saylor and AP & INS, joins exec. staff to handle special events & sports programs . . . Charles H. Phillips, ex-Petry, joins WCKT, Miami, as national sales mgr. . . . Ted Sack, ex-CBS-TV producer and creator of *Let's Take a Trip*, joins WTVJ, Miami, as operations director . . . Fred M. Whiting, ex-NBC, Chicago, promoted to asst. dean of Medill School of Journalism, Northwestern U . . . Henry G. Kirwan resigns as secy.-treas. of radio WINS, N. Y. to re-establish CPA firm specializing in TV-radio & theatrical accounts . . . Leslie A. Hollingsworth resigns as public relations mgr. of WPIX, N. Y. . . . Stanley Raiff, ex-WHEN-TV, Syracuse, and WMAL-TV, Washington, joins NARTB public relations staff . . . Arthur M. Mortensen named mgr. of KERO-TV, Bakersfield . . . Gene P. Loffler, ex-mgr. of KMMT, Austin, Minn. named v.p. & mgr. of KICA-TV, Clovis, N. M. . . . James R. Keen promoted to program mgr., WFIE-TV, Evansville . . . Ken Corbitt, program mgr. of WTIK, Durham, named director of promotion & publicity of WTVD, same city . . . Russell Furse, ex-Los Angeles TV consultant, appointed exec. asst. to pres., CHEK-TV, Victoria, B. C. . . . Frank A. Balch, mgr. of radio WJOY, Burlington, elected pres. of Vt. Assn. of Radio & TV Broadcasters . . . Wm. E. Young, ex-Unity TV Corp., named north central div. mgr. of Screen Gems; Gene Plotnik promoted to publicity mgr. . . . Wm. C. Brearley named eastern sales mgr., George P. Hollingbery Co. . . . Samuel G. Henderson Jr. promoted to mgr. of WGAN-TV, Portland, Me.

Obituary

Charles E. (Ned) Midgley Jr., 51, TV-radio mgr. of Ted Bates & Co. who became a v.p. of agency in Aug., died Oct. 1 at home in Yonkers, N. Y. He joined Bates in 1950 after 9 years with CBS, for which he was sales service mgr., and in 1948 published book, *The Advertising & Business Side of Radio*. Earlier he was sales service mgr. of BBDO. Surviving are widow and 2 sons.

Frank Finney, 84, co-founder of Street & Finney, one of oldest N. Y. ad agencies, died last week at Summit, N. J.

ADVERTISING AGENCIES: Henry Halpern promoted to v.p. of MacManus, John & Adams, in charge of media & research, N. Y. . . . John Egan, in Compton Adv. TV-radio programming dept. since 1951, promoted to v.p. . . . John Hoagland promoted to TV account executive, BBDO, N. Y., Don Rowe to TV-radio account executive, Hollywood.

Add agency mergers: Chambers & Wiswell Inc., and Shattuck, Clifford & McMillan Inc., both Boston, become Chambers, Wiswell, Shattuck, Clifford & McMillan Inc. Nov. 1. Announcement says combined agency, which will have annual billings of more than \$3,000,000, expects to "offer stiff competition to N. Y. agencies which have been attacking the New England markets."

Progress Medal Award of SMPTE, organization's highest honor, was presented to director Ralph M. Evans of Eastman Kodak's color technology div. at 82nd semi-annual convention Oct. 4 at Sheraton Hotel, Philadelphia. He was cited for achievements in motion picture color film development and color photography generally. Other SMPTE prize winners: Charles P. Ginsberg, Ampex, David Sarnoff Gold Medal Award for technical contributions to TV; Col. Richard H. Ranger, Rangertone, Herbert T. Kalmus Gold Medal Award for color film processes for TV & theatres; Earl M. Lowry & J. Gordon Jarvis, Eastman, Journal Award for best paper.

John Hay Whitney, whose J. H. Whitney & Co. owns 4 TV & 2 radio stations managed by Corinthian Bestg. Corp., went into newspaper business this week by making "an investment" in *N. Y. Herald Tribune*—reportedly \$1-\$2,500,000. Announcement by pres. & editor Ogden R. Reid of *Herald Tribune* didn't mention amount involved, but quoted Whitney, now Ambassador to Court of St. James: "Until such time as I become a stockholder of the paper, I will have no connection with its management or its editorial policies."

ARB establishes Chicago sales office in Tribune Tower, headed by Elliot Johnson, ex-A. C. Nielsen and Foote, Cone & Belding. At same time, N. Y. general sales office is moved to 400 Park Ave., advertiser service dept. remaining at 341 Madison Ave.

Edison Amateur Award nominations for 1957 were opened by GE this week for nation's 150,000 amateur operators. Jan. 3 is deadline for nominations submitted to GE award committee, Owensboro, Ky. Trophy and \$500 will be presented to winner at Washington banquet in Feb.

New reps: WSBA-TV, York, Pa. to Jack Masla & Co. Inc. (from Edward Petry & Co.); WXEX-TV, Petersburg-Richmond, Va. to Simmons Assoc. Nov. 15 (from Forjoe-TV Inc.).

Fleet Adm. Wm. F. Halsey resigns from boards of IT&T subsidiaries Mackay Radio and All America Cable to devote efforts to preservation of carrier *Enterprise*.

Joseph M. Sitrick, legislative asst. to FCC Chairman Doerfer, adds duties of security officer.

Network Profit Figures: CBS showed before-tax profit of \$40,733,000 on broadcast operations (network & owned stations) in 1956, NBC made \$34,910,000 and ABC \$9,727,000—each showing substantial increase over 1955. These figures are revealed for first time by FCC network study staff report (see pp. 1-3 & Special Report), in table showing that since 1955 all networks have realized profit from network operations as such—as well as from operation of their owned stations.

Table breaks down percentage of profit realized from o-&o stations in 3 biggest cities as compared with all o-&o stations. Interesting sidelight is fact that after one unprofitable year, CBS in 1956 made slight profit on operation of its 2 uhf stations (WXIX, Milwaukee & WHCT, Hartford), while NBC's uhfs (WBUF, Buffalo & WNBC, Hartford-New Britain)—acquired more recently than CBS's, were still quite deeply in loss column last year.

The table indicates that o-&o stations in 1956 accounted for 73.9% of ABC's total TV broadcast income, 45.1% of CBS's and 47% of NBC's.

Individual network profit figures for 1953-1955 had been revealed previously (in 1956) by Sen. Bricker (R-O.) & Rep. Celler (D-N. Y.)—but 1956 & 1950-52 figures have hitherto been kept confidential. (Complete 1953-1955 network revenue-expense-earning table will be found on p. 45, Spring-Summer 1957 *TV Factbook No. 24*.)

The network profit table, reprinted from FCC network study report (add 000 to dollar figures) :

Year	ALL O-&O STATIONS		STATIONS IN N. Y., CHICAGO & LOS ANGELES			
	Broad-cast income, network & o-&o stations	Broad-cast income	% of total income of network & o-&o stations represented by o-&o stations	Broad-cast income	% of network & o-&o income of o-&o stations	% of income of o-&o stations

(1) Indicates loss.

¹ Profits of ABC stations for 1954-1956 are not fully comparable to those for earlier years due in part to changes in allocations of costs as between the stations and the network.

² Included in network.

³ CBS had a loss of \$130,000 in 1955 and a profit of \$86,000 in 1956 from its uhf station(s).

⁴ NBC had a loss of \$515,000 from its uhf station in 1956.

Source: FCC Form 324.

Watchdog Muzzled? "Concerted plan" by 6 federal regulatory agencies to thwart House Commerce "watchdog" subcommittee investigation of them (Vol. 13:38) was alleged Oct. 4 by chairman Moulder (D-Mo.). He called in newsmen to complain that CAB already had instructed its staff to withhold needed files from subcommittee investigators, that he thought this meant "first step" by chiefs of all agencies, including FCC, to prevent full probe to see if they are being administered properly. Moulder summoned CAB to hearing Oct. 17 to explain attitude which he described as "arrogant & shocking"—tantamount to taking "high-class classified 5th Amendment."

FCC musn't investigate any religious faith, counsel for Oral Roberts Evangelistic Assn. Inc. warned Oct. 3 in filing comments with Commission on NAFBRAT complaint seeking revocation of license of KCOP, Los Angeles, for purported violations of "minimum program standards" (Vol. 13:37). Counsel Saul A. Yager and Cohn & Marks said that worth of Roberts faith-healing program, carried by KCOP and cited by NAFBRAT as objectionable, had been established by "impartial observers & investigators." But in any event, they said, any attempt by federal agency to judge any faith would "undermine the religious freedom of all Americans guaranteed by the First Amendment." In its reply to complaint, KCOP said NAFBRAT's attack on station was nothing more than attempt at censorship, that no violations of FCC rules had been shown. KCOP urged summary rejection by FCC of complaint.

President Eisenhower thinks TV—as "tremendously important" news medium—deserves to be "treated on a completely equal basis with all other media of public communication." Quote is attributed by Oct. *Television* to White House press secretary James C. Hagerty, who added: "In a press conference, I think the camera has the same right as the pencil. The President shares these views." Hagerty also told magazine he had suggestions for TV networks: (1) avoid over-commercialization of programs generally, (2) cover only the highlights of political conventions.

Equal time demand by White Citizens Councils of America to answer President Eisenhower's broadcast last week on Little Rock school integration crisis was rejected Sept. 30 by FCC chairman Doerfer. Protesting "one-sided explanation" of Arkansas trouble by President, chairman W. M. Rainach of segregation group asked FCC to persuade or order networks to give "nationally-recognized southern spokesman" time for rebuttal. Doerfer pointed out equal time rule doesn't apply to President's broadcasts when he isn't running for office.

Ban on giveaway shows which offer prizes for boxtops or other proof of purchase was invoked by CBC Sept. 30. Directive to Canadian TV & radio broadcasters said such shows are not in public interest, that any defiance of new policy would count as "an unfavorable factor" when CBC reviews station licenses. Not affected by directive were giveaways in which contestants must appear at station or in which written entries are judged on merit.

Deceptive statements in TV & radio commercials, newspaper & magazine advertising and other promotion is charged by FTC in complaint against Schick Inc., alleging that Jan.-May campaign this year misrepresented that "Lady Schick" shaver would be given free with purchase of "Schick 25" man's razor. Company is also accused of fixing prices illegally and discriminating among customers in prices, promotional allowances, demonstrator services.

Private microwave vs. common carrier economics and techniques are covered in detailed study submitted by GE's Wm. J. Morlock as exhibit in FCC's proceeding covering allocations above 890 mc.

Specifics Due on Pay TV: FCC gets down to toll-TV test consideration again next week, possibly week thereafter, and it looks as if it will finalize proposal to accept applications for tests. Big question: limitations.

Undoubtedly, pay proponents will term limitations too severe, while opponents label them lax—but some applications are expected, at any rate. Applications may be slow arriving at first, not only because Congress is picking up the ball but because it probably will take some head-scratching to answer FCC's questions about program supplier-franchiser-station-viewer relationships — including money involved.

Lawmakers' interest in dollars was emphasized this week when San Francisco's Board of Supervisors, goaded by theatre interests, conducted hearing designed to elicit wired pay-TV plans of Skiatron TV et al. Tone of questioning was set by board chairman Harold S. Dobbs, who told Skiatron representative Alan Lane that it was "an insult to the city" for Skiatron to refuse to disclose whether it has resources to carry out multi-million-dollar project. "I'm not going to be a party," he said, "to granting a franchise to any company that can't prove it has the finances to live up to the terms of the agreement." Lane protested that Skiatron had given N. Y. Giants \$500,000; that "we are further committed to many millions of dollars"—that Skiatron's finances therefore should not be questioned. Dobbs also asserted telephone company should testify as to its proposed role. Upshot: Final action on San Fran-

Exhibitor Again: Paramount Pictures Corp. is going back into theatre-operating business despite 1949 anti-trust consent judgment divorcing movie production & theatre activities, according to announcement Oct. 3 by v.p. George Weltner. He said producing company is acquiring Esquire Theatre, Chicago, as first-run outlet, but that "move represents no policy change" by Paramount in anti-trust restriction. It was pointed out that 1949 ruling permitted some optional leeway for motion picture companies to retain or acquire a few flagship theatres and that 20th Century-Fox, for example, owns Roxy Theatre, New York.

Rumors of purchase of Skiatron Electronics by Zenith were labeled "100% dope phony" by Skiatron spokesman, who extended his "unqualified denial" to include Skiatron Electronics licensee Skiatron TV. He stated that terms of Skiatron TV's license preclude it from merger or agreements with other companies without approval of Skiatron Electronics.

New community antenna systems being installed by Fred Welsh Antenna Systems, Vancouver, B. C., Jerrold distributor: Squamish, B. C., Reliance Distributors Ltd., 300 potential subscribers; Sarita River, B. C., Scverson Sales & Service, 40 potential.

First convention of National Community Antenna TV Assn. of Canada will be held Oct. 18-19 at Alpine Inn, Ste. Marguerite, Que.—arrangements being handled by acting secy. Ken Easton, 6301 Park Ave., Montreal, Que.

Color TV sales in Colo. for 8 months of 1957 totaled 463, compared to 751 for all 1956 and 252 for 1955, according to Rocky Mountain Electrical League.

cisco closed-circuit TV franchise further delayed.

But the Bartlesville cable-movie experiment has certainly prompted many movie and telecasting entities to make initial moves to protect themselves. In Houston, for example, there are now 7 applicants for franchises: Custom TV Inc., Austin Senators Baseball Club, Texas Bell Video, Trail Drive-In Theatre, Interstate Circuit, Loew's State Theatre, Bellaire Theatre. Denver has 3: KBTW, Gene O'Fallon (former owner of KTVR), McGee Briggs Enterprises.

Other subscription TV developments:

(1) 20th Century-Fox pres. Spyros P. Skouras explained why he hasn't released pictures for Bartlesville: "When we do go into something like this, I'll want a lot of money for our pictures, and guarantees, too."

(2) Writers Guild of America, West, refraining from asking pay increases from movie makers because of "depression" in film business, voted to ask for up to 7½% of pay-TV gross achieved with current movies, flat 10% on those made before Sept. 2, 1957.

(3) Wm. B. Lewis, pres. of Kenyon & Eckhardt ad agency, asking why commercials shouldn't be carried on pay TV, asserted: "People do not dislike advertising. They simply—and rightfully—resent bad advertising. It is a complete fallacy to state the people will not pay for something that has advertising in it."

(4) Big-city cable pay-TV systems are "technically impossible," FCC was informed by Robert J. Myers, pres. of Industrial TV, Los Angeles uhf translator installer. Former western district mgr. of DuMont TV transmitter div., he asserted that simplest and best way to provide subscription TV is to telecast picture without sound, let phone company supply sound via wire—similar to proposal of Sol Sagall (Vol. 13:38).

Quoteworthy Quotes: If the end aim of all advertising is sales—and I don't think that anyone will seriously quarrel with the fact that it is—we ought to rate media as we do salesmen. Print? Print advertising is good advertising, and millions of dollars are spent annually on its profitable use. Print is like the salesman who sits down and writes you a letter; he makes sales. Radio? This salesman picks up the phone and calls you; now, the added impetus of the human voice has been added. Television? He's the high-powered salesman who comes to see you; he demonstrates his merchandise, in actual use, right in your living room. That's television—sellevision—the only complete sales call in all advertising.—NTA Film Network v.p.-gen. mgr. Raymond E. Nelson, to Boston Ad Club.

ANA annual meeting will be held Oct. 28-30 at Chalfonte-Haddon Hall, Atlantic City, where theme sounded in opening speech by v.p. H. H. Dobberteen of Bryan Houston Inc. will be: "How to Get More for Your Advertising Money by Selecting Media in Relation to Your Markets." Highlights will include discussion of "mediocrity & imitativeness" in TV programming by Jack Cunningham, pres. of Cunningham & Walsh, workshop on "Creating the Radio Commercial," report on spot radio campaign by Universal CIT Credit Corp. ABC will produce show for banquet Oct. 29.

First Moscow-to-London live telecast is scheduled for New Year's Eve, on basis of arrangements made by Associated-Rediffusion, London commercial TV program contractor, with Russian govt. Ballet show from Bolshoi Theatre is scheduled to be sent by cable to Helsinki, to Stockholm and then to London by microwave & cable.

Allocations Cleanup: This week, FCC whittled away at its backlog of fights over its deintermixture and vhf drop-in actions. It turned down petition of WTVW, CP-holder of Ch. 7, Evansville, to make Evansville 4-vhf town, Louisville all-uhf—or to retain Ch. 7 in Evansville. Commission also ordered hearing on its proposal to shift WTVW's grant to Ch. 31. It turned down efforts of WSUN-TV, St. Petersburg, to get itself shifted to newly assigned Ch. 10, Comrs. Doerfer & Craven dissenting, and denied the petition of WAGM-TV, Presque Isle, Me. (Ch. 8) which had asked reconsideration of decision adding Ch. 10 to city.

New rule-making petition filed, by WKRG-TV Inc., Mobile, asked assignment of Ch. 13 to Panama City, Fla.

Competitive hearing for license renewal, between WMUR-TV, Manchester, N. H. (Ch. 9) and new applicant TV for New Hampshire Inc., was ordered—latest action in battle that started when Storer Bestg. Co. sought to buy WMUR-TV and move it nearer Boston.

Commission resolved another fight by granting program test authority permitting WJMR-TV, New Orleans (Ch. 21) to telecast simultaneously on experimental KK2XFW. Authorization had been opposed by WJTV, Jackson, Miss. (Ch. 12) and KWTW, Oklahoma City—latter an applicant for Ch. 12 in New Orleans.

Warning for laggard CP-holders was issued by FCC in form of rules amendment delegating to chief of Broadcast Bureau the authority to declare forfeit expired CPs for which Commission hasn't given extensions.

NTA Buys WATV: National Telefilm Assoc. closed long-pending deal at week's end for purchase of WATV, Newark-N. Y. (Ch. 13) with WAAT & WAAT-FM for approximately \$3,500,000 from Irving Rosenhaus interests. Call letters will be changed to WNTA-TV, WNTA & WNTA-FM. It's understood NTA is paying present owners \$2,500,000 for stock over fixed period of years, plus \$1,000,000 out of station profits. Subject to FCC approval, sale will give NTA ownership in 2 TV stations, the film distributor having recently acquired 75% ownership of KMGM-TV, Minneapolis (Ch. 9).

Option for 50% of WIIC, Pittsburgh (Ch. 11) is being exercised by H. Kenneth Brennen & family, according to application filed with FCC. They're paying \$500,000 under terms of merger agreement reached in 1955 (Vol. 11:23, 25). The other owner is P-G Publishing Co., publisher of *Pittsburgh Post-Gazette*, also owner of radio WWSW. Brennen family sold its Pittsburgh radio WJAS with WJAS-FM to NBC for \$750,000 (Vol. 13:39), but retains control of radio WHJB, Greensburg, Pa. and Radio Advertising Co., Pittsburgh.

Bob Hope will own 50% of WREX-TV, Rockford, Ill. (Ch. 13), it's disclosed by transfer application filed with FCC. Other new owners in sale of station for \$2,850,000 (Vol. 13:24) are Albert Zugsmith, 25%; Ashley L. Robison, 15%; Arthur B. Hogan, 10%. Aug. 31 balance sheet shows \$242,363 surplus as of June 30, with net income for 2 months ending Aug. 31 being \$27,073. It had \$252,676 current assets, \$340,867 accounts receivable, \$276,100 fixed assets; \$247,384 current liabilities, \$105,000 capital stock.

Reports of Radio Station Sales: This week's station sales & transfers disclosed: KWFT, Wichita Falls, by Kenyon Brown for \$300,000 to North Texas Radio Inc. (Ben Ludy, pres.) . . . WMOU, Berlin and WJWG, Conway, both N.H. by John W. Guider (who retains interest in WMTW, Poland Spring, Me.) for \$165,000 to Richard P. & Virginia A. McKee, owners of KOWB, Laramie, Wyo. . . . KAIR, Tucson, by W. Dawkins Espey, Harold Lampel, Wm. J. Hyland III and James H. Duncan for \$135,000 to Joe Dumond, once known as "Josh Higgins" during earlier radio days . . . KENL, Arcata, Cal. by Vern Emmerson for \$100,000 to Mel Marshall . . . WDEB, Gulfport, Miss. by Denver T. Brannen for \$80,000 to John Caraway, ex-Electronics Research Corp., Evansville, Ind. Brannen is also owner of KCIL, Houma, La., awaits FCC approval of purchase of WCOA, Pensacola & WDLF, Panama City (Vol. 13:34) . . . KJFJ, Webster City, Ia. by Mr. & Mrs. Charles V. Warren (also owners of KSMN, Mason City, Ia.) for \$55,000 to Don Treu and Glen Barnett, both on staff of radio KAYS, Hays, Kan. . . . WCPM, Cumberland, Ky. by Edward F. Shadburne for \$41,860 to Elmo Mills. Brokers: WMOU, KAIR, KJFJ, Allen Kander & Co.; KENL, Hamilton, Stubblefield, Twining & Assoc.; WDEB, Blackburn Co.

Radio station sales approved by FCC this week: WTMC, Ocala, Fla. by John H. Perry Jr. for \$150,000 to R. H. Gunckel (Vol. 13:34) . . . KLYN, Amarillo, Tex. by Kenyon Brown for \$110,000 to Boyd Whitney, co-owner of KLOS, Albuquerque (Vol. 13:27) . . . KHUB, Watsonville, Cal. by Wm. & Dorothy Morgan for \$60,000 to F. T. Crennan (Vol. 13:32) . . . WSYL, Sylvania, Ga. by Robert H. Thompson Sr. for \$45,000 to chief engineer & mgr. Edwin H. Bass (Vol. 13:36).

KHVV-TV, Honolulu (Ch. 13) & KHVV are being transferred to Kaiser-Burns Development Corp., operator of Hawaiian Village Hotel, where stations are located. Kaiser-Burns buys out holdings of mgr. Hal Lewis who remains with stations. It pays Henry Kaiser \$18,750 for his 75% of TV stock, assumes \$186,000 in notes; Lewis gets \$25,000 for his 25%. It also pays Kaiser \$25,000 for his 50% of radio, assumes \$80,000 in notes, and Lewis gets \$100,000 for his 50%. Transactions carry proviso that Lewis is to pay Kaiser \$6250 note owed on TV, \$25,000 note on radio. July 31 balance sheet for TV lists \$112,369 deficit. It had \$22,857 current assets, \$941,443 other assets (unamortized film costs, organization expenses), \$162,279 in equipment; \$317,979 current liabilities, \$734,969 long-term debt, \$186,000 notes due stockholders.

Martin Theatres of Georgia, buying WROM-TV, Rome, Ga. (Ch. 9), which has authorization to change to Chattanooga, pays \$722,500 to group headed by Dean Covington. Owners told FCC they had sought financial assistance to build first-class outlet in Chattanooga after Earl W. Winger, owner of Chattanooga radio WDOD, cancelled option for 50% because of health, but were unsuccessful. Martin Theatres, headed by E. D. Martin, operates WTVM, Columbus, Ga. (Ch. 28). WROM-TV Aug. 31 balance sheet lists \$62,774 deficit. It had \$4963 current assets, \$86,716 fixed assets; \$40,467 current liabilities, \$72,986 fixed liabilities, \$31,000 capital stock.

Mass communications revolution wrought by electronics will be covered by Dec. *Atlantic* in last of 3 special issues celebrating magazine's centennial. Oct. issue is devoted to "A Forward Look at Science & Industry," Nov. to arts, literature & politics. "Ideas as well as the products of science & industry might well be left languishing at their source" without mass communications, *Atlantic* points out.

Canadian IRE Convention: These TV papers will be featured at convention & exposition Oct. 16-18 at Toronto's Exhibition Park: Video recording tape, by L. F. Bennett, Canadian Military Electronics Standards Agency; system design of large TV stations, by A. L. Reeve, Canadian GE; modular TV transmitter design, by M. L. Falk & C. C. Nicholson, Canadian GE; vapotron, new cooling device for high-power tubes, by Mr. Beurtheret, CFTH (Paris) & H. G. Towlson, GE; design of single-layer coils for transmitters, by J. Soul, Canadian GE; TV signal strength meter, by S. J. Gabzdyl, Canadian Radio Mfg. Corp.; TV pattern generator, by A. B. Johnson, Canadair; design of 21-in. color set, by W. Kurz, Canadian Radio; 110-degree tubes, by S. F. Love, Radio Valve Co.; TV sync separator, by E. Luedicke, RCA Victor Ltd.

Canadian TV stations in 17 markets will show NTA's *Premiere Performance* film package starting Oct. 10, sponsored by American Home Products thru Toronto office of Young & Rubicam.

Equipment shipments: By RCA—6-kw transmitter Oct. 1 to WRCV-TV, Philadelphia (Ch. 3), planning move to new site. By GE—50-kw transmitter to WCDA, Albany-Vail Mills, due to shift from Ch. 41 to 10; 5-bay helical antenna to WHYN-TV, Springfield-Holyoke, Mass., shifting from Ch. 55 to 40, together with single-bay helical for interim use while new antenna is being erected; used 5-kw transmitter to upcoming KWRB-TV, Riverton, Wyo. (Ch. 10), which hasn't reported target; 12-kw transmitter to WANE-TV, Ft. Wayne (Ch. 15); 6-bay batwing antenna to WDSM-TV, Duluth (Ch. 6), planning change to higher tower.

First "Orth Saver" units, Visual Electronics' device for extending camera tube life, were installed in stations this week.

ELECTRONICS PERSONALS: John S. Anderson, pres. of Aeronautical Radio Inc., elected chairman, Radio Technical Commission for Aeronautics, succeeding Dr. John H. Delinger, who had held post 17 years and who continues as technical advisor on administration & organization . . . Dr. George H. Brown promoted to chief engineer, RCA industrial electronic products . . . J. Forrest Bigelow named mgr., radar and radio systems, Philco govt. & industrial div.; F. J. Bingley, mgr., audio-video, data systems; C. P. Woodward, mgr., missiles and advanced tactical systems; Ralph Deutsch, mgr., fundamental techniques . . . G. W. Duckworth promoted to mgr., marketing, industrial tube products activity, RCA electron tube div.; C. F. Nesslage to administrator, operating financial controls; E. E. Spitzer, mgr., engineering; E. M. Wood, mgr., production . . . Donald M. Miller elected exec. v.p., Airborne Instruments Labs . . . Everett M. Patterson, ex-Standard-Thomson v.p., elected pres. of Bulova Research & Development Labs . . . Edward Alpert promoted to communications field sales administrator of Raytheon's commercial equipment div., Joseph J. Sedik to communications product planning mgr. . . Douglas W. Anderson promoted to asst. to v.p., Stromberg-Carlson electronics div.; P. R. Sultzbach to production mgr.; Wm. F. Hafstrom, mgr., marketing-industrial products . . . David E. Laughlin, ex-Giddings & Lewis Machine Tool Co., named mgr. of Digimatic marketing section of Stromberg-Carlson's Electronic Control Systems Inc. . . . Roe Nardone named Haydu Electronic Products director of engineering and a company director . . . Felix T. Troilo promoted to sales mgr. of Circuit Instruments Inc., an International Resistance Co. subsidiary . . . E. C. Titcomb to head new N. Y. field engineering office of Kin Tel div.,

World Series Color: Better than 2 years ago, but still variable. That's critics' consensus of NBC-TV's World Series colorcasts to date. Meanwhile, foreign viewing of Series was considerably extended and improved. New scatter link fed games to Cuba. Kines made on west coast were flown to Tokyo for day-later showing. Kines were also flown to Honolulu, Anchorage, Fairbanks, Guam, Venezuela, Puerto Rico, Mexico, El Salvador, Guatemala.

Cyprus TV station went on air Oct. 1 with first of series of bi-weekly programs—consisting of newsreels, movie about St. Barnabas (protector of Cyprus) and episode in *Robin Hood* film series. Operated by Cyprus Broadcasting Service (British Govt.), station concentrated on Greek-language programming in debut, will feature Turkish programs in next transmissions. Debut drew crowds to TV store show windows.

Misleading advertising will be subject of Practising Law Institute forum Oct. 26 in Hotel Commodore, N. Y., for corporation lawyers and others concerned with marketing problems. Participants in panel on "Protection Against Unfair Competition" will include pres. Hugh R. Jackson of N. Y. Better Business Bureau, mgr. Albert G. Seidman of FTC's N. Y. office.

Rate increases: KMJ-TV, Fresno, Cal. Sept. 1 raised base hour from \$550 to \$600, min. remaining \$150. WKOW-TV, Madison, Wis. Oct. 1 added Class AA hour (7-9:30 p.m. daily) at \$280, min. at \$56, Class A hour going from \$250 to \$224. KLRJ-TV, Henderson-Las Vegas, Sept. 1 raised hour from \$225 to \$275, min. \$45 to \$50.

Radio advertising clinic sponsored by RAB will be addressed by Sen. Morse (D-Ore.) at opening luncheon meeting Oct. 8 in Waldorf-Astoria Hotel, N. Y.

WNEM-TV, Bay City-Saginaw, Mich. (Ch. 5) has established main offices and a studio on 2nd floor of Flint's Bishop Airport Terminal Bldg.

Cohu Electronics . . . Wm. A. Drews appointed head of electronic group of Atlantic Research Corp.'s electro-mechanical div.

Missile technology has vast potential for development of electronics for peaceful uses, particularly in radio & microwave communications and radar, Sylvania v.p. Howard L. Richardson said Oct. 1 at cornerstone ceremonies at company's new Amherst, N. Y. electronic research & development center. Two-story building on 18-acre site near Buffalo Airport, scheduled for completion early in 1958, will house 500 employes, half of them engineers.

Electronic X-ray amplifier, multiplying image brightness 100 times and reducing radiation exposure of subject, was demonstrated experimentally Oct. 1 by Benjamin Kazan of RCA's David Sarnoff Research Center at American Roentgen Ray Society meeting in Shoreham Hotel, Washington.

Texas Instruments opened wholly-owned subsidiary, Texas Instruments Ltd., at Bedford, England, this week. Company's first manufacturing enterprise outside U. S. produces transistors and other semiconductor devices. Dudley Saward has been named managing director.

"Thyristor," new high speed switching transistor for computers and control systems, has been developed by RCA. Dr. Irving Wolff, v.p.-research, described it as a "marked advance" letting one transistor do work of 2.

All-glass 16-in. radar picture tube for military use (16AKP7) has been produced by Westinghouse for new display equipment used with radar, missiles and computers—or to replace 16-in. metal cone tubes.

TOP TV BRANDS-IN-USE IN 23 CITIES: Subscribers expressed so much interest this summer when we printed brief summary of TV set preferences in 23 markets as reported in Consolidated Consumer Analysis surveys (Vol. 13:24), that we have obtained permission to reprint the complete CCA table of TV ownership.

Consolidated Consumer Analysis figures are based on consumer surveys made by CCA member newspapers in the 23 markets. Newspapers distributed questionnaires to cross-section of market-area households, asking data about ownership and use of virtually every type of consumer item from whiskey to automobiles.

Survey sample families for 1957 totaled 69,398, out of 23-market total of 5,000,000 households. Most of the surveys were conducted in Jan. 1957, few earlier.

TV table is cumulative -- that is, it gives percentage of all TV households which owned each brand of set in each market, together with ranking of each make.

Individual market tables, distributed by newspapers making surveys, are broken down to indicate all brands owned by at least 1% of families, whereas consolidated table restricts itself to 14 most popular brands. Therefore, some brands which rank relatively high in certain regions -- such as Kaye-Halbert, Muntz & Airline (Montgomery Ward) -- don't appear in full 23-market table.

* * * *

Newspapers conducting the mass survey on foods, drugs, toiletries, home furnishings, appliances, automobiles, beverages, etc.: Chicago Daily News, Cincinnati Times-Star, Columbus Dispatch-Ohio State Journal, Denver Post, Duluth Herald and News-Tribune, Fresno Bee, Honolulu Star-Bulletin, Indianapolis Star and News, Long Beach (Cal.) Independent and Press-Telegram, Milwaukee Journal, Modesto Bee, Newark News, Omaha World-Herald, Oregon Journal (Portland), Phoenix Republic and Gazette, Portland (Me.) Press-Herald and Evening Express, Sacramento Bee, Salt Lake Tribune and Deseret News, San Jose Mercury and News, Seattle Times, St. Paul Dispatch and Pioneer Press, Washington Star, Wichita Eagle.

Median set saturation in the 23 cities was 92.5% at beginning of 1957, 88.7% in 1956 and 81.6% in 1955. Here is complete Consolidated Consumer Analysis table:

* RCA Victor and Motorola tied for first in Denver.

Slimmer Console: Ten-inch depth for 21-in. console cabinet -- slimmest yet -- is current goal of Sylvania designers, pioneers in trend to shallower cabinets. Set employs 110-degree tube, and intention is to have single model on market by Christmas. Present Sylvania 21-in. console is 13 11/16-in. deep, with 1-in. cup on back. New set retains same cup but has cabinet set back from tube face. No price is mentioned yet, but it's expected to be no lower than current 21-in.

Retail Sales: TV retail sales for Aug. were 510,097, continuing monthly rise from April low of 337,965 and bringing 8-month total to 3,746,834, reports EIA. Figure for Aug. 1956 was 566,158 and for first 8 months, 3,839,718. Radio sales at retail, excluding auto sets, totaled 4,947,006 vs. 4,648,707 sold in similar 8-month period of 1956. Sales in Aug. were 710,553 compared with 681,152 in Aug. 1956.

Factory Sales: TV factory sales totaled 3,649,000, valued at \$466,858,000, in first 8 months of 1957, compared with 4,226,000 units, worth \$540,873,000, in like 1956 period. EIA also reports 1957 sales of 5,245,000 radios, excluding auto, valued at \$122,768,000, vs. 5,073,000 at \$105,359,000 in similar 8 months of 1956. Hi-fi component sales through Aug. were valued at \$20,276,190 compared with \$16,517,-820 in first 8 months of 1956. These included receivers & tuners, amplifiers and speakers, but no unit count of sales is kept.

Production: TV output was 180,725 week ended Sept. 27, compared with 155,751 preceding week and 204,655 in corresponding week one year ago. It was year's 39th week and brought TV production for year to date to about 4,601,000, compared with 5,259,271 in same period of 1956. Also this week, EIA officially estimated first 8 months production at 3,756,533 compared with 4,365,060 in similar 1956 period. Aug. production was 673,734 (88,615 uhf), compared with 360,660 (55,401) in July, 612,927 (90,419) in Aug. 1956.

Radio production was 380,732 (105,895 auto) week ended Sept. 27, vs. 356,290 (105,965) preceding week and 314,993 (109,219) in corresponding week year ago. Radio output for 39 weeks totaled about 10,374,000 (3,838,000) vs. 9,535,896 (3,060,093) in 1956 period. First 8 months production was placed at 8,765,606 (3,392,926) compared with 8,216,707 (2,710,303) in similar period last year. Aug. production totaled 965,724 (301,971), compared with 612,588 (256,279) in July and 990,845 (198,087) in Aug. 1956.

Ad-Inventy Relationship: TV-radio manufacturing industry will require "extraordinary advertising increase" in next 3 months to take care of "extraordinary prospective inventory increase," according to new "advertising barometer" in Sept. 27 *Tide*. "Pressure ratings," devised for magazine by economist Peter B. B. Andrews from projections based on reports by govt. economists and other financial analysts, give this TV-radio estimate for next 12 months: "Large prospective inventory increase; large advertising increases required." In survey of 1958 advertising costs in all media, *Tide* says they'll be up, but that daytime spot TV "is still the cheapest buy and shows little prospect of rate increase."

"Renewed optimism" is reported in Sept. survey by National Assn. of Purchasing Agents, with 32% looking for higher 4th quarter production, 46% seeing no change, 22% expecting drop. Of those NAPA members replying to survey, 32% anticipate an increase in new orders, 44% figure on no change, 20% see decline. Inventories were reported lower by 34%, unchanged by 51%, increased by 15%. Higher prices are listed by 51%, compared with 57% who reported higher prices last month; 42% saw no change and 7% reported decreases.

Lester Krugman, ex-Emerson, is now publishing *Co-operative Advertising Newsletter* with offices at 520 Fifth Ave., N. Y.

Canadian Color: Increased color sales in Milwaukee and Cincinnati were cited this week by Martin F. Bennett, RCA v.p.-merchandising, in urging Canadian sales & adv. executives to prepare for introduction of color TV in Canada—which Fowler report says will probably begin in 1959. He told Advertising and Sales Executives Club of Montreal that advertisers and agencies are beginning to show interest in color, NBC reporting more demands for special color shows "than there is time available. Advertisers want to get experience in color, and especially in color commercials."

Code of ethics for appliance service industry has been proposed by John H. Miller, mgr. of GE appliance & TV receiver product service, who told American Home Laundry Mfrs. Assn. meeting in Chicago that code would let customer know extent of reasonable service demands. Other speakers, saying customers don't understand terms of warranties, called for public relations campaign to explain service policies.

NARDA pres. Ken Stucky told group's Oct. 6 regional meeting at Macon, Ga. that following is ideal division of appliance dealer's sales dollar: 5% for sales expenses; 4% office & delivery; 4% service & installation; 4% return on investment & owner compensation; 4% advertising & promotion; 4% fixed costs & general administration; 75% merchandise costs.

Topics & Trends of TV Trade: Evaluation of electronics role in past 10 years, assessment of future were highlighted by H. Leslie Hoffman, Hoffman Electronics Corp. pres., at dedication of Los Angeles research and development center. He noted that 75% of Hoffman employes now work on products and services not developed 10 years ago—such as TV, computers, transistors, etc.

“Technological breakthroughs,” said Hoffman, “spark the growth of the economy,” improve job opportunities and living standards. Among problems to be solved, he listed faster communications, better utilization of airways, jam-proof navigation systems, long-range radar, computer standardization, air & ground traffic control.

Hoffman Labs pres. James D. McLean said goal is to double million-dollar center’s engineering force to 1000 in 2 years.

Meanwhile, C. E. Underwood, Hoffman v.p.-treas., reported company’s net income for year would be about \$1,700,000 (\$2.25 per share) on sales of approximately \$40,000,000—scaled down from his earlier estimates of about \$2.45 per share. Last year, Hoffman earned \$1,600,000 (\$2.19) on sales of \$46,600,000. He blamed lower profit outlook on stretchout in Air Force contract at Hoffman Labs. However, he had rosy view of 1958 prospects: net income of about \$2,000,000 (\$2.90) on some \$48,000,000 sales.

* * * *

“Systemized electronics” is key to a new growth era for industry, arts and sciences, Theodore A. Smith, exec. v.p., RCA industrial electronic products, told Oct. 4 opening session of SMPTE convention in Philadelphia’s Sheraton Hotel. He said electronics can “free human intelligence from strain and tedium” of every day life and switch it to “executive role of coach and strategy maker.” Smith asserted that “the future of American industry and arts lies in electronic systems”; that “in the immediate tomorrow, it may be impossible to remain competitive without systemized electronics.”

National Security Industrial Assn. elects as pres. Richard C. Palmer, asst. to pres. of Fairchild Engine and Airplane Corp. Officers elected from TV-electronics industry: Raytheon pres. C. F. Adams, 1st national v.p.; Texas Instruments v.p. W. T. Joyce, 3rd national v.p.; IT&T v.p. H. H. Buttner, treas; Blaw Knox pres.-chairman W. C. Snyder Jr., asst. secy.-treas.

New method of training in TV-radio-electronics, “Trainer-Tester,” has been introduced by Howard W. Sams & Co. It uses printed pages simulating equipment, with answers concealed by metallic paint to be erased by student, revealing if correct answer has been selected. Company says “Trainer-Tester” minimizes need for expensive equipment, “fits any school budget.”

RCA is laying off 360 of its 12,000 employes at commercial and defense electronics plants in Camden due to “realignment of RCA defense contracts.” Spokesman said RCA employment in area remains at or near record high and steps have been taken to absorb those furloughed into other RCA operations.

Guide for TV servicemen, containing theory of circuits & tubes and their applications, is provided in *Essentials of Television* (687 pp., \$8.50, McGraw-Hill) by Morris Slurzburg, Wm. Osterheld & Elmo N. Voegtlin.

Trade Personals: Robert Paxton elected GE exec. v.p., directing 4 operating groups-apparatus; consumer products; electronic, atomic and defense systems; industrial components and materials. He also was named to GE board replacing Neil H. McElroy who resigned to become Defense Secy.; Arthur F. Vinson appointed v.p. and apparatus group executive, succeeding Paxton; James H. Goss, Canadian GE pres., elected v.p., consumer products group—succeeded by J. Herbert Smith; Halbert B. Miller elected v.p., manufacturing services group . . . J. J. Toyzer promoted to mgr., RCA TV receiver components plant at Findlay, O., which TV div. has taken over from components div.; Joseph A. Haimes named promotion mgr., RCA semiconductor div. . . Richard W. Jones appointed sales promotion mgr., Stromberg-Carlson special products div., specializing in hi-fi consoles and components; he’s been operating sales promotion consulting service . . . Edward B. Collier, ex-Norge, appointed Admiral national accounts mgr. . . Alexander Theeman elected pres. of Granco Sales Corp., continues as secy.-treas. of parent Granco Products; he succeeds Lloyd Dopkins, resigned . . . Robert J. Higgins, ex-Stuart Louchheim Co., Philadelphia, appointed hi-fi-radio adv. supervisor, Sylvania TV-radio div. . . Matthew McLaughlin, Avco v.p.-counsel, elected director.

Frank M. Folsom, RCA exec. committee chairman, attending Oct. conference of International Atomic Energy Agency in Vienna as permanent representative of the State of Vatican City, will visit RCA activities in Germany, Italy, Spain, France, England before Nov. return to U. S.

DISTRIBUTOR NOTES: Emerson appoints Edward Link midwest district mgr for Pa., Ind., O., Ky., Mich., Tenn.; Ray Fisher, ex-Mitchell Mfg. Co., as southwest district sales mgr. . . Motorola appoints James F. Haley, ex-Philco, as eastern regional sales mgr. . . Murray Rosenberg, ex-Harmon-Kardon, named sales supervisor, Warren-Connolly (Motorola), N. Y. . . Danforth Corp. (Westinghouse), Pittsburgh, appoints H. E. Dillmore gen. mgr. . . Herbert B. Bartel resigns as Admiral TV-radio sales asst., Pierce-Phelps, Philadelphia . . . DuMont appoints C. Carson, 12210 Grand River, Detroit, (Charles Carson, pres.) for 33 eastern Mich. counties including cities of Detroit, Flint, Saginaw, Ann Arbor, Port Huron, Jackson . . . Raymond Rosen & Co. (RCA), Philadelphia, appoints Joseph Diem, ex-Heckle Publishing Co., as asst. adv. mgr., promotes Andrew Villante to credit mgr. . . GE appoints Robert E. Giannini western regional mgr., distributor sales, for tubes and other components . . . Motorola appoints Cramer Electronics Inc., Boston, and Allied Radio Inc., Chicago, for semiconductors . . . Irwin J. Premack, ex-Hotpoint Appliance Sales Co. TV sales mgr., Chicago, named Foreign Automotive Marketing Corp. v.p. & gen. mgr. . . Delmonico International Corp. dissolves factory distributing branch, Delmonico Distributors of N. Y., shifting to direct distribution for key N. Y. accounts, branch pres. Philip P. Geth resigning.

Withdrawal of subpoena for TV-radio records of Siemens & Halske, Munich, has been ordered by Justice Dept. with company agreeing to produce records, but reserving right to challenge U. S. court jurisdiction if civil or criminal suit follows. N. Y. federal grand jury is investigating whether patent pooling by U. S. and foreign companies violates anti-trust laws (Vol. 13:21).

RCA is mass producing round, glass shadow-mask, 261-sq. in. color picture tube (RCA-21CYP22), 20¼-in. diameter, 25-in. long, at Lancaster, Pa. plant.

Financial Notes: Officers-&-directors stock transactions for Sept., as reported to SEC: American Bosch Arma—Wm. S. Wasserman sold 2400 through holding company, 100 through trusts, holds 10,000 in holding company, 4569 in trusts, 12 personally. American Electronics—Warren H. Crowell sold 100 through Crowell Weedon & Co., holds none in Crowell Weedon, 4995 personally. American Machine & Foundry—G. A. Ingalls bought 400, holds 3109; Walter Bedell Smith bought 500, holds 620. AT&T—F. R. Kappel bought 10, holds 186. Arvin Industries—Gordon T. Ritter exercised option to buy 465, holds 1124; T. Earl Robinson exercised option to buy 200, holds 1412. Avco—Rudolph H. Deetjen bought 1000, holds 1000. Bendix Aviation—Palmer Nicholls sold 1098, holds 2386. C&C TV—Matthew Fox sold 3500, holds 576,200 as collateral against loans; Walter S. Mack sold 14,600, holds 206,271. Consolidated Electrodynamics—Philip S. Fogg sold 2000 through wife's account, holds 18,000 in wife's account, 20,000 personally. Emerson Radio—Benjamin Abrams bought 600 for trusts, holds 29,239 in trusts, 63,801 in foundations, 233,445 personally; Max Abrams bought 1100 for trusts, holds 9755 in trusts, 63,801 in foundations, 87,109 personally. Friden Calculating—L. B. Taylor sold 1000, holds 1762. General Dynamics—Gordon Dean exercised option to buy 5000, holds 5150; Earl D. Johnson sold 9300, holds 12,000; Allen D. Marshall sold 1600, holds 8100; Joseph T. McNarney exercised option to buy 10,000, holds 10,513; J. V. Naish exercised option to buy 7000, holds 7200.

GE—W. R. G. Baker bought 2139, holds 12,291; Robert L. Gibson exercised option to buy 2400, holds 5310; Chauncey Guy Suits exercised option to buy 2070, holds 5070; Clarence C. Walker exercised option to buy 1125, holds 4683; Wm. C. Wichman exercised option to buy 1695, holds 4872. Hazeltine—W. M. McFarland bought 100, holds 619. International Resistance—Charles H. Griffin exercised option to buy 400, holds 6100. Minneapolis-Honeywell—P. B. Wishart exercised option to buy 1850, holds 6120. Oxford Electric—David E. Davis sold 200, holds 1890. Philips Electronics—Arie Vernes bought 100, holds 100. Sperry Rand—Theodore F. Allen sold 1000, holds 1726; Harry Landsiedel sold 2000 through joint account, holds 10,460 in joint account, 13,904 personally. Texas Instruments—J. S. Dufford bought 900, holds 18,027; P. E. Haggerty sold 1000, holds 132,159; S. T. Harris bought 1000, holds 17,604. Tung-Sol—George W. Keown exercised option to buy 150, holds 1143; Anthony Scala bought 1000, holds 1000; Alfred K. Wright exercised option to buy 125, holds 860. Unifronics—David Bogen bought 3000, holds 3000; Lester H. Bogen bought 2000, holds 2000; John G. Brooks sold 4210, holds 3000; Abraham Cooper sold 500, holds 235; Louis Haber bought 1102, holds 1102; Stanley R. Schoen bought 441, holds 441. Webcor—Titus Haffa bought 500, holds 62,554. Westinghouse—Chris H. Bartlett exercised option to buy 300, holds 1075; Bruce D. Henderson bought 200, holds 900; Leslie E. Lynde bought 300, holds 1828; Tom Turner exercised option to buy 100, holds 1925.

Standard Coil is "operating at a substantial profit" after reaching break-even point in first 6 months, which ended in \$777 net profit (Vol. 13:36), pres. James O. Burke said Sept. 30 in special report to stockholders. Company earned about \$160,000 in July & Aug. at rate which should accelerate, he said. Burke attributed improvement to economy drive, including closing of Los Angeles plant, and to addition of Magnavox, Westinghouse & Sylvania as customers for Standard tuners despite decrease in TV set sales. Standard has licensed British manufacture of its tuners and is negotiating similar arrangements on Continent and in South America. Company's net loss in 1956 was \$1,487,000.

Meredith Publishing Co. had broadcasting revenues of \$9,971,000 in fiscal year ended June 30 vs. \$8,881,000 year earlier, according to breakdown in annual report showing total 1956-57 revenues of \$53,071,711 and consolidated earnings of \$4,644,417, compared with \$4,459,633 & \$4,047,146 (Vol. 13:34). Meredith owns KPHO-TV & KPHO, Phoenix; KCMO-TV & KCMO, Kansas City; WOW-TV & WOW, Omaha; WHEN-TV & WHEN, Syracuse, and is buying radio KRMG, Tulsa (Vol. 13:35).

Avco earned \$6,223,181, plus \$2,363,193 special tax credit, for a total of \$8,586,374 (92¢ per share) on sales of \$238,983,886 and royalties etc., of \$277,310 for 9 months ended Aug. 31, compared with an operating loss of \$3,499,529, exclusive of \$16,000,000 reserve in connection with discontinuance of major part of appliance operations, on sales of \$246,168,438 in comparable 1956 period.

P. R. Mallory & Co. pres. Joseph E. Cain predicts earnings of about \$3,600,000 (\$2.60 per share) on 1957 sales of around \$80,000,000, compared with \$3,065,108 (\$2.60) on sales of \$68,356,203 in 1956. For 1958, he told Security Analysts of San Francisco, sales are likely to increase another \$5,000,000 to \$85,000,000, earnings will hit about \$4,300,000 (\$3-\$3.50).

"Oscar of Industry" award by *Financial World* for best annual report of motion picture industry has been won for 5th consecutive year by AB-PT.

Belock Instrument Corp., which entered movie camera field in Feb. by acquiring Andre Debrie Mfg. Co. (Vol. 13:6), expanded into radio-hi-fi manufacturing this week by buying Sonic Industries Inc., Lynbrook, N. J. Sale of Sonic, which markets "Capri" hi-fi, was completed through exchange of 75,000 shares of Belock common stock for all outstanding Sonic stock. Bid price of Belock stock on American Stock Exchange was \$10 Oct. 1. Sonic pres. Ben Birns will continue as head of new Belock subsidiary, which was founded 12 years ago and has reached estimated \$5,000,000 sales volume this year.

Electronics expansion of 120% by 1965 is forecast by E. Dorsey Foster, RCA v.p.-economic planning, who told Southern N. J. fall conference at Atlantic City that national economy will grow 40% in next decade—matching growth of last 10 years. He listed basis for prediction as: 15% population increase; 7,000,000 more households; income going from \$5640 in 1955 to \$6500 in 1965; households in \$4000-\$10,000 group increasing from 5,000,000 to 30,000,000 by 1965.

Beckman Instruments reports net income of \$209,432 (16¢ per share) on sales of \$38,088,730 in year ended June 30, compared with \$1,744,856 (\$1.36) on sales of \$29,362,131 in preceding year. Lower earnings this year, said Beckman pres., Dr. Arnold O. Beckman, were due mainly to research & development investments and non-recurring loss on govt. contract.

Dividends: Avco, 10¢ payable Nov. 20 to stockholders of record Oct. 29; Canadian GE, \$2 plus \$4 extra, both Jan. 2 to holders Dec. 16; General Dynamics, 50¢ Nov. 9 to holders Oct. 18; National Theatres, 12½¢ Oct. 31 to holders Oct. 17.

Raytheon won contract for \$4,134,901 from CAA this week for 4 more long-range radar units and Amplitron amplifying equipment, delivery to start Sept. 1958. Company received CAA order for 23 sets year ago.

Farnsworth Electronics Co., IT&T div., starts construction of 4th plant in Ft. Wayne area, scheduling completion for mid-1958 to double production capacity.

Network Television Billings

August 1957 and January-August 1957
(For July report see *Television Digest*, Vol. 13:35)

NETWORK TV BILLINGS slid 9.5% in Aug. to \$38,564,220 from \$42,596,589 in Aug. 1956, when political convention sponsorships swelled total to since-surpassed record high, according to Publishers Information Bureau. It was lowest monthly figure since \$37,747,514 recorded in July 1956 and marked first time in network history that billings for any given month didn't show advance over same month year earlier. Cumulative total for 8 months of 1957 were up 4.2% to \$327,981,866 from \$314,854,415 in corresponding 1956 period, however. In Aug. this year, CBS (whose 1956 convention billings from Westinghouse were \$3,556,213) was down 5.9% from Aug. 1956. NBC (\$4,382,964 convention billings from Sunbeam, RCA & Oldsmobile) dropped 13.3%; ABC (\$2,258,181 from Philco), 10.3%. The complete PIB report for Aug.:

NETWORK TELEVISION

	Aug. 1957	Aug. 1956	% Change	Jan.-Aug. 1957	Jan.-Aug. 1956	% Change
ABC	\$ 6,134,380	\$ 6,842,292	-10.3	\$ 52,578,094	\$ 50,855,477	+3.4
CBS	18,278,933	19,430,748	-5.9	153,578,489	144,411,892	+6.3
NBC	14,150,907	16,323,549	-13.3	121,825,283	119,587,046	+1.9

*Revised as of October 3, 1957

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 25%. However, they're generally accepted in the trade as an index.

Four applications for TV stations and 3 for translators were filed with FCC this week, bringing total to 120 (35 uhf) for stations, 41 for translators. Station applications: for Lafayette, La., Ch. 3 by consultants Dawkins Espy and Thomas B. Friedman; for Presque Isle, Me., Ch. 10 by owners of WTWO, Bangor; for International Falls, Minn., Ch. 11 by local group of over 2700 headed by Leroy Phaklides; for Portland, Ore., Ch. 27 by community antenna operator Trans-Video Co. of Ore. Translator applications were for Lovelock, Nev., Paradise Valley-Golconda, Nev. and Gold Beach, Ore. [For details see *TV Addenda 25-J* herewith.]

NTA Film Network will offer live shows on regional & national hookups beginning early next year, v.p.-gen. mgr. Raymond E. Nelson announced this week in address to Boston Ad Club. Name will be changed to "NTA Network," he said in speech stressing "flexibility" as desired quality in TV advertising. He emphasized importance of being able to select only desired TV markets, free from option time and must-buy requirements.

TV Schooling for Free World: International seminar on educational TV will be conducted Oct. 9 & 10 at Boston U for professional educators & broadcasters invited by school's communications arts div. to make "preliminary inventory" of uses of medium in free world. Participants will include: Robert S. Lambert, CBC; Arne Arnbom, Swedish Broadcasting System; Dr. Jerry Winfield, ICA; H. Reid Bird, State Dept.; Wm. Frye, UNESCO; John K. Weiss, Fund for the Advancement of Education; W. M. Brish, Washington County (Md.) schools; Charles Hettlinger, Pittsburgh schools; Dr. Earl Hemminghaus, St. Louis schools; John W. Taylor, WTTW, Chicago; Dr. Thomas Clark Pollock, NYU; L. L. Lewis & Max Berry, RCA; Robert Hudson, Educational TV & Radio Center, Ann Arbor; Richard B. Hull, Ohio State U; Hartford Gunn, WGBH-TV, Boston; Dr. Harry Skornia, NARTB.

Broadcaster immunity from equal-time libel suits was asked Oct. 2 in brief filed by NARTB with North Dakota Supreme Court on appeal by Farmers Union of lower court decision in favor of WDAY Inc., Fargo (Vol. 13:32, 35). Farmers Union had charged it was libeled by minor party congressional candidate in broadcast over WDAY-TV during 1956 campaign. Station admitted libel but said it could not prevent or censor broadcast because of FCC equal-time regulation. NARTB brief also said "we believe the broadcaster would as well serve the public in the field of political broadcasting without legislative stricture as he has done in the many other fields of public programming."

Moscow TV tried giveaway gimmick on its popular VVV (*Evening of Merry Questions*) program this week with these disastrous results: (1) Audience response was so enthusiastic that station couldn't go on, (2) next day's *Evening Moscow* denounced quiz show as "beneath criticism" and promised that Russia will never have *The 64,000 Ruble Question* on TV, (3) VVV was in danger of losing its sponsor—the Govt. Catastrophe started when announcer offered prizes to first 3 viewers who arrived at Moscow U studio fully dressed for winter. Within minutes stage overflowed with more than 500 prize-seekers, announcer got lost in crush, program was cancelled for "technical reasons," station went off air hours ahead of schedule.

CBC Board of Governors Sept. 26 recommended grant of Ch. 3, Yorkton, Sask. to Yorkton TV Co. Ltd.; Ch. 2 satellite at Elk Lake, Ont., to J. Conrad Lavigne, operator of CFCL-TV, Timmins, Ont. (Ch. 6); power increase to 100-kw by CKCO-TV, Kitchener, Ont. (Ch. 13). It denied request for Ch. 6 satellite in Inverness, N. S. by CJC-B-TV, Sydney, N. S. (Ch. 4), stating "high" 20-kw power wasn't justified. It also noted that CFCL-TV had withdrawn request to change satellite grant in Kapuskasing from Ch. 3 to Ch. 70 translator.

Big Japanese TV film sale was reported this week by TPA, whose foreign mgr. Manny Reiner lined up Radio Tokyo TV network in Tokyo, Osaka, Nagoya & Hokkaido to show *Lassie, Susie, Ramar of the Jungle*. Radio Tokyo also bought *The Lone Ranger* for Tokyo alone. At same time TPA claimed first commercial TV film sales by American company in Korea, where Seoul's HMKZ-TV bought *Fury, Ramar, Count of Monte Cristo*.

SUMMARY-INDEX OF THE WEEK'S NEWS—October 12, 1957

CABLE THEATRE APPLICANTS listed on basis of survey of 490 municipalities; first returns shown 96 applications in 66 cities (pp. 1 & 4).

BARROW REPORT DUE for consideration by FCC committee within month; Justice Dept. seen withholding action. Congress hearings pushed (p. 2).

ALL-SPECTRUM STUDY a good possibility, with military sympathetic to objectives, reports GE's Paul Chamberlain, who heads EIA exploration (p. 3).

PAY-TV ANALYSES attempted by Life and N. Y. Times' Jack Gould as Bartlesville and Commission draw intense national attention (p. 4).

NEW EDUCATIONAL OUTLET begins programming at Corvallis, Ore., as 27th non-commercial station, bringing TV on-air total to 513 (p. 7).

SEPT. RETAIL SALES figures awaited as index to year. Estimates of Sept. factory sales down, but major producers say month was good (p. 10).

RECORD MOTOROLA SALES for first 9 months reported by Galvin, who predicts \$8,500,000 earnings for year; TV sales down from '56 (p. 13).

ABC-TV's "BOLD JOURNEY" becomes homework for 1,200,000 students in project using commercial show as regular school assignment (p. 8).

GO-AHEAD FOR WLWI, Indianapolis, seen in FCC staff instructions. Court denies stay on Ch. 10, Albany. Other Commission actions (p. 9).

VIDEO TAPE MILESTONE: RCA & Ampex agree to exchange patents, indicating probability of compatible equipment, technical progress step-up (p. 10).

SPOTTING THE CABLE THEATRE ENTREPRENEURS: There's no central record-keeping of cable theatre data. Neither federal nor state Govts. are involved. Therefore, in effort to meet TV-movie industry needs, we've begun the laborious task of finding out who is seeking to establish cable systems where. If the Bartlesville experiment shows clear signs of success, you can expect a rush.

We've questionnaired city officials in all the 490 municipalities over 25,000 population, have received fair return. In addition, we've kept track of trade reports. On page 4, you'll find a list of applicants for cable franchises reported to date. Obviously, it isn't complete. There may be some glaring omissions—and we hope you'll call our attention to them. However, it's the only directory extant, and replies are still coming in from city halls.

Our records show 96 applications filed in 66 cities. Responses from 155 cities give official verification of 70 of the applications; trade reports account for the balance.

Not included in list are conventional community antenna systems, an extensive directory of which is a regular feature in our semi-annual Factbook. Our Fall-Winter issue lists 610 in U. S. & Canada, representing some 500,000 homes already tied together with cable—though most systems are quite small when considered in light of current speculation about cable theatre.

Almost as interesting as list of applicants is list of cities with none. Here are a few cities with no applications, according to our replies from city officials: Mobile, Hartford, Daytona Beach, Ft. Lauderdale, Miami Beach, Orlando, Augusta, Boise, Evansville, Muncie, Council Bluffs, Des Moines, Wichita, Baton Rouge, Shreveport, Worcester, Pontiac, Muskegon, Duluth, Minneapolis, St. Paul, Newark, Syracuse, Asheville, Cincinnati, Portland (Ore.).

MEETING ON BARROW REPORT WITHIN MONTH: Networks, FCC members and some Congress staffers were still burrowing through hefty Barrow staff report of FCC's network study group (Vol. 13:40) at week's end—and if on-the-record reactions were slow to come it was because: (1) a complete reading of report takes plenty of time, and (2) those directly affected by recommendations have decided it's smart to keep their mouths shut for the present.

Report did bring quick reaction from 2 long-time Congressional critics of networks—Sen. Bricker (R-O.) & Rep. Celler (D-N. Y.)—both of whom talked of more hearings and inquiries when Congress reconvenes and pledged to keep vigilant watch on Commission.

The 3 Commissioner members of FCC Network Study Committee (Doerfer, Hyde, Bartley), as well as the other 4 FCC members, are still in process of reading report, and Chairman Doerfer gave us "rough guess" that Committee may be ready to hold first meeting on matter in about 2 weeks. After Commissioners have completely digested report, he said, Committee meeting will be scheduled to decide whether to transmit report directly to full Commission—or, if not, what the alternatives are.

It's good bet that full Commission will give report's legislative recommendations pretty substantial consideration by time Congress reconvenes next Jan. Already there have been veiled threats from Congressional sources which can be taken to mean "act fast or else—."

Bricker issued statement saying that bills already before Senate Commerce Committee "would carry out practically all of the recommendations made in the report" and urging Commission to be ready with its own proposals early in session. He added:

"I am asking Chairman Magnuson to schedule early hearings by the Senate Commerce Committee to receive any additional testimony which may be needed before consideration by the full Committee of the bills already introduced."

Both Magnuson (D-Wash.) and Sen. Pastore (D-R. I.), chairman of communications subcommittee, are abroad and couldn't be reached.

"Our anti-trust subcommittee," said Rep. Celler in statement, "will maintain a watchful eye" to see that FCC acts promptly on Barrow recommendations. He found it "significant" that study group reached conclusions similar to those of his own subcommittee and of Senate Commerce Committee staff.

Celler's subcommittee also will take look at Justice Dept.'s progress in its inquiry into possible connection between network time sales and program ownership, he indicated. "Considering that 3 years have now elapsed since commencement of this investigation, it will be necessary for our subcommittee to determine the reasons for the apparent inordinate delay by the Dept. of Justice in resolving these highly important questions."

Justice Dept.'s chief trust-buster, Asst. Attorney General Victor R. Hansen, told us he had read complete report and that "it covers many areas in which we have been investigating." He said Barrow & Co. "should be commended for an extremely comprehensive report."

"As to the recommendations directed to us," he added, "they are all areas which we have been studying for a long time."

Among informed Washington legal observers, there was unanimous feeling that any contemplated anti-trust action on such network practices as option time, must-buy, network spot sales representation, etc. would now be delayed—Justice Dept. preferring to give FCC opportunity to act instead.

Conversely, observation was also made that Barrow group had tossed several hot potatoes right into Justice Dept.'s lap by making no recommendations in areas affected by programming—particularly issue of alleged tie-ins between network sales of choice time slots and network-owned programs. There was definite impression—also hinted in Celler statement—that study group's omission of such material from report now makes it incumbent on Justice to take action or end its inquiry in this area.

Veterans of Washington TV-radio wars this week were viewing Barrow report as preliminary to some changes in FCC rules, but no one could conceive that Commission would go all the way. Their best guesses: No changes in multiple ownership rules in foreseeable future. Probable eventual elimination or modification of must-buy principle. At least a partial victory, probably, for Barrow group in its recommendations for publishing of affiliation contracts and criteria (Celler has publicized this information anyway, and could do it again if he chose).

Biggest and bitterest fight probably will center around proposal to ban option time. And you can be sure networks aren't prepared to give on this one.

■ ■ ■

When Congress reconvenes, networks will be involved in at least 2 new sets of hearings—in addition to revival of the old ones mentioned above.

Sen. Smathers' bill to divorce networks from music publishing and record business is almost certain to get Senate Commerce Committee hearing, reopening ASCAP-BMI fight in Congress. And there's Rep. Moulder's legislative oversight probe of regulatory agencies, still grinding along at staff level. (His staffers last week sent questionnaires to networks, asking them to specify all "gifts, honorariums, loans," etc. bestowed upon FCC commissioners or staff members).

Lest Congressional preoccupation with what's-wrong-with-networks give impression that crushing legislation is inevitable, it's well to bear in mind that—as one industry veteran put it—"when the chips are really down, there are a helluva lot of Senators and Congressmen who believe the TV networks are doing a bang-up job."

HOPES FOR INTENSE STUDY OF WHOLE SPECTRUM: Encouraging progress toward an all-spectrum study, including military uses, is reported by Paul L. Chamberlain, GE mgr. of broadcast equipment marketing, who is spearheading EIA's work on subject. He says top military communications officers have shown willingness to go along in principle, at least. EIA expects shortly to name committee to advise EIA board on role it should play in advising Govt.

Chamberlain's philosophy is this: There have been numerous spectrum studies since Radio Technical Planning Board completed its work in 1945—but none have been all-inclusive, covering all uses by all services. "There's plenty of spectrum space," he said, "if it were only used efficiently. But we know only how half is being used—the civilian half."

Study might take 2-3 years, then 8-10 years might be required to implement recommendations, Chamberlain says. He asserts that objective would be neither to protect nor to attack any particular user of spectrum. As for TV, he reiterated what engineers have long asserted: "From an equipment standpoint, today's TV assignments aren't efficient. There's about an 18-to-1 frequency spread between the bottom of the vhf band to the top of the uhf band. It would be much better to have a continuous block with a 2-to-1 spread."

■ ■ ■

Continuous addition of TV stations, at modest pace, is foreseen by Chamberlain and Wells R. Chapin, GE mgr. of broadcast equipment research & product planning. They don't quarrel with estimates showing total of about 600 commercial stations in sight (Vol. 13:34), but Chapin notes: "There are always entrepreneurs willing to take a risk, and they are likely to push the figure higher." Chamberlain is also tremendously impressed with educational TV growth, in fact predicts that educational stations will eventually equal commercial outlets in number.

■ ■ ■

Meanwhile, FCC this week officially dismissed its "Craven Plan" proposal, following previously stated intention (Vol. 13:37). Plan envisioned dropping of present allocation table, permitting TV applications to be filed anywhere—as long as they met engineering standards. Commission said it would wait for TASO's engineering study of vhf & uhf performance.

Cable Theatre Applicants: Most reliable sources of information on cable theatre applicants are city officials, (see p. 1), because cable entrepreneurs must get franchises to use city streets, etc. for stringing of cable. Our questionnaire was directed to the 490 cities with population exceeding 25,000;

155 replies have been received to date. List has been supplemented by trade reports, in instances where responses haven't been obtained from cities. Those based on trade reports are indicated by asterisks. Herewith is the list of applicants on basis of our survey so far:

Pay-TV Storm Rages On: Two national publications undertook this week to tell their readers which way pay-TV winds are blowing. In pictures & article by Loudon S. Wainwright, Oct. 14 *Life* spread itself through 6 pages to report TV "revolution which networks fight to halt." Wainwright concluded that pay TV "is well on the way to becoming a vivid reality for millions of viewers" and that "the best likelihood for the immediate future, all alarms & excursions to the contrary, is that toll TV & free TV will exist together, that there will prove to be room for both."

In Oct. 6 *N. Y. Times Magazine*, TV-radio critic Jack Gould found FCC applying "firm indecision" on issue, "using the English language so that the words will have no meaning." He observed that seldom in history of show business & electronics has there been "such a deluge of excited doubletalk and such a paucity of tangible fact."

Gould wrote: "There might be room for both [pay and free TV]. Whether toll TV ultimately is destined to be a practical success or a promotional turkey, however, no one really knows."

Meanwhile, there was little let-up in skirmishes:

(1) Chairman Celler (D-N. Y.) of House Judiciary anti-trust subcommittee demanded that FCC Comr. Lee disqualify himself from pay-TV deliberations. Lee, said Celler, had "practically expressed approval for pay TV" in article written for *Look*. Lee had "no comment."

(2) Sen. Langer (R-N. D.), second ranking minority member of Senate Judiciary Committee, promised to introduce bill in Jan. to "expressly prohibit" pay-TV.

(3) NARTB pres. Harold E. Fellows warned Broadcast Advertising Club of Chicago that pay TV will begin carrying advertising if 10,000 families ever become paying customers.

(4) Milwaukee common council resolution to permit Skiatron TV Inc.—or any other pay-TV franchise applicant—to negotiate with local utilities for use of poles, lines & other facilities was vetoed by Mayor Frank P. Zeidler. Joined by *Milwaukee Journal*, he said council hadn't made sufficient study of problems.

(5) Exec. committee of Reserve Officers Assn., headed by New Orleans Mayor deLesseps Morrison, passed resolution expressing "misgivings" about pay TV in view of "vital role which a free use of the air" could play in national emergencies.

(6) Brooklyn Dodgers made it official. They'll move to Los Angeles next season, when N. Y. Giants will be in San Francisco. One reason for moves: pay-TV promises.

Personal Notes: Edmund C. Bunker, gen. mgr. of WXIX, Milwaukee, named v.p. & station relations director of CBS-TV, succeeding Edward P. Shurick, resigned (Vol. 13:40); Frank Shakespeare Jr., gen. sales mgr. of WCBS-TV, N. Y., moves up to gen. mgr. of WXIX, replaced at WCBS-TV by Norman E. Walt, CBS-TV Spot Sales account executive; Robert F. Jamieson, CBS-TV sales service mgr., to station contacts mgr., succeeded by George Zurich; Robert L. Pike succeeds Zurich as asst. mgr. . . . Dean D. Linger, sales promotion & publicity director of KNXT, Los Angeles, and CBS-TV Pacific Network since 1952, named adv. & promotion director of ABC-TV, N. Y., replacing John H. Eckstein, resigned; Austin Heywood promoted to KNXT & CBS-TV Pacific Network posts . . . Robert Sadoff, ex-Bourne Inc., named to new post of music coordinator, NBC Radio . . . Harold Grams, program director of KSD-TV, St. Louis, becomes gen. mgr. of *Post-Dispatch's* TV-radio stations as of Jan. 1 when he succeeds retiring George M. Burbach, who founded and directed both stations—radio KSD while he was adv. mgr. of the newspaper; at 74, Mr. Burbach is an active Pulitzer director, enjoys improved health, reports to office regularly . . . James E. Kovach, ex-WRC-TV & WRC, Washington, named program mgr. of WBAL-TV, Baltimore . . . Karl B. Hoffman, v.p. & engineering director of WGR Corp., Buffalo, named to same posts in Transcontinent TV Corp. in corporate merger of WGR-TV & WGR and WROC-TV, Rochester (Vol. 13:39) . . . Ben Slack, ex-radio KTUC, Tucson, joins KGUN-TV there as commercial mgr. . . . Roland Kay, from radio KCBS, San Francisco, named sales mgr. of KERO-TV, Bakersfield, Cal., succeeding Ed Urner, who resigned to develop new Bakersfield radio outlet . . .

Carlo Anneke, WDSM station mgr., named gen. sales mgr. of WDSM-TV, Duluth, succeeding Tom Gavin, named gen. mgr. of radio WDSM . . . Boone Boggs advanced to promotion director of WDBJ-TV, Roanoke, succeeding Mike Schaffer, now promotion director of WAVY-TV, Portsmouth-Norfolk . . . Roy E. Larsen, Time Inc. pres. who is chairman of Fund for the Advancement of Education, elected a trustee of Ford Foundation . . . Ralph J. Baron promoted to asst. eastern div. mgr. of TPA, headquartering in Baltimore . . . George Kellogg joins Animation Inc., Hollywood, to handle west coast TV sales . . . Robert T. Lund, exec. v.p. of Vision Inc., named assoc. publisher of *Printers' Ink*; W. Richard Bruner promoted to managing editor, succeeding Thomas M. Jones, who resigned to take similar post on *Modern Packaging* . . . Jack Krueger, news editor of WTMJ-TV & WTMJ, Milwaukee, reelected pres. of Wis. AP Radio & TV Assn. . . . Charles G. Burke of radio KFGO, Fargo, elected pres. of N. D. Broadcasters Assn. . . . Howard Stanley, mgr. & sales mgr. of radio WAVY, Norfolk, elected pres. of Norfolk Ad Club . . . Burton B. LaDow, commercial mgr. of KTVK, Phoenix, also named station mgr., reporting to exec. v.p. Leon M. Nowell . . . Arthur H. McCoy promoted to exec. v.p. of radio rep John Blair & Co. . . . Oliver H. Crawford shifted from programming editor of *TV Guide*, N. Y., to Pacific Coast regional mgr., Los Angeles; Lee Gottlieb named programming editor, Harold B. Clemenko assoc. editor.

“Award for Achievement” will be presented ABN pres. Robert E. Eastman by Washington Ad Club in “Radio Day” ceremonies Oct. 15 at Presidential Arms. He will speak on “The New American Broadcasting Network Product.”

ADVERTISING AGENCIES: Ken R. Dyke, former NBC v.p. in charge of programming and onetime ANA chairman, retires as a v.p. of Young & Rubicam in international div. . . . John L. Louis retires as a senior v.p. of Needham, Louis & Brorby, Chicago, after 28 years with agency . . . H. Grant Atkinson, ex-D'Arcy, named TV-radio director of Compton Adv., Chicago . . . Tom Dillon promoted to mgr. of BBDO, Los Angeles, replacing A. W. Neally, resigned to become consultant to agency . . . John P. Hudak Jr., ex-BBDO, named director of mass communications commission of National Conference of Christians & Jews . . . Harold F. Scheinkopf named associate research director of Ogilvy, Benson & Mather . . . David Lawrence, ex-Milton Weinberg Adv., Los Angeles, named TV-radio director of Beckman, Koblitz Inc. there.

Another merger: Marsteller, Rickard, Gebhardt & Reed Inc. acquires Rittenhouse & Co., Inc., Houston, and opens office there under Jack D. Rittenhouse, founder of Rittenhouse agency in 1952, and Douglas S. Craig, ex-Gulf Publishing Co., Houston. They've been named v.p.'s.

John J. Nordberg, FCC telephone div. chief since 1955, was appointed Common Carrier Bureau chief Oct. 8, succeeding Harold G. Cowgill, now Broadcast Bureau chief (Vol. 13:21). Nordberg started with Commission in 1935 as accountant.

New AP pres. is Benjamin M. McKelway, editor of *Washington Evening Star* and v.p. of its WMAL-TV & WMAL. He succeeds pres.-publisher Robert McLean of *Philadelphia Bulletin*, which owns WCAU-TV & WCAU, controls WDAU-TV, Scranton.

Vincent De Laurentis, chief engineer of WNHC-TV, New Haven-Hartford, has applied for daytime radio station in Hamden, Conn.

Top TV entertainers joined Oct. 8 to give \$300,000 closed-circuit show for audience of one—“Little Boy Blue,” 9, who is dying of muscular dystrophy in Lakeville State Sanatorium at Middleboro, Mass. Spectacular 45-min. TV program was organized by comedian Jerry Lewis, Muscular Dystrophy Assn. chairman, after child told nurses he'd like to get “4 or 6” funny cards for birthday this week. News stories brought 120,000 letters & cards to boy, whose father is in prison for killing his mother, and party was topped by show piped from NBC's Burbank studios to sanatorium. Participating with Lewis were Ernie Ford, Hugh O'Brian, Jim Arness, Eddie Cantor, Eddie Fisher, Disney's Mousketeers, Skylarks, 18-piece orchestra.

Time Inc. personnel shifts resulting from death Sept. 24 of Wayne Coy (Vol. 13:39): Time Inc. broadcasting v.p. Weston C. Pullen Jr. assumes Coy's title of pres. of Twin State Bcstg. Inc., licensee of WFBM-TV & WFBM, Indianapolis, and WTCN-TV & WTCN, Minneapolis. Eldon Campbell, v.p. & gen. mgr. of Indianapolis stations, and Philip Hoffman, v.p. & gen. mgr. of Minneapolis div., become directors of Twin State. Hugh B. Terry, pres. & gen. mgr. of KLZ-TV & KLZ, Denver, becomes a director of TLF Broadcasters Inc., subsidiary which controls Time Inc. stations.

Report of SMPTE awards (Vol. 13:40) should have indicated that Col. Richard H. Ranger, Rangertone, was given Samuel L. Warner Memorial Award for work in sound engineering; Wadsworth H. Pohl, Technicolor Corp., was presented Herbert T. Kalmus Gold Medal Award for efforts in color film field.

Teleglobe Pay-TV System Inc., organization established by Sol Sagall to promote his subscription system in which unscrambled picture is sent over air and sound is sent by phone wire (Vol. 13:38), sets up New York office at 15 E. 48th St. (Eldorado 5-0010).

Telecasting Notes: More competition among the networks is showing up on basis of first Trendex ratings of the heavy slate of new programs this season. Interpreting Trendexes is favorite game, and there are 3 different versions of who's winning network rating game. There's no question that NBC-TV has improved its competitive position so far this season, and that ABC-TV's share of audience is moving up, too . . . Both NBC-TV & ABC-TV have put out analyses of their increases in share-of-audience as measured by Trendex samplings for new-program premieres. NBC reports 29% increase in share-of-audience for the time periods occupied by its 19 new shows measured so far; ABC-TV reports 30% gain in time segments of its 9 new shows, 15% boost in new-season premieres of its 9 "established programs" . . . Most of the new situation comedies—and some of the reprised old ones—are not expected to live beyond their first 13-week cycles, and search by networks and sponsors for replacements by Jan. has already begun . . . Syndicated shows have more durability than network shows, TPA claims on basis of study of programming in nation's top 22 markets which indicates only 42% of sponsored evening network shows survived from Jan. 1956 to Oct. 1957, while equivalent figure for syndicated programs was 65% . . . At least 20 new series are being prepared for first-run syndication this winter, reports Oct. 7 *Billboard*, which estimates their total production cost at \$25,000,000 . . . Fate of 7-9 a.m. on CBS-TV due to be settled in next 2 weeks, amid reports network will

hand segment back to stations . . . Expansion of TV film commercial industry is about completed, *Variety* fears in Oct. 9 issue; there's built-in ceiling of about \$52,500,000 billings, it explains, because of limited number of networks and stations. Article estimates 1957 filmed commercial production will total record of nearly \$49,000,000 . . . Quick rebroadcast of Ed Murrow's excellent *See It Now* exposition of postal problems planned by CBS-TV Oct. 20, just 2 weeks after original performance . . . Westinghouse renews *Studio One* on CBS-TV for full 2 years, but with change in name, policy and production locale: It will be *Studio One in Hollywood* beginning in Jan., featuring top movie stars, abandoning N. Y. as origination point . . . Handout news films, offered by industrial firms and running 3-5 min., are currently being used by more than 100 TV stations, *Printers' Ink* survey indicates . . . NTA Film Network gets another sponsor: Toni signs for partics in its series of 4 Shirley Temple movies to be televised on Sundays in 60 markets, sharing sponsorship with Ideal Toy Co. . . . It can't happen here: Britain's commercial TV reported no viewer complaints last week when it showed special 15-min. segment filmed in nudist colony.

Smash hit BBC-TV scientific spectacular, "This Restless Sphere," special program on International Geophysical Year narrated by Prince Philip, has been bagged by ABC-TV, which will present the filmed shown Sun. Oct. 20, 9-10 p.m. as salute to IGY and the royal couple's visit to U. S.

Transatlantic TV: When it comes—and it's "inevitable within the next few years"—it will be dictated by military necessity for coordinating radar information among the NATO countries. So said Wm. S. Halstead of Unitel Inc., in paper read at Philadelphia SMPTE convention by Ellis D'Arcy, Chicago consulting engineer and chairman of convention's symposium on international TV. Pointing out that transoceanic scatter microwave system is possible now, since greatest overwater hop between land masses in extreme North Atlantic area is 290-mi. between Iceland & Faeroe Islands, Halstead's paper said: "The most direct action toward the establishment in the near future of a wide-band telecommunication relay system across the Atlantic [probably] will come as a necessary extension of the existing wideband relay facilities that link the numerous radar stations now operated by cooperating military services of the nations in the NATO area."

Longest & deepest cable system underseas was placed in San Francisco-Honolulu telephone service Oct. 8 by AT&T and Hawaiian Telephone Co. following ceremonies in Treaty Room of Executive Office Bldg., Washington. Providing 36 voice circuits augmenting 14 existing radiotelephone circuits, new link was opened with 18,000-mi. call from Washington to Honolulu via London & Ketchikan, utilizing 3 deep-sea cables laid by AT&T in past year—transatlantic, Alaskan, Pacific. Amplifiers developed by Bell Labs and manufactured by Western Electric are built into 2 Pacific cables at 44-mi. intervals in 2400-mi. stretch, at depths to 3½ mi., from Point Arena, Cal., to Hanauma Bay, Oahu.

First TV-radio coverage of ceremonies opening Canadian Parliament will be provided by CBC Oct. 14 preceding Senate appearance by Queen Elizabeth II for "Speech from the Throne," which also will be carried live. CBC cameras & microphones will follow Parliament proceedings through election of Speaker of House of Commons.

British movie attendance has hit lowest figure in 7 years—as commercial TV celebrates second anniversary.

Anglo-U. S. TV Battle: "War" between Britain, U. S. & continental Europe over TV standards for middle east is described in front-page London-dated story in Oct. 8 *Wall Street Journal* which details important stakes of the 2 countries in terms of TV set and equipment sales. Key to battle is issue of U. S. 525-line vs. European 625-line standards. First mid-east TV station is Pye's 625-line Iraq govt.-owned 500-watt station at Baghdad, on air since May 1956. But in neighboring Iran, RCA is installing new station in Tehran, privately owned by group headed by RCA distributor Firooz Trading Co. Next step, according to article, is Iraq govt. decision on future TV expansion in proposed 3-year nationwide transmitter-building project. Govt. has not yet decided which standards it will officially embrace—but decision could materially affect future of middle east TV equipment market.

MBS showed profit—"small but significant"—in Sept., pres. Paul Roberts said Oct. 8 in special report to directors of new group which bought radio network from RKO Tele-radio Pictures Aug. 8 (Vol. 13:32). Roberts disclosed no figures publicly, but said he is "sure Mutual will continue, from now on, to be a profitable broadcasting activity." He saw "real turning point in the acceptance of network radio" by national advertisers, citing such recent MBS accounts as General Foods, P. Lorillard, GM, Chrysler, *Reader's Digest*, H. J. Heinz, Benrus. In first 10 months of 1956 MBS lost more than \$1,000,000.

First commercial TV in Peru—Radio El Sol—is scheduled to begin programming early next Jan., reports Ziv International chief Ed Stern, who adds that the station has placed orders for Spanish-language versions of 13 Ziv film series. Two govt.-owned stations—one with a 1957 target date—and several other commercial TV outlets reportedly are planned in Peru.

Biggest single program sale to Hong Kong's closed-circuit TV system was claimed this week by Screen Gems, which has sold five 30-min. series and one 15-min. musical series to Rediffusion Hong Kong.

New and Upcoming Stations: Oregon educational KOAC-TV, Corvallis (Ch. 7), began programming Oct. 7, following Oct. 1 test pattern debut. Non-commercial educational outlets now number 27 and total for all stations on air becomes 513 (91 uhf). KOAC-TV has 5-kw RCA transmitter, 200-ft. Fisher tower on Vineyard Hill, 6 mi. N. of Corvallis. Studios at Oregon State College, Corvallis, and at U of Oregon, Eugene, connect with transmitter via microwave. Glenn Starlin, chairman of Dept. of Speech, U of Oregon, is in charge of inter-institutional TV teaching; James M. Morris, from State College's KOAC, program mgr.; Grant Feikert, also KOAC and prof. of electrical engineering at Oregon State, chief engineer.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KTWX-TV, Sheridan, Wyo. (Ch. 9) has changed target to Jan. 15, reports Burt I. Harris, pres. of Harriscope Inc., also operator of KTWO-TV, Casper, Wyo. (Ch. 2). Sheridan outlet will operate initially as satellite of KTWO-TV, which plans move of tower to Casper Mt. and power boost to 28-kw by Dec. 1. KTWX-TV will use 30-ft. Ideco tower, hasn't ordered transmitter as yet. It will be sold as bonus to KTWO-TV. Rep is Meeker.

KRSD-TV, Rapid City, S. D. (Ch. 7) is installing 6-bay RCA antenna on 370-ft. Ideco tower, but hasn't set target, reports partner & gen. mgr. Eli Daniels, who with

John & Harry Daniels also holds CP for KDSJ-TV, Deadwood, S. D. (Ch. 5). Studio-transmitter bldg. on Skyline Dr. is 75% completed and 5-kw DuMont transmitter is scheduled for installation shortly. Network affiliation hasn't been signed; base hour not set; rep not chosen.

WFWC, Tampa-St. Petersburg (Ch. 3, educational) hasn't ordered equipment or begun construction, but hopes to be on the air early in Jan., reports Robert R. Guthrie, pres. of Florida West Coast Educational Television Inc.

KHUM-TV, Eureka, Cal. (Ch. 13) has ordered RCA equipment for Dec. delivery but hasn't set target, writes Russell K. Olsen, asst. mgr. of KVIP-TV, Redding, Cal. (Ch. 7), which has acquired 50% interest from former sole owner Carroll R. Hauser (Vol. 13:31). It will use 200-ft. self-supporting tower. Bids on studio-transmitter building are now being obtained. Rep will be Hollingbery.

KXAB-TV, Aberdeen, S. D. (Ch. 9) has changed target to Jan. 1, reports John W. Boler, whose North Dakota Bestg. Co. acquired CP from Joseph E. McNaughton interests (Vol. 13:25). Plans are to operate it in affiliation with his KXJB-TV, Valley City-Fargo, N. D. (Ch. 4). Make of transmitter not designated, Stainless tower to be used. Base hour will be \$150. Rep is Weed.

WGTW, Athens, Ga. (Ch. 8, educational) has decided to request new transmitter site and has cancelled Nov. start, reports Gerald L. Appy, assoc. director of communication services for grantee U of Georgia. It has ordered 25-kw RCA transmitter and 1000-ft. Stainless tower. Station will be part of \$2,500,000 Center for Continuing Education, where closed-circuit programming began last April 30.

Airspace Panel Actions: Approved proposals by TV applicants KSTT, Davenport, Ia. (Ch. 8) for 1000-ft. tower southeast of Cambridge, Ill.; Midland Bestg. Co., Moline, Ill. (Ch. 8), 1089-ft. 3.7 mi. south of Orion, Ill.; Central Minn. TV Co., Alexandria, Minn. (Ch. 7), 1133-ft. 3 mi. east of Westport, Minn. It also approved application by WSAU-TV, Wausau, Wis. (Ch. 7) for 609-ft. tower 3.2 mi. west of Wausau Municipal Airport. Panel rejected 3 proposals for new towers in Norfolk area: By WVEC-TV (Ch. 15) & WTOV-TV (Ch. 27) for 531-ft. tower near Kempsville, Va., and by applicant Norfolk-Newport News Bestg. Co. (Ch. 13) for 1033-ft. tower, recommending 380-ft. maximum height at proposed locations or 449-ft. in downtown Norfolk. It approved proposal by KLFY-TV, Lafayette, La. (Ch. 10) for 973-ft. tower at Church Point, La., but rejected 1000-ft. tower proposals (near Kaplan, La.) by Ch. 3 applicants Acadian Bestg. Co. & Evangeline TV Corp., suggesting they locate at Church Point or establish new farm where all Lafayette towers may be placed. It deferred consideration of proposed 977-ft. tower for KCSJ-TV, Pueblo, Colo. (Ch. 5) and 1061-ft. tower for applicant St. Anthony TV Corp., Houma, La. (Ch. 11) at request of applicants.

Translator starts: K75AE, Grangeville, Ida. began tests Oct. 1, repeating KLEW-TV, Lewiston, Ida. K76AE, La Grande, Ore. expects to start Nov. 10, repeating KXLY-TV, Spokane. W82AA, North Warren, Pa. began tests Oct. 6 repeating WBen-TV, Buffalo. K79AB & K82AD, Brownlee Trailer Court, Ore. began tests Oct. 8 repeating KBOI-TV & KIDO-TV, both Boise, Ida. K72AN, Durango, Colo. plans Nov. 1 start repeating KOB-TV, Albuquerque.

New CBS affiliate: WDTV, Durham, N. C. (Ch. 11), starting Oct. 2 as secondary affiliate, becomes primary affiliate next April.

New rep: WSIX-TV, Nashville, to H-R Television (from Hollingbery).

Reports of Radio Station Sales: WGAY, Silver Spring, Md., 35% owned by Joseph L. Brechner & wife for \$150,000 to associate John W. Kluge, increasing his interest to 100% . . . KYTE, Pocatello, Ida., by J. Ronald Bayton for \$60,000 to Thomas R. & Andrew H. Becker, who control KNPT, Newport, Ore. . . . WJOE, Ward Ridge, Fla. by Vacationland Bestg. Co. Inc. for \$40,000 to Rupert P. Werling.

Radio station sales approved by FCC this week: WRAD, Radford, Va. by Perry E. & Alice Gresham for \$95,000 to *Wooster (O.) Record* (Vol. 13:37) . . . KWLK, Longview, Wash. by Twin City Bestg. Corp. for \$65,000 to Triad Bestg. Co. (Vol. 13:31).

Rate increases: KOVR, Stockton, Oct. 1 raised base hour from \$650 to \$800, min. \$135 to \$190. KXJB-TV, Valley City, N. D. Oct. 1 added KCJB-TV, Minot, to combination already including KBMB-TV, Bismarck, and raised hour from \$500 to \$550, min. \$100 to \$125. WCNY-TV, Carthage-Watertown, N. Y. Sept. 30 raised hour \$200 to \$250, min. \$40 to \$50.

KGEO, Enid-Oklahoma City (Ch. 5) is being sold for \$2,500,000 by Streets Electronics Inc. (P. R. Banta, pres.) to L. E. Caster, Rockford, Ill. and Ashley L. Robison, owner of radio KOVO, Provo, Utah. Caster is pres. of WREX-TV, Rockford (Ch. 13), being sold for \$2,850,000 to Bob Hope and associates, including Robison as 15% stockholder (Vol. 13:40).

Sale of KVTW, Sioux City, Ia. (Ch. 9) with radio WNAX, Yankton, S. D. for some \$3,000,000 is being negotiated by Cowles interests to Peoples Broadcasting Corp. (Nationwide Mutual Insurance Co. subsidiary), operator of radio WGAR, Cleveland, O.; WRFD, Worthington, O.; WTTM, Trenton, N. J., and WMMN, Fairmont, W. Va.

RCA shipped 6-bay superturnstile 6-bay antenna Oct. 9 to WRC-TV, Washington (Ch. 4), moving to new site.

Homework Watching TV: Commercial TV can be educational TV, too, ABC-TV boasted this week. Network reported that 1,200,000 elementary & high school students from 31,500 classrooms in 68 areas of country are taking lessons regularly from *Bold Journey* Mon. 8:30-9 p.m., sponsored by Ralston Purina.

Students watch travel-adventure documentary film series as part of homework, follow up episodes in classroom studies of geography and social & physical sciences. Teachers use special program guidebooks prepared by committee of educators headed by pres. Dr. J. Cloyd Miller of N. M. Western College.

Instructional program was originated by v.p. Ernest J. Hodges of Guild, Bascom & Bonfigli, Ralston's agent. Participating teachers also are offered more than 30 educational travel grants in tours directed by National Educational Assn.'s travel service div.

In other educational TV developments this week:

NBC lined up Health, Education & Welfare Secy. Marion B. Folsom and Comr. Lawrence G. Derthick of U. S. Office of Education for broadcast statements Oct. 12 & 13 on o-&o stations starting network's 6-week "Know Your Schools" project.

John K. Weiss, v.p. & treas. of Fund for the Advancement of Education, told international seminar at Boston U (Vol. 13:40) that "American education on all levels of instruction may realize substantial savings in the future use of educational TV." He cited Penn State U survey which showed last term's TV classes in psychology, accounting, air science & sociology cost school \$52,000 vs. \$92,000 previously spent for conventional courses.

Student response to *Sunrise Semester* course in comparative literature on WCBS-TV, N. Y., has been so great (Vol. 13:39) that station & NYU will extend TV class another semester, starting late in Jan. Full college credit is given for course, first of kind in city.

Study-group discussion by delegates organized for "A Look at Ourselves" in such areas as "Professional Standards" and "Station Policies & Practice" will feature 33rd annual convention of National Assn. of Educational Broadcasters Oct. 29-Nov. 1 in Statler Hotel, St. Louis. Luncheon speaker Oct. 30 will be TASO exec. director George R. Town. NAEB also announced these deadlines for applications for educational TV scholarships under grant by Ford Foundation: For study prior to next June 1—Dec. 1. For 1958 summer study—April 1.

Originating point for 2 upcoming live closed-circuit color telecasts will be Washington's color-equipped Walter Reed Army Medical Center. First Walter Reed origination for outside reception will be series next week beamed to D. C. Medical Society's annual scientific assembly in Washington's Statler Hotel. Second use will be non-medical series beginning next week—at which Washington area high school teachers will view experimental instruction in "calculus in color," conducted by U of Md. This week's 50-min. session will be first of series of 26.

TV cameras were banned Oct. 7 from Indianapolis road scandal trial by Special Judge Walter Pritchard following objections to courtroom coverage by counsel for Nile Teverbaugh, ex-Indiana highway right-of-way director, one of 3 defendants accused of embezzlement in super-highway land purchase.

Satellite Week: "The week of the sputnik" was extremely significant for all phases of TV-radio-electronics. From networks' and telecasters' point of view, it was important opportunity to keep public informed with the kind of coverage TV & radio do best—and opportunity wasn't muffed. All networks presented special programs last week end—forums, background information and frequent news bulletins, and the "beep-beep" tone (later deteriorating to steady note) became TV-radio's top tune. Other significant angles: (1) RCA Communications' receiving station at Riverhead, N. Y. became semi-official U. S. monitoring headquarters for satellite, doing first extensive monitoring and computations of speed, course, etc.—in addition to supplying all networks with "beep-beep" recordings. (2) Tracking the sputnik became favorite pastime not only of hams but of everyone with short-wave receivers (including battery portables) which could pick up 20 or 40-mc bands. (3) Reports that sputnik was equipped with TV camera were quickly denied in Russia, but an INS dispatch stated that U. S. was now ready and waiting (for favorable winds) to shoot TV-equipped rocket to moon from 100,000-ft. high balloon launching platform. (4) Military experts were predicting U. S. would step up its missile program, with electronics industry the first to feel big boost. (5) Andrew G. Haley, well known as both a Washington TV-radio attorney and rocket expert, made headlines when he told International Astronautical Congress in Barcelona that he will ask Congress to appoint committee to define air space in anticipation of possible demands by other countries for unlimited sovereignty over space above their lands. He's also quoted as proposing to Congress that moon be declared "free and independent autonomous area" to prevent any country from claiming sovereignty over it.

"On the Air" research service for spot advertisers is being offered by KTWO-TV, Casper, Wyo., as part of regular sales package when they buy units of 20 announcements per month at regular rates. "Awareness" method developed for station by research director Dr. Saul Ben-Zeev of North Adv., Chicago, includes interviews with random sample of 200 persons on completion of 20 spots, "playback of copy points for the participating product and all of its competitors." Dr. Ben-Zeev says "method permits estimates of norms and allows diagnoses of irregularities in the development of public consciousness of a brand and its advertising image."

Broadcasters' Promotion Assn. has added seminars on merchandising and cooperation with agencies & syndicates to program for second annual convention Nov. 1-2 in Sheraton Hotel, Chicago (Vol. 13:37). Second-day session on "Merchandising—The Red Ink Invader or a Bugaboo?" will be moderated by adv.-sales promotion mgr. Paul I. Woodland of WGAL-TV & WGAL, Lancaster, Pa. Seminar on "Promotion Cooperation" will be led by sales promotion mgr. John Hurlbut of WFBM-TV & WFBM, Indianapolis.

Recommended standards and handling practices for monochrome and color film for TV were adopted last week end by Assn. of Cinema Labs (Reid H. Ray, pres.). Recommendations include camera area dimensions, review room projector apertures, set lighting techniques, control of negative and positive prints, etc.

Howard W. Blakeslee Award of American Heart Assn., for distinguished reporting in field of heart & circulatory diseases, has been presented to producers of *Robert Montgomery Presents* for "The Long Way Home" on NBC-TV.

Name change: Effective with Oct. 14 issue, *Broadcasting-Telecasting* reverts to original name of *Broadcasting*.

FCC Freeing WLWI, Indianapolis: Blocked from going on air, though waiting to throw switch, Crosley's WLWI, Indianapolis (Ch. 13) began to see daylight this week when FCC instructed staff to draft document denying various pleadings filed by applicants defeated by Crosley in hearing. When finalized, action presumably will be followed by modification of CP and program-test authorization permitting start—probably in week or 2.

In Albany, WCDA (Ch. 41) still holds FCC permission to switch temporarily to new Ch. 10, Court of Appeals denying stay sought by WVET-TV, Rochester (Ch. 10), also an applicant for the Albany channel. Also in Court of Appeals, WKAT, Miami, filed additional pleadings attacking grant of WPST-TV (Ch. 10).

In Elko, Nev., Donald W. Reynolds' Nevada Radio-TV Inc. now holds initial decision for Ch. 10, following drop-out of competitor KELK. In Eureka, Cal., KHUM-TV was granted change from Ch. 13 to Ch. 6, 4 to 14.8 kw, minus 70 to plus 460 ft.

In Scottsbluff, Neb., KSTF (Ch. 10) received increase from 11.5 to 240 kw, 240 to 840 ft., after telling Commission it would withdraw application for Ch. 13, Alliance,

RCA-Ampex Agreement: Prospects for compatibility of all future makes of video tape recording and playback equipment appeared to be enhanced at week's end with brief skeleton announcement that RCA and Ampex Corp. had signed "agreement for exchange of patent licenses covering video tape recording and reproducing systems for both black-&-white and color."

Very few details were available—nothing at all on terms of agreement. But there were indications that agreement may remove spectre of video tape mechanisms using different width tapes and running at different speeds. RCA officials declined to comment when asked whether they intend to enter commercial TV recorder production soon.

From standpoint of TV technology, agreement is historic in that 2 of leaders in video tape research—Ampex in monochrome and RCA in color—apparently have agreed that each has something to offer the other. From telecaster's viewpoint, deal can do nothing but hasten advent of practical, reliable tape for color and monochrome.

A top RCA official explained patent deal this way: "We can't proceed unless we have freedom to work. This clears the air for both companies—we can both work on our own approaches to tape without getting in each other's hair patent-wise."

Philco appealed to D. C. Court of Appeals Oct. 9 to overturn FCC ruling rejecting its bitter protest against renewal of license of NBC's WRCV-TV & WRCV, Philadelphia (Vol. 13:37). Philco contends that Commission (1) was mistaken in denying that Philco had no standing as party of interest in license case, (2) wrongly held that FCC had no jurisdictional interest in Philco's \$150,000,000 anti-trust case against RCA.

FCC's mobile TV station measuring equipment is described by engineer Raymond L. Day in Oct. 1 *Electronics*.

Neb. Sole new CP granted was for a Ch. 82 translator in Rock Springs, Wyo.

Commission got after couple of CP-holders—telling Wrather-Alvarez to ask for hearing on more time to build its KYAT, Yuma (Ch. 13) or lose CP; designated for hearing application of Chinook TV to reinstate its Ch. 23 CP in Yakima.

Commission finalized substantial uhf channel-shifting to permit WSJV, Elkhart, Ind. to shift from Ch. 52 to Ch. 28, WSBT-TV, South Bend, from Ch. 34 to Ch. 22.

WWLP, Springfield, Mass. (Ch. 22) filed petition seeking substitution of Ch. 15 for Ch. 75 in Concord, N. H.; in addition, it sought extensive changes in Mass., Me., Vt. & N. H. to permit addition of translators. Cascade Bcstg. Co., operator of KIMA-TV, Yakima (Ch. 29) and KEPR-TV, Pasco (Ch. 19), asked substitution of Ch. 22, 44 & 50 for Ch. 5, 8 & 22 in Walla Walla. [For details of changes finalized or sought, see *TV Addenda 25-K* herewith.]

Vhf booster rules proposed by FCC are too tough, (Vol. 13:32), Wash. State TV Reflector Assn. told Commission this week, asking amendment of Sec. 4.935 of rules as follows: "A low power TV broadcast repeater station will not be authorized to operate with a power in excess of that required to produce a field of 5 millivolts/meter in 75% of the area to be served . . ."

McConaughy Raps Controls: "Lot of inane prattle" has been "going on in Washington about regulating broadcasting," former FCC Chairman George C. McConaughy told Ohio Municipal League conference in Dayton, urging delegates to help keep field from "destructive federal control." In first reported speech since he left Commission June 30 (Vol. 13:26) McConaughy said that public—not Govt.—should censor programming, that he's "unalterably opposed to censorship or any other kind of govt. control over programming or over the thoughts of free men, provided the operation as a whole is conducted in the public interest." He said he prefers "weaknesses" of U. S. system—"too many commercials, switch & bait, giveaway programs and commercialization"—to any govt.-controlled operations he's seen abroad.

"Color V" product sold by Superior Products, 673 Broadway, N. Y., has been misrepresented as providing same visual effect as color TV, FTC examiner Loren H. Laughlin ruled Oct. 8 in ordering Harry G. Kriegel to stop making false advertising claims for plastic sheet (Vol. 13:16). Kriegel did not appear at hearing in case but in answer to FTC complaint said he didn't own company, that sale of product was discontinued June 1, 1956 (Vol. 13:35).

Photographs of equipment for which FCC type acceptance is sought would be required in proposed new Commission rule amending Sec. 2.523 (b) of regulations. Notice of amendment (Docket 12212) says it is intended only for acceptance applicants whose instruction books or manuals don't include photographs. Comments may be filed by Dec. 1.

New 8 rpm record has been developed by CBS Labs for use by the blind, pres. Peter Goldmark told Audio Engineering Society, hinting that new disc might also have other more commercial applications. He said 7-in. diameter record will play for 4 hours, 12-in. about 10 hours, and stated surface noise is 7db less than 33 rpm record.

United Artists Corp. joins other movie producers in establishing own music firms, setting up United Artists Records Corp. and United Artists Music Corp., both headed by v.p. Max E. Youngstein of parent company.

SEPT. SALES AND FULL-YEAR OUTLOOK: Industry generally regards Sept. as a key month, a useful index in gauging the all-important 4th quarter sales. Vital retail sales figures for month aren't in yet, but preliminary factory sales are -- and they show some drop from year ago -- 875,000 vs. 1,020,000 in Sept. 1956. Total factory sales for year reached 4,500,000 end of Sept., compared with 5,250,000 last year.

Sept. looked good to most top producers, according to check of cross-section we conducted this week. Here are their sizeups:

Robert A. Seidel, RCA exec. v.p.-consumer products: Sept. sales seem to be "firming up quite a little bit -- at least in our end of it." It may be, he said, that RCA "is gaining in percentage of industry sales."

His reports indicate, Seidel elaborated, that Sept. business "held up relatively well -- much better than in Aug." He said week before last was very good and "if last week was as good, we'll be off to the races."

Activity in color evoked bubbling enthusiasm from Seidel who said that since RCA's 2-hour closed-circuit color show Sept. 4 (Vol. 13:36) this phase of business "has taken quite a spurt...it's gone up to beat hell."

Admiral pres. Ross Siragusa told us his Sept. business "in dollars equals or exceeds last year," although unit volume is down. He went on to say that "the mix has changed, we're selling more high end consoles and combinations, fewer portables -- and profits will be better."

Siragusa also noted tremendous drop the industry has suffered in Canada, but "Admiral sales in Canada are considerably ahead, in both units and dollars."

* * * *

Motorola's Edward R. Taylor, exec. v.p.-consumer products, put his views of Sept. market this way: "I feel pretty encouraged, although I don't have any figures on hand yet" to back up the feeling. Motorola executives, he said, have just finished a round of 14 regional meetings with distributors and "in almost every case they felt pretty good about what was coming up. By and large, I'm convinced things are moving in the TV market and we've had an excellent Sept. in hi-fi."

John M. Otter, Philco exec. v.p. for marketing, said "our TV sales in Sept. were better than last year" and the same is true for first 9 months, compared with 1956. He described TV-radio sales in 3rd quarter as "very good, excellent -- and hi-fi is selling like a house afire -- far ahead of 1956."

Philco "Slender Seventeen" played big part in good sales showing, Otter declared, adding that they've had to put an extra production line on the model and "still can't make enough of them."

Incidentally, a Philco spokesman told us firm's 3rd quarter profits -- which haven't been announced yet -- "are up over last year" when earnings were \$240,000 (4¢ per share) on sales of \$87,460,000.

Robert L. Shaw, gen. sales mgr., Sylvania TV-radio div., called Sept. a "good month," roughly twice as good as last Sept., although final figures are not in yet. He said "our sales growth is following a pattern which has prevailed since the first of the year."

GE—On Production, Price, Color: Visiting Syracuse this week, when GE turned out its 1,000,000th TV portable since production on it started May 1955, we obtained top officials' views on GE and industry TV activities.

Herbert Riegelman, gen. mgr. of TV receiver dept., explained that dropping of night shift (Vol. 13:38) was simply result of careful analysis of sales prospects

for final quarter. He emphasized GE's efforts to minimize impact on employes. Night shift had 700, whereas day shift has 3300.

Any price cuts in sight? Riegelman sees none. Then, we asked: "You don't think there will be any price increases?" His reply: "I wouldn't say that." And he pointed to higher wages and material costs.

GE's color position, as given by marketing mgr. Jack S. Beldon: Color is here. GE has a good set. We'd be delighted to see it go over. We know of no engineering advance likely to cut color costs. Real mass production, say 200,000 sets per year by one company -- would produce real price reductions.

Riegelman said he had felt consumers would pay about \$100 premium for color over black-&-white but now wonders whether even this figure is too high.

Beldon reviewed current black-&-white sales, said that a very important facet is dealers' emphasis on advances in new lines -- slim design, automatic tuning, etc. -- that "price alone shouldn't be the main point of sales emphasis."

GE's over-all corporation policy is that each division must make a profit, stand on its own feet. Thus, each division head is like a corporation president, reporting to stockholders. Greatly decentralized under pres. Ralph Cordiner, each division acts quite independently, can't lean on others.

Production: TV output was 167,605 week ended Oct. 4, compared with 180,725 preceding week and 215,480 in corresponding week one year ago. It was year's 40th week and brought TV production for year to date to about 4,769,000, compared with 5,464,467 in same period of 1956. Radio production was 356,748 (114,402 auto) week ended Oct. 4, vs. 380,732 (105,895) preceding week and 307,865 (113,594) in corresponding week year ago. Radio output for 40 weeks totaled about 10,731,000 (3,952,000) vs. 9,873,114 (3,197,048) in 1956 period.

Trade Personals: Robert J. Theis promoted to merchandising mgr., Philco TV div.; George Strotmeyer succeeds him as regional mgr., Allegheny region; Bruce Lambert named regional mgr., Atlantic region . . . Merrill L. Bengtson, Hufford Corp. pres., named director of parent Siegler Corp. which recently merged with Unitronics Corp. (Olympic Radio & TV) . . . George I. Long Jr., Ampex pres., named a director of ORRadio . . . Donald T. Lucas appointed mgr., Raytheon receiving tube sales; Paul R. Keeler, mgr., govt. relations; C. W. Duncan, sales engineer of receiving & picture tubes, transistors and semiconductor diodes . . . Harold G. Towlson promoted to engineering mgr., GE technical products dept. . . Martin I. Stoller, ex-Young & Rubicam adv., appointed marketing mgr., Fairchild Recording Equipment Co. . . Robert A. Donner, ex-Bruno-New York, named adv. & sales promotion mgr., Herold Radio & Electronics Corp.'s Steelman phonograph and Roland radio divs. . . E. L. Bragdon promoted to RCA trade press editor, N. Y.; B. I. French Jr. to coordinator, editorial and press services, Cherry Hill, N. J. . . Dr. Raymond L. Garman elected General Precision Equipment v.p.-engineering & research; Wladimir A. Reichel resigns as senior v.p.-engineering.

Dr. W. R. G. Baker, GE v.p. and EIA pres., retires from GE Nov. 30 at mandatory retirement age of 65. Recovering from stroke at St. Joseph's Hospital, Syracuse, he's been active despite some paralysis—working from office established next to his room, conferring regularly with associates.

Tribute to Dr. Irving Langmuir, Nobel Prize winner and world famous GE scientist who died Aug. 16 (Vol. 13:34), is contained in 8-page booklet from GE Research Lab, Schenectady. It includes excerpt from N. Y. Times editorial, encomiums from friends and associates.

DISTRIBUTOR NOTES: Sylvania appoints Traynor-Dean Appliances Inc., 107 N. 11th St., Tampa, Fla. (Frank M. Traynor, pres.) for TV-radio-hi-fi in 19 Fla. counties . . . Tri-State Distributing Corp. (Philco), Cincinnati, names Richard Brenner gen. sales mgr., replacing Robert Murrell, resigned . . . Yancey Co. Inc. (RCA), Atlanta, names Tommie Preacher field sales mgr. . . Trav-Ler appoints Tecca Distributing Co., Cleveland, for TV-radio-hi-fi in territory including N. Ohio formerly serviced by Trav-Ler factory branch in Cleveland . . . DuMont appoints Ft. Orange Radio Distributing Co., 904-16 Broadway, Albany, N. Y. (David L. Marks, secy. & gen. mgr.) for TV-hi-fi . . . Stuart Falk, ex-Philco, opens mfrs. rep. firm, representing Capehart Corp. hi-fi, with temporary offices at 17611 Van Aken Blvd., Cleveland . . . Stuart F. Louchheim Co. (Zenith), Philadelphia, appoints Robert J. Boyle, ex-Raymond Rosen (RCA), Philadelphia, as adv. mgr.

Audio Engineering Society elects pres. Sherman M. Fairchild of Fairchild Recording Equipment Co. as pres., succeeding Walter O. Stanton of Pickering & Co. Other officers named: Donald J. Plunkett, Capitol Records, exec. v.p.; H. E. Roys, RCA Victor, central v.p.; Herbert E. Farmer, U of Southern Cal., western v.p.; C. J. LeBel, Audio Instrument Co., secy.; Ralph Schlegel, RKO.

Engineers were challenged by Motorola pres. Robert W. Galvin to assume broad responsibilities as dominant "taste makers" of American society. He told Oct. 7 meeting of AIEE in Chicago that some day a man of science would be elected president of U. S. but he cautioned engineers not to measure all relationships and values with an inflexible scientific slide rule.

Frank A. D. Andrea, Andrea Radio Corp. pres., named chairman of Radio & Television Mfrs. div., Muscular Dystrophy Assn. of America.

Service Problems: Servicing travails of U. S. householder, TV repairs costing nearly \$2 billion of last year's \$16.6 billion bill, are pinpointed in cover story of Oct. 14 *Time* which is bound to stir up considerable controversy in industry.

"Horrible examples" listed include Los Angeles man who was billed \$162.40 for several month's effort to fix 21-in. TV set which he said didn't work any better when repairs were finished. In another case, a Washington homeowner said: "I've gotten to the point where I'm terrified to call the TV serviceman. I'd rather kick the set down the cellar steps than pay a bill for \$70."

Service problem, says magazine, is aggravated by modern technology which fills demand for bigger and better gadgets, with TV set becoming as complicated as an electric brain. "Actually," article states, "the great majority of repairmen are honest enough. The difficulty is that no one can tell the good from the bad—so many are merely incompetent."

NARDA exec. v.p. A. W. Bernsohn is quoted in article as saying: "Never in the history of the appliance industry have we had a time when so much faulty merchandise was being received." Story cites NARDA survey to show appliance dealer loses money on service and adds that independents do little better.

Future will see, *Time* predicts, color TV, appliances, etc. with plug-in units that will be returned to factory for repair.

Factory sales of transistors in first 8 months of 1957 were 15,611,300, worth \$42,063,000, reports EIA, compared with 6,958,000, valued at \$19,717,000 in similar 1956 period. Aug. sales were 2,709,000, worth \$6,598,000, vs. 1,315,000 at \$3,660,000 in Aug. 1956. EIA's monthly breakdown:

	1957 Sales (units)	1957 Sales (dollars)	1956 Sales (units)
January	1,436,000	\$ 4,119,000	572,000
February	1,785,300	5,172,000	618,000
March	1,904,000	5,321,000	708,000
April	1,774,000	4,880,000	832,000
May	2,055,000	5,636,000	898,000
June	2,245,000	6,121,000	1,130,000
July	1,703,000	4,216,000	885,000
August	2,709,000	6,598,000	1,315,000
TOTAL	15,611,300	\$42,063,000	6,958,000

Sixty-second check of portable TV without taking set from shipping carton is made possible by slots in new Admiral carton. Pressing in knife-cut section permits (1) connecting power cord and antenna, (2) setting on-off switch and controls, (3) inspecting picture.

Firming up of TV market around Christmas is prediction of A. W. Zelomek, Fairchild Publications economist, in Oct. 7 *Home Furnishings Daily*. He adds that this "will be the start of an improved level of TV set business which should continue through the first half of 1958."

Hi-fi components volume of \$200,000,000 in 1957, a 25% increase from 1956, was predicted by Edwin Cornfield, exec. secy., Institute of High Fidelity Mfrs., at 2nd annual hi-fi show this week in N. Y.

Emerson introduces 21-in. deluxe modern console TV in blond and mahogany at \$238-\$258 and 2 hi-fi consoles at \$168-\$188 and \$198-\$218.

Trav-Ler increases TV price 5-10% effective Oct. 15—portables excluded.

Tube Sales Reports: Picture tube sales by manufacturers totaled 930,296, valued at \$17,984,185, for Aug., nearly double July's 491,935 but still less than the 1,099,605 sold in July 1956, reports EIA. Total sales for 8 months were 6,236,890, worth \$114,806,802, compared with 6,837,728, valued at \$125,286,416, in similar 8 months of 1956. Receiving tube sales for 8 months were 297,281,000, worth \$252,389,000, vs. 303,004,000 at \$244,144,000 during similar period last year. EIA's monthly breakdown:

	Picture Tubes		Receiving Tubes	
	Units	Value	Units	Value
January	760,860	\$ 13,594,525	37,571,000	\$ 31,170,000
February	728,363	13,134,778	44,460,000	36,631,000
March	833,257	14,850,847	43,010,000	37,007,000
April	629,838	11,394,043	27,970,000	25,384,000
May	758,328	14,031,519	32,836,000	28,955,000
June	1,104,013	19,981,319	35,328,000	31,314,000
July	491,935	9,835,586	33,077,000	27,042,000
August	930,296	17,984,185	43,029,000	34,886,000
TOTAL	6,236,890	\$114,806,802	297,281,000	\$252,389,000

"Philco-Day USA," annual Philco sale promotion Oct. 7, resulted in TV distributor sales to dealers of more than \$6,000,000 at retail value, reports Henry E. Bowes, v.p. and gen. mgr. of TV div. Describing the sales as "successful," Bowes listed the day's TV sales as 10,000 greater than last year. TV sales mgr. Gibson B. Kennedy emphasized "there were no cut prices—this was not a clearance sale—all sales were at regular prices." Philco introduced 21-in. console for promotion at \$240 and Kennedy said over 8000 were sold and set will be continued as part of regular line.

New "field accelerated" class of transistors developed by Philco is capable of operating through entire vhf and part of uhf spectrum. Called MADT (Micro Alloy Diffused-base Transistors), they are currently in production, are said to open new fields of advanced electronic equipment to transistorization. Philco says they operate at switching speeds comparable to speed of light.

Dealers' outlook for balance of 1957 "promises no improvement," NARDA chairman H. B. Price Jr. told Oct. 6 NARDA southern regional meeting at Macon, Ga. and warned that "1958 may well bring further contraction of our market." Ellie Grumiaux, adv. mgr. of Price's Inc., Norfolk, called TV advertising "expensive, difficult to use, but the most powerful medium."

Dismissal of FTC price discrimination charge against Hamburg Bros., RCA distributor in Pittsburgh, has been urged by examiner Joseph Callaway who held company's pricing practices "were justified in all significant respects" (Vol. 13:6, 34). Examiner's order may be stayed, appealed or reviewed, but issuance was not opposed by FTC counsel and routine commission approval will follow.

"Control Master," Packard-Bell's remote control unit with self-contained speaker, illuminated channel selector, on-off switch, controls for volume, brightness and fine tuning, is described by pres. Robert S. Bell as "... a revolutionary development that television manufacturers have been striving to achieve for many years." Sound may be switched back and forth between set and remote speaker.

RCA raises entertainment tube prices average of 6%, effective Nov. 1, on 272 types, or 85% of those shipped to distributor market—no increase on picture tubes indicated. A Sylvania spokesman said similar price boosts for receiving tubes will be effective Nov. 5.

Sylvania produced its 15,000,000th picture tube this week—24-in. aluminized, 110-degree—at Seneca Falls, N. Y. plant.

RCA is bringing out 14-in. table model with built-in 45 rpm phono. "Bellevue" uses short 90-degree tube, is \$239 in mahogany or oak.

Financial Notes: Record Motorola sales for first 9 months of 1957, topping previous high of \$162,689,182 in 1956, are expected by pres. Robert W. Galvin who outlined company financial picture in Oct. 10 speech to Investment Analysts Society of Chicago.

Galvin said final third quarters figures aren't available but he reported sales were over \$60,000,000, compared with \$60,887,948 in similar 1956 period. Net profits, he added, were about \$1,900,000 (about \$1 per share) in this year's third quarter, compared with \$1,751,757 (91¢) in similar quarter last year.

Going on to the fourth quarter, Galvin forecast Motorola would have a moderate increase in both sales and earnings, compared with 1956 when sales were \$64,872,986, earnings \$3,147,853 (\$1.63). He predicted total 1957 sales of approximately \$235,000,000, earnings of \$8,500,000, vs. \$227,562,168 sales and \$7,966,817 earnings last year.

Galvin listed 9-month sales gains for two-way radio communications, microwave relay systems,

transistors, car radios, phonographs. Home radios and military electronics, he said, were about even, while TV is slightly below 1956.

Other highlights of Galvin's talk:

(1) **Color**—Big problem is no one knows how to make color set for \$300-\$400.

(2) **Hi-fi**—Motorola business is up 50-75% in each of last 2 years.

(3) **Auto radio**—Motorola auto radios account for "tens of millions of dollars," show small profit, but require comparatively little investment.

(4) **Two-way radio**—between 60-65% of 2-way radios made in country come from Motorola; he sees company volume increasing 10% in 1957.

(5) **Military electronics**—Company will do \$50,000,000 volume this year and he intends to hold it at 20% of total business.

(6) **Semiconductors**—Break-even point this year, then profits.

(7) **New capital investment**—Motorola had \$8,000,000 in 1956; level dropping to \$5,000,000 in both 1957 & 1958.

(8) **110-degree tube**—To be used more or less universally but currently affected by high cost and service problems.

Electronics Personals: John F. McAllister Jr. promoted to gen. mgr., GE electronic components div. power tube dept., succeeding Robert O. Bullard who has been appointed mgr. of an engineering study project in the electronic components div.; McAllister has been mgr. of engineering, TV receiver dept. . . . David D. Coffin, mgr. of Raytheon missile systems div., and Dr. Thomas H. Johnson, mgr., research div., elected v.p.'s . . . Robert F. Bender, IT&T exec. v.p., named a director . . . George J. Eannarino, ex-Sarkes Tarzian Inc., elected Audio Devices rectifier div. v.p. . . . Rolland V. Robison promoted to product mgr.-semiconductor sales, Sylvania semiconductor div. . . . George M. Russell, ex-RCA Service Co., named liaison engineer in Packard-Bell Electronics' Washington office . . . George S. Kertson, ex-West Coast Telephone Co., appointed Wash.-Alaska sales rep., Stromberg-Carlson telecommunication div.; he replaces Charles E. Fogg, transferred to national telecommunications sales engineering staff, Rochester . . . Robert A. Bailey, ex-Engineered Electronic Co. v.p., appointed Norden-Ketay western div. marketing mgr. . . . Wm. M. Cagney, ex-Pye Corp. of America, appointed eastern regional sales mgr., DuMont 2-way radio communications systems . . . Capt. Gould Hunter (USN ret.) promoted to administrative asst. to Eitel-McCullough pres. W. W. Eitel and exec. v.p. J. A. McCullough . . . Wm. T. Dickinson promoted to research & development engineering dir., Jansky & Bailey, Washington . . . J. T. Houlihan promoted to mgr., merchandising-entertainment tubes, RCA electron tube div.'s distributor products merchandising; Joseph E. Kelley, mgr., merchandising-industrial tubes & semiconductors; Joseph J. Kearney, mgr., merchandising-parts & equipment; Gerald G. Griffin, mgr., merchandising coordination.

Hewlett-Packard Co., Palo Alto, Cal. manufacturer of precision electronic measuring equipment, filed registration with SEC Oct. 9 (File 2-13667) for 350,000 shares of \$1 par capital stock, 300,000 to be purchased by underwriters, headed by Blyth & Co. Inc., for resale to public. Balance will be subject to restricted options granted to employees. Shares are being sold to underwriters by pres. David Packard and exec. v.p. Wm. R. Hewlett, each 50% owner.

Litton Industries earned \$1,806,492 (\$1.51 per share) on sales of \$28,130,603 for year ended July 31, compared with \$1,019,703 (97¢) on sales of \$14,920,050 in preceding year. Pres. Charles B. Thornton said firm had \$54,000,000 backlog at end of July, operates at 12 plant locations, has over 3000 employees. Litton also concluded agreement to acquire Aircraft Radio Corp., Boonton, N. J. through exchange of 0.6 of a share of Litton common stock for each ARC share or 0.23 of a share of Litton 5% cumulative preferred for each ARC share, subject to stockholder approval. Thornton said ARC would operate as Litton subsidiary and there would be no change in officers or policy. ARC sales for 1957 are expected to reach \$10,000,000, ARC pres. W. F. Cassidy Jr. says, while indicated first half earnings are \$380,000 on sales of \$5,357,630.

Pacific Mercury, which makes Silvertone label TV sets for Sears, Roebuck, earned record \$557,754 (80¢ per share) on sales of \$20,001,656 in year ended June 30 vs. \$482,752 (69¢) in preceding 15 months, after which close of fiscal period was changed from March to June. "Prospects for the current year appear bright," said pres. Joseph Benaron, anticipating that rate of TV set sales will equal last year's and that company, which also produces electronic organs and electrical components, will increase volume of other products. "With a stable demand for TV sets, coupled with the potential for its other products, fiscal 1958 should prove another record year," Benaron said.

Teleprompter Corp.'s semi-annual report to stockholders this week cites gross income of \$1,177,845 for the 6 mo. ended June 30 and net loss of \$119,485—latter caused by "extraordinary expenses of establishing new and enlarged facilities for our branch offices . . . non-recurring charges resulting from expansion of our basic line of products and services [notably closed circuit] and other moves toward greater future growth and expansion." In 1956 Teleprompter grossed \$804,191, netted \$76,422; in 1955, \$420,435 & \$34,081.

Vioreen Instrument Co., Cleveland, filed registration with SEC Oct. 9 (File 2-13665) for \$1,000,000 of 6% convertible subordinated debentures, due Nov. 15, 1967, for subscription by stockholders at rate of \$100 for each 100 common shares. Underwriter is Saunders, Stiver & Co.

Flat, Transparent Tube: Kaiser flat picture tube with transparent phosphor is currently being tested on military aircraft, Chief of Naval Research Rear Adm. Rawson Bennett told National Security Industrial Assn. in Washington this week. He explained need for transparent flat tube which could be placed in windshield of plane, so that pilot could see through it in clear weather, see instrument and radar data in bad weather. Though scientists said neither flat tube nor transparent phosphors could be made, Adm. Bennett said, "today we have both, and they work." He added: "The reward that the general public will get for our stubbornness is a revolutionary new type of commercial TV tube." Also this week, delegates to SMPTE convention in Philadelphia heard 3 papers on flat transparent tube by those who developed it: Office of Naval Research's Cmdr. George W. Hoover, Kaiser Aircraft & Electronics' Ross Aiken (inventor of flat tube) and Naval Research Lab's Dr. Charles Feldman (inventor of the transparent phosphor used in tube).

First FTC ruling that cigarette smoking is harmful per se was made Oct. 10 in initial decision by examiner Wm. L. Pack prohibiting Liggett & Myers from advertising that Chesterfields will have no adverse effect on nose, throat, etc. Decision in 1953 false-claims case held that "it is highly significant" that no medical or scientific testimony by govt. or company witnesses maintained that "cigarette smoke is harmless—that an individual may smoke with impunity." Examiner recommended, however, that FTC dismiss charges that Liggett & Myers falsely claimed that Chesterfields are "milder," "soothing & relaxing" and leave no "unpleasant after-taste." Company said it may appeal adverse findings.

Automation is boon—not bane—to U. S. economy and free world, RCA chairman Brig. Gen. David Sarnoff said in "As Business Leaders See It" column in Oct. 11 *Journal of Commerce*. Instead of causing unemployment, as some fear, automation promises "higher standard of living and a better & happier life," Sarnoff said. He compared electronic advances in field with early progress in radio, talking pictures and TV—"developments that were significantly new & progressive" but which also were met by "violent reactions."

TV's east-to-west migration became campaign issue in New York this week, as GOP candidate for City Controller State Sen. Walter McGahan charged "New York City will become only a relay broadcasting station in the nation's mammoth TV industry" if Mayor Wagner is reelected. He blamed Wagner administration for losing to the city "millions of dollars now being spent annually in Hollywood for equipment, supplies and salaries."

Single application filed this week with FCC was for translator in LaBarge-Big Piney, Wyo. by local group headed by George D. Eubank. This brings total to 118 (34 uhf) for stations, 41 for translators. [For details see *TV Addenda 25-K* herewith.]

Sylvania TV Awards for 1957 will be presented Jan. 16 at banquet in Plaza Hotel, N. Y. Date has been changed from early Dec. to include entire year in Awards period.

Probes Annoy CBC, Too: Future of TV in Canada is hard to predict, CBC chairman Davidson Dunton told Toronto Rotary Club in speech complaining that "recurring cycles" of investigations of govt.-controlled system by Royal Commissions (Vol. 13:28) and Parliament put broadcasters in continuing state of "uncertainty." He expressed hope that new policy, financing & operating "decisions following one Royal Commission report are made before another Commission looms up on the horizon." But Dunton said CBC is determined "to push ahead with the job, to do the best possible with the means & mandate immediately at hand." He pointed out that in 5 years Canadian TV growth "has been relatively faster than in any other country in the world," making national program service available to 85% of population from 40 stations—8 owned by CBC, 32 by private interests.

WDAY-TV equal-time libel suit appeal by Farmers Union has been taken under advisement by North Dakota Supreme Court (Vol. 13:32, 35, 40). Lower court had ruled in favor of Fargo station which admitted telecast by minor party candidate was libelous but that station was prevented from stopping it because of FCC equal-time regulation. Appeals court decision isn't expected for several months, is sure to be appealed to U. S. Supreme Court.

New microwave across St. Lawrence River in 98-mi. 4-hop system linking Quebec City & Montreal with Jonquiere was placed in operation for Canadian National Telegraph by Philco this week—without field tests or equipment alignment. System was switched on prematurely at CBC's request to relay world series baseball games to CKRS-TV, Jonquiere. Reception was reported excellent.

Libel suit for \$2,000,000 has been filed by ex-police chief C. B. Horrall of Los Angeles against Mickey Cohen, alleging damages from statements by ex-gambler on *Mike Wallace Interviews* show May 19 on ABC-TV. Also named in Los Angeles court action are Mike Wallace, network & others. It was third big libel suit resulting from telecast (Vol. 13:28).

New closed-circuit idea: Trustees of Springfield, O. Municipal Hospital approved closed-circuit system for use of patients who will be able to watch services in hospital's first-floor chapel. Patients will pay \$1 a day for set rental, hospital receiving 25¢ and Telesound Inc. of Philadelphia the rest.

Trade paper ads for Storer Bestg. Co., designed by adv. & sales promotion v.p. Art Schofield, have won top award in their classification in Greater Miami Art Directors' Club competition for third successive year.

Copies of Network Report

We still have some extra copies of our printed Special Report of Oct. 5, distributed as a Supplement with *Television Digest* of that date, carrying full text of the summary and recommendations of the "FCC Staff Report on Network Broadcasting" (Barrow Report)—and subscribers may obtain them at \$2 each, 10 copies \$12.50, 25 copies \$20.

SUMMARY-INDEX OF THIS WEEK'S NEWS—October 19, 1957

PAY-TV TEST conditions, as outlined by FCC, seen as step toward toll system, but not conclusive. Congress still in the picture (pp. 1 & 7).

BARTLESVILLE CABLE MOVIES: Slow start? "Not at all," says operator Griffing, pointing to 550 subscribers plus 2-5 new viewers daily (p. 2).

RCA'S PATENT LICENSE changes expected to be basic & far-reaching; seen depending on outcome of current discussions with Justice Dept. (p. 3).

"THIN TV TUBE" discounted by manufacturers as item for near future, though Kaiser insists "only refinements of glass" are needed (p. 3).

EDUCATORS GET NOD over commercial interests in Puerto Rico initial decision (p. 8). Another uhf leaves air—WJHP-TV, Jacksonville, Fla. (p. 9).

1957 RETAIL SALES of TV seen totaling 6,750,000 sets, shade under 1956; inventory position safe. Picture tube prices increase (p. 10).

DISCOUNT HOUSES here to stay, says N. Y. ad firm, urging manufacturers to learn to profit from this "new dynamic retailer" (p. 11).

"FAIR TRADE" SUFFERS another blow as high court upholds right of out-of-state retailers to sell at low prices in fair-trade states (p. 12).

GE STAYS ON TOP of electronics field in Pentagon list of 100 biggest defense contractors; Boeing replaces GM as overall No. 1 company (p. 12).

TV-EQUIPPED SATELLITE is Air Force project, aviation magazine says, identifying CBS as "probable" participant; Westinghouse films sputnik (p. 14).

ONE TOLL TV SKIRMISH ENDS, MORE TO COME: Another step toward telecast pay TV—not the final word by any means—but certainly a move in the direction of tollcasting. That sums up FCC's "First Report" on subscription TV—a document setting up conditions for testing subscription TV and inviting stations to apply for permission to conduct tests.

There was little official industry reaction by week's end, as principals mulled over document, consulted their attorneys. There's no question, however, that pay TV proponents regard FCC action as something considerably better than nothing, despite very severe restraints—while opponents must acknowledge that they wish that Commission had shelved whole affair.

Situation remains wide open for Congress to nullify Commission move, and FCC gave Congress ample time to make wishes clear—by stating it wouldn't act on applications before March 1958. And extremely influential Congressmen, such as Celler (D-N. Y.) and Harris (D-Ark.), have made no bones about intention to take ball away from Commission—if possible. And, of course, Commission itself took pains to emphasize that authorization of tests is by no means a guarantee that permanent tollcasting will be permitted when tests end.

Commission's 38-page document does these things: (1) Tells why FCC has legal authority to approve pay TV if it's in the public interest. (2) States that it can't tell whether pay TV is in public interest until tests are made. (3) Sets up conditions for tests, after which a public hearing will be held to assay results. (For conditions of tests, see p. 7).

Only Zenith announced its reaction. It stated that FCC action means that pay TV will start in "reasonably near future;" that it (Zenith) is now considering numerous applications from TV stations; that move eliminates need for Congressional action; that telecast pay TV can obviate possibility "high-

cost wire systems might become so firmly entrenched and skim so much cream from the city population that the rest of the country would be left out in the cold."

International Telemeter's Lou Novins said he hadn't studied document but that "in principle, we regard this as a very important step forward." Skiatron TV's Matty Fox stated: "Frankly, we don't want to reveal our thinking. The situation is fluid. I don't think the FCC's action will be meaningful until next March."

Sample reactions from Washington attorneys: "FCC is indulging in real doubletalk. It seems to be authorizing something—yet it says it will conduct hearings later (and you know how those can drag on) and seems to be saying it will go to Congress. The controls to be levied ought to scare stations to death. They go further than the Barrow report—and you can't have one set of rules for pay systems, another for the free system, even if FCC says this is only a test."

Another attorney: "FCC says there will be a hearing. That's almost the whole story. Can you imagine what it will be like? Can you imagine people investing money in tests without any assurance they're getting anything at all? And the data the Commission asks from stations! Stations will be operating in a fish bowl. You know that they want to keep as far away from the Commission as possible."

Still another: "The voting of some commissioners surprises me. They believe in laissez faire, minimum regulation—but this document calls for intimate control."

In voting, only Comr. Bartley dissented, while Ford abstained, Mack issuing concurring opinion. Full text of document will be printed in Federal Register about Oct. 23 and as No. 12 in FCC's official weekly pamphlet Oct. 25—both available at nominal cost from Govt. Printing Office, Washington 25. They may be ordered in advance.

In Los Angeles, meanwhile, city council accepted closed-circuit franchise bids of Harriscope Inc., International Telemeter-Fox West Coast Theatres, Skiatron TV. Latter are now deciding what to do next. (For up-to-date report on Bartlesville closed-circuit system, see below).

BARTLESVILLE CABLE PROGRESS—CON & PRO: Report that Bartlesville cable theatre operation is off to "slow start," in Oct. 18 N. Y. Times, comes as surprise to George Griffing, operator of the system. Article notes that "only 500" subscribers have been signed up to date; that "customer lists are tenuous at best" and 30 dropped after free service in Sept.; that flat \$9.50 monthly rate is regarded as too high by some subscribers who want fewer than the 30 movies offered monthly; that screen is too small for some "spectacles." On other hand, reporter Donald Janson found, viewers liked ready availability of current movies, lack of commercials, technical quality of transmission.

Griffing is a conservative attorney, sometimes chafes associates by habit of understatement (rare in show business). Here are his comments on progress to date: "We feel pretty good about it. It's better than we anticipated, even though we warned that we thought it would take a full year to get a fair test. We expected a considerable amount of 'fall off' in October when payments began; there hasn't been much. There may be about 30 who have cancelled; these include some of the 40-odd 'monitors' we attached before service began, to judge picture quality.

"We now have 540-550 subscribers and we're adding about 2 to 5 a day. There no longer is a backlog. No intense sales program has begun; that starts in November. However, you can't sell this like Fuller brushes. It's more like selling insurance—continuous payment over a long period.

"The growth to date has been on a par with our experience in community antenna systems. Surprisingly so. Before we started, we projected growth to about 200 by Oct. 1—but 500 signed up.

"We have 38 mi. of cable reaching 4500 TV homes—so I think the rate of growth isn't bad."

N. Y. Times article noted that Griffing is considering metering system, with smaller monthly minimum—such as \$3.50. Griffing states:

"We've frequently said we're not averse to trying anything that looks like what the public wants. Stromberg-Carlson and Jerrold engineers have been looking into metering techniques; they could hook up devices outside each home—tomorrow. But we prefer a central metering system. We're not proposing to change the present method—but we're not bound to the present way, either."

On programming, Griffing states: "We've learned a few things already. The public wants short comedies and cartoons. We're giving them some. There also is a demand for 'constructive' children's shows such as 'Young Tom Edison,' 'Pasteur,' etc.; we're now carrying them on Sunday afternoons."

Meanwhile, good sources tell us several entities "definitely" plan to start Bartlesville-like systems in other towns—within next 3 months.

THE BIG CHANGE FROM RCA PATENT DEPT.: Changes in RCA's patent licensing structure following settlement of Zenith litigation (Vol. 13:37-38, 40) are expected by most set manufacturers to be basic and far-reaching. And best bet is that they will be announced simultaneously with settlement of Govt.'s anti-trust "package patent licensing" suit against RCA.

Until new terms are announced, some set manufacturers have stopped paying "package" patent royalties to RCA. It's believed that new formula awaits outcome of current RCA discussions with Justice Dept. anti-trust lawyers.

Last Sept. 25, RCA notified TV-radio set makers that it is considering "changes in our patent licensing" without revealing how basic these changes might be. Best information indicates that RCA hasn't yet completely formulated its new terms.

Under present procedure, RCA's domestic licensees pay on a "package" basis, manufacturers paying a specified percentage of their factory selling price for permission to use all RCA patents in each given field. For example, current rate for monochrome TV receiver license package is 1¼%, color 1¾%. There are separate rates for conventional radios, transistor radios, receiving tubes, color tubes, monochrome tubes, etc. It is this "package" licensing principle to which Govt. objected in its suit.

Money from patent licenses—believed to total close to \$20,000,000 a year—supports RCA Labs, industry's principal research center. Patent licensing deal is 2-way street, of course, since RCA's licensees receive fruits of Labs' TV-radio research & development while paying to help support Labs.

Set makers have scanned Zenith settlement as clue to RCA's new patent plans. Under this agreement, both companies will exchange monochrome patents on royalty-free basis until 1963. Arbitrator is settling each company's back patent infringement claims against the other.

Another section of agreement involves foreign patents—which are separate from RCA's domestic patent package. The \$10,000,000 RCA-GE-Western Electric payment to Zenith are in settlement of separate suit arising out of foreign patent situation, not directly related to domestic patent arrangements currently under revision by RCA.

'THIN TUBE' NOT HERE, STILL ON HORIZON: Early prospects for 'thin-tube' TV were discounted this week by set and tube manufacturers, despite flurry of excitement created by display of a thin TV set at a military symposium and a press statement which has been interpreted as indicating the new tube is almost ready for production.

The intriguing release and the displays were work of Kaiser Aircraft and Electronics, which reported that civilian version of its 2⅝-in. deep thin transparent tube (Vol. 11:3 et seq.) needs "only refinements of the glass envelope for mass production to make space-saving a reality." Accompanying the release was photo of "prototype table model" with children viewing from both front & rear of screen.

Set and tube makers discounted prospects of early consumer use of thin tube—though they conceded its military value. Some expressed belief Kaiser hadn't successfully sealed more than 1 or 2 units, and one manufacturer said civilian model "isn't much further along than it was 2 years ago."

Kaiser device is basically a cathode-ray tube, using electron gun mounted at bottom edge of one side. It uses phosphor screen and 2 sets of deflection plates. Some manufacturers are known to be

aiming at electroluminescent "flat screen" as next big change in picture displays, skipping thin CR tube, which they regard as intermediate step—an expensive one, in view of tooling and circuit changes.

Military version of Kaiser tube has been "successfully flight-tested," according to Defense Dept., which this week made design available to commercial airlines. Tube fits in front of cockpit, like second windshield. Since it uses Feldman transparent phosphors (Vol. 13:17-18), pilot can see through it in good weather. In poor weather he sees TV-like picture presentation with "perspective of the 3rd dimension," with superimposed data on altitude, rate of climb, distances, fuel, etc., fed from digital computer at touch of switch. Navy predicts operational use in 2-3 years.

Kaiser exhibited 2 "commercial thin tubes for the home" at Los Angeles Army-Navy Instrumentation Program Symposium—one in table model set and one wall-mounted. Thin tube uses plate glass instead of molded glass, has electrode elements printed on inside surfaces of glass. Kaiser says it has been built in 21-in. size.

We could find no manufacturer who says he's interested enough in it to take out license for civilian production. However, Kaiser's progress is illuminating in that it indicates flat-tube breakthrough may not be too far off.

Tube makers are known to be working toward civilian version of transparent phosphors developed by Dr. Charles Feldman of Naval Research Lab for Kaiser tube. DuMont, GE, RCA, Sylvania are among those trying to come up with satisfactory transparent phosphors (both monochrome & color) which can be applied at the low temperatures suitable for use with conventional tube glass.

Canon 35 Causes Fracas: Courtroom corridor hassle in Miami Oct. 15 involving American Bar Assn.'s Canon 35, Judge Stanley Milledge and 4 news cameramen, including Bob Brumfield of WTVJ, had spread all way up to Fla. Supreme Court at week's end. Miami Press Photographers Assn. asked high court, Fla. Bar Assn. and Gov. Leroy Collins for investigations after judge pushed cameramen around when they took his picture in corridor following courtroom altercation with lawyer. One photographer was shoved and his camera damaged, Brumfield and another were detained for hour in Milledge's office. Judge later told Gov. Collins, who was asked by Photographers Assn. to hold public hearing on incident, that he was just trying "to enforce the judicial canon against picture taking." WTVJ showed Brumfield's film, blasted Milledge's conduct and Canon 35. Coincidentally, call to all broadcasters to unite against Canon 35 and other news restrictions was sounded at Region 7 NARTB conference in Denver this week by Howard H. Bell, asst. to pres. Harold E. Fellows. He deplored fact that "our advances to date have been on the basis of isolated effort—a few broadcasters carrying the banner for all."

Old State Dept. hand—Ambassador George V. Allen, who ran VOA in 1948-50 as Asst. Secy. for Public Affairs—is new USIA director, replacing budget-battered Arthur Larson. Allen has been in diplomatic corps since 1930, expanded & improved VOA operations before they were put into separate office outside State Dept. Announcing Allen's appointment, White House said Oct. 16 that Larson will become special aide to President Eisenhower to counter Soviet propaganda. Larson took over USIA last Dec., suffered deep budget cuts from critical Congress in spring, subsequently ordered 76% reduction in VOA's TV operations (Vol. 13:31). This week he appointed Sylvester L. (Pat) Weaver, former NBC pres. & chairman, to non-paying place on USIA's broadcast advisory committee, replacing v.p. Chris J. Witting of Westinghouse, resigned.

Unusual joint ad campaign, boosting Jackson, Miss. TV market, is being run in trade publications by city's competing TV stations, WLBT & WJTV.

New Closed-circuit Uses: (1) Major defense plants in Los Angeles area will be connected via TV next year, Hallamore Electronics pres. Lloyd G. Hallamore told Systems & Procedures Assn. at Los Angeles meeting. He said system will be used to expedite production on govt. contracts, but declined to name firms which would be hooked up. (2) Whether TV becomes tool for libraries may be decided in experiments now being conducted at U of Va. under \$41,500 grant from Ford Foundation's Council on Library Resources. University has equipped 2 of its branch libraries with TV monitors, so that students can consult books at main library without actually going there. Students telephone request for books to main library and have book they want reproduced on TV screen. They turn pages by manipulating remote control page-turner. University plans TV interconnections to 4 more branch libraries on its 510-acre campus.

TV is big feature of U. S. exhibit at Tunis International Fair Oct. 19-Nov. 13, marking first official American participation in Tunisian event. Air-conditioned studio, glassed on 3 sides, is set up in U. S. area carrying out "America at Home" theme. Shows including local talent and demonstrations of U. S. products by Tunisian distributors are watched by crowds on 8 monitors. Participants in exhibit include AT&T, RCA, Westinghouse, Anton Electronic Labs.

German TV cameras for industrial and broadcast use are now being delivered by Majestic International Corp. Line of Grundig cameras includes "world's smallest"—cylindrical-shaped camera 2-in. in diameter, 4-in. long, with its own light source, selling at \$4000-\$5000 including all remote attachments and 17-in. monitor. Grundig also has standard-size vidicon camera. Line will be taken over soon by large distributing company.

First "over-horizon" feed of local commercial TV program between Florida & Cuba on AT&T's "scatter" link (Vol. 13:38) was accomplished Oct. 15 by WTVJ, Miami. Station's cameras picked up special program from Miami Beach's Fontainebleau Hotel for transmission to CMAB-TV, Havana.

Personal Notes: Stephen C. Riddleberger promoted from administrative v.p. of ABN to v.p. & controller of ABC and asst. treas. of AB-PT, reporting to AB-PT financial v.p. Simon B. Siegel; Jason Rabinovitz resigns as administrative v.p. of ABC-TV; James T. Aubrey Jr., now ABC-TV v.p. for programming & talent, understood to be slated for promotion to exec. v.p. . . . James A. Stabile promoted to talent & program contract administration director of NBC . . . Thomas A. McAvity resigns as an exec. v.p. of NBC to join McCann-Erickson TV-radio dept. . . . Walter Lowendahl promoted from exec. v.p. to pres. of Transfilm, succeeding Wm. Miesegaes, who continues as chairman; Michael A. Palma, treas., also named exec. v.p. . . . Milton P. Kayle, TPA gen. counsel, also named secy. . . . Robert H. Salk, ex-Screen Gems & Katz Agency, joins Corinthian Bestg. Corp. as program director . . . Ole G. Morby, ex-MBS, named broadcast operations coordinator for TLF Broadcasters, subsidiary of Time Inc. . . . Edwin H. Peterson, ex-Eastern Airlines, named publicity & public relations mgr. of WRC-TV & WRC, Washington, succeeding Jay Royen, resigned . . . Franklin G. Bouwsma, ex-TV program director, Wayne State U, named exec. secy., Detroit Educational TV Foundation, operator of WTVS . . . Henry Morgenthau III, son of former Secy. of Treasury, named TV projects mgr., educational WGBH-TV, Boston, coming from radio WNYC, N. Y. . . . Alex Duncan appointed Latin American administrator for Fremantle Overseas Radio & TV, headquartering in Mexico City; Sean O'Donoghue named asst. to Mexican subsidiary mgr. Rene Anselmo . . . Clyde L. Clem, ex-Grant Adv., Detroit, named a v.p. & asst. to pres. of NBC spot sales southern rep Bomar Lowrance Assoc., headquartering in Atlanta . . . William E. Lane, ex-Haig & Patterson, Detroit, rejoins Video Films, Detroit, as production mgr. . . . S. L. Goldsmith Jr., ex-NAM, named exec. director of National Sales Executives, succeeding Robert A. Whitney, whose title had been pres. . . . Richard Kelliher, ex-Headley-Reed, San Francisco, named mgr. of Adam Young office, same city, succeeding Chuck Christianson, resigned to become mgr. of radio KRUX, Phoenix . . . Weston J. Harris, ex-WTTG, Washington, joins WRC-TV there as program director, succeeding James E. Kovach, now pro-

gram director of WBAL-TV, Baltimore . . . John A. Scott named administrative v.p. of Truth Publishing Co. (WSJV & WTRC, Elkhart; WKJG-TV & WKJG, Ft. Wayne; *Elkhart Truth*) . . . George Goldman, ex-WCAU-TV & WCAU, Philadelphia, named adv. & sales promotion mgr. of KPIX, San Francisco, replacing Wm. H. Ryan, resigned . . . Allen Sanderson promoted to chief studio engineer of WWJ-TV, Detroit, succeeding Russell P. Williams, who joins Ampex as central district sales mgr. . . . Frank Langley promoted to publicity supervisor, WPIX, N. Y. . . . Arthur H. Barnes, ex-Carl Nelson & Assoc., named promotion & publicity director of WISN-TV & WISN, Milwaukee . . . Fred Eichorn, ex-radio KXL, Portland, Ore., named merchandising mgr. of KGW-TV & KGW there . . . C. L. (Rud) Richards, ex-RAB, joins rep Peters, Griffin, Woodward as radio sales development director . . . Mel Kampe, ex-radio WMAY, Springfield, Ill., joins WTVJ, Miami, as public service director . . . George H. Morris, ex-WHBQ-TV, Memphis, named v.p. & national sales mgr. of WSIX-TV, Nashville . . . David Abbott, ex-Official Films, named national sales mgr. of upcoming WHDH-TV, Boston (Ch. 5), due in Nov. . . . Lee Gorman, exec. v.p. & gen. mgr. of WABI-TV, Bangor, named exec. v.p. of WAGM-TV & WAGM, Presque Isle, Me.; Walter Dixon, operations v.p. of WABI-TV, will act in same capacity for WAGM-TV & WAGM; Ted Coffin promoted from production mgr. to station mgr. of WAGM-TV . . . Lewis Klein promoted from production mgr. to program & production mgr., WFIL-TV, Philadelphia . . . Wm. G. Wadman named program mgr. of WGAN-TV, Portland, Me.; Lloyd Knight, production mgr. . . . Robert C. Harnack, ex-Smith Adv., named sales & production mgr. of WKST-TV, New Castle-Youngstown (Ch. 45), planning to resume soon.

New chief clerk of House Commerce Committee is W. E. (Ed) Williamson, Democratic mayor of Magnolia, Ark., former college roommate of Committee Chairman Harris (D-Ark.). He succeeds Republican Elton J. Layton, who retired after 36 years in post.

John A. (Doc) Willoughby, asst. to FCC chief engineer, retires Oct. 31. He's 66, has served with Govt. since 1917, with FRC & FCC since 1930.

ADVERTISING AGENCIES: Samuel Cherr, senior v.p. and head of merchandising dept. of Young & Rubicam, retires Jan. 1 . . . George Wolf, v.p. & TV-radio director of Ruthrauff & Ryan prior to its merger into Erwin Wasey, Ruthrauff & Ryan Inc., resigns from combined agency . . . Emerson Foote, subject of much speculation in trade (Vol. 13:35) since he resigned in Feb. as exec. v.p. of McCann-Erickson, joins Geyer Adv. as chairman . . . Lawrence J. O'Neill named TV-radio supervisor of Kenyon & Eckhardt, Chicago . . . Lee Rich promoted to media director of Benton & Bowles . . . Frederick T. Wehr, ex-Joseph Katz, Baltimore, named TV-radio adv. director of H. W. Ruddemeier Co. there . . . Herbert Halpern promoted to TV-radio director of Winus-Brandon, St. Louis.

Communion breakfast of Catholic Apostolate of Radio, TV & Adv. will be held Nov. 17 in Waldorf-Astoria Hotel, N. Y., following 9 a.m. mass & communion at St. Patrick's Cathedral. Principal speakers will be pres. Donald H. McGannon of Westinghouse Bestg. Co. and pres. Rev. Laurence McGinley of Fordham U. Jack Costello & Jack Sterling will be masters of ceremonies.

"Value of Your Station Property" is title of talk to be delivered Oct. 25 before Miss. Broadcasters sales management conference at U of Miss., University, Miss., by Ray Hamilton, of Hamilton, Stubblefield, Twining & Assoc.

Columnist Faces Jail: TV-radio columnist Marie Torre of *N. Y. Herald Tribune* was threatened with 30 days in jail Oct. 16 for refusing to identify CBS executive she quoted in report on contract dispute between actress Judy Garland & network. Miss Torre was held in contempt of court by Federal Judge Sylvester J. Ryan in N. Y. and warned about 30-day sentence after pre-trial hearing in \$1,393,333 libel-&-breach-of-contract suit by Miss Garland against network. Columnist had refused under press privilege to name CBS spokesman who told her, as quoted in column last Jan. 9, that Miss Garland "is known for a highly developed inferiority complex," that he "wouldn't be surprised if it's because she thinks she's terribly fat." Judge Ryan withheld actual sentencing of Miss Torre pending filing of show-cause order, but said she was in criminal contempt as "matter of law," that "privilege does not obtain in this circumstance." *Herald Tribune* said it would carry case to U. S. Supreme Court if necessary to sustain Miss Torre's right to keep source in confidence.

Broadcasters' Promotion Assn. second annual convention Oct. 31-Nov. 2 at Sheraton Hotel, Chicago (Vol. 13:41), will be addressed at Nov. 1 luncheon session by v.p. and sales & adv. director Ben H. Wells of Seven-Up Co. Chicago disk jockey Howard Miller will be master of ceremonies at banquet that night.

Telecasting Notes: "Studio None" is phrase used by *Variety* TV-radio editor George Rosen in Oct. 16 edition to describe coming status of New York as TV drama origination point following defection of Westinghouse's *Studio One* to Hollywood (Vol. 13:41). He points out *Kraft TV Theatre* will be sole surviving weekly 60-min. drama networked from east, and, in fact, only "4 basic shows keep New York TV alive in terms of major live showcases"—*Perry Como, Steve Allen, Ed Sullivan & The Big Record* . . . As of now," says Rosen, "the networks are standing pat on the 'New York production' tag for these variety shows, but it's recognized that should any one of them decide to make the move (thus inviting a wholesale N. Y.-to-L. A. talent swing as in the dramatic field), all of Mayor Wagner's horses & men couldn't stave off a general exodus that could be disastrous to the cause of New York TV as a bigtime production center" . . . Both viewers and critics had field day last Sunday, with \$1,400,000 worth of specials on the air. Critics almost unanimously picked Bing Crosby-Frank Sinatra *Edsel Show* (CBS-TV) for raves, *Pinocchio* and *Standard Oil Jubilee* getting mixed reviews; *New York Herald Tribune's* John Crosby was exception, gave "smash hit" rating to *Pinocchio*, and a ho-hum to Crosby-Sinatra. Trendwise, all 3 shows were big: *Pinocchio* 24.6 (52.2 share of audience), *Edsel* 40.8 (63.3), *Standard Oil* 32.2 (52.7) . . . Probably biggest spectacular of season—Mary Martin's *Annie Get Your Gun*, 2-hour Thanksgiving Eve colorcast on NBC-TV—will be thoroughly pre-tested by airtime, having opened last week at Los Angeles to rave reviews after successful San Francisco run . . . Late night TV finally seems to be catching on for NBC-TV, which renewed agreement with Jack Paar for *Tonight*; billings on show are up 46% since July 29, and number of stations carrying show is at all-time high of 76 . . . Top fall ratings: CBS-TV's *Gunsmoke* wins No. 1 place in Nielsen total audience & average audience for 2 weeks ending Sept. 21; Bob Hope's NBC-TV special comes in first in Trendex Oct. 1-7 ratings, with CBS-TV's *Danny*

Thomas Show appearing as a surprising third following second-place *Ed Sullivan* . . . MGM's gross from TV sale of its feature backlog hit \$50,000,000-mark with this week's sale to Westinghouse . . . New package of 80 features, including *High Noon, The Men and Cyrano de Bergerac*, to be offered by NTA . . . Hottest thing in TV since the feature film, according to trade press features, is horror—with Screen Gems' *Dracula-Frankenstein-Mummy* series of old spine-tinglers reportedly piling up phenomenal ratings . . . Hit of last season, *Secret Life of Danny Kaye*, will be repeated by CBS-TV Oct. 27 for UN Children's Fund . . . Cut in number of Emmys for 1958 was recommended by ATAS (Hollywood) Award Structure Committee at meeting this week . . . First TV commercial to be made into a movie: Ford's \$1,000,000 around-the-world-in-130-days commercial, shot by Filmways Inc. with staff of 18 in 23 countries, timed for first TV exposures with introduction of 1958 Ford. Shot at same time was 60-min. travel documentary (featuring highways of the world), aimed at theatrical release.

Bishop Fulton J. Sheen is taking year's leave from broadcasting, or at least from live TV, his N. Y. office said Oct. 16. Commenting on 25 years as TV & radio preacher, Bishop Sheen told INS in Boston: "This is not my vocation. It is well for me to retire. I shall leave the lights of TV in order to live in a more intimate union with God." But Bishop "undoubtedly" will resume weekly TV appearances in fall of 1958, and many local TV stations are continuing his filmed sermons, according to Msgr. Edward T. O'Meara, asst. director of Society for the Propagation of the Faith in N. Y. Sheen concluded fifth season on ABC-TV in April.

Warner Bros. plans to double output of TV films, pres. Jack Warner announced, predicting at least 5 hours weekly of Warner shows on TV by June 1. New \$1,000,000 TV operations building at Burbank studios is scheduled for completion in 90 days.

Mike Fright: Mike Wallace's penchant for controversy got him in trouble again this week—losing him first one and then a second announced interviewee for Oct. 19 program. At last minute, after he had reached out to England for a subject to fill the hot seat, at least one key ABC-TV affiliate refused to carry the show. Wallace originally had planned to interview Mrs. Eleanor Roosevelt, who suddenly canceled, remembering she had "previous engagement." Then he arranged to interview Arlene Francis, but NBC—to which she is under exclusive contract—put kibosh on this. Then at midweek he substituted Malcolm Muggeridge, ex-editor of *Punch* and author of article in current *Saturday Evening Post*, "Does England Really Need A Queen?" Muggeridge was already in TV doghouse in England, having been barred from BBC-TV panel show as result of article. As soon as ABC-TV announced it intended to fly him to U. S. for interview, Washington affiliate WMAL-TV canceled show, mgr. Fred S. Houwink questioning the taste of telecasting "any program that might cast a shadow over the visit of Her Gracious Majesty to the nation's capital."

Demand for educational TV for in-school training will exceed available air time within 10 years, exec. director Dr. John W. Taylor of WTTW, Chicago, predicted Oct. 15. "TV teaching is becoming a necessity," he told luncheon meeting in Chicago Club in educational station's 1957-58 fund campaign for \$340,000. "The need is so great that even the facilities of TV will be strained in the effort to keep up with it over the next decade."

Dull TV Season? NBC pres. Robert W. Sarnoff takes issue with critics of new-season TV programming in latest of his informal "letters to TV-radio editors." He cites April-May 1957 survey of 1235 heads of households in 244 urban areas by Psychological Corp. which indicated 3 out of every 4 people were watching as much or more TV than a year earlier and 8 out of 10 thought programs were as good or better, and first Oct. Trendex which shows 5% more nighttime viewing than year ago. In enumerating fine programming of this season, Sarnoff revealed that he sneaked a look at Oct. 13 Bing Crosby-Frank Sinatra *Edsel Show* on CBS-TV, admitting that he "went back and forth" between that show and NBC-TV's *Steve Allen Show*. He formulated this proposed rule for TV critics: "All reviewers should look at a first show and then a fifth show and then a tenth show before delivering a final verdict" on a series. "Every series can be improved during the course of a season," he added. "That's the job we're busy on now."

ABN programming is aimed at "multiaccess" & "ambiactive" audiences which only radio can fully reach, pres. Robert E. Eastman said this week. In Oct. 15 speech to Washington Ad Club at Presidential Arms, where he was given "Award for Achievement," and in Oct. 18 address at Region 7 NARTB conference in Brown Palace, Denver, Eastman gave these definitions of terms: "Multiaccess"—kitchens, living rooms, bedrooms, bathrooms, barbershops. "Ambiactive"—making beds, washing dishes, tending babies, getting haircut, sitting on beach.

Pay-TV Test Conditions: FCC's "First Report on Subscription TV" (see p. 1) imposes these conditions for trial operations of toll TV systems:

(1) Three-year tests will be limited to cities receiving Grade A signals of at least 4 commercial TV stations. Commission says there are more than 20 such markets. To conduct trial in city which now has only 3 Grade A signals, it would be necessary for applicant to build new station.

(2) Both vhf & uhf stations will be eligible to participate.

(3) Applications will be accepted from any CP or license holder or present or future TV applicant. Applications may be made simultaneously for TV station and for toll-TV tests.

(4) Any pay-TV system or method may be used so long as it meets FCC interference requirements and causes no degradation of either pay-TV or free signal.

(5) Each qualified method will be permitted trial in not more than 3 of the eligible markets.

(6) Any toll-TV station shall be free to try more than one system, and more than one station in a trial market may participate in trial of any individual method. Agreements between stations and system franchisers must be non-exclusive and filed with FCC.

(7) Stations must retain responsibility to select and reject programs and to determine maximum charges to subscribers. Charges & terms must be applied uniformly to all subscribers.

(8) Transmission of subscription-TV programs must begin within 6 months after authorization is granted; trial authorizations will be permitted for 3 years from date of start of transmission.

(9) Commission may fix cut-off date for applications or fix trial periods at less than 3 years for late applications so that tests don't continue indefinitely and all trials are conducted during same general period.

(10) Authorizations "will not be renewable, as such."

However, if Commission finds it in public interest to continue authorizations, it will do so for "limited periods," subject to public notice.

(11) Subscription-TV stations will be required to adhere to minimum hours of free programs as specified in FCC rules.

(12) Pay-TV test grantees will be required to furnish reports to FCC covering all aspects of operation.

* * * *

Commission is asking applicants for large amount of information, including: "Statement of intention" with regard to commercials during fee-TV programs (Commission stating that it "understands" proponents don't contemplate commercials). Detailed information on commitments and negotiations for programs. Detailed description of decoding-encoding methods and devices, perhaps including submission of models. Methods of billing, terms of contracts with subscribers, approximate number of subscribers, minimum & maximum charges, information about all persons involved in providing equipment, programs, etc.

Commission said it will conduct public hearing on fee-TV service "when it finds that sufficient meaningful data are available."

In his dissent, Comr. Bartley argued that fundamental question is whether FCC should use scarce TV frequencies for a service which it hasn't even classified as a broadcast service. Allowing test demonstrations, he said, is buying pig in a poke—"and the trouble may be that, when we open the 'poke,' we may discover a spectrum hog." He stated that neither proponents nor opponents have endorsed test as necessary or useful, that record is inadequate to justify tests, that there's no urgency for tests, since those who wish to go into fee TV now can use wire systems.

Bartley warned that wording of FCC's fee-TV report "presents the real possibility of stringing this out long beyond a mere 3 years." He urged complete full-scale evidentiary hearings before any action is taken.

Agency Prober Is Probed: "Show-cause" hearing on CAB reluctance to open all files for House "watchdog" investigation of 6 federal regulatory agencies, including FCC (Vol. 13:40), ended Oct. 17 with chief prober himself under fire. Commerce Committee's legislative oversight subcommittee headed by Rep. Moulder (D-Mo.) held first public session with CAB Chairman James R. Durfee as sole witness to explain why he withheld some files from subcommittee counsel Bernard Schwartz. Durfee assured subcommittee it could have 99.44% of CAB records—but not Board members' personal files. Then Republican members of subcommittee lit into Schwartz for his investigative methods, including questionnaires demanding that all agency officials list gifts they or their families had received. "Lousy," said Rep. O'Hara (Minn.). "Never before has any Congressional investigating group started out by assuming that everybody is crooked." Rep. Heselton (Mass.) wanted to put Schwartz on stand under oath. "He thought he was going to blow the top off this town," Heselton said. Rep. Moss (D-Cal.) defended Schwartz's tactics, contended Durfee was trying to "spoon-feed this committee." Moulder finally adjourned hearing indefinitely.

Editorial stands on public issues should be taken by broadcasters, Democratic Gov. Robert D. Holmes of Ore. told Region 8 NARTB conference this week in Hotel Multnomah, Portland. "Political cunuchs," he said, "are scorned; scorned by legislators, scorned by your listeners & viewers. People love politics. They have a right to know where a station stands."

Propagation Measurements: First of AMST's series of TV propagation studies was turned over to TASO this week, covering mobile unit survey made in Wilkes-Barre-Scranton area. AMST said its unit traveled 6000 mi. taking measurements for initial study. Document—not released—contains 117 pp. and 62 maps. AMST unit currently is completing studies in Baton Rouge area, then will move to west coast. Second unit is operating in Madison, Wis. area. Meanwhile, FCC announced availability of new technical report, *Summary of VHF Field Strength Measurements in TV Zone III* (Gulf coast area). Single copies are available from FCC's Technical Research div. (Report T.R.R. 2.4.17).

Northernmost TV station within U. S. borders—WAGM-TV, Presque Isle, Me. (Ch. 8)—received live network service in time for World Series via private 4-hop microwave system from WABI-TV, Bangor (Ch. 5). Both stations are owned by Community Telecasting Service (Lee Gorman, exec. v.p.).

Radio audience supremacy was claimed for NBC network Oct. 16 on basis of Nielsen ratings for advertising campaigns during 4 weeks ended Sept. 7. NBC said first 7 advertisers on Nielsen list of those whose campaigns delivered greatest radio audience were all NBC sponsors.

Mayor Frank Zeidler's veto of Skiatron's cable pay-TV franchise in Milwaukee was sustained by Common Council this week—Council agreeing that more study is needed. In Dayton, O., Muzak announced filing of application for franchise and negotiations with phone company to wire city.

FCC Initial Decisions, Hearings: Puerto Rican Dept. of Education, now operating radio WIPR in San Juan, and building WIPR-TV (Ch. 6) there, won initial decision for Ch. 3, Mayaguez, in contest with Sucesion Luis Pirallo-Castellanos, whose principals control radios WISO, Ponce, and WMIA, Arecibo.

Examiner Hugh B. Hutchison held that commonwealth agency had demonstrated "vital need" for educational TV service in Mayaguez area, while Sucesion showed "no evidence of a probative character" supporting its arguments for commercial operation. Sucesion was given "slight preference" on basis of local ownership & ownership integration, but was outweighed in all other factors, Hutchison said.

KFDM-TV's hold on Ch. 6 in Beaumont was made more secure as Commission announced it had instructed staff to prepare decision affirming CP, denying competitor Enterprise Co. Case has been to Court of Appeals and back.

In Elk City, Okla., Southwest Bestg. Co. moved another step toward final CP on Ch. 8, examiner issuing favorable decision—competitor Video Independent Theatres having dropped out.

Court of Appeals declined to block grant of move of WESH-TV, Daytona Beach, Fla. (Ch. 2) 24 mi. toward Orlando, upholding FCC action

which had been appealed by Mid-Florida Radio Corp. and Central Florida Bestg. Co.

Among other actions, Commission: (1) Told KBTM-TV, Jonesboro, Ark. (Ch. 8) its CP would be cancelled until it seeks hearing on more time to build. (2) Informed KVIT, Sante Fe (Ch. 2) that it must go to hearing on its request to move to 14 mi. northeast of Albuquerque. (3) Set for hearing application of grantee KSLM-TV, Salem, Ore. (Ch. 3) for more time to construct. (4) Denied petition of WTVJ, Miami (Ch. 4), an applicant for Ch. 11 in Houma, La., which sought reconsideration of Ch. 12 experimental grant in New Orleans to WJMR-TV. (5) Finalized assignment of Ch. 12 to Mankato, Minn.

Reports of Radio Station Sales: KYME, Boise, Ida. by Roger L. Hagadone for \$120,000 to Keith E. Patterson, gen. mgr. of KONP, Port Angeles, Wash. (broker, Hamilton, Stubblefield, Twining & Assoc.) . . . KOWB, Laramie, Wyo. by Richard P. McKee for \$108,000 to Richard K. Power & John Hunter, owners of WAVN, Stillwater and WCMP, Pine City, Minn. (Kander) . . . WLFH, Little Falls, N. Y. by Walter T. Gaines for \$43,000 to Richard D. Gillespie . . . WLBG, Laurens, S. C. by Laurens-Clinton Bestg. Co. for \$63,000 to Charles W. Dowdy.

Radio station sales approved by FCC this week: WCHI, Chillicothe, O. by Norman M. Glenn for \$78,450 to ex-station rep J. H. McGillvra & wife (Vol. 13:39) . . . WRKE, Roanoke, Va. by Elmore & Reba Heins for \$75,000 to Sherwood J. Tarlow, Allan W. Roberts, Dr. Bertram M. Roberts & Joseph Kruger (Vol. 13:37).

Transcontinent Expands: Ruinous competition in Wilkes-Barre-Scranton area will be eased under terms of agreement whereby Transcontinent TV Corp. acquires control of WARM-TV, Scranton (Ch. 16) while WILK-TV, Wilkes-Barre (Ch. 34) goes off air. Transcontinent will own 60% of new corporation, WARM-TV and WILK-TV principals 20% each. Total consideration involved is \$1,500,000—Transcontinent putting up undisclosed amount of cash and stock, and new corporation assuming debt. Radio WILK is retained by present stockholders. Principals stated purpose of merger was to establish "truly regional station" with strong ABC-TV affiliation. Plan is to use Ch. 16 at WILK-TV's site, employ 1.4-megawatt power, change call to WNEP-TV (for new Northeastern Pa. Bestg. Co.). Wm. Scranton (WARM-TV) will be chairman; Mitchell Jenkins (WILK-TV) pres.; Thomas P. Shelburne (WILK-TV) exec. v.p. & gen. mgr.; Martin Memolo (WARM-TV) engineering v.p. Also on board will be Transcontinent's David Forman, Paul & Fred Schoellkopf, Seymour H. Knox, George Goodyear, David Moore. Transcontinent also owns WROC-TV, Rochester (Ch. 5), WGR-TV, Buffalo (Ch. 2), 50% of WSVA-TV, Harrisonburg, Va. (Ch. 3).

KSHO-TV, Las Vegas (Ch. 13) is being acquired for \$70,000 by Mervyn Adelson and father Nathan, Las Vegas supermarket operators, it's revealed by transfer application filed this week. Sellers are Frank Oxarart-Albert Zugsmith interests, who acquired TV and radio KBMI, Henderson, Nev. in 1956 from Moritz Zenoff for \$300,000, including liabilities (Vol. 12:48). June 30 pro forma balance sheet for KSHO-TV shows \$12,071 deficit. It lists \$18,661 current assets, \$127,283 fixed assets; \$70,569 current liabilities, \$77,537 long term liabilities.

Writers Guild anthology titled *The Prize Plays of Television & Radio—1956* will be published Oct. 22 by Random House. Book contains 12 scripts.

Robert E. Sherwood Awards for TV programs dealing with freedom & justice will be continued, but with prize money cut from \$55,000 to \$15,000, chairman Robert M. Hutchins of Fund for the Republic announced this week. Directors of Fund, which is being liquidated gradually, voted to reverse earlier decision to discontinue TV project started in 1955. Deadline for entries in third annual competition covering programs from Oct. 1, 1957 to May 31, 1958 is next May 31, with Sylvia Spence Assoc., 527 Lexington Ave., N. Y., handling arrangements. Top award carries \$10,000; 5 others, \$1000 each. Judges are Mrs. Eleanor Roosevelt, director James J. Rorimer of Metropolitan Museum of Art, pres. Buell G. Gallagher of CCNY, pres. Robert M. Purcell of radio KFWB, Los Angeles, critic Gilbert Seldes, pres. Philip H. Willkie of Rushville (Ind.) National Bank, N. Y. attorney Harrison Tweed.

RKO Teleradio's purchase of radio WGMS, pending for 1½ years (Vol. 12:14 et seq.), was cleared for final FCC approval this week when minority stockholder Lawrence C. Smith withdrew his protest and objections to the \$400,000 sale. In July 1956, FCC approved transfer and RKO Teleradio operated station for 4 months before Appeals Court ordered station returned to original owners. FCC held hearing on proposed transfer, and initial decision recommended approval of purchase.

New RAB directors elected at annual meeting in N. Y.: Hugh K. Boice, WEMP, Milwaukee; Henry B. Clay, KWKH, Shreveport; Victor C. Diehm, WAZL, Hazleton, Pa.; Herbert Evans, Peoples Bestg. Corp., Columbus, O.; Frank N. Headley, H-R Repts Inc., N. Y.; Donald H. McGannon, Westinghouse Bestg. Co.; Weston C. Pullen Jr., Time Inc.; Paul Roberts, MBS; Lester M. Smith, KJR, Seattle.

WHYN-TV, Springfield-Holyoke, Mass. shifted from Ch. 55 to Ch. 40 Oct. 2.

Notes on Upcoming Stations: There were no new starters this week, while WJHP-TV, Jacksonville, Fla. (Ch. 36) announced it was suspending operations Oct. 25 for an "indefinite period." Owner is John H. Perry Jr., also owner of WESH-TV, Daytona Beach (Ch. 2) and publisher of *Jacksonville Journal* and other newspapers. WJHP-TV began in Dec. 1953 as NBC-TV & ABC-TV outlet, but lost NBC when WFGA-TV (Ch. 12) began last Aug. City's other station is pre-freeze WMBR-TV (Ch. 4). With WJHP-TV off air, there will be 512 stations in operation (90 uhf).

Note: Nearest new starters are KPAC-TV, Port Arthur - Beaumont (Ch. 4); WBOY-TV, Clarksburg, W. Va. (Ch. 12); WMVS-TV, Milwaukee (Ch. 10, educational); WWLI, Indianapolis (Ch. 13); WINR-TV, Binghamton, N. Y. (Ch. 40); WEEQ-TV, LaSalle, Ill. (Ch. 35).

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WHDH-TV, Boston (Ch. 5) has changed target for programming with ABC-TV to Nov. 17, reports v.p. & managing director Wm. B. McGrath for owner *Boston Herald-Traveler* (WHDH). It has two 10-kw RCA transmitters (1 for standby) and will use 1082-ft. Ideco tower with 12-bay antenna at site in Newton, Mass. Base hour will be \$2500. Rep will be Blair-TV.

Electronics Personals: Brig. Gen. Wm. L. Bayer, retired commander of Army Signal Supply Agency, Philadelphia, named military marketing mgr. of Stromberg-Carlson electronics div. . . . Martin I. Zwerin, ex-Curtiss-Wright, Westinghouse & Philco, appointed special representative of International Resistance for market development of new products . . . Robert A. Huff promoted to product adv. & sales promotion mgr. of RCA electron tube div., Harrison, N. J.; Alfred J. Jago Jr. to advertising services mgr., Erwin B. May to adv. & sales promotion mgr. for semiconductors & components, Harvey M. Slovick to publications mgr. . . . Robert E. Koehler promoted to production dept. mgr. of RCA semiconductor div., Somerville, N. J.; John M. Spooner to plant mgr. . . . Joseph W. Lewis, ex-Arnold O. Beckman Inc., South Pasadena, joins Beckman Instruments as asst. to pres. . . . Gene Sarazen, ex-golf champion, named sales director of Belock Instrument . . . Henry H. Scudder, exec. v.p. of International Standard Electric Corp., elected a v.p. of parent IT&T . . . Herbert Bomzer, ex-Ford Instrument, named operations analysis director of Paramount Pictures subsidiary Autometric Corp. to coordinate research & development in specialized electronic systems . . . Charles L. Lord named a v.p. & controller of Electronic Communications Inc., St. Petersburg . . . Elbert G. Bellows elected v.p. of W. L. Maxson.

Tiny transistor amplifier designed to step up beat in blocked hearts was reported Oct. 15 at American College of Surgeons clinical congress in Atlantic City by Dr. M. Judah Folkman & Dr. Elton Watkins Jr. of Harvard Medical School & Children's Medical Center, Boston. They said device, weighing less than 2-oz., fitted with leads which pierce chest to be sutured in right auricle & right ventricle, has been successfully tested on dogs, is ready for use with human patients.

WINR-TV, Binghamton, N. Y. (Ch. 40) has changed target for start with NBC-TV to Oct. 25-Nov. 1, reports gen. mgr. Dale Taylor for owner *Binghamton Press* (Gannett). RCA 25-kw transmitter is scheduled to be wired and ready by Oct. 21 and 52-gain pylon antenna is ready on 400-ft. tower. Base hourly rate will be \$300. Rep will be Hollingbery.

KWRB-TV, Riverton, Wyo. (Ch. 10), planned as area outlet covering Thermopolis and Worland, hopes to begin with test patterns late in Oct., with CBS-TV programming early in Nov., writes owner Joseph P. Ernst, operator of Wyo. radios KWRL, Riverton; KRTR, Thermopolis; KWOR, Worland. Used 5-kw GE transmitter is scheduled to be ready Oct. 20 and 12-bay antenna is being installed on mast atop Mt. Ridge, Boysen Peak. Studio at 500 Broadway, Thermopolis, will connect via microwave, as will other studios to be built later in Riverton and Worland. Base hour will be \$150. Rep will be Meeker.

RCA shipped 25-kw transmitter Oct. 14 to upcoming WMBD-TV, Peoria, Ill. (Ch. 31), due in Jan.; 2-bay superturnstile antenna Oct. 11 to upcoming KXLJ-TV, Helena, Mont. (Ch. 12); 6-bay superturnstile antenna Oct. 15 to WHBF-TV, Rock Island, Ill. (Ch. 4), planning change to new site; 12-bay superturnstile Oct. 14 to WICU, Erie (Ch. 12), planning boost to 316-kw.

New headquarters-studio of WFIL-TV & WFIL, Philadelphia, was opened Oct. 15 in Sheraton Hotel. Triangle stations' facilities in downtown location augment W. Philadelphia studios & offices.

Talos Fails in Test: RCA-built missile station, claimed to be first completely automatic launcher of kind, was turned over to Army Oct. 15 for evaluation at White Sands, N. M., proving ground, where Talos rocket misfired in first test. New land-based station, designed to intercept enemy missiles or planes with no help from push-buttons, was manually operated in initial demonstration. Navy-developed Talos was fired, but external booster rocket blew up seconds after takeoff and missile careened out of control. Incorporating most of latest design & engineering developments in electronics, station itself was built in 2 years by RCA in collaboration with Army, Navy, Air Force, long list of subcontractors headed by American Machine & Foundry. In statement Oct. 13, RCA pointed out its electronic system "was in no way involved in the unsuccessful firing of Talos."

Electronic Highway: Auto safety by electronics was demonstrated last week in Lincoln, Neb. by RCA and Nebraska Dept. of Roads using automobile guidance system developed by RCA team headed by Vladimir Zworykin. Using "guidance cable" buried under 320-ft. stretch of highway, demonstration showed driving safeguards of future. Automatic signals on car's dashboard told driver when to stop or slow down to avoid collision. For use in fog or on "blind" hills, car activated series of lights along road as warning to cars approaching or following. In one test, RCA engineer drove car with windshield completely blocked by cardboard. If car moved too far to left or right, needle on dashboard told him which way to turn to stay in proper lane. If he got within 25 ft. of car ahead of him, bell rang and light flashed on.

Van Norman Industries sets up systems automation group with headquarters in Washington, D. C. First project will be program of post office automation.

Admiral receives \$1,196,000 electronics contract from Navy Bureau of Aeronautics.

1957 TV SALES FORECAST—ABOUT 6,750,000: First unofficial fall retail TV set sales figures are in -- and while they're lower than some earlier industry hopes, statisticians see "no cause for alarm" and conclude that total sales for year will be a shade under 1956 -- about 6,750,000 vs. last year's 6,804,703.

Sept. retail TV sales, first significant indicator of public's response to new TV lines, totaled about 725,000 sets (due to be shaved down by 10,000 or so because this includes export sales) vs. comparable 1956 figure of 783,247. This brings total 1957 retail sales to date to some 4,540,000 for first 9 months, compared with 4,730,000 in first 9 months of 1956.

The 6,750,000 estimate for all of 1957 is based on past pattern of Oct.-Nov.-Dec. sales and presupposes rate of about 730,000 a month for rest of year (compared with average of 504,000 for first 9 months). If prediction holds true, 1957 would be TV's fourth biggest year -- and, by same token, poorest year since 1953. However, even a slight unexpected lift could bring 1957 sales above those of 1956.

Inventory position of industry at beginning of Oct. was regarded as "safe" and seen as tribute to intelligent planning by set manufacturers. At all levels of trade (factory-distributor-retail), inventories were unofficially estimated at 2,550,000, compared with 2,600,000 on Oct. 1, 1956.

Picture Tube Prices Up: A 1½%-5½% increase in picture tube prices to set manufacturers was put into effect this week by virtually all tube makers. Whether it will result in more retail TV price hikes remains to be seen -- but best guess is that set makers will sit tight for time being. Some receiver manufacturers report start of noticeable sales lift in Oct., and are anxious not to disturb anything.

Price hikes on 90-degree tubes (including new stub-neck models) were greater than on corresponding 110-degree models -- end result being that price differential between the 2 models has been cut from \$2 to \$1.50 across the board.

Rises ranged from 20¢ on 14-in. 110-degree tube to \$1 on 21 & 24-in. 90-degree models. New manufacturer prices for 110-degree tubes (90-degree tubes \$1.50 less): 14-in. \$14 (up from \$13.80), 17-in. \$16.25 (from \$16), 21-in. \$21.25 (from \$20.75), 24-in. \$26.75 (from \$26.25).

There was no increase in prices of picture tubes for renewal market, although most renewal receiving tubes are due to go up 4-9% early next month (Vol. 13:41).

TV Imports Are Here: First imported TV sets are now on market in U.S. -- German-built Grundig receivers distributed by Majestic International Corp., whose parent Majestic-Wilcox-Gay once produced own TV sets. Grundig receivers are high-high-end hi-fi combinations, including AM-FM-SW radio, 4-speed phono, tape recorder -- featured as top-of-line item in Grundig-Majestic's successful packaged hi-fi series.

The 2 TV "home entertainment centers" marketed by Majestic are priced at about \$1500 (21-in. set) & \$2500 (24-in. with better tape recorder). Majestic spokesman said reaction from retailers has been "very good" and units are now being shipped in "pretty good quantities." He said company has no plans to import low-priced models or TV-only receivers. "We won't compete with American TV manufacturers -- there's no money in it." He said he didn't think other German TV-radio makers were yet in position to offer their TV sets on U.S. market.

Possibility of TV competition from Japan -- whose transistor radios are beginning to go into large-scale distribution here -- was raised at "Japanese Electronic Exhibition" last week in New York. Among equipment shown were TV tuners ranging from \$6.50 to \$9. If Japan is getting ready to invade TV component field, some tradesters wonder whether complete TV receivers will be far behind.

Production: TV output dropped slightly during week ended Oct. 11, to 164,627 from 167,605 preceding week, compared with 205,970 in corresponding week of 1956. It was 41st week of year and brought TV production for year to date to 4,933,000, compared with 5,670,437 in same period last year. Radio production rose to 407,298 (150,075 auto) from preceding week's 356,748 (114,402 auto), compared with 335,206 (127,129) in corresponding week last year. Radio output for 41 weeks totaled about 11,138,000 (4,102,000) vs. 10,208,320 (3,324,177) in same 1956 period.

Topics & Trends of TV Trade: "And so marketing must learn how to live with, and profit from, a new dynamic retailer—the discount house," says E. B. Weiss, director of merchandising, Doyle-Dane-Bernbach Adv., 20 W. 43rd St., N. Y., in 43-page booklet *Marketing's Coming Readjustment to Low-Margin Retailing*.

Growth in size of big discount houses and discount chains is detailed by Weiss who says "in 1957 at least one discount house will top \$100,000,000 turnover figure—and a score or more will achieve a turnover in excess of \$10,000,000. And by 1960, he adds, several discount chains will hit annual turnover of \$250,000,000 and possibly 1 or 2 will reach half-billion mark.

Result of growth, Weiss claims, has been about-face by many manufacturers, especially in hard goods, to win distribution in off-list outlets. He also predicts manufacturers will tend to cut down steps between manufacturer and ultimate consumer. But he adds this "doesn't mean the end of the wholesaler—his demise has been regularly predicted for the last 50 years. But it does mean his partial elimination in some industries; and it does mean new techniques of working through him in other industries."

Weiss says there will probably be fewer store-type discount houses at end of 1957 compared with 1956, but total amount of merchandise moved this year by discount houses will far exceed total of any previous year.

Outraged protest against Oct. 14 *Time* cover story on TV repairmen (Vol. 13:41) was filed this week by editor Albert J. Forman of *Electronic Technician Magazine*. "You can be well ashamed of this untidy piece of journalism," he wrote managing editor Roy Alexander of *Time*. It "was truly a distorted piece of reporting, and a slander of the thousands of repairmen who work long hours for too little income & appreciation," Forman said. He told Alexander that "most important point" in *Time* story was "half-hearted admission that 'the great majority of repairmen are honest enough,'" yet it was buried in "middle of 5 pages of twisted tales of dishonest & incompetent repairmen and disgruntled homeowners."

Hoffman's "Solaradio"—transistorized, with sun-powered battery charger—has been reduced to \$99.95 from \$150 because of "substantial savings in manufacturing costs" due to increased demand. Without solar cells, regular battery version of same set was reduced from \$75 to \$60.

Radios shipped to dealers in first 8 months of 1957 totaled 4,788,006, compared with 4,491,795 in similar 1956 period, EIA reports. Aug. shipments were 769,770 vs. 581,808 in July and 579,102 in Aug. 1956.

Trade Personals: Frederick H. Guterman, ex-American Bosch Arma, named gen. mgr. of DuMont Labs technical products div., succeeding Irving G. Rosenberg, resigned . . . Robert E. Rutherford Sr. promoted to staff asst. to Stanley J. Koch, DuMont Labs v.p. for tube operations; Kenneth F. Hoagland to tube engineering director . . . Arthur A. Brandt retires Oct. 31 after 40 years in appliance marketing, last 20 years with GE where he's been gen. sales mgr., TV receiver dept. . . Ernest L. Hall, ex-Canadian Aviation Electronics, appointed staff asst. to Emerson pres. Benjamin Abrams . . . Howard Main promoted to merchandise mgr. of Dominion Electrohome Industries Ltd., Kitchener, Ont. . . Milford S. Klinedinst, from Farnsworth Electronics, named consumer marketing director of IT&T subsidiary International Standard Electric Corp., assigned to North & South America, Australasia, Far East . . . Maj. Richard J. Lavoie (ret.), ex-Army Intelligence Center, Ft. Holabird, Md., named security director of IT&T . . . Frank J. Bias promoted to transmitter engineering mgr. of GE's technical products dept. . . George H. Fass resigns as national sales mgr., DeWald Radio . . . Vin Zeluff, ex-managing editor of *Electronics* (McGraw-Hill), appointed managing editor of *Popular Electronics* (Ziff-Davis) . . . Edward Link named Emerson midwest district mgr., head-quartering in Pittsburgh.

■

Edgar N. Greenebaum Jr., Chicago financial analyst specializing in electronics, leaves Oct. 20 for 3-week tour of Europe, will attend international atomic energy conference in Vienna.

■

EIA Reports Set Totals: TV shipments to dealers totaled 3,460,100 in first 8 months of 1957, when production was 3,756,533, according to EIA state-by-state report. They compare with shipments of 3,761,116, production of 4,365,060 in similar 1956 period. Aug. shipments were 490,849, compared with 465,285 in July and 535,936 in Aug. 1956. Here's 8-month report (county-by-county tables available to EIA members):

State	Total	State	Total
Alabama	50,658	New Jersey	128,282
Arizona	21,485	New Mexico	13,688
Arkansas	29,874	New York	409,448
California	342,856	North Carolina	68,686
Colorado	27,460	North Dakota	10,620
Connecticut	56,055	Ohio	193,788

Montana	15,384	Hawaii	7,276
Nebraska	24,262		
Nevada	5,574	GRAND TOTAL	3,460,100
New Hampshire	9,410		

Masters Wins Fair Trade Case: "Fair trade" suffered another blow this week when U. S. Supreme Court in effect upheld right of out-of-state mail order house to sell products in fair-trade states at less than fair-trade prices.

Court refused to review lower court ruling that Masters Mail Order Co., Washington, can sell GE products in New York at lower than fair-trade prices. Appeals court had dismissed injunction against Masters, and GE carried case to high court (Vol. 13:25, 28, 30). Injunction suit was brought after Masters' Washington outlet advertised GE small appliances in N. Y. papers at prices at which it would have been illegal for N. Y. retailers to sell them.

GE had said that this practice gave the out-of-state store a "free ride on the advertising done by GE and the sales efforts of every retailer who rents space to display GE products or hires salesmen to sell them."

Masters pres. Stephen Masters hailed this week's news with announcement that Washington store will advertise GE products for sale at less than fair-trade prices in newspapers and magazines throughout country (all but 14 states have fair-trade laws). "Our victory again points out the fact that fair-trade laws, unfair to all, are for all practical purposes meaningless and dead," he said. "Fair trade is falling fast."

Magnavox unveiled new non-metal 17-in. portable TV set (Vol. 13:36, 38) at Ft. Wayne plant this week. Wood-&-composition "Greenbrier" model, replacing metal portables which were discontinued following Skokie, Ill. electrocution (Vol. 13:29, 31-32), is designed as second home set to harmonize with furnishings rather than for outdoor use. Mahogany lists at \$170; oak & cherry \$180, uhf \$20 more.

Marketing seminar, sponsored by West Coast Electronic Mfrs. Assn., starts Oct. 29 at Roosevelt Hotel, Hollywood, takes up techniques of developing new markets and sales of new products. Meetings, to be conducted by Los Angeles marketing consultant Edward A. Altshuler, will also cover marketing research and analysis, sales planning and direction, advertising and public relations.

U. S. Tariff Commission has scheduled Feb. 4 hearing on charges by Brush Electronics Co. (div. of Clevite Corp.) and The Astatic Corp. of unfair competition in import and sale of unspecified foreign phonograph pickup cartridges, elements, and needles.

Motorola introduces all-transistor portable radio—"Weatherama"—which receives standard broadcasts, govt. weather broadcasts and long wave aeronautical beacon bands. Set is priced at \$80, will be shipped after Nov. 1.

RETMA of Canada reports TV distributors sold 233,238 sets to dealers in first 8 months of year, compared with 313,285 for similar 1956 period. Sales for Aug. were 39,083 vs. 61,058 in Aug. year ago.

NARDA's 1958 appliance trade-in guide, *Home Appliance Blue Book*, covering appliances but not TV, will be published Nov. 15 by National Appliance Trade-In Guide Co., 2105 Sherman Ave., Madison, Wis.

Admiral moves headquarters next week from Merchandise Mart back to former location, 3800 Cortland St., Chicago 47 (Spaulding 2-0100).

Top 100 Defense Firms: GE kept its No. 1 position among companies heavily engaged in electronics in new list of 100 top prime defense contractors released by Pentagon. As in earlier rankings reported in April (Vol. 13:16), GE was fourth among all defense firms in July 1, 1950-Dec. 31, 1956 tabulation by Defense Dept., in which Boeing replaced GM as biggest contractor among first 10: Boeing, GM, United Aircraft, GE, Douglas Aircraft, North American Aviation, General Dynamics, Lockheed Aircraft, AT&T, Curtiss-Wright. Electronics and related firms generally maintained their relative rankings in cumulative 1950-1956 and Jan. 1, 1955-Dec. 31, 1956 figures given by Pentagon in separate tables. We've consolidated 2 new "top 100" lists in table below to show electronics standings (all dollar figures in millions, dashes after company's name indicating it was not among first 100 prime contractors for period):

	July 1950- Dec. 1956		Jan. 1955- Dec. 1956	
	Contracts	Rank	Contracts	Rank
GE	\$5,024.1	4	\$1,289.8	5
General Dynamics	4,493.4	7	1,758.2	2
AT&T	2,773.0	9	1,015.3	7
Sperry Rand	1,584.6	14	306.5	21
Bendix Aviation	1,518.9	16	371.1	17
Westinghouse	1,375.8	19	227.6	23
RCA	1,060.0	21	307.6	20
IBM	837.2	24	450.6	14
Avco	738.2	28	215.9	24
Raytheon	687.4	31	313.2	19
IT&T	624.0	34	98.1	47
Philco	562.0	37	157.7	30
Collins Radio	436.8	45	95.3	49
General Precision Equipment	355.5	56	131.5	35

American Bosch Arma	291.6	62	106.9	42
Hazeltine	225.2	73	—	—
Sylvania	223.1	74	—	—
Mass. Inst. of Technology	216.1	77	83.9	52
Motorola	205.4	82	52.6	78
Dynamics Corp. of America	176.4	91	48.3	88
Admiral	157.8	98	—	—
Burroughs	—	—	109.4	40
Lear	—	—	60.4	69
Standard Coll	—	—	53.7	76

Among "favored 50" of investment trusts are only 5 concerns directly or indirectly identified with one phase or another of electronics, according to *Guide to Investment Company Portfolios* issued by Vickers Associates Inc., 52 Wall St., N. Y. They're IBM, ranked second (in Vickers' evaluation) as of last June 30, with 3.72% of its stock held by closed or open-end trusts; GE, 14th, 1.46%; Minnesota Mining, 31st, 3.22%; AT&T, 33rd, 0.42%; Westinghouse, 45th, 3.44%. (For complete tabulation, with Dec. 31, 1956 and Dec. 31, 1955 comparisons, see Oct. 5 *Business Week*.)

Dividends: Gross Telecasting, 40¢ plus 7½¢ on "B" common, both payable Nov. 8 to stockholders Oct. 25; Aircraft Radio, 20¢ plus 10¢ year-end special, both Nov. 13 to holders Oct. 30; Oak Mfg., 35¢ Dec. 13 to holders Nov. 29; Capitol Records, 25¢ Dec. 31 to holders Dec. 16; Siegler, 20¢ Dec. 1 to holders Nov. 15.

New recommended standards distributed by EIA to members: RS-196, "Fixed Film Resistors (High Stability)," 60¢, and RS-197, "Power Filter Inductors for Electronic Equipment," 50¢. Copies are available from EIA Engineering Dept., 11 W. 42nd St., N. Y., for minimum \$1 order.

Merger of Electric Storage Battery Co. & Ray-O-Vac Co. has been approved by directors of both companies. Plan providing for exchange of one Electric Storage share for each 2 shares of Ray-O-Vac will be submitted to stockholders of both companies at special meetings Nov. 19.

Financial Notes: Net income of Sylvania in 3 months ended Sept. 30 was around \$1 per share vs. 46¢ in disappointing second quarter of 1957 (Vol. 13:30)—and earnings for rest of year should exceed that rate, pres. & chairman Don G. Mitchell said in interview in Oct. 16 *Wall Street Journal*. Formal report on third quarter is due next week.

Mitchell said third-quarter sales this year, helped by upturn in TV sets first noted in June, were nearly \$90,000,000, up from \$84,000,000 year earlier, when earnings hit record of \$1.15 per share for period. For 9 months of 1957, he estimated sales at close to \$252,000,000, compared with \$246,000,000 in corresponding 1956 period. But he thought net for all 1957 would run 5%-10% below \$14,835,389 last year, working out to \$4.10 per share.

As of today, TV set business has much more wholesome tone than it had year ago, Mitchell told *Journal*, pointing out that fierce competition in 1956 led to overproduction, high inventories, soft retail prices. He said that with inventories more in line now with sales, set production is likely to reach 3,800,000 in second half, with sales at 4,000,000.

He saw price as continued deterrent to sales of color sets, predicting that until it falls to about \$400 from discount-&-trade-in retail level of \$500-\$550, color will make little inroad.

* * * *

General Instrument earned \$169,599 (12¢ per share) on sales of \$8,157,605 in second fiscal quarter ended Aug. 31 vs. \$119,916 (9¢) on \$8,311,834 in corresponding 1956 period. First-half income was \$247,053 (18¢) on \$15,200,170 compared with \$35,561 (2½¢) on \$13,979,913 year earlier. Gains in earnings were due to development of General Instrument "into a broad-based electronics firm" from one engaged largely in making TV-radio components and to "operating efficiencies made possible by closer integration & control" of manufacturing divs., according to chairman Martin H. Benedek. He foresaw "continuing earnings progress through the third & fourth quarters."

Allied Artists had net loss of \$1,783,910 in fiscal year ended June 30, after giving effect to \$675,000 federal income tax credit. Company gave no explanation for loss, which compared with net income of \$371,875 (27¢ per share) in preceding fiscal year. But in earlier statement predicting loss (Vol. 13:24), pres. Steve Broidy said Allied Artists had discontinued producing unprofitable films in \$400,000-\$600,000 bracket, that current fiscal year would show better results. At close of fiscal 1957, company had backlog of 14 pictures awaiting release, inventories of \$5,615,000 vs. \$9,219,000 year earlier.

GE set new records in earnings & sales for third quarter and first 9 months this year. Net income in quarter ended Sept. 30 was \$55,165,000 (63¢ per share) on sales of \$1.047 billion compared with \$47,863,000 (55¢) on \$1.003 billion in corresponding period year earlier. For 9 months, earnings were \$182,988,000 (\$2.10) on \$3.169 billion vs. \$160,727,000 (\$1.85) on \$2.962 billion in first 9 months of 1956. Wages & benefits of \$1.189 billion paid employes and payments of \$1.426 billion to suppliers also set 9-month records, according to GE pres. Ralph J. Cordiner.

Litton Expands Again: Litton Industries, which recently acquired Aircraft Radio Corp. (Vol. 13:41) and Maryland Electronics Mfg. Corp. (Vol. 13:38), is absorbing Monroe Calculating Machine Co. in deal already approved by 80% of latter company's stockholders, according to joint announcement of merger Oct. 15. Monroe holders are offered choice of 1½ shares of Litton common for each share of Monroe common or ½ share of Litton \$100 par value 5% pfd. for each share of Monroe common, of which about 300,000 are outstanding. Litton v.p. Roy L. Ash said special stockholders meeting will be called soon after annual meeting Oct. 26 to vote on proposed increase in common stock and authorize new issue of \$100 par cumulative convertible pfd.

Storer Bcstg. Co. earned \$820,008 (33¢ per share) in third quarter ending Sept. 30, compared with \$1,066,019 (43¢) in corresponding 1956 period, company ascribing dip in part to "substantial" costs of reorganizing WVUE, Wilmington, after acquisition of station (then WPFH) in spring (Vol. 13:13). Expenses there "have adversely affected operating results for the third quarter, but current bookings at WVUE are encouraging," Storer said. For 9 months, earnings were \$5,249,492 (\$2.12) vs. \$3,911,464 (\$1.58) in comparable period last year.

General Tire & Rubber reports consolidated net income of \$8,545,592 (\$1.61 per share), including earnings of \$599,294 from subsidiary RKO Teleradio Pictures, in 9 months ended Aug. 31, vs. \$6,059,025 (\$1.17) in corresponding 1956 period, when RKO Teleradio wasn't counted. Sales this year were \$311,091,049, compared with \$278,192,007 year earlier. "Our profit for the current 9-month period before including the RKO Teleradio earnings was 4.2% ahead of the comparable 1956 period," General Tire pres. Wm. O'Neil said.

Official Films Inc., whose pres. Harold L. Hackett reports to stockholders this week that it now syndicates 27 series with total of 1319 films, in June 30 annual report discloses \$983,000 earnings before taxes on sales of \$6,500,000, up from \$908,906 gross profit on \$6,100,000 sales in 1956 fiscal year. Paid-in surplus stood at \$1,738,200 as of June 30, 1957, earned surplus \$692,904, with net income of \$437,831 after taxes.

E. J. Korvette Inc., N. Y. appliance store chain, had sales of \$71,200,000 in fiscal year ended Sept. 28 vs. \$54,900,000 year earlier, according to pres. Wm. Willensky. He said that sales in 13 weeks to Sept. 28 were \$18,155,143, compared with \$14,155,143 in corresponding 1956 period, that volume in last month of 1957 fiscal period was 41.6% ahead of last year.

New IT&T subsidiary—IT&T Electronics Service Co. of Canada Ltd.—has been organized in Montreal for engineering, installation, operation & maintenance of microwave, radar & other electronic equipment. J. T. Robertson, from IT&T telephone & radio operating dept., N. Y., heads new company.

Magnavox continues optimistic about future of color TV; annual report says 2 new models will be introduced in fall. But it adds: "We continue to feel, however, that there will be no revolutionary switch from black-&-white to color TV receivers but that the growth will be gradual."

Guild Films earned \$616,473 (40¢ per share) in 9 months ended Aug. 31 vs. net loss of \$8,172 in corresponding period of preceding fiscal year.

WJR, The Goodwill Station Inc. earned 67¢ per share in 9 months ended Sept. 30 vs. 69¢ in same 1956 period.

Monthly hi-fi magazine to be sold by hi-fi dealers will be started in Jan. by Ziff-Davis Co., N. Y.

Seeing-Eye Sputnik: Ominous speculation that Soviet space satellite may be acting as super-spy by means of TV—which would have been dismissed as sheer science fiction 2 weeks ago—didn't seem so far-fetched this week with the revelation that Uncle Sam has been working on a lunar Zoomar of his own for last 10 years.

Aviation Week reported Oct. 14 that Air Force-sponsored Pied Piper project (nicknamed "Big Brother") is code name for earth-circling reconnaissance satellite (weapon system No. WS-117-L). Lockheed Aircraft Corp. was identified as head of team working on project, with CBS named as its "probable" electronic teammate and Eastman Kodak as participant. Though this project dates back only to early 1956, magazine says Rand Corp. has been working on similar projects for 10 years, with Aeronutronic Systems Inc. (Ford Motor Co. subsidiary) also conducting studies. All 3 are working under Air Force auspices, article states.

Meanwhile, N. Y. Herald Tribune Syndicate columnist Stewart Alsop and others expressed view that Russia's sputnik is able to "see" somehow—either by TV, film camera or a telemetering system. But Dr. Joseph Kaplan, chairman of U. S.

National Committee for IGY, was quoted in *U. S. News & World Report* as stating that TV-equipped satellite is still a "dream."

Earthbound TV continued to do top-notch job of informing public about satellite, and last week end viewers actually "saw" sputnik from their living room armchairs. Claiming the "first" was Westinghouse Broadcasting Corp., whose WJZ-TV, Baltimore, filmed satellite from display tube of Bendix Aviation's light amplifier, which magnifies light 10,000 times. Films were speeded up so viewers could see actual motion of satellite across screen. They were fed by Boston's WBZ-TV to Westinghouse's other TV stations on live hookup evening of Oct. 13, and fed to NBC-TV affiliates later for 11 p.m. newscast. Also in time for 11 p.m. news shows, another set of "first films" of sputnik arrived from Australia.

Two new Armed Forces TV stations have gone on air in Korea—originating station at Seoul (Ch. 3) with Ch. 12 satellite, first of 4 repeater stations in Korean "network." Other 3 stations are now being installed. After Korean stations are on air, AFTV hopes to start work on Midway Is. outlet.

Radio interview with murder case defendant resulted in mistrial Oct. 16—and citation of Jean LaGrange of WLOI, La Porte, Ind., for criminal contempt of court. In broadcast interview, Robert Lee Johnson, who had gone through 3 previous no-decision trials, told LaGrange that his counsel had promised him suspended sentence if he pleaded guilty to manslaughter, but that he refused because he wanted to be "vindicated." LaGrange then commented that attorneys & court were guilty of unethical practices in making purported offer. Prosecution & defense lawyers moved for mistrial. Ordering it, Special Judge Harry Long found LaGrange in contempt, sent him to jail for 2 hours before \$1000 bond was raised, set hearing for next week.

Small TV & radio stations should be exempt from overtime pay provisions of Fair Labor Standards Act, Sen. Allott (R-Colo.) told Region 7 NARTB conference Oct. 17 in Brown Palace, Denver. He said he would seek an amendment to wage-hour law at next session of Congress to put employes of smaller stations in same category as exempt employes of small newspapers. "Nobody has presented any real reason why in an extremely high paid industry like yours, the Govt. should require a particular [40-hour] work week," Allott said in speech to broadcasters. NARTB advocates exemption of stations which operate outside standard metropolitan areas (50,000 or more population around central city).

Network TV & radio advertising volume was unchanged in Aug. compared with July, while weekly magazines showed 8% increase and newspapers 6%, according to national index in Oct. 18 *Printers' Ink*. Business papers and outdoor advertising were down 6%.

TV film reruns in summer, disparaged as unworthy fare by many newspaper critics, actually are welcomed by more than half of N. Y. viewers who saw some programs earlier, according to Pulse survey in Oct. 7 *Television Age*. Pulse queried 1000 viewers, found 563 saw "advantages to the viewer" in TV repeats, while 333 didn't, 104 had no opinion. Of 672 viewers who had watched reruns in 4-week period, 56.1% said they "enjoy seeing a good program a second time," 27.1% had "nothing better to watch," 20.3% started to watch repeats before they realized they'd seen them before.

Two applications for TV stations and 5 for translators were filed with FCC this week, bringing total to 118 (34 uhf) for stations, 46 for translators. Station applications: for Louisville, Ky., Ch. 15 by Louisville Free Public Library; for Norfolk, Va., Ch. 13 by owners of WBOF, Virginia Beach. Translator applications were for Leadville, Colo., La Grande, Ore. & 3 for Evanston, Wyo. [For details, see *TV Addenda 25-L* herewith].

Kate Smith returns to network radio early next year with daytime program on MBS, pres. Paul Roberts announced Oct. 16. She was with Mutual 1948-50, switched to daytime show on NBC-TV in 1950, retired in 1953 after 25 years of broadcasting. Roberts said she represents "first step in a long-range plan we are now undertaking to bring more & more name personalities" to MBS.

Tribute to TV—"The Fabulous Infant"—will be subject of Nov. 10 *Wide Wide World*, for which NBC says it has obtained "cooperation" of ABC & CBS. It's understood program, mainly from Hollywood, will use film clips and perhaps stars furnished by NBC's competitors.

SUMMARY-INDEX OF THE WEEK'S NEWS — October 26, 1957

RCA COLOR TAPE perfected; commercial production due late in 1958. New machine compatible with Ampex recorder, heralding uniform standards (p. 2).

NEW BROADCAST LEGISLATION covering networks, allocations and subscription TV to be explored by House Commerce Committee, Harris says (p. 3).

NO PAY-TV APPLICANTS yet, money looming as important barrier; Zenith seen most likely angel. Robert Sarnoff blasts toll TV (p. 4).

FIRST NEWS FILM transmitted across ocean by cable shown by BBC-TV. Using wirephoto methods, technique seen promising though expensive (p. 7).

TV-RADIO TIE-IN HIT by FTC examiner's ruling against 6 grocery producers in promotion plan involving 3 networks, "favored" chains (p. 8).

RCA CALLS SALES "SPOTTY," blames decreasing factory average price on portable volume. Ratio of RCA 17-in. portables running 3-1 over 14-in. (p. 12).

WLWI, INDIANAPOLIS, cleared by FCC, aims for Oct. 30 start. KPTV, Portland (Ch. 12) seeks Ch. 2. KGUL-TV, Galveston, wants shift to Houston (p. 9).

NEW TV STATION serving Beaumont-Port Arthur, KPAC-TV begins programming; uhf WLEV-TV, Bethlehem, Pa. leaving air with \$500,000 loss (p. 11).

RECORD 9-MONTH SALES reported by RCA & Sylvania; Philco comes back strong, profit tripling last year's figure; Hoffman profit up (pp. 14 & 15).

BIGGEST AD YEAR with \$10.4 billion volume—up 5%—seen by Printers' Ink; 1957 TV billings estimated at \$1.015 billion, radio gains 28% (p. 16).

CENSUS BUREAU'S NEW TV HOUSEHOLD TALLY: Total TV homes in U. S. reached 39,800,000 of nation's estimated 49,606,000 homes—roughly 80%—according to Advertising Research Foundation report based on April 1957 Census Bureau Survey. Last survey, in Feb.-March 1956, counted 35,495,000 TV households with at least one set.

Current survey says there are 2,500,000 homes with 2 or more sets. Previous multi-set home counts: June 1955, 1,100,000; Feb.-March 1956, 1,700,000.

Total number of sets in homes is 42,520,000, according to latest study, compared with 37,277,000 in Feb.-March 1956. This does not include sets in use in public places, hotels, etc.

This is fourth national survey handled by ARF, underwritten by networks, NARTB, TvB. On two previous occasions ARF has followed with county-by-county projection of these figures. However, spokesman tells us decision has not been reached on repeating county-by-county estimates.

Growth of number of TV homes now is tapering off as total gets closer to saturation and no major TV markets remain to be opened. Census of Housing in 1950 showed only 12% of all households had TV sets. Succeeding surveys went this way: June 1955, 67%; Feb. 1956, 73%; Aug. 1956, 76%.

TV household concentration continues in standard metropolitan areas, 87% reporting sets in April 1957 vs. 82% in Feb. 1956. Growth was more rapid outside these areas, survey showing 70% in April 1957 compared with 59% in Feb. 1956.

Breakdown by geographic regions: Northeast, 88% in April 1957, 80% in June 1955; North Central, 85% vs. 72%; West, 77% vs. 62%; South, 71% vs. 53%.

For comparison, NBC Research Dept. estimates (page 25, Television Factbook No. 25) 40,000,000 TV homes as of July 1, 1957, with 3,160,000 second sets, 1,340,000 in public places—total of 44,500,000.

COLOR TAPE'S HERE AND RCA'S GOT IT: Climaxing more than 5 years of efforts to devise substitute for color kines, RCA this week demonstrated perfected color video tape recorder and announced production models will be for sale in about a year.

From telecasting industry standpoint, happiest aspect of this week's development is fact that RCA recorder will be compatible with Ampex monochrome recorders which go into production next month. New recorder has same mechanical specifications—including speed and size of tape, rotation of heads, etc.

Meanwhile Ampex pres. George I. Long this week indicated that his company's approach to color (a conversion kit for its monochrome models which Ampex hopes to have available about the same time RCA color recorder is on market) will be same as RCA's, so that color and monochrome tapes eventually will be interchangeable between the 2 makes of machines.

Compatibility feature, forecast in Television Digest 2 weeks ago as result of Ampex-RCA exchange of tape recording and color patents (Vol. 13:41), ends threat of dual standards for video recording—precluding necessity of stations purchasing 2 or more separate recorders—even heralds the day when TV tapes may be syndicated in same manner as film.

■ ■ ■

Color and monochrome TV pictures from RCA recorder left little to be desired at demonstration showing. To us, both appeared superior to best film. Color tones and registration were good, as was reproduction of detail—and pictures definitely had "live" quality. Monochrome pictures from color tape were excellent, with very good grey scale. Only noticeable imperfection was occasional appearance of "drop-outs"—little white dots and streaks caused by defects in tape—a weakness also common to Ampex recordings but rapidly being overcome by tape manufacturers.

Demonstration was held at RCA's compact Johnny Victor Theatre in Radio City, consisted of segments of last week end's NCAA football, Perry Como, Steve Allen & Hit Parade colorcasts—which had been recorded at Camden RCA plant via microwave from NBC's WRCV-TV, Philadelphia, with playback again microwaved to station and relayed to New York by AT&T line. Two 21-in. sets—one color and one monochrome—were used for demonstration. No live or filmed pictures were shown for comparison.

Tape recorder itself is in Camden, wasn't seen except in photographs distributed to newsmen attending. But RCA industrial electronics chief engineer Dr. George H. Brown described prototype recorder as rack-mounted, occupying but not completely filling 5 racks.

■ ■ ■

First commercial deliveries of production model color tape recorders are scheduled for "latter 1958," according to industrial products v.p. Theodore A. Smith, with some engineer-built prototypes to be put in use early next year—first ones presumably going to NBC-TV Hollywood studios.

It's too early to estimate price of production units, he insisted. Under questioning, he expressed hope that it would be kept "under \$100,000." Ampex's prototype monochrome recorders cost \$75,000 each and production models will be sold for \$45,000. Ampex delivered 13 prototypes—5 to CBS, 3 each to ABC & NBC, 2 to govt. agencies for instrumentation recording use.

RCA has no current plans to produce monochrome recorders, Smith said—maintaining that its color recorder is complete and can be used for all purposes, including recording and playback of black-&-white shows.

Like Ampex monochrome machine, RCA color recorder uses 2-in. wide tape, running at 15-in. per second, with 3 revolving record-&-playback heads, and can record 64-min. program on 14-in. reel. It uses same tape as Ampex machine, has same erasure and re-use features—and presumably same problem of extreme difficulty in editing and splicing.

Picture displayed this week was far cry—both in quality and approach—from RCA's first color tape "progress report" in Princeton in Dec. 1953, when it used 1/2-in. tape at 30 ft. per second, requiring 17-in. reel of tape for 5-min. show (Vol. 9:49).

Ampex pres. Long commented indirectly on RCA achievement in his observations on RCA-Ampex cross-licensing agreement in Oct. 24 address to Security Analysts Society of San Francisco:

"Color TV is essentially an RCA problem. They have spent millions of dollars in an attempt to get their color TV program under way and their hope is to recover these vast sums through the sale of color TV sets. Their problem has been made more difficult because of the extremely poor quality of the film process for reproducing color TV pictures . . .

"Our interest is somewhat different, obviously, than RCA's, because we are not in the business of selling color TV sets. At the same time our whole black-&-white video tape recorder program could be imperiled if it became apparent that color TV was going to substantially replace black-&-white and we were without an answer for it.

"The technical breakthrough to reproduce color pictures on magnetic tape has been accomplished. When equipment will actually be available for sale I am not in a position to say. With the cross-licensing arrangement . . . we are now in a position to assure the purchaser of our black-&-white video machines that for an additional sum we will be able to supply them with a conversion unit which will make their machines capable of recording and reproducing either black-&-white or color pictures. At the same time, RCA has the right to our video tape patents to produce competitive equipment.

"It now appears that we will have an industry with standard specifications and with at least 2 companies supplying equipment."

Ampex's production plans for black-&-white recorders were indicated this week in company house organ, "Ampex Recorder," which said the 100 production-model recorders now on order "will be in service by midsummer of next year." Among refinements in production units will be interchangeability of recorded tapes among different machines, miniaturization of parts and greater accessibility for repair, provision for remote control. NBC reportedly is scheduled to get 2 more Ampexes in Jan., 6 in Feb.

HARRIS OUTLINES CONGRESS TV-RADIO PLANS: Chairman Harris (D-Ark.) of House Commerce Committee thinks it may be time for some important changes in TV-radio regulation, and he outlined to NARTB Memphis regional conference this week the 3 major studies his committee plans to make next session with an eye to amending Communications Act, broadcasting's legislative charter:

Frequency Allocation—He thinks it may be time for Congress to take over allocations reins, a major and radical departure from current procedure. He sees as a necessity "an examination whether the tremendous developments which have taken place in the field of communications require a new statutory approach to the problem of distributing available spectrum space among governmental as well as private claimants."

He urged re-examination of current divided allocations responsibility—the President for governmental users, FCC for all others. "Few persons would consider it in the public interest for the Congress to appropriate annually a lump sum of money for the operation of our Govt. and to leave to the President the unlimited discretion as to what portion of these funds he wants to use for the national defense and what portion for all other purposes," he said. "Still, that essentially is the situation today with regard to spectrum space, which is a commodity much scarcer than money."

■ ■ ■

Networks—Harris plans to give high priority to recommendations arising from FCC's network study. "Specifically," said the congressman, "Congress should determine to what extent, if any, it must give up reliance on the forces of competition to produce results in the field of TV broadcasting and what additional powers, if any, should be granted to the FCC to counteract the concentration of power now existing in this field."

Subscription TV—Having already announced his Committee plans hearings on fee TV shortly after Congress reconvenes in Jan., Harris said: "Subscription TV offers an outstanding opportunity for further concentration of power in the field of broadcasting, and hindsight shows that the Commission's

efforts to cope with the concentration of power in the hands of the networks and other multiple station owners have proven unsuccessful."

He added that Congress has the responsibility to "scrutinize what protection the public interest requires [with regard to fee TV] so that the country will not again be presented with a situation of trying to lock the barn after the horse has been stolen."

■ ■ ■

Harris suggested possibility of putting 10-year time limit on Communications Act—which "might act as an automatic reminder to the Congress" that FCC's regulatory power "must be re-examined in the light of new developments."

Discussing his Committee's legislative oversight (Moulder) subcommittee investigation of regulatory agencies, he assured telecasters that the inquiry "does not include the review of individual cases with a view of changing the results in any such case."

Rather, he said, subcommittee is attempting to "determine whether or not existing patterns of handling individual cases are satisfactory, and, if these patterns are found to be unsatisfactory, whether this is due to the failure on the part of the agency to observe the law or due to inadequate provisions contained in these laws."

TOLL TV—NEXT MOVE UP TO PROPONENTS: Now that the pay-TV chips are down in some fuzzy sort of fashion—i.e., FCC decided it will permit tests (Vol. 13:42)—everyone seems to be waiting for someone else to ante up.

Washington attorneys report that FCC's announcement has stirred almost no response from station clients. A few former uhf operators, eagerly hunting pay system angels, are seeking to get into the swim. Their chances seem slim, since pay promoters would naturally incline to vhf operators and since toll tests are limited to 4-signal markets—where uhf faces enough handicaps already.

Commission itself has heard nothing at all from stations since test decision was issued. Previously, it had bright-eyed inquiries from 3 small-town citizens who asked, in effect, "How do we get into this?"

Question: Who's going to put up the money? It looks like Zenith, if anyone. It has plenty of capital, along with deep, long-nourished yearning to show up commercial TV. Skiatron and International Telemeter just don't have the cash, would have to get it from the public—if public can be persuaded.

Public may be hard to persuade. Special Pulse survey of San Francisco & Los Angeles, for example, indicates that Giants & Dodgers may well take in less money by offering games on wired pay TV than by selling rights on free TV—causing Pulse director Sidney Roslow to speculate that "more people will go broke trying to get it off the ground than will ever make a mint out of it" (see p. 5).

Conditions imposed on stations for subscription tests are totally unrealistic, according to one former uhf operator who has been hot on the toll TV concept. Lou Poller, onetime operator of WCAN-TV, Milwaukee, says that restrictions are "enough to kill the idea." He said he plans to petition Commission to amend rules to restrict pay TV tests to uhf stations only and to one station in each market. "If they restricted it to uhf," he said, "they'd get 2000 applications. As it is, the networks are the only ones who can go into it. And one station would have trouble getting enough programming material in each market. What would 4 do for product?"

■ ■ ■

Question of choosing among station applicants has been raised by some attorneys. FCC limits each "system" to 3 markets. Commission sources say it's up to system owners to choose, in event more than 3 stations seek franchises. But there's lot of feeling in Washington that question is academic, that there'll be no plethora of applicants giving system owners the delightful chore of choosing.

■ ■ ■

One of the best statements of opposition to pay TV to date came this week in speech by NBC pres. Robert W. Sarnoff, addressing luncheon in his honor by WIIC, Pittsburgh. If fee TV does eventually

replace free broadcasting, he said, "we, like the public, will have no choice but to follow the pay tide."

Inevitably, he said, free TV must offer same type of programs now presented free—sports, drama, film, culture—and "box-office revenue would enable pay-TV to outbid free TV for programs, even if the pay audience were much smaller." By siphoning off the major attractions, pay TV would shrink free TV's advertising base and either kill it completely or reduce it to "marginal" type of service.

Argument that public will be able to choose between free or pay programs "crumbles under examination," said the NBC pres., taking Giants & Dodgers as example. If they go on pay TV, he charged, only choice left to those who wish to see baseball will be "pay-or-you-don't-see." Subscription TV, he added, "can succeed only by devouring the substance of free TV."

Sarnoff could see no practical difference between broadcast and wired pay systems—end result being "replacement of a broad-based free service by a narrower service with a price tag on it."

While toll-TV prospect might be "tempting" to networks and conceivably could provide larger profits than free broadcasting, he said public interest requires maintenance of free system. "Indeed, if self-interest were the prime consideration, we might well be hedging by laying out a stake in pay TV ourselves; or at least by adopting a non-committal position."

He took inferential swipe at FCC's Barrow report with charge that "a governmental study staff" is giving aid & comfort to toll-TV forces by "tampering with the delicate mechanisms of the broadcasting structure." If the network operation "weakens or fails, pay-TV will not falter in taking over."

Can Pay TV Pay Off? Pulse Inc. director Sidney Roslow thinks it can—eventually. But results of Pulse surveys in Los Angeles & San Francisco have convinced him it will have tough sledding initially, and he predicts that "neither the Dodgers nor the Giants will go pay TV just yet." He revealed results of these toll-TV surveys, plus one made in New York, at AFA district conference at Norfolk last week end. N. Y. survey indicated that while more than 250,000 TV homes would pay to see televised movie while it is playing at Radio City Music Hall, "it is questionable whether these people would pay enough to make the showing of first-run top-quality movies feasible." In N. Y., a top movie could gross \$270,000 from pay TV as opposed to \$150,000-\$160,000 at Music Hall in addition to neighborhood theatres. In Los Angeles & San Francisco, Pulse found 13% of TV homes would pay to see baseball games, but largest number drew the line at 50¢ a game as top price, and most weren't willing to view more than 2 games a week. At the 50¢ price, this would mean \$65,000 a game for Dodgers (twice as much as they averaged in Brooklyn from TV-radio & ballpark tickets) and \$33,000 for Giants (50% more than at Polo Grounds). But since 2 games a week appears to be saturation point for toll TV, Roslow concludes that teams would actually take in less money via pay TV than by following their former policy of restricted free TV. (Since Roslow didn't mention gate receipts of the Cal. teams in computing his comparisons, apparently he feels they would play to empty ballparks on days they were being toll-televised.)

First educational TV series produced by new Organization for National Support of Educational TV (ONSET), Chicago (Vol. 13:37), is *The World of Medicine*, sponsored by Schering Corp. Cooperating in 13 half-hour filmed programs, with doctors & nurses as actors and clinics as locale, were American Heart Assn., American Hospital Assn., National Education Assn., Optical Society of America, American College of Radiology. Series covers radiology, blood pressure, rheumatic fever, eye, heart, brain, hormones, dentistry, speech. Headed by ex-chairman Edward L. Ryerson of Inland Steel Co., ONSET advocates commercial sponsorship of educational programming.

TV does "Herculean" job of good programming, FCC Comr. Robert E. Lee said Oct. 23 in speech to Chicago Council 182 of Knights of Columbus. "If occasionally a presentation falls short of the mark," he said, "the wonder is not that every once in a while one misses, but that so many hit, if only in the outer rings of the target." Lee lauded NARTB's Code of Good Practice as demonstration by broadcasters of "real effort" to "eliminate much of the objectionable material from TV" and improve programming. However, he said, "audience rejection is by far the most effective method."

Fear of slander suit led to cancellation of *Manion Forum* just before it was scheduled to go on air Oct. 20 over MBS stations with taped speech by pres. Herbert V. Kohler of strike-harassed Kohler Co., Kohler, Wis. Mutual executives decided speech was "unacceptable" for broadcast because Kohler statements about United Automobile Workers leaders and police officials "may be held defamatory." Kohler offered to indemnify radio network, but Clarence B. Manion, former Notre Dame law school dean who heads *Manion Forum*, withdrew 15-min. program.

Pre-censorship of TV programs as well as movies & stage shows was advocated as "absolute necessity to the preservation of decent moral standards" by Rev. Gerald H. Kirwin, editor of *The Evangelist* of Catholic diocese of Albany, in address at Siena College, Loudonville, N. Y. "You would not let a child learn the danger of fire by putting its hands in the flames," he said, contending that without censorship "there will be chaos in the moral world, and then all sorts of conflict in the economic & spiritual worlds."

Union meetings on TV at home are new labor promotion gimmick of United Steelworkers, whose pres. David J. McDonald wants to show public as well as stay-at-home members how union's business is conducted. Series of 13 programs produced by Bob Post, Philadelphia film packager, shows McDonald giving reports on Steelworkers' progress, explaining how union money is spent, illustrating advantages of organization. Scheduled to start in Nov., series is planned for Sunday afternoon showings in 30 major markets where Steelworkers are concentrated.

Personal Notes: Thomas Velotta, ABC-TV v.p. & administrative officer for news, special events, sports & public affairs, assumes new network duties in Hollywood . . . Manny Reiner promoted to TPA v.p. in charge of foreign operations . . . Paul C. Conangle appointed Latin American sales coordinator of ABC Film Syndication . . . Henry W. Levinson promoted to sales development mgr. of ABN . . . Robert F. Hurleigh, in charge of Washington office, and Harold M. Wagner, in charge of programs, named MBS v.p.'s . . . Proctor Jones promoted to national sales mgr. of WNAC-TV & WNAC, Boston, and Yankee Network div. of RKO Teleradio Pictures . . . John E. Kilgore Jr., from Kilgore & Kilgore law firm, Dallas, becomes gen. partner of J. H. Whitney & Co., parent of Corinthian Bestg. Corp. . . . Frank Barron, from WJW-TV, Cleveland, promoted to national sales staff of Storer Bestg. Co., N. Y. . . . Paul Garrett, retired public relations v.p. of General Motors, elected a director of Teleprompter . . . John A. Kellogg, ex-Institute for Motivation Research, named v.p. & gen. mgr. of Forbes Marketing Research; Dr. Charles D. Forrest, ex-Forbes, appointed marketing professor at NYU School of Commerce, Accounts & Finance . . . Stanton Webb, ex-Paper Mate Pen, joins Jerry Fairbanks Productions, Hollywood, as sales director . . . Richard Bronson promoted to mgr. of WABI-TV, Bangor; John MacRae to mgr. of WABI . . . Carlos Rivera promoted to gen. mgr. of WAPA-TV, San Juan, replacing David H. Polinger, who resigns Nov. 1 to return to States; Helena Martinez Schettini named head of new sales service dept. . . . Glenn W. White promoted from program director to gen. mgr. of

KNAC-TV, Ft. Smith, Ark., succeeding Dick Campbell . . . Wm. D. Gibbs promoted from film director to program director of KNTV, San Jose . . . Arthur L. Smith, from KVTU, Sioux City, named managing director of news & special events of WHTN-TV & WHTN, Huntington . . . Gerald Thomas, gen. mgr. of radio WHIN, Gallatin, Tenn. promoted to exec. asst. to Dot Records pres. Randolph Wood who also controls WHIN . . . Wm. E. Anderson promoted from NBC trade press mgr. to program services mgr. of NBC-TV participating programs.

Obituary

Charles J. Feldman, 57, v.p. & gen. mgr. of Universal Pictures, died Oct. 23 of heart attack in N. Y. home. He joined Universal in 1929 as Sioux City branch mgr. after working in midwest for United Artists and World-Wide Pictures, rose to v.p. of company in 1953. He was past chairman of distributors committee of Motion Picture Assn. of America, noted as conciliator in disputes between distributors & theatre operators. Surviving are widow, brother, 2 sisters.

Richard Field Lewis Jr., 50, Winchester, Va. owning 6 stations and building a 7th, died Oct. 18 after collapsing in Washington hotel. He owned WRFL, Winchester; WSIG, Mt. Jackson, Va.; WFVA, Fredericksburg, Va.; WHYL, Carlisle, Pa.; WAYZ, Waynesboro, Pa.; WELD, Fisher, W. Va., and held CP for WAGE, Leesburg, Va. Surviving are his widow, 3 sons.

Edward A. Allen, 68, pres. of WLVA-TV & WLVA, Lynchburg, Va., died there Oct. 19 from heart disease after long illness.

ADVERTISING AGENCIES: Wm. M. Weilbacher promoted to v.p. & research director of Dancer-Fitzgerald-Sample . . . A. Burke Crotty elected TV-radio v.p. of Ellington & Co. . . . Lucien C. Rondot, who headed own market research firm, named marketing research director of Ketchum, MacLeod & Grove . . . Douglas C. Manson, ex-Benton & Bowles, joins creative dept. of Joseph Katz Co., which also makes these Baltimore office appointments: James A. Miller, TV-radio director; Stanley E. Blumberg, v.p. & gen. mgr.; Morris L. Milstein, production mgr.; George Fondersmith, art director . . . Alan Pottasch, ex-ABC, joins Kenyon & Eckhardt as international account executive . . . Willard Johannsen, ex-*Electrical Dealer*, joins staff of Needham, Louis & Brorby.

Regional merger of Burke Dowling Adams Inc. and Roy S. Durstine Inc., with joint offices at 3440 Wilshire Blvd., Los Angeles, will give former a southern Cal. outlet. Announcement of "reciprocal working agreement" says both agencies will retain corporate identities, but Durstine v.p. Wm. D. Sloan also becomes western div. mgr. of Burke Dowling Adams.

GE ad account for technical products dept. goes to Brooke, Smith, French & Dorrance for marketing of TV-radio broadcast equipment.

Tex. Assn. of Broadcasters elects: M. E. Danbom, radio KTBB, Tyler, pres.; Al Johnson, KENS-TV & KENS, San Antonio, v.p.; Joe Leonard Jr., radio KGAF, Gainesville, secy.-treas. New directors: Charles Jordan, KFJZ-TV, Ft. Worth; George Tarter, KCBD-TV, Lubbock; Jim Hairgrove, radio KFRD, Rosenberg.

National Community Antenna Assn. of Canada incorporates, elects: Fred Metcalf, Guelph, Ont., pres.; N. Dery, Bagotville, Que., v.p.; K. J. Easton, Montreal, Que., secy.; O. Girard, Magog, Que., treas.

Jail sentence of 45 days was handed out Oct. 23 to newscaster Jean R. LaGrange of radio WLOI, La Porte, Ind., for contempt of court for broadcast interview with murder case defendant which caused mistrial (Vol. 13:42). Special Judge Harry Long fined LaGrange \$250 and tacked on prison term on ground that broadcast "constituted a clear & present danger to the administration of justice in this case [and] reflected on the court as an institution." LaGrange told judge he had no intention of questioning court's integrity in broadcast, which reported "deal" had been offered accused slayer.

Carillon for Vatican exhibit at 1958 International Exposition at Brussels is being donated by RCA chairman Brig. Gen. David Sarnoff, according to Paul A. Haymans, Brussels banker who'll be Vatican's commissioner-general at fair. In White House visit Oct. 25, Haymans told President Eisenhower electric carillon will be one of world's largest.

Sole woman engineer on FCC staff is Miss Irma Galane, recently transferred from Defense Dept., where she served primarily in Navy Bureau of Aeronautics, to Commission's rules & standards div. Last woman engineer with Commission was Virginia Erwin Page, who left several years ago.

Father-&-son TV teams show how industry is reaching maturity despite mere decade of growth, Oct. 21 *Television Age* notes in article containing thumbnail sketches of second-generation executives of networks & stations.

FCC Comr. Richard A. Mack and UNESCO Mass Communications Dept. dir. Tor Gjesdal will be banquet speakers Oct. 31 at National Assn. of Educational Broadcasters convention in St. Louis' Statler Hotel.

Mennen Baby Foundation will award \$1000 for "outstanding contribution to baby care" by TV or radio program, book, newspaper editorial campaign, etc. Deadline for nominations at 430 Park Ave., N. Y., is Nov. 15.

Transatlantic Telemovies: News film transmitted across Atlantic by cable was telecast for first time on British TV Oct. 22 as result of cooperative effort by UP Movietone News and BBC, climaxing more than 2 years of exploration and tests by UP Movietone. More commonplace TV use of the technique depends on economics—whether telecasting industry is willing to spend the comparatively large amounts of money required for such brief snatches of quickly delivered film.

Film shown on BBC-TV lasted about 15 seconds (9 ft. of 16mm), though somewhat more was transmitted by UP Movietone. Film was taken at 10:10 a.m. in Staten Island, showing arrival of Queen Elizabeth & Prince Philip there. The exposed film arrived at processing lab about 11:45, was “out of soup” and dry shortly before 1 p.m. Transmission to Britain took about an hour, but BBC didn't show film until its usual 11 p.m. news show (7 p.m. N. Y. time).

Transmission via underwater cable used regular wirephoto techniques and equipment. Film was shot on 16mm positive film, printed on photographic paper as a negative, received in England as positive print on negative film stock. UP handled transmission at both ends. Scanning system was stepped up so that lines were 3 times as fine

as for regular newsphoto transmission and quality of resulting film was described as “very usable.”

The newsfilm which was used was actually sixth transmission in series of such tests, according to UP Movietone mgr. Wm. R. Higginbotham, who said 3 of the tests resulted in “completely usable” film. He added that transmission system gives good quality reproduction on close-ups, but not for distant scenes.

Higginbotham said radio transmission has also been tried for sending film across ocean, but has proven unsatisfactory because of distortion. Ideal system, he believes, would be to transmit from 35mm film print with scanning lines every 1/500 in., receiving station picking up reproduced pictures on 16mm film.

UP Movietone officials said cost details for such service hadn't been worked out. BBC news dept., meanwhile, is exploring same technique, plans cable transmission of news film to U. S. TV next time there's event of sufficient interest to American viewers.

Picture quality could be improved, it's understood, through development of equipment especially designed for scanning of motion picture film—if & when there's real demand for service.

Report on Japanese TV: Japan now has 17 stations on air, plus 4 satellites—with 5 more due to start by end of year—according to TPA foreign v.p. Manny Reiner, who returned this week from far east trip. As of Aug. 31, he said, there was total of 591,116 registered sets, plus about 160,000 unregistered sets. He said circulation is increasing at rate of 60,000 sets a month. Of total stations, 12 are owned by NHK, official semi-governmental network. Most popular screen size is 14-in. (about \$210), though 17-in. sets are also manufactured. American TV films are purchased under dollar allocations approved by govt., he said, total for year ended March 31, 1957 being \$166,000, for this year \$325,000. He quoted survey indicating that films are most popular Japanese TV fare, followed by sports, stage attractions, quizzes. Average TV receiver prices in other Oriental countries: Thailand, \$350; Hong Kong (wired TV), \$9.50 a month for receiver and 5 hours of nightly programs; Philippines, \$400.

“Tactile electronics”—transmission of sense of touch via wire and radio—is predicted in Nov. *Radio-Electronics Magazine* by editor Hugo Gernsback, who in his long career as popular scientific publisher has foreseen many of today's electronic advances. He points out that electronic principles behind “teletac” are already well-known, and looks into future when a telephone subscriber might “see, feel and order a suit or a bolt of cloth or any other merchandise across the continent,” or doctor might feel patient's pulse or take his temperature over the phone.

We goofed last week—as a number of cartographic-minded subscribers were quick to point out—in locating “northernmost TV station within U. S. borders” (Vol. 13:42). Actually, honor belongs to KVOS-TV, Bellingham, Wash., as a look at map should have shown us in the first place.

RCA shipped live color camera Oct. 23 to Smith, Kline & French, Philadelphia; 3-V color film camera Oct. 21 to WFBM-TV, Indianapolis.

More Cable Applicants: Directory of cable-theatre franchise applications (Vol. 13:41) is augmented by following, reported by trade publications, etc.: Cal.—Berkeley, Skiatron Inc.; Beverly Hills, Harriscope Inc.; Burbank, Harriscope Inc.; Carlsbad, Tele-Movie Development Co.; Gardena, Tele-Movie Development Co.; Lakewood, Skiatron Inc.; Montebello, Tele-Movie Development Co.; Pasadena, Harriscope Inc.; San Diego, Skiatron TV Inc.; San Mateo, Skiatron TV Inc.; Santa Monica, Harriscope Inc.; Uplands, Tele-Movie Development Co.; Vista, Tele-Movie Development Co. Ind.—Muncie, Y. W. Management Corp.; New Albany, Meritt Wilkins. Mont.—Billings, Televents Inc. N. C.—Fayetteville, Wellons Theatres.

DuMont names 7 new distributors for industrial TV line: Boom Electric Corp., 5226 W. Grand Ave., Chicago; De Mambro Sound Equipment, 1095 Commonwealth Ave., Boston; Electronic Specialty Co., Virginia St. W., Charleston, W. Va.; Shaffer Co. Inc., 849 N. High St., Columbus, O.; Signal Equipment Co. Inc., 2706 Third Ave., Seattle; Southeastern Sight and Sound Corp., 400 Glenwood Ave., Raleigh, N. C.; Springfield Sound, 772 Worthington St., Springfield, Mass.

Commercial TV is “acceptable to the overwhelming majority of the public,” International Chamber of Commerce has decided, its council passing resolution in Paris calling for commercial TV research based on experience gained in U. S., Canada & U. K.

Boycott of TV sets in Cyprus—where govt.-owned station is operating—is urged by anti-British National Organization for Cyprus Liberation, which claims TV transmissions are loaded with propaganda.

First sponsored show on Spanish TV, Ziv TV reports, will be Spanish-dubbed *Highway Patrol* series (*Caminos de Patrullo*). It will be sponsored by N. V. Philips, worldwide electronics-electrical combine.

Advertising sales in *TV Guide* for first 3 quarters of 1957 totaled \$4,085,809, up 75% from same 1956 period.

FTC Hits Promotion Plan: In blow at TV-radio advertising tie-ins used by all 3 networks, FTC examiner Abner E. Lipscomb ruled Oct. 24 that 6 major grocery producers gave illegal promotional allowances to favored grocery chains by paying for their broadcast time (Vol. 12:30, 44).

Charging violations of Robinson-Patman Amendment to Clayton Act, Lipscomb issued preliminary orders prohibiting such allowances except on a proportionately equal basis for all customers. Examiner said producers paid CBS, NBC & ABC for time which networks gave to favored chains without charge in return for in-store promotional displays of manufacturers' products.

Named in ruling were Groveton Paper Co., Groveton, N. H.; General Foods Corp., White Plains, N. Y.; Sunshine Biscuits Inc., Long Island City, N. Y.; Piel Bros. Inc., Brooklyn; Hudson Pulp & Paper Corp., N. Y.; P. Lorillard Co., N. Y.

According to FTC, plan (called "Supermarketing" by CBS, "Chain Lightning" by NBC, "Mass Merchandising" & "Sell-A-Vision" by ABC) worked this way:

Networks entered into agreements with grocery chains whereby, for free TV or radio time, they conducted in-store promotions of products. Then networks solicited manu-

facturers to buy time at regular rates, offering in-store promotion as added inducements.

Networks were not named as defendants in case, in which grocery companies argued that their payments to CBS, NBC & ABC covered only their own broadcasting time—not promotional allowances for favored chains.

But Lipscomb held that 6 producers "would not have purchased broadcasting time at all, or would have purchased it only at a reduced price or in a lesser amount, except for the inducement of the in-store promotion." He said companies were sole financial supporters of plan, paying for time given stores for in-store promotion as well as for time for producers' own use.

As examples of payments made by 6 manufacturers to networks for time in N. Y., Chicago & Boston, FTC examiner cited these yearly totals: Groveton (1954), \$122,151; General Foods (1955), \$206,411; Sunshine Biscuits (1955), \$132,775; Piel (1953), \$211,795; Hudson (1954), \$154,619; P. Lorillard (1955), \$210,758.

Bait advertising on TV & radio and in newspapers by Universal Sewing Service Inc., 600 Reading Rd., Cincinnati, is alleged in default order issued Oct. 24 by FTC examiner Joseph Callaway prohibiting false claims in sales of sewing machines & vacuum cleaners. Firm failed to answer FTC charges that it used "Westinghouse" name on Japanese sewing machines, advertised products at prices which weren't bona fide.

What Western Admen Earn: "Peons" in ad fields—if there are such—include production assistants employed by agencies & advertisers, whose median pay is less than \$4500, and senior copywriters & copy chiefs at TV & radio stations, whose median salary is on level with production assistants, according to Oct. *Western Advertising*. Survey of 6 western states by assoc. professor Daniel S. Warner of School of Communications at U of Washington also shows that TV & radio time salesmen for larger stations make more than space salesmen for larger newspapers. Among "lowest bracket salesmen" at 19 TV stations, 14 radio stations & 14 newspapers, these earn more than \$5000: 79% TV, 50% radio, 29% newspaper. More than \$7500: 14% TV, 10% radio, no newspaper. Among "highest bracket salesmen," these earn more than \$7500: all TV, 82% radio, 71% newspaper. More than \$9000: 93% TV, 64% radio, 7% newspaper. Newspaper employes holding titles of commercial mgr. or adv. director on newspapers earn more than TV & radio counterparts, however: 77% earn more than \$15,000 on newspapers, while only 39% in TV and 36% in radio are in that bracket.

"Truthful advertising" campaign in cooperation with FTC was launched Oct. 23 by Advertising Federation of America, to "gain greater public confidence" in reliability of claims. Announcement of drive followed FTC-AFA conference in Washington, where FTC Chairman John W. Gwynne said voluntary effort would be aimed particularly at "abuses" such as fictitious pricing, bait ads, exaggerated claims for drugs. He welcomed "help of the industry in clearing the advertising road for honest competition," added that "99 & 99/100%" in business—including TV, radio & newspapers—favor honesty. AFA group was led by chairman Robert M. Feemster, a Dow, Jones executive.

TV & radio contacts are needed by small firms as part of "bank account of dependable friends & allies," Small Business Administration points out in *Public Relations for Small Business Owners* (Marketers Aid No. 27), available from all offices of agency.

Who Owns TV Ad Idea? Unique agency-vs.-advertiser suit—unpublicized by any principal until issues were exposed this week by federal court injunction in Philadelphia—poses this knotty TV commercial question: Who owns idea submitted by agency, rejected by advertiser, then adopted by advertiser after it is proposed by another agency? Warwick & Legler (joined by Remington Rand as party-plaintiff) contends that defendant Schick Inc., former client whose account was switched to Benton & Bowles, has no right to use razor "cotton test" on TV—as Schick did on *Dragnet* Sept. 19. Agency claims that razor sequence, spurned in 1956 by Schick, remains property of Warwick & Legler, which has since sold idea to client Remington Rand, Schick's competitor. Schick maintains that 15% commission it paid to Warwick & Legler covered any ideas submitted by agency, that advertising trade custom permits client to keep such ideas, that in any event Benton & Bowles had come up with "cotton test" dramatization after account was switched. Judge J. Cullen Baney granted temporary injunction to Warwick & Legler, restraining Schick from further use of "cotton test" pending further hearings in case—probably in Jan.

Teen-age TV viewers "seem ashamed that they fell for what was told to them when they were kids," pres. Lester Rand of Youth Research Institute told 37th annual meeting of Conn. Dairy & Food Council at Cheshire. He said teenagers no longer succumb to "soothing blandishments" of TV commercials which in pre-adolescent days encouraged them "to stock pantries with their sponsors' merchandise." Rand cited 1956 study by Institute which showed 59% of teen-agers thought commercials could be improved, only 23% thought they were satisfactory.

Must Reading: (1) "Talent Agents" in Oct. 21 *Broadcasting*. "They're taking \$50,000,000 a year from TV," magazine says of 10 percenters. "Are their services that valuable?" (2) "The Rise & Fall of the Radio Commentator" by Quincy Howe in Oct. 26 *Saturday Review*. Veteran newscaster, pres. of Assn. of Radio & TV News Analysts, fears his trade—in both media—faces "gradual extinction."

Deck Cleared for WLWI, Indianapolis: Bitter battle over Crosley's WLWI, Indianapolis (Ch. 13) ended at FCC level, as Commission denied all petitions seeking to block effectiveness of CP. Station management now aims for start with ABC-TV by Oct. 30, hoping to get program test authority by then. FCC vote was 4-2, Lee not participating, Hyde & Bartley dissenting.

Improved facilities were sought by 2 major-city vhf stations this week—KPTV, Portland, Ore. applying for switch from Ch. 12 to newly assigned Ch. 2, KGUL-TV, Galveston (Ch. 11) asking that its channel be assigned to Houston. Latter gave as precedent Commission's action in reassigning KTVX's Ch. 8 from Muskogee to Tulsa—a move that had been contested by KOTV, Tulsa (Ch. 6), which has same ownership as KGUL-TV (Corinthian Bestg. Corp.).

Allocations actions by FCC: (1) Finalized addition of Ch. 13 to Fajardo, P. R., deletion of Ch. 12 from Charlotte Amalie, V. I., substitution of Ch. 12 for 13 in Aguadilla-Arecibo, P. R. (2) Proposed substitution of Ch. 80 for 70 in Bradford, Pa.

Texas Tech's CP for Ch. 5 in Lubbock, due to become effective Oct. 28, was held in abeyance this week as Commission stated it wanted to look into agreements of Lubbock's KDUB-TV & KCDB-TV to donate funds to college.

CPs granted: Educational Ch. 5, Albuquerque, to U of N. M. and city board of education; Ch. 74 & Ch. 78 translators in Ukiah, Cal.; Ch. 73, 78 & 83 translators in McGill, Nev.; Ch. 75 & 80 translators in Ely, Nev.

Control of Meyer Bestg. Co., operating KFYZ-TV, Bismarck (Ch. 5) & KFYZ and affiliated KUMV-TV, Williston, N. D. (Ch. 8) and holding CP for KMOT, Minot, N. D. (Ch. 10), passes from Etta Hoskins Meyer to daughter Marietta Meyer Ekberg, it's disclosed by transfer application filed with FCC. Mrs. Meyer is turning in 2904 shares (54.3%) to Meyer Bestg. in return for title to office building which houses studios of KFYZ-TV & KFYZ. Also involved is \$137,000 in obligations—she's cancelling note for \$87,000 due her for cash loan to Meyer Bestg. and assuming two \$25,000 notes of Meyer Bestg., one to First National Bank, other to former gen. mgr. & stockholder Frank E. Fitzsimonds. Ownership after transfer: Wm. A. Ekberg, pres.-gen. mgr., .04%; Marietta Meyer Ekberg, 63.83%; Marietta Meyer Ekberg trust (Etta H. Meyer, trustee), 35.38%; Gordon V. Cox, secy., .49%; Ward R. Lewis, director, .25%.

Mel Wheeler is acquiring 96% of WJDM, Panama City, Fla. (Ch. 7) for \$60,000 from builder J. D. Manly, it's shown in application filed with FCC. Wheeler already owns 2%, his wife 2%. Wheeler also owns 25% of WEAR-TV, Pensacola (Ch. 3) & WEAR, holds CPs for radio WSCM, Panama City, and WTYT, Titusville, Fla. Aug. 31 WJDM balance sheet shows \$8993 profit to date. It lists \$37,351 current assets, \$119,872 fixed assets, \$46,939 good will; \$196,521 liabilities, \$10,000 capital stock.

Rate changes: WLWT, Cincinnati, Oct. 27 raised base hour from \$1000 to \$1500, min. \$250 to \$330. WLWC, Columbus, O. Oct. 27 raised hour from \$800 to \$1100, min. \$175 to \$200. WLWD, Dayton, O. Oct. 27, hour \$800 to \$1100, min. \$175 to \$200. WAGM-TV, Presque Isle, Me. Nov. 1 adds Class AA hour (8-10 p.m. daily) at \$225, min. \$45, Class A hour going from \$150 to \$200. WABI-TV, Bangor, Me. Nov. 1 offers combination with WAGM-TV, hour at \$500, min. \$100. Spot increase: WBUF, Buffalo, raises 20 sec. from \$110 to \$135.

The St. Louis Parlay: St. Louis is experiencing a three-way ownership switch in TV stations, FCC this week having approved sale of KWK-TV (Ch. 4) to CBS along with transfer of CP for Ch. 11 there from CBS to 220 Television Inc.—while *St. Louis Globe-Democrat* (which had held 23% of KWK-TV) filed application to buy 25% of KTVI (Ch. 2). *Globe-Democrat* is paying \$31,000 for 310,000 shares of KTVI stock, taking over about \$141,000 in mortgages and lending station \$360,000. KWK-TV is being sold to CBS for \$2,500,000, with network paying additional \$1,500,000 to *Globe-Democrat* for TV studio and real estate. Call letters are to change to KMOX-TV. Transfer of CP for Ch. 11 to 220 Television Inc. is part of agreement CBS reached with losers in Ch. 11 hearing (220 Television Inc., St. Louis Telecast Inc. & Broadcast House Inc.) that they terminate all litigation challenging CBS's right to Ch. 11. Agreement also provides that 220 Television is to issue \$200,000 in debentures to both St. Louis Telecast and Broadcast House. Future of radio KWK hasn't been settled, but agreement gives 220 Television first refusal if it's put up for sale (Vol. 13:39).

Commission Okays AM-FM Transfers: Radio sales approved by FCC this week: KQV, Pittsburgh, by trustees Earl F. Reed & Irwin D. Wolf Jr. for \$700,000 to AB-PT (Vol. 13:35) . . . KRMG, Tulsa, by Western Bestg. Co. (Harrington Wimberly, pres.) for \$500,000 to Meredith Publishing Co. (Vol. 13:35) . . . WVDA, Boston, by Vic Diehm Assoc. for \$252,500, plus \$206,000 in stockholder's notes to Great Trails Bestg. Corp., controlled by ex-Secy. of Commerce Charles Sawyer (Vol. 13:39) . . . KWFT, Wichita Falls, by Kenyon Brown for \$300,000 to Ben Ludy and associates (Vol. 13:40) . . . WFMF (FM), Chicago, with functional music service, by Field Enterprises for \$125,000 to Chicago attorney Maurice Rosenfield (Vol. 13:37) . . . WCSI, Columbus, Ind. by Syndicate Theatres Inc. (J. P. Finneran & Trueman Rembusch) for \$100,000 to Findley (O.) *Republican-Courier* (Vol. 13:36) WERI, Westerly, R. I. by Ted Estabrook for \$74,000 to Wm. Sweeney (Vol. 13:36) . . . WOKE, Oak Ridge, by Air Mart Corp. for \$64,000 to Carter M. Parham (21% of WDEF-TV, Chattanooga) and associates (Vol. 13:39) . . . KLMO, Longmont, Colo. by Grady F. Maples for \$63,000 to Arline H. Steinbach (Vol. 13:39) . . . WWXL, Manchester, Ky. control (47%) by Clifford Spurlock for \$32,450 to J. L. Tighe and associates (Vol. 13:39).

Reports of Radio Station Sales: WHAR, Clarksburg, W. Va. sold by George F. Wilson Sr. & Jr. in deal involving \$155,000 to Mr. & Mrs. Mason C. Deaver, former owners of WPUV, Pulaski, Va. (broker, Blackburn) . . . WEAR, Pensacola, by Gulfport Bestg. Corp. (Mel Wheeler, pres.) for \$112,500 by Florida Radio & Bestg. Co. (Edward J. Oberle, pres., also owner of WIVY, Jacksonville, Fla.). WEAR-TV is retained by Gulfport (Chapman) . . . WMMB, Melbourne, Fla. 70% by Mrs. Erna Bessler for \$102,500 to Harlan Murrelle and associates; Murrelle is pres. & 20% owner of WOND, Pleasantville, N. J. and publisher of two N. J. weekly newspapers (Chapman) . . . KLEE, Ottumwa, Ia. by Jack Lester & Wm. O'Connor for \$57,500 to Carroll Marts, ex-MBS central div. (Hamilton, Stubblefield, Twining & Assoc.) . . . KORC, Mineral Wells, Tex. by J. Elroy McCaw for \$45,000 to Action Bestg. Corp., owned by Waco businessmen J. H. Kultgen, Bernard Rapoport and Wm. Stinson . . . KART, Jerome, Ida. by Herbert E. Everitt (66⅔%) and Karl L. Metzberg (33⅓%) for \$35,000 to Frederick M. Parry, engineer for Radio Free Europe in Biblis-Hessen, Germany.

Telecasting Notes: "The film industry," reports Oct. 23 *Variety*, "has quietly launched a campaign to dispel a rumor that is reportedly sweeping the nation that the screen hits now scheduled for theatre presentation will soon be released for free TV viewing." Elsewhere same issue reports survey by unnamed business analyst firm quoted by Allied Theatre Owners of Ill. as indicating that "22.5% of the lost admissions in July were contributed by those who said that they decided to wait to see a picture when it comes on TV" . . . Revival of interest in such "space" shows as *Rocky Jones*, *Space Ranger* and *Flash Gordon* as well as *Science Fiction Theatre* etc. reported by syndicators as result of sputnik. Screen Gems, AAP and United Artists also reportedly are contemplating putting together "space packages" of interplanetary features . . . Popularity of Bing Crosby-Frank Sinatra *Edsel Show* was reflected this week on 2 fronts: (1) ABC-TV's *Frank Sinatra Show* premiere garnered whopping 29.1 Trendex, outranking combined network competition. (2) CBS-TV signed Crosby to another 60-min. special Dec. 11, 10-11 p.m., immediately sold half of it to Shulton cosmetics . . . Bob Hope lost a sponsor as result of appearing on *Frank Sinatra Show* (ABC-TV) which included commercial for alt.-week sponsor Bulova Watch Co. U. S. Time Corp. immediately canceled its partial sponsorship of 3 forthcoming Hope shows on NBC-TV; Hope said he didn't know Bulova commercial would be used on Sinatra's Chesterfield-sponsored show . . . Riding horror wave, ABC-TV has entered into co-production deal with Screen Gems for 39 half-hour *Tales of Frankenstein* films for 1958-59 season

. . . "Made in Japan" label goes on U. S. TV commercials for first time as result of pact between Song Ads Inc., Hollywood, and Cinema Guild Productions, Tokyo. U. S. firm will offer advertisers Japan-made commercials featuring stop-action puppets with U. S.-recorded soundtracks. Firm will also distribute puppet shorts to TV stations . . . Newly reorganized Flamingo Films (Herman Rush, pres.) enters first-run syndication via *Citizen Soldier*, to be produced in cooperation with Defense Dept. at cost of more than \$1,000,000; shooting begins in Europe about Nov. 1.

— ■ —
 Broadcasters must learn to accept criticism, NARTB pres. Harold E. Fellows said Oct. 22, deploring those "who have chosen to ignore criticism, since our industry attracts a good deal, rather than to analyze it." In speech to joint luncheon meeting of Kiwanis Club of Kan. and broadcasters from Kan., Okla. & Tex. at Baker Hotel, Dallas, he said: "It should be the obligation of every broadcaster to take such criticism as comes his way, analyze it, discard that which is motivated by purely selfish reasoning and consider that which comes from responsible sources."

— ■ —
 Comedians will disappear from entertainment world unless networks use their radio stations as "farm system" for training of comics and comedy writers, Steve Allen warned at 16th annual Pulse luncheon in N. Y. this week, where he received the research organization's "Man of the Year" award. He said that young comics need 3 or 4 years on radio, "away from the pressure of ratings," before being moved into TV's "firing line."

Tax Ruling Assailed: IRS refusal to allow station buyers any tax depreciation for TV network affiliation contracts (Vol. 13:35) is "based on something less than knowledgeable facts about our industry & industry practices," Wm. T. Stubblefield of Hamilton, Stubblefield, Twining & Assoc. said Oct. 25. Speaking at U of Miss. School of Business Administration in Biloxi, he said IRS ruling is "unwarranted." Station broker asserted he has first-hand knowledge of "TV operations that have dropped in value one-half upon the receipt of a registered letter serving notice of disaffiliation from a network." He urged "keen awareness of this situation" by all broadcasters. Stubblefield also said that already-high station prices "will continue to increase with the general economy."

"The Critics Be Damned!", Oct. 19 *Sponsor* says in lead article by Evelyn Konrad, deploring press reviews of new TV season programs. "Even *Variety* has begun to wail mournfully, burying the season before it has started," and critics on dailies "have done their best to cry panic," *Sponsor* complains. Magazine runs chart to show Trendex ratings of new shows don't correspond with poor notices in *Variety* and *N. Y. Times*, *World Telegram* and *Daily News*, quotes ad agency "professionals" as pointing out: (1) total TV audience has increased, (2) network TV as sales medium is powerful as ever, (3) shows have improved in talent & technique, (4) it's too early to predict audience reaction to season as whole, anyway.

NTA Film Network picked up 2 new sponsors for its Shirley Temple feature film "Holiday Specials," after 13-city Trendex indicated rating dominance for first program, shown in most cities Oct. 19 or 20. Show got 14.2 rating and 46.5 share of audience in the 13 measured markets, including No. 1 ranking in its time segment in N. Y., Chicago & Los Angeles. Smith Bros. cough drops signed as partic. sponsor of last 2 Shirley Temple films, and Phillips-Van Heusen Corp. (shirts) bought 2 parties. in each of 3 shows plus 6 parties. in NTA's *Premiere Performance*.

TV Fund Frozen: Educational TV kitty of \$100,000 is going begging in N. Y. state treasury because nobody can touch it, according to legal ruling disclosed this week. State legislature appropriated \$100,000 at 1957 session in Albany for special aid to schools developing TV programs and for indirect assistance to non-profit groups offering educational telecasts. Fund had survived budget-cutting of more ambitious educational TV plans proposed by Gov. Averell Harriman (Vol. 13:6). But lawmakers neglected to vote any authorization to anybody to decide how TV money should be distributed. So Dept. of Audit & Control has ruled it can't be spent.

TV-radio columnist Marie Torre was formally directed Oct. 21 by Federal Judge Sylvester Ryan to explain why she isn't in contempt of court for refusing to divulge CBS source of item in her *N. Y. Herald Tribune* column, cited by actress Judy Garland in \$1,393,333 libel action against network (Vol. 13:42). Show-cause order, returnable Oct. 29, was sought by Miss Garland's lawyer, Lionel S. Popkin, who said identity of source was needed to prove cause for libel suit. Popkin told court exec. v.p. Hubbell Robinson Jr. and gen. program exec. Lester Gottlieb of CBS-TV had denied telling Miss Torre that Miss Garland has "inferiority complex" because "she thinks she's terribly fat."

Secy. of State Dulles will star as "chief communicator" on first of *Camera on Washington* series in NBC-TV educational project starting Fri., Nov. 1, 6-6:30 p.m. Opening program in 10-week series undertaken in partnership with Educational TV & Radio Center, Ann Arbor (Vol. 13:38), will deal with Mutual Security Act, show originating in State Dept. Bldg., Washington.

New closed-circuit pay-TV organization is Selectivision Inc., 1 W. 58 St., New York 19 (Plaza 9-2495), which says it plans to establish wired movie systems from theatres in N. Y., Pa., N. J., Conn., Fla. & Chicago. J. T. Hamilton is pres.; Emanuel Demby, secy.; Jules Spaulder, treas.; Bernard L. Goldenberg, asst. treas.

New and Upcoming Stations: KPAC-TV, Port Arthur-Beaumont (Ch. 4) made debut with NBC-TV at 5:55 p.m. Oct. 22, second outlet in area where KFDM-TV (Ch. 6) has been providing service since April, 1955. In Canada, satellites CHBC-TV-1, Penticton (Ch. 13) & CHBC-TV-2, Vernon (Ch. 7) began Oct. 12 repeating programs of parent CHBC-TV, Kelowna, B.C. (Ch. 2).

Meanwhile, Steinman brothers' WLEV-TV, Bethlehem, Pa. (Ch. 51) notified FCC it is leaving air midnight Oct. 31, losses to date totaling more than \$500,000. Same owners operate WGAL-TV, Lancaster (Ch. 8) and hold CP for WRAK-TV, Williamsport (Ch. 36). Another station which should be deleted from on-air total is KVDO-TV, Corpus Christi (Ch. 22), which holds FCC authorization to remain dark until Jan. It left air Aug. 19 after unsuccessful effort to continue operation during reorganization (Vol. 13:32). U. S. total is now 511 operating stations (88 uhf); Canadian total 44.

KPAC-TV has 10-kw RCA transmitter and 12-section superturnstile antenna on 702-ft. Ideco tower at site near Vidor, Tex., 8½ mi. NE of Beaumont. Studios are in Port Arthur. Co-equal owners are Port Arthur College and Jefferson Amusement Co., with Julius M. Gordon, pres. & gen. mgr. and Carl D. Levy, secy., representing Jefferson; O. W. Collins, v.p. and Earl R. Moxon, treas., the college. Mack Newberry, from radio KPAC, is sales mgr.; John Stegall, ex-KFJZ-TV, Ft. Worth, production mgr.; Doug Thompson, ex-KCTV, San Angelo, program mgr.; Glenn Boatright, from KPAC and also dean of electronics at Port Arthur College, chief engineer. Base hour is \$350. Rep is Raymer.

CHBC-TV-1 & 2 use 75-watt RCA transmitters with 80-ft. towers from Western Bridge with wavestack antennas. They're unattended automatic repeaters, controlled from main studio of CHBC-TV, Kelowna, which began operation Sept. 21. CHBC-TV hour is \$170. Reps are Weed and All-Canada.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KMOT, Minot, N. D. (Ch. 10) is wiring 5-kw DuMont transmitter and plans start Nov. 15, operating in affiliation with parent KFYR-TV, Bismarck (Ch. 5), writes pres.-gen. mgr. Wm. Ekberg. It has 6-bay RCA antenna installed on 400-ft. Ideco tower south of city. KFYR-TV, also operator of affiliated KUMV-TV, Williston (Ch. 8), has \$275 base hour. Rep is Blair Television Assoc.

WRIK-TV, Ponce, P.R. (Ch. 7) is installing 500-watt DuMont transmitter, plans Nov. 21 test patterns, Nov. 30 programming, reports ½ owner George Mayoral, also exec. v.p. of WJMR-TV, New Orleans, and WORA-TV, Mayaguez, P.R. Alford antenna, due Nov. 7, is to be installed on 100-ft. tower by Nov. 15. Base hour will be \$150. Rep will be Forjoe.

KDUH-TV, Hay Springs, Neb. (Ch. 4), planned as satellite of parent KOTA-TV, Rapid City, S. D. (Ch. 3), has changed target to Dec. 1, reports KOTA-TV business

mgr. Wm. F. Turner. Studio-transmitter building shell is ready and 6-kw RCA transmitter with 25-kw Standard Electronics amplifier and RCA antenna are scheduled to arrive Nov. 1. Footings have been poured for 500-ft. Ideco tower, which is due shortly. KOTA-TV plans to raise base hour to \$200 in Dec. Rep is Headley-Reed.

WGTE-TV, Toledo, O. (Ch. 30, educational) has 100-watt GE transmitter on hand and plans Feb. 1 start, reports Murray W. Stahl, program director. Studios and transmitter will be at U of Toledo, with antenna atop University Hall tower. Harry D. Lam, director of radio-TV education for Toledo Public Schools, will be gen. mgr.

WMUB-TV, Oxford, O. (Ch. 14, educational) has 1-kw RCA transmitter on hand, plans to start studio-transmitter construction in Dec., but still has July 30, 1958 target, reports Stephen Hathaway, director of broadcasting activities for grantee Miami U. Truscon 320-ft. tower is due Nov. 1 and 6-section helical antenna is on order.

CJFB-TV, Swift Current, Sask. (Ch. 5) has ordered 5-kw Canadian GE transmitter for mid-Nov. delivery, plans Nov. 20 test patterns, Nov. 30 programming, writes pres.-gen. mgr. Wm. D. Forst, who says station will be first in Canada with automatic program control. Studio-transmitter building is 75% completed and work on 325-ft. Utility Tower begins Oct. 16. It will use 3-bay batwing antenna. Base hour will be \$120. Reps will be Forjoe and TV Representatives Ltd.

CKBI-TV, Prince Albert, Sask. (Ch. 5) has ordered 10-kw Standard Electronics transmitter for Oct. 31 delivery, plans Dec. start, reports pres.-gen. mgr. E. A. Rawlinson. It will use 600-ft. Wind Turbine tower. Rates not set; rep not chosen.

CFCL-TV-2, Elk Lake, Ont. (Ch. 2) hasn't ordered equipment, but plans May, 1958 start, reports owner J. Conrad Lavigne. It's to be satellite of his CFCL-TV, Timmins, Ont. (Ch. 6), which also holds license for satellite CFCL-TV-1, Kapuskasing, Ont. (Ch. 3), due to start soon. Construction hasn't begun, but land has been cleared and road is being built to site. It will use 400-ft. tower. CFCL-TV base hour is \$180. Reps are McGillivra, Paul Mulvihill & John N. Hunt.

Translator starts: K70AU, Cave Junction, Ore. began Sept. 2 repeating programs of owner KBES-TV, Medford; K83AC, Globe-Miami, Ariz. plans Nov. 1 start duplicating KVAR, Phoenix—K77AD & K80AE there having begun Aug. 28 repeating KOOL-TV & KTVK, Phoenix. Also planning Nov. 1 starts are K71AF, Cedarville, Cal. with KOLO-TV, Reno, programs; K71AH, Salida, Colo. with KCSJ-TV, Pueblo; K72AK, Yosemite National Park, Cal. with KSBW-TV, Salinas-Monterey.

WLEX-TV, Lexington, Ky. (Ch. 18), requesting change to directional with 1° antenna beam tilt, also filed statement of income which shows station is just entering black. It had \$92,292 loss for fiscal year ending March 31, 1956; \$53,531 loss for fiscal 1957; \$250 net profit for March 31-Aug. 31, 1957.

RCA shipped used 12-section superturnstile antenna Oct. 21 to upcoming KVII, Amarillo (Ch. 7), due in Dec.; 12-kw amplifier Oct. 21 to WLEX-TV, Lexington, Ky. (Ch. 18), planning power boost; 50-kw transmitter Oct. 23 to WICU, Erie (Ch. 12), also going to high power.

New reps: KTVO, Kirksville, Mo.-Ottumwa, Ia. to Hollingsbery Nov. 1 (from Bolling); WCBI-TV, Columbus, Miss. to James S. Ayres for southern area (from Dixieland); Everett-McKinney continuing nationally.

WICU, Erie, Pa. became WICU-TV Oct. 25, radio affiliate changing from WIKK to WICU.

RCA'S CAREFUL VIEW OF TV RECEIVER MARKET: "Spotty" is adjective used by Robert A. Seidel, RCA exec. v.p. for consumer products, to describe current TV set sales, as we discussed black-&-white and color outlook with RCA executives in N.Y. offices.

Though industry generally is behind last year in sales, Seidel said, RCA is not -- but he admitted uncertainty about balance of year. Until recently, he said, it looked as if industry sales were firming up. "There are lots of places where there are increases over a year ago," he noted, but "spottiness" is showing up.

Attention to consistently declining factory average price of black-&-white sets was drawn by Seidel -- and he blamed trend to increasing sales of portables -- many of which, he said, are sold as first set in home rather than second. RCA's factory prices, he noted, are considerably above average.

Queried about 14-in. portables, Seidel said they'd remain in RCA line as long as they sell in good volume. However, he said, RCA is selling 3 times as many 17-in. portables as 14-in. -- and, of the 17-in., 3 of 4 sales were high-end sets.

* * * *

Turning enthusiastically to color, Seidel reported sales were "going very good," excellent in these cities: San Francisco, Los Angeles, Milwaukee, Indianapolis, Detroit, Baltimore, Columbus, Dayton, Cincinnati, Cleveland. "But," he added, "there still are a number of markets where sales aren't up to expectations."

A key point in color effort, according to merchandising v.p. Martin Bennett, was RCA's 2-hour closed-circuit color show Sept. 4 (Vol. 13:36) -- which drew twice the dealer attendance expected.

Probing for color sales deterrents, Seidel touched on price -- saying he knew of nothing in sight promising reductions, though RCA engineers are continually striving for cuts. "A real reduction will come," he said, "with greater volume."

New Uhf Tuner: General Instrument Corp. comes up with series of strong claims for its new uhf tuner -- not least of which is "appreciably less expensive." Among features: (1) Applicable to all TV sets -- including color and portable. (2) Smaller & lighter -- 2 11/16-in. square, 1 1/2-in. deep, 11 oz. (3) Good compensation for heat-induced frequency drift. (4) Reduced radiation -- "to the lowest level yet attained in any uhf unit." (5) Sturdy construction enhancing stability, particularly in portables that are moved and bumped.

Spokesman declined to specify price, explaining that tuners are made to set producers' specifications and the price varies. Production begins shortly.

Economic Outlook: Varying views on business conditions are expressed this month in report of National Assn. of Purchasing Agents Business Survey Committee. "Many of our reporting members have lost some of last month's optimism. Production and new orders are off from Sept., but about the same as reported in July," it says.

Continued rise in personal income, to rate of \$346.5 billion annually, was reported by U.S. Dept. of Commerce and President's Council of Economic Advisors. Meanwhile, reports that Federal Reserve Board would ease rein on tight money policy had tonic effect on Govt. securities, corporate bonds, bank credit.

Production: TV output dropped again week ended Oct. 18 to 153,846 compared with 164,627 preceding week and 200,425 in corresponding week one year ago. It was year's 42nd week and brought TV production for year to date to about 5,087,100, compared with 5,874,859 in same period of 1956. Radio production was 411,273 (150,-638 auto) week ended Oct. 18 vs. 407,298 (150,075) preceding week and 352,876 (162,-159) in corresponding week year ago. Radio output for 42 weeks totaled about 11,-549,300 (4,252,870) vs. 10,547,548 (3,470,958) in 1956 period.

Trade Personals: Edward A. Altshuler, marketing consultant, named to new post of managing director of Magnetic Recording Industry Assn., 6234 Scenic Ave., Los Angeles . . . Selmer Solem elected v.p. of Appliance Buyers' Credit Corp., finance subsidiary of Whirlpool Corp. . . . John F. McDaniel appointed Hotpoint Appliance Sales Co. acting gen. mgr., continuing as gen. mgr. of Hotpoint's range and component parts dept. . . . Russell S. Rockafellow, ex-Chrysler, named Raytheon industrial engineering mgr. . . . Lewis W. Selsor resigns as Electro-Voice Inc. gen. sales mgr. . . . Alex Nazemetz, ex-RCA international div., named account exec., electronic and technical accounts, Evans, McClure & Assoc., San Francisco . . . Leon Knize, ex-Capehart, appointed Stromberg-Carlson hi-fi components sales mgr. . . . Kenneth B. Shaffer promoted to mgr., field sales, RCA electron tube div. distributor sales staff; John J. Hemberger named mgr., northeastern district, headquartering in Boston; Harold C. Vance, mgr., sales engineering.

Dr. Elmer W. Engstrom, RCA senior exec. v.p. and a pioneer in TV development, has been selected to receive 1958 medal of Industrial Research Institute for "outstanding accomplishment in leadership in or management of industrial research which contributes broadly to the development of industry or the public welfare." It will be presented at Institute's meeting next May in Colorado Springs.

GE's views on color TV sales (Vol. 13:41) are elaborated by Jack S. Beldon, mgr.-marketing, TV receiver dept. who wrote following comment: "I believe that even if a company produced 200,000 sets and sold them even at today's prices, they might break even. You can imagine what would happen if all manufacturers tried this today, with a purchase market of perhaps 200,000 units maximum, which is extremely optimistic—you would really have an over-inventoried situation that would result in a tremendous loss." He also said: "We have stated for a long time, and we still believe, that it will take an invention of some kind to bring the color prices down, and that producing more and more color receivers will not lend itself to the reduction of prices."

GE cuts cooperative ad and promotional fund for radio receivers and electric housewares distributors to 1½% of monthly net billings effective Jan. 1, making grant automatic and eliminating need for filing claims. Previously, GE had granted 2% and required distributor contribution of one-third amount put up by GE. In letter to distributors, dept. adv. mgr. M. M. Masterpool said: "This new plan can only be successful if you continue to add your share to the factory funds up to, and, as has been the practice in the more successful distributorships, in excess of 1% of the net sales billed by the product departments . . ."

RCA sold more black-&-white TV picture tubes in Sept. than in any other month in year, says v.p. and gen. mgr. D. Y. Smith, RCA electron tube div., adding that key factor was "tremendous demand" for 110-degree tubes. Marion, Ind. plant is producing all RCA black-&-white picture tubes, operating at maximum rate with 3 shifts, 6 days weekly.

RCA 2-day clinics on transistors, tape recorders, hi-fi and color TV—for distributor, dealer and independent servicemen—are to be held in scores of major cities, continuing into 1958. Sponsored by RCA and RCA Victor distributors, clinics will include slide projector lectures, demonstrations, workshops.

DISTRIBUTOR NOTES: Graybar appoints W. J. Goerisch and G. L. Carl as Atlantic and Central Pacific district mgrs., respectively; headquarters for the districts are at Philadelphia and San Francisco; W. G. Glennon named district operating mgr. at Boston . . . Hotpoint renews contract for distribution in some 30 Graybar branches . . . GE appoints Graybar for radio in Tampa, Miami, Orlando, W. Palm Beach, Jacksonville, St. Petersburg and Ft. Lauderdale, Fla. . . . RCA appoints Southern Radio Corp., Charlotte, for all of S. C. except 7 southernmost counties which will be handled by King's Appliance and Electronics Inc., Savannah; they replace East Coast Appliances Co., Columbia, S. C. which has gone out of business . . . Sylvania appoints Goldberg-Tiller, 959 Myers St., Richmond (LeRoy B. Goldberg, pres.) for TV in 76 Va. counties, including Richmond, Roanoke, Norfolk markets . . . Krich-New Jersey (RCA), Newark, names Norman Skier, ex-DuMont, adv. mgr. . . . Interstate Supply Co. (RCA), St. Louis, appoints Edgar W. Fehrmann adv. mgr., succeeding John Richmond who is with Interstate's sales staff covering central Mo.; George Meyer named to new post of RCA Victor sales mgr. . . . Disco Distributing Co. (Motorola) moves to 5040 Arsenal St., St. Louis . . . Sylvania appoints Chauncey's Inc., 4740 W. Chicago Ave., Chicago, for radio . . . Admiral appoints Marshall C. Wells as gen. mgr., Admiral Distributors' San Francisco div.; Clarence B. Flinn promoted from midsouth regional sales mgr. to succeed Wells as regional sales mgr. in Dallas office; E. B. Freeman, regional mgr., mid-Atlantic states, will cover special assignments.

Imports of crystal cartridges and pickup arms from European and Japanese firms have resulted in 30% sales drop for Astatic Corp., Conneaut, O., reports pres. George Fraser in explaining hearing which Tariff Commission has scheduled for Feb. 4 (Vol. 13:42). Fraser said Japanese imports are hitting both original equipment and replacement market, citing rochelle salt cartridges which his firm has reduced to \$1.40 against Japanese imports at 75¢ each. Number of Astatic employes has dropped from normal 600-700 to about 500, he said, noting that company had labor contracts calling for 12¢-hourly wage increase in next 2 years. He said 2 West German cartridges and perhaps 10-12 Japanese phono pickup arms are being sold in U. S.

Latest protest over Oct. 14 *Time* cover story on servicemen (Vol. 13:41-42) comes in letter to editor from RCA Service Co. pres. E. C. Cahill, which says in part: "Our own high opinion of this country's independent servicemen is confirmed by national Elmo Roper survey (which is made annually covering entire service industry) showing 91% of TV set owners are pleased with quality of servicemen's work, 89% said service call was answered promptly, 83% were satisfied with prices, 91% felt serviceman was pleasant and courteous." Cahill concluded that service fraternities' "proven record of outstanding performance wholly justified continued public confidence."

RETMA of Canada cites steady drop in selling prices of TV sets from \$523 in 1951 to below \$300, despite 10% sales and 15% excise taxes and inflationary pressures of higher material and labor costs, increased taxation and services—during a period when Govt.'s consumer price index rose almost constantly. RETMA says lower TV prices were due to long-range research, advances in mass production, stepped-up TV sales as new stations opened across Canada. However, it said prices appeared to have leveled off and no further reductions were in immediate sight.

Admiral space at Merchandise Mart will be continued (Vol. 13:42); only public relations headquarters moves to former location, 3800 Cortland St., Chicago.

Financial Notes: RCA posts new sales record of \$853,667,000 for first 9 months of 1957—5% increase over similar period of 1956. Earnings for the 9 months were \$28,320,000 (\$1.87 per share) compared with \$27,893,000 (\$1.82) in corresponding period last year.

RCA chairman David Sarnoff and pres. John L. Burns also reported third quarter record sales of \$288,677,000, compared with \$286,036,000 for quarter ended Sept. 30 last year. Net profits in 1957 third quarter amounted to \$8,009,000 (52¢) vs. \$7,856,000 (50¢) in similar 1956 period.

* * * *

Hoffman earned \$1,214,319 (\$1.65 per share) on sales of \$31,119,324 for 9 months ended Sept. 30, 1957, compared with \$1,101,474 (\$1.51) on \$34,241,989 sales in similar 1956 period. Third quarter net was \$350,020 (47¢ on 735,610 shares outstanding) on sales of \$9,993,286 vs. \$317,502 (44¢ on 729,120 shares) on sales of \$11,366,428 in similar quarter last year. Pres. H. Leslie Hoffman wrote stockholders that higher profits on lower sales in 1957 were due to "concentration on profit rather than volume," elimination of unprofitable activities, "expansion of those activities earning a healthy profit." He said planned expansion of semiconductor facilities has been "held in abeyance" although land has been acquired and that no other expansion projects "are contemplated at this time." Hoffman said Defense Dept. adjustments had resulted in terminating one minor contract, rescheduling a major one at ¾ former rate, plus some cutbacks in orders for semiconductor devices.

Daystrom Inc. earned \$1,107,000 (\$1.22 on 903,533 common shares) on sales of \$39,339,000 in 6 months ended Sept. 30, compared with \$1,116,000 (\$1.26 on 888,793 then outstanding) on sales of \$33,652,000 in similar 1956 period. For 3 months ended Sept. 30 profits were \$560,000 (61¢) on sales of \$19,498,000 vs. \$589,000 (67¢) on sales of \$16,751,000 in similar quarter year ago. Pres. Thomas Roy Jones said Sept. was best month in fiscal year with sales up 36% from Sept. 1956. He said firm had no material defense cutback and he expects sales and earnings to increase in next 6 months.

Aerovox Corp. earned \$365,000 (42¢ per share) on sales of \$16,361,000 in 9 months ended Sept. 30, 1957, compared with \$76,000 loss on sales of \$18,826,000 in similar 1956 period. Pres. Wm. Owen reports business volume holding "fairly well but the anticipated fall increase has not materialized as is apparent in many other lines of industry." Working capital, he said, has increased since Jan. 1 from \$5,280,000 to \$6,132,000.

Oak Mfg. Co. earned \$831,964 (\$1.27 per share) on sales of \$16,487,797 in first 9 months of 1957, compared with \$1,352,631 (\$2.06) on sales of \$18,368,576 in similar 1956 period. Third quarter net profits were \$333,763 (51¢) on sales of \$5,692,885 vs. \$347,234 (53¢) on sales of \$5,516,599 in same period last year.

Dividends: *Sylvania*, 50¢ payable Dec. 23 to stockholders of record Dec. 2; *Television-Electronics Fund*, 11¢ Nov. 30 to holders Nov. 1; *P. R. Mallory*, 35¢ plus 2% stock, both Dec. 20 to holders Nov. 15; *Sperry Rand*, 20¢ Dec. 31 to holders Nov. 7.

Kaiser Aircraft & Electronics Corp. is being purchased from *Willys Motors Inc.* by *Kaiser Industries Corp.* in intra-company shift, will be renamed *Kaiser Aircraft & Electronics Div.* of *Kaiser Industries*, with executive offices in *Oakland, Cal.*

Philco Improves: Strong Philco comeback, showing net profit of \$3,112,000 (74¢ per share) on sales of \$270,246,000 in first 9 months of 1957, evoked this comment from pres. James M. Skinner Jr.:

"Although competition is particularly intense at this time, especially in the consumer appliance field, we are indeed gratified with the profit and sales trend. We believe that the forward progress will continue for the balance of 1957. While EIA figures show that the industry is off this year over the comparable period for last year, Philco figures run counter to this. We are very glad to see this since it clearly indicates the public preference for Philco TV-hi-fi-radio lines."

Philco's 9-month profit total nearly tripled last year's earnings of \$1,071,000 (21¢) on sales of \$254,322,000 for the similar period. Earnings for quarter ended Sept. 30, 1957, were \$1,499,000 (37¢) on \$87,595,000 vs. \$240,000 (4¢) on \$87,460,000 sales in corresponding quarter last year.

— ■ —

N. V. Philips' Gloeilampenfabrieken, big Dutch TV-radio-electrical combine, reports consolidated earnings of \$21,052,631 on sales of \$365,789,473 in 6 months ended June 30 compared with \$16,578,947 on \$294,736,842 in corresponding 1956 period. In first 1957 quarter, net profit was \$10,974,000 on \$189,181,000 (Vol. 13:23). The report issued at *Eindhoven* contained no breakdown of world operations, but noted total number of employes was 154,000 as of June 30 vs. 146,000 year earlier, said sales this year are increasing at 18% rate over 1956—that second-quarter sales "have been higher than we expected." Report also said liquid assets had increased since end of 1956.

Ampex Corp. expects total sales of \$27,500,000 in fiscal year ending next April 30, with profits of \$1,500,000 after taxes & profit sharing, pres. George I. Long told *Security Analysts Society of San Francisco*. Company's profits for fiscal 1957 totaled \$1,087,000, up from \$311,275 in 1956 (Vol. 13:25). He said company expects to get its video tape recorder "selling program" under way with delivery next month of first production unit—aiming not only at TV stations but at closed-circuit TV market, advertising agencies and large TV advertisers.

Hycon Mfg. Co. has filed registration statement (File 2-13697) with SEC for 400,000 shares of 10¢ par common stock to be offered for public sale by *Dempsey-Tegeler & Co.* Statement said \$500,000 of proceeds would be used to repay \$500,000 bank note endorsed by pres. Trevor Gardner, \$80,000 for research & development, \$120,000 for capital improvements, balance for working capital. Price of offering will be stated in amendment.

Thompson Products had record earnings and sales of \$10,568,195 and \$284,139,517 respectively in first 9 months of 1957. Comparable figures last year were \$7,565,219 & \$214,772,134. For 3rd quarter ended Sept. 30, net income was \$2,244,984 on sales of \$88,138,814 vs. \$2,703,377 on \$71,841,023 sales in similar period last year.

Orradio Industries earned \$83,968 (18¢ per share on 477,335 shares outstanding) on sales of \$970,174 in 6 months ended Aug. 31 vs. \$53,266 (12¢ on 422,515) on sales of \$621,051 year earlier.

P. R. Mallory & Co. had net income of \$2,701,313 (\$1.81 per share) on sales of \$60,552,262 for first 9 months of 1957, compared with \$1,900,511 (\$1.14) on sales of \$49,752,951 in similar period last year.

Republic Pictures reports net loss of \$248,895 in 39 weeks ended July 27 compared with earnings of \$946,595 (32¢ per share) in comparable 1956 period.

Sylvania's Surge: Sylvania marked up record third quarter and first nine month sales of \$89,363,209 and \$251,883,741 respectively, compared with \$83,792,859 and \$246,153,243 in comparable 1956 periods. Chairman-pres. Don G. Mitchell reported third quarter net income of \$3,853,571 (\$1.07 per share), compared with \$4,167,321 (\$1.16 on fewer shares outstanding); for first 9 months, net income was \$8,642,240 (\$2.37) vs. \$11,544,570 (\$3.20). All figures were adjusted to reflect Jan. 2, 1957 acquisition of Argus Cameras.

Mitchell attributed record sales and third quarter earnings, which more than doubled the \$1,718,725 (46¢) earned in this year's second quarter, to number of factors, including: "TV industry's return to more normal production levels, which in turn increased the demand for the components supplied by Sylvania to other TV set producers"; completion of changeover to 110-degree sets and picture tubes; record-breaking Sylvania TV set sales; strong business in lighting products.

"From the standpoint of both sales and earnings, the outlook is favorable for the remainder of the year in Sylvania's diversified product lines," Mitchell said. He declared that TV factory unit sales nearly doubled last year's first 9-month total, but that company's market for home radios and phonographs softened during third quarter. However, he expects an improvement, especially in hi-fi, during balance of year. Receiving and picture tube sales to other setmakers, said Mitchell, showed substantial increase in third quarter over year's first and second quarters, third quarter picture tube sales setting record for any comparable period.

Commenting on national economy, Mitchell described condition as "rolling adjustment" to be followed by a "re-

sumption of the upward trend by the latter part of 1958." Decline in capital spending, he went on, indicates manufacturing capacity has moved ahead of consumer demand, that temporary industry need is for "breathing spell." Mitchell predicted increased state and local spending, stepped up housing construction, probable softening of interest rates in 1958, increased consumer spending will make up for any "weak spot" in economy and decline in Federal spending.

Despite decreasing govt. defense spending, Mitchell declared that more money is expected to be channeled into electronics equipment and devices. He said Sylvania is participating in a number of defense research and development projects and received several new contracts during third quarter.

American Broadcasting-Paramount Theatres reports operating profit of \$1,333,000 (30¢ per share) in third 1957 quarter compared with \$1,484,000 (34¢) in corresponding period year earlier. Earnings for first 9 months were \$4,033,000 (91¢) vs. \$5,686,000 (\$1.31) in same 1956 period. In letter to stockholders, pres. Leonard H. Golden-son said AB-PT theatre business "was very good" in summer months, exceeding results last year, but that in broadcasting "there was the usual seasonal decline." Noting that "ABC had been running behind for the year," Golden-son observed that difference between 1957 & 1956 results "was steadily narrowed in each quarter" this year. "Overall," he said, ABC-TV programs this season "are indicating good audience gains" over last season; ratings "augur well for ABC in that they point up the network's ability to deliver a more competitive share of the total audience than at any prior time."

Muter Co. earned \$248,155 (34¢ per share) on sales of \$10,407,480 for first 9 months of 1957, compared with a loss of \$148,773 on \$8,646,210 sales in comparable period last year.

TV in Space: More plans for space-stationed TV were revealed this week by Office of Naval Research in disclosure of plans for huge "satellite observatories" to circle earth for decades. Project Stratoscope, long-term astronomical photography program, has already completed first step, which involved photographic cameras carried 20 mi. aloft in balloons. Second step—"Strato II"—will be taken in 1961 and will comprise 36-in. telescope on balloon at altitude of more than 80,000 ft. relaying pictures to ground monitors. Strato III is still tentative, envisions one-ton satellite orbiting 500-mi. above earth and also carrying TV telescope focused remotely on sun and other celestial objects. Meanwhile, Air Force took first step toward possible celestial TV this week when it fired "Farside" rocket to height estimated at between 1000 & 4000 mi. Air Force denied, however, that "Farside" was any more than code name, repudiating earlier stories that project's aim was to shoot TV-equipped rocket around moon to get pictures of never-seen far side of moon. In telephone interview with station WDMG, Douglas, Ga., Russian geophysical officials denied reports that sputnik is sending TV pictures or other strategic information back to Soviet bases. FCC Comr. Lee, in Chicago address, praised Commission's monitoring control branch for "outstanding job in tracking and positioning the Russian satellite."

Sam Norris, chairman of Nuclear Corp. of America, will be sworn in Oct. 28 as asst. director of Electronics Div. of Commerce Dept.'s Business & Defense Services Administration on without-compensation 6-month loan basis. Donald S. Parris is director.

ELECTRONICS PERSONALS: M. A. Maurer promoted to mgr., RCA electronic instruments & parts marketing, Camden; he's been mgr. of RCA Detroit mfg. plant . . . Jose D. Dominguez, exec. engineer of telephone & radio operating dept., named an asst. v.p. of IT&T . . . Allen C. Munster promoted to Philco assoc. director of research, assisting Dr. James F. Koehler, director of research for Philco G&I div.; Wm. H. Forster promoted to director of research, Philco research div.'s solid state electronics dept.; Carlo V. Bocciarelli appointed asst. director of research . . . Chester A. Grondzik, ex-Emerson labs, named mgr. of Systems Automation Group, Washington, a new section of Van Norman Industries' H. W. Butterworth & Sons Co.

National electronics symposium on reliability & quality control, sponsored by EIA, IRE and other industrial & professional organizations, will be held next Jan. 6-8 in Statler Hotel, Washington. M. M. Tall of RCA is gen. chairman of 4th annual session. Keynoter will be Maj. Gen. F. L. Ankenbrandt (USAF, ret.), RCA defense electronics products div., speaking on future reliability requirements.

TV system of improved resolution which will permit optical tracking of guided missiles is included in list of 65 electronics and electricity problems for which the National Inventors Council, Dept. of Commerce, is seeking solution. Total of more than 380 technical problems affecting U. S. defense is listed in 34-pp. booklet, *Inventions Wanted by the Armed Forces*.

Ad Year Nears \$10.4 Billion: Paced by 28% radio increase, biggest U. S. advertising volume in history is running at rate 5% ahead of 1956, should top \$10.4 billion by end of 1957, Oct. 25 *Printers' Ink* reports.

Based on data for first 6 months of 1957, all-year estimates prepared for magazine by Robert J. Coen of McCann-Erickson indicate that network & spot radio revenue will total \$295,000,000 vs. \$229,900,000 in 1956, that network & spot TV advertising will be up 6% to \$1.015 billion from \$954,700,000 last year.

Radio is "surpassing its first quarter pace," TV "failed to hold its earlier gain" but still is expected to run \$60,000,000 ahead of 1956, according to *Printers' Ink*.

Other media share anticipated gains for year in national advertising revenue: Business papers up 10% from \$495,500,000 to \$595,000,000, newspapers up 5% from \$788,900,000 to \$825,000,000; magazines up 3% from \$794,700,000 to \$820,000,000.

Printers' Ink, noting that advertising volume at end of first half this year was 5% ahead of 1956 after 3.4% increase in first quarter, pointed out that level nevertheless was below average 9% rate of annual increase in past 5 years.

Underground Color TV: Installation of closed-circuit color TV system in Strategic Air Command's subterranean headquarters at Offutt Air Force Base, Omaha, was reported Oct. 22 by exec. v.p. Theodore A. Smith of RCA industrial electronic products. System permits instantaneous transmission of briefing information, air intelligence, weather data from colored charts, maps, etc., duplicating them for any location within SAC nerve center. RCA equipment includes 5 live color cameras, 3-vidicon camera system for integrating film material, monochrome industrial camera for surveillance of operations control room, central control facilities, 21-in. color monitors.

"First completely new film studio built in New York in over 25 years" was opened this week at 20 West End Ave. by Caravel Films Inc. The new 4-story \$1,000,000 production center was made necessary by increasing volume of business, particularly TV commercials, according to pres. David I. Pincus, who added that expanded facilities will make possible production of complete TV series packages in addition to commercials. Founded in 1921, Caravel is a leading producer of industrial films.

TV commercials aren't overdone—"it only seems that way," Oct. 21 *Advertising Age* says stoutly. Magazine totted up data for 401 TV stations in Barrow report to FCC (Vol. 13:39-41), found that they average less than 90-sec. of paid commercials for every viewing hour. Even in 6-11 p.m. period, viewers are exposed to less than 2 mins. per hour. Average for commercials from sign-on to 1 p.m. is 50-sec. per hour. Most common commercial runs 1-min.

Doerfer's Pet Peeve: "Protest" section of Communications Act (309c) was described as "instrument of extortion in the hands of certain people" by FCC Chairman Doerfer in Oct. 24 address to Federal Communications Bar Assn. "You know and I know that monies have been passed," he said—adding that it is usually impossible to prove. He urged repeal of section, which he called "fit subject for Congressional investigation." He said protest procedure delays new service to public while FCC hears "internal corporate disputes and other private differences." Since last amendment of protest section in Jan. 1956, he said 72 protests have been filed, of which 64 were in broadcast field. Processing these cases required total of 11,395 professional man-hours and 5596 non-professional man-hours, not including more than 1300 professional and 252 non-professional man-hours spent on these cases by offices of Commissioners. He estimated that total cost to Govt. in processing the 72 protests amounted to \$71,963.55. Doerfer's next speech is Nov. 14, before members' council of New Orleans Chamber of Commerce, at Roosevelt Hotel.

TV-radio audience measurements may be superior to sworn-circulation newspaper gauges, NBC planning & research v.p. Hugh M. Beville Jr. told annual ABC meeting in Chicago. Conceding that broadcasters' systems for estimating audience size aren't comparable to ABC's methods of counting readers, Beville speculated on "enormous effect" on publishers & advertisers if newspapers adopted TV-radio techniques to show: (1) number of readers, page by page, for entire week, (2) how many men who read sports pages also read financial pages, (3) how many women who read society section also read amusement pages & comics, (4) how competing papers rate in such reader counts. Even if ABC service were available to broadcasters, Beville said, it would be complementary—not primary—measurement of audience.

Political speech on N.Y. gangsterism was cancelled by WABC-TV Oct. 24 on ground station's lawyers hadn't had time to "digest & approve it." Time for 15-min. speech by Robert Blaikie had been bought for about \$1200 by Republican headquarters for mayoralty candidate Robert K. Christenberry, but they were notified by station just before scheduled 11:45 a.m. telecast that it couldn't go on. Script hadn't been submitted until about 10:15 a.m. Station substituted travel film.

Rumors of TV deal for White House press secy. James C. Hagerty were denied Oct. 21. He told newsmen there was "nothing to" reports that he had signed contract to take industry job in 6 months—that "as long as the President wants me to remain . . . I will do so."

Broadcasting scholarships for 4 years of college study are offered by Meredith Foundation, sponsored by Meredith Publishing Co., to 2 finalists in National Merit Scholarship competition. Preference will be given to boys in Meredith TV & radio station coverage areas in N. Y., Ia., Mo., Neb., Kans., Ariz., Okla.

One TV station application was filed with FCC this week, bringing total pending to 117 (34) uhf. Application was for Farmington, N. M., ch. 12, by local business group headed by attorney Wade Beavers. [For details, see *TV Addenda 25-M* herewith].

SUMMARY-INDEX OF THE WEEK'S NEWS — November 2, 1957

- EIA'S NEW SPECTRUM STUDY committee optimistic after discussions with top military men; EIA board to act on recommendation Nov. 21 (p. 1)
- FTC TV-RADIO MONITORS win first compliance agreement in year-long drive on objectionable commercials; Lanolin drops shampoo claims (pp. 2 & 3).
- MEXICAN TV EXPANSION seen starting with growth of new middle class. Elaborate studios, shoestring budgets are secrets of growing success (pp. 2 & 6).
- SUBSCRIPTION-TV "POLL" in Bartlesville by Sen. Langer finds 1430 against pay TV, 113 in favor; he'll ask Senate committee probe (p. 5).
- ST. LOUIS PROTEST by St. Louis Amusement Co. slows transfers, though chances of success are considered slim. Several site shifts granted (p. 8).
- TV SALES & PRODUCTION in Oct. down 20% from last year. Hi-fi trend extending to TV, RCA introducing transistorized combinations, color sets (p. 12).
- MOTOROLA REPORTS RECORD 9-month sales, profit up over year ago; Zenith 9-month profit up sharply; Magnavox quarter sales & profits higher (p. 14).
- FREY REPORT ON AGENCIES finds mixed opinions on 15% fees for TV packages. Advertisers complain it's too much; agencies, too little (p. 9).
- FIVE STATIONS START, including 2 uhf; one uhf resumes operation while another goes off; new Mexican border station. U.S. total now 516 (p. 10).
- SOVIET-U.S. TV-RADIO trade talks open in Washington on high diplomatic level but with low outlook for any free exchange of broadcasts soon (p. 16).

EIA MOVES BRISKLY ON SPECTRUM STUDY: That broad-gauge spectrum study urged by many Congressional and industry forces (Vol. 13:41), designed to weigh efficiency of radio utilization by everyone, including the military, moved a step toward realization this week. Electronic Industries Assn. pres. Dr. W. R. G. Baker appointed a strong committee, headed by Hoffman Electronics pres. H. Leslie Hoffman, to recommend EIA's next move—and committee got to work promptly. Though Office of Defense Mobilization has frowned on study, terming it unnecessary and duplicative, industry leaders are still optimistic.

A very knowledgeable "task force" within the "Special Spectrum Study Committee," headed by GE's Paul Chamberlain, met this week with top Defense Dept. & ODM communications officers, seeking to firm up the favorable attitude noted recently by Chamberlain (Vol. 13:41).

Serving on task force are: David B. Smith & Donald G. Fink, Philco; Ira J. Kaar, Hoffman Electronics; Daniel E. Noble, Motorola; Thomas G. Rives, GE; Philip F. Siling, RCA. All except Rives are veterans of industry spectrum & standards hunts—but Gen. Rives is hardly a slouch at the business, having headed up similar jobs for Signal Corps as chief of Ft. Monmouth center before his retirement.

Rest of main committee comprises top-level EIA members: Robert C. Sprague, Sprague Electric, vice chairman; E. C. Anderson, RCA; Max F. Balcom, Sylvania; Robert S. Bell, Packard-Bell; David R. Hull, Raytheon; F. R. Lack, Western Electric; W. J. Morlock, GE; C. B. Thornton, Litton Industries; L. C. Truesdell, Zenith; L. G. Cumming, IRE-JTAC, ex officio.

There's no question but that sputnik has strengthened military's hand in any spectrum horse-trading, if any develops soon. However, industry's thinking is long-range—8-10 years—and there's no wholesale re-juggling in immediate sight. As for military designs on TV channels, very top level military men still say they see nothing like that in the cards. Incidentally, we understand that the very-long range radar

recently disclosed by Aviation Week magazine as operating in Turkey and elsewhere—to cover Russian missile activity—is an enormous user of spectrum.

In appointing committee, Dr. Baker said its job should be to state why study is needed; to prepare a proposal for submission to President, Congress or govt. agencies; to recommend names of men to serve on a study commission, these to be appointed by President. He suggested procedure may be similar to that leading to establishment of Airways Modernization Board—which followed study by Presidential commission under Edward P. Curtis of Eastman Kodak.

EIA's task force sums up work in meeting Nov. 14; full committee goes over it Nov. 19; whole EIA board considers results in New York meeting Nov. 21.

FTC HALTS ITS FIRST TV COMMERCIAL: FTC's special TV-radio monitoring unit celebrated its first anniversary this week by winning its first advertiser-compliance agreement in its campaign against false & misleading TV commercials—which so far has netted only 8 complaint cases.

Lanolin Plus Inc., Chicago, signed FTC consent order prohibiting it from representing in TV commercials that competitive detergent shampoos will burn hair. FTC complaint, first to be directed at audio-visual advertising for toiletries, alleged Lanolin violated Federal Trade Commission Act (Vol. 13:29).

Order was included in initial decision by FTC hearing examiner Loren H. Laughlin which was adopted by Commission with concurrence of its Bureau of Litigation. FTC announcement of compliance by Lanolin contained usual for-the-record statement in such cases: "The agreement is for settlement purposes only and does not constitute an admission by the company that it has violated the law."

Settlement of charges against Lanolin leaves these TV commercial cases on FTC's active complaint book: Mentholatum Co. (Mentholatum Rub), Omega Chemical Co. (Omega Oil), Fidelity Storm Sash (storm windows), Helene Curtis Industries (Enden Shampoo), Schick Inc. (razors), American Chicle (Roloids), Whitehall Pharmacal (Infrarub, Heet).

American Chicle is fighting complaint against Roloids alkalizer commercial, squaring off against FTC in hearing which started early last month and threatens to continue for some time (Vol. 13:40). Whitehall Pharmacal began defending itself Nov. 1 at hearing on charges that its TV advertising for arthritis treatment was false & misleading. Other cases are in varied pending phases. In none is any network or station involved directly.

For other news of FTC's TV advertising campaign, see p. 3.

MEXICAN TV—REAL EXPANSION BEGINNING: Growth of TV in Mexico, hampered by low living standards, vast distances and widely scattered areas of population, appears to be on verge of really significant spurt—and some Mexican admen are predicting it will be nation's biggest medium within 10 years.

However, you can discount recent reports of plans to extend network of TV stations "to every corner of the republic within a year." Mexicans make haste slowly, and growth of TV there is geared to the rise of a large middle class, a slow process which began in the cities shortly after World War II—but one which is now accelerating with the country's almost sudden economic awakening.

Mexico was first Latin American nation to have TV, but one of slowest in audience growth. Today, after more than 8 years, number of sets-in-use is just pushing 300,000, with a score of set manufacturers and assemblers—most of them U.S.-connected—sharing the market.

Nation's 11th TV station went on air a month ago, and at least 4 more outlets are in various stages of construction. Ten of the 11 stations are operated by, or affiliated with, Telesistema Mexicano, the combine which resulted from an "operational merger" of 2 bitter rival telecasters.

Mexico's advertising economy is built around radio, which is far-&-away the No. 1 medium. There are no important national print media, due largely to illiteracy rate (about 45%). Nation has nearly 300 AM stations—and one estimate (by Mexico City's Noble adv. agency) places radio's annual billings

at about \$26,880,000, more than half the all-media total of \$48,480,000. TV last year took in about \$2,800,000, newspapers \$5,600,000, movie theatre ads some \$2,040,000.

TV rates are low—highest being about \$320 for 30 min. in Class AA time on 3-station interconnected network serving country's principal center of population. This figure includes use of large theatre studio. A 5-sec. spot can be bought on one Mexico City station in prime evening time for a little over \$3.

Popularity of TV in Mexico is fantastic—even after more than 8 years of TV it's still not uncommon to see large group of onlookers clustered around an operating TV set in store window. Cheapest sets cost \$200-\$250 (20% down, 18 months to pay), beyond reach of vast majority. But booming Mexican economy and increasing growth of a middle class hold promise of an ever-expanding rate of set sales.

Only in the last year has Mexico become a really significant market for U. S. TV films. An incongruously elaborate studio setup, combined with the low cost of acting and technical talent, has made it advantageous for Mexican TV to concentrate on live entertainment.

As in most Latin American countries, TV in Mexico produces amazing results on a comparative shoestring by relying on liberal portions of imagination and inventiveness. For our impressions of TV on recent trip through Mexico, see story on page 6.

FTC Streamlines TV Monitoring: Federal Trade Commission's TV ad monitoring procedure, now one year old (see p. 2)—having started in Oct. 1956 with \$100,000 appropriation—is being streamlined again.

For the past year monitoring unit under T. Harold Scott has depended largely on dragnet operation by 135 agency lawyers throughout country to fish up evidence against TV-radio advertising (Vol. 12:20). In spare time (with compensatory time off) field attorneys listened to and viewed commercials at sets in hotels and own homes. They sent in reports & taped recordings from which Scott's Washington full-time headquarters staff of 5 culled likeliest complaints.

Now, for first time, monitoring unit has monitoring equipment of its own. TV set, radio, and recorder are being installed in room on top 7th floor of headquarters building, where staff lawyers will do their own preliminary screening, counting mostly on beefs from public for tips on programs to watch. Then specific commercials will be picked out for further investigation and assignment to field lawyers.

"It's been pretty helter-skelter since we started," unit spokesman told us. "Now we're going to use a rifle instead of a shotgun approach to targets."

At same time NARTB distributed Oct. *Code Bulletin* containing Q.-&A. rundown on "FTC—Friend or Foe?" One question addressed by NARTB to FTC: "Is the FTC concentrating in disproportionate fashion its attention upon TV advertisers?" FTC answer: No; 8 TV complaints are among 250 issued in past year involving all advertising media.

NARTB also reported that spot check of 52 key Better Business Bureaus throughout U. S. showed "positive results" from 8-month-old voluntary joint campaign against TV "bait" advertising. Only 5 of BBB offices reported any unresolved

"bait" problems in May, June & July, NARTB said.

Note: Although they weren't named as defendants in FTC "supermarket" case (Vol. 13:43) which predates monitoring unit and is unrelated to its campaign against fraudulent commercials, CBS & NBC have issued statements on advertising tie-in plans cited in preliminary FTC orders against 6 grocery firms.

CBS said FTC decision that chain store promotional tie-ins with network-owned stations discriminated against smaller customers of grocery producers was "unsupported by the record and insufficient in law." NBC said its present "Chain Lightning" merchandising plan, in which manufacturers pay for radio commercials, is offered to retailers "without discrimination of any kind."

Compromise settlement may be near in long-standing dispute between New York City's stations & networks and City Hall over sales tax on films shown on TV, *New York Times* reported Oct. 30. City has been negotiating with telecasters for 3 years in attempt to arrive at formula for the sales tax payments. Normal sales tax rates paid by movie theatres for showing films is 3% of film rental charge. However, networks and stations argue that films televised from N. Y. are aimed at entire nation or region, and that N. Y. City viewers are only small part of audience. High rate, telecasters argue, might well drive telecasting industry out of city. TV industry has offered to settle for 5% of the 3% rate, *Times* stated, adding that city's counter-offer has been 15% of the 3% tax—which *Times* "understands" most networks and independent stations, with possible exception of NBC, are ready to accept.

"Corporate caste system" is becoming increasingly "formalized & rigidified" by "status symbols" of rank, such as keys to executive washrooms and parking lot assignments, Oct. 29 *Wall St. Journal* says in first of series of reports on management customs & practices. For instance: "At a major broadcasting company an executive's stratum is given away by a look at his secretary's typewriter. Only the offices of higher-level officials get electric models."

Personal Notes: Kenneth W. Bilby, NBC v. p. for public relations, elected an exec. v. p. to head press, national adv. & promotion, exploitation, merchandising and continuity acceptance depts. . . . Everard Kidder Meade Jr., ex-Earl Newsom public relations firm, N. Y., named CBS Inc. v. p. for information services . . . M. H. Dann resigns as NBC-TV v.p. for program sales to join Henry Jaffe Enterprises as pres.; Henry Jaffe becomes chairman of TV production firm, Wm. Phillipson exec. v.p. & gen. mgr. . . . Harry T. Floyd promoted to western div. mgr of NBC-TV sales . . . Charles M. McAbee Jr., from CBS-TV Spot Sales, named gen. sales mgr. of KMOX-TV, St. Louis, call letters taken by CBS for newly-bought KWK-TV . . . Wm. M. Dozier, production v.p. of RKO Radio Pictures, rejoins CBS-TV as a general programming exec. in charge of live Hollywood shows . . . John R. Porterfield, ex-ABC-TV, appointed mgr. of WJMR-TV & WJMR, New Orleans, and elected v.p. of Supreme Bestg. Co. . . . John B. Garfield promoted to local sales mgr. of WJW-TV, Cleveland . . . Maitland L. Jordan, from KOMO-TV, Seattle, named mgr. of radio KOMO . . . Edward Scherer promoted to production supervisor of WTTG, Washington; Coral Long to sales service & correspondence coordinator . . . Gil Martyn promoted to public affairs & public service director of KTLA, Los Angeles . . . John T. Curry Jr. promoted to new post of regional sales mgr. of RAB . . . Benn Squires promoted to new post of program development coordinator of NBC Radio . . . Harold (Hal) V. Phillips, gen. mgr. of WTVH, Peoria, and Edward Breen, pres. of KQTV, Ft. Dodge, named vice chairmen of Committee for Competitive TV . . . Donald L. Sandberg, ex-Indianapolis public schools, named distribution director of Educational TV & Radio Center, Ann Arbor, succeeding Barton L. Griffith, now on U of Mo. faculty . . . John Dunn, CBC coordination officer, assigned to represent network at UN headquarters, N. Y., replacing

ADVERTISING AGENCIES: Frank Martello, TV producer for Kenyon & Eckhardt, Chicago, named commercial production supervisor there . . . Irving Adelsberg named TV dept. mgr. of Norman, Craig & Kummel . . . Rollo Hunter, TV-radio director; Richard Diehl, art director; John C. Legler & B. W. Matthews, account supervisors, named v.p.'s of Erwin Wasey, Ruthrauff & Ryan, N. Y. . . . Robert R. Kibrick, ex-Kenyon & Eckhardt, joins Richard K. Manoff Inc. as media & broadcast planning director . . . John C. Maddox, from Cleveland office, named senior v.p. in charge of marketing services of Fuller & Smith & Ross, N. Y. . . . Howard Mendelsohn, ex-CBS-TV, forms own public relations firm at 612 N. Michigan Ave., Chicago.

Daniel (Jake) Jacobson, supervising FCC engineer in charge of processing TV applications since freeze was lifted in 1952, was picked this week by Comr. Ford to be his engineering asst. Jacobson joined FRC in 1930, has been in FCC's Broadcast Bureau since 1946 except for short period in Safety & Special Radio Services Bureau.

New public relations firm—Taylor-Walker Assoc.—is formed by John H. Taylor & Mary T. Walker, both ex-Save Hannagan and Hill & Knowlton, at 1270 Sixth Ave., N. Y. (Judson 6-5777).

Gaynor & Ducas Inc. is new name of Gaynor, Colman, Prentis & Varley Inc., with Paul Gaynor as pres.; John J. Ducas, exec. v.p.

Ben Duffy, BBDO pres., is subject of interesting feature in Nov. 1 *Printers' Ink*.

New rep: WPST-TV, Miami, to Petry Oct. 28 (from H-R Television).

Vincent Tovell, who joins CBC public affairs dept., Toronto . . . Lester R. Frankel resigns as v.p. & technical director of Alfred Politz Research Inc., to join Audits & Surveys Co. as exec. v.p., partner and a director . . . John Leslie promoted to local sales mgr. of WEEK-TV, Peoria . . . Jack Markward promoted to TV sales mgr. of WOOD-TV, Grand Rapids . . . Keith E. Barze promoted to program director of WBRC-TV, Birmingham . . . Bernie Whitaker, ex-WSJS-TV, Winston-Salem, named local sales mgr. of WRAL-TV, Raleigh, succeeding Gene Gaudette . . . Ed Sanchez, ex-KGGM-TV, Albuquerque, named production mgr. of KFSD-TV, San Diego. . . . Hugh Graham, ex-NBC, named to new CBS-TV post of mgr. of unit management & control services for production operations . . . Robert O. Moran, promotion mgr. of WBEL, Beloit, Wis., named to vacancy on Broadcasters Promotion Assn. board created by resignation of Joseph Zimmerman, who has been named mgr. of WLBR-TV, Lebanon, Pa.

Obituary

Louis B. Mayer, 72, movie great who led MGM into world leadership in film-making, died Oct. 29 of anemia complicated by kidney ailment in UCLA Medical Center, Los Angeles. Son of immigrant Canadian ironmonger, he organized old Metro in 1915 after operating New England theatre chain, joined in 1924 with Marcus Loew & Nicholas M. Schenck in establishing MGM studios, was eased out of control in 1951 after postwar development of TV helped put company into decline. He returned to movie industry next year as chairman of Cinerama Corp., joined with other dissidents who tried this year to take control of MGM's parent Loew's Inc. from pres. Joseph R. Vogel. For 7 years (1943 salary: \$1,138,992.47) he was nation's highest-paid executive. Surviving are widow and 2 daughters, Mrs. Irene Selznick, former wife of producer David O. Selznick, and Mrs. Wm. Goetz, wife of movie executive.

Groucho Marx is winner against Govt. in capital tax gain ruling by U. S. Tax Court on \$1,000,000 sale in 1950 by him and partner John B. Guedel of interests in *You Bet Your Life*, which was switched from CBS to NBC. Court in Washington held that price paid Marx & Guedel represented "fair market value" of their interests in program—not "compensations for personal services" as claimed by Govt. for income tax purposes. Deal gave Marx \$750,000, Guedel \$250,000 over 10-year period, NBC taking all rights to program.

Liquor commercials should be accepted by broadcasters, Oct. 28 *Broadcasting* says in editorial asserting that "interdiction" against such advertising on TV & radio "was imposed and has been cultivated by fear." Arguing that influence of prohibitionists in country as whole is "unimportant," magazine calls on "courageous broadcasters" to defy the taboo: "Where liquor is legal, which is to say most parts of the United States, the advertising of liquor on the air is equally legal. Why shouldn't broadcasters accept their legal rights?"

TV-radio program screening by specific U. S. Catholic censorship agency, as called for by Pope Pius XII in "Remarkable Inventions" encyclical (Vol. 13:37), can definitely be expected by broadcasters, Oct. 26 *Sponsor* says in speculative article on possible effects of censorship by church. But immediate likelihood is that meeting of Catholic bishops in Washington Nov. 12 will delay formal establishment of machinery for reviewing programs, possibly referring question to study committee, magazine says.

United Artists, big independent movie distributor, plans to finance and distribute TV films, with first offering due in 1958-59 season.

Toll TV—Great Debate Rolls On: It was another routine week on pay-TV front—marked, as usual, by violent attacks and staunch defenses of subscription TV via broadcast and wire—with repetitions of most of the same old arguments. But still no applications at FCC for subscription telecasting trials.

Sen. Langer (R-N.D.), member of Senate Judiciary anti-trust subcommittee who plans to introduce bill to ban fee TV in Jan., incensed by recent *Life* magazine article on Bartlesville Telemovie experiment, started postcard poll of Bartlesville residents on subject of pay TV. He addressed letter to every Bartlesville family, stating his opposition to toll TV and enclosing postcards on which respondents could check whether or not they were “in favor of pay-as-you-see TV.” Results, he said, would be turned over to anti-trust subcommittee.

Unfortunately the Senator became a little confused, his letter indicating that he thought Bartlesville was “the only city that has been allowed by the FCC to try out the pay-as-you-see program.”

By week's end, Langer had received total of 1693 postcards and letters in his Bartlesville poll: 1430 voted against pay TV, 113 in favor; 150 wrote letters, most of them indicating that while the writers opposed fee TV they favored wired Telemovies, which they said wasn't the same thing. A few of the 150 expressed fear that Telemovies was forerunner of pay TV.

In Bartlesville, Video Independent Theatres pres. Henry S. Griffing reacted quickly, dispatching letter to Langer denying that Telemovies were same as pay TV and insisting it is merely extension of the movie exhibition business, that it removed no free channels from TV set, and in fact added 3 more choices for viewers. “Like you,” he said, “we are opposed to pay TV . . . We just want to continue selling motion pictures in Bartlesville.”

* * * *

House Judiciary Chairman Celler (D-N.Y.) was heard from again this week—addressing RTES meeting in N.Y., sharing platform with ex-FCC chairman Paul Porter. Celler maintained tests of pay TV would be impossible to

GE doesn't plan to enter video tape recording field, technical products dept. gen. mgr. Wm. J. Morlock told us this week. “We're not in the tape recording business,” he said when asked about company's plans. He said company did some TV recording research, which was discontinued about 1½ years ago. At the moment, he said, GE doesn't visualize a market “expansive enough to permit that kind of competition,” presumably meaning 3-company competition among Ampex, RCA & GE.

Animated commercials patterned after successful spots for Jell-O and Piel's beer are TV trend this season—but few are “different, exciting or unusual,” Oct. 25 *Tide* says. Article singles out these “top” examples of good ones: Columbia Records (“Hi-Fi for Fun”), Johnson & Johnson (Band-Aids), Armour (Liquid Chiffon), Timken Roller Bearings (locomotion methods), Westinghouse (TV sets), Kaiser Industries (diversified operations).

call off, once started; that toll TV would siphon good programming from free TV; that networks and other commercial TV interests would be drawn into it and it would only aggravate monopolistic situations in TV. He also called on FCC commissioners to request Comr. Lee's “removal from the panel when it considers trial pay TV,” because of Lee's authorship of *Look* article last year favoring trial.

Porter, who is attorney for International Telemeter, welcomed FCC's decision for trial of broadcast pay TV, but added: “Maybe it would appear that the immediate future of pay TV is the closed-circuit route.” He said wired closed-circuit would solve problem of shortage of TV channels, suggesting that wired system should add 3 new channels between Ch. 6 & 7. He added that wired TV could supply community TV and “local outlets of self-expression” which he said are lacking in current broadcast TV system.

There were these other developments on pay-TV front, meanwhile:

(1) More “cable theatre” projects are in the works, according to Milton J. Shapp, pres. of Jerrold Electronics, which installed Bartlesville setup. He told convention of Allied States Assn. of Motion Picture Exhibitors that his company is now “working with several exhibitors who are preparing to add cable theatres to their circuit operation.” He added that other exhibitors are planning to install community antenna systems “in select fringe-area communities.” These will have extra channel for future cable theatre programming.

(2) Non-exclusive contract was granted by Ft. Smith, Ark. to Midwest Video, Inc. to wire up city for pay TV, city to receive \$100 a year plus 2% of gross income. Schine Home View Theatres applied for combination fee-TV-community antenna franchise in Herkimer, N.Y.; Hardy Theatres & Lippert Theatres applied for fee-TV franchise in Fresno, Cal.

(3) Another advertising industry spokesman served notice that “if pay TV attracts audiences away from free TV to any appreciable degree you can be certain advertisers will find ways either to use pay TV or to circumvent it.” *Tide Magazine* editorially suggested several methods, in addition to the obvious sponsorship technique: For example, advertisers might supply special slugs to be used in TV coinbox which they would later redeem from operators; or they might arrange to pay for a particular program so viewers wouldn't be billed for that show. Magazine finds it “ludicrous . . . that the operators of pay TV would forever eschew the rich rewards of commercialization,” and predicts that “ultimately the only losers will be the viewers.”

TV sewing lessons on WBAY-TV, Green Bay, Wis. were so successful that Viking salesman Roy Fahlstrom reported 25% sales increase although no TV or newspaper announcements of course were made. Cost of 10-week afternoon course was \$1200, half of which was paid by national distributor, Consolidated Sewing Machine Corp. Fahlstrom plans to offer course in Duluth, Minneapolis and other cities in his territory which includes Wis., upper Mich., Ill., Ind.

Show-cause hearing for *N.Y. Herald Tribune* TV-radio columnist Marie Torre, at which she was scheduled to explain why she wasn't in contempt of N. Y. federal court for refusing to divulge CBS source of item about actress Judy Garland (Vol. 13:42-43), was postponed Oct. 29 until Nov. 7. Judge Sylvester J. Ryan recessed proceeding in Miss Garland's \$1,393,333 libel suit against network because Miss Torre's counsel was out of town.

Telecasting Notes: Televised salute to telecasting industry—on NBC-TV's *Wide Wide World* Nov. 10, produced with cooperation of ABC-TV & CBS-TV—won't devote itself entirely to networks' contributions. One segment will use pickups from stations across nation to show how local stations help develop new talent and program ideas . . . Among local program pickups on the salute to TV: Rehearsals of Japanese program from KRON-TV, San Francisco; inside look at production of children's programs at KMTV, Omaha; square-dance program from KYTV, Springfield, Mo.; look-in on science program from WBZ-TV, Boston, featuring exclusive sputnik films; rehearsal of teen-age rock-&-roll program from WLW-TV, Cincinnati; section of *The Arbitrator* program on WJL-TV, Detroit, which airs public controversies . . . From network standpoint, program will feature 40 stars of network TV in flashbacks over past 10 years. It will conclude with statements by 4 TV critics and "a number of viewers" on whether TV has "fulfilled its promise" . . . **To the amazement of critics—and even of industry itself—westerns seem to be most popular program fare this season.** Two trade publications noted this week that Oct. Trendex puts every new western ahead of show which occupied its time slot last year and gives every returning western an improved rating over last year . . . NBC's faith in late-night live TV finally is being vindicated. Critics have been applauding it lately, *New York Times'* Jack Gould giving it kudos Oct. 31; billings have been rising, biggest coup being this week's \$450,000-gross order from Marlboro cigarettes; station line-up increases to 85 markets Nov. 4 . . . **Unusual cultural presentation:** Hartford's WTIC-TV (Ch. 3) will present J. Arthur Rank's 2½-hour filmed "Romeo & Juliet" Nov. 3, 7:30-10 p.m., complete and without cuts; station is stirring up interest by pointing out that scholars have disagreed on merit of film, and programming v.p. Leonard J. Patricelli has invited teachers and literature students to

send critiques of film to station . . . **Despite defections of Dodgers & Giants, New York probably will have as much baseball on TV as ever next season—WOR-TV plans to televise about 78 Philadelphia Philly games, for which it reportedly is paying about \$600,000, and WPIX is negotiating with Yankees to add 70 away-from-home games to TV schedule in addition to all home games . . . TV hit drama, *Playhouse 90's* "Requiem for a Heavyweight," has been acquired for Broadway stage by Norman Panama & Melvin Frank, who also hope to make it into movie; Jack Palance is being sought to repeat starring role.**

Counterclaim for \$9,000,000 against CBS Inc., asking triple anti-trust damages, has been filed in Chicago federal court by Amana Refrigeration Inc., which was sued in July by network for \$284,545 for alleged contract failure (Vol. 13:29). In reply to CBS suit, Amana says it has paid \$252,431 to network to satisfy network's charges for 7 spots on *Phil Silvers Show*, but that CBS owes refrigerator firm \$3,000,000 on each of 3 anti-trust counts: (1) CBS gave discounts of up to 25% to other advertisers, but limited Amana's discount to 5%; (2) network compels advertisers to buy time on all stations stipulated by CBS; (3) CBS imposes tie-in requirement by which CBS-produced programs & those in which network has interest are favored over programs available from other producers.

MBS news headquarters have been switched from Washington to N. Y. in move "necessitated by increased use of special circuitry for overseas pickups," pres. Paul Roberts announced Oct. 29. Norman Baer, former AP & INS byliner who was TV-radio director of Lewin, Williams & Saylor and consultant to Hilton & Riggio before joining Mutual in Sept., has been appointed news & special events director of radio network. He succeeds Robert F. Hurlough, recently named an MBS v.p. (Vol. 13:43), who continues in charge of Washington operations.

Mexico's Do-It-Yourself TV: When Mexico's Telesistema Mexicano revealed last summer that it hoped to bring live World Series telecasts to Mexico City via hook-up involving a single microwave hop spanning nearly 300 mi. (Vol. 13:33, 38), American TV engineers shook their heads and said the Mexicans were dreaming.

It turns out that they were. As a Telesistema official put it (mildly), engineering tests showed such a distance "calls for another relay," and so World Series wasn't seen live in Mexico City. In an industry in which phenomenal expenditures are commonplace, it would seem logical to install the extra relay or 2 and have it done with. But in Mexico, such an expenditure was out of the question and international hook-up was shelved "for the time being, at least."

Technical and artistic ingenuity on a relative shoe-string budget keeps Mexican TV operating with some first-class entertainment (and some that's not so good), despite low receiver circulation (see p. 2).

* * * *

"Not a single American or European expert helped us get started. Our TV is strictly Mexican. We've made some mistakes, too, but they were also our own." So we were told by one of topkicks of big Telesistema Mexicano, formed 3 years ago when the 2 principal Mexican TV operators got together in a sort of marriage of convenience. The rival TV entrepreneurs were Emilio Azcarraga,

owner of large string of radio stations, and Romulo O'Farrill, industrialist and publisher of *Mexico City Novedades* and *News* (English). Their alliance is complicated, falling short of merger in that each holds title to own stations. However, both groups share same technicians, equipment and studios in Mexico City's huge Televiscentro.

Claimed to be world's largest TV studio under one roof, Televiscentro was built originally as a Mexican "Radio City," but was changed in midstream to a TV city. On recent visit there, we toured Televiscentro's 18 large studios (largest of which seats 1100 spectators). The center is equipped with 27 live image orthicon camera chains—RCA, GE & DuMont—with Zoomar and other associated equipment.

Televiscentro is headquarters for Mexico City's 3 TV stations, origination point for live programming on 3 others (by off-the-air pickup) and kines for non-interconnected outlets. Some 700 people are employed there, all of them connected in some way with telecasting.

On our tour of Televiscentro, we were amazed at the number of live shows in various stages of rehearsal and preparation. Until this year, 70% of programming has been live, with 27 drama shows originating from Televiscentro each week. Telesistema produces no original filmed shows—"they're too costly," an official explained.

Economy-bound budgets have given rise to some ingenious techniques. Almost all large scenery flats consist of plain brown wrapping paper mounted against wooden frame. Telesistema artists are told what scenery to depict—and they go to work, using only their imagination

and ordinary colored chalk. Colored, because it helps create illusion of depth and makes actors feel more at home. When show is over, wrapping-paper scenery is discarded; no storage problems.

Popularity of live dramatic shows is undisputed. No. 1 show this year has been 60-min. *Teatro Angel Garaza*, starring Spanish actor Angel Garaza and consisting of light domestic comedies. Also popular are variety shows—including one 11:15 p.m.-12:15 a.m. stanza reminiscent of NBC-TV's *Tonight*. We saw a 60-min. Pepsi-Cola spectacular, built around Mexican popular songs and featuring some of the country's favorite artists. Among other live presentations, of course, are quiz shows (including the ubiquitous *64,000-Peso Question*).

Telesistema does large number of remotes, boxing being most popular of the sports, which also include baseball and an occasional bullfight. One popular remote origination is *Visiting the Stars*, televised live from celebrities' homes, which seems to have been inspired by Ed Murrow's *Person to Person*.

Conducting latter show and serving as news commentator and all-around trouble-shooter is soft-spoken, U. S. educated Juan Duran y Casahonda, whose official title is director of public relations. Not the least of his tasks is maintaining good relations with Ministry of Communications, which—unlike FCC—exercises strict control over program content and is empowered to (and does) levy fines when it thinks program content is in questionable taste or when "adult programs are broadcast during children's hours."

This year, for first time, Telesistema has been going in heavily for Spanish-dubbed U. S. TV films. "We resisted them for a long time," said Sr. Duran, "because we didn't think that's what the people wanted"—but they're obviously going over, and Mexico City's 2 principal stations now divide their time evenly between live and filmed shows.

Among popular U. S. shows in Mexico are *Rin Tin Tin*, *Count of Monte Cristo*, *Highway Patrol*, *Lassie*, *Disneylandia*. Only one film series is presented entirely in English—Ziv's *Eddie Cantor Show*—sponsored by Raleigh cigarettes and aimed at city's large English-speaking population.

Telesistema has library of "thousands" of feature films of all vintages and origins—mainly French, Argentine, Spanish. Virtually all Mexican-made features may be shown on TV 3-4 years after release to theatres. Because of small number of sets and low govt.-controlled price of theatre admissions (32¢ top), this has made no dent at all in tremendous popularity of movies.

Many of the non-Spanish films have subtitles, but some—notably old U. S. 2-reel comedies—rely on tech-

nique of off-camera narration. Telesistema tries to get copy of original script with its films, and narrator explains picture as it is unreeled. We viewed an elderly Laurel & Hardy comedy shown in this manner, and the result was a trifle confusing.

As for commercials—like Mexican radio, Mexican TV has plenty of 'em. Watching a late evening show we counted 7 in a row before a power failure ended our viewing for the night—the closing commercial on one show, two spots, two station break spots (station uses 2 ID's and 2 sets of call letters, identifying originating station and satellite), another spot followed by an opening commercial for next show.

* * * *

Programs from 2 of the 3 Mexico City channels are picked up off-air and retransmitted by 2 transmitters on 13,500-ft. Cortez Pass about 50 mi. SE of Capital. These transmitters give amazing coverage, and they are picked up direct at another mountain-top site—Mt. Zamorano, near Queretaro, more than 150 mi. NW—and retransmitted by Ch. 3 transmitter there. At present, Zamorano transmitter repeats one Cortez Pass channel for one week, the other the next week—alternating to give sponsors even break. Second transmitter is being installed on Mt. Zamorano.

Remainder of Mexico's stations are not interconnected with Mexico City. Only other stations in the interior are at Monterey & Chihuahua, but new ones are under construction at Torreon & Durango. There are stations along U. S. border at Tijuana, Mexicali & Juarez.

Big barrier to interconnection of Mexico's TV stations is fact that—except on and near the central plateau—distances between populated areas are vast. It's not economically feasible to interconnect 2 stations which are 600 mi. apart without populated areas in between which can support own TV stations and thus help amortize cost of relay.

Viewing in Mexico—particularly outside of the city—is an experience in itself. Due to variations in power-line voltage and frequency (50 cycles is nominal house-current standard), picture falls in and out of sync, sound wells up and fades. But Mexicans aren't nervous dial-twiddlers; they've learned that if you wait patiently the picture will come back.

Heavy variations in line voltage are tough on sets, and there seem to be more TV repair shops than there are sets-in-use—all apparently doing thriving business.

TV sets are available in sizes from 14 to 24-in., mostly assembled largely from U. S. parts and bearing such familiar trade-names as Admiral, Philco, RCA, GE, Packard-Bell, Majestic—with European brands such as Philips also making headway there.

Powerful new Vatican radio station was dedicated this week by Pope Pius XII with plea for peace. The \$2,500,000 broadcasting center was financed by funds from congregations throughout world, has medium-wave transmitter with 120-kw power, 3 short-wave installations, one with 100-kw and 2 with 10-kw each. Vatican has plans for telecasting, too, in future, having requested 2 frequencies under Stockholm allocations plan. It once experimentally used 819-system donated by French.

West German TV stations, owned by non-profit state-private combines, served notice that they would seek commercial telecasting monopoly, opposing entry of privately owned competitors into TV field. Three of Germany's 5 public TV chains already accept limited number of spot commercials, which are generally bunched into 30-min. program.

Subsidy of about \$2,000,000 for Swiss non-commercial TV network has been voted by Govt. Operated by Post Office dept. and supported by receiver licenses, the 4-station system is heavily in red. Swiss newspaper publishers have also offered annual subsidies totaling some \$500,000, so long as stations continue on non-commercial basis.

Cuban Labor Confederation buy of Union Radio, acquiring stations in Havana and 9 interior cities, was announced Nov. 1 by Confederation secy. Eusebio Mujal. He said \$150,000 would be spent for modern equipment at stations, whose sale price was reported as \$450,000.

Circulation peak of 5,806,060 copies was set by TV *Guide's* Oct. 12 edition, topping previous record of 5,669,726 set March 9, 1957. New York metropolitan edition led magazine's 50 regional editions with 1,210,800 for Oct. 12 issue.

St. Louis Switch Protested: A fly in the balm of everybody's-happy-now station-ownership parlay in St. Louis—wherein FCC approved CBS's purchase of KWK-TV (Ch. 4) and 220 TV's acquisition of Ch. 11 CP (Vol. 13:43)—appeared in form of protest filed this week by St. Louis Amusement Co. (Fanchon & Marco theatres). Protestant was once competitor of CBS's for Ch. 11 but defaulted early in the fight, never was considered a contender; in this week's filing, it charges "unlawful combination," and "buy out" of opposition. Protestant faces uphill fight proving its standing to protest. However, even if it fails to convince FCC, it delays transfers.

Commission cleared up several facilities-change applications: (1) WNHC-TV, New Haven (Ch. 8) from 9 mi. north of New Haven and 26.5 mi. southwest of Hartford to 19.8 mi. northeast of New Haven and 14.5 mi. south of Hartford. (2) WJBF, Augusta (Ch. 6) to about 10 mi. south of present site, increasing height from 610 to 1370 ft.—affirming earlier grant after WNOK-TV, Columbia, S. C. (Ch. 67) withdrew protest. (3) WICU, Erie (Ch. 12) to 5.6 mi. southeast of city's center—affirming previous authorization upon withdrawal of protest by WSEE, Erie (Ch. 34). (4) KTRX, Kennewick, Wash. from Ch. 25 to 31.

Convinced that Hattiesburg-Laurel, Miss. area can't support 2 stations and that uhf can't survive in Baton Rouge, majority owners of WDAM-TV, Hattiesburg (Ch. 9) and WAFB-TV, Baton Rouge (Ch. 28)—Edgar Stern group, operating WDSU-TV, New Orleans (Ch. 6)—asked FCC for permission to move WDAM-TV to Baton Rouge, take WAFB-TV off air. Also submitted was agreement whereby grantee WTLM, Laurel, Miss. (Ch. 7) would take over WDAM-TV facilities for \$160,000, begin operating on Ch. 7.

Another uhf grant for Baton Rouge was lined up with initial decision favoring Port City TV Co. for Ch. 18, after competing applicant Bayou Broadcasting Co. dropped out. Port City agreed to pay Bayou \$4000 for expenses, in return for which Bayou agreed to drop its Ch. 40 CP, which it had sought to change to Ch. 18.

FCC received petition from Ch. 15 grantee WCBF-TV, Rochester, to assign Ch. 13 to that city so it can switch to the vhf channel.

Translators granted: Lebanon, N. H., Ch. 81, to WWLP, Springfield, Mass.; Gold Beach Ore., Ch. 74, to Community TV Assn.; San Saba, Tex., Ch. 80, to Norman R. Phillips.

FCC network study staff report (Vol. 13:40-41) will be printed by House Commerce Committee in about a month. Spokesman for Chairman Harris (D-Ark.) said it will be issued as report of Committee to House—without endorsement, but in form of "letter of transmittal." FCC's Office of Network Study currently is re-editing report carefully for typographical errors, incorrect footnote references, etc. Single copies will be available without charge.

Early congressional consideration of bills to exempt all-channel sets from 10% Federal excise tax was urged in letter to House Ways & Means Excise Subcommittee Chairman Forand (D-R. I.) by Committee for Competitive TV. Pointing out that at least 10 more uhf stations have gone off air since last spring, CCTV stated: "The uhf TV situation is more serious at this moment than it was a year ago."

NARTB Code Review Board quarterly meeting Nov. 11-13 in Hollywood will take up TV films staff monitoring report, viewer complaints & comments.

Craven Boosts Boosters: Legalizing the illegal vhf boosters will be proposed formally to full FCC by Comr. Craven, who inspected Colo. booster operations at request of Gov. Steve McNichols. He'll propose that boosters be classified as "limited radiation device," and that station operators whose signals are to be relayed certify to FCC as to probability that boosters will cause no interference and agree to provide regular engineering inspection. His view is that Communications Act doesn't require boosters to be considered "transmitters," that they may be considered part of receiver. Craven says western telecasters are willing to go along. He also reports that community antenna operators are prepared to accept proposal. Actually, he says, CATV operators have little desire to build cable systems in towns served by boosters because they're too small. In one case, booster serves 7 families.

Refusal of equal TV time to Negro leader by WLBT, Jackson, Miss., following 60-min. program in which 3 southern politicians aired views on racial issues, posed problem of "fair" programming—and what Govt. can do about it—to FCC this week. In protest dated Oct. 17, Miss. field secy. Medgar Evars of National Assn. for Advancement of Colored People asked Commission to enforce equal time rule against station so he can answer Gov. J. P. Coleman, Sen. Eastland (D-Miss.) and Rep. John Bell Williams (D-Miss.), who had discussed Little Rock, Ark. crisis. FCC spokesman pointed out to newsmen that rule applies only to bona fide candidates for public office, not to controversial issues, although Commission expects stations to be "fair" in overall programming. FCC itself had made no reply to protest this week.

Trial of test case involving legal right of United Automobile Workers to spend dues money directly for political broadcasts opened this week in U. S. District Court, Detroit. Corrupt Practices Act indictment against union for sponsoring campaign shows on WJBK-TV, Detroit, in 1954 election was dismissed last year (Vol. 12:5), but Govt. won appeal to Supreme Court, which ordered trial to determine issues (Vol. 13:11). Union claims telecasts were educational—not political—even if they did favor candidates supported by UAW. Govt. contends they violated law against direct contributions to candidates by unions or corporations.

"Equal time" protest alleging discrimination against Socialist Workers Party by DuMont's WABD, N. Y., in mayoralty campaign was filed Oct. 29 with FCC, which offered little hope of any action prior to Nov. 5 election. Minority party complained that station excluded candidate Joyce Cowley from *Between the Lines* program which gave time to rivals, asked that FCC "rectify" situation before voters go to polls. But FCC replied that issue (including rejected offer of 15-min. by WABD to Mrs. Cowley) may require hearing which couldn't be concluded before Nov. 5.

Invitation to inspect uhf setup of WWLP, Springfield, Mass. (Ch. 22) has been accepted by FCC members who will fly there Nov. 22. Station also operates satellite WRLP, Greenfield, Mass. (Ch. 58), translator W79AA, Claremont, N. H., holds CPs for translators W71AA, Newport, N. H. and W81AA, Lebanon, N. H.

Only TV application on agenda of CBC Board of Governors Dec. 6 meeting is for satellite of CJBR-TV, Rimouski, Que. (Ch. 3), to be operated by La Compagnie de Television Pohenegamooke Inc. in Estcourt, Que. (Ch. 70). CBC also is reported exploring possibility of building 4 satellite TV stations in northern Ont.

Transocean TV pickup from BBC was reported Nov. 1 by Press Wireless at Baldwin, L. I., where reception of signal lasted 1½ hours.

Preview of Frey Report: Most advertisers think they pay agencies too much commission for packaged TV shows, while even more agency men are convinced that the 15% they get isn't enough.

These are among preliminary findings in long-awaited Frey Report disclosed this week in Atlantic City at 48th annual meeting of Assn. of National Advertisers, which commissioned \$40,000 study of agency practices, services & compensation a year ago.

Prof. Albert W. Frey of Amos Tuck School of Business Administration at Dartmouth College polled 845 adv. mgrs., 412 agencies, 277 media, 193 officers of corporations, came up with 24-page report, 17 pages of tables which will be included in full study to be published in Jan.

Among adv. mgrs. responding to Frey questionnaires, 59% thought agencies' commission for packaged TV shows should be less than 15%, only 35% supported standard fee. For agency-produced shows, 60% thought 15% was proper, 31% thought figure should be higher.

Among agencies, 70% of those which have produced TV shows figured commission should be higher—and higher proportion of agencies which have bought packaged shows believed that 15% is least which should be charged.

In general, many big advertisers reported they want to scrap present 15% commission system, substitute flat fees negotiated with agencies. Agencies generally said commission system should be continued—with the 15% upped.

Advertisers and agency & media executives at ANA meeting reached no common conclusions on

touchy subject of fees, but indications were that Frey Report might lead to some major changes in system. ANA itself confined itself to statement that "any comment at this time would be premature," although pres. Paul B. West said at press conference that "positive note" had been struck by industry's unprecedented self-examination.

* * * *

TV fare itself came under criticism at meeting, pres. John P. Cunningham of Cunningham & Walsh asserting that "index of boredom" by public "has been rising steadily" under "great massive waves of imitation." Next sponsor who buys a TV western which isn't "marked creative departure from the pattern ought to turn in his grey flannel suit and go to the eternal showers," he said.

"We want it [TV] to be a strong, well-rounded medium," Cunningham said. "Multiplication of the same type of show, such as the present wave of singers, quizzes, and westerns, can only narrow the base of TV, restrict its power and its value to the people."

On the other hand, v.p. Lansing B. Lindquist of McCann-Erickson told meeting that if there is one word for TV & radio networks today, in comparison with 5 years ago, it is "maturity." He said that for first time advertisers have "full-blown, grown-up set of media tools" in broadcasting. Lindquist particularly praised network radio as "programmed, scheduled & priced more intelligently than ever before in the history of the medium."

Warning that much "management, marketing & advertising energy goes down the drain" in developing & promoting new products, Conrad Jones of Booz, Allen & Hamilton said admen should give "more to the management decisions that precede commercial introduction."

"There are brilliant advertising campaigns for products in dying fields, but the product will still die," Jones said, asserting one function of admen is to help make sure new products will yield commercial return.

Ownership in WMFD-TV, Wilmington, N. C. (Ch. 6) is being sold by Richard A. Dunlea & wife, who are disposing of their 210 shares (60%) for \$153,850. Dan D. Cameron, other TV stockholder, retains 40%; Dunlea keeps radio WMFD, of which he is sole owner. Dunlea stock buyers are WNCT, Greenville, N. C. (Ch. 9), paying \$150,000 for 171.5 shares, and Wilmington businessman J. W. Jackson paying \$3850 for 38.5 shares. After transfer has been effected, stockholders are to buy additional shares at \$100 each in following amounts: WNCT, 250 shares; Dan D. Cameron, 200; James W. Jackson, 50. Ownership will then be: WNCT, 49.58%; Dan D. Cameron, 40%; James W. Jackson, 10.41%. WMFD-TV Sept. 30 balance sheet shows \$46,878 in accumulated earnings as of Jan. 1, 1957, reduced by loss from sale of coaxial cable, trade of transmitter equipment and depreciation to \$38,186. It had \$73,380 current assets, \$389,731 in property; \$60,967 current liabilities, \$18,035 taxes payable, \$288,453 notes payable. WNCT Sept. 30 balance sheet lists \$103,299 surplus and \$51,896 profit to date for 1957.

Option for 50% of WIIC, Pittsburgh (Ch. 11) may now be exercised by H. Kenneth Brennen & family, FCC having approved \$500,000 stock sale to them under terms of merger agreement reached in 1955 with *Pittsburgh Post-Gazette* (WWSW), which retains other 50% (Vol. 13:40). Brennen family has sold Pittsburgh radio WJAS & WJAS-FM to NBC (Vol. 13:39), but retains radio WHJB, Greensburg, Pa. and Radio Advertising Co., Pittsburgh. WJAS formally changed hands Oct. 31.

Sale of WATV, Newark-N. Y. (Ch. 13) with WAAT & WAAT-FM, includes assumption of \$950,000 in obligations by buyer NTA, bringing price up to \$4,500,000, sales agreement providing that NTA is to pay \$2,500,000 for stock, additional \$1,000,000 out of station profits (Vol. 13:40). WATV Sept. 30 balance sheet filed with transfer application lists \$148,115 deficit. It had \$123,362 current assets, \$475,939 fixed assets; \$532,416 liabilities, \$215,000 common stock. NTA consolidated July 31 balance sheet lists \$1,474,443 earned surplus since June 8, 1955 and additional \$3,640,896 capital surplus. It lists \$5,152,154 cash, \$11,510,869 in notes and accounts receivable, \$27,611,493 current assets, \$903,461 fixed assets; \$16,985,218 current liabilities, \$3,531,617 deferred film rental income, \$2,734,787 payables due after 1 year, \$4,600,000 6% sinking fund subordinated notes.

Purchase of WROM-TV, Rome, Ga. (Ch. 9), which holds authorization for move to Chattanooga, by Martin Theatres of Georgia for \$722,500 (Vol. 13:40) was approved by FCC. Sellers, headed by Dean Covington, failed to find financial aid needed to build "first-class" Chattanooga outlet and decided to sell to Martin Theatres (E. D. Martin, pres.), owner of WTVM, Columbus, Ga. (Ch. 28).

Sale of WREX-TV, Rockford, Ill. (Ch. 13) for \$2,850,000 by Greater Rockford Television Inc. (Louis E. Caster, pres.) to Continental Television Corp., in which Bob Hope has 50% interest (Vol. 13:40), was approved by FCC. Hope's associates are Albert Zugsmith, 25%; Ashley L. Robison, 15%; Arthur B. Hogan, 10%.

New and Upcoming Stations: Bumper crop of stations began operation this week, largest number to make debut since summer of 1955. Five were new starters (2 uhf), one uhf resumed after moving to new site, and Mexican border outlet reports start earlier this month. Demise of WGLV, Easton, Pa. (Ch. 57), in economic difficulties, which left air Nov. 1, brings on-air total to 516 (90 uhf). New starters: WLWI, Indianapolis (Ch. 13) began 5 p.m. Oct. 30 with ABC-TV; WINR-TV, Binghamton, N. Y. (Ch. 40) 7 a.m. Nov. 1 with full NBC-TV schedule, also carrying some ABC-TV; WOWL-TV, Florence, Ala. (Ch. 15) Oct. 28 with NBC-TV & CBS-TV; KXGN-TV, Glendive, Mont. (Ch. 5) Nov. 3 with CBS-TV; WMVS-TV, Milwaukee (Ch. 10, educational) 4:45 p.m. Oct. 28. WKST-TV (Ch. 45) resumed Oct. 31 as Youngstown, O. outlet with ABC-TV, after moving from New Castle, Pa. Border starter is XEM-TV, Mexicali-El Centro, Cal. (Ch. 3), which reports Oct. 1 debut as independent.

WLWI began programming same day it got program authorization, following FCC denial of petitions by losing applicants, who sought to block effectiveness of grant to Crosley Bestg. Corp. (Vol. 13:43). It's area's fourth outlet; Crosley's fifth vhf, third affiliated with ABC-TV. It has 50-kw RCA transmitter and 12-bay superturnstile antenna on 1016-ft. Ideco tower at Ditch Rd. & 96th St. Studios are at 1401 N. Meridian St. John T. Murphy is TV v.p. for Crosley; John Babcock, from WLWT, asst. gen. mgr. of WLWI; Robert Lamb, ex-Chicago sales mgr. for Crosley, sales mgr.; Lyle R. Allen, ex-WITN-TV, Washington, N. C., merchandising mgr.; Charles W. Brodhead, ex-CKLW-TV, Detroit-Windsor, program director; Bruce Cox, WLWT, director of special services. Base hour is \$1100. Rep is Crosley.

WINR-TV is programming 18 hours daily using 25-kw RCA transmitter and 52-gain pylon antenna on 400-ft. tower to get 1070-kw maximum ERP. City's other outlet is Triangle Publications' WNBK-TV (Ch. 12). WINR-TV is owned by *Binghamton Press* (Gannett). Dale Taylor, ex-mgr. of radio WENY, Elmira, is gen. mgr.; A. Victor Ludington, ex-sales mgr. of WOAY-TV, Oak Hill, W. Va., sales mgr.; Bill Densmore, ex-WDAN-TV, Danville, Ill., program director; Gino Ricciardelli, ex-WPTV, Palm Beach, technical director. Base hour is \$300. Rep is Hollingbery.

WOWL-TV is in northwest corner of state near Tenn. border; only TV within 90 mi. is WMSL-TV, Decatur, Ala. (Ch. 23), 43 mi. away. WOWL-TV has 1-kw GE transmitter, GE antenna on 300-ft. tower from U. S. Tower Co. at 800 Cyprus Mill Rd. Richard B. Biddle, pres.-gen. mgr., owns 50% (25% personally, 25% through radio WOWL, of which he has 52% control). Jack Worley, from WOWL, is sales & program mgr.; John Utley, ex-KLAS-TV, Las Vegas, production mgr.; Larry Rohling, WOWL, chief engineer. Base hour is \$200. Rep is Forjoe.

KXGN-TV has 5-kw DuMont transmitter and 1-bay GE antenna on 192-ft. Fisher tower at Kendrick Ave. & Valentine St. It's near eastern border of state, 92-mi. from KDIX-TV, Dickinson, N. D. (Ch. 2) and 88-mi. from KUMV-TV, Williston, N. D. (Ch. 8). Owner is Lewis W. Moore, also owner of radio KXGN and local theatre. Coming from KXGN are gen. mgr. Dan C. Palen, sales director Karl Johnson, film buyer Lewis W. Moore, chief engineer Donald J. Powers. Base hour is \$125. Rep is Grant Webb.

WMVS-TV has 10-kw RCA transmitter at Port Washington & Donges Bay Rds.; Alford 4-bay antenna is side-mounted at 700-ft. level of WITI-TV tower. Studio is at 1015 N. 6th St., where closed-circuit operations have been conducted for over 2 years by grantee Board of Vocational & Adult Education. H. E. Barg, Board business mgr., is gen. mgr.; Paul K. Taff, operations mgr.; John Lemke, program & film mgr.; James C. Wulliman, chief engineer.

WKST-TV quit air Jan 14, 1955 while awaiting FCC action on petition to move transmitter to Youngstown, O. 17-mi. away (Vol. 11:2). Permission was given early this year (Vol. 13:8), contingent on field intensity survey showing that coverage of New Castle would comply with rules. It has new RCA transmitter and 638-ft. tower at 3800 Shady Run Rd., Youngstown, emits 198-kw ERP. Studios are at Shady Run Rd. and in New Castle. S.W. Townsend, pres. & gen. mgr., and Wanda E. Townsend control WKST-TV & WKST. Robert C. Harnack, from Paul Smith Adv., is sales & production mgr.; Harry Reith, from WKST, is New Castle sales mgr. Base hour is \$350. Rep is Everett-McKinney.

XEM-TV claims 100-kw ERP, with 90% of programming in English. It has studio & transmitter in Hotel Barbara Worth, El Centro. Affiliated with Telesistema Mexicano S.A. (Emilio Azcarraga interests), it's headed by Don Carlos Blando, gen. mgr. Robert Kelly, ex-KIVA-TV, is sales mgr. Base hour is \$200. Reps are National Time Sales and Harlan G. Oakes.

Application for sale of KVTB, Sioux Falls, Ia. (Ch. 9) & radio WNAX, Yankton, S. D. by Cowles Bestg. Co. for \$3,000,000 to Peoples Bestg. Corp. (Vol. 13:41) includes Oct. 5 balance sheet for Cowles (also operator of WHTN-TV, Huntington, W. Va. & WHTN, radio KRNT and owner of 60% of KRNT-TV, Des Moines), which lists \$351,863 paid in surplus, \$194,852 operating surplus. It had \$599,739 current assets, \$195,933 in KRNT-TV common stock, \$2,066,933 fixed assets; \$450,823 current liabilities; \$107,285 long term liabilities, \$1,800,000 capital stock.

Facilities changes: KOVR, Stockton (Ch. 13) began Oct. 28 with 316-kw from new site on Butte Mt., near Jackson, Cal., after operating since Sept. 16 with interim 138-kw on Mt. Diablo. WESH-TV, Daytona Beach (Ch. 2) goes to 100-kw, having received program authorization Nov. 1. KROC-TV, Rochester, Minn. (Ch. 10) Oct. 31 went to 240-kw. KSHO-TV, Las Vegas (Ch. 13) went to 11.5-kw Oct. 26, now located at El Rancho Vegas Hotel.

Transfer of KHVH-TV, Honolulu (Ch. 13) & KHVH to Kaiser-Burns Development Corp. in deals involving \$168,750, plus assumption of \$266,000 in notes due Henry Kaiser (Vol. 13:40) was approved by FCC. Hal Lewis, who remains with stations, gets \$25,000 for his 25% of TV, \$100,000 for 50% of radio stock. Henry J. Kaiser Co. owns 50%, Fritz B. Burns 43.5%, of Kaiser-Burns Development, operator of Hawaiian Village Hotel.

TV, radio & press dominate "mind, morals & thinking" of Americans who once were influenced by ministers & educators, Rev. Paul O. Madsen of N. Y. told American Baptist urban convocation Oct. 29 in Indianapolis. Citing 3 TV & 4 radio networks and 3 press associations as main influences now, he said "church is not prepared for such broad scale mass manipulation of mind and perhaps never should be."

RCA shipped 24-gain antenna Oct. 18 to upcoming WMBD-TV, Peoria (Ch. 31), due in Jan.

Reports of Radio Station Sales: WRMA, Montgomery, Ala. by Ralph M. Allgood & Grover Wise for \$165,000 to WRMA Bestg. Co. Inc., owners of WAOK, Atlanta (broker, Blackburn) . . . WIKB, Iron River, Mich., by WIKB Inc. (Henry Frailing, pres.) for \$53,000 to Edwin Phelps and son, of Wilmette, Ill. (Kander) . . . WDIA, Memphis, Tenn. by John R. Pepper & E. R. Ferguson for \$1,000,000 to owners of WOPA, Oak Park, Ill. (Ch. 44 grantee) and KXEL, Waterloo, Ia., headed by Egmont Sonderling . . . WAND, Canton, O. by P. C. Wilson for \$150,000 to Agnes J. Reeves Greer, owner of WJER, Dover, O.; WKJR, Pittsburgh, Pa., & WAJR, Morgantown, W. Va. (Crisler) . . . WZIP, Covington, Ky. by WZIP Inc. (Arthur L. Eilerman, pres.) for \$150,000 to Leonard P. Gorian & Alfred B. Katz (Crisler) . . . WTAN, Clearwater, Fla., 75% by Mary B. & William G. Wells for \$150,000 to H. Dennison Parker, v. p. and 25% owner of station.

Radio sales approved by FCC this week: WNGO, Mayfield, Ky. by R. B. Ligon and gen. mgr. T. E. Brewer for \$120,000 to Charles W. Stratton and H. D. & Mose Bohn (Vol. 13:37) . . . WSKI, Montpelier, Vt. by Paul Perrault for \$75,000 to Elles E. Erdman & Nayte Schoonover (Vol. 13:33) . . . KYTE, Pocatello, Ida. by J. Ronald Bayton for \$60,000 to Thomas R. & Andrew H. Becker (Vol. 13:41) . . . WOOW, New Bern, N. C. by Paul Reid for \$50,000 to Leo Hoarty and associates of WBOF, Virginia Beach, Va. (Vol. 13:39) . . . WCPM, Cumberland, Ky. by Edward F. Shadburne for \$41,860 to Elmo Mills (Vol. 13:40) . . . WJOE, Ward Ridge, Fla. by Vacationland Bestg. Co. Inc. for \$40,000 to Rupert P. Werling (Vol. 13:41).

Just plain music and nothing else—this plan seems to winning a few adherents among radio stations. *N. Y. Herald Tribune's* Joe Hyams devoted Oct. 29 column to AM station described as "Radio 860," San Diego, which is programming nothing but background music, with no commercials—collecting \$1-a-month subscriptions from listeners who want to hear commercial-free music, sans calypso or rock-&-roll. Though not identified in article, station is presumed to be Tijuana's XEMO. Meanwhile, new "music-only" FM-only station WBKW (Joe L. Smith Jr.) began operation in Beckley, W. Va., announcing programming will "consist entirely of hi-fidelity music, uninterrupted except by station and sponsor identification at the quarter hour"—with music continuing in background during these announcements. Station will also play binaural tapes, cooperating with local WJLS (AM).

TV gives "new dimensions" to education, consultant Alexander J. Stoddard of Ford Foundation's Fund for the Advancement of Education said Oct. 30 in Chicago at national conference on high schools. "TV does not substitute for what was in the past," he told teachers, "but it adds new dimensions to what we already have had and can continue to hold."

CBS Foundation fellowships, worth \$8000 each for study at Columbia U, will be awarded for second year to 8 "promising persons engaged in radio & TV news & public affairs" (Vol. 13:1, 18). Applications for new grants, which start in fall of 1958, will close Dec. 16 at Foundation office, 485 Madison Ave., N. Y. Winners will be announced in Feb.

America's biggest fortunes, as listed in Nov. *Fortune*, are noteworthy for scarcity of those with TV connections. Of total of 76 named, having fortunes from \$75,000,000 to \$1 billion, only 6 have known connection to TV industry: oilmen H. L. Hunt & Sid Richardson, Amory Houghton & Arthur A. Houghton Jr. (Corning Glass), financier John Hay Whitney, Henry J. Kaiser.

Return to Radio: CBS Radio took page ads in Oct. 30 *N. Y. Times* and *Wall St. Journal* to proclaim that 14 of 15 "biggest network radio advertisers in the peak radio year 1948" are back this year—and all have used CBS Radio. "Even more important," ad boasts, "large corporations (Ford, Home Insurance, Longines-Wittnauer, GM) which were not big network radio users 10 years ago are now important advertisers" on network. Returnees listed: Procter & Gamble, Sterling Drug, General Mills, General Foods, Gillette, Miles Labs, Lever Bros., Liggett & Myers, American Home Products, Colgate-Palmolive, R. J. Reynolds, Philip Morris, Swift, GE. Radio also was promoted in Oct. 31 *N. Y. Herald Tribune* by rep Henry I. Christal with page telling "How to Wrap Up a Region"—using WBEN, Buffalo; WHAM, Rochester; WGY, Schenectady; WSyr, Syracuse.

"Radio will be a major tool of the free nations of the world in offsetting the iron & intellectual curtains which the Communist nations are attempting to put around the masses of people that they have doomed to slavery." So said Westinghouse Broadcasting pres. Donald H. McGannon this week in address to Chicago Kiwanis Club describing his recent tour of Radio Free Europe installations. "Honest news is a scarce commodity behind the Iron Curtain," he said—and RFE has exploited this fact by "beating the Communists' time and again on their own stories."

Network ban on "darkies" and other racial terms in folk songs used as official state songs was ended this week by CBS & NBC following demands by southern Democrats for investigation of such "censorship" (Vol. 13:31). But restoration of original language to state-adopted songs only didn't satisfy Chairman Harris (D-Ark.) of House Commerce Committee, who said Nov. 1 committee "undoubtedly" will explore issue, which he described as "serious one." Fla. uses "Swanee River," Ky. "My Old Kentucky Home" as official songs.

Little Rock crisis provided "electrifying example of TV's unique ability to give the nation an unobstructed, on-the-scenes view of the crucial events of our time," CBS-TV station relations v.p. Wm. B. Lodge told Baltimore Ad Club luncheon observing 10th anniversary of WMAR-TV. System of free TV breeds unity in times of crisis and strengthens U. S. democracy, he said.

Radio & TV Executives Society opens 4th annual time buying & selling seminar Nov. 12 at luncheon in Biltmore Hotel, N. Y., with pres. Lewis H. Avery of Avery-Knodel speaking on "History of Spot Radio & TV." Series of 16 Tues. sessions there runs until March 11.

FM Progress in Europe: There are now more than 500 FM stations on air in Western Europe, according to tabulation by European Broadcasting Union's Technical Centre in Brussels. List shows Italy leading with 199, West Germany with 157, United Kingdom 37, Finland 28, Switzerland & Austria 16 each, Denmark 10, Netherlands 8, France & Yugoslavia 7 each, Sweden 6, Morocco & Norway 4 each, Vatican City 2, Luxembourg & Spain 1 each. Tabulation of stations as of April 1957 by location and by frequency, with essential technical information is available from EBU Technical Center, 4 Rue de la Vallee, Brussels for 25 Belgian francs (about \$5). Title: *List of Sound Broadcasting Stations (VHF Band)*. Also available from Technical Center is similar listing of European TV stations, covering principal outlets (but not repeaters and satellites) as of April 1957. Titled *List of Television Stations (VHF Band)*, it may be purchased from same address for 25 Belgian francs.

OCT. SALES & PRODUCTION DOWN 20% FROM LAST YEAR: TV production, factory and distributor sales are about 20% under totals for Oct. 1956, but manufacturers are watching retail sales and inventories, keeping good balance at a lower level.

Production in Oct. was 656,000 compared with 821,000 a year ago; factory sales of 662,000 compared with 861,000, distributor sales were 646,000 vs. 860,000. End of Oct. factory and distributor inventories totaled 1,650,000, a reduction of about 50,000 below those of same period in 1956.

Trade sources feel heavy production cutback in Oct. corresponds to similar reduction in Nov. 1956 when production dropped from Oct.'s 821,000 to 680,000.

Meanwhile, final retail sales figures for Sept. have been set at 705,000, excluding about 18,000 exports, only about 2000 less than we reported in preliminary estimate (Vol. 13:42). Retail sales in Sept. 1956 were 763,908.

TV with Transistors: Transistors have finally come to TV -- via hi-fi. RCA, going along with trend toward revival of TV-phono combinations, this week announced new TV-phono, 2 black-&-white consoles and one color set -- all using the transistorized sound system which RCA developed for its hi-fi sets.

The 4 new sets all have 21-in. picture tubes. Combination has 5 speakers, lists at \$550. Others have 3 speakers -- and jack for phonos, tuners or stereo tape players, etc. Color set lists at \$895, black-&-white consoles at \$495.

RCA's pitch on these sets will be quality of sound. RCA Victor TV div. v.p. C.P. Baxter said introduction of sets follows "survey that reveals a considerable market for complete home entertainment instruments that include both TV and high fidelity." He sounded keynote in RCA campaign when he said new sets provide "the most realistic TV sound ever produced."

RCA also added to its line new 21-in. table model at \$180-\$190, console at \$380. All new sets are due for shipment in "near future."

Raytheon Tube & Transistor Surge: Not one of the tube-making giants, but a steady producer over the years, Raytheon's picture tube plant at Newton, Mass. is operating 24 hours daily; "limited" 3-shift schedule is in effect at the Newton semiconductor plant and at one of 2 receiving tube plants at Newton & Quincy.

Transistor production is "considerably ahead" of last year, N.B. Krim, v.p. and gen. mgr. of receiving and CR tube operations, told us. He listed Raytheon's total transistor production since 1954 at about 7,750,000 through Oct. or more than 20% of U.S. industry total.

Total value of Raytheon tube and semiconductor production is "well over one-third billion dollars," or about 10% of U.S. total since 1922, Krim said. By units this amounts to about 400,000,000 receiving tubes, 2,500,000 picture tubes, 24,000,000 transistors and diodes.

Oct. was "particularly good month" for picture tube sales, reports Krim, although year-to-date total is not quite up to last year, following sale of Raytheon TV-radio div. to Admiral (Vol. 12:22). Bulk of Raytheon picture tube sales are to manufacturers of new sets, some "5 or 6 major accounts," which Krim declined to name -- but which we understand includes Philco and Westinghouse. He said receiving tube production is slightly ahead of last year.

Tube prices "can only go one way -- up," said Krim, describing business this way: Very few picture tube companies are able to show a decent return on investment.

Pointing up diversification, Raytheon -- which did considerable radar work in World War II -- took wraps off new Hawk air defense missile which it is making for

Army. Shown at Assn. of U.S. Army meeting in Washington Oct. 29, Hawk ignores stationary objects, makes use of supersonic speed to attack moving aerial targets even at tree-top height. Spokesman said Hawk uses advanced radar system, can be transported by plane and used with fast-moving assault troops.

Production: TV output was 169,806 week ended Oct. 25, compared with 153,846 preceding week and 200,148 in corresponding week one year ago. It was year's 43rd week and brought TV production for year to date to about 5,245,000, compared with 6,080,052 in same period of 1956. Radio production was 401,178 (125,813 auto) week ended Oct. 25 vs. 411,273 (150,638) preceding week and 346,349 (144,547) in corresponding week year ago. Radio output for 43 weeks totaled about 11,953,000 (4,380,000) vs. 10,884,760 (3,607,911) in 1956 period.

Trade Personals: Robert W. Redecker promoted to mgr., sales and merchandising, RCA Service Co. consumer products service . . . Samuel N. Regenstrief resigns as v.p.-manufacturing, Philco appliance div. . . Tom E. Mumford promoted to Hoffman radio div. sales mgr. for radio-hi-fi . . . Richard D. Evans promoted to govt. sales mgr., Sylvania special tube operations, Woburn . . . Norval H. Green promoted to mgr., RCA semiconductor div. general quality control . . . Robert A. Jewett promoted to product sales mgr., chemicals, phosphors and semiconductors, Sylvania chemical & metallurgical div. . . Walter H. Powell, International Resistance Co. director of industrial relations, elected a v.p.; J. Burton Henry promoted to sales mgr., new products div., continues as administrator of IRC sales divs. . . Kendrick R. Wilson Jr. elected Avco pres. succeeding Raymond A. Rich who resigned post but will continue as consultant; F. C. Reith, ex-Ford v.p. and mgr. of Mercury div., elected Avco v.p. and pres. of Crosley div. . . C. M. Mooney, ex-IBM, joins IT&T as U. S. govt. relations director . . . Nat Welch, Orradio sales v.p., appointed to Ala. Educational TV Commission . . . Wm. M. Stafford Jr., ex-Electra Distributing Co., named SE sales rep., Westinghouse electronics tube div. . . Sam P. Karr named editor of *NEDA Journal*.

James J. Cassidy, ex-editor of *Electrical Dealer*, recently merged into *Mart*, has joined trade news staff of *Television Digest*.

"Phenomenal results" are reported by Motorola consumer products marketing v.p. S. R. Herkes from current \$1,000,000 TV advertising program. He said this is "first time we have taken national advertising down to local level to this extent." Series consists of 12 full-page newspaper ads in over 100 key markets—with 5 ads already having run—as supplement to national magazine ads. Series has evoked many queries from non-Motorola dealers, he said, and added that he had reports of consumer ordering sets on strength of ads. Herkes described the ads as "hard-hitting," making use of such gimmicks as Motorola's Tube Sentry.

Attention set manufacturers: An American serviceman's gripes about difficulties of repairing printed-circuit sets are entertainingly aired in article appearing in Nov. issue of—of all things—*Wireless World* of London. Author of highly amusing and provocative piece is Jack Darr, Ouachita Radio-TV Service, Mena, Ark.

Sequel to service problem story in Oct. 14 *Time* (Vol. 13:41) came in Nov. 4 issue which carried 10 letters to Editor—none overly critical—commenting on story. Included was one from Sol Polk, Chicago, wishing story had reported "obvious need for adequate, authorized, qualified schooling in our high schools to train service people."

DISTRIBUTOR NOTES: Hotpoint Appliance Sales Co. names Max Culpepper dealer-sales mgr. for New York district . . . Associated Merchandising Corp. promotes James Garrigan to merchandising representative for TV, radios, tape recorders, phonographs, etc. . . Sylvania appoints Whitehead Radio Co., 118 E. Long St., Columbus, O. for tube and semiconductor products . . . Elliott-Lewis Corp. (Motorola), Philadelphia, moves to former headquarters of Motorola-Philadelphia Co., 120 S. 30th St. . . Polk Bros., Chicago, elects Milton E. Hellman, ex-Merchants Acceptance Co. exec. v.p., as financial v.p.

EIA renames Julius Haber, RCA, chairman of public relations & adv. committee. Other members: Edward W. Allen Jr., DuMont; Robert Burros, Olympic; Karl H. Carstens, Magnavox; Allen Center, Motorola; J. D. Hevron, J. W. Davis Co.; Bert Housman, Automatic Radio Mfg. Co. Inc.; Norman Huey, GE; C. Erik Isgrig, Zenith; James Jewell, Arvin; R. W. Johnson, Westinghouse; Robert M. Jones, Philco; C. R. Lunney, Sylvania; Harold J. McCormick, Motorola; Joseph R. Owens, GE; W. W. Price, Bendix Radio div.; Wm. T. Reedy, Packard-Bell; D. A. Sandberg, Delco; Arthur Schwartz, Columbia Records, CBS; Wm. F. Sharkey, Industrial Develop. Engineering Assoc.; D. B. Van Winkle, Hoffman.

Kudos for TV-radio dealers and servicemen is aim of Westinghouse electronic tube div. booklet, *This is the Story of a TV Set*. Adv. mgr. J. C. Lane said "consumers are not aware of the 'buy' they get in modern servicing because they fail to understand basic costs that go into servicing. Our program is designed to bring this story to the consumer." Booklet is given dealers in a "Build Consumer Confidence" kit which also includes window display and streamers.

Improved and expanded federal business statistics have been recommended to Congress by the National Accounts Review Committee of the National Bureau of Economic Research. Group called for increased Commerce Dept. staff, surveys of consumer spending and saving every 5 years. Also recommended was immediate action on suggestion of Federal Reserve Board consultant committee for improvements in consumer finance surveys of U of Mich. Survey Research Center.

German TV market presents good opportunity for American manufacturers, reports Blaupunkt v.p.-gen. mgr. Werner Meyer, saying Germany "would require approximately 50,000 units a year for next few years." However, he said sets would have to meet German standards and be backed up with strong service setup. Meyer also said he expects hi-fi boom here to continue with rate of German set imports remaining at about 200,000 annually.

Kansas City Electric Assn. reports sale of 211 color sets in Sept., bringing total to date to 2369.

New Display Devices: Two new electroluminescent panels capable of storing images for long periods were described by RCA scientists this week at third annual meeting of IRE Professional Group on Electron Devices. The experimental devices, with potential applications in radar and other electronic display systems: (1) A new form of light amplifier, which, after 1/100-sec. exposure to dim image, stores and displays the image in bright form for several minutes or longer. This has been made in 3-in. square panel, is based on newly discovered properties of cadmium selenide. (2) A high-definition picture storage panel comprising arrangements of photoconductive and electroluminescent materials in tiny cells on a specially fabricated glass plate. One design contains 1275 cells per sq. in., another about 1600.

Fast-growing Litton Industries has plans for 2 new mergers into new fields, chairman-pres. Charles B. Thornton disclosed at annual meeting. Litton recently announced mergers with Maryland Electronics Mfg. Corp., Aircraft Radio Corp. and Monroe Calculating Machine Co. (Vol. 13:38; 41-42). Thornton told stockholders that a special meeting would be called in next 2 weeks to study Monroe merger, that nearly 90% of Monroe stockholders have agreed to the move. He said all mergers would be on basis of exchange of Litton stock.

Business pickup in second half of 1958, sparked by demand for household appliances, is view expressed by Commerce Dept.'s Business Advisory Council at last week's meeting in Hot Springs, Va. Sears, Roebuck chairman T. V. Houser told economic outlook session that "BAC sees over-all business activity continuing at a high-level plateau but gradually dropping from the present record-breaking high slowly until some time in 1958. It sees no basis for any long continued decline in the American dynamic economy."

Engineer salaries are still increasing, reports American Management Assn., but average boost of 5.9% in year ended June 30, 1957, is down from preceding year's 8.6% average. Assn. says pattern of decreasing salary hikes for engineers and technicians closely follows rate of middle and top management. Survey shows median annual engineer salaries were \$5400 for "entering category" to \$13,100 for highest non-management group. In Canada, median salaries range \$4700-\$10,400 for similar levels.

All-industry semiconductor sales will total \$200,000,000 in 1958, Hughes Aircraft Co. semiconductor mgr. Joseph S. O'Flaherty predicted this week. He said 1957 sales will total \$125,000,000, up from last year's \$70,000,000. Hughes' semiconductor sales, he added, are expected to total more than \$20,000,000 this year and \$35,000,000 next year.

Continued faith in fair trade laws was voiced this week by Willard H. Sahloff, v.p.-gen. mgr., GE housewares & radio receiver div., in talk to Housewares Club of N.Y. He admitted "recent legal developments have not been favorable to fair trade" but reaffirmed "our belief in the continued vitality of fair trade as a marketing philosophy."

Battery-powered radios with built-in radiation detectors were proposed by AEC Comr. Dr. Willard F. Libby in talk this week to Assn. of U. S. Army in Washington. His plan calls for "manufacture and sale of perhaps tens of millions" of such sets as part of national defense plan against radioactive fallout from enemy attack.

Hotpoint reports 1958 TV line exceeding sales estimates, describing sales as "now rising sharply, well ahead of the normal year-end holiday season." Five new 21-in. sets are being introduced, leader table model priced at \$190.

Financial Notes: Motorola reports record 9-month sales of \$166,023,034, earnings of \$5,350,422 (\$2.76 per share) and pres. Robert W. Galvin "envisions a satisfactory fourth quarter . . . and total earnings for the year will be greater than last year." Comparable figures for first 9 months of 1956 were sales of \$162,689,182, earnings of \$4,817,964 (\$2.49).

Third quarter earnings were \$1,940,644 (\$1)—second highest for any third quarter—on sales of \$60,356,275 vs. \$1,751,757 (91¢) on sales of \$60,887,948 in comparable 1956 period.

Galvin wrote shareholders that enhanced earning situation was due to improved price-to-cost TV relationship, increased hi-fi sales, favorable contract car radio business—"all 5 of our divisions having contributed to this result."

Terming the economic situation "fluid," he said Motorola is "alert to this condition" and has "good control of our inventories, receivables and general operations." However, Galvin stated that "we do not envision anything other than a moderate readjustment in the economy as a whole . . ."

* * * *

Zenith earned \$4,885,301 (\$9.92 per share) on sales of \$111,134,284 in first 9 months of 1957, compared with \$3,890,765 (\$7.90) on \$100,568,265 sales for corresponding months of 1956. Net profits for quarter ended Sept. 30 were \$2,487,164 (\$5.05) on sales of \$44,648,062 vs. \$1,359,941 (\$2.76) on sales of \$35,197,330 in similar 1956 period. Pres. E. F. McDonald Jr. said profit figures do not include proceeds from settlement of litigation with RCA, et al (Vol. 13:37-38) since exact amount is still being determined. He said Zenith unit sales of TV receivers in third quarter were up 22% from last year while industry sales were down 9.1%. For 9 months, he said, Zenith TV sales were up 11% while industry was down 14%. McDonald noted third quarter jump of 50% in dollar volume of radio-hi-fi-phonographs compared with 1956 third quarter, strong demand for 7-transistor portable radio—with company unable to keep up with orders despite increased production.

Magnavox reports net profit of \$920,150 (95¢ per share) on sales of \$19,222,205 in quarter ended Sept. 30, 1957, compared with \$790,333 (81¢) on sales of \$17,037,158 in comparable 1956 period. Pres. Frank Freimann told annual meeting that despite decline in TV orders, increased hi-fi and electronics business would keep volume high in current quarter. Introduction of products such as transistorized radio, new concept in portable TV, hi-fi radio-phonographs and TV models now going into production will help current and subsequent quarter sales, he said.

Dividends: Magnavox, 37½¢ payable Dec. 14 to stockholders of record Nov. 25; Westinghouse, 50¢ Dec. 2 to holders Nov. 8; Official Films, 5¢ Dec. 2 to holders Nov. 15; Erie Resistor, 10¢ plus 1% stock Dec. 15 to holders Nov. 29; Consolidated Electrodynamics, 10¢ Dec. 13 to holders Nov. 27; IBM, 60¢ Dec. 10 to holders Nov. 13 plus 2½% stock Jan. 28 to holders Jan. 6; International Resistance, 5¢ Dec. 2 to holders Nov. 15; Lear, dividend omitted; Loew's, dividend omitted.

Electronic Assoc. earned \$830,800 (\$1.43 per share) in first 9 months of year, compared with \$750,549 (\$1.37) in corresponding 1956 period. Third quarter net income was \$437,416 (75¢) vs. \$168,859 (31¢) last year.

DuMont Labs reports profit of \$20,000 on third quarter sales of \$10,302,000, compared with a net loss of \$439,000 on sales of \$12,019,000 in similar 1956 period. However, for 9 months ended Sept. 30, 1957, DuMont lost \$978,000 on sales of \$30,151,000 vs. loss of \$923,500, after a \$1,209,500 tax carryback credit, on sales of \$34,490,000 in comparable 1956 period. Pres. David T. Schultz said improved TV receiver business was "an important factor" in third quarter profit. Allen B. DuMont Jr., TV receiver div. mgr., reported "receiver operation has made a profit during each month" since June introduction of new line. "Despite some present sales slowdown in the industry," he said, "DuMont television and high fidelity business remains at anticipated levels."

Westinghouse earned \$49,102,000 (\$2.83 per share) on record sales of \$1.477 billion in first 9 months of 1957, compared with a loss of \$1,399,000 on sales of \$1.015 billion during strike-affected first 9 months of 1956. Third quarter net profit was \$18,487,000 (\$1.07) on record sales of \$494,394,000 vs. \$10,314,000 (59¢) on sales of \$409,717,000 in corresponding 1956 period. Chairman-pres. Gwilym A. Price expects continued high volume of shipments in fourth quarter, saying unfilled orders remain at high levels despite record sales. New line of consumer products was well accepted, he said, and reported Sept. sales to distributors & dealers "considerably ahead of 1956."

Clevite Corp. reports that its diversified electronics & automotive parts business earned \$3,553,000 (\$1.87 per share) on record sales of \$57,071,000 in first 3 quarters of 1957 vs. \$2,630,000 (\$1.35) on \$53,790,000 year earlier. Third quarter net profit equivalent to 39¢ per share, compared with 56¢ in same 1956 period, was short of expectations, however, chairman James L. Myers & pres. Wm. G. Laffer ascribing decline to reduction in defense shipments. Partly offsetting reduction were gains by Clevite transistor & diode manufacturing units in Waltham, Mass. and Dusseldorf, Germany. "We expect these operations to continue to show increasing sales & profits," they said.

Webcor Inc., formerly Webster-Chicago, specializing in hi-fi but reporting govt. and lamination divisions also operating profitably, increased sales 29% in first 9 months of 1957 to \$28,548,591 and net profits to \$1,107,545 (\$1.70 per share). Result, says pres. N. Malz, is that it will resume cash dividend payments "late this year," especially since "sales and income outlook for the 4th quarter appears exceptionally favorable." In same 1956 period, sales were \$22,073,680, net loss \$216,505 (35¢ per share). Sales in Sept. quarter were \$12,910,115 and net income \$603,502 (93¢) vs. \$9,577,472 & \$18,470 (3¢) in 1956 quarter.

Raytheon earned \$3,258,000 (\$1.15 per share) on sales of \$172,948,000 in 9 months ended Sept. 30, 1957, plus net gain of \$2,671,000 (94¢) from stock sales and loans to Datamatic Corp., for total earnings of \$5,930,000 (\$2.09). Third quarter earnings were \$962,000 (34¢) on sales of \$60,999,000. No comparative figures are available since Raytheon changed from fiscal to calendar year Jan. 1. Pres. Charles F. Adams listed govt. business backlog of \$250,000,000, substantially devoted to guided missiles.

Record sales of \$85,000,000, earnings of better than \$3 per share for current fiscal year, were seen by Daystrom pres. Thomas Roy Jones in talk this week to N. Y. Society of Security Analysts. This compared with sales of \$75,069,000, earnings of \$2.77 per share, in year ended March 31, 1957. Jones said Daystrom's business is divided into 68% commercial, 32% government, with backlog—mostly industrial—at \$35,000,000 vs. \$26,000,000 a year ago. He declared that research & development expenditures had been expanded from last year's 4% to 6.5% of sales.

Grim Warning: "Possibly five years," warns RCA chairman David Sarnoff, is all the time we have "to head off catastrophe for the human race . . . The Free World under American leadership must concentrate . . . on the supreme task of weakening World Communism—from within and from outside—to the point where it ceases to be a peril." Gen. Sarnoff told third annual meeting of Assn. of U. S. Army Oct. 29 in Washington that perfection of an intercontinental missile is "now inevitable . . . It is only a matter of time before both sides have an operational missile . . ." He went on to say "because electronics is at the heart of this weapon, I have been close enough to its development to believe that this climax will be reached within 5 years, and possibly sooner," achieving a stalemate which he termed "Dreadful Parity." He called for countermeasures such as "an adequate Cold War offensive—not a mere holding action . . .;" formation of a "NATO for Political Defense;" maintenance of balanced military forces and resolving "whatever inter-service conflicts there may be in the field of ballistic missiles and related weapons, and speed up their development into operational forms."

American Bosch Arma earned \$4,286,617 (\$2.26 per share) on sales of \$101,089,137 in first 9 months of 1957 compared with \$3,385,438 (\$1.77) on \$86,729,566 year earlier. Backlog of military business in electromechanical & electronic systems and fuel injection & automotive electrical equipment stood at \$180,000,000 Sept. 30. But Arma operations have been affected by military budget alignments, necessitating 10% cut in employment, and general business slowdown is expected to reduce American Bosch sales slightly in present quarter, according to pres. Charles W. Perelle.

Collins Radio Co. earned \$2,699,179 (\$1.63 per share) on sales of \$123,912,221 in year ended July 31, 1957, compared with \$3,195,930 (\$1.96) on sales of \$125,141,055 in comparable period year ago. Order backlog of \$115,000,000, 25% higher than a year ago, was reported as of July 31. Report said drop in earnings was due to cost of research & development on commercial items.

Texas Instruments, big transistor manufacturer, reports net profit of \$953,000 (29¢ per share) on sales of \$17,284,000 in 3 months ended Sept. 30 vs. \$476,000 (14¢) on \$10,563,000 in same 1956 period. For 9 months of 1957 earnings were \$2,572,000 (78¢) on \$48,114,000 compared with \$1,506,000 (45¢) on \$29,853,000 year earlier.

E. J. Korvette Inc. sought SEC approval this week (File 2-13715) to register 70,000 shares of \$1 par common stock which it holds in its treasury for an employe stock participation plan. Korvette said plan was set up by agreement with Retail Clerks Union.

General Tire growth is detailed in Nov. *Fortune* article by Spencer Klaw. Story says its RKO Teleradio subsidiary will gross about \$55,000,000 this year, net \$3,000,000—a return of 27% on General's \$11,000,000 investment (including a \$7,000,000 loan) in the business.

Ling Electronics Inc. earned \$308,485 (35¢ per share) on sales of \$3,970,000 for year ended July 31, 1957, compared with loss of \$66,505 on sales of \$191,879 in 9 months ended July 31, 1956 (full year figures not available).

Jefferson Electric Co. purchase of Electronics Products Corp., Santa Barbara, Cal., for approximately \$650,000 has been approved by boards of both companies, report officials.

Meredith Publishing Co. earned \$1,068,046 (83¢ per share) in quarter ended Sept. 30, 1957, compared with \$1,145,082 (89¢) in similar 1956 period.

Reds Bid for TV Swap: High-level diplomatic conversations between U. S. & Soviet Union on on-again off-again proposals for TV-radio and other exchanges (Vol. 13:31) finally opened in Washington this week. Indications were that there'd be plenty of talk, running for long time, before any agreement is reached—if then.

Preliminary jockeying for advantage by U. S. Ambassador Wm. S. B. Lacey, who spoke for Secy. of State Dulles, and Russian Ambassador Georgi N. Zaroubin, who led Red delegation, centered around (1) U. S. suggestion for uncensored TV-radio programs as starter toward better relations between 2 countries, and (2) USSR suggestion for virtually unlimited trades—but without mention of Russian censorship or other restrictions.

Reminding Zaroubin that Dulles had proposed freer exchange of information at 1955 Geneva conference, Lacey pointed out that "obstacles in the information field have not been removed in the USSR," that broadcasts from other countries are still jammed and news dispatches censored.

"It is in connection with these obstacles to free exchange of information and ideas that my Govt. has taken the initiative to repeat the proposal it made 2 years ago to engage in a periodic exchange of radio & TV broadcasts of commentaries on world events," Lacey said.

Ignoring Lacey's references to Soviet "obstacles," skipping subject of "commentaries," Zaroubin said:

"Soviet proposals also provide for an exchange of radio & TV broadcasts on science, techniques, sports, industry, agriculture, education & health. We propose also that a regular exchange of radio & TV programs of classic, folk & contemporary music be organized. We have in mind the organization of reciprocal trips of radio, TV & press representatives."

This diplomatic exchange failed to bring either party close to acceptable agenda for negotiations.

Meanwhile in Moscow censorship issue was sharpened—possibly to provide fresh bargaining point for Washington discussions—by sudden ban on all shipments of movie or TV film abroad, although for more than 2 years foreign correspondents have been able to send it out freely.

At diplomatic reception Oct. 29, correspondents protested ban to Communist boss Nikita S. Khrushchev, whose interview on CBS-TV's *Face the Nation* in June (Vol. 13:23) revived talk of reciprocal TV-radio trade. He brushed them away, saying he hadn't even heard of order.

Foreign Ministry spokesman said, however: "There are no regulations in the Soviet Union permitting customs to pass film for shipment abroad." He thought somebody must have made mistake in passing previous shipments.

TV set licenses in Britain undoubtedly now outnumber radio-only licenses—because at end of Aug., licensed TV receivers totaled 7,331,207 (increase of 61,459 during month), radio-only licenses totaled 7,354,024, of which 322,085 were for auto receivers.

Blow to Free Access: Continuation of Canon 35 ban on TV, radio and press photography coverage of court trials was recommended Nov. 1 by American Bar Assn. committee, reporting in Chicago on findings of 18-month study of organization's Code of Ethics. Scheduled to be acted on by ABA's House of Delegates in Atlanta, Ga., next Feb. 24-25, report concluded that cameras and broadcasting apparatus "inevitably create visual & psychological distractions which have no justification in a court of law." It did urge that Canon 35's language be modified so that rule wouldn't apply to ceremonial occasions such as naturalization proceedings. Report was promptly denounced by NARTB pres. Harold E. Fellows, who deplored ABA committee's "unwillingness to recognize 20th Century methods of communications," expressed broadcasters' "regret" that committee "has seen fit to perpetuate ABA's position against broadcast & photographic coverage of court trials which prevents public proceedings from being truly public." Fellows asked ABA to give NARTB "fair opportunity to state its case" against Canon 35 before acting on report. NARTB's protest was seconded by pres. Ted Koop of Radio-TV News Directors Assn. and chairman Julian Goodman of its freedom-of-information committee. They said "ABA still seeks to inhibit the right of the American people to full information about their courts."

TV courtroom coverage in Conn. as "experiment"—despite American Bar Assn.'s Canon 35 against it—was proposed by Superior Court Judge Thomas E. Troland at annual meeting of Conn. Bar Assn. in Hartford. Most lawyers participating in panel on Canon 35 at meeting opposed relaxation of ban, but Troland said it should be tried, along with radio microphones & still cameras, because: "The time is coming inevitably when this rule will be relaxed . . . I don't mean with noise, Klieg lights, wires and popping up and down. But if the methods are unobtrusive we ought to try it. We ought to have a pilot project in one court and experiment with it for a time."

Canon 35 isn't needed to control TV, radio & photographic coverage of courts, directors of Tex. State Bar assert in report adopting recommendations by special committee against observance of American Bar Assn.'s ban on cameras & microphones. Report presented by Chief Justice Spurgeon E. Bell of Court of Civil Appeals, Houston, holds that trial judges themselves should continue to decide whether such coverage is proper.

Two applications for TV stations and 7 for translators were filed with FCC this week, bringing total to 118 (34 uhf) for stations, 37 for translators. Station applications: for Portland, Ore., Ch. 2 by *Tacoma News-Tribune*, owners of KTNT-TV (Ch. 11), Tacoma; for Lubbock, Tex., Ch. 5, by partners David P. Pinkston & Leroy Elmore. Translator applications were for Indio, Cal., Eureka, Nev., Gallup, N. M., Olean, N. Y. and 3 for Redwood Falls, Minn. (For details, see *TV Addenda 25-N* herewith.)

Conversation down to the old firehouse must be dull. Eureka, Nev. (pop. 470) Volunteer Fire Dept. this week applied for Ch. 76 translator to repeat programs of KSL-TV, Salt Lake City.

SUMMARY-INDEX OF THE WEEK'S NEWS — November 9, 1957

"HIDDEN SELL" — subliminal commercialism — stirs up storm as 20 congressmen protest; FCC investigates. Can it be used on TV? (p. 1).

NO MORE KINES on NBC-TV after April, pres. Sarnoff announces, revealing plans for monochrome & color "Tape Centrals" on both coasts (p. 2).

ROYALTY-FREE CROSS-LICENSING deal for use of RCA patents on radio & monochrome TV equipment and tubes, offered to manufacturers (p. 3).

FM BAND IN DANGER? Rep. Roosevelt says his Small Business Committee will act as "watchdog" to prevent encroachment by "vested interests" (p. 5).

ABC STRENGTHENS DRIVE against toll TV which "will kill network TV as we know it." Sen. Langer's Bartlesville poll: 1930 against, 163 for (p. 7).

MATURITY OF TV-RADIO as news media again proved by coverage of new Sputnik. Eisenhower's new science czar is veteran of allocations study (p. 8).

NO PRICE BOOST seen for TV sets by major manufacturers with exception of Motorola. Average factory price of sets rises to \$131 in Sept. (p. 10).

1958 TV SALES about equal to 1957, but at lower dollar volume, predicted by Philco's Skinner. Official 9-month TV output put at 4,589,164 (p. 10).

JAPANESE FM TUNERS due here soon, backed by U.S. technical know how. Japan's transistor output seen hitting 5,000,000 monthly by 1959 (p. 12).

DISCLOSURE OF FINANCES of protestant proposed in Austin, Minn. case; to be considered by FCC as method of discouraging protest filings (p. 8).

NEW UHF OUTLET begins programming in La Salle, Ill., bringing TV stations to 517. Canadian satellite starts. Reports on upcoming stations (p. 9).

NETWORK TV BILLINGS mount again in Sept. with 4.6% gain over year earlier for \$40,810,081 total; 9-month billings reach \$369,076,607 (p. 14).

FCC TO REPORT ON 'INVISIBLE' TV ADS: Report of FCC's "task force" investigation of advertising industry's own sputnik—the injection of commercial messages directly into the subconscious, bypassing the conscious mind—is due to be made public within next 2 weeks.

Whole issue may be academic, according to some well qualified TV engineers, who doubt whether subliminal impression technique is practical—or even possible—on TV. There are others, however, who believe such a system can be made to work—although we could find no indication technique had been tested on TV except by its own promoters, Subliminal Projection Co., 5 E. 57th St., N.Y.

Subliminal perception technique, already tested in movie houses (Vol. 13:37), consists of superimposing brief commercial message or trade name in such a manner that it makes impression on mind of viewer without his consciously knowing that he has seen it. It has aroused storm of complaints—particularly in Congress, and FCC's investigation resulted from receipt of about 20 letters from legislators.

In application of subliminal technique to movies, special projector is used to flash instantaneous word or trade-name on screen—demonstrations have employed 1/3000-of-a-second pulse—which viewer doesn't even know he's seen. But his subconscious mind knows.

But how do you flash a 1/3000-second impulse on a TV screen—considering that it takes electron beam 100 times as long to paint one single frame of a TV picture? This stumps some TV engineers, both in industry and FCC.

But Subliminal Projection Inc. claims to have the answer. Exec. v.p. Richard E. Forrest explained to us this week that subliminal perception is dependent on elements other than speed—one of them

being intensity of image. He said that as length of viewing period is increased, if intensity of the image (brightness) is decreased, commercial message can be kept below threshold of conscious perception.

His company's TV technique, he said, uses image of extremely low brightness, which can be superimposed on regular TV image for extremely long periods of time without being noticed consciously—but which gets its message through to the mind nonetheless. With low contrast and brightness, he said, superimposed image can be retained for minutes—doing its work unnoticed.

He said system had been used successfully on closed-circuit TV but added that his company is not currently demonstrating it because it owns no closed-circuit gear. We could find no network officials who would say they had seen it, but all 3 networks are known to be cautiously interested—even if only because their policy is to overlook no new technological developments.

So far as we could ascertain, system has never been tried on the air in this country and there are no present plans to try it—to which both Forrest and the 3 networks agreed. There have been unverified reports that BBC tested system using—of all things—dirty words superimposed on drama show, to stir audience reaction. Along Madison Ave. there is tendency to dismiss this report as adman's dream.

■ ■ ■

Whether it's practical for TV or not, FCC is deadly in earnest in its investigation. Chairman Doerfer, in preliminary report to interested congressmen, stirred up some headlines this week when he said "there is some indication in the trade press that this new technique may have been used on TV." He didn't say whether he was referring to reports of British TV tests.

Conducting FCC's flash inquiry is task group drawn from Broadcast Bureau and offices of general counsel & chief engineer. Purpose of investigation is to determine whether "hidden sell" should be barred from TV, and if so, whether FCC has power to control it or requires new legislation.

While Communications Act provides that FCC can't censor programs, some staffers point out that possible approach to banning any subliminal commercials might be contained in Sec. 317, which provides that sponsors of each program must be identified. Also, they point out, Commission is obligated to check stations' performance in public interest, including any use of deceptive advertising.

Rep. Dawson (R-Utah), one of protesting congressmen, this week urged FCC to ask stations voluntarily to withhold use of technique until investigation is completed. This isn't necessary at this stage of game. Until more is known about technique—not only whether it's possible, but about its moral and ethical implications—industry people we queried echoed the network executive who told us: "I wouldn't touch it with a 10-ft. pole."

Note: In addition to Subliminal Projection Co., another company—Experimental Films Inc., New Orleans—claims to have developed the process and to have had patent applications pending for a year.

TAPE REPLACES KINES ON NBC NEXT SPRING: NBC is first network to announce outright abandonment of kinescope film recordings in favor of magnetic tape.

Just 2 weeks after RCA's impressive demonstration of first practical color TV tape recording (Vol. 13:43), NBC pres. Robert Sarnoff disclosed that network will have 6 RCA prototype color recorders plus 5 Ampex black-&-white machines installed in \$1,500,000 "Tape Central" in its Hollywood studios by start of Daylight Time next April. Sarnoff said "similar Eastern Tape Central" will be built in Radio City.

With this one fell swoop, network will discontinue both monochrome and lenticular film color kinescoping of programs and take large step toward "clock-time" programming for different time zones.

From New York and Hollywood, Sarnoff said, NBC-TV plans to eliminate completely Daylight Time schedule changes in all Standard Time zones and to "meet the west coast problem by a tape repeat of the whole schedule throughout the year."

All 3 networks have been making increasingly heavier use of tape for time-zone problems, and particularly west coast repeats. CBS-TV, with largest number of Ampex recorders, has been making greatest use of tape.

One fly-in-the-ointment—though Sarnoff didn't seem to consider it an obstacle—may be difficulty of obtaining the extra AT&T circuits required for such a repeat schedule during Daylight Time period. He stated that NBC plans to lease "an additional 2000 mi. of lines" for 6 months beginning in April, at cost of about \$750,000. It's known that the other networks also are planning Standard Time tape repeats for their summer programming—and AT&T is going to be faced with a monumental new-facilities task if it hopes to meet all of these requests for extra circuits.

It's known that at least one network—probably all of them—put in requests with AT&T for enough trunk circuits to get close to "clock-time" programming this winter, but that they had to tone down their requirements because there just weren't enough intercity lines to go around (Vol. 13:39).

NBC currently has 3 prototype Ampex monochrome tape recorders, is understood due to receive 2 production models in Jan., 3 more in Feb.; CBS has 5, and at least 9 more on order; ABC has 3, more on order. Deliveries of production model Ampex black-&-white recorders, at \$45,000 each, are due to begin this month—company aiming to have 100 in use by midsummer.

RCA has announced that production model color tape recorders would be available commercially in "latter 1958;" Ampex has indicated it will have color conversion kit for its black-&-white recorders about same time.

RCA OFFERS ROYALTY-FREE PATENT EXCHANGE: RCA's promised new deal on patent licensing (Vol. 13:37-38, 40, 42.) is currently being submitted to its TV, radio and tube manufacturing licensees. These are principal provisions:

(1) Licensees would pay no royalties on use of patents in fields of radio and monochrome TV receiving & transmitting equipment, commercial radio apparatus and all tubes except color TV tubes—in exchange for cross-licensing agreement.

(2) "Color apparatus of any kind"—transmitting, receiving and tubes—is specifically excluded from proposed agreement.

(3) Agreements are to be retroactive to Sept. 1, 1957 and to extend to Jan. 1, 1963.

It's not known whether any agreements have been signed yet—RCA maintaining strict silence.

Add Cable Applications: Additional applications for cable-theatre franchises (Vol. 13:41, 43) were reported this week as filed in 5 states by Tele-Movie Development Co., Film Exchange Bldg., Los Angeles; in 2 states by Frisina Amusement Co., Springfield, Ill. Tele-Movie applications: Ariz.—Phoenix. Cal.—Arcadia, Azusa, Bakersfield, Chula Vista, Colton, Corona, Coronado, Covina, Delano, El Cajon, El Segundo, Escondido, Hawthorne, Hermosa Beach, La Mesa, Lakewood, Manhattan Beach, Monrovia, National City, Paramount, Pomona, Redlands, Riverside, San Fernando, San Gabriel, Santa Barbara, Ventura. Ill.—Chicago. Nev.—Las Vegas. Wis.—Milwaukee. Frisina applications: Ill.—Charleston, E. St. Louis, Effingham, Greenville, Litchfield, Mattoon, Shelbyville, Springfield, Taylorville. Mo.—Hannibal, Mexico, St. Charles. Tele-Movie Development, which also has formed subsidiary Tri-Cities Tele-Movie Co., was organized in May by pres. Walter J. Dennis, v. p. Will Baltin, treas. J. E. Poynter, secy. Harrison W. Hertzburg. Frisina Amusement manages movie theatres in central Ill. cities with John B. Giachetto as gen. mgr. Port Arthur, Tex. application was reported filed meanwhile by Custom TV Inc., Houston.

Color telecasts will be started on limited schedule Nov. 8 by WGN-TV, Chicago, with *The World Is Yours* travel film sponsored by Chicago Motor Club. *Ding Dong School* will be shown in live color starting Nov. 11. Station's equipment includes studio live camera chain and 3-tube vidicon film chain.

TV Critic Faces Critics: CBS-TV's long-heralded *The Seven Lively Arts*, cultural series featuring acidulous TV critic John Crosby of *N. Y. Herald Tribune* as narrator, had premiere Nov. 3—and got panned in his own column. Crosby delicately gave task of reviewing first program (S. J. Perelman-written "The Changing Ways of Love") to playwright George Axelrod, who reported in Nov. 6 *Herald Tribune* that topic "managed to overwhelm 7 arts, 3 narrators (Crosby, Perelman, Mike Wallace), 9 cameras and a whole trunkful of marvelous film clips." Axelrod found Sun. 5-6 p. m. show "disappointing," although "vast improvement on the unchanging ways of Desi & Lucy." As for Crosby himself, guest critic thought his "gentle, wryly perceptive style" wasn't displayed to best advantage, hoped he'd be more himself in upcoming programs. Nov. 3 *N. Y. Times* gave series send-off with interview with Crosby by J. P. Shanley. Next day *Times* critic Jack Gould took off after it: "It is not often that sex can be tedious for most of an hour, but it was . . ." Critic Gould was kind to critic-turned performer Crosby: "The Newspaper Guild may be proud of his debut, and certainly Actors Equity will be understanding." Series is unsponsored.

TNT establishes 4 regional offices, names these mgrs.: John B. O'Connor, eastern div., 575 Madison Ave., N. Y.; Gordon N. Morford, western div., 612 N. Michigan Ave., Chicago; Fred V. Davis, central div., Fisher Bldg., Detroit; Douglas George, Pacific Coast div., 5859 Melrose Ave., Los Angeles.

Personal Notes: Thomas W. Moore resigns as gen. sales mgr. of CBS-TV Film Sales to join ABC-TV as sales v.p.; John Howell promoted to his CBS-TV Film Sales post . . . Slocum Chapin assumes new ABC-TV post of v.p. in charge of client relations . . . John H. Pace resigns as exec. v.p. & gen. mgr. of Public Radio Corp. (radios KAKC, Tulsa, and KIOA, Des Moines) to join ABC as gen. mgr. of radio KABC, Los Angeles, and managing director of radio KGO, San Francisco, Dec. 1 . . . Jess Oppenheimer, TV producer-director-writer, appointed head of new NBC-TV creative programming unit, reporting to Manie Sacks, v.p. for network programs & talent . . . H. W. (Hank) Shepard, special projects director of NBC o-&o stations, named gen. mgr. of radio WJAS, Pittsburgh; Martin Pollins, from NBC Radio Spot Sales, sales mgr.; Oscar Campbell, chief accountant for o-&o stations, business mgr. . . Bradley R. Edimann promoted to sales mgr. of WGN-TV, Chicago, succeeding Theodore Weber, resigned; Edward A. Warren, ex-WNDU-TV, South Bend, named film mgr. succeeding Bob Hibbard . . . Kenneth E. Chernin promoted to new post of promotion director of Triangle Publications TV-radio div.; Donn E. Winther, from WNBC-TV & WNBC, Binghamton, to asst. promotion director . . . Wm. F. Kiley, ex-gen. mgr. of WFBM-TV & WFBM, Indianapolis, and TV-radio-theatre sales veteran Ted Nicholas, have formed new adv. agency, Kiley & Nicholas, 3445 Central Ave., Indianapolis, starting with 18 accounts . . . Warren Fritze promoted to engineering director of WTCN-TV & WTCN, Minneapolis; Dave Lee, from Willis S. Martin Co., named adv. & promotion director of WTCN-TV . . . Ken Sparnon promoted to station relations director of BMI . . . R. W. (Pat) O'Brian, ex-TPA, named marketing director of Fred A. Niles Productions . . . Arthur R. Lerner promoted to asst. treas. of Guild Films; Curtis Kaufman, ex-WMBV-TV, Marinette-Green Bay, named client relations director . . . Art Holbrook, ex-WIBW-TV, Topeka, named managing director of Southern Cal. Broadcasters Assn., succeeding W. J. Taylor, now sales & operations mgr. of radio KWIZ, Santa Ana . . . Charles Hinds, ex-WCBS-TV, N. Y., named program director of WXIX, Milwaukee, replacing Leon Drew, who joins KMOX-TV, St. Louis, as program director . . . Bert Samson, ex-Crosley Bestg. Corp., named

ADVERTISING AGENCIES: Gray Playter, adv. research mgr. of Armstrong Cork Co., appointed chairman of ANA adv. research committee . . . Dr. Jaye S. Niefeld, ex-McCann-Erickson, joins Keyes, Madden & Jones as research v.p. and plans board member; Edwin L. Fletcher named research director; Charles Chappell, v.p. & art director . . . Roswell W. Metzger named exec. committee chairman of Erwin Wasey, Ruthrauff & Ryan, Chicago; Haakon B. Groseth & Larry Northrup, exec. v.p.'s; Jack E. Fleisch, Kenneth D. Stewart & Wm. D. Watson, senior v.p.'s . . . Dan Kane promoted to TV-radio director of Ellington & Co., Harry Bailey to TV-radio creative supervisor . . . Charles M. Skade, ex-American Management Assn., named a senior v.p. of Fuller & Smith & Ross . . . Ted Grunewald, TV-radio director and a v.p. of Hicks & Greist, elected a director . . . Charles A. Bornstein, ex-NBC, joins traffic staff of N. W. Ayer TV-radio dept. . . Robert Coen appointed assoc. media director of McCann-Erickson.

Segal, Smith & Hennessey, veteran Washington communications law firm, splits in two—one firm to be headed by Paul M. Segal, other to be known as Smith & Hennessey, headed by George S. Smith and Philip J. Hennessey Jr. Change is effective Jan. 1, Segal to remain at 816 Conn. Ave., others to move. Division of other attorneys in firm hasn't been indicated.

exec. v.p. & gen. mgr. of Song Ads Inc., Hollywood, replacing Robert Sande, resigned . . . Hernan Nigaglioni resigns as gen. mgr. of WKAQ-TV, San Juan, P. R., to return to own public relations firm; Jose Oviedo named acting gen. mgr. . . Michael Ames, ex-D. M. S. Hegarty Assoc. and Emerson Radio, joins Ursula Halloran Assoc., public relations . . . Jack M. Davidson, ex-Northern Bestg. Ltd., which operates Ont. & Alta. radios, named exec. v.p. of CKY Ltd., Winnipeg . . . Robert I. Guy, ex-operations mgr. of KNTV, San Jose, named program director of KTNT-TV, Tacoma, succeeding Burke Ormsby . . . Zack Hill, ex-WREC-TV Memphis, named operations mgr. of WKXP-TV, Lexington, Ky . . . Richard P. Robbins, ex-Queen for a Day staff, named press information director of KTLA, Los Angeles; Robert G. Reagan promoted to public relations director . . . Gene Strul promoted to news director of WCKT, Miami . . . Paul S. Abbott, from WSYR-TV, Syracuse, named gen. mgr. of WSYE-TV, Elmira, succeeding T. Robert Bolger, resigned . . . Bruce H. Ratts promoted to studio supervisor of WBZ-TV, Boston . . . L. Walton Smith, from WROC-TV, Rochester, advanced to promotion director of Transcontinent TV Corp.

Bruce Eells resigns as TPA western div. v.p. to become exec. v.p. of United Artists TV, headquartering in N. Y. and embarking on large-scale TV production-financing project; TPA central div. v.p. Walter Plant succeeds Eells as western div. v.p., headquartering in Los Angeles; in other TPA promotions, Arthur Spirt moves from account exec. to central div. mgr., Stanley Levy from sales spot mgr. to national station sales director. TPA plans to add 8-12 men to central & western divs. after kick-off sales meeting week of Nov. 18 in N. Y.

Obituary

Harry L. Palmer, 76, retired v.p. of McCann-Erickson, N. Y., died Nov. 2 at home in Skowhegan, Me. He joined agency's predecessor, H. K. McCann Co., as gen. mgr. in 1917, retired in 1938. His widow survives.

Kyoshi Nagata, 54, pres. of govt.-owned Bestg. Corp. of Japan (NHK), died Nov. 3 following heart attack in Tokyo during reception for visiting Berlin Philharmonic.

Broadcasters' Promotion Assn. elected Elliott W. Henry Jr., adv. promotion & press information director of ABC's central div., as pres. at closing session of second annual meeting Nov. 2 in Sheraton Hotel, Chicago. He succeeds Westinghouse adv. & sales promotion mgr. David E. Partridge. Charles A. Wilson, WGN-TV & WGN, Chicago, was named 1st v. p.; Montez Tjaden, KWTW, Oklahoma City, 2nd v. p. Directors for 3-year terms: James M. Kiss, radio WPEN, Philadelphia; Ken McClure, WMBR-TV, Jacksonville; Ed M. Morrissey, KIMA-TV & KIMA, Yakima; Robert Peel, WHEN-TV & WHEN, Syracuse.

RAB reelects all officers, led by chairman Kenyon Brown, KGLC, Miami, Okla. Retained at N. Y. headquarters are pres. Kevin B. Sweeney; v. p. & gen. mgr. John F. Hardesty; v. p. & promotion director Sherril Taylor; asst. secy.-treas. Wm. L. Morison. Also renamed are secy. Wm. B. McGrath, WHDH, Boston; treas. John S. Hayes, WTOP, Washington.

Pennsylvania Community Antenna TV Assn., newly formed, elects: Bob Tarlton, Landsford, pres.; Ray Schneider, Williamsport, v.p.; John Arnts, Bangor, treas.; Miss Yolanda Barco, Meadville, secy.

Mass. Broadcasters Assn. elects: Roy V. Whisnand, radio WCOP, Boston, pres.; W. C. Swartley, WBBZ-TV, Boston, v.p.; George Jaspert, radio WCCM, Lawrence, treas.; Lawrence Reilly, radio WTXL, W. Springfield, secy.

FM Band in Danger? Rep. Roosevelt (D-Cal.) focused attention this week on upcoming FCC study of long-range requirements for 25-890 mc portion of spectrum when he charged in Portland, Ore., speech that "vested interests" threaten to encroach on FM broadcast band and pledged that his House Small Business Committee would set itself up as a "watchdog" to protect rights of small businessmen dependent on FM broadcasting.

Among groups he said have expressed desire for all or part of FM band are American Petroleum Institute, AT&T, NAM, "power combines," railroads and shortwave radio manufacturers. Former FCC Comr. Frieda Hennock, now in private law practice and representing MBS, is believed to be behind Roosevelt's concern over the FM band.

Deadline for filing in FCC's 25-890 mc proceeding has been extended to Nov. 25—and there are certain to be renewed requests for sharing of FM band by industrial radio users. NAM's Committee on Manufacturers Radio Use filed petition for shared use of band nearly 3 years ago (Vol. 11:6). It's still pending—but FCC has made what is, in effect, a counter-offer.

Tax on TV & radio commercials is proposed in Baltimore City Council ordinances scheduled for hearing Nov. 13. One measure would assess 7½% sales tax on gross sales price of any advertising time sold for intrastate broadcast originating in city and directed at persons within Md. Similar municipal tax would apply to other media. Proposals face opposition from broadcasters, press, advertisers, retailers, labor. In advance of hearing, TvB pres. Norman E. Cash sent telegram to Mayor Thomas D'Alesandro Jr. warning against "revolutionary move." Cash said it "could reduce the income to your city and severely restrict your administration," which supports tax as means of raising \$4,200,000 for 1958 budget, although opponents argue it actually would cause business losses, hurt city's economy. "This is a gun at the back of the advertising world," pres. C. James Proud of Advertising Federation of America said, terming proposals "threat to freedom of the press."

TV columnist Marie Torre of *N. Y. Herald Tribune* was formally ruled in contempt of court by Federal Judge Sylvester J. Ryan Nov. 7 for refusing to identify CBS informant she quoted in item about contract dispute between network and actress Judy Garland (Vol. 13:42-44). Miss Torre was released in custody of her counsel pending possible sentencing at further hearing Nov. 12 in U. S. District Court, N. Y. *Herald Tribune* has promised to appeal to Supreme Court if necessary to sustain columnist's right to protect source in case, in which Miss Garland is suing CBS (but not Miss Torre or newspaper) for \$1,393,333 for libel.

Camera-microphone coverage of N. Y. City Council sessions was demanded again Nov. 3 by Radio-Newsreel-TV Working Press Assn., which protested that Council had "pigeonholed" request made at hearing last March (Vol. 13:10). Letter to majority leader Joseph T. Sharkey said that Council's failure to act on issue "will not result in the disappearance of the question," that with public support Assn. will win right to cover meetings—and "our efforts will not cease until we do."

In its split-channel proposals, Commission offered the manufacturers the shared use of 150-mc band (with other services) and exclusive use of band around 450 mc. Commission's feeling is that this would accommodate industrial users for another 5-10 years anyway. Manufacturers haven't yet indicated whether offer is adequate.

On long-term basis, industrial radio users spearheaded by NAM are expected to put in strong pitch for FM band (and possibly even a portion of TV band; American Trucking Assn. once hinted it had eye on Ch. 2). Their argument is that their need for frequencies is constantly expanding and that some broadcasting services—notably FM—aren't making maximum use of spectrum.

If industrial radio users want to push hard for FM band, it could be real threat—since NAM group includes nation's industrial giants, many dwarfing companies in TV-radio. It's too early to say for sure, but feeling among those who have followed situation closely is that manufacturers—while continuing to demand FM band frequencies—will finally accept current FCC proposal, but call it a stopgap.

On a long-range basis, outcome could be different—depending upon how strong a case is made in FCC's proceeding by FM broadcasters and others for continued exclusive use of entire FM band. Recent resurgence of FM "came at the right time," so to speak, to provide evidence to Commission that FM, far from being dead, is getting livelier all the time.

Political telecasts sponsored on WJBK-TV, Detroit, by United Automobile Workers in 1954 Congressional election campaigns didn't violate Corrupt Practices Act (Vol. 13:44), U. S. District Court jury decided Nov. 6. Jurors took less than 2 hours to free UAW from govt. charges that 9 TV programs constituted illegal electioneering under law forbidding direct political contributions by corporations & unions. Court listened to recordings in which only Democratic candidates spoke, UAW spokesman explaining all Republicans had refused invitations to appear on dues-paid programs. Union argued successfully that telecasts were part of UAW's educational program for members.

"Blasphemy of democracy" is committed by broadcasters who try to manipulate public by "application of subtle psychological devices," chairman Dr. Charles A. Siepmann of NYU's Communications in Education Dept. told Freedom Forum at Mt. Pleasant High School, Schenectady. He deplored what he said was assumption by TV-radio industry that "best programs are those with the most viewers," protested big-audience-big-profit concept of broadcasting, said industry should "get back to the fact that our society is dedicated to the nurture of individuals." Siepmann urged public pressure for "improved mass media conscience."

Public interest programming requests, averaging some 200 annually for each station, pose major problem for broadcasters to determine which community efforts to support, NARTB pres. Harold E. Fellows told American Medical Assn.-NARTB meeting Nov. 7 in Chicago. He said "more thorough knowledge of broadcasting and its problems" helps public service groups to get air time.

Suit for \$2,000,000 has been filed in U. S. District Court for Southern District of Cal. by Sarkes Tarzian Inc., alleging 8 former employes, after leaving about Aug 1, conspired with Audio Devices Inc. to "convert Sarkes Tarzian Inc.'s restricted, confidential and secret information and processes to their own purposes and to defraud Sarkes Tarzian Inc."

Telecasting Notes: New wave of panic is sweeping over movie exhibitors, apparently based on public impression that films currently in movie houses will soon be on TV. Movie trade press lately has buzzed with demands for campaign to assure public that current features won't come to TV for long time. Movie industry market researcher Albert E. Sindlinger, according to Nov. 6 *Variety*, has prepared report indicating that 36,000,000 potential theatre admissions were lost during July because of wait-&-see-it-on-TV attitude . . . **Movie industry is doomed**, said pres. Edwin Silverberg of Chicago's Essaness Theatre Corp., unless it ends "suicidal giveaway" to TV. He predicted 10,000 movie houses will be forced to shut down next year because of old movies on TV . . . **AAP reported withholding its unsold Warner Bros. features** in some 35 markets for wait-&-see period of year or more. Purported reasons: Possibilities of pay TV; waiting for more free TV outlets to open, offering bigger markets. Among markets reportedly affected (those in which full 725-picture library hasn't been sold): N.Y., Los Angeles, Milwaukee . . . **Bargain film sale** in 200 basement markets has been started by CBS-TV Film Sales for 2-month run through slack syndication season, ending Dec. 31. Calculated to make smaller stations bulk buyers, offerings of 10 film packages are ticketed at \$20-\$75 each for 104-show contracts, \$10-\$37.50 for 520-show contracts, with final starting date Nov. 1958. *The Gray Ghost, Annie Oakley, Whirlybirds* aren't on bargain counter, but such CBS-TV properties as *Life With Father, Our Miss Brooks, Honey-mooners, Brave Eagle* are . . . **NBC now placing its Tonight show** on non-affiliates in markets where affiliates won't carry it . . . **New Sun. night entry**, running against formi-

dable Ed Sullivan-Steve Allen field, is *Harbourmaster*, filmed adventure series which R. J. Reynolds Tobacco is moving Jan. 5 to ABC-TV Sun. 8:30-9 p.m. from CBS-TV Thurs. 8-8:30 p. m. Apparent reason for sponsor's switch: *Maverick* has been doing well on ABC-TV Sun. 8-8:30 p. m. despite Sullivan on CBS-TV and Allen on NBC-TV 8-9 p. m. In past, ABC-TV has found advertisers reluctant to take them on . . . **New live network:** Federated Networks Inc. is name given by Television Clearing House (whose main line is supplying merchandise prizes for TV) for proposed live program packaging deal aimed at groups of 3, 4 & 5-station regional hookups of small-market stations . . . **Kings of boxoffice** in feature films on TV are Clark Gable & Spencer Tracy, Nov. 4 *Billboard* reports on basis of survey of 15 months' ratings of feature films on Los Angeles' KTTV . . . **Guild Films** reportedly has completed buyout of its reported 380,000 shares formerly owned by Matty Fox . . . **NBC's rating improvement** shows up dramatically in early Oct. reports of Nielsen and ARB: Nielsen's total audience rating give NBC & CBS each 5 of top 10 shows; Nielsen average audience is divided 6-4 in favor of CBS; ARB is 5-to-5 for regularly scheduled programs Oct. 8-14—and if you include 4 specials, ARB's "top 14" would be 8-6 in favor of NBC . . . **"Peter Pan" returns:** NBC-TV proposes 3rd engagement March 31 for Mary Martin in smash show which drew estimated 67,000,000 viewers March 7, 1955 and 55,000,000 for repeat performance Jan. 6, 1956. Starred in "Annie Get Your Gun" on network Wed. Nov. 27, 8:30-10:30 p. m., she's reported ready to give "Peter Pan" another swing . . . **Bing Crosby** cancels his scheduled Dec. 11 CBS-TV 60-min show. Reported reason: unavailability of desired guest performers.

TV-induced "rigor kinescopis" threatens children, associate prof. Edward Stasheff of U. of Mich. told 28th annual Parent Education Conference at Ann Arbor, describing symptoms as glazed look in eye, ache-all-over feeling, drowsiness, extreme wear on TV-room furniture. Now on leave as program associate at Educational TV & Radio Center, Stasheff said cure is improved programming to meet children's needs, greater selectivity in parents' viewing habits. He added: "TV has, on the whole, avoided the programming excesses of radio in the '30's & '40's. Children's TV programs have, in the main, not been harmful. At worst, they have been time-wasters & habit formers."

Popularity of horror films on TV is analyzed in Nov. 2 *Sponsor* by pres. Dr. Ernest Dichter of Institute for Motivational Research, who concludes that their "final and perhaps conclusive appeal" for viewers is: "No matter how horrible the commercial is, this is more horrible!" He also thinks there is self-identification by audience with "uncontrollable monster"—that "we would not really mind being a little out of control every once in a while, if only just to redress the balance." Advice to sponsors: Use products as "bridge back to reality, a practical & radical contrast to horrifying unreality."

Piel's TV "Bert & Harry" are principals in injunction suits filed by beer firm against competitor Gunther Brewing Co. and latter's former adv. agency, Sullivan, Stauffer, Colwell & Bayles, alleging they misappropriated animated cartoon characters for commercials. Piel Bros. contends in action in U. S. District Court, Baltimore, that Gunther "used for its own purposes copies & confusing simulations" of "Bert & Harry." Agency is accused by Piel in N. Y. State Supreme Court of trademark infringement. In both suits Piel asks damages in addition to restraining orders.

Demand for FCC probe of ABC-TV by Los Angeles police captain James E. Hamilton, who alleged he was libeled by ex-gambler Mickey Cohen on May 19 *Mike Wallace Interviews* show (Vol. 13:28), was rejected Nov. 6 by Commission. Complaining that network & stations carrying program neglected to observe any "code of decency," Hamilton had asked for FCC investigation of network leading to hearing on suspension or revocation of stations' licenses. But FCC pointed out that ABC-TV had apologized for remarks by Cohen on the unrehearsed show, that Commission exercises no control over stations' programming except in periodic review of over-all operation in public interest. Cohen incident didn't provide "sufficient basis for any further action" by FCC, Hamilton was told.

Latest Pat Weaver enterprise: He has joined with Henry J. Kaiser and showman Mike Todd in new organization (as yet unnamed) to exploit and build huge aluminum domes for "big-screen film spectaculars, stage and concert entertainment, and all types of auditorium events." Scheme was announced after the 3 met at showing of Todd's *Around the World in 80 Days* in aluminum dome theatre at Kaiser's Hawaiian Village Hotel. Weaver was named pres. & managing executive of new enterprise, which will be equally owned by Kaiser, Weaver, Todd and their organizations. Deal doesn't affect Weaver's other activities, including his Program Service organization and his post as TV-radio director of Kaiser Industries.

Viewing gains by TV, rising to 38,000,000 families during 6 p.m.-midnight period in March, compared with 34,000,000 in March 1956, were detailed by Dr. Leon Arons, TvB research director, based on recent A. C. Nielsen survey. All weekly time periods showed TV viewing per average minute climbed 15-30%. Based on different homes reached, TV attracted 5-15% more families in 11 of 12 time periods, 6-9 a.m. period showing 3% drop.

ABC Bolsters Toll TV Opposition: Adding to networks' accelerated drive against toll TV, Oliver E. Treyz, v.p. in charge of ABC-TV, told Minneapolis Ad Club Nov. 7 that "various experiments in the field of toll or pay TV . . . will kill network TV as we know it."

Treyz said if ABC had been forced to bid against pay TV for shows "it could not have purchased for and brought to the American people—on a free screen—our renewal of *Disneyland*, *Cheyenne*, our purchase of Sid Caesar-Imogene Coca, the *Adventures of Zorro*, Frank Sinatra, Pat Boone, *Colt .45*, *Circus Boy*, Walter Brennan in the *Real McCoy*s, and *Maverick*."

ABC couldn't compete pricewise, he said, "with a pay-TV entrepreneur who had signed up even a minimum of 5% of the people. It would have been the case of a network—as a trustee of the people—being outbid by the booking agency for perhaps 1% of the people who would pay to see . . . It cannot fail but to enable the few, who are willing to pay, to deprive the many, who now get free TV."

In other developments: (1) Final results in Sen. Langer's poll of Bartlesville showed 1930 against pay-TV, 163 for. (2) AFL-CIO industrial union dept., at Washington convention, opposed pay TV as curtailing "free use of a medium which has become part of the American home," said it would relay views to FCC, Congress, other agencies. (3) Los Angeles Dodgers' pres. Walter O'Malley said "if we don't have pay-TV, there will be no TV of our games at all." (4) San Francisco Giants signed up for 3-year radio broadcast of home and road games, pres. Horace Stoneham saying there will be no free TV of Giant games because club has exclusive contract with Skiatron. (5) Digitronics claimed development of a decoder which would be mass-produced for a little over \$10. (6) Committee to oppose pay TV in Milwaukee was formed by AFTRA attorney Harry Holloway.

Radio-TV News Directors Assn. elected Jack Krueger of WTMJ-TV & WTMJ, Milwaukee, as pres. at 12th annual convention Nov. 8 in Balmoral Hotel, Miami Beach, succeeding Ted Koop of CBS, Washington. Named v. p.'s were Wm. J. Small, WHAS-TV & WHAS, Louisville, for programs; Ralph Renick, WTVJ, Miami, for TV; John Maters, WILS, Lansing, for radio. F. O. Carver, radio WSJS, Winston-Salem, was elected treas. Directors for 3-year terms: Jack Morris, KTVX & KTUL, Tulsa; Julian Goodman, NBC, Washington; Charles Shaw, WCAU-TV & WCAU, Philadelphia. Directors for 1-year terms: Wm. Monroe, WDSU-TV, New Orleans; Hugh Bremner, radio CFPL, London, Ont. CBS Inc. pres. Dr. Frank Stanton was scheduled to receive Paul W. White Memorial Award at convention Nov. 9. Other RTNDA awards for 1957: "Outstanding news story"—WFAA-TV, Dallas, and radio KCMO, Kansas City. "Outstanding news operation"—WBAP-TV, Ft. Worth, and radio KCMO, Kansas City. "Distinguished achievement" in news coverage — WCKT, Miami; KTVT, Salt Lake City; radio WCAU, Philadelphia, radio WRCA, N. Y.

New camera chain for expansible closed-circuit TV networks in industrial, commercial & educational fields was announced Nov. 8 by RCA. Designed as foundation for expand-as-needed system or as addition to existing system, chain (ITV-201) includes portable vidicon-type camera, self-contained control unit, viewing monitor—priced at less than \$3000.

BBC-TV's Switch: British govt.-owned BBC will stop trying to compete with commercial ITA for maximum audience, BBC-TV director Gerald Beadle indicated. His announcement appeared to be about-face, since BBC earlier had revealed plans for more popular programming in hope of becoming strong competitor for ratings. Beadle said, however, that BBC-TV now plans to offer programming "nearer to the forefront of taste and intellectual interest." He explained that while ITA continues to follow tried-&-true formula programming, BBC intends to "see to it that at least one of our national channels is modern, up-to-date and devoted to satisfying the requirements of an educated democracy in the making." Beadle's disclosures followed publication of survey statistics by both Nielsen and TV Audience Measurement (TAM) indicating that ITA programs outpull BBC by nearly 3-to-1 in areas where they are in competition.

TV ratings are misused by sponsors & adv. agencies as "convenient whipping boy" when shows are dropped, pres. Dr. Sydney Roslow of Pulse Inc. said Nov. 7 at luncheon meeting of American Marketing Assn. in Brass Rail Restaurant, Park Ave. & 40th St., N. Y. He told media research discussion group that managements, serviced by own research men, have own reasons for cancelling programs—"but intentionally or unintentionally they are putting the blame on ratings." Similar complaint was voiced by v. p. W. Bruce McEwen of C. E. Hooper Inc., who urged agency heads to count on trained researchers—not ratings and time buyers alone—to "decide when and on what networks & stations shows should appear."

"Dictatorial powers" of NCAA to prevent TV coverage of Queen Elizabeth & Prince Philip at Oct. 19 U of Md.-U of N. C. football game were blasted this week by v.p. George T. Hartford of WTOP-TV, Washington, as "sad commentary on our system of govt." In letter to Congress, he said station tried to televise the "once in 100 years" news feature, that hundreds of thousands in Washington-Baltimore area "would have given anything to see" royal couple at game, but that NCAA officials refused "their august blessing."

First broadcasting use of "semantic differential" psychological research method for time sales was claimed Nov. 4 for radio KDKA, Pittsburgh, by Westinghouse. Research method breaks down attitudes arranged according to age, sex, education, other characteristics of listeners interviewed, applying "technique for assessing meaning quantitatively, with the use of a bipolar scale of words," according to Westinghouse research chief Mel Goldberg.

Neat-riot answers question: To find out if "anyone was watching our TV show," Waldenheim Furniture, Milwaukee retailer, this week inserted offer of free \$8.95 TV lamp to any customer who entered store 9-11 a.m. One-minute commercial pulled 8000 people, police riot squad, added \$15,000 worth of lamps to original giveaway order, sold no furniture, and somewhat eased Waldenheim's doubt of viewership of its WITI-TV "\$6,000,000 Movie."

TV producers Mark Goodson & Wm. Todman head N. Y. group which has bought *Pawtucket* (R. I.) *Times* for \$3,000,000. They control purchaser New England Newspapers Inc., which bought newspaper from group controlled by trust established by late Edward B. Aldrich.

Site for new British commercial TV station for north-east England has been selected at Burnhope, 5 mi. south-east of Cossett. Meanwhile, work has begun on commercial outlet at Chillerton Down, Isle of Wight. Both stations will use Marconi transmitters and antennas.

TV, Radio & Sputnik: Birth of Sputnik II found networks and stations ready to improve on the excellent coverage job they did on first Sputnik—adding still more to their stature as mature news media. In addition to networks' excellent job of special programming, bulletins and progress reports, these other TV-radio industry angles in U.S.-Russian space battle were prominent in week's news:

(1) Individual stations did big job in reporting on new Sputnik, sometimes feeding to network. For example, St. Louis' KTVI shot telephoto film footage of the satellite, fed later to ABC-TV's *John Daly & the News*. Milwaukee's WTVJ-TV & WTVJ apparently were first to monitor radio tone which some specialists say may be heartbeat of Sputnik's canine passenger. Newsmen of several radio stations picked up their telephones, called Soviet officials and came up with scoops.

NBC-TV had a minor scoop which could have become a TV sensation—but it's just as well that it didn't. Training 4 TV cameras on moon through telescopes at Hollywood's Griffith Observatory, NBC's *Today* brought viewers first televised eclipse of moon Nov. 7. In back of minds of network and viewers was widely touted possibility that Russia might shoot H-bomb rocket to moon on 30th anniversary of Red revolution.

(2) President Eisenhower took advantage of TV's intimacy and immediacy to reassure public of America's military-scientific progress. He took

unusual step of telling public that his appearance was first in "series" of TV-radio broadcasts devoted to subject. Overnight 15-city Trendex rating of CBS-NBC live telecast was 35.9, with 60.6% share of audience. ABC-TV repeat 2 hours later got 9.6 rating, 18% share.

(3) MIT pres. James R. Killian, named by President Eisenhower as Special White House Asst. for Science & Technology, is no stranger to TV-radio industry. As member of President Truman's Communications Policy Board in 1950-51, he was one of authors of policy which is used as guide in govt.-private radio spectrum allocation. Board's report (Vol. 7:31) was notable in that it recommended that military and other govt. frequency users, as well as private applicants, be required to justify requests for spectrum space.

(4) That Soviet has eye on use of satellites as long-distance TV-radio transmitting antennas and relays was indicated in Moscow Radio interview with a Prof. Manayev, identified as radio engineer. "By sending a sputnik to an altitude of 600-900 mi.," he said, "it is possible to get a radius of [coverage] reaching thousands of miles. In other words, the transmitters of the Moscow TV center can be raised so they will be able to serve an area as big as the entire European part of Russia." He said that by having "a number of these sputniks it may be possible to realize the idea of beaming radio & telegrams to a sputnik and relaying them from a sputnik."

FCC Weighs Protest Curb: FCC shortly will consider another approach to reduce filings of economic-injury protests. Commission has long protested against protests, pleading with Congress to take law off the books. Chairman Doerfer recently inveighed bitterly against protests, in speech before Federal Communications Bar Assn. (Vol. 13:43).

Latest protest-discouraging technique was proposed in Austin, Minn. radio case. KAUS, also operating KMMT(TV), protested grant of 1-kw daytime station to George A. Hormel II, on economic injury and interference grounds. Hormel, through attorney Harry M. Plotkin, asked that KAUS be required to prove injury by laying bare all its financial records.

Hormel asserted that KAUS should be required to show injury as it would in a private damage suit, that "throughout the law where a party alleges the existence of a fact, he must be prepared to prove it by evidence and must make available to his opponent all relevant records and data in his possession to enable the opponent to challenge the accuracy of his showing."

KAUS then withdrew economic injury issue, asserting however, that request for inspection of books is premature; that protestant "should be permitted to try its case in its own way;" that it "would resist to the last any such broad demand . . ."

Hormel then came back to Commission with motion that whole protest be dismissed, charging that KMMT has no standing to protest because of unwillingness to disclose finances—and matter stood there are week's end.

Another protest case arrived at initial decision stage. Examiner H. Gifford Irion urged retention of grant of WESH-TV, Daytona Beach (Ch. 2) move toward Orlando—over joint protest of 5 Orlando stations and applicants. He stated: "Leaving suspicious inferences apart, the evidence does not suggest likelihood that the Perry interests intend to convert WESH-TV into an outlet primarily for Orlando. Their testimony was clear and unequivocal that WESH-TV would remain a Daytona Beach station regardless of what incidental service it might render to either the audience or advertisers of Orlando. If future events were to prove the contrary they would have to be the subject of a renewal or revocation proceeding; they cannot be surmised here."

* * * *

CPs granted: Ch. 10, Elko, Nev., to Nevada Radio-TV; Ch. 70 translator in Lovelock, Nev.

Allocations actions: (1) Finalized shift of Ch. 3 from Cheyenne to Sterling, Colo., deletion of Ch. 8 from Ainsworth, Neb., substitution of Ch. 8 for 3 in McCook, Neb. (2) Proposed switch of Ch. 75 for 74 in Lewistown, Pa.

— ■ —

Facilities changes: WMSL-TV, Decatur, Ala. (Ch. 23) began Nov. 8 with 189.2-kw max. directional; WLEX-TV, Lexington, Ky. (Ch. 18), also Nov. 8 with 170-kw max. directional; WFIL-TV (Ch. 6) & WRCV-TV (Ch. 3), Philadelphia, plan joint inauguration of new 1000-ft. tower Dec. 15.

WJBF, Augusta, Ga. (Ch. 6), this week moved into new \$300,000 studio-office building, which replaces building damaged by fire over year ago. It has been operating from new transmitter site near Beach Island, S. C. since Sept. 8.

New and Upcoming Stations: Uhf WEEQ-TV, La Salle, Ill. (Ch. 35) and CKSO-TV-1, Elliot Lake, Ont. (Ch. 3) report programming debuts. U.S. on-air total now is 517 (91 uhf); Canadian, 45. WEEQ-TV got program authorization Nov. 8, planned to make debut over week end. It has 1-kw GE transmitter, 400-ft. Stainless tower at site near Tonica, Ill., some 45 mi. from Peoria. Principal owner is Sen. Robert S. Kerr, also with interest in KVOO-TV, Tulsa (Ch. 2). Coming from WEEK-TV are Edward G. Smith, WEEQ-TV gen-mgr. and Wm. W. Pendergraft, chief engineer. WEEK-TV hour is now \$600. Rep is Headley-Reed.

In Canada, new starter is satellite CKSO-TV-1, Elliot Lake, Ont. (Ch. 3), in uranium mining area, approx. 80 mi. west of parent CKSO-TV, Sudbury, Ont. (Ch. 5). The station began Oct. 26 with reduced power, reports W. J. Woodill, gen. mgr. of CKSO-TV. It has 2-kw RCA transmitter, moved from CKSO-TV after latter's boost to 30-kw. Temporary antenna is to be replaced soon with 2-bay RCA on 100-ft. Stainless tower. Lucien (Lou) Albert, from CKSO-TV, is resident mgr. CKSO-TV hour is \$240. Reps are Weed and All-Canada.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KVII, Amarillo (Ch. 7) has transmitter house ready for 5-kw RCA transmitter due shortly and plans Dec. 7 start with ABC-TV, reports pres.-gen. mgr. Murry Woroner. Work on 833-ft. Andrews tower began Nov. 4, and 12-section antenna is scheduled for installation Nov. 20. Ownership interlocks with local radio KAMQ. Base hour is \$300. Rep is Venard, Rintoul & McConnell.

KXLJ-TV, Helena, Mont. (Ch. 12), to be low-power satellite of parent KXLF-TV, Butte (Ch. 4), hopes to begin programming in Nov., reports pres.-gen. mgr. Ed Craney. Studio-transmitter building is nearly ready, awaiting delivery of Sarks Tarzian 250-watt transmitter. Installation of 2-bay RCA antenna on 80-ft. Fisher tower begins soon. KXLF-TV has \$200 base hour. Rep is Walker.

FCC Wins CP Damage Suit: Precedential damage suit against FCC in which bankrupt Bestg. Corp of America demanded \$13,455,719 for CP cancellation 10 years ago was tossed out of U. S. Court of Claims Nov. 6 as "neither equitable nor legal." It was first time that applicant for CP had gone to court in attempt to hold Commission financially & legally responsible for losses allegedly suffered from loss of CP. Sustaining FCC arguments that it had right to cancel permits in interests of public welfare & national security, Court in Washington adopted findings of trial commissioner Marion T. Bennett that BCA was not entitled to U. S. recompense for withdrawal of Ch. 1, Riverside, Cal., which was reallocated for govt. use. Company headed by pres. & principal owner Willard L. Gleeson had signed waiver when CP was issued Dec. 29, 1946, stipulating that it was not license to broadcast and that interference with other channels might force cancellation. CP was suspended by FCC May 20, 1947, and Gleeson started suit. Court held that (1) BCA's application for CP was "misleading," (2) BCA's financial condition at time was "unstable & inadequate," (3) "general economic conditions in Riverside area brought on company's financial troubles in first place, (4) FCC couldn't

KUED, Salt Lake City (Ch. 7, educational) has Dec. 15 target for programming, reports mgr. C. Richard Evans for owner U of Utah. It has 5-kw transmitter wired and ready, but 6-section superturnstile antenna isn't scheduled for installation on 140-ft. Ideco tower until Dec. 1.

WIPR-TV, San Juan (Ch. 6, educational) has changed programming target to Dec. 15, but now has test pattern picture on air, reports gen. mgr. R. Delgado Marquez for P. R. Dept. of Education. It has 25-kw RCA transmitter and 6-bay antenna on 200-ft. Blaw-Knox tower at TV-radio plant 15 mi. from San Juan, plans to operate 6 hours daily.

ZBM-TV, Hamilton, Bermuda (Ch. 10) plans to begin as 500-watt outlet in Jan., carrying programs of the 3 U. S. networks and British Rediffusion. Owners: radio ZBM, 55%; *Royal Gazette*, 30%; *Mid-Ocean News*, 15%. Walt Staskow will be managing director; W. Holmes, program director; R. Harbin, production director; Aubrey Harris, chief engineer. Base hour will be \$70. Reps will be Intercontinental Services Ltd. (N. Y.), Stovin-Byles Ltd. (Toronto) & Overseas Rediffusion Ltd. (London).

RCA shipped 6-kw transmitter Nov. 5 to upcoming KDUH-TV, Hay Springs, Neb. (Ch. 4), due on air in Dec. as satellite of KOTA-TV, Rapid City, S. D.; 6-section superturnstile antenna Nov. 4 to KSD-TV, St. Louis (Ch. 5), planning move to new site; 3-section superturnstile Nov. 5 to WRC-TV, Washington (Ch. 4), planning move; 25-kw transmitter Nov. 7 to WHBF-TV, Rock Island, Ill. (Ch. 4), planning move.

Rate increases: KCKT-TV, Great Bend, Kan. Nov. 1 added Class AA hour (6:30-10 p.m. Mon.-Sat., 6-10 p.m. Sun.) at \$350, min. at \$60, Class A hour remaining \$250. WEAR-TV, Pensacola, Sept. 1 raised hour from \$300 to \$350, min. \$60 to \$70. WMTV, Madison, Nov. 1, hour \$280 to \$325, min. \$56 to \$65. KFBC-TV, Cheyenne, hour \$175 to \$200, min. \$35 to \$40.

Translator starts: K71AH, Salida, Colo. began Oct. 30 repeating KCSJ-TV, Pueblo. K74AK & K78AD, Ukiah, Cal. have transmitters but won't begin until Dec. 1 with KBET-TV & KCRA-TV, Sacramento, when power transmission construction will be completed.

Canadian rep firm Horace N. Stovin has changed name to Stovin-Byles Ltd., with addition of W. D. Byles, ex-Young & Rubicam Ltd., as pres.—Stovin named chairman.

be blamed in any event for losses because "the facts are that most, if not all, of those losses arose from plaintiff's other activities."

P. R. Banta will buy back 10% of KGEO, Enid-Oklahoma City, which he and other owners of licensee Streets Electronics Inc. are selling for \$2,500,000 to L. E. Caster and Ashley L. Robison (Vol. 13:41). Banta will buy his 10% from Caster, who is to acquire 75% of KGEO, Robison 25%. Streets Aug. 31 balance sheet shows deficit of \$751,738 to date. It had \$96,803 current assets, \$463,492 fixed assets; \$747,016 current liabilities, \$313,401 due on RCA note.

RKO Teleradio's purchase of radio WGMS, Washington, pending for 1½ years (Vol. 12:14 et seq.) was finally approved by FCC this week after minority stockholder Lawrence C. Smith withdrew protest to the \$400,000 sale (Vol. 13:42).

Chicago headquarters of central divs. of ABC-TV, ABN & ABC Film Syndication will be moved next Feb. 1 from Kemper Insurance Bldg. (old Civic Opera Bldg.) to expanded offices in London Guarantee Bldg., 360 N. Michigan Ave.

FEW SIGNS OF TV RECEIVER PRICE INCREASES: Despite recent announcement of picture tube increase, most manufacturers agree there's little chance of hike in TV set prices before end of year. Only exception is Motorola, Edward R. Taylor, exec. v.p. consumer products, saying "we've told our distributors to expect a price boost on TV," and noting recent \$3 increase on Motorola portable radios.

Militating against higher set prices at this time are: (1) Softness of market -- which many believe is now beginning to firm up -- and setmakers' disinclination to inject possible unsettling element. (2) Time lag of 4-6 weeks before mid-Oct. announcement of picture tube price increase becomes effective, thus giving set manufacturers chance to stock up on tubes. Here's cross-section of TV makers' views:

Motorola's Taylor says "we probably will increase TV prices despite soft market." His feelings: "You can't lose money and keep on selling sets." Taylor pointed to auto industry which "isn't afraid to raise prices and if autos get off to a fast start they could carry the whole economy upward with them." Motorola had good week the week before last, he said, followed by dropoff last week -- and this week seems to be going well among distributors checked. Taylor feels market is firming up, but that Nov. and Dec. will be at a lower level.

"RCA has no current plans for any price adjustment," we were told by Robert Seidel, exec. v.p. consumer products. "We've just had one of our biggest black-&-white weeks -- with color also holding up well. In last 2 weeks RCA stepped up its percentage of industry sales on the distributor to dealer level -- and that's where it counts; dealers don't buy what they don't need."

GE's Jack Beldon, marketing mgr., TV receiver dept., says: "At the moment GE has no plans to increase TV set prices in the immediate future. However, the television industry cannot go on forever absorbing cost increases without having them reflected in set prices."

Philco's Henry E. Bowes, v.p. & gen. mgr., TV div., says "we have no immediate plans to raise our current prices."

Emerson pres. Benjamin Abrams declares: "We're certainly not considering any change in price between now and the end of the year, especially on models now in production. However, any increased cost, such as 5% boost on picture tubes which amounts to about \$1 per set, makes us begin to think of raising prices and would of course be considered in any new models coming out."

Admiral spokesman says tube price increase may result in higher prices for sets around first of year. Queried on Admiral business, he said market had been soft, but now seemed to be getting better.

* * * *

Note: Average factory price of TV, which had declined steadily to low of \$124 in April, has now moved upward to Sept. mark of \$131, compared with \$128 in Sept. year ago. (Prices exclude federal excise taxes.) Higher average price is due mainly to modest price increases on 1958 line -- which in turn is attributed to boost in cost of steel for cabinets, more expensive 110-degree tubes, etc. Production mix has remained about same between April & Sept.

Philco's Skinner Scans 1958: An early prognosticator, Philco pres. James M. Skinner Jr. stepped out this week with following estimate of 1958 prospects: "Industry TV unit sales in 1958 should be approximately equal to 1957," but he foresaw average unit price "slightly down from 1957 because more portables and table models will be sold than consoles." However, he does feel that portable and table prices "should be slightly higher" next year. "Color TV," he said, "will not be of much business

significance in 1958." Philco itself hopes to do better in 1958, Skinner stated -- "although 1957 was quite satisfactory." He looked for good radio business, continued hi-fi boom.

One-Set Show: Sylvania stages unique press preview to show single set, an ultra-thin, 110-degree, 10-in. deep, 21-in. console (Vol. 13:40). Price hasn't been set, but model is in production, will be on dealers' floors by time of unveiling Nov. 13 at Hotel Biltmore, N.Y. It's separate from line to be introduced near year end.

Retail Sales: TV retail sales through Sept. were 4,452,081, reports EIA, compared with 4,603,626 sold during first 9 months of 1956. Official Sept. sales were 705,247 vs. 510,097 in Aug. and 763,908 in Sept. year ago (Vol. 13:42,44). Radio sales at retail, excluding auto sets, totaled 5,840,372 vs. 5,405,052 sold in similar 9-month period of 1956. Sales in Sept. were 893,366 vs. 756,345 last Sept.

Production: TV output was 152,306 week ended Nov. 1, compared with 169,806 the preceding week and 196,032 in corresponding week one year ago. It was year's 44th week and brought TV production for the year to date to about 5,397,000 compared with 6,250,051 in same period of 1956. Also this week, EIA officially estimated first 9 months production at 4,589,164 compared with 5,259,271 in similar 1956 period. Sept. production was 832,631 (87,040 uhf), compared with 673,734 (88,615) in Aug., and 894,211 (96,785) in Sept. 1956.

Radio production was 399,196 (131,327 auto) week ended Nov. 1 vs. 401,178 (125,813 auto) preceding week and 358,217 (152,139 auto) in corresponding week year ago. Radio output for 44 weeks totaled about 12,352,000 (4,511,000 auto) vs. 11,230,218 (3,760,196 auto) in 1956 period. First 9 months production was placed at 10,376,354 (3,839,345 auto) compared with 9,535,896 (3,060,093 auto) in similar period last year. Sept. production was 1,610,748 (446,419 auto) compared with 965,724 (301,971 auto) in Aug. and 1,319,189 (349,790) in Sept. 1956.

Transistor Boom Continues: Transistor sales tripled in Sept., compared to previous year, and more than doubled in cumulative 9 months, according to EIA. Sept. factory sales were 3,231,000 worth \$6,993,000 vs. 1,115,000 worth \$3,455,000 in Sept. 1956. For 9 months of 1957, factory sales hit 18,842,300 worth \$49,056,000 vs. 8,113,000 worth \$23,172,000 in 1956. EIA's breakdown by months:

	1957 Sales (units)	1957 Sales (dollars)	1956 Sales (units)
January	1,436,000	\$ 4,119,000	572,000
February	1,785,300	5,172,000	618,000
March	1,904,000	5,321,000	708,000
April	1,774,000	4,880,000	832,000
May	2,055,000	5,636,000	898,000
June	2,245,000	6,121,000	1,130,000
July	1,703,000	4,216,000	885,000
August	2,709,000	6,598,000	1,315,000
September	3,231,000	6,993,000	1,115,000
TOTAL	18,842,300	\$49,056,000	8,113,000

Shifts in TV brand ownership by Dallas households is noted in March 1957 survey by *Dallas Morning News*—unaffiliated with Consolidated Consumer Analysis survey (Vol. 13:40) which compiles similar brand preference for 23 markets. Dallas survey shows set saturation at 85.8%, up from 80.5% last year; 13.5% purchased sets within previous 12 months; 16.5% 1-2 years ago; 19.6% 2-3 years ago; 6.3% more than 6 years ago. RCA was top brand, owned by 14.4% of households; Motorola 12%; Admiral 11.8%; GE 9.9%; Philco 9.3%; Silvertone 6.3%; Westinghouse 4.9%; Zenith 4.7%; Hoffman 3.8%; Magnavox 3.4%. In 1956, standings were: RCA 14.5%; Motorola 14.2%; Admiral 11.1%; Philco 8.3% GE 7.8% Zenith 5.9%; Silvertone 4.9%; Westinghouse 4.8%; Hoffman 4.7%; Magnavox not in top 10.

Tips to small business on selling govt. market are given in new Small Business Administration booklet, *ABC of Selling to U. S. Government*.

Tube Sales Off: Both picture and receiving tube sales were off for Sept. and 9 months vs. comparable periods of last year, according to EIA reports. Producers sold 1,071,662 TV picture tubes worth \$20,819,036 at factory in Sept. vs. 1,267,045 units worth \$22,990,754 in Sept. 1956. For 9 months of 1957, factories sold 7,308,552 worth \$135,625,838 vs. 8,087,352 at \$146,995,480. Receiving tube sales totaled 44,382,000 at factory in Sept. worth \$35,545,000 vs. 44,432,000 worth \$35,093,000 in 1956. For 9 months, receiving tube sales slid to 341,663,000 worth \$287,934,000 at factory vs. 347,436,000 worth \$279,237,000. EIA's breakdown by month:

	Picture Tubes		Receiving Tubes	
	Units	Value	Units	Value
January	760,860	\$ 13,594,525	37,571,000	\$ 31,170,000
February	728,363	13,134,778	44,460,000	36,631,000
March	833,257	14,850,847	43,010,000	37,007,000
April	629,838	11,394,043	27,970,000	25,384,000
May	758,328	14,031,519	32,836,000	28,955,000
June	1,104,013	19,981,319	35,328,000	31,314,000
July	491,935	9,835,586	33,077,000	27,042,000
August	930,296	17,984,185	43,029,000	34,886,000
September	1,071,662	20,819,036	44,382,000	35,545,000
TOTAL	7,308,552	\$135,625,838	341,663,000	\$287,934,000

Small business firms account for about two-thirds of EIA membership, according to survey by small business committee of EIA parts div. "Small" means firm employs less than 500 and is not dominant in its field. Survey shows 8.5% were "medium" companies (501 to 1000); 25% were "large," employing over 1000. Average employment for all member companies was 4000. Average for small was 133; medium, 700; large, over 15,000. Average number of plants was 3.75. For small firms average plants were 1.35; medium, 2.2; large, 10.6.

Latest Howard W. Sams publications: *1958 Test Equipment Annual* (120 pp., \$1); *Servicing TV Sync Systems* by Jesse Dines (32 pp., \$3.95).

Japan Broadening Exports: FM tuner is next piece of equipment. Japanese manufacturers will be aiming at U. S. market, according to Nov. 7 *Home Furnishings Daily* interview with T. T. Yamagata and M. Ito, representatives of 16 makers at Japanese Electronic Exhibition currently at 1140 Broadway, N. Y.

U. S. firms have sent technicians and test equipment to help FM tuner production by: Fukuin Electric Co. Ltd., Sansui Electric Co. Ltd., Kasuga Radio Co., Matsushita Electric. Yamagata said that full lines of speakers, cartridges, tone arms, microphones, and other hi-fi sound equipment are already being shipped to both set makers and hi-fi specialty shops here. No estimates of quantities were given, though 1957 imports may have doubled since 1956. Export of packaged hi-fi seemed unlikely at present, and record changer export improbable since Japan makes turntables only, he noted. Quality of Japanese goods has improved with aid of "American technical know-how," Yamagata added.

Other makers at exhibit: Aiko Electric Co. Ltd., Fukuyu Sound Co. Ltd., Kataoka Denki Co. Inc., Murata Mfg. Co. Ltd., Mitsumi Electric Co., Neat Sound Co. Ltd., Primo Sound Research Inc., Sakura Electric Co. Ltd., Sawafuji Mfg. Co. Ltd., Shinano Onkyo Co. Ltd., Showa Musen Kogyo Co. Ltd., Suzuki Denki Co. Ltd., Tamura Mfg. Co. Ltd.

Home Furnishings also reports that transistor production in Japan could hit 5,000,000 a month by 1959, current rate being estimated at 700,000-800,000 a month (U. S. rate: 2,100,000 a month); that miniature tube portable radio production has been practically eliminated by transistorized portables except for small export production; that transistor boom and radio retail saturation is causing makers to push for other electronic fields.

Canadian TV sales by distributors to dealers were down sharply for Sept. and 9 months, RETMA of Canada reporting Sept. sales of 62,100 vs. 98,277 in Sept. 1956; 295,338 for 9 months vs. 411,562 last year. Sales by provinces: Ontario, 111,206 for 9 months, 21,614 in Sept.; Quebec 84,289 & 18,787; British Columbia 25,307 & 5241; Alberta 21,942 & 5447; Manitoba 18,538 & 4350; Nova Scotia 12,696 & 2441; Saskatchewan 10,798 & 2419; New Brunswick & Prince Edward Island 8238 & 1508; Newfoundland 2324 & 293.

Nearly 1,000,000 picture tube bulbs have been produced for tube makers in practically all western European countries by Societe des Verreries Industrielles Reunies du Loing (SOVIREL), Paris, owned jointly by Corning Glass Works and 2 major French glass makers—St. Gobain & Glaces de Boussois. Modern plant 50 mi. from Paris began operation in summer 1955, uses Corning mass-production techniques.

Sylvania Electric (Canada) Ltd. sets up new div. in Montreal, taking over distribution Jan. 1 of TV-Radio from former distributor Northern Electric which will concentrate on electrical contracting. M. Drummond Brooks, former Northern TV & appliance marketing mgr., will head new Sylvania operation.

Packard-Bell enters portable TV field with 17-in., 110-degree-tube "Porta-Bell" model in fiber glass cabinet available in charcoal & white at \$189.95; mocha & white, turquoise & white at \$199.95.

Cornell-Dubilier appoints Friend-Reiss agency for all ad accounts.

Trade Personals: Theodore A. Smith, exec. v.p., RCA industrial electronic products, named a director of RCA Communications Inc.—raising membership to 13 . . . Robert Stevens, ex-McCann-Erickson, named Zenith adv. mgr., succeeding Charles McKinney, resigned . . . Charles Ellis, I. D. E. A. Inc. gen. sales mgr., adds duties of adv. mgr., succeeding Wm. Sharkey, resigned . . . Daniel P. Knowland Jr. promoted to Heath Co. asst. gen. mgr. . . Donald W. Collins, ex-Rumrill ad agency, Rochester, named Sylvania special sales rep for hi-fi . . . Clarence F. Jensen, ex-Webster Electric, appointed chief engineer, Jensen Industries . . . Lee Gunter Jr. promoted to Shure Bros. chief development engineer; Robert Troxel to chief products engineer . . . Edwin Weisel Jr., ex-Olympic, named distributor sales mgr., DeWald Radio; Seymour Wald promoted to contract sales mgr.

Glen L. Logan, managing director Electric League of Los Angeles, elected pres. International Assn. of Electrical Leagues; John McDermott, Electric Assn. of Kansas City, v.p.; Cliff Simpson, Electric Assn. of Chicago, treas.; Herb Cook, Electrical Assn. of Detroit, secy.; IAEL's next convention set for Washington, Oct. 1-3, 1958.

DISTRIBUTOR NOTES: Westinghouse Appliance Sales Corp., N. Y., names Dan Nagler sales mgr., replacing Joseph J. Raspaolo, resigned . . . Sylvania names C. R. Bower, ex-Hyde Sales Co., Denver, district sales mgr., Kansas City, replacing Richard G. Evans, transferred to Dallas . . . Graybar names C. E. Kalb mgr. at Columbus in Cincinnati territory; H. G. Cook, Ohio Valley district mgr. at Cincinnati; M. P. Johns, Miss. Valley district mgr. at St. Louis; W. E. Iseli mgr. at Eugene in Seattle territory . . . Olympic appoints Greylock Electronics Supply, Albany; W. L. Roberts Inc., Memphis; H. E. Sorenson Co., Des Moines . . . DeWald Radio appoints as reps for AM-FM tuner & amplifier, transistor table radio, clock radio: Berliant Assoc. for N. Y. state; Jesse P. Johnson Co., for N. C., S. C., Tenn., Ala., Ga., Miss.; H. W. Knaggs Co., for Ia., Neb., Kans., Mo., southern Ill. . . Bell Sound Systems names for tape recorders, stereo accessories, hi-fi components: Leader Electronic Supply, Newark; Sanborn Music Co., Detroit; Yale Radio-Electronics Co., Hartford; Radio Parts Supply, R. D. Schwalb, both San Francisco; Buckeye Electronic Distributors, Chillicothe, O.; Morrison Radio Supply, Ashtabula, O.; Rowton TV & Sound Distributor, Paducah, Ky. . . Jos. M. Zamoiski Co. (Zenith) Washington-Baltimore, promotes Millard B. Fleisher from gen. sales mgr. to v. p., Washington div.

New "Mark Series" of RCA color sets were featured in 2 nearly full-page ads this week in *N. Y. Times*. Nov. 3 ad was placed by distributor Bruno-N. Y., Nov. 8 by Davega Stores. Both listed home demonstrations at \$15—to be applied to purchase price.

Federal excise taxes paid by TV-radio, phonograph and component manufacturers amounted to \$149,192,000 in year ended June 30, reports IRS, compared with payments of \$161,098,000 year ago.

Hi-fi not yet booming in hinterlands, points out Nov. *Electrical Merchandising*, which notes that without big promotion like full-dress hi-fi show, TV-appliance dealers find hi-fi remains music merchants' specialty.

Reprinting of service story in Oct. 14 *Time*, which set off barrage of comment in TV industry (Vol. 13:41-44), is being considered by *Reader's Digest*, which has sought reprint permission.

Electronics Personals: Frederick H. Guterman, ex-American Bosch Arma, elected v.p. & gen. mgr., DuMont industrial & military equipment div. . . Donald A. Sutherland, ex-Miehle Printing's Star-Kimble Motor div., appointed gen. mgr., Elgin National Watch Co. electronics div. . . Robert W. Olsen named Texas Instruments v.p. in charge of research & engineering; E. O. Vetter to gen. mgr., industrial instrumentation div. . . Dr. Clarence Zener, director of Westinghouse Research Labs, awarded Bingham Medal by Society of Rheology for metals research . . . Christian J. Goodman promoted to products sales mgr. GE semiconductor products dept., a new post, succeeded by Arling Woolaver as district sales mgr. for N. J. & eastern Pa. . . John R. McAllister promoted to purchasing mgr., Philco govt. & industrial div., replacing Wm. MacMurtrie, retiring after 23 years . . . T. C. Wisenbaker named asst. mgr. missile systems div., Raytheon; H. T. Ashworth replaces him as Bristol, Tenn., plant mgr. . . Henry M. Taylor, ex-Sylvania, named mgr. of marketing, Stromberg-Carlson (San Diego) . . . Crump Smith, from Federal Telephone & Radio, named institutional & export adv. mgr. of IT&T . . . Wm. H. Garbade, Crescent Corp. pres., elected a director of Hycon Mfg. Co. . . Raymond W. Searle elected pres. & treas. of Technology Instrument Corp., Acton, Mass.; Lucius E. Packard, chairman.

“Outstanding Young Electrical Engineer of 1957,” selected by Eta Kappa Nu, electrical engineering honor society, is Robert P. Crago, 30, director of engineering of IBM military products div. Honorable mention: Dr. W. R. Beam, 29, mgr., microwave advanced development, RCA tube div.; Glenn W. Stagg, 34, senior engineer, American Gas & Electric Service Corp., N. Y.

New “scatter” link—world’s third commercial over-horizon system—was placed in Puerto Rico-Dominican Republic service (Vol. 13:33) by IT&T Nov. 1, providing 6 two-way telephone channels 238-mi. between San Juan & Ciudad Trujillo. IT&T’s Radio Corp. of Puerto Rico operates one end of link, augmenting existing high-frequency circuit. General Telephone Co. subsidiary Compania Dominicana de Telefonos C. por A. operates other end. Similar IT&T commercial “scatter” systems provide telephone service between Sardinia & Minorca and telephone-TV service between Florida & Cuba (Vol. 13:42).

Talos staged comeback Nov. 5 at White Sands Proving Grounds, N. M., where external rocket of guided missile fizzled after successful initial firing last month (Vol. 13:42). Second & third tests, involving Talos missiles designed for both explosive & nuclear warheads, were “complete success,” according to Navy Capt. J. C. Parham Jr., commander of test facility.

Muirhead & Co., British-Canadian manufacturer of electronic measuring instruments & fire-control apparatus, will build 17,500-sq. ft. plant at Huntington, L. I., planning to employ 150 technicians on completion in 2 years. Firm now employs 1250 workers at Beckenham, England, 50 at Stratford, Ont.

Silicon price cuts announced by Texas Instruments, due to increased use in semiconductors: standard grade, \$320 to \$240 per lb.; premium grade, \$500 to \$400; research grade, \$980 to \$750. Philco cuts silicon transistor prices up to 60%, attributing reductions to manufacturing experience and automation.

Merit Coil & Transformer Corp. adds 12,000 sq. ft. to Hollywood, Fla. plant.

Amphenol Electronics earned \$1,335,154 (\$2.61 per share) on sales of \$23,388,172 in 9 months ended Sept. 30, compared with \$874,891 (\$2.10) on \$18,970,149 in comparable 1956 period. Third quarter net profit was \$390,899 (71¢) vs. \$248,445 (56¢) in similar period year ago. Pres. Arthur J. Schmitt said order backlog represents 3-month current production, adding that “while there has been some curtailment of activity due to cutbacks and realignments in military procurement, many new products will result from the re-evaluation of the missile and other electronic programs.”

Signs of the TV times: “Every division of the company, other than the picture division, is making more money this year than last year,” states Loew’s Inc. (MGM) pres. Joseph R. Vogel in Oct. 30 letter to stockholders informing them usual \$2.50 quarterly dividend for Sept. & Dec. was being “retained in the business and utilized in the production of profit-making films.” He adds: “With the new films which the present management is producing; with the increase in use of the studio for TV, and our success to date in selling these TV subjects, I believe we are building a solid foundation for the future.”

Gates Radio Co., manufacturer of electronic and commercial broadcast equipment, has been sold to Harris-Intertype Corp. in cash deal, figure not disclosed. Gates pres. Parker S. Gates will continue as pres. of Quincy, Ill. firm which will be operated on decentralized basis with present staff. Gates’ sales are running at \$6,000,000 annual rate, net profits at about \$500,000. H-I had sales of \$59,078,826, earnings of \$4,733,045 for year ended June 30, 1957.

Dividends: WJR, The Goodwill Station, 20¢ plus 2% stock, both payable Dec. 6 to stockholders of record Nov. 20; Official Films, 5¢ Dec. 2 to holders Nov. 15; American Bosch Arma, 30¢ Dec. 31 to holders Dec. 5; Tung-Sol, 35¢ Dec. 2 to holders Nov. 18 plus 3% stock Dec. 9 to holders Nov. 18; General Instrument, 15¢ Dec. 16 to holders Nov. 20; General Tire, 17½¢ Nov. 29 to holders Nov. 18.

Tung-Sol reports net profit of \$2,221,359 (\$2.43 on 867,129 shares outstanding) on sales of \$46,512,610 in 39 weeks ended Sept. 28, compared with \$2,060,810 (\$2.88 on 661,462 shares) on sales of \$39,147,270 in comparable period year ago. Report says 1957 period includes \$200,000 net and \$3,500,000 sales of Chatham Electronics div., acquired May 20.

Arvin Industries earned \$1,099,741 (\$1.22 per share) on sales of \$17,941,299 for quarter ended Sept. 30, compared with \$854,894 (95¢) on \$14,279,153 in corresponding 1956 quarter. For 9 months ended Sept. 30, earnings were \$3,084,533 (\$3.43) on sales of \$53,387,457 compared with \$2,356,827 (\$2.63) on \$44,106,856 last year.

I-T-E Circuit Breaker reports net profit of \$4,752,000 (\$3.85 per share) for 9 months ended Sept. 30 vs. \$3,693,000 (\$3.27) last year. Results for 1956 don’t include Kelman Electric & Mfg. Co., Walker Electrical Co., Chase-Shawmut Co.

Jerrold Electronics reports loss of \$77,798 on net sales and revenues of \$2,638,920 for 6 months ended Aug. 31 in report filed with SEC, compared with loss of \$47,372 on sales of \$2,140,326 in corresponding 1956 period.

Decca Records earned \$3,123,014 (\$1.95 per share) in 9 months ended Sept. 30, compared with \$2,917,379 (\$1.82) in corresponding 1956 period.

Globe-Union Inc. earned \$1,113,431 (\$1.35 per share) in first 9 months of 1957, compared with \$863,750 (\$1.05) in comparable 1956 period.

Network Television Billings

September 1957 and January-September 1957

(For Aug. report see *Television Digest*, Vol. 13:40)

ADVANCING STEADILY AGAIN, TV network billings climbed 4.6% in Sept. over year earlier, following 9.5% slide in Aug. from Aug. 1956—month when political convention sponsorships brought abnormally high level of business (Vol. 13:40), according to Publishers Information Bureau. Sept. billings this year totaled \$40,810,081 vs. \$39,006,077 in Sept. 1956, CBS (up 8%) leading with \$19,870,151. For 9 months of 1957, cumulative total increased 4.3% to \$369,076,607 from \$353,860,492 in first 3 quarters of 1956. The complete PIB report for Sept.:

NETWORK TELEVISION

	Sept. 1957	Sept. 1956	% Change	Jan.-Sept. 1957	Jan.-Sept. 1956	% Change
ABC	\$ 5,704,888	\$ 5,673,910	+0.5	\$ 58,282,982	\$ 56,529,387	+3.1
CBS	19,870,151	18,399,872	+8.0	173,410,530	162,811,764	+6.5

*Revised as of Nov. 7, 1957

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 25%. However, they're generally accepted in the trade as an index.

PIB may discontinue its monthly reports on TV network billings which since 1949 have been accepted generally by industry as standard index. PIB secy. W. H. Mullen said that Magazine Publishers Assn., which owns service, was considering dropping TV reports at end of year, although no decision had been made—for reason that fees paid for PIB service by networks & other clients don't justify expense of research borne by MPA.

New color kinescope recorder so bright that "viewing with the naked eye is difficult" is now available from Telechrome Mfg. Co. on 30-60 day delivery schedule. Developed for Walter Reed Army Medical Center in Washington, which has RCA closed-circuit color TV system, new 3-tube system is said to have brightness capabilities of 750 ft.-lamberts, resolution of 500 lines. It can be used with commercially available color film with AFA speed rating of 12.

Argument on RCA-NBC motion to dismiss govt. anti-trust case arising out of NBC's swap of its Cleveland TV-radio stations for Westinghouse's Philadelphia outlets, originally scheduled for Nov. 8, was postponed indefinitely by Philadelphia Federal Court due to illness of RCA-NBC attorney Bernard G. Segal.

Strike against NBC-TV: Walkout from NBC-TV was started Nov. 8 by Radio & TV Directors Guild in hassle stemming from long-smoldering jurisdictional dispute between Guild and National Assn. of Broadcast Employees & Technicians. RTDG pickets began appearing Nov. 8 in front of NBC-TV studios in Hollywood, Burbank & N. Y., threatening serious disruption of programs on network. Immediate cause of picketing was claim by RTDG that NBC locked out directors Bill Helion & Howard Davis from Dave Garroway's *Today* show in N. Y., replacing them with "unauthorized" supervisors. But real issue, which put NBC in middle of jurisdictional fight, was question of who was to give direct orders to TV crewmen—program directors who belong to RTDG or technical directors who belong to NABET? Last year RTDG won NBC contract clause eliminating middleman procedure, but it was not invoked by Guild until last week. Seeing jobs of technical directors in jeopardy, NABET fought back by observing new procedure so strictly that only explicit orders from directors were obeyed. Results: cameras out of focus, lights misdirected, mikes displaced. Truce was called pending settlement of dispute in negotiations this week with NABET & NBC, Guild setting Nov. 7 midnight deadline. Negotiations, which included question of arbitrating inter-union contest, were continuing late Nov. 8, however.

Paintings, Pilots, Cows: Closed-circuit TV was used at Nov. 7 auction of art collection of late Georges Lury, bidders in 2 siderooms viewing proceedings in main salesroom over Teleprompter system, including 6x8-ft. screens. Similar closed-circuit auction was conducted in London in July (Vol. 13:28). Other closed-circuit developments: (1) United Air Lines announced pilots will be trained by TV to fly new jet transports. Camera will project scale-model airport for fliers manipulating make-believe controls for simulated landings. (2) Paul Klemtner & Co., Newark, estimated that 200,000 visitors to Eastern States Exposition at Springfield, Mass. crowded into special studio to watch TV show (including artificial respiration for cow) it planned & produced in cooperation with Mass. Veterinary Assn. (3) Nov. 8 *Printers' Ink* said closed-circuit for business & industry will hit \$5,000,000 sales this year—and double volume in 1958.

Two applications for TV stations and one for a translator were filed with FCC this week, bringing total to 119 (34 uhf) for stations, 35 for translators. Station applications: for Waycross, Ga., Ch. 8 by John H. Phipps, owner of WCTV, Thomasville, Ga. (Ch. 6) and WPTV, Palm Beach (Ch. 5); for Moline, Ill., Ch. 8 by local group headed by Oscar W. Ellis. Translator application was for Ch. 70, San Jon. N. M. [For details, see *TV Addenda 25-0* herewith.]

TV character merchandising dept. has been set up by AB-PT under Walter R. McCurdy; ABC-TV's publicity, adv. & art staffs will assist in all licensing promotions. First project: *Maverick*.

Broker Allen Kander & Co. opens new office at 1700 Broadway, Denver, headed by Tim O'Connor from Chicago office. Jack Hoag joins Chicago staff.

SUMMARY-INDEX OF THE WEEK'S NEWS—November 16, 1957

HOW TO BE A GIANT: Upstart NTA shows way, with acquisition of AAP, 20th Century tie-up, film network, station ownership, features & series (p. 2).

BROADCAST vs. WIRE pay-TV battle joined by RKO Teleradio, which blasts closed-circuit systems; to apply for toll-TV tests in N. Y. & Los Angeles (p. 3).

CLARKSBURG, W. VA. gets first local station as WBOY-TV begins operation, bringing U. S. on-air total to 518. Reports of new-station plans (p. 5).

VHF BOOSTER COMPROMISE probable as FCC seeks way out of hot political issue. Ch. 5 CP granted in Mitchell S. D.; more allocation moves (p. 6).

RCA TAKING ORDERS for prototype color tape recorders at "more than \$100,000" each; first 6 go to NBC-TV, 7th to Charlotte's WBTV (p. 7).

SPECIAL AD TAXES adopted in Baltimore in face of TV-radio-newspaper protests that they are invalid; Council approves compromise 6% levy (p. 8).

SUBLIMINAL ADVERTISING barred by NARTB code board pending consideration of "hidden sell" methods; CBC-TV bans use of method (p. 9).

CBS EARNS \$13,898,171 on sales of \$275,276,269 in 9 months, seems headed for new records (p. 14).

Manufacturing-Distribution

COLOR SET UPSWING for Christmas seen by persevering RCA, which reports sales now at "satisfactory plateau;" set & tube output increased (p. 1).

REALLY SLIM CABINET—only 10-in. deep, picture tube projecting 4-in. from front—features startling new Sylvania \$400 top-end set (p. 10).

DECLINING MARGINS threaten investment capital flow to appliance stocks, says Westinghouse's Cresap. Industry share of dollar keeps slipping (p. 12).

FINANCIAL REPORTS: Packard-Bell TV profits down; Admiral's quarter earnings up, 9-month figure down; Stromberg-Carlson "progress" reported (p. 13).

RCA REVIEWS COLOR TV PROGRESS: Still carrying the color torch virtually alone, RCA appears not to have slackened one whit in its drive. At Cherry Hill, N. J. TV receiver headquarters this week, we were brought up to date by Wm. E. Boss, color TV coordinator who reports directly to pres. John L. Burns.

"Major problem in color is exposure," according to Boss, who puts prime emphasis on surveys showing that 75% of public hasn't seen color (Vol. 13:26). Color does well, he says, where local stations have good schedule—backed by strong distributor promotion. "Color sales hit a peak in the week before the World Series," he said, "then leveled off at a satisfactory plateau."

What constitutes "satisfactory" isn't elaborated—for RCA continues to hold statistics close to chest. Last year, RCA Chairman Sarnoff reported, 102,000 color sets were sold. Boss reports that another color production line has been added at Bloomington, Ind. plant, and new machinery is stepping up color tube production at Lancaster, Pa.; that factory is back-ordered on certain models—mainly average priced consoles. Some non-RCA sources guess Lancaster is turning out 5000 color tubes weekly.

Income level of color purchasers is quite variable, Boss says; average selling price is \$650-\$695, with consoles lion's share of volume—most purchasers being sold up from \$495-\$550 table models.

Exposure program, according to Boss, follows same pattern as early black-&-white, is aimed at getting sets into public places such as airports, hotels, beauty parlors, bars, etc. These are usually handled on rental basis by distributors and dealers—generally with arrangement for purchase at end of 6 months. Example of mass exposure, said Boss, was "very successful" Four Roses promotion (Vol. 13:35).

Color techniques learned in Milwaukee (Vol. 13:23) are being used in 27 major and 25 smaller markets, with promotion building up through Christmas. Boss expects Christmas will see color sets gift items, upswing holding over into Jan. (For RCA Christmas advertising program, see p. 12.)

RCA has had some geographical problems. West coast delayed colorcasts recorded on lenticular film brought complaints about quality—but Boss says that in Sept. improvements in lenticular process made picture "quite acceptable, quite good compared with live." Complaints have ceased, he says, and sales have held up well. Now, of course, RCA looks forward eagerly to start of color tape recording on coast—greatly improving quality (Vol. 13:43).

Inadequate cable facilities to southwest and southeast have also impaired picture quality. However, Boss says new circuits have improved southwest situation.

NEW CELLULOID GIANTS IN THE MAKING: A new breed of TV industry titans is growing up around film production and distribution—and audacious National Telefilm Associates is pushing on half-dozen fronts to be the leader of the herd.

This little giant, barely in existence 5 years ago, embarked this week on biggest TV film merger-acquisition deal of year—giving more substance to oft-heard predictions that TV film production-distribution-syndication will simmer down from today's scores of significant companies to 3 or 4 large combines.

NTA this week concluded deal which eventually will cost it more than \$15,000,000 in cash and stock—and will almost double its product catalog. Complicated pact involves buyout of more than half of Associated Artists Productions' 1,639,000 shares of common stock, and was coupled with announcement that NTA is prepared to buy up the remainder. The immediate acquisition is the stock controlled by Canadian financier Louis Chesler and his associates, with NTA paying \$437.50 cash, \$440 in 7% seven-year debentures and 10 shares of NTA common stock for each 100 shares of AAP. Similar offer will be made to other stockholders of AAP, which is listed on N.Y. Stock Exchange.

When purchase is completed, NTA will have obtained all rights to Warner Brothers' pre-1948 feature film library, plus popular Paramount Popeye cartoons, Warner's Looney Tunes (Bugs Bunny, etc.) and several TV film syndication properties. Warner features were purchased by AAP (then PRM Inc.) early last year for \$21,000,000 (Vol. 12:9); since then, AAP has grossed about \$30,000,000.

AAP sellout was understood to have resulted from dispute between pres. Eliot Hyman and Chesler group about dividend policy, latter wanting more immediate profits and TV film veteran Hyman urging reinvestment of most proceeds into major expansion.

NTA, which became a power in TV via feature film route, will have some 1500 features in catalog including Warner Bros. series, plus about 2500 usable movie shorts. It has first call on all 20th Century backlog releases, now is distributing about 150 of them, also has Selznick, Rank, Korda and Stanley Kramer catalogs.

Never content with status quo, NTA is understood to be one of hottest contenders for big feature backlog of Paramount, last TV holdout among movie majors.

NTA is guided by youthful triumvirate with backgrounds of Madison Ave., Hollywood and theatre exhibition: Chairman Ely Landau, 37, onetime TV-radio director of Emil Mogul Co. and later an independent TV film producer; pres. Oliver Unger, 43, Hollywood film production veteran; exec. v.p. Harold Goldman of N.Y. theatre-owning family. Under trio's leadership, company's gross annual sales have risen in 5 years from \$350,000 to \$18,000,000. Before AAP acquisition, NTA's assets are more than \$33,000,000.

Though founded on feature film, company's policy has been to diversify into all possible phases of TV. Last year, in 50-50 partnership with 20th Century-Fox, it founded "NTA Film Network," which has 90-min. evening feature film show weekly (nationally sponsored) running in virtually all TV markets—and recently crashed rating barrier with its week-end Shirley Temple "Holiday Special" oldies, now running in all major markets and completely sold out. Network drops "Film" from its name next year, plans to dip its feet into live program syndication.

Realizing its weakness in produced-for-TV series, NTA has signed co-production deals with 20th Century-Fox and Desilu for group of series, now has 5 in active stages of production or distribution, 6-7 more in planning stages.

Among boldest recent moves was NTA's acquisition of 2 TV stations, still awaiting FCC approval—metropolitan New York's WATV with radio WAAT, and Minneapolis' KMGM-TV (still 25%-owned by Loew's). NTA has been negotiating for other broadcast properties. Its by-product enterprises include NTA Pictures, which distributes old features from company's library to movie theatres, a film shipping service and recently established foreign branches.

NTA may not be biggest potato in TV film field; in the the TV series market, it can hardly be mentioned in same breath as such producer-distributors as Ziv, Screen Gems and others. But in this field, and in all TV fields, nobody can say it's not trying. When the chips are down and the oft-forecast attrition weeds men from boys, there's every indication upstart NTA will be counted among the giants.

PAY-TV BATTLE—BROADCAST VS. WIRE: Just when it looked as if nobody of influence except Zenith Radio Corp. was willing to speak up in favor of airborne toll TV—as opposed to the wire-borne variety—along comes RKO Teleradio with announcement it intends to apply for on-air pay-TV tests, coupled with blast at closed-circuit approach to fee TV.

RKO isn't ready to file its application yet. Real purpose of announcement, according to RKO sources, was to stem tide to wired systems, give heart to broadcasters and others who want to be part of pay-TV trials but who haven't spoken out. "Somebody had to get on record," RKO spokesman said.

Noteworthy in the weeks since FCC stamped its okay on fee-TV tests has been complete pre-occupation of proponents Skiatron and Telemeter with plans for wired subscription TV, leaving Zenith only active well-heeled backer of broadcast subscription TV—until RKO's Tom O'Neil spoke up.

That RKO plans to file for fee-TV tests isn't at all surprising. But O'Neil's strong statement was intended to supply food for thought to those broadcasters who have been encouraging wired systems in effort to keep the air free of tollcasts. O'Neil claimed pay TV as natural birthright of broadcasters. If they waste time claiming it, he stated, they will "serve to divert its rich flow to other communications streams, such as closed circuit." Leaving toll TV to wired systems, he said, will soon give closed-circuit operators "control of all of the program elements of telecasting, whether it be free or toll."

RKO spokesman said company would like to tollcast on all 4 of its stations, but only its New York and Los Angeles outlets come within FCC specifications for tests (area must have 4 Grade A commercial signals). RKO insists it hasn't decided yet which decoding system to use, but some observers take O'Neil's blast at wired TV to be aimed at Telemeter and Skiatron, and predict alliance with Zenith.

It's good bet that RKO already has plans to use its movie studios and knowhow to make special movies aimed primarily at pay-TV audience. Having left theatrical feature business, it doesn't face problem of soothing ruffled exhibitors when it puts movies on the pay-TV screen.

■ ■ ■
NARTB pres. Hal Fellows, in Los Angeles, predicted this week that Congress would head off on-air tests of toll TV, and reiterated his opinion that FCC had exceeded its authority in approving idea of a trial. He said motion picture interests were most active groups backing fee TV—but was careful to explain that his comments related only to broadcast pay TV, wired systems being outside of NARTB's area.

Meanwhile, there were these other developments on various pay-TV fronts this week:

(1) San Francisco battle over closed-circuit subscription TV was fanned to white heat as Cal. theatre owners mobilized to block Skiatron franchise, which currently is stalled in city's finance committee. Skiatron counterattacked with press conference in which v.p. Alan Lane revealed that his company had virtually abandoned its open-wire system, and now plans to use conventional coaxial cable for wiring city.

Even using cable, he said, it will only cost \$2,250,000-\$3,000,000 to wire entire city, not the \$30-\$60,000,000 opponents have claimed. Again he pledged that Skiatron system would get going with

opening of 1958 baseball season if city council acts in time. He said his company had paid Giants ball club \$1,000,000, would pay \$300,000 more by next April.

(2) Popular opposition caused one applicant to drop franchise request in Fresno, Cal. After unanimous vote of representatives of 22 local women's organizations, Lippert Theatres withdrew application, pres. Robert L. Lippert saying: "I realize now they don't want pay TV in any form, and it's dead as far as I'm concerned."

(3) FCC found itself deluged with about 3000 printed postcards—some addressed to FCC "c/o The White House," others to President Eisenhower—all carrying same message urging it to reject pay TV. Most cards were from Michigan, with some from Tennessee. They were printed in Detroit, as indicated by Detroit printers' local identification on union label.

(4) N.Y. Herald-Tribune Syndicate's influential John Crosby came out with flat endorsement of pay TV and predictions that medium will be so successful that "you'll have to beat [viewers] away from the coin box with clubs." Herald Tribune has long been editorial advocate of subscription-TV tests.

(5) Convinced that "toll TV may well develop into a multi-billion-dollar industry," staff of Senate Govt. Operations Committee authored report last week urging that Govt. get in on some of the cash. It recommended that Congress consider instituting system of FCC license fees for broadcasters early next session so that services performed by Commission "in connection with proposed toll TV shall be performed [at] rate commensurate with the benefits accruing to licensees." Senate Commerce Committee has opposed the idea of FCC fees in past and best guess is that it will ignore this latest plea.

Personal Notes: Donn B. Tatum elected TV marketing v.p. of Walt Disney Productions, Luther R. Marr secy. . . . Charles Manno promoted to asst. program director of ABN . . . Charles Fagan promoted to asst. to John Hundley, CBS-TV program services mgr. . . . Wally Gould, ex-Guild Films & TPA, forms Walter I. Gould Productions Inc., 15 E. 48th St., N. Y. . . . Stanley Florsheim, ex-gen. sales mgr. of Ziv's Economee TV div., named gen. sales mgr. of NTA's Famous Films div. (reruns) . . . Tony Rizzo named midwestern sales representative of Guild Films, headquartering in Kansas City . . . Alfred E. F. Stern, ex-RKO Radio, joins NTA as west coast public relations director . . . James Richards resigns as v.p. & eastern sales mgr. of Don Lee network to rejoin radio rep John Blair & Co., N. Y. . . . Joe Ryan promoted to business & trade publicity mgr. of NBC . . . Frank Young, ex-NTA, joins Benton & Bowles subsidiary General Public Relations Inc. as TV show publicity dept. mgr. . . . Jack Bertell & John Greenhut, who headed own talent agencies, form TV Artists Corp., 527 Madison Ave., N. Y. . . . Harold C. Lund, Pittsburgh area v.p. of Westinghouse Bestg. Co. (KDKA-TV & KDKA), elected chief barker of Variety Club there . . . Sam W. Steele Jr. named southeast sales head of Official Films . . . Wm. D. Pabst, ex-v.p. & gen. mgr. of radio KFRC, San Francisco, named gen. mgr. of upcoming KTVU, Oakland-San Francisco (Ch. 2), due next spring . . . J. B. Fuqua, pres. & gen. mgr. of WJBF, Augusta, Ga., elected to Ga. House of Representatives . . . Charles F. Grisham promoted from sales mgr. to gen. mgr. of WABT, Birmingham . . . Richard Sassenberg resigns as traffic mgr. of RKO TV div. of RKO Teleradio Pictures to become pres. of Piclear Inc., maker of TV film projection device he invented . . . W. P. Baker, ex-KLFY-TV, Lafayette, La. named program director of upcoming WMBD-TV, Peoria (Ch. 31), due in Jan. . . . John F. Box Jr., ex-Bartell Stations & NBC, joins H. & E. Balaban Corp. as exec. v.p. for its radio stations . . . John L. McGuire named Denver mgr. of rep Clarke Brown, succeeding Ken Palmer, who devotes full time to Intermountain Network . . . James A. Yergin promoted to adv. mgr. of

WOR-TV & WOR, N. Y. . . . Shaun Murphy promoted to national sales mgr. of KTVI, St. Louis; James W. Svehla Jr. succeeds him as sales service director . . . Robert Nelson advanced to promotion director of KHJ-TV, Los Angeles, succeeding Robert M. Light, resigned . . . Robert M. Petranoff, ex-program mgr. of WTTV, Bloomington-Indianapolis, joins Indiana U radio-TV dept. as producer-writer . . . J. Reginald (Reg) Miller promoted to national sales mgr. of KOMO-TV, Seattle . . . Bill Sunday, ex-San Diego County TB & Health Assn., named promotion director of KFSD-TV, San Diego.

Jack D. Wrather is "no one's idea of a Texas millionaire," Nov. 10 N. Y. Times says in personality sketch of pres. of Wrather-Alvarez Bestg. Inc. (KFMB-TV & KFMB, San Diego; KERO-TV, Bakersfield). "For all his 150 oil wells and a hint of a drawl, he looks more like Madison Ave. than Commerce St. in Ft. Worth," story says. It details recent purchase of Muzak (Vol. 13:38) and other Wrather ventures.

John E. Pearson rep firm moves office from Minneapolis to Des Moines, with Frank Frost, from Chicago radio branch, as mgr., headquartering in Des Moines Bldg.; Ralph Widman, ex-WFAA-TV, Ft. Worth, named mgr. of Dallas office.

ADVERTISING AGENCIES: Milton H. Biow, Biow-Biern-Toigo chairman, is public member of govt. evaluation team touring Far East to inspect USIA facilities there . . . Arthur E. Duram, TV-radio v.p. of Fuller & Smith & Ross, appointed senior v.p. . . . Forrest Owen Jr. promoted to exec. v.p. & mgr. of Wade Adv., Hollywood . . . Scott Keck, asst. TV-radio director of Needham, Louis & Brorby, elected a v.p. . . . John Peace named chairman of operating committee of Wm. Esty . . . Harold H. Black resigns as senior v.p. of Reach, McClinton . . . Richard H. Depew, ex-ABC, joins Cunningham & Walsh as TV-radio account exec. . . . Doty Abbott, ex-radio WHER, Memphis, joins Frances, Morris & Evans to head TV-radio operations. . . . Bob Kroll resigns as TV copy director of Warwick & Legler to join Donahue & Coe in TV dept. supervisory post.

New and Upcoming Stations: WBOY-TV, Clarksburg, W. Va. (Ch. 12), opening new market in rich coal and gas area, began operation Nov. 15 with NBC-TV & ABC-TV. It's 36th starter for year, brings on-air total to 518 (91 uhf). It has 10-kw transmitter with 25-kw RCA amplifier and 380-ft. Ideco tower with 6-bay superturnstile antenna on Pinnickinnick Mt. It's part of Friendly Group (Jack N. Berkman, pres.; John J. Laux, exec. v.p.), which also operates radio WBOY; WSTV-TV, Steubenville, O. (Ch. 9) & WSTV; KODE-TV, Joplin, Mo. (Ch. 12) & KODE; radio WPIT, Pittsburgh and WPAR, Parkersburg, W. Va.—and is buying KMLB, Monroe, La. George Clinton, also managing WPAR, is gen. & sales mgr.; Rex King, from WSTV-TV Pittsburgh sales office, regional sales mgr.; Peter Lyman, production mgr.; Vilah G. Brooks, WPAR, chief engineer. Base hour is \$250. Rep is Avery-Knodel.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KRSD-TV, Rapid City, S.D. (Ch. 7) is wiring 5-kw DuMont transmitter, plans test patterns by end of Nov., programming shortly after, although network affiliation hasn't been signed, reports partner & gen. mgr. Eli Daniels, who with John & Harry Daniels also holds CP for KDSJ-TV, Deadwood, S. D. (Ch. 5). It will be Rapid City's second outlet, KOTA-TV (Ch. 3) having started in May 1955. RCA 6-bay antenna has been installed on 370-ft. Ideco tower. Base hourly rate hasn't been set. Rep not chosen.

KNME-TV, Albuquerque, N.M. (Ch. 5, educational) will get transmitter from KOB-TV (Ch. 4), hopes to be on air early 1958, reports Bernarr Cooper, director of TV-radio for grantee U of New Mexico. It has reconstructed

one-story building to house 2 studios, control room, film room and offices, will use auxiliary tower of KOB-TV on Sandia Crest. Mrs. Harris Hester will be production asst.; Vorce McIntosh, ex-WTTW, Chicago, chief engineer.

KVKM-TV, Monahans, Tex. (Ch. 9) hasn't ordered equipment or begun construction, but has changed target to June 1, 1958, writes pres. J. Ross Rucker.

CHCA-TV, Red Deer, Alta. (Ch. 6) plans mid-Nov. test patterns, Nov. 20 programming reports pres. & mgr. G. A. Bartley. It has studio-transmitter house ready and awaits delivery of 5-kw GE transmitter. It has footings installed for 300-ft. Wind Turbine tower. It will use Andrews standby antenna until arrival of two-slot coaxial antenna next spring. Base hour will be \$100. Rep not chosen.

CKRN-TV, Rouyn, Que. (Ch. 4) has changed target to Christmas from Nov. 15, reports pres. David A. Gourd. It has studio-transmitter building nearly completed for 35-kw GE transmitter due shortly. It will have 670-ft. Wind Turbine tower with 5-bay antenna. Base hour will be \$160. Reps are Weed and Joseph Hardy & Co.

— ■ —

Katz Agency appoints 3 new v.p.'s in extension program including scheduled N. Y. move next March 1 from 477 Madison Ave. to 50% larger quarters at 666 Fifth Ave., addition of 20 to rep sales staff by March 15. Scott Donahue Jr. is named TV sales v.p., Morris S. Kellner radio sales v.p., Daniel Denenholz research-promotion v.p.

RCA shipped 6-section superturnstile antenna Nov. 12 to upcoming KDUH-TV, Hay Springs, Neb. (Ch. 4), due in Dec. as satellite of KOTA-TV, Rapid City, S.D.

Canadian satellite application for Ch. 75 at Clermont, Que. by Societe Video de Clermont has been added to agenda of Dec. 6 meeting of CBC Board of Governors.

New reps: KPTV, Portland, Ore. to Katz Nov. 15 (from Hollingbery); upcoming KTVU, Oakland-San Francisco (Ch. 2), due next spring, names H-R Television.

Radio Sales Approved by FCC: WTRY, Troy, N. Y. by Mowry Lowe, Kenneth M. Cooper, C. George Taylor & Robert T. Engles for \$1,400,000 to Victor W. Knauth & Daniel W. Kops (Vol. 13:31) . . . WDLP, Panama City and WCOA, Pensacola, Fla. by Perry Enterprises Inc. for \$400,000 (\$150,000 for WDLP, \$250,000 for WCOA) to Dixie Radio Inc. (Denver T. Brannen) . . . KRIZ, Phoenix, by Howard Loeb for \$215,000 to ex-Sen. Burton K. Wheeler and sons (Vol. 13:39) . . . WKIX, Raleigh, N. C. by WNAO-TV for \$168,000 to Ted Oberfelder & Lou Randell (Vol. 13:27) . . . WMOU, Berlin and WJWG, Conway, both N. H., by John W. Guider for \$165,000 to Richard P. & Virginia A. McKee, ex-owners of KOWB, Laramie, Wyo. (Vol. 13:40) . . . WTAQ, La Grange, Ill. 50% by Russell G. Salter for \$137,500 to Charles F. Sebastian, who becomes 100% owner (Vol. 13:30) . . . KOWB, Laramie, Wyo. by Richard P. McKee for \$108,000 to Richard K. Power & John Hunter, owners of WAVN, Stillwater, and WCMP, Pine City, both Minn. (Vol. 13:42) . . . KENL, Arcata, Cal. by Vern Emmerson for \$100,000 to Mel Marshall (Vol. 13:40) . . . WLBG, Laurens, S. C. by Laurens-Clinton Bestg. Co. for \$63,000 to Charles W. Dowdy (Vol. 13:42) . . . WIPA, Annapolis, Md. by WASL Bestg. Co. for \$49,200 to Robert J. Kent, USIA employe (Vol. 13:39).

Special ABN show demonstrating network's "all-new 3-dimensional live radio" (Vol. 13:42) will be staged Nov. 26 at Hotel Plaza, N. Y., for affiliates, advertisers, agency executives, NARTB pres. Harold E. Fellows opening show.

Report of Radio Station Sales: KITO, San Bernardino, Cal. by Frank Oxarart, Albert Zugsmith and John D. Feldmann for \$200,000 to owners of KWKW, Pasadena, headed by Marshall S. Neal . . . WROB, Daytona Beach, Fla. by Jim McDonough & John Murphy for \$145,000 to Radio of Daytona Inc., headed by Morton Bassett of rep John Blair & Co. McDonough will own 20% of new corporation (brokers Allen Kander & Co. and Chapman & Co.) . . . WGKV, Charleston, W. Va. by Jacob & Walter Evans for \$77,500 to Joseph L. Brechner, who recently sold interest in WGAY, Silver Spring, Md. (Chapman & Co.) . . . KASI, Ames, Ia. by Wm. Rupe, publisher of *Ames Tribune*, Hollis Nordyke, *Tribune* business mgr. & Arthur Skinner, KASI gen. mgr. for \$57,000 to Bill Evans, ex-WIND announcer (Allen Kander & Co.) . . . KUSN, St. Joseph, Mo. by J. D. Spears for \$50,000 to W. N. Schnepf (mgr. of KWMT, Ft. Dodge, Ia.) and associates (Blackburn & Co.) . . . WMGE, Madison, Ga. by W. C. Woodall Jr. and associates for \$30,000 to Howard C. Gilreath and F. K. Graham (Chapman & Co.) . . . KRCT, Pasadena, Tex., 93% by W. D. Christmas for \$175,000 to v.p.-gen. mgr. John H. Touchstone (present 7% stockholder) and Leroy J. Gloyer, who will each own 50%.

— ■ —

Baby bonus consisting of one-year university scholarship has been awarded by radio KFAB, Omaha, to daughter of Mr. & Mrs. Valere Thaden who was born at 11:10, station's frequency, on Nov. 10. Thaden is engineer for competitive WOW-TV.

Compromise on Illegal Boosters? One of nagging problems FCC has to face up to is unlicensed vhf boosters. Factors under consideration: (1) Real desire of isolated westerners to continue service now obtained without Commission's blessing. (2) Pressure by western congressmen to legitimize boosters. (3) Danger to other services, such as air navigation "Z markers", produced by uncontrolled re-radiation. (4) Opposition from community antenna operators who visualize boosters cutting them out. (5) Concern of telecasters that boosters will produce more harm than good. (6) Court of Appeals decision distinctly sympathetic toward booster operators. (7) Comr. Craven's suggestion boosters be considered part of receivers, thus exempt from licensing.

Commission had assumed its uhf translators were answer to booster operators' needs, but latter didn't agree—because of costs. FCC then came up with vhf booster rule-making—this likewise considered too costly, in fact, more expensive than translators. Deadline for comments on rule-making is Dec. 15—and everyone is marshaling forces. Political forces on side of boosters are so great that eventual upshot is expected to be compromise allowing some form of vhf booster.

Station Sales Decreed: Sale of TV-radio properties by *Kansas City Star* is required by terms of anti-trust consent decree filed Nov. 15 by Justice Dept. in U. S. District Court, Kansas City, settling Govt.'s civil case against newspaper and WDAF-TV & WDAF. Decree had been anticipated since rejection by Supreme Court in June of appeal by *Kansas City Star Co.* from conviction on criminal monopoly charges (Vol. 13:25). *Star* not only agreed to dispose of WDAF-TV & WDAF to buyers who have no connection with company but to stay out of commercial broadcasting business in Kansas City area. Newspaper and its officials are barred from acquiring any interest in any area TV or radio station without court approval. Negotiations for sale of WDAF-TV & WDAF started in advance of Supreme Court action and were continuing this week, but no deal was reported imminent. Harold F. Gross interests (WJIM-TV & WJIM, Lansing) were active in bidding for *Star* stations earlier (Vol. 13:21), when \$10-\$12,000,000 asking price was reported. It was understood Gross no longer is in market for properties, however. In addition to selling stations, *Star* agrees in consent order to halt alleged discriminatory practices against advertisers. "Divestiture of the radio & TV stations should increase competition in the dissemination of news & advertising," Asst. Attorney General Victor R. Hansen said after decree was filed.

WDMJ-TV, Marquette, Mich. (Ch. 6), applying for permission to take over CP for WJMS-TV, Ironwood, Mich. (Ch. 12), contingent on grant of private intercity relay so WJMS-TV can be operated as satellite (Vol. 13:29), shows \$16,047 in retained income on June 30 balance sheet. It has \$109,388 current assets, \$438,239 fixed assets; \$95,936 current liabilities, \$401,314 other liabilities (notes & mortgages payable).

MBS is buying Don Lee network radio affiliation & advertising contracts from parent RKO Teleradio Pictures, which sold Mutual itself in Aug. to group headed by Paul Roberts & Armand Hammer (Vol. 13:32).

CPs authorized this week: Mitchell, S. D., Ch. 5, KORN; Ch. 74 translator in Paradise Valley-Golconda, Nev.; Ch. 70 translator in Gallup, N. M.

Initial decision looking toward grant of Ch. 11, Provo, Utah, was issued this week following dropout of competitor Jack A. Burnett, who gets \$3500 for expenses.

Texas Tech CP for Ch. 5, held up by FCC (Vol. 13:43), should be liberated, KCBD-TV told Commission—asserting that its \$30,000 gift to college has no strings attached and stating belief KDUB-TV's donation was given with same understanding.

CPs cancelled for lack of prosecution: WPKN, Pekin, Ill. (Ch. 69); KABL-TV, Helena, Mont. (Ch. 10).

First border TV allocations confab in years starts Nov. 18, as Mexican officials come to Washington to discuss uhf assignments. Mexicans initiated talks, and no complications are expected. Comr. Hyde will represent U. S.; Carlos Nunez, Mexico.

FCC allocations actions: (1) Proposed addition of Ch. 13 to Panama City, Fla. (2) Denied petition for reconsideration of action denying petition of WJHP-TV (Ch. 36) to commercialize Ch. 7 in Jacksonville or remove Ch. 12. (3) Denied petition for reconsideration of action shifting Ch. 7 from St. Cloud to Alexandria, Minn.

Educational WQED, Pittsburgh (Ch. 13) sought shift of Ch. 22 from Clarksburg, W. Va. to Pittsburgh, presumably would apply for Ch. 22 in lieu of the Ch. 47 it now seeks as second educational station in city.

Merger terms for WARM-TV, Scranton, Pa. (Ch. 16) and WILK-TV, Wilkes-Barre (Ch. 34) in transaction whereby Transcontinent TV Corp. acquires 60% control (Vol. 13:42), are revealed by transfer application filed with FCC. WILK-TV goes off air and all properties (except radio WILK, retained by owners) are turned over to new Northeastern Pa. Bestg. Inc., which takes over WARM-TV & WARM, increases stock from 2000 shares at \$50 per share to 14,000 at \$25. Owners of WILK get 2800 shares (20%) of Northeastern, plus \$280,000 in subordinated 10-year notes and 2100 shares of Class B Transcontinent stock. WARM-TV owners get 2800 shares (20%) of Northeastern; in addition, Wm. W. Scranton, WARM stations' principal owner, gets \$260,000 in subordinated 10-year notes. Transcontinent acquires 8400 shares (60%) of Northeastern for \$105,000 cash (to be used as working capital) and 4200 shares of Transcontinent stock. Wm. W. Scranton, who will own 15.8% of Northeastern, has commitment to buy \$100,000 worth of Transcontinent stock and 5% convertible debentures after merger is consummated. WARM stations Aug. 31 balance sheet shows \$123,428 deficit from Jan. 1 to Aug. 31, deficit up to Jan. 1 being \$608,512. They had \$55,412 current assets, \$344,761 fixed assets; \$243,048 current liabilities, \$766,451 long term liabilities.

Control of KFYR-TV, Bismarck (Ch. 5) & KFYR, KUMV-TV, Williston (Ch. 8) and CP for KMOT, Minot (Ch. 10)—all N. D.—passes from Etta Hoskins Meyer to daughter Marietta Meyer Ekberg, FCC having approved transfer (Vol. 13:43). Mrs. Ekberg will own 63.83%; husband Wm. A. Ekberg, pres.-gen. mgr., .04%; Marietta Meyer Ekberg trust, 35.38%.

Cancellation of sale of KOVR, Stockton, Cal. (Ch. 13) for approximately \$3,500,000 to Lowell Thomas interests, already approved by FCC (Vol. 13:39), was announced, tight money market cited as major reason. Plans for either selling or retaining station by H. Leslie Hoffman's Television Diablo not yet indicated.

Color Tape Order: First TV station to own RCA color video tape recorder will be WBTV, Charlotte, N. C. (Ch. 3), which has ordered one of the custom-built prototypes RCA is making in advance of production. Company plans to start delivery of production models late next year (Vol. 13:43, 45).

WBTV exec. v.p.-gen. mgr. Charles H. Crutchfield announced his station's order for the color recorder—which will actually be 7th machine to be built, since NBC will install first 6 in its west coast "Tape Central" for Daylight Time and west coast program repeats. Since RCA plans to complete its 6th machine before start of Daylight Time in April, it's good guess that WBTV's recorder will be delivered next spring.

Crutchfield revealed his station is paying "in excess of \$100,000" for the prototype recorder. No cost has been announced for either the pre-production or production models (although RCA said production recorders would be less than \$100,000). Ampex delivered 13 pre-production prototypes of its monochrome recorder at about \$75,000 each, now is making production models to sell at \$45,000. Crutchfield described RCA color recorder as being 7 ft. high and 13 ft. wide.

RCA hasn't revealed how many prototypes it will build and sell—but announcement of its color tape recorder plans are expected next week.

In another move designed for greater color TV flexibility, RCA this week announced new image orthicon tube designed for color cameras (RCA-7037) with "more than twice the average sensitivity of any previous color image orthicon," longer life and better spectrum response. It's interchangeable with present types and because of its sensitivity will make possible reductions in cost of studio lighting and air conditioning as well as permitting greater freedom in staging and lighting techniques.

International TV may draw nations of world closer together, FCC chairman John C. Doerfer told New Orleans Chamber of Commerce Members Council Nov. 14, and "may overcome eventually not only language difficulties, but slanted or even false interpretations by wilful or irresponsible individuals." "I am sure," he said, "that if the people of Russia knew how the people of America really live, think and feel towards them and others there would be little difficulty in reaching disarmament agreements . . ."

Close regulation of boosters, satellites, translators and similar radiating devices to avoid interference with TV reception was urged in resolution unanimously adopted by NARTB Engineering Advisory Committee in Nov. 14 Washington meeting. In other actions, Committee (1) Named subcommittee to prepare questionnaire for radio stations on program line service. (2) Agreed to consider establishment of industry-govt. committee to prevent overhead power line interference to radio reception.

All 4 Australian commercial TV stations have announced 20% rate boost in attempt to cut losses. Govt. has announced it will accept applications for commercial outlets in Brisbane and Adelaide, but experience of the stations in Melbourne and Sydney has made entrepreneurs wary, and no rush of applications is anticipated.

Conelrad Status: Cooperation of state and local civil defense authorities with TV-radio stations in emergency planning isn't what it should be, Comr. Lee, FCC's defense commissioner, implied in Nov. 14 address to National Assn. of Civil Defense Directors in Washington. Commission has found that "approximately one-half of the 1237 voluntarily participating broadcast stations in the Emergency Broadcasting System either have not been contacted by Civil Defense or have no programming plans at the local level, although these facilities have been available since early 1951," he said. "We find it increasingly difficult to explain to a very cooperative industry that they must continue to be adequately prepared in the event of a national emergency, although many of the individual broadcasters have no Civil Defense programming or guide lines." Other points made by Comr. Lee: (1) FCC & Defense Dept. have been studying possibility of permitting all stations to use special Conelrad "alert attention signal" preceding dissemination of such emergency weather warnings as hurricane and tornado alerts. Such action, he said, may provide "incentive to manufacturers to produce and distribute automatic Conelrad alert receivers at a reasonable price for use by the general public." (2) Conelrad system provides "good understandable signal" to more than 70% of continental U. S. population, as compared with about 90% of population receiving same quality signal from normal standard broadcast service.

Backstage union hassle which disrupted some NBC-TV programs and brought picketing of network's studios last week end (Vol. 13:45) was submitted Nov. 12 to binding arbitration by AFL-CIO pres. George Meany. Radio & TV Directors Guild and National Assn. of Broadcast Employes & Technicians, fighting over issue of who should give direct instructions to cameramen and other crewmen, agreed after 3-hour huddle with Meany in N. Y. to return to status quo pending his ruling. Trouble started when RTDG invoked contract clause permitting program directors to bypass NABET technical directors in giving cues to crews. AFL-CIO chief promised prompt decision on jurisdictional question.

WKRG-TV, Mobile, Ala. (Ch. 5) & WKRG are being transferred from WKRG-TV Inc. to new Giddens Television Inc., in which pres. & 20% owner Kenneth R. Giddens will hold 50%, *Mobile Register* and *Press* 50%—latter to dispose of radio WABB. Newspaper is paying \$1,050,000 for its 50%. Giddens is turning his 20% of stock over to new corporation as well as option to purchase 80% of WKRG-TV Inc. Giddens Television Inc. is to borrow \$130,000, to be used with monies from newspaper to compensate other WKRG-TV Inc. stockholders. Giddens will remain pres., also become gen. mgr. Ralph B. Chandler is pres. & publisher of *Register* and *Press*.

Add CC-TV uses: (1) Roulette over closed circuit TV will be feature at Riviera Hotel opening in Havana next month. Two-way hook up from casino to rooms will permit guests to watch the wheel and call bets. (2) TV cameras instead of guards now installed to watch cell blocks in Dallas. (3) Tennessee Coal & Iron div. of U. S. Steel has used TV to check dump operations at the 1030-ft level of its Winonah No. 11 mine since first of year.

Loew's Inc. (MGM) has let option expire on purchase of 25% of KTVR, Denver (Ch. 2); Loew's holdings consist of 25% of KTTV, Los Angeles (Ch. 11) and KMGM-TV, Minneapolis (Ch. 9).

Add cable movie applications: Televents Inc. seeks franchises (Vol. 13:41, 43, 45) in Salt Lake City, Ogden, Provo, Utah. Firm is headed by Bill Daniels, Casper, Wyo. CATV operator and former NCTA pres.

TV-Radio Taxes Voted: Special municipal taxes on TV-radio-newspaper advertising (Vol. 13:45) were approved this week by Baltimore City Council despite barrage of protests fired from all sides at hearing on ordinances to raise extra money for budget.

Council backed down part way Nov. 15 by agreeing 14-6 to cut 3½% from proposed 7½% tax on all advertising sales within city, making it 4%, but insisted on retaining equally-criticized plan for 2% levy on gross receipts of stations & dailies. Court challenge of 6% assessments seemed certain.

Even chairman Joseph Sherbow of Mayor Thomas D'Alesandro's own Special Tax Commission denounced projected ordinances as "invalid & unconstitutional." He told Council's budget & finance committee that it had no legal precedent for 7½% sales tax on time & space bought from newspapers & stations—plus 2% tax on advertising receipts of media.

Already denounced by TvB pres. Norman E.

Jail sentence of 10 days for contempt of court was imposed Nov. 12 on *N. Y. Herald Tribune* TV-radio columnist Marie Torre by N. Y. Federal Judge Sylvester J. Ryan for continuing refusal to identify CBS source of item she wrote (Vol. 13:42-45). She was immediately released in own recognizance pending appeal to U. S. Court of Appeals. Judge Ryan said Miss Torre "has no legal support" for withholding information in District Court proceeding from actress Judy Garland in \$1,393,333 libel suit against CBS. He noted at same time that columnist intended "no personal affront of the dignity of the court" in protecting her news source.

"Blue sky claims of TV" for advertising effectiveness can be answered by newspapers which use *Chicago Tribune* yardstick showing dailies out-perform TV at lower cost per 1000, Nov. 9 *Editor & Publisher* says. Explained in detail by *Tribune* adv. director Walter C. Kurz, newspaper-TV measurement method involves 3 levels of audience & readers: "coverage or circulation," "attention," "advertising message." Tables based on Nielsen & Hooper TV surveys and Starch studies of *Tribune* readership are represented as proving, e. g., that "advertising message" in 30-min. TV crime show costs \$13.99 per 1000, whereas ½-page newspaper ad achieves same results for \$4.10. *Tribune* owns WGN-TV.

Don't weep for movies, producer Jerry Wald told American Society of Cinematographers in Hollywood Nov. 11, asserting that despite TV they're still "the leading entertainment medium throughout the world." There are "too many pallbearers eager to reach for a coffin that, fortunately, hasn't been built yet," Wald said, adding that "with a maximum of considered opinion and a minimum of snap judgment, we can make our 'healthy invalid' even healthier."

Radio rep business is booming so fast that bigger firms "are bigger than some, if not most, of the radio networks," Nov. 11 *Advertising Age* says, estimating spot sales this year at \$200,000,000 vs. record volume of \$149,921,000 in 1956. Lengthy roundup by magazine lists John Blair & Co., Peters, Griffin, Woodward, Katz Agency, Henry L. Christal Co., Edward Petry & Co. among top radio reps, estimates that they account for about 32% of market.

Cash as "revolutionary," tax scheme by D'Alesandro's administration to raise \$4,200,000 to balance \$232,000,000 budget next year also was scored by 20 other witnesses at hearing.

Wm. D. McMillan of Baltimore Sunpapers (WMAR-TV) predicted special taxes, if enacted, would be upset in any court challenge. He cited 1936 Supreme Court decision which killed advertising tax imposed on certain La. newspapers by Gov. Huey Long.

Spokesmen for AFL-CIO joined in attack, calling proposed levies "hidden tax" which consumers would end up paying, urging instead that property tax rate be raised if extra city revenue was needed.

Chief defender of scheme was City Council pres. Leon Abramson, who denied proposals were advanced "out of anger" because *Baltimore Sun* had criticized Council's budget-cutting efforts. Hugo A. Ricculi, city's deputy solicitor, said news accounts of Council's tax proposals had been distorted.

Spot Expenditures Up: Third quarter spot TV expenditures totaled \$93,094,000 for 325 stations reporting in TvB-Rorabaugh quarterly report, up nearly \$10,000,000 over same quarter and indicating increase for first 9 months of more than \$39,000,000. Additions to top 100 spot advertisers were Atlantic Refining (\$241,800), Ex-Lax (\$199,500), General Cigar (\$215,200), Harrison Labs (\$210,000), Kroger (\$193,400), National Brewing (\$282,000), Regal Pale Brewing (\$215,900), George Wiedman Brewing (\$251,000), J. B. Williams (\$343,500). Major product classifications showing biggest third quarter increase over 1956: Household cleaners, cleansers, polishes & waxes, from \$592,000 to \$1,099,000; household laundry products, \$3,284,000 to \$5,321,000; cosmetics & toiletries, \$8,950,000 to \$13,367,000; automotive, \$1,827,000 to \$2,501,000; gas & oil, \$3,908,000 to \$5,070,000; beer & wine, \$8,463,000 to \$10,211,000. Top spot TV advertisers in third quarter were Procter & Gamble (\$7,306,600), Brown & Williamson Tobacco (\$2,982,500), Continental Baking (\$2,439,600).

Single program effect on consumer, based on Oct. 13 Crosby-Sinatra program (Edsel), is described by TvB as significant research instrument, giving advertisers "technique for measuring basic effectiveness of their advertising." Study by Qualitative Research Inc. reported "public's favorable attitude toward the Edsel doubled as the result of their single TV program," jumping from 17.3% before show to 35.6% after. Complete copy of report may be obtained from TvB, 444 Madison Ave., N. Y.

"Dangerous stagnation" exists in advertising business, ABN pres. Robert E. Eastman told Philadelphia Advertising Club Nov. 13 in Hotel Barclay. "There is too much follow-the-leader, like sheep, with clients & agencies," he said, urging industry to "break out of the bonds of sameness," find better selling methods.

Network TV advertising was up 4.5% in first 8 months of 1957 vs. 1956, according to Nov. 8 *Tide* index of national volume. Business papers were up 9.6%, general magazines 4.5%, outdoor 2.6%. Newspapers were down .2%, farm publications 1.4%.

Warner Bros. opens new N. Y. headquarters at 666 Fifth Ave. Dec. 2 after move from own W. 44th St. building it has occupied since 1928.

No Hitting Below the Limen: NARTB TV code review board, meeting in Beverly Hills this week, added its voice to the furor over subliminal advertising (Vol. 13:45) by adopting statement that "experimentation or use of the process should not be permitted on the TV broadcast medium pending . . . review and consideration." It requested code subscribers to refer to it immediately "any proposals to use the TV medium in the process."

FCC's study of subliminal advertising and its possible applications—initiated at request of congressmen—continued this week, and it was expected that report would be issued in week or 2. There were indications that investigation had been dragged out longer than expected because of Commission's difficulty in obtaining cooperation of promoters of subliminal advertising.

In Canada, CBC board chairman Davidson Dunton announced that such hidden advertising would "not be permitted on CBC stations," though board may possibly review situation later.

Withdrawal of identification with anti-war program Nov. 10 on WCBS-TV, N. Y., was ordered by N. Y. Public Library because it wanted to avoid involvement in "sensitive area." Veterans Day show, "Faces of War," had carried notation in script that it was "prepared for the N. Y. Library" which helped gather quotations from Euripedes, Homer, Shakespeare, Stephen Crane, Mark Twain, Walt Whitman. But Library pres. Morris Hadley objected, explaining: "In any sensitive area we try to make the material available, but then we say, 'The product is yours, not ours.'" Show produced by Metropolitan Educational TV Assn. featured biographer Mark Van Doren, *Saturday Review* editor Norman Cousins, anthropologist Dr. Margaret Mead, author James Jones.

NBC's answer to old movies—Jack Parr *Tonight* show—Nov. 8 reaped "largest amount of business ever recorded by NBC-TV's partic. programs in a single day." More than \$4,000,000 in gross billings in single day were headed by Block Drug order for 234 partics. in 52-week period, with Bristol-Myers (208 partics.), Norelco (115), Harrison Labs (42), Polaroid (40), Tintair (26) and Webcor (21) signing up same day.

TV "blessings" are underplayed by industry, senior v. p. & TV-radio director Nicholas E. Keeseley of Lennen & Newell said in speech read to N. Y. chapter of Academy of TV Arts & Sciences this week. Stating that TV belongs to viewers, not critics who attack programming trends, he said that public has shown that it likes westerns and other shows it's getting, urged industry to join in campaign to "talk up" excellence of entertainment.

Flood of "horror" films to TV prompted NARTB TV code review board to call its subscribers' attention to section of code admonishing against "use of horror for its own sake" in TV production.

Filmed report on closed-circuit educational TV project in Hagerstown, Md. schools was carried Nov. 15 on NBC-TV's *Today*, reporter Joe Michaels covering story of success in teaching 4th grade arithmetic class.

TV career guide—*How to Get into Television* (189 pp., \$3.75, Sheridan House, N.Y.) by Robert Spencer Solotaire—includes case histories of TV successes, lists requirements & opportunities for writing, acting, directing.

Catholics "Guard" TV-Radio: Moral guard over TV-radio must be maintained in U. S. by Catholic Church, American bishops said in 2400-word joint statement issued Nov. 16 following 3-day meetings at Catholic U, Washington. Implementing encyclical on censorship propounded Sept. 11 by Pope Pius XII (Vol. 13:37), 14 bishops speaking for 136 dioceses & archdioceses set up no new agency to review & evaluate programs. But they said already-established National Legion of Decency (for movies) and National Office for Decent Literature (for books & periodicals) must "be watchful over the fields of radio & TV," that agencies "must be prepared to meet a continuing evil with an unremitting effort." No type of TV or radio broadcast was mentioned by bishops as objectionable, most of statement being development of thesis on Catholic authority: "Morally, the Church can & does exercise what is called censorship. This right is hers from her office as teacher of morals and guardian of divine truth." However, statement excoriated "vicious & evil publications," deplored producers of movies offensive to Catholics. In Rome meanwhile, Sacred Congregation of Rites was considering proposal to establish St. Clare of Assisi as patron saint of TV. If approved, designation would be based on 13th century incident in which witnesses declared that St. Clare, after prayer from her sickbed, was able to hear & see midnight mass in Basilica of St. Francis 1½-mi. away.

Crash landing of RCA plane Nov. 8 resulted in superficial cuts and bruises for pilot and copilot, no injuries to pres. John L. Burns, T. A. Smith, exec. v.p., industrial electronic products, 2 acquaintances of Burns. Plane was returning from Detroit, had almost touched down at Westchester (N. Y.) County Airport when struck by strong gust of wind, causing one wing to hit ground. Plane finally landed on nearby highway.

Canadian microwave network is being extended Nov. 24 to CHCT-TV, Calgary; CFRN-TV, Edmonton; CJLH-TV, Lethbridge; CHAT-TV, Medicine Hat (for one month); Dec. 1, CFCY-TV, Charlottetown. CBC-TV and Trans-Canada Telephone said microwave link between Quebec & St. John, N. B., is scheduled for Feb. 2 completion, extending live TV from Edmonton to Charlottetown.

Piracy suit for \$2,500,000 against NBC was filed Nov. 12 in U. S. District Court, Pittsburgh, by Pittsburgh TV producer Barry Farnol, who claimed NBC-TV's *What's It For?* (Sat. 10-10:30 p. m.) stole his ideas. He said new Hal March quiz show is "intentional duplication" of copyrighted program with same name which he "conceived, developed & produced" Aug. 19, 1952 but failed to sell.

NARTB reverts to original NAB, the National Assn. of Broadcasters, Jan. 1 as result of mail ballot which found 1227 members favoring switch, 35 opposed. NARTB board approved change last June, subject to referendum.

DuMont's ITV distribution is extended to 84 markets with appointment of 3 outlets: Alltronic Supply Inc., Amarillo; Flagler Radio Co., Miami; Torrence Sound Equipment Co., Toledo.

Broadcast Pioneers is new name of 14-year-old Radio Pioneers, as result of membership referendum. Group plans to start new-member drive, set up local chapters. Broadcasters with at least 20 years in industry are eligible.

NTA sets up London subsidiary, NTA (U.K.) Ltd., to supply TV & theatrical film, engage in production. British TV pioneer Vernon Burns, who formerly headed Television Programmes (Distributor) Ltd., will head office.

Eiffel Tower is now topped by new TV transmitting antenna—increasing height by 30 ft. to 957 ft. (compared with Empire State Bldg.'s 1472 ft.).

PROBING FOR ULTIMATE IN SET SLIMNESS: With real design ingenuity, Sylvania has taken unique step in the slimness trend in coming out with its much-heralded new 21-in. 110-degree-tube "Sylouette" receiver, shown in N.Y. this week.

Illusion of much slenderer look is unquestionably quite effective, and Sylvania maintains that its pre-testing indicates warm consumer reaction. Good index of whether Sylvania's experiment is paying off will come if competitors bring out similar designs in drop-in and new-line models early next year.

Though Sylvania doesn't say so, Sylouette looks as if it might well be result of motivation research findings that American public, obsessed with obesity and dieting, wants to surround itself with slim-looking objects. Just a guess.

Here are the Sylouette vital statistics: cabinet 10-in. deep (vs. 13½-17 in. for most other 110-degree sets), tube projects 4-in. in front of cabinet, "boxed" in by picture frame-like arrangement, about 3-in. tube cup in back. It's 36½-in. high, 34-in. wide, uses standard 110-degree tube.

Set is top of the Sylvania line. No recommended list is given, but we're told it will sell for about \$400, will be in retailers hands in a week. It includes such features as larger "Halolight," wood cabinets, 3 speakers, sliding top concealing controls, "Magic Touch" station selector, brass legs with shelf for plants, etc. -- available in mahogany, limed oak, walnut.

Sylvania executives seem genuinely excited about the set. Says Marion E. Pettegrew, TV-radio div. v.p.-gen. mgr.: "This will present an opportunity to determine the public's reaction to an ultra-modern set." Original production order has been increased sixfold, according to gen. sales mgr. Robert L. Shaw, who asserted distributors gave it "overwhelming acceptance" at confidential showings. Shaw said set will provide satisfactory profits all down the line.

Spokesman said that survey of 3000 vacationers at a resort last summer showed 7 of every 10 persons preferred Sylouette over 2 other 21-in. 1958 consoles, one of which was a Sylvania.

Turning to other Sylvania and industry trends, Shaw stated: (1) Sylvania will double share of TV market this year, double it again in 1958. (2) Nothing in economic picture appears likely to disturb TV market. (3) Color is relatively static, won't move until price is down to about \$350. (4) Picture-on-the-wall is still some time off, with engineers working on problems of scanning speed & "hold." (5) "In January, we'll show something else we have up our sleeves."

* * * *

Also in the "diet" field this week was word of work on a very short 90-degree tube. Leading proponent is National Video, whose pres. Asher Cole reports he's been working to shorten 90-degree ever since emergence of the 110-degree.

New 90-degree bulb is 16½-in. long, compared with 14½-in. 110-degree, 18-in. for previous short 90-degree. Reduction is accomplished by cutting neck length. New tube's neck is 4-in., vs. 5½-in. for previous short 90-degree, 7½-in. for original 90-degree. Reportedly, 110-degree can be shortened similarly.

Price of new 90-degree tube, Cole says, will continue at \$1.50 below 110-degree -- will also permit set makers to "save quite a bit of money in sweeping it and in circuitry." Cole declined to disclose names of set manufacturers with whom he's been working on tube. Motorola consumer products exec. v.p. Ed Taylor says he's interested in tube "only as a possibility;" that 110-degree is also being explored -- company still determining next move. Currently, Motorola uses 110s only in one portable. Zenith is also said to be interested in new 90-degree unit.

RCA asserts it's happy with the 110, D. Y. Smith, v.p.-gen. mgr. of tube div. stating: "RCA feels that the 110-degree short tube has many distinct advantages, for example, a lighter weight bulb, efficiency of deflection power due to the narrow neck design, and excellent resolution, and small area contrast. Apparently the major claim to fame of the stub stub 90-degree tube is only in its attempt to match the reduction in overall length accomplished by the 110-degree tube."

Sylvania spokesman said: "We have developed some experimental models of the so-called 'very-short neck 90-degree picture tube.' We do not, however, see any great demand for this type of tube."

Tight Money Loosened: In surprise reversal of form, Federal Reserve System cut from 3.5% to 3% the discount rate often viewed by trade as primary thorn in side of business. Federal Reserve banks in N. Y., Richmond, Atlanta, St. Louis put cuts in effect Nov. 15; remaining 8 expected to follow. Rate has been upped 6 times as inflation curb since 1955, latest and biggest hitting last Aug. Commercial banks can now get money at lower rate, ease credit to both business & consumer, brighten prospect for availability of retail dollars in 1958.

Retail Sales Revision: Preliminary estimates of retail TV sales for Oct. indicate total somewhat under 600,000, including export, compared with about 700,000 sold in Oct. 1956. This brings year's 10-month total to about 5,100,000 vs. 5,400,000 same time year ago. Drop of 300,000 led industry statisticians this week to cut estimates of total 1957 sales to 6,500,000 from the 6,750,000 projected last month (Vol. 13:42). Total 1956 sales were 6,804,000. Inventories at end of Oct. stood at 2,600,000 vs. 2,700,000 same time last year.

Production: TV output was 138,831 for week ended Nov. 8 vs. 152,306 the preceding week and 176,626 in 1956 week. At end of 45th week, TV production totaled about 5,536,000 vs. 6,420,050 last year. Radio production was 390,435 (120,234 auto) for week ended Nov. 8 vs. 399,196 (131,327 auto) the preceding week and 335,630 (145,761 auto) in the 1956 week. By 45th week radio production totaled about 12,742,000 (4,631,834 auto) vs. 11,575,676 (3,912,481 auto) in 1956.

Trade Personals: Wm. J. Kleinknecht, ex-American District Telegraph Co., named asst. director, communications div., Business & Defense Services Administration, Commerce Dept. . . . S. F. Davies named marketing director, Westinghouse general products div.; L. H. Loufek, marketing director, apparatus products; R. M. Wilson, marketing director, defense divs. . . . Clarence D. Tuska named staff consultant, patents, RCA Labs; Olin V. Mitchell succeeds him as director, patent operations . . . Eric Thor appointed TV planning supervisor, electrical products div., Corning Glass, succeeding David A. Sheperd, now coordinator of new products div. . . . Fred J. Voght named production mgr., Hoffman TV-radio . . . Charles H. Strawbridge, ex-Brinkman adv. agency, joins Magnavox as sales promotion mgr., succeeding Dan Cavalier, resigned . . . Arthur C. McCarroll Jr., ex-Chrysler, named director of division & field relations, IT&T (public relations); G. Gayle Warnock, ex-Edsel div. of Ford, named news service director . . . S. Krinsky, ex-Chromatic TV Labs, appointed director new western engineering div., Telechrome Mfg. Corp., with headquarters at 13635 Victory Blvd., Van Nuys, Cal. . . . Marty Sheridan, ex-Admiral, named director for information & publications, New England Council for Economic Development . . . Wm. H. Fowler named exec. staff adviser & chairman of new expansion & diversification committee of Herold Radio & Electronics Corp. . . . Paul A. Severeid, ex-WTCN-TV, Minneapolis-St. Paul, named adv. mgr. of Dahlberg Co., Minneapolis (hearing aids and hospital TV & radio).

DISTRIBUTOR NOTES: RCA Victor Distributing Corp. names A. C. Nerness mgr. radio-phono-hi-fi dept. Los Angeles branch, succeeding Victor A. Croft, transferred to mgr. TV dept. Chicago branch; Michael Sanders mgr. housewares dept. . . . Jos. M. Zamoiski Co. (Zenith) Washington-Baltimore, promotes Harry Schwartz, sales mgr. Zenith div., to v.p. . . . Krich-N. J., Newark, names Norman Skier, ex-DuMont, adv. mgr. . . . GEA names Bernie Meseth district TV-major appliance sales mgr., Burlingame, Cal.; Ralph Mitchell Jr., northern Cal. TV sales mgr.; Walt Archer, Sacramento district TV sales mgr. . . . Hoffman appoints Merchandising Distributors, Inc. (Norge, Vornado, Sonic hi-fi), San Diego, for TV-radio-hi-fi in San Diego & Imperial counties, dropping its San Diego branch; in past 18 months, Hoffman has dropped branches in San Francisco, Sacramento, Fresno . . . Bell Sound Systems appoints Midstates Appliance & Supply, Springfield, Ill., and Carlton-Bates Co., Little Rock, for tape recorders & stereo accessories.

NARDA Institute of Management will be held July 21-26 next year at American U, Washington—faculty again including Dean Nathan A. Baily of School of Business Administration, Dr. Harold B. Wess, Prof. Wm. A. Davidson of Ohio State U.

Dorman D. Israel, Emerson exec. v.p., received first award for outstanding service from IRE professional group on broadcast & TV receivers, at radio fall meeting in Toronto Nov. 12.

Topics & Trends of TV Trade: Home appliances' share of purchase dollar in consumer product field has declined 2% since 1952 while automobiles' share has increased 13%, Mark W. Cresap Jr., Westinghouse exec. v.p., pointed out to NEMA convention in Atlantic City this week. Inflation, which has pushed costs up faster than prices, threatens research and expansion of electrical industry, he said. "Industry's declining margins and rates of return, if continued, may well at some point in future time dampen the enthusiasm of members of the investing community for the stocks of our companies."

Meanwhile, automobile production, viewed as indicator of fourth quarter and 1958 business, was up slightly for the weeks ended Nov. 9 (5,171,883 passenger cars vs. 4,806,824 in 1956 period) as TV & white goods production was down.

* * * *

NEMA officers elected at Atlantic City convention: Pres., W. V. O'Brien, GE employe communications v.p. & gen. mgr.; treas., Bret C. Neece, Landers, Frary & Clark pres. V.p.'s—John C. Sharp, Hotpoint pres.; A.D.R. Fraser, Rome Cable pres.; Frank H. Roby, Square D sales v.p.; J. L. Singleton, Allis-Chalmers v.p.; N. J. MacDonald, Thomas & Betts pres. James H. McGraw award for Electric Men was presented to Alvin N. Gray, Western Electric.

Contracts for 206 uhf-vhf sets for Philadelphia schools has been awarded to Raymond Rosen, RCA Philadelphia distributor, following start of WHYY-TV (Ch. 35, educational) in Sept. Some 400 sets are now being used in Philadelphia classrooms and some are being converted to uhf. By end of year, every Philadelphia school is scheduled to have at least one uhf-vhf set.

Record-of-the-Month plan, sponsored by RCA Victor and Book-of-the-Month Club, is scheduled for Jan. 1 start under name of RCA Victor Society of Great Music. Three or more Victor records are to be offered monthly, plus bonus records, following selection by independent panel.

ELECTRONICS PERSONALS: Wladimir A. Reichel, ex-General Precision Equipment, named Norden-Ketay senior v.p. . . . Dr. J. R. Madigan promoted to chief engineer, semiconductor div., Hoffman Electronics Corp. . . . Walter H. Powell elected v.p. of International Resistance Co. . . . Karl K. Kahler elected I-T-E Circuit Breaker v.p. for employe relations . . . David A. Thomas, ex-Babb Co. chairman & pres., joins RCA as mgr., industrial business development, new post in industrial electronic products . . . Charles R. Klinger appointed mgr., commercial administration, western area, RCA electron tube div., headquartering in Los Angeles . . . H. Thomas Maguire, ex-city editor *Lynn (Mass.) Daily Evening Item*, named New England editor, *Electronics* magazine.

P. R. Mallory & Co. acquires plant, facilities & major interest of Milli-Switch Corp., Santa Monica, Cal., maker of electronic switches. Milli-Switch will operate as subsidiary, move production equipment to Frankfort, Ind. plant of Mallory electronics div.

Combined offices of WESCON, Los Angeles section of IRE, and West Coast Electronic Mfrs. Assn. moves to 1435 La Cienega Blvd., Los Angeles, Dec. 1.

Donald S. Parris steps up from acting director to director of Electronics Div. of Commerce Dept.'s Business & Defense Services Adm.

RCA Christmas advertising plans include 2-page color insertion in Nov. 25 *Life* and Dec. 7 *Saturday Evening Post*, single pages in Dec. *Farm Journal*, *Sunset*, *Progressive Farmer*, *TV Guide*, Sunday supplements *This Week* and *Parade*. Color TV ad is scheduled in Nov. 23 *TV Guide*, Nov. 30 *New Yorker*, Dec. 2 *Sports Illustrated*, Dec. *Cosmopolitan* and *Atlantic Monthly*. Full page ad on TV with hi-fi and combination TV-hi-fi phonograph will appear in Dec. 9 *Life*. TV programs to be used include *The Perry Como Show*, the *George Gobel Show*, the *Eddie Fisher Show*, *Tic Tac Dough*, *The Price Is Right*. NBC's week end *Monitor* radio show also will be used.

Smaller and cheaper transistor radios may be heralded by RCA announcement that it has developed experimental pocket-size superheterodyne receiver employing only 5 transistors in reflex circuit. As described by RCA's Roger V. Fournier at Toronto IRE meeting, new circuit has higher sensitivity than standard 5-transistor radio, coupled with good frequency response over whole broadcast band. He said its performance compares well with receivers having more transistors, but offers reduction in size, cost and power requirements.

Reorganization at David Bogen Co. and Presto Recording Corp. follows resignation of Lawrence LeKashman as sales v.p. of both to rejoin Electro-Voice as sales v.p. Firms merge as Bogen-Presto div. of Siegler Corp., Lester Bogen pres. Mortimer Sumberg named distributor sales mgr. Bogen-Presto; Thomas L. Aye, professional product sales mgr.; David Pear adds sales promotion to duties as adv. mgr.; Thomas B. Aldrich resigns as Presto sales mgr.

Color distributor reports: In Philadelphia, Raymond Rosen & Co. ran full page Nov. 11 newspaper ad on color TV, saying 10,000 color sets are in use in area. In New Orleans, Walter Bros. reports 317 of 325 color set owners responding to questionnaire said they were sufficiently satisfied with sets to recommend them to neighbors.

New consumer magazine *Hi-Fi & Music Review*, will be launched Jan. 28 by Ziff-Davis with 100,000 circulation guarantee. Newsstand cost 35¢, editor Oliver P. Ferrell.

NARDA annual convention is set for Jan. 12-14 in Chicago.

First National City Bank's Nov. letter on business & economic conditions notes "widely mixed" results in industrial groupings among the 599 leading manufacturers whose third quarter and 9-month net incomes are tabulated. All 599 showed \$2,201,499,000 aggregate profit for 1957 quarter, up 13% from 1956 period; \$7,288,524,000 for 9 months, up 8%. Category of electrical equipment, radio & TV (29 unnamed firms) led all rest save tobacco products (up 26%) for third quarter, its \$104,513,000 up 23%; for 9 months it was far and away the top, its \$321,151,000 up 32% from 1956. (Complete report available from bank's head office, 55 Wall St., N.Y.)

Frequency requirements for mobile radio will be theme of 8th annual meeting of IRE Professional Group on Vehicular Communications Dec. 4-5 at Washington's Statler Hotel. Highlight of session will be panel discussion moderated by ex-FCC Comr. E. M. Webster and featuring FCC chief engineer Edward W. Allen Jr., Motorola exec. v.p. Daniel E. Noble, consulting engineer C. M. Jansky Jr., radio engineer Francis M. Ryan, Atlantic Refining Co. communications mgr. Mason S. Collett.

Changes at RCA industrial tube marketing activity: Clifford H. Lane named mgr., market planning; Max E. Markell, mgr., industrial sales; Clarence S. Rockwell Jr., mgr., market administration; James T. Wilson, mgr., contract admin.; Gene Rivers continues as govt. sales mgr.

Financial Notes: Officers-&directors stock transactions for Oct. as reported to SEC: Allied Artists—G. Ralph Branton bought 1900, holds 2200 in wife's account, 41,625 personally; Samuel Broidy bought 8000, holds 69,718; George D. Burrows bought 8000, holds 33,386; Sam Wolf bought 8500, holds 14,450. American Electronics—Warren H. Crowell bought 1000, sold 675 through Crowell Weedon & Co., holds 325 in Crowell Weedon, 4995 personally. Arvin Industries—Orphie R. Bridges bought 200, holds 940. Avco—Lloyd P. Smith bought 1000, holds 1500. Bendix Aviation—Raymond P. Lansing exercised option to buy 500, holds 5098; C. C. Tillinghast bought 200, holds 200. C&C TV—Matthew Fox sold 1000 by pledgee, holds 575,200 as collateral against loans. Consolidated Electrodynamics—Franklin H. Donnell sold 500, holds 12,000; A. Charles Schwartz sold 700, holds 200. Consolidated Electronics Industries—John Bentia bought 3000, holds 3000. Crowell-Collier—Armand G. Erpf bought 30,000, holds 35,600. Daystrom—Earl R. Mellen exercised option to buy 1000, holds 1536. General Dynamics—Allen D. Marshall sold 700, holds 7400; Frank Pace Jr. sold 5000, holds 39,780; Kenneth Stiles sold 700, holds 2300. GE—George E. Burens bought 1350, holds 5400; John D. Lockton bought 1500, holds 6519; H. A. MacKinnon exercised option to buy 300, holds 6227; Wm. Allen Mann bought 270, holds 880; Donald L. Millham exercised option to buy 2000, holds 8409. Hoffman Electronics—C. E. Underwood exercised option to buy 1500, holds 5500. P. R. Mallory—Harold C. Buell exercised option to buy 600, holds 1790. Minneapolis-Honeywell—John J. Wilson sold 6500, holds 65,070. Minn. Mining & Mfg.—Cyril P. Pesek exercised option to buy 600, holds 4501. National Theatres—Alan May bought 400, holds 800. RCA—Andrew Meyer bought 100, holds 9100. Republic Pictures—Herbert J. Yates sold 1000, holds 53,060. Sperry Rand—Francis J. McNamara sold 5000, holds 5500. Storer—Harry R. Lipson bought 100, holds 400. Unitronics—Abraham Cooper bought 367, holds 602. Zenith—E. F. McDonald Jr. bought 1100 through Seneca Securities Corp., holds 34,831 in Seneca Securities, 10,462 personally; Hugh Robertson bought 100, holds 1618; Joseph S. Wright bought 200, holds 510.

* * * *

Standard Coil reports net profit of \$257,634 (18¢ per share) on \$14,651,158 for quarter ended Sept. 30 vs. net loss of \$358,706 on \$15,392,295 in 1956 quarter. Pres. James O. Burke noted improved operating results were due mainly to extensive program which eliminated losses in tuner div.

Admiral Corp. earned \$461,391 (20¢) in quarter ended Sept. 30 on \$47,320,296 vs. \$43,974 (2¢) on \$48,370,663 last year. For 9 months, earnings were \$572,662 (24¢) on \$126,125,817 vs. \$1,792,029 (76¢) on \$134,204,988 in 1956.

General Precision Equipment earned \$954,725 (59¢ per share) on sales of \$45,327,615 for quarter ended Sept. 30 vs. \$613,901 (41¢) on \$35,579,263. For 9 months, earnings were \$3,616,977 (\$2.70) on \$138,627,292 vs. \$1,768,460 (\$.121) on \$109,703,459 in 1956.

General Transistor earned \$91,922 (30¢ per share), on \$819,569 in quarter ended Sept. 30 vs. \$45,361 (16¢) on \$339,182; for 9 months, earnings were \$221,286 (72¢) on \$2,048,428 vs. \$129,077 (45¢) on \$729,867 last year—all 1957 figures record highs.

Sonotone Corp. earned \$706,881 (65¢ per share), including \$105,376 income tax credit, on \$15,909,000 sales for 9 months ended Sept. 30 vs. \$618,792 (55¢) on \$13,757,000 in 1956.

Report on Stromberg-Carlson div. of giant General Dynamics Corp., which this week revealed consolidated net sales for first 9 months of 1957 reached \$1,133,182,305 vs. \$715,505,688 in 1956 period and net profit of \$32,089,954 (\$3.50 per share) vs. \$23,015,606 (\$2.27)—all figures embracing those of recently-merged Liquid Carbonics Corp.: "Stromberg-Carlson div. has made notable progress in designing new transistorized elements for commercial telecommunication applications. While maintaining a high sales volume in conventional telephone equipment, the Div. is now in quantity production of transistorized components for the independent telephone industry. Other products enjoying high sales level include 'Custom 400' high fidelity consoles and components, sound distribution and paging systems, automobile radios and loudspeakers, and 'Charactertron' shaped-beam tubes." Pres. Frank Pace Jr. adds in report to stockholders that quantity production continues at S-C on complete Tacan systems for Navy, test & monitoring equipment for CAA; also "favorable progress" on various electronics & communications equipment for Signal Corps. (Stromberg no longer makes TVs.) General Dynamics' major military programs include development & production of Atlas missile, B58 supersonic bomber, F102A & F106A supersonic jet interceptors, nuclear-powered submarines, which were "not materially affected" by recent Air Force expenditure controls.

Packard-Bell pres. Robert S. Bell says profits on TV set sales in year ended Sept. 30 were less than in preceding year, but operation continues profitable with current earning trend rising. He told Los Angeles Society of Security Analysts that Packard-Bell is getting its highest share of TV market, excluding low-priced portables. Average factory price before excise tax, he said, is \$152.90 vs. \$128.67 for industry. On color TV, Bell said company "had lost money on every single set produced, about \$50 a set, but a cost accountant with a sharp pencil would probably peg it at closer to \$70." He estimated total sales at \$32,000,000 for year with net profits more than \$1 per share.

Dividends: CBS Inc., 25¢ on "A" & "B" payable Dec. 13 to stockholders of record Nov. 29 plus 3% stock Dec. 27 to holders Nov. 29; 20th Century-Fox, 40¢ Dec. 27 to holders Dec. 10; Walt Disney Productions, 10¢ Jan. 1 to holders Dec. 13; Hazeltine, 35¢ plus 2½% stock, both Dec. 16 to holders Nov. 29; General Precision Equipment, 60¢ Dec. 15 to holders Nov. 27; I-T-E Circuit Breaker, 45¢ plus 2% stock, both Dec. 20 to holders Nov. 18; General Tire & Rubber, 17½¢ Nov. 29 to holders Nov. 18; Minneapolis Honeywell, 40¢ plus 15¢ extra, both Dec. 10 to holders Nov. 21; Famous Players Canadian, 37½¢ Dec. 12 to holders Nov. 21.

Largest electronics contract in CAA's history was awarded to IT&T's Federal Telephone & Radio Co., for \$11,361,000 worth of VORTAC ground beacons and test, monitor & control equipment.

Howard W. Sams & Co. reports earnings of \$192,636 (\$1.52 per share) on \$3,964,324 for fiscal year ended June 30 vs. \$174,049 on \$3,707,874 for preceding year.

International Resistance earned \$531,424 (39¢ per share) on sales of \$12,965,896 in 42 weeks ended Oct. 20 vs. \$407,975 (30¢) on \$13,657,158 sales in 1956.

Corning Glass earned \$12,614,733 (\$1.86 per share) on sales of \$120,804,963 in Jan. 2-Oct. 6 period vs. \$13,817,039 (\$2.05) on \$124,562,065 sales in 1956 period.

Beckman Industries for quarter ended Sept. 30 earned \$290,712 (22¢ per share) vs. \$378,439 (29¢) in 1956 period.

CBS Beating Own Records: Looks like CBS Inc. is headed for another record sales & earnings year, Chairman Paley reporting to board of directors meeting Nov. 13 that 39 weeks ended Sept. 28 brought in consolidated net revenues and sales of \$275,276,269, up 7.4% from \$256,379,874 in 1956 period. At half-year mark the figure was \$186,798,814 vs. \$174,274,387 (Vol. 13:33). For whole of 1956, it was \$354,779,843 (Vol. 13:13); for all 1955, \$316,572,766. All-time record revenues were \$373,380,139, achieved in 1954.

Net income for the 9-month period this year climbed to peak \$13,898,171 after all charges (including \$16,250,000 provision for Federal income taxes), amounting to \$1.82 per share. This was up 48% from 1956 period which showed net income of \$9,368,073 (\$1.25) after allowing for expenses and losses attributable to discontinuance of CBS-Columbia TV-radio set manufacturing div. For whole of 1956, net income was \$16,283,462 (\$2.17); for all 1955, \$13,397,427 (\$1.83); for all 1954, \$11,414,645 (\$1.59).

Earnings per share are calculated on average of 7,651,697 & 7,490,438 shares outstanding during the respective 9-month periods of this year and last. Besides declaring 25¢ quarterly dividend, making \$1 for year (vs. 90¢ last year), CBS board also declared 3% stock dividend on Class A & B stock payable in latter Dec.; in 1956, stock dividend was 2%, in 1955 same. [For CBS financial details 1950-56, see our Special Report of last May 4 on Financial Data on Television-Electronics Companies.]

CBS doesn't break down sources of revenues and profits, but largest operating division is TV network which in first 9 months of this year billed more than \$173,000,000 by PIB calculations (Vol. 13:45); this is based, however, on one-time rates and therefore discountable by at least

25%. Last CBS Inc. annual report, covering 1956 (Vol. 13:13), stated only that CBS radio continues profitable, with Columbia Records at new peak 50% higher than 1955, CBS-Hytron (tubes & semiconductors) unprofitable, CBS Laboratories expanding into military & industrial projects, CBS International sales volume up 80%. CBS also has had profitable investments in theatrical productions, notably the fabulous *My Fair Lady*.

In 1956, according to recent Barrow network study report (Vol. 13:40 with Special Report), CBS's pre-tax profit from its TV network and 5 TV stations was \$40,733,000, the stations accounting for \$18,362,000 or 45.1%; these and figures for preceding years to 1950 would indicate TV network-station operations far overshadow all other divisions as contributor to net profit total shown in consolidated reports.

Another sidelight: Proxy report for last annual meeting (April 17) revealed Chairman Paley and President Stanton drawing down identical salaries, \$300,000; now retired TV pres. J. L. Van Volkenburg, \$134,961; radio pres. Arthur Hull Hayes, \$65,000; Columbia Records pres. Goddard Lieberman, \$48,000; v.p. Henry C. Bonfig, \$56,346; ex-CBS-Hytron pres. Charles F. Stromeyer, \$60,000; Edward R. Murrow, \$177,233. Salaries of new TV pres. Merle Jones and CBS-Hytron pres. Arthur L. Chapman, also directors then, were not revealed, but each was given option to buy 7500 Class A shares at \$31 and \$30.50, respectively, while Lieberman held option on 7650 at \$22.55. Directors Bonfig and Hayes also held options on 7803 Class A shares each at \$22.55.

Chairman Paley's stockholdings were 164,626 Class A, 798,768 Class B owned beneficially; Stanton's 108,266 A & 31,917 B. Next largest director-stockholdings were Leon Levy's 44,889 & 126,676, Samuel Paley's 20,400 & 33,680.

Govt. purchase of TV time on commercial stations for educational purposes—or exercise of eminent domain to obtain facilities—was suggested Nov. 13 by U of Mich. TV director Garnet R. Garrison as means of advancing nation's schooling. Asserting that "use of a few educational stations is not enough" as aid to development of scientific & intellectual processes, Garrison asked in speech to Ann Arbor Rotary Club: "Why should not the appropriate governmental agencies have power to exercise the right of eminent domain over broadcast time segments, taking over, if purchase is not easily possible, prime spots on commercial stations & networks so as to provide program outlets?"

Two new closed circuit TV system components debuted last week at Walter Reed Army Medical Center Open House in Washington: color TV microscope; color kine recorder. Microscope, really an RCA TK-45 color vidicon camera with light microscope attached, permits pathologist to show, and discuss with remote audience, magnified living micro-organisms as he studies them. Color kine recorder, Telechrome's "Trinescope," shoots live colorcasts of surgical operations on 16mm film, makes unlimited copies for military medical education. Walter Reed's 3-channel, \$750,000 system uses 3 studios, 7 cameras, staff of 60, produces 150 programs a month.

News pictures in public areas of govt. buildings may now be taken without obtaining prior permission, reports General Services Administration which operates the buildings. TV cameramen are requested to notify GSA in advance so it can provide electricians to help with cables and lights. Federal judges will continue to have authority to bar photographers in areas under their control, such as courtrooms.

Two application for TV stations were filed with FCC this week, bringing total to 117 (33 uhf). Applications: For New Bedford, Mass., Ch. 6, by local group headed by bus line operator Alfred DeMaris; for Eugene, Ore., Ch. 9, by consultants Dawkins Espy and Thomas B. Friedman. No translator applications were filed this week. [For details, see *TV Addenda 25-P* herewith.]

Audiences as large as 250,000 have been attracted to school board telecasts over educational KUHT, Houston (Ch. 8)—some programs holding viewers as late as 1:30 a.m. Acting station mgr. Roy Barthold estimates this year's board meetings on integration were tuned in by 100,000 of city's 400,000 sets—with average of 2.5 viewers per set.

GE's new color TV camera (Vol. 13:39) will be introduced Nov. 20 at special press showing in new TV-radio studios of WRGB & WGY, Schenectady.

SUMMARY-INDEX OF THE WEEK'S NEWS — November 23, 1957

WHITNEY PARTNER SEES TV commercials as "\$100 Billion Pump-Primer" of economy; Petersmeyer urges fight against detractors (pp. 1 & 16).

SUBLIMINAL AD TECHNIQUE being used on air by at least one station; "hidden sell" promoters defend system, report "fantastic" TV interest (pp. 2 & 5).

OPPOSITION TO PAY TV, by air or wire, voted by Theatre Owners of America, pledging fight to outlaw it, while members continue to explore it (p. 3).

SPECTRUM STUDY action deferred by EIA pending further Washington talks. AMST and FM groups urge FCC to retain TV & FM intact (p. 4).

STORER FEELS PROFIT SQUEEZE from costs of building up independent WVUE; 9-mo. figure up but 1957 operating decline may be 15% (p. 6).

WDAF-TV & WDAF, Kansas City, reported sold, probable buyers headed by pres. Elmer C. Rhoden, National Theatres Inc.; principals mum until next week (p. 7).

RCA COLOR TAPE recorders to cost \$63,000, monochrome \$49,500; delivery of production models to begin in Dec. 1958 (p. 9).

REALIZATION OF TV'S dominance in mass entertainment field urged on exhibitors by Eric Johnston, stressing interdependence of both industries (p. 9).

BORDER UHF ALLOCATIONS negotiations between U.S. & Mexico running smoothly. Station sales in Los Angeles held up by protests (p. 10).

TRANSLATOR GROWTH continues steady, 73 stations now broadcasting; new orders for equipment at 3-4 per month, some from South America (p. 10).

Manufacturing-Distribution

HOME AMUSEMENT DEVICES represent whopping \$21 billion expenditure by public since 1948; factory value of TV sets totals \$8 billion (p. 12).

TV BUSINESS IN '58 seen continuing in 1957 pattern, with small pickup forecast by some set manufacturers; 1957 pre-holiday activity seen slow (p. 12).

DISCOUNTERS TO GROW, conventional retailers lose more ground, Masters predicts (p. 14).

SIEGLER CORP. reports record earnings of \$368,602, sales of \$16,662,835; Olympic employes increased by 300, TV-radio sales 40% over last year (p. 15).

PUMP-PRIMER OF THE NATIONAL ECONOMY: Wrede Petersmeyer, the J. H. Whitney & Co. partner in charge of its Corinthian group of stations (KOTV, Tulsa; KGUL-TV, Galveston; WANE-TV & WANE, Ft. Wayne; WISH-TV & WISH, Indianapolis), has been expounding to his friends an interesting theory of TV as "the secret catalyst" helping account for the increase in total sales of goods to American consumers from \$180.6 billion in 1949 to \$280 billion in 1957.

Nor is it mere coincidence, he contends, that Gross National Product has gone up from \$257 billion to \$437 billion in the same period of TV's great expansion—a period also marked by a more than 20-fold increase in expenditures by business on TV as an advertising medium. Therefore, he argues, why doesn't the business community, particularly at this time of economic storm clouds, join in protest against pay TV which, if successful, might vitiate free TV's strength as a selling force?

We asked Mr. Petersmeyer to "digest" his ideas for our readers, feeling they were especially pertinent coming from an able financial man who is regarded as one of the industry's real comers. Native of California, 1941 graduate of the U of California (Phi Beta Kappa), 1943 graduate of Harvard Business School (cum laude), Petersmeyer was made a Whitney partner in 1951. He started concentrating on station operation in 1954 after having headed the successful operation of a half dozen community antenna systems financed by Whitney. We recommend a close reading of his article on p. 16.

SUBLIMINAL TV ADS TESTED ON AIR: Controversial "invisible" TV advertising techniques are being tested on air in U.S.—and results have been inconclusive so far.

Using simple system developed at own station, pres. Murray Carpenter of WTWO, Bangor, Me. (Ch. 2) has quietly been experimenting with on-air tests of subliminal advertising (Vol. 13:45-46) for at least 2 weeks after nearly 2 months of development and closed-circuit tests. His conclusion so far: If it is a selling medium at all, it is the softest kind of soft sell.

"I am amazed to discover the trade furor this technique has stirred up and even more amazed that NARTB has issued an official frown," Carpenter told us. He said he has offered to contribute results of tests to FCC's investigators. "I judge from previous news reports that most broadcasters seem tongue-tied on the subject," he added. "We aren't."

His subliminal tests, which have been transmitted during across-the-board film series on alternate days, have been aimed at increasing mail draw. "As yet we are unable to determine if this technique has any effect," he declared. (For details of Carpenter's tests, see p. 5.)

The same puzzlement over excitement generated in press by "hidden-sell" idea was reflected this week by officers of Subliminal Projection Corp. when we visited them in N.Y. Though delighted with attention, they expressed dismay at tendency to imply system is wicked, potentially dangerous, etc.

Subliminal's exec. v.p. Richard E. Forrest invited us to demonstration of invisible advertising projected at speed well within range of TV's capabilities—each message lasting 1/20 of a second (as opposed to 1/3000 in movie theatre test). In small screening room, we viewed about 5 min. of color film footage, straining our eyes to catch any glimpse of a hidden message.

Though we saw nothing but the film, we were informed we had been subjected to message projected every 5 sec. for 1/20 of a second duration. Then film was shown again, this time with mask in front of projector lens, so that left half of screen carried the movie, the right half blank—or was it blank? Dim image of familiar "Coca-Cola" logo could be seen flicking on and off on unoccupied half of screen.

By reducing brightness of subliminal image, said Forrest, it can be projected for longer periods and remain "unseen." Superimposed on a TV program, he said, message can be held for indefinite period, making subconscious impression without actually being visible or interfering with program.

Subliminal's promoters quickly offer an assurance: This type of advertising can't "persuade" or "influence"—it can only "remind." It can use only short messages, with relatively familiar trademarks or wording. Is it "dangerous" or potentially sinister? Forrest claims that if viewer is uninterested in message, or hostile, no impression is made at all—message is subconsciously rejected.

"All we're selling is white space," he said. "It's just a place to put a trade name or a short slogan. It's up to advertisers to determine what use they'll make of it."

Motivation researcher James M. Vicary, Subliminal Projection v.p. who is credited with inventing system, puts it another way: "Subliminal advertising is a way to get to the viewers while they're concentrating." Its only use, he says, is to remind, to supplement other advertising—it can't be used to launch a new product or idea.

What it can do, he says, is make impression on viewer while his undivided attention is focused on TV or movie screen—supplementing conventional commercials which often chase viewers to refrigerator for can of beer, to bathroom, etc.

Does it work? You can't tell by watching a demonstration. If you're conscious of the message, promoters say, it's not subliminal. They cite widely publicized 6-week test of technique in unidentified movie theatre where subliminal ads were credited with boosting popcorn sales 57.7%, Coca-Cola 18.1%.

Who's interested in subliminal advertising? Of more than 1000 people witnessing demonstrations, Forrest ranked them in this order: (1) Agency people, (2) advertisers, (3) theatre owners, (4) TV operators. Interest expressed by TV operators has been "fantastic," he said.

Subliminal Projection Corp. plans to sell and lease projection machines, for which it has patent application pending. Pilot movie theatre projector came off production line of unidentified equipment manufacturer last week. TV gear has been designed, but production plans are being held up because of furor over the idea. "We don't want to fight the TV industry," said Forrest. "We want to marry it."

Though Subliminal has offered to demonstrate technique to FCC investigators, Commission staffers say they have no plans to see it. FCC sources say Subliminal is cooperating, providing information.

Possible use of technique in pay TV was predicted by Forrest, who visualizes it as perfect reminder advertising technique for basically non-commercial medium. Unseen toll-TV "sponsor" might get total of 300 invisible "spots" in 25-min. program.

TOA WANTS NO PART OF SUBSCRIPTION TV: While theatre owners scurried around trying to sew up wired pay-TV franchises in large numbers of cities, their trade association voted unanimously to condemn "all forms of cable and broadcast pay TV" and to push for enactment of federal law against it.

Action taken at this week's Miami Beach convention of Theatre Owners of America allies movie exhibitors' and broadcasters' organizations in fight to ban tollvision, while some individual exhibitors and broadcasters are expressing active interest in fee TV.

TOA resolution said subscription TV "soon would usurp all the popular programs now free . . . [gain] a monopoly of entertainment dollars . . . [cause] closing and elimination of the exhibition branch of the [motion picture] industry."

Earlier in convention, exhibitors listened to panel discussion on cable TV, in which most panelists (mainly representing pay TV or "cable theatre" proponents) agreed consumer will make ultimate decision on success of wired TV and that theatre owners should ally themselves with wired TV.

Interesting interchange from the floor featured 2 past presidents of TOA. Mitchell Wolfson, who heads Florida's Wometco Theatres as well as Miami's WTVJ and has interests in other TV stations, warned that pay TV must have first-run movies to succeed. This, he said, means "death of movie theatres." Then he asked: "What makes you think that the exhibitors can continue to control pay TV?"

Samuel Pinanski, pres. of American Theatre Corp., Boston, replied with opposite view: "My business stinks," he said, "and I've got to face reality" and examine potential of cable theatre system. He said exhibitor can't deny economics and must recognize existence and possibilities of pay TV as a matter of reality. He said he intends to "learn everything possible" about wired TV services.

Somewhat similar, though considerably milder, view was expressed by head of movie producer-distributor trade organization. Pres. Eric Johnston of Motion Picture Assn. of America told TOA convention that industry should look on all types of toll-TV tests as "research projects, out of which might come developments that could affect our way of doing business, the business of us all . . ."

Big producer 20th Century-Fox, already heavily entrenched in programming for free TV, appeared to write off any major role in pay TV when it announced to convention that it was willing to give theatres guarantee of at least a 5-year lag between theatrical and TV showings of any of its pictures.

It was a great week for feeling the public's pulse on pay TV—and 2 big surveys appeared to indicate strong opposition to the medium. TV Guide received 44,888 replies to "ballot" printed in Sept. 21 issue, final returns indicating 96.6% of respondents were against any form of subscription TV. TV Guide commented: "The poll should serve as a signal to the FCC and to Congress that perhaps there are not as many toll-TV enthusiasts as they have been led to believe." Results are in Nov. 30 issue.

Broadcasting Magazine had special survey conducted by Pulse in 10 major cities, found voters 2-1 against pay TV (939 against, 470 for, out of sample of 1409). Results are tabulated in Nov. 18 issue.

CBS v.p. Richard Salant, meanwhile, reiterated in Hollywood this week that his network is strongly opposed to idea of broadcast subscription TV, but "if the FCC approves of pay TV, CBS will go into it." His statement was reminiscent of comment last month by NBC pres. Robert Sarnoff that if fee TV eventually replaces free broadcasting, "we, like the public, will have no choice but to follow the pay tide."

JOSTLING WITHIN THE SPECTRUM: EIA's board deferred final decision on what to do about an all-spectrum study (Vol. 13:44), during quarterly meeting in N.Y. this week—but it supports concept "more enthusiastically than ever," according to spokesman. Reason given for deferment was need for more conferences with top govt. officials.

EIA is hopeful of getting military cooperation, though some veteran allocations negotiators remain skeptical—because of military's long record of meager cooperation. EIA board freed its spectrum study committee, headed by H. L. Hoffman, to act on its own, if necessary, and to recommend study procedures to Govt. before next board meeting in March.

Maintenance of FM band intact was urged by EIA's amplifier & sound equipment section, backed by consumer products committee—and view will be transmitted to FCC in form of comments in investigation covering 25-890-mc band. However, some makers of non-broadcast equipment among EIA membership may elect to recommend that Commission reallocate some FM space to other services.

Newly formed FM Broadcasters, comprising 45 stations, filed strongly worded brief stressing need for maintenance of FM band as is—calling particular attention to current resurgence of FM.

Meanwhile, in defense of TV spectrum space, Assn. of Maximum Service Telecasters is submitting brief in the 25-890-mc inquiry, holding "it is entirely premature for the Commission to consider any reallocation of TV broadcasting either within the portion of the spectrum presently assigned to it or in another portion . . ." It noted that TASO's inquiry into TV propagation is still going on—at Commission's request—and report is not due until next June.

Detailing use and demand for TV channels, AMST noted that 814 stations are operating or authorized—a "frequency loading" of 10 stations per channel. AMST said this growth took only 12 years—compared with 25 years for AM to achieve similar status.

AMST also pointed up public's vital need of TV, the \$20 billion spent on TV equipment, that 99.9% of U. S. families live within service area of at least one TV station, that there is heavy use of 44,500,000 sets now in use with 83,430,000 persons over 12 spending some time watching TV in typical week.

Battle of Baltimore: Court battle lines in fight against Baltimore's new TV-radio-newspaper advertising taxes (Vol. 13:46) began forming this week, Baltimore Sunpapers (WMAR-TV) preparing to fire at ordinances as soon as they become effective Jan. 1. Counsel for Sunpapers will go to court to stop special levies (4% on sales to advertisers, 2% on gross receipts of broadcasters & publishers) on grounds they are unconstitutional because: (1) They abridge freedom-of-press guarantees, setting precedent for hostile municipality to tax newspaper or station out of business. (2) They discriminate against media & advertisers as businesses, thus denying them equal treatment under law. Sunpapers will be reinforced for battle by allied broadcasting, publishing & advertising forces which mobilized for initial attempt to stop City Council from enacting emergency budget measures Nov. 15. Advertising Federation of America, for one, is expected to enter legal fray as friend of court, chairman Robert M. Feemster warning this week that Baltimore taxes could set precedent which "can endanger the economy of the entire nation." He pointed out that "anything that tends to discourage advertising can kill all kinds of jobs in all kinds of fields."

Radio editorials on public issues are planned by KMPC, Los Angeles. Station operated by Golden West Bcstg. Co. (Gene Autry, chairman; Robert O. Reynolds, pres.) will carry 30 & 60-sec. editorials, clearly identified as management expressions of opinion, on such subjects as sewerage conditions, school bus safety. Politics will be avoided and KMPC news dept. will have no part in preparing policy statements, according to v.p. Loyd C. Sigmon.

A TV Legion of Decency? Year-long TV-radio study will be made by Catholic Church in U. S. "to determine the most suitable & acceptable means" of carrying out censorship encyclical by Pope Pius XII (Vol. 13:46). Bishop Wm. A. Scully of Albany, chairman of newly-expanded Episcopal Committee on Motion Pictures, Radio & TV, said group will determine how encyclical is "applicable to radio & TV on the American scene." Study may result in broadening work of Legion of Decency, present communications censorship arm of Catholic bishops, or establishment of separate TV-radio agency to evaluate programs. Other Committee members are Bishops John K. Mussio, Steubenville; James A. McNulty, Paterson; Hubert M. Newell, Cheyenne; Alden J. Bell, Los Angeles. Bishop Scully also reported addition of "A-2" category—"morally unobjectionable for adults & adolescents"—to Legion's movie-evaluation system.

TV doesn't harm health & schoolwork of children, although they spend as much or more time watching it as they did when it was novelty, director Paul Witty of Northwestern U's psycho-educational clinic reports in Nov. *Today's Health*, published by American Medical Assn. Survey of more than 2000 children, started in 1949, shows that in 1950 many parents complained that TV disturbed homework, play & sleep. Now few parents complain. And teachers find that such factors as poor home environment—not TV—are responsible for many emotional difficulties.

How to behave on TV is theme of new guidebook for amateurs—*So You're Going on TV*—prepared by NARTB in cooperation with WRVA-TV, Richmond. Quantity orders are available at cost to NARTB members.

Testing 'Hidden Sell' on TV: "If subliminal advertising is a world-shaking or potentially dangerous medium, we haven't been able to see it here." So said pres. Murray Carpenter of WTWO, Bangor, Me., summing up his station's experience with on-air tests of "invisible" commercials to date (see story, p. 2).

Working independently of the organizations promoting the widely publicized technique, Carpenter and his associates at WTWO began experimenting about 2 months ago, developing own equipment for purpose with aid of professional clinical psychologist. At outset, they decided to concentrate experimentation on film programs because of simplicity in devising equipment.

WTWO's "subliminal projector" was developed from standard film projector. Station technicians made loop of dark leader film 250 frames long, splicing in one frame with message, so that the "subliminal" information would flash on screen once every 11 seconds as loop made its continual revolution in front of film camera. Message was printed in negative form—white letters on black background—and designed so that it would occupy about one-fifth of height of screen. It was tested on closed-circuit system, projector's light level being turned down gradually until none of test viewers could see message. In on-air tests, message was superimposed on regular film program every 11 seconds, by using regular film projector and subliminal projector simultaneously.

First test message—only one used on air to date—was

simple 2-word phrase, "WRITE NOW," chosen because its effects could potentially be easily measured. On alternate days, message was superimposed on regular daily stripped series of film programs in which announcer requested viewers to write their reactions and suggestions about the program series to the station. Carpenter reported no measurable difference in mail response on days when subliminal message was projected compared with days when announcer made verbal pitch only.

After nearly 3 weeks of alternate-day experimentation with the single message, Carpenter says he is convinced technique isn't "world-shaking" or "inherently wicked," as some critics have implied. "It hasn't filled me with enthusiasm in any way."

From TV station's standpoint, he sees one potentially important use "to solve a problem which really perplexes us"—namely, inability of viewers to identify program with a particular station. He suggests that subliminal projection of station's call letters during actual program might increase awareness of station's identification with network program—a decided advantage, particularly during rating week.

Summing up his experience and observations, Carpenter expressed view that subliminal technique may only be able to "get a viewer to do something he already wants to do" and speculated that some people may be far more susceptible than others to subliminal messages. In fact, he adds, "we may be dealing with a narrow slice of the population."

Carpenter defended broadcasters' right to experiment with subliminal and other new techniques. "I'm in the business of influencing people," he said, "and I intend to look into every method of influencing that comes along, whether I decide to use any of them or not."

"Fantastic" impact of TV on retail store trade is reported in Nov. 18 *Billboard* article by Bob Bernstein telling how pres. Howard J. Moll of Stevens Cosmetics has to read TV trade journals & gossip columns to cope with customers' knowledge of programs & products. "If the retailer doesn't become a TV expert via the advertiser's overtures, he soon becomes one through customer comment," said head of firm which operates drug & toiletry concessions in N. Y. area supermarkets & dept. stores. Sometimes customers aren't sure of product's precise name, but "they saw it on TV" and demand it, Moll said, recalling one day's run on Deep Moss, Disappearing Magic, Dimaggio, Dark Victory, Imagine, Dame Nature, Magic Step, Dawn Mist, Strange Deeds, Clean Margarine. Turned out they wanted Toni's new facial cleanser, Deep Magic.

TV loses 77% of audience between programs, Ziv reported this week on basis of June 3-10 survey of 1000 Cincinnati homes by Burke Market Research Inc. Ziv pres. John Sinn said findings showed that break-time commercials "cannot do the same kind of effective selling job that program sponsorship accomplishes." Among those not watching, 28% left room, 25% read, made telephone calls, etc., 10% changed channels, 12% left house, 2% couldn't account for inattention.

"Brain picking party" to discover why big corporate advertisers prefer TV to newspapers was proposed by adv. director John B. Rabiner of *Berkshire Evening Eagle* at Boston meeting of New England Newspaper Advertising Executives Assn. "Is this a rout?" he asked, citing statistics showing big companies spend more money on TV than on dailies. Rabiner urged national meeting of "everybody in the newspaper business to find out what's going on."

TV has 5-way payoff for corporate advertisers, Oliver Treyz, ABC v.p. in charge of TV, told 10th national conference of Public Relations Society of America Nov. 18 in Sheraton Hotel, Philadelphia. Citing case histories, he said TV improves public's image of corporation, public's familiarity with products, trade & industry relations, employe relations, stockholder relations. "Corporate messages on TV often are as timely—and should be as timely—as news can be," Treyz said. Same day, ABN pres. Robert E. Eastman made pitch for radio, telling meeting that TV has "pushed radio into the position of being primarily an adult medium"—one which is enjoying "the most rapid expansion of any medium in the history of mass communications." Eastman said that radio holds "place of distinction in mass communications because it is so universally available."

"Audience participant" interrupted *The \$64,000 Challenge* on CBS-TV Nov. 17 in N. Y. by walking on stage, facing camera and reading "The Russians have gotten a step ahead of you" from paper he held. He got no further. Camera swung away, director Seymour Robbie barked orders through intercom, intruder was grabbed by stage director and hustled into wings. Taken to Bellevue Hospital for observation, he was identified as Richard Fichter, 34, Springfield, Pa. He had been ejected from afternoon rehearsal but obtained ticket for 10-10:30 p.m. show.

NBC-TV won 3 awards presented by National Assn. for Mental Health at annual meeting Nov. 21 in Atlantic City. Cited for "outstanding & continual effort to acquaint the American public with the facts about mental illness & mental health" were programs on *Today* April 30 & May 1, *Tonight* May 2, *Home* Aug. 7.

Profit Squeeze on Storer: High costs of getting WVUE, Wilmington-Philadelphia (Ch. 12) on its feet may depress Storer Broadcasting Co. operating profit for this year as much as 15% below record 1956—despite fact business is up currently at its other 4 TV stations and its 7 AMs; despite fact, also, that 9-mo. net profits are \$5,249,492 (\$2.12 per share) vs. \$3,911,464 (\$1.58) for same 1956 period (Vol. 13:42). The 1957 increase is attributable to net capital gain of \$1,966,477 (79¢ per share) on \$6,350,000 sale last spring of WBRC-TV, Birmingham (Ch. 6) with radio WBRC (Vol. 13:14, 19).

Pres.-founder George B. Storer discusses expected operating decline in letter this week accompanying earnings report, noting that costs of WVUE, group's only non-network outlet, are contributing mainly to squeeze on total profit but expressing belief "we will achieve black figures at Philadelphia within the next 12 months." Gross radio revenues are reported substantially higher while gross TV revenues were down, reflecting not only Philadelphia-Birmingham switch but sale of unprofitable uhf stations (WGBS-TV, Miami; WPTV, Portland, Ore.)

Expenses of WVUE include new transmitter with 1049-ft. tower at Pittman, N. J., 16 mi. from downtown Philadelphia, studios in Philadelphia and newly planned studio-office building in licensed Wilmington location.

Storer bought WVUE (then WPFH) along with radio WIBG from Paul Harron interests (in May) for \$5,626,312 plus assumption of about \$1,000,000 liabilities (Vol. 13:9, 13), being required (under 5-vhf-limit rule) to dispose of profitable Birmingham TV station which was sold to Hulbert Taft interests. Loss of Birmingham revenues for rest of year, along with drains of WVUE, accounted for the adverse showing in third quarter and expected similar showing in fourth.

Third quarter net profit for group actually was \$820,-

Phenomenal growth of KTTV, independent in 7-station Los Angeles, is disclosed in Storer letter (above)—and credit is generally recognized as belonging to its pres.-gen. mgr. Dick Moore. While profit figures are not made public by parent *Los Angeles Times*, these are the gross revenue totals since station started 8 years ago: 1949, \$412,151; 1950, \$1,570,478; 1951, \$2,779,876; 1952, \$3,068,516; 1953, \$4,140,641; 1954, \$5,835,695; 1955, \$7,676,103; 1956, \$8,943,000. Note: *N. Y. Daily News'* independent WPIX, under Fred Thrower, is reputed to be good earner, though its figures have never been revealed. And *Chicago Tribune's* independent WGN-TV, its figures also confidential, after long period of doldrums is known to have made enormous strides in the last year under v.p.-gen. mgr. Ward L. Quaal.

Private TV station on Okinawa, programming in Japanese language, is planned by group headed by Harry M. Engel Jr., pres. of KUAM-TV, Agana, Guam (Ch. 8). Okinawa already has U.S. Armed Forces TV outlet AFTV (Ch. 8), which programs in English. Engel is pres. of Intercontinental Services Ltd., 15 E. 48th St., N.Y., international film and station operating company, which operates Arabic-language station owned by Arabian-American Oil Co. at Dharan, Saudi Arabia.

008 (33¢ per share) vs. \$1,066,019 (43¢) in 1956 quarter (Vol. 13:42); for second quarter, reflecting most of Birmingham gain, profit was \$3,143,038 (\$1.27) vs. \$1,395,202 (56¢) in 1956 period (Vol. 13:32); for first quarter, \$1,286,445 (51.9¢) vs. \$1,450,242 (58.6¢) in 1956 period (Vol. 13:17).

Revenue figures are not reported by quarters, but in record 1956 the Storer group reported operating revenues of \$28,313,383 and net profit of \$5,517,207 (\$2.23 per share) as against \$24,051,726 & \$4,330,428 (\$1.73) in 1955. [For roundup story on 1956 annual report, with figures back to 1950, see Vol. 13:13.]

* * * *

Storer's letter was in form of reply to James H. Sheppard, Grand Rapids, representing clients owning several thousand shares of Storer stock, presumably asking why firm went into independent TV operation in Philadelphia as against retaining profitable Birmingham. He pointed out that studies had first been made of *Los Angeles Times'* independent KTTV, whose annual sales figures climbed from \$412,181 in 1949 to \$8,943,000 in 1956; that WBRC-TV did something less than 25% of the KTTV 1956 volume; that *Chicago Tribune's* independent WGN-TV is known to be well up, too. These studies, he stated, reinforced his company's judgment that WVUE, in a comparable market, could be made to pay off over long run. But he admitted the Philadelphia venture, competitive with the *Bulletin's* WCAU-TV (CBS), RCA's WRCV-TV (NBC) and the *Inquirer's* WFIL-TV (ABC), was "truly a battle of giants."

As for business at the other Storer stations, it suffered a slackening off of demand during third quarter but is now up (TV volume ahead 4.6% in Oct. as against Oct. 1956, radio up 15.5% in same period). "But," he added, "our forward commitments from advertisers are of a short term duration rather than the long term 52-week contracts which we formerly enjoyed. We hope this situation will change, but until we have a restoration of general commercial confidence, I am afraid we will have to be content with this day-to-day existence."

There is no intention, said Storer, to reduce dividend payments (\$1.80 this year, \$1.75 last year), representing 35% of net earnings and about 25% of cash earnings.

ABC-TV goal is to lead CBS-TV & NBC-TV by next April "in nighttime audience in the competitive markets throughout the country where we compete directly," Oliver Treyz, ABC v.p. in charge of TV, stated at meeting of primary affiliates Nov. 20 in Hotel Blackstone, Chicago. He told 80 station mgrs. at session that he's confident objective can be reached, reporting that ABC-TV already reaches 2,000,000 more homes in average evening hour—audience increase of 45%—than it did year ago. Biggest rating gains by network, Treyz said, have come in direct contests with CBS & NBC.

New rate policy, extending usual 6-mo. protection against increases to 12 months for advertisers who maintain uninterrupted schedules, was announced this week by Storer's WJBK-TV, Detroit. In letter to agencies, managing director Bill Michaels said old policy was "unwieldy" and "serious deterrent to getting basic TV budgets approved."

New closed-circuit system, Port Jervis (N. Y.) TV Co., started Nov. 13 on Ch. 6 which it has leased from Port Jervis community antenna operator Tel-Co TV Sales & Services. New system has about 700 subscribers. Some news reports gave impression operation is on-air station.

Kansas City Stations to Rhoden? Deal for sale of Kansas City Star's WDAF-TV (Ch. 4) and radio WDAF, in compliance with govt. anti-trust consent decree (Vol. 13:25, 46), was due to be concluded after meeting of newspaper's board Nov. 22—with revelation of purchaser indicated for next week. Newspaper & station executives were absolutely mum at week's end, declining to accept inquiry calls, but there was good basis for betting buyer will be disclosed as group headed by Elmer C. Rhoden, of Kansas City, who succeeded late Charles P. Skouras in 1954 as pres. of National Theatres Inc., big California movie chain spun off 20th Century-Fox under old govt. consent decree requiring divestiture of theatre ownership by producing companies. Rhoden also was head of 45-theatre Fox Midwest Theatres Inc., Kansas City, where he still makes his home and is prominent in local affairs, and has been active in Theatre Owners of America.

Intermediary is Fred Moseley, Kansas City

CP for KTES, Nacogdoches, Tex. (Ch. 19) is being taken over by Lee Scarborough, operator of KELS-FM there, paying out-of-pocket expenses of other 25% owners Joe D. Prince, T. Gillette Tilford & James G. Taylor, according to application filed with FCC. Construction is to be financed by issue of 100,000 shares of class A stock with \$1 par value, to be offered public by Gene Gassaway & Co., Lufkin. Also to be issued are 150,000 shares of class B stock with 10¢ par, for officers and directors. Scarborough gets 12,600 shares of class B for his services, land and buildings. Application also states that it has 1-kw GPL transmitter on hand, which station may obtain for \$5000.

KOVR, Stockton, Cal. (Ch. 13) has been sold to Gannett Co., Rochester, in deal involving \$3,100,000, following cancellation of sale to Lowell Thomas-Frank Smith interests for approximately \$3,500,000 (Vol. 13:46). Gannett is paying \$1,100,000 cash for capital stock of licensee Television Diablo Inc. (H. Leslie Hoffman, majority owner), which has \$2,000,000 outstanding indebtedness. Terry H. Lee, Television Diablo pres.-gen. mgr., has agreed to remain as gen. mgr. until next July. Gannett is newspaper chain owner and operates TV-radio stations in Rochester, Binghamton, N. Y. and Danville, Ill.

Mitchell Wolfson's WTVJ Inc. will own 40% of WLOS-TV, Asheville, N. C. (Ch. 13) & WLOS, when it has exercised option on additional 605 shares, paying \$60 per share to 6 minority stockholders. WTVJ, seeking control of stations, has been buying out small stockholders following last June's \$122,580 purchase of 17% from 35 stockholders under option it took over from *Asheville Citizen and Times* (WWNC). In Oct., it purchased 4260 shares for \$118,080, brought holdings to 35%. Several stockholders are contesting original purchase, claiming that option to newspaper was illegal.

Mel Wheeler's purchase of 96% of WJDM, Panama City, Fla. (Ch. 7) for \$60,000 from builder J. D. Manly (Vol. 13:43) was approved this week by FCC. Wheeler will own 98%, wife 2%. Other Wheeler interests: 25% of WEAR-TV, Pensacola (Ch. 3) & WEAR; CPs for radio WSCM, Panama City, and WTYT, Titusville, Fla.

KSHO-TV, Las Vegas (Ch. 13) sale to Mervyn Adelson and father Nathan, Las Vegas supermarket operators, has been approved by FCC, sellers Frank Oxarart-Albert Zugsmith interests getting \$70,000 (Vol. 13:42).

business broker, and price is said to be "more than \$7,500,000." Reported first asking price was \$10-12,000,000, but Harold Gross offer of \$9,300,000 last summer (Vol. 13:21) was supposed to have been acceptable, then withdrawn when money market got tight. Reliable sources disclose the TV-radio stations grossed approximately \$2,700,000 and showed earnings before taxes of \$1,550,000 in 1952; \$3,000,000 & \$1,680,000 in 1953; \$2,600,000 & \$1,300,000 in 1954; \$2,550,000 & \$1,200,000 in 1955; \$2,470,000 & \$1,050,000 in 1956. Net earnings aren't known, but it's a fair guess they ran around 45% of net before taxes.

Identity of buyer was hot "guessing game" all this week, with such major group interests as Storer, Whitney, Triangle, RKO Teleradio admitting they have considered deals broached by brokers but were definitely not in the running. Also mentioned as possibilities but not checked up to press time were Wrather, Alvarez, Cowles and Hobby interests.

NTA's purchase of 75% of KMGM-TV, Minneapolis (Ch. 9) for \$650,000 from United Television Inc. (Vol. 13:37) was approved by FCC this week, with Comr. Bartley dissenting. Loew's Inc. retains 25% acquired in 1956 for about \$750,000 (Vol. 12:44). NTA is also seeking FCC permission to take over WATV, Newark-N. Y. (Ch. 13) with WAAT & WAAT-FM for \$4,500,000 (Vol. 13:44). In his dissent, Bartley said Commission should get more information before attempting to decide whether transfer is in public interest. He pointed out NTA "has made no claim (that) TV stations are needed for the operation of its business," that it is defendant in Justice Dept.'s "TV block-booking" suit.

Radio Sales Approved by FCC: WRMA, Montgomery, Ala. by Ralph M. Allgood & Grover Wise for \$165,000 to owners of WAOK, Atlanta (Vol. 13:44) . . . WHAR, Clarksburg, W. Va. by George F. Wilson Sr. & Jr. for \$155,000 to Mr. & Mrs. Mason C. Deaver (Vol. 13:43) . . . KAIR, Tucson, Ariz. by Wm. J. Hyland III, Dawkins Espy & Harold Lampel for \$135,000 to Josh Higgins Radio Enterprises (Vol. 13:40) . . . KWG, Stockton, Cal. by Douglas D. Kahle for \$85,000 to KWG Bestg. Co. (Vol. 13:39) . . . WDEB, Gulfport, Miss. by Denver T. Brannen for \$80,000 to Electronics Research Inc. (Vol. 13:40) . . . Concert Network Inc (FM stations WXON, Providence; WYCN, N. Y.; WHCN, Hartford & WBCN, Boston) by John W. Guider for \$45,000 to T. Mitchell Hastings Jr. . . . WHFI (FM), Newark, N. J. by Fidelity Radio Corp. for \$40,000 to DuMont Bestg. Corp. . . . WCLE, Cleveland, Miss. by Voice of the Delta for \$40,000 to Radio Cleveland.

Report of Radio Station Sales: WTAL, Tallahassee, Fla. by John H. Phipps for \$149,571 to Vic Diehm and associates . . . WCOS, Columbia, S. C. by Charles Pittman for \$107,500 to George H. Buck Jr., who with father owns WJNO, W. Palm Beach, Fla. . . . WHUC, Hudson, N. Y. by Robert P. Strakos & John F. Kearney for \$82,500 to Colgreene Bestg. Co., owned by Orin Lehman, publisher of *Saugerties* (N. Y.) *Daily Post* . . . WHOO, Orlando, Fla. by Ed Lamb, also owner of WICU-TV, Erie, Pa. (Ch. 12) & WICU, for \$250,000 to Ted Estabrook (Blackburn & Co.) . . . KMOR, Oroville, Cal. by Oroville Bestg. Inc. (Raymond Vargas, pres.) for \$30,000 to Jack Breece (Hamilton, Stubblefield, Twining & Assoc.).

Personal Notes: Ted Cott named NTA v.p. in charge of o-&o stations, headquartering in N. Y. . . . Joseph J. Weed, pres. of rep Weed TV, and John Blair, chairman of Blair-TV, elected directors of TvB . . . Robert W. Sarnoff, NBC pres., and Wm. R. Baker Jr., Benton & Bowles chairman, to be honor guests at annual dinner of Federation of Jewish Philanthropies Dec. 10 in Plaza Hotel, N. Y. . . . Jules Herbeveaux, NBC v.p. and gen. mgr. of WNBQ & WMAQ, Chicago, elected a vice chairman of Chicago Better Business Bureau . . . Kenneth Curto, ex-radio WPRO, Providence, joins Triangle Publications as sales mgr. of WFIL-TV, Philadelphia, succeeding Sherman D. Gregory, who shifts to Triangle national sales div. . . . Richard D. Cross, ex-pres. of Vision Films, New Orleans, named program mgr. of WDSU-TV, succeeding Tom Hicks, resigned . . . James Schiavone promoted to station mgr. of WWJ-TV, Detroit . . . Thomas B. Shull appointed director of film operations for Storer stations, headquartering in N. Y. and reporting to TV operations v.p. George B. Storer Jr.; he's ex-NBC and MCA film div. account executive, formerly headed now-discontinued uhf WTOM-TV, Lansing, Mich. . . . Theodore Weber, ex-sales mgr., WGN-TV, Chicago, now with Storer's WVUE, Wilmington-Philadelphia, as administrative asst. to v.p.-managing director J. Robert Kerns . . . Tom M. Percer promoted to sales mgr. of WABT, Birmingham . . . Gordon F. Max, ex-WREC-TV, Memphis, named production mgr. of upcoming WMBD-TV, Peoria (Ch. 31) . . . Ted Anthony promoted to sales promotion director, Joseph (Bud) Mertens to audience promotion director, of WJW-TV, Cleveland . . . J. Arthur Stober, ex-Singer-Stober Assoc., Miami Beach, named production mgr. of WNHC-TV, New Haven . . . Jay Lloyd promoted to local sales mgr. of KTVT, Salt Lake City . . . Sterling Zimmerman, ex-KGBT-TV, Harlingen, Tex., named sales mgr. of KLFY-TV, Lafayette, La. . . . Richard Wolfson, legal director of WTVJ, Miami, elected a director of National Conference of Christians & Jews . . . Charles Godwin, ex-ABC & MBS, appointed development director of Air Trails Network (radios WKLO, Louisville; WING, Dayton; WCOL, Columbus; WIZE, Springfield, O.; WVDA, Boston) . . .

ADVERTISING AGENCIES: Bernard Musnik, ex-Ziv, named pres. of Publicis Corp., new U. S. branch of big French Publicis agency headed by Marcel Bleustein-Blanchet, which opens N. Y. office Jan. 1 . . . Clarence E. Eldridge, George Fry & Assoc. v.p., named public relations consultant to AAAA on Frey Report for one year, starting Jan. 1 . . . Gene Schiess, ex-ABC, joins Ogilvy, Benson & Mather as TV-radio program mgr. . . . Stuart Minton Jr. assigned to San Francisco office of Foote, Cone & Belding, in charge of TV-radio production . . . Wm. J. Green, ex-Lewis Edwin Ryan, Washington, joins Robert M. Gamble Jr. there as TV-radio director . . . Philippe Fiset, ex-CBC, Montreal, named French TV-radio director of J. Walter Thompson there . . . Ernest M. Walker, ex-ABC, named package goods accounts supervisor of Hicks & Greist . . . Armond Fields, ex-McCann-Erickson, Chicago, joins MacFarland, Aveyard there as research director.

Sir Kenneth Clark, ex-chairman of Britain's commercial Independent TV Authority, named advisor on public service & cultural programs for commercial program contractor Associated Television; he'll also create series of programs on the arts for showing next year by ATV.

"Fifty Foremost Leadership Medal" awards for 1957 by *Forbes Magazine* include as recipients RCA chairman David Sarnoff, GE pres. Ralph J. Cordiner, AT&T pres. Frederick R. Kappel.

Charles Boasberg, ex-Paramount Pictures, joins Warner Bros. as gen. sales mgr. Jan. 1 . . . Donald N. McClure, International Latex film director, resigns effective Jan. 1 . . . Tom Seehof, from Los Angeles office, named head of Screen Gems mountain area sales office, 212 Beason Bldg., Salt Lake City . . . Karl von Schallern, ex-MCA-TV, joins Gross-Krasne as southern representative, headquartering in New Orleans . . . Donald Richards, ex-NBC, joins rep Branham, N. Y., as head of TV-radio research & promotion . . . Peter F. Yaman, ex-ABC, named eastern sales mgr. of rep Young TV . . . Donald G. Peterson, ex-national sales mgr. of WOI-TV, Ames-Des Moines, named mgr. of Des Moines office for Weed Television Corp. . . . Frank G. Stisser Jr. named pres., W. Bruce McEwen exec. v.p., of C. E. Hooper Inc., James L. Knipe retiring as pres. & chairman . . . Melvin N. Poretz, ex-Ideal Toy Corp., named head of TV-radio operations of S. Jay Reiner Co., Garden City, N. Y. which services giveaway & quiz programs . . . Kenneth Koyen, ex-General Dynamics, appointed British Travel Assn. public relations director, filling post left by Donald Martin, now asst. to NARTB pres. Harold Fellows. . . . Miss Gayle Gary, ex-ABC, named head of new TV-radio div. of Women's National Republican Club, N. Y.

Obituary

Keith Kiggins, 61, v.p. of Storer Bcstg. Co., died Nov. 22 in his Miami Beach office following heart attack. After month's absence, he had returned to office Nov. 18 apparently recovered from flu & bronchial pneumonia which complicated old heart condition. Veteran of broadcasting business, he served as administrative asst. to Storer pres. George B. Storer. His career included 7 years with NBC as station relations mgr., director & sales mgr. of old Blue Network, 8 with ABC, which he left in 1948 to form own TV-radio consulting firm. He joined Storer in 1954. Surviving is his widow.

W. J. Convery Egan, 44, Radio Free Europe director, died Nov. 16 following heart attack in Greenwich, Conn. home. Onetime AP and *Trenton Times* reporter, he joined RFE 2 years ago after 13 years in State Dept.

Smith & Hennessey, new law partnership to be formed as of Jan. 1 by separation of George S. Smith & Philip J. Hennessey from old-line Washington communications law firm of Segal, Smith & Hennessey (Vol. 13:45) has purchased own building at 1240 19th St. NW, to be occupied Jan. 1 (phone Executive 3-7242). Paul M. Segal continues under own name in present building he owns at 816 Connecticut Ave., with Robert Marmet remaining on his staff, Seymour M. Chase still undecided. From present firm, Quayle B. Smith, Edwin S. Nail & Warren D. Quenstedt will join Smith & Hennessey.

Tenn. Broadcasters Assn. elects: John Hart, WBIR-TV & WBIR, Knoxville, pres.; Carter Parham, WDEF-TV & WDEF, Chattanooga, v.p.; W. H. Linebaugh, WATE-TV & WATE, Knoxville, secy.-treas.; Henry Slavick, WMCT & WMC, Memphis, and F. C. Sowell, radio WLAC, Nashville, directors.

Arthur M. Loew resigns as pres. of Loew's International effective Jan. 1, explaining he's "tired of the responsibilities of work" in foreign branch of Loew's Inc., founded by late father Marcus Loew. He will be succeeded as pres. by Morton A. Spring, 1st v.p. since 1945.

CBS 20-Year Club inducted 31 new members Nov. 18, bringing total to 425.

MBS ad account goes to Weiss & Geller N. Y. Inc. for campaign on trade & consumer levels.

RCA TV Tape Plans: Deliveries of production-model RCA color TV tape recorders will begin in Dec. 1958, broadcast & TV equipment mgr. E. C. Tracy announced, and they will cost \$63,000—somewhat lower than had been indicated by company's earlier estimate that it hopes to price them "under \$100,000."

Also announced this week, on eve of first production-model deliveries of Ampex monochrome Videotape recorders (at \$45,000), was black-&-white RCA model, also to be available in Dec. 1958, listing at \$49,500. RCA didn't disclose whether it had any orders yet for production models, but confirmed that 7 pre-production color models (at around \$100,000 each) were on order—6 by NBC and one by WBTW, Charlotte, N. C. (Vol. 13:46), latter for delivery in Sept. 1958.

Ampex v.p. Ross Snyder this week told AAAA eastern conference in N. Y. that "color conversion kits for Ampex monochrome Videotape

recorders positively will be made available," presumably also by latter 1958. He said simple editing and splicing of Ampex tape is now practical. First delivery of production model machine is scheduled next week to KING-TV, Seattle.

CBS-TV lost no time in informing its affiliates that, like NBC-TV (Vol. 13:45), it intends to solve the Daylight Time problem in the summer of 1958—as well as west coast time differentials—by means of elaborate N. Y. & Hollywood tape centers. CBS will spend more than \$3,000,000 on its recording centers—14 recorders in N. Y., 9 in Hollywood. Presumably some of these machines will be equipped for color recording and playback—which means that CBS intends to order pre-production RCA color recorders, pre-production Ampex color converters, or to color-convert Ampex recorders itself. It's known that CBS engineers have been working with Ampex on color conversion problems.

Telecasting Notes: "We can only plan wisely and boldly for our future if we realize that we cannot eliminate TV—and if we realize just as confidently that TV cannot possibly eliminate us." So said Motion Picture Assn. pres. Eric Johnston in address to this week's Miami Beach convention of Theatre Owners of America (see also p. 3). Urging exhibitors to face facts on TV, Johnston asserted: "Commercial TV has supplanted our 19,000 theatres as the chief purveyor of mass entertainment in the U. S. Its audience is almost 5 times bigger than ours. TV competes directly with us for the leisure time" of the population . . . Revenue-wise, Johnston made these comparisons: "This year, TV's total advertising revenue will come to \$1.3 billion—more than the total annual receipts from all the theatres in the U.S. It is estimated that in 5 years TV's income will reach \$2 billion. This is almost as much as American pictures take in annually at the boxoffice in all the theatres in the world" . . . Who watches late night & early morning TV? Nov. 23 *Sponsor* quotes NBC tally of survey which shows *Tonight* audience is 60% women, 36% men, and 4% children (!). Same issue notes that some 120,000 viewers tune in on WCBS-TV's NYU educational *Sunrise Semester* at 6 a.m., with 75% of mail coming from suburbs, 69% of it from women; 200 viewers have paid fees to NYU to receive college credit for program . . . Commercials using animated techniques developed by French for theatre commercials were given "sneak preview" on NBC-TV *Alcoa Theatre* "with brilliant success," according to Alcoa, which intends to use more commercials made by Arco in Paris on assignment by Ketchum, MacLeod & Grove . . . Major salvage job being attempted by ABC-TV on its expensive, but low-rated *Frank Sinatra Show*: Starting Jan. 3, weekly Fri. 9-9:30 p.m. show switches from film to live, concentrating on musical variety format—despite Sinatra's earlier insistence he'd never do a live TV series . . . American Bar Assn. has urged all members to cooperate in supplying material for Theodore Granik's *Attorney at Law* film series, to be produced by CBS Film Sales; ABA will review all episodes before filming . . . Specs across the sea: Kine of last week end's GM spectacular has been purchased by British commercial programmer ABC for showing on ITA network Dec. 7; British ABC hopes to buy more "specials" from U.S. networks and to sell its own spectaculars on U.S. market . . . First live variety show to be telecast from Cuba to U.S. will be Jan. 19 *Steve Allen Show* on NBC-TV.

British Commercial Success: After 2 years of commercial TV in Britain, advertisers are spending at rate of \$84,000,000 annually on TV advertising, or 8% of total national advertising expenditures (vs. about 12% in U. S.). So said ITA director general Sir Robert Fraser in commercial TV system's annual report. He said entire system is now firmly in black, with more than 4,000,000 homes able to receive commercial programs as of Sept. 1957, up from 1,700,000 in year. He expressed opinion that advertising could support second commercial network, but opposed establishment of more than 3 program services for nation (non-commercial BBC has already expressed interest in a second non-advertising channel). Pointing to U. S. difficulties, he said color TV is still far off and that issue of 405 vs. 625-line standard would have to be settled before it could be introduced.

TV-radio court coverage of safebreaking trial by WHAS-TV & WHAS, Louisville, handled with cameras & recorders with approval of Jefferson County Judge L. R. Curtis and opposing counsel, won commendations for stations from all parties in case. WHAS-TV took sound & silent shots of testimony highlights, and WHAS recorded proceedings from impaneling of jury to its verdict of guilty. Prosecutor A. Scott Hamilton suggested after trial that American Bar Assn.'s Canon 35, banning such news coverage, should be shelved.

Correction: Radio news operation of WHAS, Louisville, won "outstanding" award in that category instead of KCMO, Kansas City, in annual Radio-TV News Directors Assn. competition at 12th annual convention in Miami Beach (Vol. 13:45). KCMO won "outstanding news story broadcast" award in radio category.

Report of serious accident sent newscaster Al Rowe of radio WSOY, Decatur, Ill., to hospital Nov. 15. He was broadcasting details from emergency room when he learned daughter Donna, 17, was among 6 teen-age girls injured in car crash which killed 2 men. She died a few hours later.

Memorable TV news stories of 1948-57, including election of President Truman and launching of Russian satellite, are listed by CBS Inc. v.p. Sig Mickelson, in charge of news & public affairs, in fall issue of NARTB's *Television Quarterly*.

Convention facilities issue of *Sales Meetings* has been published by Bill Bros., 1212 Chestnut St., Philadelphia, as supplement to Nov. 15 *Sales Management*.

Uhf Diplomacy is Easy: Amicability of the U. S.-Mexican talks on uhf border allocations, conducted in Washington this week, was refreshing change from the customary tenseness of AM negotiations—according to participants (Vol. 13:46).

Hope is for draft of agreement early next week. With plenty of unsought uhf channels available, primary question is division of lowest channels. Minor changes in U. S. are expected, a few higher channels replacing a few lower.

In U. S. vhf allocations, meanwhile, FCC proposed 2 shifts—moving WTAE's Ch. 4 from Irwin, Pa. to Pittsburgh, WMBV-TV's Ch. 11 from Marinette, Wis. to Green Bay.

* * * *

Commission continues quite enmeshed in competitive battles. This week, for example, it said it needs more information before it can approve purchase by Bing Crosby group of KCOP, Los Angeles (Ch. 13). Commission rejected petition of NAFBRAT that station's license be revoked because of questionable programming—but it decided it wanted more specific word on Crosby group programming plans. Purchaser had said it intended no substantial change in operation.

Commission also held up effectiveness of sale of KREM-TV, Spokane (Ch. 2) by Louis Wasmer to group headed by Mrs. A. Scott Bullitt, northwest telecaster—pending hearing on protest by TV Spokane Inc. (Vol. 13:34, 39).

CP granted: Ch. 8, Elk City, Okla., to KASA. Translators authorized: Ch. 78, Leadville, Colo.; Ch. 80, La Grande, Ore.; Ch. 81, Benton City & W. Richland, Wash.; Ch. 78, La Barge & Big Piney, Wyo.; Ch. 71, 75 & 79, Evanston, Wyo.

Notes on Upcoming Stations: Continued growth of translators—a steady pace at rate higher than expected—sees 73 stations currently operating, 48 more CPs, 27 applications. Large number of stations and applications is particularly surprising in view of pendency of FCC rule-making to establish vhf booster service, which in effect gives the 200-plus currently unlicensed boosters the hope of legitimacy. Pres. Ben Adler of Adler Electronics—sole manufacturer of equipment—told us at EIA quarterly meeting in N. Y. that “business remains steady, about 3-4 orders a month.” He said he is also getting some orders from South America.

Nearly all operating translators are non-profit projects. Some are owned by municipal governments, others by civic groups such as Lions Club, or by cooperatives especially established to buy and operate them. Quite a number are licensed to employers in remote locations—such as lumber camps, power projects, etc.—to bolster worker morale and keep employes. Latest translator starter, K72AK, Yosemite National Park, falls within this category, licensed to Yosemite Park & Curry Co., concessionaire under contract to U. S. Govt. It began operation Nov. 17.

Some TV station operators are closely following experiences of WWLP, Springfield, Mass. (Ch. 22), first station to use translators as well as uhf satellites to supplement its coverage (Vol. 13:25). FCC Chairman Doerfer

FCC's antenna farm proposal—which would require that all future TV towers in a community be located in same area except in special cases (Vol. 12:13, 17)—was reopened this week for further comments, final deadline being set at Dec. 30. Commission said it took action in order to incorporate recommendations of Joint Industry-Govt. Tall Structures Committee (JIGTSC) in rule-making and because some comments indicate there may be “misunderstanding” of original proposal. New rule-making notice, including JIGTSC criteria on aeronautical study involving tall towers, is available from Commission as FCC Notice 57-1284 (Doc. 11665).

FCC licensing fees to help recover cost of govt. services are again suggested by Budget Bureau in new bulletin sent to all executive agencies. Bulletin calls for “preparation of legislative proposals for the development of an equitable & uniform” policy on charges by agencies. It notes “charges range from zero to 100% of the costs,” pointedly cites FCC as agency which makes no charge for issuing licenses. Similar fee proposals in past have been resisted by Commission.

Three applications for TV stations and one for a translator were filed with FCC this week, bringing total to 119 (33 uhf) for stations, 27 for translators. Station applications: for Mankato, Minn., Ch. 12, by group including publisher of *New Ulm Journal* and *Fairmont Sentinel*; for New Orleans, Ch. 12, by partnership of 9 local businessmen; for Tampa, Ch. 10 by owners of WKRQ-TV, Mobile, Ala. (Ch. 5). Translator application was for Ch. 72, Jackson, Wyo. [For details, see *TV Addenda 25-Q*.]

Stripteaser Lili St. Cyr's interview on ABC-TV *Mike Wallace Show* last month so disturbed FCC Comr. Robert E. Lee that he requested kine, which was scanned by commissioners and staff. Lee makes no secret of fact he considered dancer's ideas on marriage and children “personally offensive.”

and Comrs. Hyde & Mack, along with Commission staffers, this week visited WWLP's satellite-translator chain at invitation of uhf-dominated Committee for Competitive TV.

No new TV stations went on air this week, leaving operating total at 518 (91 uhf).

In our continuing survey of upcoming stations, these are latest reports from principals:

WMBD-TV, Peoria, Ill. (Ch. 31), installing 25-kw RCA transmitter, has moved test pattern target up to first week in Dec., plans Jan. 12 start with CBS-TV, reports v.p. & TV director Robert O. Runnerstrom. Ideco 500-ft. tower with 24-gain antenna is scheduled to be ready Nov. 27 and studio-transmitter microwave is to be completed by Dec. 1. Base hour will be \$500. Rep will be Peters, Griffin, Woodward Inc.

KHUM-TV, Eureka, Cal. (Ch. 13) has ordered 5-kw RCA transmitter, plans March 1 programming, reports mgr. & 50% owner Carroll Hauser. Foundations for studio-transmitter building on Humbolt Hill Rd. are ready. Station will have 3-bay antenna on 200-ft. self-supporting tower. Base hour will be \$150. Rep will be Hollingbery.

KXLJ-TV, Helena, Mont. (Ch. 12) now has 500-watt RCA transmitter, expects to start soon as satellite of parent KXLF-TV, Butte (Ch. 4), reports pres.-gen. mgr. Ed Craney. Studio-transmitter building has been completed and 2-bay antenna installed on 80-ft. Fisher tower. KXLF-TV has \$200 base hour. Rep is Walker.

Facility changes: WDSM-TV, Duluth, began using new 800-ft. tower Nov. 18; WHBF-TV, Rock Island, plans change to 1000-ft. tower in mid-Dec.

New GE Color Camera: Slated for production in "immediate future," new compact live color studio camera (Vol. 12:39) was unveiled by GE this week at opening of new WRGB-WGY TV-radio center in Schenectady. Features of camera, as described and demonstrated by GE broadcasting gen. mgr. J. Milton Lang: (1) Weight is 215 lb., 75 lb. less than "current models;" dimensions are 34x18x22-in., 10-in. shorter, 3-in. narrower, 1-in. lower. It utilizes transistors and printed circuits to save space. (2) New optical system eliminates need for many glass surfaces, is said to improve color quality. (3) For greater mobility, only one camera cable is used, compared with 3 on some current models. (4) It will be priced "competitively" with current \$50,000 live color cameras.

Color progress: Color signals from Chicago's WGN-TV are so crisp and clear, and brilliant, according to an enthusiastic correspondent, that he characterizes veteran chief engineer Carl Meyers as "the David Sarnoff of Chicago color." From Cincinnati, Crosley's WLWT reports it's now broadcasting average of 28 hours of color weekly; besides carrying NBC network color it originates 2 daily shows of own 7 days a week which it pipes to other 4 Crosley stations.

Mobile closed-circuit color system by Marconi has been ordered by Smith Kline & French Labs (American pharmaceutical firm) to be placed at free disposal of medical meetings throughout Britain. Following success of tour with American equipment earlier this year, firm decided to offer service permanently—using British 405-line system with Anglicized NTSC standards.

New reps: KOSA-TV, Odessa, Tex. to Colling Nov. 1 (from Pearson); upcoming KIRO-TV, Seattle (Ch. 7), due in Feb., names Peters, Griffin, Woodward Inc.

Electronics Reports: IRE named 75 engineers & scientists as Fellows of the Institute at board meeting Nov. 10 in N. Y. Fellow awards, denoting highest membership grade offered by IRE, will be presented by IRE sections. Recognition of awards will be made March 26, 1958 at IRE annual banquet in Waldorf-Astoria, N. Y. Recipients:

Milton L. Almquist, Bell Labs; Isaac L. Auerbach, Auerbach Electronic Corp.; Alfred C. Beck, Bell Labs; Alexander B. Bereskin, U of Cincinnati; Charles J. Bretwieser, LearCal Div., Lear Inc.; Frederick E. Brooks Jr., Collins Radio; Helmut L. Brueckmann, Signal Corps Engineering Labs; Ralph L. Clark, research administrator, U.S. Govt.; Ralph I. Cole, Melpar; Helio Costa, Brazilian Govt.; Cullen M. Crain, U of Texas; Wilbur B. Davenport Jr., Lincoln Lab; Harold E. Dinger, Naval Research Lab; Michael J. DiToro, Polytechnic Research & Development Co.; Joseph B. Epperson, Scripps-Howard TV.

Gilbert H. Fett, U of Ill.; Raymond L. Garman, GPL; Irvin H. Gerks, Collins Radio; Lawrence J. Giacchetto, Ford Motor Co.; Anthony B. Giordano, Polytechnic Institute of Brooklyn; Patrick E. Haggerty, Texas Instrument; Albert C. Hall, Bendix Aviation; Jack W. Herbstreit, National Bureau of Standards; Conrad H. Hoepfner, Radiation Inc.; Pierre M. Honnell, Wash. U; Rear Adm. Charles F. Horne (ret.), Convair; Henry Jasik, Jasik Labs; Armand F. Knoblaugh, U of Cincinnati; Walter H. Kohl, Stanford U.

Harold Lyons, Hughes Aircraft; Nathan Marcuvitz, Polytechnic Institute of Brooklyn; Warren A. Marrison, Bell Labs; Stewart E. Miller, Bell Labs; Jacob Millman, Columbia U; Harry R. Mimno, Harvard; John R. Moore, North American Aviation; Harrell V. Noble, Wright Air Development Center; Wen Y. Pan, RCA; Rolf W. Peter, RCA Lab; Arnold P. G. Peterson, General Radio; Louis A. Pipes, U of Cal.; Robert A. Ramey Jr., Westinghouse; Richard C. Raymond, GE.

John L. Reinartz, Eitel-McCullough; Henry J. Riblet, Microwave Development Labs; Nathaniel Rochester, IBM; John B. Russell, GE; Marvel W. Scheldorf, Andrew Corp.; Elmer H. Schulz, Armour Research Foundation; J. Carl Seddon, Naval Research Lab; Harner Selvidge, Bendix Aviation; Robert J. Shank, Hughes Aircraft; William M. Sharpless, Bell Labs; J. A. Smale, Cable & Wireless Co. (England); Rodolfo M. Sorla, Amphenol; Richard R. Stoddart, Stoddart Aircraft Radio; Peter G. Sulzer, National Bureau of Standards; David E. Sunstein, General Atomics; Robert H. Tanner, Northern Electric (Canada); Emerick Toth, Naval Research Lab.

Orrin W. Towner, WHAS, Louisville; Benjamin F. Tyson, Sylva; George L. Van Deusen, consultant; Donald L. Waidelich, U of Mo.; Dean A. Watkins, Stanford U; Richard C. Webb, Colorado Research Corp.; Joseph Weber, U of Md.; Vernon I. Welhe, Air Transport Assn. & Melpar; Homer W. Welch Jr., Motorola; Frank H. Wells, Atomic Research Establishment (England); David F. Winter, Moloney Electric; Jay W. Wright, Radio Service Corp. of Utah; Lotfi A. Zadeh, Columbia U.

Court battle of the prompters has been joined with Q-TV Inc. suit for \$1,100,000 damages filed in N. Y. Supreme Court against Curtis Publishing Co., Teleprompter Corp. and its pres. Irving Kahn. Suit is based on *Saturday Evening Post* article "Sure Cure for Stage Fright," claiming it contains "false and defamatory matter" about Q-TV." Teleprompter's rebuttal from Kahn: "*Saturday Evening Post* has been around a lot longer than the plaintiff and has a distinguished reputation for accuracy. The writer of this story is one of the nation's finest reporters. That's all I have to say on the matter at this time."

Importance of TV residuals to movie actors was underscored at annual Screen Actors Guild meeting in Hollywood, where TV administrator Kenneth Thompson reported that payments for film reruns totaled \$2,576,491 in year ended Oct. 31. He said 39,601 checks distributed during year represented more money than was paid in 3 previous years. Guild has collected residuals on 5600 episodes in 169 series, payments since Dec. 1953 totaling \$4,790,618.

Skiatron's application for San Francisco cable TV franchise was deferred again as finance committee of city's Board of Supervisors indefinitely postponed scheduled Nov. 27 hearing. New postponement was ordered because Skiatron still hasn't submitted statement of its financial backing, according to chairman Harold S. Dobbs of committee which must rule on application before it goes to full board.

Sales of Teleprompter's "Telepro 6000" rear-screen slide projector have exceeded \$100,000 in 3 months since its introduction, according to sales v.p. Herbert W. Hobler who reports device is being used by more than 30 TV stations.

New IRE president for 1958 is Donald G. Fink, Philco research director, succeeding John T. Henderson, principal search officer of National Research Council, Ottawa. Carl-Eric Granqvist, director of Svenska Aktiebolaget Gasaccumulator, Stockholm-Lidingo, Sweden, elected v.p., succeeding Yasujiro Niwa, pres. of Tokyo Electrical Engineering college, Tokyo. Elected directors for 1958-60 term: G. S. Brown, head of MIT electrical engineering dept.; W. H. Doherty, asst. to pres., Bell Labs. Elected regional directors for 1958-59: Region 1, R. L. McFarlan, consultant, Chestnut Hill, Mass.; Region 5, E. H. Schulz, asst. director of Armour Research foundation, Chicago; Region 7, G. A. Fowler, research v.p., Sandia Corp., Albuquerque.

IRE W.R.G. Baker Award for 1958 goes to R. L. Kyhl & H. F. Webster, GE research lab, Schenectady, for paper "Breakup of Hollow Cylindrical Electron Beams." Browder J. Thompson Memorial Prize goes to Arthur Karp, Bell Labs, for paper "Backward-Wave Oscillar Experiments at 100 to 200 kmc."

Stepped-up missile program means higher taxes or cutback in non-defense govt. spending, IT&T pres. Edmond H. Leavey told Nov. 18 annual meeting of National Defense Transportation Assn. in Washington. He said the armed services "must establish better inter-service coordination" in missile development and support fully missile chief Dr. James R. Killian Jr.

Industrial electronics equipment expenditures by major industries totaled \$1.028 billion during 1957, may jump 43% to \$1.46 billion by 1960, according to 200-company survey reported in Nov. 20 *Electronics* magazine.

New Westinghouse microwave research center at 310 N. Aurora St., Ithaca, N.Y. goes into operation in Dec., E. C. Okress in charge.

HOME ELECTRONICS—\$21 BILLION SINCE 1948: Mighty handy table, which we suggest you keep nearby for ready reference, is breakdown of home amusement dollar volume since 1948 -- for which we're indebted to Sylvania's Market Research Dept.

Table below gives factory value for each year for each device, but it gives retail value of each year for combined total of all devices -- and this comes to whopping \$21.724 billion for the 9 years covered. Yet, as large as that figure appears, it's still but a drop in public's budget -- for Commerce Dept. estimates "personal consumption expenditures" for 1948-1956 are \$1.9475 trillion. Herewith the Sylvania table (add 000,000):

Year	Home Radio	Auto Radio	TV Sets		Phonos. (Except Combos.)	Other Amusement Devices	Distri- bution Revenue	Total
			B & W	Color				
1948	\$ 395.6	\$ 132.7	\$ 209.7	\$ -	\$ 15.0	\$ 125.0	\$ 702.4	\$ 1,580.4
1949	180.0	106.9	513.0	-	20.0	102.0	737.5	1,659.4
1950	220.8	121.7	1,110.2	-	30.0	106.0	1,271.0	2,859.7
1951	183.2	127.8	1,014.6	-	60.0	60.0	1,156.5	2,602.1
1952	154.0	92.8	1,049.2	-	63.0	63.0	1,137.6	2,559.6
1953	154.7	129.6	1,088.0	-	63.0	63.0	1,198.6	2,696.9
1954	134.4	102.5	1,058.5	-	60.0	60.0	1,132.3	2,547.7
1955	138.0	172.5	1,013.8	15.4	79.5	70.5	1,191.8	2,681.5
1956	177.8	126.4	864.6	42.0	123.5	75.0	1,127.4	2,536.7
TOTAL	\$1,738.5	\$1,112.9	\$7,921.6	\$57.4	\$514.0	\$ 724.5	\$9,655.1	\$21,724.0

* * * *

Going from past to future, Hotpoint's annual 10-year forecast sees factory shipments of 53,200,000 black-&-white sets, 43,100,000 color; for current year, prediction is for 6,800,000 black-&-white, 200,000 color. (Most current industry estimates expect about 6,200,000 black-&-white shipments this year.)

Hotpoint estimate is for continuing rise in black-&-white factory shipments to 7,700,000 in 1960, plus 1,000,000 color. Then it sees black-&-white declining steadily, color mounting. For 1961, it predicts 7,200,000 & 2,000,000 (compared with its estimate a year ago of 9,200,000 total with 4,000,000 color in 1961). In 1967, forecast is for 2,600,000 black-&-white, 8,500,000 color. No radio estimates given.

'More of the Same' for '58: Set manufacturers looked ahead into 1958 for us this week, and most saw little change or slightly better business next year. RCA's plans, for example, are "on the conservative side, somewhere near this year on black-&-white and up on color," said consumer products exec. v.p. Robert A. Seidel.

Sales are brisk now at all levels, he said, but distributors are "buying in small quantities, probably due to credit restrictions and tightness of money." Dept. store groups have reported to him that TV retail sales started upward after Nov. 11 but he doesn't expect effects of change in Federal Reserve Board discount rate to be felt in terms of better business for at least month or 2.

Federal Reserve action came "too late to be of any help in stimulating business in fourth quarter," Admiral pres. Ross Siragusa said in letter to stockholders. TV-appliance retail business "has been late in reaching peak activity this fall," he said. "We expect the company to continue in the current quarter the progress made in the third quarter." Admiral's total inventories were down 30% Sept. 30 vs. 1956.

Emerson pres. Benjamin Abrams doesn't expect "world-shaking things to happen in TV next year." He said 1957 industry production would be "10% less than last

year and even lower in dollar volume, due to the large number of portables."

About 5% more business in 1958 is predicted by Westinghouse TV-radio gen. sales mgr. Thomas B. Kalbfus, despite fact market is "a little soft now."

Good business in 1958 for quality sets is forecast by DuMont receiver div. sales mgr. Wm. Scales, who sees continuance of steady level of sales established after DuMont stopped competing for mass market. He said fall business was good.

Another specialized manufacturer -- Olympic, which concentrates largely on TV-phono-radio combinations -- says its current quarter is biggest in history. "We can't fill back orders by end of the year," pres. Morris Sobin told us. He expects same pace to continue through first quarter.

Business Pulse: No evidence of predicted fourth quarter business upturn is seen by National Assn. of Purchasing Agents' business survey committee, reporting "production and new order positions are practically unchanged from Oct." NAPA said all materials are in adequate supply for the first time since beginning of World War II. Survey says commodity prices "continue under pressure and manufacturers are finding it difficult to pass along increased costs to their customers." Inventories are termed satisfactory; employment is again lower.

Production: TV output was 137,263 for week ended Nov. 15 vs. 138,831 the preceding week and 174,090 in 1956 week. At end of 46th week, TV production totaled about 5,673,000 vs. 6,590,049 last year. Radio production was 442,416 (152,541 auto) for week ended Nov. 15 vs. 390,435 (120,234 auto) the preceding week and 363,668 (154,718 auto) in the 1956 week. By 46th week radio production totaled about 13,184,000 (4,784,375 auto) vs. 11,921,134 (4,064,766 auto) in 1956.

Trade Personals: Norman J. Sims, ex-Canadian Aviation Corp. consumer products div., returns to his unfilled former post as gen. sales mgr., RCA Victor Ltd., Montreal . . . Thomas P. Clements named national service mgr. of Admiral; Clarence B. Flinn, regional sales mgr., Dallas; E. B. Freeman, regional sales mgr. for Philadelphia, Pittsburgh, Hazleton & Johnstown . . . Rondal L. Miller, ex-Motorola, named southern regional sales mgr., DuMont 2-way mobile radio communications, 3783 Van Ness Lane, Dallas; Howard Larsen, midwest regional sales mgr., 4908 Lincoln Ave., Chicago . . . Joseph P. Kates named patent attorney for technical products & communication products depts., GE industrial electronics div. . . . Allan Easton, sales v.p. of General Transistor Corp., named to new post of marketing div. v.p. . . . Richard J. Elkus & Joseph R. McMicking named Ampex directors . . . D. H. Prentice promoted to new post of gen. sales mgr., Philips Industries Ltd., Toronto . . . Dr. Martin L. Klein, ex-North American Aviation, heads new research div. of Cohu Electronics, with lab at 14743 Lull St., Van Nuys, Cal. . . . Ralph Campagna promoted to v.p. & marketing director of Dahlberg Co., Minneapolis (hearing aids and hospital TV & radio) . . . H. Glynn Wood named works mgr. of Stromberg-Carlson special products div.; Robert B. O'Brien, gen. sales mgr.; Michael Cardone, staff asst. to works mgr.; George R. Vincent, quality control mgr.; Raymond J. McKinnon, Pagemaster sales engineer, telecommunication div. . . . James Hervey named consumer products marketing mgr. of American Electronics . . . Wm. E. Stroud promoted to mgr. of Corning Glass Danville, Ky. plant, replacing A. Russell Arnold, transferred to mgr. of Pressware plant, Corning; John W. Spiegler follows Stroud as chief engineer of electronic components dept., electrical products div.

Obituary

Gerard Swope, 84, ex-pres. of GE and member of original NBC board when network was organized by RCA, GE & Westinghouse, died Nov. 20 at his N. Y. home.

"Usual seasonal decline in black-&-white receiver production" produced layoff of approximately 350 production line workers Nov. 19, reported by Alvin Pollock, mgr. of RCA Bloomington, Ind. plant. He said that "number of employes affected is much smaller than number of employes affected last year at this time; most are women who were added in summer and fall months when new models are introduced and demand is at the highest." Layoff of 350 production employees effective Dec. 6 was announced by Herbert Riegelman, gen. mgr., GE TV receiver dept., at Syracuse. Reason given was 17% decrease in set sales at retail for month of Oct. vs. last year. GE had also laid off 700 workers in Sept.

Admiral ads fail to disclose picture tube sizes adequately and clearly, FTC charged this week, alleging deception of public and unfair competition. Complaint says footnotes explaining "21-inch," "21," etc. are too small and far removed from rest of copy. Admiral said it would have no comment until complaint was studied. It has 30 days to answer; hearing has been scheduled for Jan. 16 in Chicago. FTC also charged Muntz TV with exaggerating size of picture tubes and claiming sets are sold directly from factory. Hearing will be Jan. 21 in Washington.

EIA's 1957-58 *Membership List* and *Trade Directory* now being distributed.

DISTRIBUTOR NOTES: Hoffman appoints Kelvinator's southeastern zone (Atlanta, Knoxville, Jacksonville, Tampa) for TV-radio-hi-fi . . . Southern Wholesalers (RCA) Washington, names Arthur J. McGettrick sales v.p. replacing Frank Levine, resigned . . . DuMont names Chapman-Harkey, Charlotte, for TV-hi-fi in most of N. C. & northwest S. C. . . . DuMont Florida (Miami) names Wm. A. Watkins, branch mgr., succeeding Charles H. Coombes . . . Granco names Frank Millman, Newark, and Conklin-Tamberg, San Francisco . . . Capehart names Jack Scott Assoc. rep for hi-fi in Ohio except Cleveland and northwest sector.

Discounters' Share Growing: Manufacturers must realize that low cost, low margin, high volume discount retailing will continue to increase its share of consumer dollar, discounter Stephen Masters, Masters Inc., told apparel group in N. Y. this week. "You must realize that less and less of your goods will be sold through traditional outlets," he said. Department stores, preoccupied with holding the margin line, he added, "have shown less growth than any other mass retailer in 25 years [and] have been blind to importance of high productivity in retail distribution" exemplified by mail order, variety, drug supermarket chains, discount houses. These operations thrive on pre-sold, nationally advertised, top quality, guaranteed brands. Manufacturers must move in on these new outlets and new forces in retail distribution or their brands will be lost to the public mind, he warned. "You can do a phenomenal business with the super-discount houses if you have what we want."

Corroborating Masters' remarks, U. S. Chamber of Commerce pres. Philip M. Talbott acknowledged "The era of high markup is gone." Speaking in Washington this week, Talbott, who is also a senior v.p. of Woodward & Lothrop department store, warned that in this day of warehouse selling and supermarket techniques distributors must do more than keep up with economic revolutions; they must "be keenly interested in govt. expenditures, govt. competition, and govt. policies which influence consumer buying power and the general economic condition."

One UHF Set Problem Licked: GE reports tests of newly redesigned uhf oscillator tube indicate life of 3 years under home TV operating conditions, as compared with average of about 3 months using older types. Redesigned tube is 6AF4, which GE engineers say continues to oscillate satisfactorily past 6500 hours vs. breakdown at 500 hours in median older type 6AF4. Long life is obtained, through "a combination of new materials usage with new manufacturing and test methods." New design features are being built into other uhf oscillator tubes.

TV tube racket probe by Bronx, N.Y. grand jury brought 4 local trade principals and 2 corporations to pleas of guilty to grand larceny, petit larceny and conspiracy. Sid Pressler, former Bruno-N. Y. parts div. sales mgr.; Sid Dorosin and Dorosin Distributing Corp., N.Y.; Murray Frankel, Robert Mintz and their TV Maintenance Corp. admitted roles in 4-year scheme in which 10,000 faulty tubes a month were fraudulently misbranded and returned to RCA for full credit. Sentencing is set for Jan. 21, could produce one year in prison and \$500 on each count.

Stop-order against "Color V" advertising was issued Nov. 20 by FTC in adopting initial decision by examiner Loren H. Laughlin that Harry G. Kriegel, trading as Superior Products, 673 Broadway, N. Y., falsely represented that plastic device he sold simulates color TV (Vol. 13:41). Kriegel had denied owning firm, said sale of "Color V" was discontinued June 1, 1956.

Prominent identification of color sets, using word "Color" in raised gold-color letters just below picture tube, has evoked dealer enthusiasm, reports RCA. Color sets had no identification 2 years ago; last year, "V" with color bar was used.

TV-radio-phono sales of department stores were up 6% for Sept. and up 2% for 9 months vs. 1956 periods, according to Federal Reserve Board report last week.

RCA Institutes graduated 138 TV-radio-electronics students Nov. 22 in N. Y.

Service Apologia: In rebuttal to *Time Magazine's* scathing treatment of service industry in Oct. 14 issue, Frank J. Moch, exec. director of National Alliance of TV & Electronic Service Assns. (NATESA), has written an attack on *Time's* alleged editorial blindspots to faults of TV manufacturers. In long letter to magazine, Moch writes, in part:

"Lay the blame where it should be placed." He blames TV manufacturers for "creating false lack of need of service," for implying "years of trouble free reception. Nothing could be farther from truth." Further, he blames "the construction of many modern TV sets, stripped down to less than bare essentials. Claims are made by set producers for technical advances as reasons for these monstrosities . . . for automation and printed circuitry in cheaper sets. True machine-built sets could cost less to produce, however, the very nature of such construction has greatly complicated service and added many new costly problems . . ."

"Most manufacturers have virtually priced themselves out of business. [They have] depressed the price structure to squeeze out competition and they have stripped sets beyond the point of no return. No margin of profit is left anywhere in the distribution system . . ."

TV-radio-hi-fi gets 1% of total U. S. annual household expenditure, according to new *Life Magazine* survey of 10,243 homes. Major appliances get 2.16%. Study breaks total for all goods & services into 8 categories: food, beverages, & tobacco, 29%; home operation & improvement, 19%; automotive, 14%; clothing & accessories, 12%; home furnishings & equipment, 9%; recreation & equipment, 5%; medical & personal care, 5%; others, 7%. Within recreation category, TV-radio-hi-fi's 20% is biggest piece; within home furnishings, major appliances' 24% is biggest, furniture's 18% is second. *Study of Consumer Expenditures* is available for \$10 from Herbert Breseman, director of research, *Life*, 9 Rockefeller Plaza, N. Y.

Plea for standardization of tube design delivered by Donald W. Gunn, gen. mgr. of Sylvania electronic products sales dept., before Joint Electron Tube Engineering Council in Philadelphia last week, points out that minor variations "dreamed up" by design engineers and customers have "flooded the market and distribution channels with galaxy of tube duplications representing endless loss of time and money." He noted that current tube replacement market now handles 735 different types, of which 95 types do 80% of sales.

Measurement of standards for hi-fi equipment is long awaited project just launched by Institute of Hi-Fi Mfrs., under direction of Pilot Radio's Joseph N. Benjamin. Questionnaires seeking standards recommendations being circulated among component makers by committees headed by: Daniel Von Recklinghausen, H. H. Scott (for tuners); Dick Shottenfield, Pilot (amplifiers); Abe Cohen, University (speakers); George Silber, Rek-O-Kut (turntables); Milton Thalberg, Audiograph (changers).

Looking for a "Day" to build a promotion around? U. S. Chamber of Commerce has released 1958 edition of "Special Days, Weeks, Months," listing 350 legal holidays, religious observances and business promotional events. Single copies available at 50¢ from Chamber's domestic distribution dept., 1615 H St., N.W., Washington. New listings include: National High Fidelity Month (Oct.), Bachelors' Day (Feb. 28); Old Maids' Day (June 4.)

EIA Meeting: TV Week was described as successful campaign—but its effect on sales was hard to ascertain, according to consumer products div. report at this week's EIA quarterly meeting in N. Y. No decision was reached on similar year-round program.

Consumer products group agreed to try again for TV excise tax reduction from 10% to 5% and exemption of all-channel & color sets.

Education committee actions: (1) Voted to continue support of Hagerstown school-TV project for school year. (2) Decided to discontinue preparation of text books & lab manuals since needed books are available, but to continue distributing books already prepared. (3) Suggested another committee look into need for books in military electronics field.

Guided missiles chairman F. R. Lack was authorized to name task force to determine whether EIA can help President's Scientific Advisory Group.

International div. reported 8-mo. commercial electronic parts exports of \$210,500,000 vs. \$223,000,000 in 1956 period; TV-radio parts imports (mostly radio) of \$9,400,000 vs. \$8,600,000 for entire 1956. W. Germany was principal importer, followed by Japan, Britain.

The Siegler Buildup: Siegler Corp., recently merged with Olympic Radio & TV, Bogen-Presto, Hufford Corp., had record earnings and sales for quarter ended Sept. 30, pres. John G. Brooks told Nov. 21 meeting of N. Y. Security Analysts. He listed earnings of \$368,602 (31¢ per share) on sales of \$16,662,835 vs. \$272,559 (37¢) on 1956 period sales of \$6,881,386.

Brooks said current business is broken down thus: 63% electronics, 28% heating equipment, 9% tooling & machinery—with 23% of total in defense sales.

Olympic pres. Morris Sobin told us his div. "has peak employment," has hired 300 more employes this year and expects further increases in both employment and plant. He said Olympic TV-radio consumer sales for quarter ended Sept. 30 were 40% over 1956 quarter; for first 10 months volume of gross sales was up 26.1% over last year. Hi-fi-TV-radio combination sales increased 146% in Oct. compared with preceding Oct., for first 10 months sales were up 250%, Sobin said, adding that Bogen div. expected to improve sales & profit picture over last year.

* * * *

Avco, resuming 10¢ quarterly dividend payment Nov. 20 after hiatus since May 1955, this week reported consolidated earnings of \$8,586,374 (92¢ per share) in first 9 months of 1957 vs. operating 1956 period's loss of \$3,499,529, or 41¢ per common share, exclusive of a \$16,000,000 reserve provided for discontinuance of a major part of its appliance operations. Avco's Crosley Bcstg. Corp. operates 5 TV stations and radio WLW, but these are not separately reported. Consolidated sales for 9-mo. period were \$238,983,886 vs. \$246,168,438 in 1956 period which included certain consumer products (notably TVs, radios & refrigerators), since discontinued. Avco claims to be nation's 24th largest producer of defense goods, reports contracts amounting to \$134,968,069 since July, including \$111,308,359 for nose cone for Air Force's intercontinental ballistic missile.

Financial Notes: American Broadcasting - Paramount Theatres earnings in fourth quarter will be lower than in 1956 period (Vol. 13:13) despite increase in ABC-TV income, pres. Leonard H. Goldenson predicted this week. Noting that 9-month earnings this year were 91¢ per share vs. \$1.31 year earlier (Vol. 13:43), Goldenson projected similar results for rest of year on basis of costs incurred in setting up new ABN program structure, decline in theatre business which he blamed on flu epidemic and lack of box-office movies. He said TV earnings weren't enough to offset these factors.

* * * *

Columbia Pictures has no intention to spin off its TV subsidiary Screen Gems, v.p. Abe Schneider told stockholders meeting in New York this week. In fact, he said, Screen Gems is "in the black" and grossed \$22,000,000 in fiscal year ended June 29, or 20% of Columbia's sales of \$101,552,897, compared with \$11,000,000 in fiscal 1956. He said Columbia had "poor quarter" in period ending Sept. 30, with income dipping below 10¢ a share, vs. 71¢ in same 1956 period. Screen Gems has been negotiating for Paramount's 700-feature backlog, he confirmed, but hinted that attitude of Justice Dept. would have to be reckoned with in any such deal. He said Columbia had discussions with anti-trust div. concerning Screen Gems' acquisition of Universal Pictures' pre-1948 backlog last Aug.

Crowell-Collier Publishing Co., which owns radio KFWB, Los Angeles, operates record club and produces encyclopedia through subsidiary P. F. Collier & Sons, reports third-quarter consolidated earnings of \$888,774 on sales of \$8,121,800 and 9-month profits of \$2,787,739 on sales of \$22,706,300. Comparable figures for 1956, when Crowell-Collier lost \$4,427,943 following foldings of its magazines (Vol. 13:24), were not available because company reported then only on 6-month and year-end basis. Earnings this year were tabulated after deducting non-recurring charges of \$260,000 applicable to 1956. No provision was made for federal income taxes because of carry-over from losses last year.

National Telefilm Assoc. earned record \$1,094,031 (\$1.60 per share on 682,526 shares outstanding) in fiscal year ended July 31 vs. \$441,877 (68¢ on 650,000) year earlier. Exhibition contracts written by NTA during period totaled \$17,720,134 vs. \$5,793,975 in fiscal 1956. Film rentals aggregated \$10,976,479 vs. \$3,818,627. Total assets as of July 31 were \$32,143,270 vs. \$13,092,934 in 1956, working capital was up to \$11,806,936 from \$2,837,055. Reporting gains, NTA chairman Ely A. Landau said this week that "feeling of optimism seems justifiable" for fiscal 1958.

Dividends: AB-PT, 25¢ payable Dec. 20 to stockholders of record Nov. 29, no action on year-end extra; Storer, 45¢ plus 6¢ on "B," both Dec. 13 to holders Nov. 29; Meredith Publishing, 45¢ Dec. 12 to holders Nov. 29; Time Inc., \$1.50 Dec. 10 to holders Nov. 27; Cornell-Dubilier, 30¢ Dec. 31 to holders Dec. 12; Friden, 25¢ Dec. 10 to holders Nov. 29 plus 2½% stock Dec. 27 to holders Nov. 29; AT&T, \$2.25 Jan. 10 to holders Dec. 10; American Electronics, 12½¢ Dec. 13 to holders Nov. 29; Whirlpool, 35¢ Dec. 31 to holders Dec. 13.

Paramount Pictures reports consolidated earnings of \$1,878,000 (94¢ per share) in quarter ended Sept. 28 vs. \$1,654,000 (83¢) in 1956 period. For 9 months net income was \$4,237,000 (\$2.13) vs. \$3,976,000 (\$1.99) year earlier, when earnings didn't include non-recurring profits of \$2,767,000 (\$1.38).

Television—"The \$100 Billion Pump-Primer"

BY C. WREDE PETERSMEYER

President, Corinthian Broadcasting Corp.

ONLY SOMETHING so successful and so important as television could garner such a preponderance of critical potshots and brickbats as have been hurled at the medium, since its inception, by press critics, certain elected representatives, governmental "study" groups, as well as by high-domed cynics. Negative criticisms of program content, types and numbers of commercials, and the power of the networks have captured far more than their rightful share of headlines. To most of us in the industry, the majority of such blasts seem patently unjust. Moreover the significance of most of these criticisms pales in relation to the enormously important contributions of the medium. Some bravos and bouquets are long past due.

And here I am not referring primarily to the more commonly accepted contributions of TV in the areas of entertainment, education and public service. Rather, may I point deliberately to the enormous importance of the 10-second, 20-second and minute advertising message to the very health of our economy. In truth, the much scorned "commercial" should be hailed as perhaps the single most important contribution of American telecasting.

The living sight-sound-and-motion TV commercial in homes of 41,000,000 American families has set off a chain reaction to buying, production and employment never before dreamed of. The advent of TV has brought about a vastly significant and revolutionary change in the line of mass communication between 130,000,000 Americans and American industry. Virtually overnight it has made possible the "personal" selling of goods and services in the very living rooms of 41,000,000 homes.

TV Key Factor in Consumer Sales

A strong case can be made that TV has been *the* key factor in the increase in Total Sales to Consumers in the past 8 years of more than \$100,000,000,000 annually. Instead of being dubbed "The Billion Dollar Whipping Boy" (quoting our own trade press), TV should rightfully be called "The Hundred Billion Dollar Pump-Primer." It is high time that the voice of the economist be heard above that of the program critic and the congressional investigator. Let's look at the facts:

Between 1949 and 1957 Total Sales to Consumers in the United States rose from \$180.6 billion to \$280 billion. Is it mere coincidence that *during this same period* homes owning TV sets increased from less than 1,000,000 to more than 41,000,000? Between 1949 and 1957 the Index of Industrial Production rose 44%. Is it mere coincidence that *during this same period* advertisers increased their expenditures on the TV medium from \$57,800,000 to \$1,300,000,000 to showcase their goods and services?

In 1949 Gross National Product stood at \$257 billion. In 1957 Gross National Product will total \$437 billion. Is it mere coincidence that *during this same period* the hours the families of America spent watching TV (complete with commercials) increased from 2,915,000 *per day* to a staggering 210,807,000?

How can one conclude other than that this relationship between the health of the economy and the growth of TV is more than coincidental? Have we not found in TV the secret catalyst for speeding the whole economic spiral of increased demand for goods, that leads to increased production, that in turn leads to increased employment and buying power, and on and on ad infinitum?

In many quarters TV is on the defensive. Is it possible that its critics, yea even the industry itself, have not fully assessed the explosive "H-Bomb" effect of TV on industrial activity? We may have failed to realize that the very commercials some are wont to condemn are *absolutely vital* to maintaining the present level of economy. The constant bombardment of 41,000,000 television-owning families (who watch on an average more than 5 hours a day 365 days a year) with the glittering array of products and services of American industry, and with the known persuasiveness of sight-sound-and-motion, is bound to have created demands for goods to an extent never dreamed possible before TV.

Toll TV Threatens Selling Capacity

All of this has a direct bearing on current discussions regarding pay TV. No one familiar with the industry doubts that, if successful, pay TV could well outbid free TV for talent. Audiences will be diverted to juke-box "entertainment-only" TV. Should this happen, the strength of TV as a vital *selling* force will be dissipated. It will no longer be vital in the consumer-manufacturer relationship. Even if advertising should find a place in the toll TV scheme, it would diminish in importance because of restrictions in mass viewing inherent in any fee system.

Do we dare tamper in such a fashion with the secret catalyst so responsible for the vitality of our present economy—particularly at a time when there are indications of economic storm clouds on the horizon? Will our legislators be so cavalier as to permit the removal of TV as *both* an entertainment *and* a sales medium by authorizing pay TV? Will American industry, which has become so dependent on TV for moving its goods, allow such a thing to happen without raising its voice in protest? Can the advertising fraternity which is responsible to American industry for creating the demand for its products afford to remain silent on this issue? Why do they not speak up?

SUMMARY-INDEX OF THE WEEK'S NEWS — November 30, 1957

"WAIT FOR TASO" before probing 25-890 mc, telecasters urge FCC; NAM drops FM band-sharing request. EIA spectrum study marks time (p. 1).

SCHEME FOR TAX ON ADS spreads from Baltimore to St. Louis as TV-radio-press fight on constitutionality opens; AFA calls threat "most dangerous" (p. 3).

KANSAS CITY DEAL points up dangers of tie-in rates, may signal more efforts by theatremen to get into TV (p. 3). Background on National Theatres Inc. (p. 5). List of theatrical ownerships in TV (p. 4).

NEW BOSTON STATION, WHDH-TV, goes on air, giving ABC-TV long-sought full-time access to market; on-air U. S. TV total now 519 (p. 8).

END OF "WRITTEN HEARINGS" seen as major change in streamlining FCC legal procedures. U. S.-Mexican border uhf talks end with few changes (p. 8).

ZENITH "AGREEMENT" with stations planning to apply for pay TV reported by company source; Cal. lawmaker sees wire franchises invalid (p. 9).

SUBLIMINAL ADVERTISING can be controlled under present laws, FCC believes on basis of inquiry to date; sees "no immediate danger" (p. 14).

Manufacturing-Distribution

FIRST WORD OF '59 SETS: trend to contour styling at back of portables, stronger push to hi-fi sound in consoles (p. 10).

SALES UP, PRODUCTION DOWN in preliminary Nov. estimates, compared with last year; factory & distributor inventories increase 200,000 (p. 10).

DR. W. R. G. BAKER, TV-electronics pioneer, retires as GE v.p. on 65th birthday, but remains active as EIA pres., also becoming Syracuse U v.p. (p. 11).

SPECTRUM STUDY—'WAIT FOR TASO': FCC officially began taking its long-range look at radio spectrum between 25 & 890 mc—the part which houses FM & TV bands among many other services—and these trends showed up strongly in the 200 comments filed:

(1) Nearly all industrial radio users asked for far more frequencies, pointing to their needs for expanded service—but, with a couple of exceptions, they shied away from even hinting that they'd like a chunk of the TV or FM bands. Even NAM's Manufacturers Committee on Radio Use—which stirred a furor 2 years ago when it asked to share FM broadcasting frequencies—inferentially dropped the request this week.

(2) Telecasters—nearly 100 of them filed—urged that Commission hold off its long-range study until conclusion of TASO's exhaustive FCC-mandated inquiry into the entire TV allocations situation.

(3) More than a score of FM broadcasters filed in the proceeding, speaking as one man: FM is finally moving ahead; leave it alone; don't mess with the FM band.

Commission currently has no plans to call hearing in the proceeding. Upon digesting comments and consulting crowded calendar, it could decide any way: Hearings soon; hearings later; no hearings at all; "paper" hearings, with all sides presenting their written views on the specific issues. Best guess: No action for some time.

Among filings in proceeding, perhaps biggest surprise was NAM's comments, which implied that FCC's proposals for manufacturers' radio frequencies would satisfy its requirements, made no reference to its still-pending petition for shared use of FM broadcast frequencies. In scanning comments, we could find only one large organization which specifically mentioned possibility of turning broadcast frequencies

to other uses. It was Assn. of American Railroads, which listed the "very sparsely occupied" FM broadcast band as one of 3 "examples" of frequencies which might be utilized by other radio users.

While many industrial radio users undoubtedly have their eye on FM & TV frequencies, most of them apparently decided that now is not the time to mention it.

Many comments by TV stations were merely "foot-in-door" filings, reserving right to appear at any hearings. Among points made by TV-radio interests:

NARTB urged that FCC's review of spectrum be delayed until TASO study is completed, asked preservation of present FM band & standards and "adequate frequencies" for TV remote pickup.

CBS, NBC & ABC had similar comments with respect to TASO study, CBS adding request that FCC consider authorizing operation of wireless microphones for TV on any or all frequencies from 25-50 mc on non-interference basis.

Dage TV div., Thompson Products, raised possibility of special industrial TV frequencies when it urged that "expanded private frequency usage be permitted with a full recognition of TV as a basic and integral use for which full provision should be made in the adoption of applicable eligibility and engineering standards not only in the broadcast field but in the many other fields which have a need for this type of communication." It raised question whether TV & FM will ever adequately use all frequencies assigned to them, urged quick completion of TASO inquiry, since "broadcast problems present the principal major obstacle to a basic and comprehensive review [with] a view to reallocation."

Indicative of increasing competition for frequency space in vicinity of TV allocations was filing by American Rocket Society (which has 105 corporate members), requesting FCC bear in mind that more frequencies will be required in future for satellites, space ships, etc.

One TV station—WTVR, Richmond—enclosed as appendix comments by Washington pioneer broadcast engineer James C. McNary advocating study of possibility of uniform international TV scanning in view of prospects for transoceanic TV transmission "in the near future."

■ ■ ■

Electronic Industries Assn. took longer-range view than most groups in the filing by its TV broadcast equipment section (Ben Adler, chairman), when it stated:

"There is a real need in the TV broadcasting industry for a contiguous portion of the spectrum somewhere in the vhf and/or uhf frequencies providing approximately the same number of TV channels as are now available in the allocations plan but which are at present spread over a wide range of frequencies with many gaps and spaces in between."

EIA maintained only way to accomplish rearrangement is to investigate all spectrum requirements—not only of private services, but of Govt. as well—and promptly stated it is already investigating possibilities of this all-allocation study.

EIA's spectrum investigation seemed to be marking time this week, however—waiting for govt. agencies (FCC, Defense Dept., ODM) to set meeting dates (Vol. 13:47). Following earlier preliminary meetings, EIA's spectrum study committee—at request of govt. agencies—put its investigation ideas in letter, first part covering background, second part suggesting possible means of implementing study.

Govt. & EIA representatives almost got together last week, with Nov. 14 meeting scheduled at Hotel Roosevelt, N. Y.—but snafu occurred when govt. representatives thought meeting was to be held at Hotel Roosevelt in Washington, prompting some trade papers to report that Govt. had backed out of study. Meeting will be rescheduled.

As to procedure for spectrum study, it's understood at least 3 methods have been discussed by the EIA committee: (1) Study by large committee, composed of representatives of all interested spectrum users, from industry and Govt. (2) Investigation by a congressional committee. (3) Appointment of "referee"—man of unquestioned standing, not currently connected with Govt. or frequency-using industry—who would conduct study, consulting with all parties.

BALTIMORE AD TAX INFECTION SPREADS: Another revenue-hungry municipality reached out this week toward broadcasters & newspapers to grab special advertising taxes, following lead of Baltimore (Vol. 13: 45-47) despite opening of all-out court battle there to declare its 6% assessments unconstitutional.

St. Louis sales levy of 4% on all intra-state broadcast commercials—and on advertising in newspapers and most other media—was proposed by Alderman Alfred I. Harris to raise \$1-\$2,000,000 annually for city's treasury. He said he also may add 2% tax on gross advertising receipts of media—such as Baltimore City Council voted to impose Jan. 1—but wanted clarification of it first.

No other municipality was reported ready to adopt Baltimore plan, but threat of spread of scheme to St. Louis was sufficient for Advertising Federation of America to sound alarm throughout country. AFA alerted its 120 affiliated advertising clubs for counter-offensive, started raising \$50,000 war chest from 30,000 members.

"It's the most dangerous threat to advertising in years," AFA pres. C. James Proud said, warning that if advertisers lose Baltimore court battle, tax plan "is going to spread like wildfire across the country."

Circuit Court action in Baltimore to stop 4%-plus-2% levies was started by Sunpapers (WMAR-TV), News-Post and Sunday American (WBAL-TV & WBAL), Westinghouse's WJZ-TV. They sought injunction to prevent tax collections.

Similar briefs filed by plaintiffs contend that special imposts: (1) Violate free speech & press provisions of U. S. Constitution and Md. Declaration of Rights. (2) Exceed taxing power of Baltimore City Council, since state itself exempts newspapers from taxation. (3) Are too "vague & indefinite" to be valid in any event.

Defendants Mayor Thomas D'Alesandro & City Council were given until Dec. 17 by Judge Edward Harlan to show why injunction shouldn't be granted. They had sponsored tax scheme to yield \$2,650,000 for 1958 municipal budget of \$232,000,000.

POSTLUDE ON THE KANSAS CITY STORY: Full confirmation of our disclosure last week that National Theatres Inc., headed by Elmer C. Rhoden, was likely buyer of Kansas City Star's WDAF-TV & WDAF (Vol. 13:47)—price now revealed as \$7,600,000 cash for plant, network & advertising contracts, goodwill, etc., no quick assets—points up several significant developments involving TV-radio broadcasting:

(1) Because the movie business is notoriously inclined to follow-the-leader, National Theatres Inc., avowedly planning to acquire more stations, may very well touch off a movement by more theatre interests to acquire stations—just as successful newspaper operation of radio and TV stations led many more newspapers and even magazines into the field. Newspapers were among main pioneers of TV-radio, but many also got in quite belatedly by way of purchase. So, of course, did some theatre people—but not very many.

There are some real pioneers among the theatre folk, of course (notably Paramount, Kallett, Wometco, Balaban, Martin of Georgia, et al), but you will note that their ownership bulks rather small among the 519 TV stations now on air and even among pending applications as listed in our TV Factbook.

Even discounting the still cloudy pay-TV potential, fact that they're in a business slump blamed in large part on TV keeping people at home (often to see old movies) would naturally lead theatre people to eye the profitable operation of TV and radio stations enviously. No one dreamed only a few years ago that the tail would wag the dog in a changing economy which finds some newspaper TV stations doing vastly better than their newspaper parents. Ownership of stations would be a natural hedge against shrunken boxoffices.

In other words, the National Theatres Inc. purchase epitomizes the old saw, "join 'em if you can't lick 'em," which we so frequently used in the early days of newspaper antagonism toward radio and then of radio station antagonism toward the upstart TV.

For quick reference, we have updated our Factbook listings of TV holdings by theatrical interests (film producers, movie owners, performers, etc.) and publish them on p. 4.

For a report on National Theatres' plans for Kansas City, directed by veteran broadcasting executive Charles L. Glett, its diversification plans and its finances, see p. 5.

(2) The Star, enjoying a local newspaper monopoly, was literally forced to divest itself of its pioneer and highly profitable stations by reason of a govt. consent decree stemming from grand jury proceedings which led to 1953 anti-trust indictment against it and some of its officers, including pres. Roy Roberts, an original Eisenhower backer (Vol. 9:2).

Among accusations was one alleging that "special discounts for advertisers in defendants' newspapers have been offered to those who have advertised on defendants' radio station and that advertisers not using defendants' newspapers have been denied access to the Star's TV station" (Vol. 9:2).

Charges also included refusing or threatening to refuse space to advertisers who used competing media or purchased larger ads in other publications; discriminating on space and location; attempting to coerce advertisers into buying unreasonable amounts of space in the Star; requiring certain advertisers to buy space in both the Star and its morning Times, without giving them any option; refusing to sell subscriptions separately to the Star, Times and Sunday Star (Vol. 11:9, 13:25, 46).

Though the Star fought back bitterly, charging malice and reprisal by Truman Administration, fact that the drastic consent decree came through during Eisenhower Administration speaks for itself. Especially for newspaper-station owners, it points up the dangers implicit in forced media tie-ins and the threat of govt. crackdown when space and/or time buyers cry ouch; in the case of the Star, public apparently was aroused, too, by being required to buy morning, evening and Sunday papers as a package unavailable separately. That newspapers and station owners will lean over backwards henceforth, consult their lawyers when in doubt should go without saying.

TV Station Ownership by Theatrical Interests

(Control or Major Interests by Film Producers, Theatre Owners, Performers, Etc.)

(Radio stations in parentheses)

- American Broadcasting-Paramount Theatres Inc.—Operates ABN and owns WABC-TV, New York (WABC); WBKB, Chicago; WXYZ-TV, Detroit (WXYZ); KABC-TV, Los Angeles (KABC); KGO-TV, San Francisco (KGO). Also owns 40% of radio WLS, Chicago.
- Gene Austry—KOOL-TV, Phoenix (KOOL), 56.38%; KOLD-TV, Tucson (KOLD), 48%; radio KMPC, Los Angeles, 51%; KSFQ, San Francisco, 50%.
- H. & E. Balaban Corp.—WTVO, Rockford, Ill., 50%; WICS, Springfield, Ill., 50%; also 50% of CPs for WMCN, Grand Rapids, Mich. (Ch. 23) and WMBG, Birmingham, Ala. (Ch. 42). WICS holds CP for satellite WCHU, Champaign, Ill. (Ch. 33). Balaban Corp. also owns 50% of radio WRIT, Milwaukee; 1/3 of radios WIL, St. Louis and WWIL, Ft. Lauderdale; 25% of KFBI, Wichita, Kan. Note: Sale of WWIL pends FCC approval.
- Berger Amusement Co. (Minneapolis)—Owner Benjamin Berger owns 40% of KTWO-TV, Casper, Wyo. and CP for satellite KTWX-TV, Sheridan, Wyo.
- Consolidated Amusement Co. Ltd.—KGMB-TV, Honolulu (KGMB), 75.45%; also satellites KHBC-TV, Hilo (KHBC) & KMAU-TV, Wailuku.
- Sherrill Corwin (west coast)—KAKE-TV, Wichita (KAKE), 15%; 100% of CP for KBAY-TV, San Francisco (Ch. 20). Owns 11% of Cal. radios KPPO, Riverside; KREO, Indio; KPPO, Brawley; KYOR, Blythe. Corwin also is applicant for Ch. 34, Los Angeles, and Ch. 21, San Diego.
- Bing Crosby—Owns 25% of firm buying KCOP, Los Angeles; 6.11% of radio KGLC, Miami, Okla.
- Dubinsky Brothers Theatre Corp.—WTVO, Rockford, Ill., 50%.
- Joseph H. Floyd-Edmund R. Rubin—KELO-TV, Sloux Falls, S. D. (KELO); satellites KDLO-TV, Florence and KPLO-TV, Reliance, S. D.; radio WLOL, St. Paul.
- Kenneth R. Giddens and T. J. Rester Jr.—WKRQ-TV, Mobile (WKRQ), 20% & 10%, respectively. Note: Transfer to new corporation in which Giddens has 50% interest pends FCC approval.
- Grand-Carlton Corp. (Jesse D. Fine)—KFEQ-TV, St. Joseph, Mo. (KFEQ).
- Bob Hope—KOA-TV, Denver (KOA), 39%; WREX-TV, Rockford, Ill., 50%.
- Jefferson Amusement Co. (Julius M. Gordon)—KPAC-TV, Port Arthur, Tex. (KPAC), 50%.
- Kallet Theatres—WKTU, Utica, N. Y. (WKAL).
- Lathrop Co. (Midnight Sun Bcstg. Co.)—KENI-TV, Anchorage (KENI); KPAR-TV, Fairbanks (KPAR); also operates Alaska radios KABI, Ketchikan & KJNO, Juneau.
- Martin Theatres of Georgia—WTVM, Columbus, Ga.; WROM-TV, Rome, Ga. (to be rebuilt as Chattanooga area outlet).
- MGM (Loew's Inc.)—KTTV, Los Angeles, 25%; KMGM-TV, Minneapolis, 25%; radio WMGM, New York, 100%.
- Lewis W. Moore—KXGN-TV, Glendale, Mont. (KXGN).
- National Telefilm Associates Inc. (NTA)—KMGM-TV, Minneapolis, 75%; also is buying WATV, Newark-New York (WAAT).
- National Theatres Inc.—Is buying WDAF-TV, Kansas City, Mo. (WDAF).
- Neighborhood Theatres Inc. (Thalheimer)—WRVA-TV, Richmond, Va., 16%.
- Paramount Pictures Corp.—KTLA, Los Angeles. Note: Being sold to Du Mont Bcstg. Co.
- RKO Teleradio Pictures Inc. (General Tire & Rubber subsidiary)—Owns WNAC-TV, Boston (WNAC); KHJ-TV, Los Angeles (KHJ); WOR-TV, New York (WOR); WHBQ-TV, Memphis (WHBQ); radios KFRC, San Francisco and WGMS, Washington. Through Canadian subsidiary owns 1/3 of CKLW-TV, Windsor-Detroit (CKLW). Also operates Yankee Network.
- Stanley Warner Theatres—WTRI, Albany, N. Y.
- Lowell Thomas Group—WCDA, Albany, N. Y. (WROW) & satellites WCDB, Haganan, N. Y. & WMGT, Adams, Mass.; WTVB, Durham, N. C. (Lowell Thomas owns 16.7% interests in stations.)
- Walter M. Thomas-Margaret E. Garland—WARD-TV, Johnstown, Pa. (WARD).
- Transcontinental Properties Inc. (Herbert Scheffel-Alfred G. Berger-Telenews)—WICS, Springfield, Ill., 50%.
- Turner-Farrar Assn.—WSIL-TV, Harrisburg, Ill.
- Video Independent Theatres Inc. (Henry S. Griffing)—KWTU, Oklahoma City, 12 1/2%. Also holds CP for KVIT, Santa Fe, N. M. (Ch. 2).
- Wometco TV & Theatre Co. (Mitchell Wolfson)—WTVJ, Miami; same interests also own 20% of WFGA-TV, Jacksonville, Fla.; 50% of WMTV, Madison, Wis.; 40% of WLOS-TV, Asheville, N. C. (WLOS).
- Jack Wrather—Owns *Lassie*, *Lone Ranger*, *Sergeant Preston of the Yukon* and 39% of KFMB-TV, San Diego (KFMB); KERO-TV, Bakersfield, Cal., and CP for KYAT, Yuma, Ariz. He also holds CP for WJDW, Boston (Ch. 44).
- Albert Zugsmith interests—Albert Zugsmith and Arthur B. Hogan each owns 25% of KULA-TV, Honolulu (KULA); Zugsmith owns 25%, Hogan 10% of WREX-TV, Rockford, Ill. They also control radio KVSM, San Mateo, Cal. Hogan owns radio KFOX, Long Beach, Cal. Zugsmith controls radio KRKD, Los Angeles. Hogan owns 18%, Zugsmith 9% of radio KBYE, Oklahoma City. Each owns 25% of radio KBMI, Henderson, Nev. Note: KITO, San Bernardino, Cal. controlled by Zugsmith is being sold. Zugsmith is also station broker and is identified with various motion picture production enterprises.

National Theatres Inc.'s Plans: The \$7,600,000 purchase of WDAF-TV & WDAF, Kansas City (p. 3), was quietly engineered by Charles L. Glett, one-time CBS west coast v.p., and ex-Don Lee Network executive who went over to RKO Teleradio as v.p. when it was purchased by that General Tire subsidiary. Last March he joined the big chain theatre organization headed by Elmer C. Rhoden of Kansas City, to work on its new policy of diversification impelled by shrinking boxoffice. He headquarters at 340 N. Camden Dr., Beverly Hills.

Glett is presently pres. of National Film Investments Inc., subsidiary of the chain operating some 320 theatres in 20 states as holding company for the Fox West Coast, Fox Inter-Mountain, Fox Midwest, Fox Wisconsin & Evergreen Amusement groups as well as Fox Theatres in Detroit and Philadelphia. The TV-radio stations presumably will come under still another subsidiary. Present plans are to continue WDAF-TV mgr. Bill Bates and present TV-radio staffs after FCC approval of the deal, managing director H. Dean Fitzer alone withdrawing.

National Theatres' policy of diversification includes: (1) Acquisition of as many TV-radio stations as FCC rules will permit. (2) Exploitation of new "Cinemiracle" process of photography & projection; it has exclusive rights to Smith-Dieterich patents and producer Louis deRochemont is currently completing first production, *Cinemiracle Adventure*, for Feb. release. Also, contract was recently signed to produce Morris Gest's famed spectacular, *The Miracle*. (3) Expansion into standard and TV motion picture production. Elmer Rhoden Jr. heads newly formed Imperial Films Inc., capitalized at \$294,000, for which SEC approval has been secured to sell \$2 par stock privately; pilots for video series *Private Eye*ful and *Johnny Sundown* are due next year, as well as 2 feature films in Eastman color, comedy *Pink Tea Bird* and western *Johnny Sundown*.

Reports of Radio Station Sales: KXOA, Sacramento, Cal. by Lincoln Dellar for \$500,000 to Kalval Inc. (Riley R. Gibson, pres.) (Hamilton, Stubblefield, Twining & Assoc.) . . . KBTM, Jonesboro, Ark. by Helen W. & Harold E. King for \$110,000 to brothers Alan G. Jr. & Matthew C. Patteson . . . KYNG, Coos Bay, Ore. by Harold C. Singleton & Walter N. Nelskog for \$70,000 to KYNG Radio Inc., 50% owned by KYNG mgr. Phillip F. Waters . . . KGA, Spokane, Wash. by Bankers Life & Casualty Co. for \$250,000 to Gran Bestg. Co. (L. F. Gran, pres.).

Radio Sales Approved by FCC: KYME, Boise, Ida. by Roger L. Hagadone for \$120,000 to Keith E. Patterson (Vol. 13:42) . . . KJFJ, Webster City, Ia. by Mr. & Mrs. Charles V. Warren for \$55,000 to Don Treu & Glen Barnett (Vol. 13:40) . . . KORC, Mineral Wells, Tex. by J. Elroy McCaw for \$45,000 to Action Bestg. Corp. (Vol. 13:43) . . . KART, Jerome, Ida. by Herbert E. Everitt & Karl L. Metzberg for \$35,000 to Frederick M. Parry (Vol. 13:43) . . . WBFM (FM) New York by Muzak Corp. to Wrather Corp. (Jack D. Wrather Jr., pres.) in deal where-by Wrather purchased entire Musak organization for \$4,350,000 (Vol. 13:38).

Sale of KVTV, Sioux City, Ia. (Ch. 9) & WNAX, Yankton, S. D. by Cowles Bestg. Co. for \$3,000,000 to Peoples Bestg. Corp. (Vol. 13:41, 44) was approved by FCC this week.

National Theatres Inc. is traded on the N. Y. Stock Exchange. Its 1957 fiscal year ended in Sept., but annual report isn't out yet; however, for 39 weeks to June 25, it grossed \$43,390,043, netting \$2,805,820 before taxes, \$1,440,000 (51¢ per share) after taxes vs. \$42,656,463, \$2,718,974 & \$1,340,000 (51¢) in same 1956 period.

For fiscal year ended Sept. 25, 1956, consolidated gross income was \$59,707,000, before-tax net \$4,387,000, net profit \$2,277,000 (84¢ per share)—plus \$2,371,000 (88¢ per share) net gain on \$6,200,000 sale of Roxy Theatre in N. Y. and from various other theatre and real estate sales. The downtrend in theatre income, characteristic of the motion picture industry in recent years, was pointed up in the comparison with 1955 fiscal year when gross was \$61,692,000, before-tax net \$5,792,000, net \$2,886,000 (\$1.04).

It's second only to American Broadcasting-Paramount Theatres in theatre revenues; theatre income of AB-PT was somewhat more than half of its 1956 gross of \$198,350,068 and net profit of \$8,476,716 (\$1.96 per share)—and, like National Theatres, AB-PT movie income was down from 1955 (to \$100,565,000 from \$110,503,000). ABC div. (TV-radio) grossed \$98,759,306 vs. \$81,116,634 in 1955 (Vol. 13:13).

But National Theatres is in very strong financial position, its earned surplus as of Sept. 25, 1956 amounting to \$21,130,090, well up from the \$17,846,563 at Sept. 24, 1955. At end of 1956 fiscal year, its current assets were \$19,793,717, fixed assets \$34,259,023, other assets \$2,951,112—for total assets of \$57,003,852. Current liabilities were \$10,340,541, long-term debt \$16,572,193, capital stock & surplus account \$27,581,523. Of latter, 2,769,486 out of 3,000,000 shares of common stock at \$1 par were issued, with 70,000 reacquired for \$599,225 and held in treasury at cost.

Note: National Theatres Inc. has never before been identified with TV operation. But F. H. Ricketson Jr., its v.p. for theatre operations and a director, was 13.57% owner of KLZ-TV, Denver (Ch. 7) and radio KLZ when they were sold to Time Inc. for \$5,533,760 in 1954 (Vol. 10:15, 18, 25, 26).

Legal battle royal was shaping up at week's end over NTA's announced agreement to purchase more than 50% of stock of Associated Artists Productions (Vol. 13:46), for which United Artists had also been negotiating in attempt to gain foothold in TV. NTA filed suit this week in N. Y. State Supreme Court charging UA pres. Arthur Krim & chairman Robert Benjamin and AAP pres. Eliot Hyman had sought "by unethical means" to prevent transfer of stock by Dec. 4. Justice Saypol, of same court, this week adjourned until Dec. 3 hearing on action by group of AAP minority stockholders, holding some 10,000 shares, to enjoin sale to NTA on grounds UA made offer much more favorable to stockholders (reportedly \$12 per share of AAP, half in cash and half in debentures of new company, presumably United Artists TV).

Financial statement of WTVW, Evansville, Ind. (Ch. 7) dated Sept. 30, filed with FCC this week accompanying explanation of voting trust, shows Jan. 1, 1957 deficit of \$259,422, additional loss of \$223,742 for 9 months thereafter. It had \$49,789 current assets, \$672,642 fixed assets; \$340,447 current liabilities, \$434,336 long term indebtedness (\$190,000 notes payable to company officers).

Western Radio & TV Conference meets Feb. 13-15 in Bellevue Hotel, San Francisco, for 11th annual session—keynoter to be Westinghouse Bestg. Co. pres. Donald H. McGannon. Program includes panel on pay TV.

Personal Notes: George M. Burbach, retiring founder-gen. mgr. of *St. Louis Post-Dispatch's* KSD-TV & KSD, honored at luncheon by publisher Joseph Pulitzer this week, attended by 80 business associates; presentation of various gifts was handled by Harold Grams, who succeeds him Jan. 1, and by Harry Bannister, NBC v.p. . . . Don Swartz promoted by NTA to gen. mgr. of recently-acquired KMGH-TV, Minneapolis-St. Paul (Vol. 13:47), and slated to become pres. of United TV Inc. . . . Raymond W. Welpott, mgr. of WKY-TV, Oklahoma City, elected v.p. of WKY Television System Inc. . . . John M. Baldwin, who rose from chief engineer to v.p.-business mgr., KDYL & KTVT, Salt Lake City, now owned by Time Inc., transfers to same organization's WTCN-TV & WTCN, Minneapolis, as operations mgr. under v.p.-gen. mgr. Phil Hoffman . . . Bill Swanson promoted to station mgr. of KTUL-TV (formerly KTVX), Tulsa, Bob Norris to asst. station mgr. . . . J. A. Slusser retires Jan. 1 as engineering director of KOA-TV, Denver . . . Jack Brickenden promoted to CBC publicity supervisor, Alex Davis to audience relations supervisor, both Toronto . . . Robert J. McNamara, ex-Peters, Griffin, Woodward, named client services director of H-R Television . . . Ralph L. Hamill promoted to technical operations supervisor of WRC-TV, Washington . . . Jay Royen, ex-NBC Washington, named public relations director of Committee for a National Trade Policy, Washington, formed by top business executives to keep Congress and public informed on world trade issues . . . Edward (Ned) Ryan, ex-Dowd, Redfield & Johnstone, N. Y., joins WBZ-TV, Boston as adv. & sales promotion mgr. . . . Tom Boyd promoted to program supervisor of WTTV, Bloom-

ington-Indianapolis . . . Donald G. Peterson named mgr. of rep Weed TV Des Moines office . . . Charles Harrison, ex-news & public affairs director of WCKT, Miami, named news director of upcoming WMBD-TV, Peoria (Ch. 31), due in Jan. . . . Richard W. Schappa, ex-Sunshine Biscuit & WBKB, Chicago, joins WWTW, Cadillac, as promotion & merchandising mgr. . . . Arthur Gerbel, ex-Fryan Printing Co., Seattle, named public relations mgr. of KOMO-TV & KOMO there . . . Phil Johnson resigns as news director of WSSH-TV & WSSH, Portland, Me., to become asst. to pres. Dr. Roger C. Gay of Nasson College, Springvale, Me.

* * * *

ADVERTISING AGENCIES: Wm. Zerweck, ex-Norman, Craig & Kummel, joins Warwick & Legler as a v.p. . . . Edward T. Chase elected a v.p. of Cunningham & Walsh . . . H. H. Dobbertein resigns as v.p. & media director of Bryan Houston . . . David Kempkes named broadcasting equipment account supervisor of Leo Burnett, Chicago.

TvB elects Lawrence H. (Bud) Rogers, WSAZ-TV, Huntington-Charleston, chairman, succeeding W. D. (Dub) Rogers Jr., KDUB-TV, Lubbock, Tex., who was named to 2-year term as a director; George B. Storer Jr., Storer Bestg. Co., elected treas.; Roger W. Clipp, Triangle Publications, continues as secy.

Grant of \$1000 by CBS Foundation Inc. to Barnard College was made this week in recognition of 15-year service to CBS by program statistics mgr. Dorothy Boyle, 1940 Barnard alumnus. Grants are based on length-of-service records of CBS employes who are graduates of independent colleges & universities.

New TV-radio reports on billings, combining data now issued separately, will be started Jan. 1 by Leading National Advertisers Inc. (publisher for PIB) and Broadcast Advertisers Reports (publisher of BAR monitored reports). Combined reports on TV networks will include product classification dollar expenditures, station lineups, dollar figures for brands, summaries of company & brand dollars giving network shares. Service for network radio will include station lineups, monitored reports showing programs, advertisers, brands, commercial minutes. New service does not involve corporate merger; LNA & BAR will continue to publish all other services.

TV saturation point—both “in terms of homes with TV sets and availability of time for sale”—may be reached by 1965, Young & Rubicam co-founder John Orr Young says in Newsprint Information Committee's *Newsprint Facts*, predicting that advertisers will come to rely more on newspapers. Young concedes “it is reasonable to expect” that more TV stations will be available by 1965 but argues that TV “is nevertheless faced with an inescapable limitation,” whereas dailies with adequate newsprint supplies “have the flexibility to increase their content, both advertising & editorial.”

TV's effectiveness as automobile salesman won another testimonial this week from pres. E. C. Quinn of Chrysler Corp.'s Chrysler div., who gave TV added ammunition in running battle started year ago by attack by Ernest Jones of MacManus, John & Adams (Vol. 12:13 et seq.). Quinn told TvB meeting in Chicago that Chrysler has gained 6% of market share in 3 years, largely through TV campaigns. He said it was impossible to measure TV's part in giving Chrysler 20% of 1957 market, but “certainly a real share of the progress” came from TV.

Australian TV will be extended to Brisbane, Adelaide, Perth & Hobart by 1959-60, each capital getting 1 national, 1-2 commercial stations.

“Rather sombre” budget outlook for advertising executives in 1958, with TV feeling “chilly wind blowing through the conference rooms,” is seen by Nov. 22 *Tide*. Magazine sounded out 1100 advertisers, agency men, public relations executives in its Advertising Leadership Panel, found that 58% of companies expect increased advertising budgets next year, but managements “will undoubtedly demand a good deal more in the way of results.” Unchanged budgets—but “more for the same money”—are anticipated by 32%, while 10% of companies will cut budgets. As result, “there'll be a lot more attention paid to media costs.”

TV data in Gallup poll conducted for *N. Y. Herald Tribune*, showing home TV ownership exceeds newspaper readership in metropolitan area, helped prompt intensified news coverage by paper, according to pres. & editor Ogden R. Reid. He told N. Y. chapter of Public Relations Society that survey indicated 83% in area have TV, 94% have radio, 78% read dailies; that 83% want to read news stories after they've heard them first on TV or radio; that detailed instead of condensed reporting by dailies is preferred by 92%.

“Best salesmen we've ever had” are TV's “Bert & Harry” (Vol. 13:45), according to adv. mgr. Stephen J. Schmidt of Piel Bros., quoted in Nov. 25 *Advertising Age*. Magazine set out to find out whether “most entertaining offbeat commercial on TV” actually sold more Piel's beer, got no statistics from brewery which doesn't release sales figures. But Schmidt said that in 1956, first full year of use of animated film characters, Piel's had biggest sales in history, that 1957 should be better.

NARTB names Joseph A. McDonald, NBC, chairman of copyright committee, reappoints Robert D. Swezey, WDSU-TV, New Orleans, chairman of freedom of information committee which meets Dec. 12 at Waldorf-Astoria Hotel, N. Y.

Telecasting Notes: First big batch of post-1948 feature films to go to TV probably will be those of Republic Pictures, which has little to fear from exhibitors or guilds, since it has been out of theatrical movie producing business for 8 months. It's understood Republic has batch of 225-250 features which are now subject of negotiations with 3 distributors, and is discussing both outright sale and lease of the product. Nov. 27 *Variety* reports Republic stands to net \$5-8,000,000 either way . . . Largest TV audience of any show this season is claimed by NBC-TV for Nov. 27 "Annie Get Your Gun," which received 2-hour average Trendex of 35.1 and 57.4% share of audience—translated by NBC to 60,000,000 viewers at 2.9 per set . . . New Flamingo Telefilm Sales has acquired rights to 5 TV film properties from RKO Teleradio, which is leaving syndication business (except for its feature film properties) to concentrate on production and sale of network properties. Deal involving more than \$1,000,000 includes *Screen Directors Playhouse*, *Sailor of Fortune*, *Aggie*, *The Big Idea*, *Animated Fairy Tales* . . . Banks have tripled their use of TV film series in past 2 years, according to Ziv TV research, indicating banking is "fastest growing category of film users." Ziv study shows 182% increase in number of banks sponsoring its programs from Oct. 1955 to Oct. 1957, cites these food & beer increases for comparison: supermarkets up 37%, meat packers 53%, brewers 13% . . . Is current TV season flopping? Despite critics who complain that programming adds up to "more of nothing," Nov. 25 *Advertising Age* thinks not. Magazine says edi-

torially that "mass medium audience" is getting what it has shown it wants on TV—westerns and "nice little musical once in a while" . . . Dissatisfied because he "had nothing to do," one of TV's most brilliant producers of live drama, Fred Coe, leaves NBC-TV Dec. 16, though his contract still has 2 years to run . . . Live vs. filmed TV issue is explored by Rod Serling in Nov. 24 *N. Y. Times Magazine*, prize-winning playwright deploring trek from N. Y. stage to Hollywood movies. He fears TV will "wrap itself around a spool and rest snugly inside of a can because this is the simplest way and the most undemanding." But he clings to hope that TV will "continue its struggle to become an art form rather than a canning factory" . . . "Strong upbeat" in local live shows is reported in *Billboard's* special Nov. 25 live programming section. Survey revealed local live shows account for more than 1/10 of program time on average station, that more than 60% of stations are airing same amount or more local live fare than last year . . . Rave notice on editorial page of Nov. 24 *N. Y. Herald Tribune* was won by NBC-TV's *The Innocent Years* documentary. "Seldom has the medium of TV been used to finer purpose" . . . Another Sputnik first: Nashville's WSM-TV claims first live pickup of Sputnik I's launching rocket 5:12-5:14 p.m. Nov. 25.

"Rating Madness" is analyzed in Nov. 23 *Sponsor*, senior editor Alfred J. Jaffe concluding ratings are generally misunderstood, misused, and "don't tell advertisers enough about what they want to know."

Top 10 TV-Radio Agencies: McCann-Erickson leads ad agencies this year in broadcast billings with \$103,000,000, moving up from No. 3 position in 1956 (Vol. 12:50), according to 6th annual survey of 50 leading agencies by Nov. 25 *Broadcasting*. Its total TV billings are \$91,000,000; total radio, \$12,000,000. Other agencies in top 10: Young & Rubicam, \$100,000,000 (\$85,000,000 TV, \$15,000,000 radio); J. Walter Thompson, \$92,000,000 (\$80,000,000 & \$12,000,000); BBDO, \$85,000,000 (\$71,000,000 & \$14,000,000); Ted Bates, \$76,500,000 (\$69,500,000 & \$7,000,000); Benton & Bowles, \$54,500,000 (\$51,500,000 & \$3,000,000); Leo Burnett, \$49,000,000 (\$43,000,000 & \$6,000,000); Dancer-Fitzgerald-Sample, \$47,000,000 (\$39,500,000 & \$7,500,000); Compton, \$42,000,000 (\$39,900,000 & \$2,100,000); Foote, Cone & Belding, \$40,000,000 (\$33,300,000 & \$6,700,000). Meanwhile, Nov. 27 *Variety* predicts that J. Walter Thompson will move next year to "top of the agency heap" with \$110,000,000 in TV-radio billings. Story by George Rosen credits new "one big umbrella" policy, plus TV program diversification, plus such buys as *The Real McCoys* on ABC-TV, with putting Thompson "back in harness" after couple of "rough" years.

TV announcers are key figures in corporate marketing & public relations but aren't being exploited sufficiently by sponsors, management consultant George F. Foley told N. Y. Sales Executives Club this week. Urging management to cash in on what he said was box-office value of announcers as corporate personifications, he said they should be used under long-term contracts not only for commercials but in other sales and public & employe relations promotion.

Suit for \$50,000 damages against A. C. Nielsen Co., charging that "false & misleading" figures were published in its NCS No. 2 survey, has been filed by radio WLEA, Hornell, N. Y. Also named defendant in action was radio WWHG, Hornell, complaint alleging that it circulated purported Nielsen report indicating that WWHG had listening audience 100% larger than WLEA's.

Community educational TV project in N. Y. was inaugurated Nov. 25 by CCC-TV (Chelsea Closed Circuit), programs linking P. S. 33, neighborhood settlement house, city housing development & health center in experiment intended to raise area's cultural level (Vol. 13:29). TV system on Ch. 6, financed by 3-year grant of \$215,000 from Ford Foundation's Fund for the Advancement of Education, covers 1000 school pupils, more than 2000 parents and other members of West Side community, which has large Negro & Puerto Rican population. First-day shows included science & language lessons, cha-cha band at Hudson Guild Neighborhood House, using 9 cameras at 7 originating points in 4-block community. Sponsors are Guild, Board of Education, Harvard U's Language Research.

TV gets special treatment—but not searching study—in Dec. *Atlantic* and Dec. *Cosmopolitan*. Mass communications section in *Atlantic*, one of "jubilee" issues celebrating magazine's 100th anniversary (Vol. 13:40), includes articles on "Motion Pictures & Pay TV" by Mervyn LeRoy, "The Vanishing Comedian" by Steve Allen, "The Birth of Radio Drama" by Richard Hughes. Section also covers press, book publishing, music, painting, schools, photography. TV section in *Cosmopolitan* includes "The Spectre of Pay TV" by Eugene D. Fleming, "Treasure Chest or Idiot Box?" by Maurice Zolotow, "What You Can't See on TV" by Mel Heimer.

MBS will raise rates first of year, pres. Paul Roberts told press conference Nov. 25 in N. Y., calling present rates "absurdly low." He said amount of increase hadn't been determined. At same time, Roberts reported that 7 a. m.-midnight schedule will be extended to 2 a. m. Jan. 1, indicating change may be forerunner of 24-hour operation. He said new deal with RKO Teleradio in take-over of Don Lec Network (Vol. 13:46) includes assumption by MBS of \$250,000 live costs, plus \$200,000 programming & facilities costs per year.

New and Upcoming Stations: WHDH-TV, Boston (Ch. 5) began operation Nov. 26 as city's fourth vhf and third commercial station, giving ABC-TV its long-sought basic affiliate in that city, and bringing on-air total to 519 (91 uhf). WHDH-TV has two 10-kw RCA transmitters (one standby) and 1082-ft. Ideco tower with 12-section antenna at Newton, Mass. Owner is *Boston Herald-Traveler* (WHDH)—Robert B. Choate, pres.; Wm. B. McGrath, v.p. & managing director; Alexander Tanger, from WHDH, v.p. in charge of sales; David Abbott, ex-regional sales mgr. for Official Films, N. Y. national commercial mgr.; Les Arries Jr., ex-mgr. of WTTG, Washington, director of TV; Joe Levine, from *Herald-Traveler*, news editor; Phillip Baldwin, from WHDH, chief engineer. Base hour is \$2500. Rep is Blair-TV.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KDUL-TV, Hay Springs, Neb. (Ch. 4), planned satellite of parent KOTA-TV, Rapid City, S.D. (Ch. 3) 100-mi. away, is installing 6-kw RCA transmitter, has 25-kw Standard Electronics amplifier due shortly, plans Dec. 15 test patterns, Dec. 18 programming, writes KOTA-TV business mgr. Wm. F. Turner. It's also installing 6-bay RCA antenna on 500-ft. Ideco tower. George Jelinek, ex-KHOL-TV, Kearney-Holdrege, Neb. will be chief engineer in charge. KOTA-TV plans to raise base hour to \$200 in Dec. Rep is Headley-Reed.

CFCL-TV-1, Kapuskasing, Ont. (Ch. 3) has 15-watt Canadian GE transmitter, plans to begin programming shortly as satellite of CFCL-TV, Timmins, Ont. (Ch. 6), reports owner J. Conrad Lavigne. It will use 200-ft. tower. Station will operate as repeater, have no studios of own. Lavigne's other satellite, CFCL-TV-2, Elk Lake, Ont. (Ch. 2) has ordered Canadian GE transmitter for mid-April delivery, hopes to begin programming in mid-May, although construction hasn't begun as yet. It will use 400-ft. Wind Turbine tower. CFCL-TV base hour is \$180. Reps are McGillvra, Paul Mulvihill & John N. Hunt.

End of 'Written Hearings'? FCC attorneys and bar groups moved another step this week toward streamlining Commission rules—a project several years a-borning. Major change in prospect: Elimination of requirement of "written direct case," thereafter permitting parties in competitive broadcast hearings to choose own method of presentation. Recommendations should be up for Commission approval within a few weeks. FCC activity is headed by assoc. gen. counsel Edgar W. Holtz, Federal Communications Bar Assn. committee by Benedict P. Cottone, American Bar Assn. committee by Arthur W. Scharfeld.

U. S.-Mexican border uhf negotiations (Vol. 13:47) concluded this week and conferees are now submitting results to respective Govts. Negotiators report "no major changes" were made but that both sides had to take a few higher numbered channels to get desired total of channels in some border cities.

Protest of St. Louis Amusement Co., one-time Ch. 11 applicant, against CBS purchase of KWK-TV, etc. (Vol. 13:44), was dismissed this week, FCC stating protestant

CJFB-TV, Swift Current, Sask. (Ch. 5) has studio-transmitter building ready for 5-kw Canadian GE transmitter due Nov. 30, plans test patterns by Dec. 4, programming about Dec. 7, reports pres.-gen. mgr. & technical director Wm. D. Forst. It has 325-ft. Utility Tower completed, plans to install 3-bay batwing antenna Dec. 2. Walter S. Buffam has been named sales mgr. Base hour will be \$120. Reps are Forjoe and TV Representatives Ltd.

—————■—————

Translator starts: K76AE, La Grande, Ore. began Nov. 21 repeating KXLY-TV, Spokane; K71AF, Cedarville, Cal. Nov. 20 with KOLO-TV, Reno; K71AG, Cottage Grove, Ore. Nov. 20 with KVAL-TV, Eugene, Ore., followed by K74AJ Nov. 21 with KGW-TV, Portland and K77AH Nov. 23 with KOIN-TV, Portland; K71AI, K75AG & K79AC, Evanston, Wyo. Nov. 23 with KUTV, KTVT, & KSL-TV, Salt Lake City.

DuMont's WTTG, Washington (Ch. 5) will take over studios and equipment of NBC's WRC-TV (Ch. 4) at uptown Sheraton Park Hotel after latter moves to new TV-radio center early next year. DuMont notified FCC this week that it is paying \$150,000 for WRC-TV's tower, antenna & transmitting equipment and an additional \$57,500 to RCA for driver & sideband filter, plus expenditure of \$25,000 for conversion from Ch. 4 to 5.

Equipment shipments by RCA this week: 6-kw transmitter to KOB-TV, Albuquerque (Ch. 4); traveling wave antenna to upcoming KHGL-TV, Billings, Mont. (Ch. 8)—both shipments Oct. 29. Sarkes Tarzian Inc. reports delivery of complete studio equipment to upcoming KXLJ-TV, Helena, Mont. (Ch. 2), and vidicon camera equipment to upcoming WBPZ-TV, Lock Haven, Pa. (Ch. 32).

New \$750,000 studios for WMCT & WMC, Memphis, will be built on Union Ave. by Scripps-Howard, with occupancy scheduled for fall 1958. Present studios in Goodwyn Institute Bldg. were designed for radio only.

KFAR-TV, Fairbanks (Ch. 2) went off air Nov. 23 when explosion and fire caused extensive damage, it notified FCC, reporting repairs will take 30 to 60 days.

WCDA, Albany, switches from uhf to vhf Dec. 1—Ch. 41 to Ch. 10—also changing call to WTEN.

Foto-Video Labs is expanding with new 10,000-sq. ft. plant in Cedar Grove, N. J.

had no standing, presented no facts to back up claims.

Ordering further hearing on Texas Tech's CP for Ch. 5, Lubbock, Commission said it wanted to determine whether funds donated by KDUB-TV & KCBT-TV, Lubbock, preclude college from going commercial, and to look into circumstances surrounding dropout of C. L. Trigg from competition with Texas Tech; he received \$25,000 for expenses.

KBAS-TV, Ephrata, Wash. was granted change from Ch. 43 to 16, while sole CP authorized was for Ch. 76 translator in Eureka, Nev. [For details, see *TV Addenda 25-R* herewith.]

Commission turned down extensive uhf channel shifts in New England, sought by WWLP, Springfield, Mass. (Ch. 22) for purpose of building more translators (Vol. 13:41). One petition for rule-making was filed, Continental Telecasting Corp. requesting assignment of Ch. 58 to Los Angeles-Pasadena.

—————■—————

Request of KBEE, Modesto, for permission to identify itself as "K B Double E" was denied by FCC this week on ground it "would tend to create confusion."

Zenith Toll Franchises Soon? While pay-TV proponents Skiatron and Telemeter appear to have deserted broadcast subscription-TV field in their concentration on wired toll systems—at least for time being—Zenith spokesmen hint that franchise agreements with prospective fee-TV broadcasters may be imminent. One Zenith source says company has reached “areas of general agreement with people who will be applicants.”

Zenith attorney G. P. Sletteland told a Cal. legislative investigating committee that RKO Telemeter's KHJ-TV, Los Angeles, and upcoming San Francisco uhf outlet KBAY-TV were among state's stations which want to use Zenith's pay-TV system.

Subject of Cal. legislative inquiry was wired pay-TV franchises. During hearings in San Francisco, committee chairman—Assemblyman Louis Francis—expressed opinion that city and county wired TV franchises were worthless, since telephone company facilities will probably be used for closed-circuit TV, and telephone transmission is subject to state public utility regulation. As authority for his statement, he quoted opinion by state legislative counsel Ralph Kleps.

Pacific Telephone Co. asst. v.p. George Gitchell told inquiry that his company has made no decision about wired pay TV, that it has “made no agreements, made no specific proposals and hasn't discussed charges.” Decision will have to be made by parent AT&T in N. Y., he added. He

Assn. of Maximum Service Telecasters board meets in Tulsa Dec. 6, many members attending dedication of new KVOO-TV (Ch. 2) studios day before at invitation of KVOO-TV pres. Harold C. Stuart, AMST board member. Some will then inspect Bartlesville cable-theatre operation. Technical committee meets Dec. 5 to discuss progress of mobile units—one now in Fresno, other winding up Madison measurements. Report of Baton Rouge studies is due to go to TASO shortly.

One application for TV station and 2 for translators were filed with FCC this week, bringing total to 119 (33 uhf) for stations, 27 for translators. Station application was for McCook, Neb., Ch. 8 satellite by owners of KCKT, Great Bend, Kan. Translator applications were for combined communities of Romeo-La Jara-Manassa, Colo. and Palmerton-Slatedale-Slatingdon, Pa. [For details, see *TV Addenda 25-R* herewith.]

AT&T will provide 2 more microwave circuits to relay delayed video tape feed to Cincinnati-Detroit-Huntington area during Daylight Time, according to Lawrence H. (Bud) Rogers, WSAZ-TV, Huntington, W. Va. and chairman of DST subcommittee of NBC affiliates. He said final details will be cleaned up at Dec. 4 meeting with AT&T, insuring entire NBC network will eliminate DST schedule changes in all Standard Time zones (Vol. 13:45).

Closed-circuit educational TV as means of filling U. S. need for scientists and technicians is urged again by publisher Hugo Gernsback in Dec. *Radio-Electronics* editorial. He suggests Govt. finance and build nationwide closed-circuit network, tying together all schools and colleges.

There were 81,000 jobs in TV-radio broadcasting in 1955, reports Dec. *Changing Times*, *The Kiplinger Magazine*, and these should increase 27% by 1965 and 65% by 1975. Source isn't stated, but this was one of 35 industries listed in article “The Coming Boom in Good Jobs.”

did say his company had persuaded Skiatron to give up its plan to use “open wire” instead of coaxial cable.

Skiatron, which still must prove its financial responsibility to San Francisco finance committee, reportedly is negotiating with Robert Lurie, son of San Francisco financier Louis Lurie, to head up franchise operations in northern Cal. with Lurie organizations to invest heavily (\$10 for each TV set in area to be served). Skiatron Electronics pres. Arthur Levey, meanwhile, notified stockholders he had sold 40,900 shares in company in order to raise money needed by Skiatron TV Corp. (Matty Fox) in prosecuting franchise applications.

Some community antenna operators report having received letter from Bernard L. Goldenberg of Selectivision Inc., another wired pay-TV proponent, offering them “package plan whereby you are required to expend no money and derive extra income through your present facilities” through conversion to toll-TV operation. Selectivision claims to have deals with 2 big theatre chains in N. Y. state. Mgr. Richard Berner of Elmwood Theatre, Elmhurst, Queens, said this week that he has signed for cable theatre operation with Selectivision, and that plans are well under way for the operation, with equipment to be ordered from Hallamore div. of Siegler Corp.

In Washington, new group called American Citizens Television Committee Inc. (ACT) reported itself organized by “a group of executives” for purpose of “preserving and improving our present system of free TV.” Principal organizers of the anti-subscription group (1010 Vermont Ave., NW) include public relations man Warren Adler and attorney Harvey Rosenberg.

Juror was disqualified in D. C. District Court Nov. 26 because she heard part of “Flight” on NBC-TV's *Suspicion* night before, when dramatic show's plot involved abduction of opponent of Latin American dictator. Judge James R. Kirkland excused Mrs. Robert Lyons from jury in trial of ex-FBI agent John J. Frank, accused of failing to register as agent of Dominican Republic, after she admitted she caught snatches of show on WRC-TV, Washington. He had previously warned jurors to avoid any discussion of case outside courtroom. TV drama didn't “bear on the case but had a relation to it,” judge said, replacing Mrs. Lyons with alternate juror.

Scent track for movies, presumably also for TV, appears just around the corner—again. Swiss inventor Hans Laube has obtained U. S. patent for “Scentovision”—its development financed by Stanley Warner theatre chain, exploitation planned by Scentovision Corp. (Len Ruskin, pres.), 15 W. 44th St., N. Y. In system, film track activates spray mechanism, and inventor claims problem of scent persistence has been solved. Also granted was patent to famed inventor Dr. Lee DeForest for automatic phone-dialing device activated by punch cards.

Defiance of TV ban in Miami courthouse by cameramen Ben Silver of WCKT & Robert Brumfield of WTVJ brought contempt-of-court fines of \$25 against each Nov. 22 from Circuit Judge Vincent Giblin. They planned to appeal convictions in test of Giblin's instructions that no pictures of rape defendant should be taken in courtroom or corridors. Judge agreed that “matter should go on for further decision, possibly to the Supreme Court itself.”

NARTB pres. Harold E. Fellows addresses Dec. 10 Federal Communications Bar Assn. luncheon in Washington's Willard Hotel—topic to be selected.

Add cable-theatre applications: Circle Theatre, for New Kensington & Lower Burrell, Pa.; Park Theatre, El Sobrante, Cal.; Rio Theatre, Rodeo, Cal.

WHAT THEY'LL BE FEATURING IN 1959 TV LINES: Though set manufacturers talk more freely about 1969 developments than 1959, first whisperings of selling feature trends in spring lines of portables indicate a push to sculpturing back of cabinet -- following Philco's treatment of current "Seventeen-er." Drive for slimmness has one manufacturer contouring rear lines to fit tube neck as closely as component space and air circulation will permit. Straight sides are foreshortened so that a good product-picture-angle gives set illusion of only 6-in. "depth."

Contouring has makers looking harder at heavier plastics, at fiber glass already marketed in Sears Roebuck and Packard-Bell portables -- and in Motorola's current portable phonographs.

Short, short neck 90-degree tubes will be appearing in spring lines to be introduced in March and April next year. Early debuts follow pattern set by portable radio's push for vacation -- second season -- business.

* * * *

At June markets, 1959 consoles will be pitching quality of sound -- in hi-fi trappings -- to go with continued furniture styling at the high end. Power output will be increased to approach hi-fi wattages. TV sets will have more speakers, better ones, bigger ones. Jacks and hi-fi type tone controls will permit rigging TV as hi-fi set with added expense of changer only. Advertising and selling-floor console pitches will draw even more heavily on hi-fi jargon than this year.

Looking beyond next year, there's talk of lengthening life of receiving tubes -- cutting shock factor -- by leaving set on all the time at very low wattage. Tuning will mean merely bringing up sound and picture.

Seen by some are 140-degree tubes, though dissenters say further shortening of neck brings imbalance factor -- sets may tip over. Extending view a few more years, there are flat-tube men who see neck not only shortened to stub, but moved to top or bottom edge. One major maker has cut arrival of flat tube to 5 years.

Most radical innovations were seen by recent speaker at EIA quarterly meeting in N.Y. Comdr. George Hoover, Navy researcher already using flat tube in jet flying experiments, showed new developments in miniaturization -- computer components no bigger than vitamin pills. Next step, he said, was substitution of microscopic materials performing same function as components. Applied to TV, he said, brushing cost aside, these -- and their wire circuits now printed on plastic boards -- could be silk-screen printed on backs or edges of flat tube. Flat tube is already here, he said. Its use in home TV is but 3 years away, he feels, disagreeing with most set makers. "It is now only a matter of glass engineering."

DISTRIBUTOR SALES UP, PRODUCTION DOWN: Nov. was a decent month compared with last year, on basis of preliminary figures showing TV production of about 575,000 vs. 580,000 in Nov. 1956, distributor sales of 650,000 vs. 630,000.

Only fly in ointment -- and that a very small one -- was increase in factory and distributor inventory to 1,800,000 compared with 1,600,000 last Nov. However, industry statisticians describe it as a "rather snug situation inventory-wise."

Retail inventories last year forced heavy production curtailment in Nov.-Dec. These rose from 783,000 at end of Aug. to over 1,000,000 at end of Oct., while this year the Aug. figure was about 800,000, rising to 950,000 at end of Oct.

TV Week Evaluated: Set manufacturers generally feel TV Week promotion was well handled, according to reactions we obtained last week at EIA quarterly meeting in N.Y. They stated that distributor-dealer participation was better than ever -- and they applauded the effort -- despite fact sales were soft in Sept. (Vol. 13:36).

"We can't claim National TV Week sold a great number of sets," said one. This was buttressed by statistical report submitted to consumer products div. which showed 50 markets selected for test did not go above national average, based on distributor sales to dealers. However, it's likely EIA will continue to support effort since broadcasters now have thrown full weight behind project.

NARDA exec. director A.W. Bernsohn told us effect of TV Week is in direct proportion to local support. Many markets had successful program, he said, but no national pattern emerged.

NARTB continued enthusiastic, spokesman saying this year's observance "demonstrated great potential industry has for telling TV's contributions to the nation." He gave particular credit to "Reports to the People" -- an on-air "open house" showing how station operates. Much more of the same is planned next year, he said, adding that "cumulative credit can't help but be helpful to the industry."

Production: TV output was 134,179 for week ended Nov. 22 vs. 138,831 the preceding week and 145,234 in 1956 week. At end of 47th week, TV production totaled about 5,813,000 vs. 6,760,045 last year. Radio production was 455,779 (158,655 auto) for week ended Nov. 22 vs. 390,435 (120,234 auto) the preceding week and 320,386 (153,127 auto) the 1956 week. By 47th week, radio production totaled about 13,633,000 (4,924,848 auto) vs. 12,266,591 (4,217,050 auto) in 1956.

Trade Personals: Wm. J. Nagy promoted to gen. sales mgr., Philco accessory div. . . V. M. Stilson, ex-Erie Resistor, appointed Admiral molded products div. v.p. & gen. mgr. . . Richard L. Snyder, ex-radio tube div., promoted to mgr. of Sylvania Woburn, Mass. semiconductor plant . . . Walter Fleck named mfg. mgr., Bath, N. Y. plant of Westinghouse electronic tube div.; Donald Denlinger named production supt. . . Wm. J. Lehner named automation engineering mgr., Sylvania TV-radio div., succeeding Carl Carlzen, resigned . . . James F. White, national sales director of Columbia Records phono dept., resigns . . . John Ridley named to new post as asst. to pres. of Majestic International . . . Wm. Wennerberg named head of new Electro-Voice marketing research div.

High public service: Disclosed by White House this week as members of top-level committee submitting still "highly classified" report on national defense to President Eisenhower were these figures from electronics industries: Robert S. Sprague, Sprague Electric Co.; Dr. Hector R. Skifter, Airborne Instrument Labs (onetime chief engineer of KSTP, St. Paul); Dr. Robert C. Prim, Bell Labs. Heading the 11-man panel was H. Rowan Gaither Jr., ex-chairman of Ford Foundation. Among panel's advisors were Adm. Robert B. Carney, retired chief of naval operations, now with Westinghouse; Dr. Mervin J. Kelly & Dr. James B. Fisk, Bell Labs; Dr. Frank Stanton, CBS.

Electronics scientists are prominent on 17-man committee named this week by President Eisenhower to advise him on scientific matters. It includes: Dr. James R. Killian, President's top advisor on scientific matters; Dr. Lloyd V. Berkner, Associated Universities Inc.; Dr. Wm. O. Baker & Dr. James B. Fisk, Bell Labs; Dr. James B. Wiesner, MIT.

BDSA adds 45 men to Commerce Dept.'s National Defense Executive Reserve, including: Robert H. Merrill & Eubert F. Taggart, GE; Arthur F. Gibson, Stromberg-Carlson; Kenneth H. MacGibbon, Western Union.

Robert W. Galvin, Motorola pres., is chairman of Jan. 20 \$100 plate GOP dinner in Chicago.

John A. Watson, ex-Maytag, appointed to new post of mdse. mgr., Hotpoint Appliance Sales Co., N. Y.

GE's Baker—Retired But Active: Distinguished Dr. W. R. G. Baker, stepping down as GE v.p. on 65th birthday Nov. 30, shows little letup in activity—despite stroke suffered in June—becoming Syracuse U v.p. in charge of contract research program while retaining EIA presidency.

Baker served GE 34 years, became internationally known for administrative and technical contributions to electronics. Probably best known were his organization and direction of 2 National TV System Committees—1941 for black-&-white standards, 1953 for color.

Already recipient of IRE and EIA medals of honor, he's to get IRE Founder's Award in March—only the 4th time it's been given out since IRE started in 1912.

Zenith's smart promotion: All Stockholders of publicity-wise Zenith Radio Corp. this week received packet of 8 brochures and folders, all in color illustrating lines of TVs, radios, hi-fi, hearing aids, even subsidiary Win-charger's power plants—and were urged to patronize products and tell friends. Never missing an opportunity to rub it into the telecasters, with whom Zenith has carried on a running feud that began even before it started plumping for pay TV, covering letter calls special attention to remote TV tuner, calling it a "tranquilizer" and "relaxer" because it enables viewers to "shop what is on the other channels . . . to erase irritating programs and commercials without walking to the set."

Motorola starts series of distributor meetings Dec. 6 in Chicago, 9 others to be held following week in various parts of country. Two teams of Motorola executives, headed by consumer products exec. v.p. Edward R. Taylor and consumer products marketing v.p. S. R. Herkes, will conduct meetings. Main business is introduction of new auto radio line with Motorola label and discussion of alternate promotional plans for TV-radio-phonos in first quarter.

Price index of TV sets is listed in current BLS Consumer Price Index at 90.2 (Dec. 1952 equals 100).

Topics & Trends of TV Trade: "End to profitless scramble" is sought by TV-appliance field, says Henry Brief in long state-of-the-business series in *Home Furnishings Daily* this week. Samples:

On distributors: "Feeling is that the number of distributors will be further pared by a combination of financial insolvency, replacement by branches or direct sales setups . . . It is also anticipated that the immediate future will bring a more intense scramble among manufacturers for the more stable independents . . . The lot of distributors is expected to become settled and profitable enough to attract renewed interest and new blood [but] many of today's distributors may not be around to see that day."

On distribution: "A Cleveland newspaper recently published a study of TV-appliance trends in a 30-county Ohio area [showing] that 9% of the dealers did 55% of the TV volume."

On small dealers: "The industry is pushing inexorably toward exclusive one-line agency stores . . . A full-bloom drive toward [this] is 18 months to 3 years away."

On battle for survival: "In this evolutionary period, some manufacturers are seeking to prosper, other to survive. [The shakeout] is far from over."

* * * *

Color Brightness: RCA is adjusting factory stock of "700 Series" color sets for maximum brightness, also installing dark safety glass aimed particularly to improve dealer demonstrations. Adjustment is being made only on controls under front panel, no circuits changed; RCA is supplying glass free to distributors. Spokesman reports brightness change depends on previous control setting—some sets are now at maximum—and that little difference will be noted under average home conditions. Question of adjusting sets in public's hands is left up to distributor.

Color TV sales in Colo. totaled 875 through Nov. 1 vs. 751 in 1956, Kansas City sales 236 in Oct., bringing cumulative count to 2605—according to local electric assns.

"High Fidelity Facts and Fallacies" titles talk by Frank H. Slaymaker, Stromberg-Carlson electro-acoustics research mgr., before AIEE Del. Bay section, Delaware Hospital, Wilmington, Dec. 2.

Great Britain's TV set licenses totaled 7,398,185 Sept. 30; radio-only, 7,269,256.

ELECTRONICS PERSONALS: Col. Robert L. Salzarulo named director of procurement & production at Dayton Air Force Depot . . . Dr. Robert M. Page appointed director of research, Naval Research Lab . . . Joseph H. Tippets, CAA Office of Air Navigation Facilities director, elected vice-chairman of Radio Technical Commission for Aeronautics . . . Henry H. Scudder elected International Standard Electric pres., replacing Edmond H. Leavey, pres. of parent IT&T, who had held both posts . . . Joseph F. Degen named mfg. v.p. of Weston Electrical Instrument, a Daystrom subsidiary . . . David D. Mason, v.p. & asst. gen. mgr. of Link Aviation (General Precision subsidiary) elected a director of Link . . . Irving E. Shemald, ex-Arms Textile, named mgr. of Raytheon Hooksett, N. H. plant.

IRE convention, expected to attract 55,000, will be held March 24-27 at Waldorf-Astoria Hotel and N. Y. Coliseum.

EIA Set Shipment Report: TV shipments to dealers for first 9 months totaled 4,249,775 according to EIA—while production was 4,589,165 and retail sales were 4,452,081 vs. dealer shipments of 4,578,983, set production of 5,259,271 & retail sales of 4,603,626 in 1956 period. Sept. shipments were 789,675, production 832,631, retail sales 705,247 vs. shipments of 827,873, production 894,211, retail sales 763,908 last year. Following shows cumulative TV shipments to dealers by states for first 9 months (county-by-county table available to EIA members):

State	Total	State	Total
Alabama	61,066	New Jersey	155,420
Arizona	26,446	New Mexico	16,930
Arkansas	36,045	New York	500,353
California	421,641	North Carolina	84,327
Colorado	34,324	North Dakota	14,529
Connecticut	69,346	Ohio	237,195
Delaware	9,899	Oklahoma	46,908
District of Columbia	44,770	Oregon	42,565
Florida	145,657	Pennsylvania	291,539
Georgia	83,476	Rhode Island	22,904
Idaho	13,183	South Carolina	33,905
Illinois	255,795	South Dakota	14,930
Indiana	105,874	Tennessee	70,256
Iowa	47,489	Texas	228,081
Kansas	48,863	Utah	17,931
Kentucky	70,057	Vermont	8,635
Louisiana	77,693	Virginia	68,172
Maine	23,566	Washington	64,229
Maryland	58,315	West Virginia	43,478
Massachusetts	128,059	Wisconsin	73,925
Michigan	162,562	Wyoming	8,393
Minnesota	65,002		
Mississippi	35,741	U. S. TOTAL	4,238,473
Missouri	100,059	Alaska	2,887
Montana	19,673	Hawaii	8,415
Nebraska	31,207		
Nevada	6,747	GRAND TOTAL	4,249,775
New Hampshire	11,313		

Fair Trade Help for Hi-Fi? Hi-fi component makers, seeking hedge against package manufacturer competition, emphasized advantages of fair trade during meeting of Audio Components Distributors Assn. in Los Angeles last week, and those attending registered strong support. Now fair traded in Cal. are Electro-Voice, Harman-Kardon, Altec-Lansing, Fisher, McIntosh & Concertone, to be joined shortly by Jim Lansing—while others study idea. Irving Stern, Electro-Voice rep, warned that competition is such that "without support of fair trade pricing, audio components are quite possibly doomed to steady deterioration. Five years ago [the] gap between sound of a good [component] system and the best package was so wide there was no comparison. Today, however, the package manufacturer is putting good components into his product and the gap is gradually narrowing. [Component dealers] must have full margins to survive."

RCA holds quarterly sales meeting in Chalfonte-Haddon Hall Hotel, Atlantic City, Dec. 2-4 for radio & phono, Dec. 5-7 for TV—for field reps and regional mgrs. No new TV models are being introduced.

Military electronics spending hit record \$3.5 billion in year ended June 30, reports EIA on basis of new formula which extracts military electronics spending from all major defense procurement categories. Total in 1956 was \$2.8 billion. Fourth quarter comparison shows \$1 billion in quarter ended June 30 vs. \$772,000,000 in 1956 period. EIA breakdown: 1957 guided missiles, \$1.108 billion vs. \$628,000,000 in 1956; aircraft, \$1.083 billion vs. \$999,000,000; electronics & communications, \$880,000,000 vs. \$771,000,000; research & development, \$303,000,000 vs. \$267,000,000; ships & harbor craft, \$81,000,000 vs. \$79,000,000; miscellaneous, \$41,000,000 vs. \$48,000,000; combat vehicles, \$7,000,000 vs. \$4,000,000; support vehicles, \$3,000,000 vs. \$6,000,000.

Jefferson Electric Co. buys assets of Electronic Products Corp., Santa Barbara, Cal. for \$579,000, according to Jefferson pres. Edward J. Brennan.

Fund Portfolio Changes: Television-Electronics Fund reports net assets of \$135,100,234 and 13,038,227 shares outstanding in fiscal year ended Oct. 31 vs. \$132,618,446 and 11,083,609 year earlier. During 4th quarter these were changes in its portfolio:

New stocks added: 700 shares Dictaphone, market value \$28,000; 25,700 Statham Instruments, \$250,575. Also added were \$500,000 worth of General Tire & Rubber 6% subordinate debentures, due 1982; \$300,000 Sperry-Rand 5½% sinking fund debentures, due 1982; \$214,000 Thompson Products 4½% convertible debentures, due 1982.

Stocks eliminated: 3900 Aircraft Radio, market value \$81,900; 12,800 Borg-Warner, \$508,800; 12,800 Emerson Radio, \$80,000; 8530 Federal Sign & Signal, \$200,455; 1900 Sangamo Electric, \$71,488; 14,000 Western Union, \$259,000.

Holdings were increased in ACF Industries, Addressograph-Multigraph, Allegheny Ludlum, American Chain & Cable, American Machine & Foundry, Amphenol, Babcock & Wilcox, Barry Controls "B," Burroughs, Carborundum, Carrier, Clark Controlier, Cornell-Dubilier, Curtiss-Wright, Dresser Industries, Emerson Electric, Fansteel Metallurgical, GM, General Precision Equipment, General Tire & Rubber, G. M. Giannini, Harris-Intertype, Hazeltine, Hoffman Electronics, IT&T, Magnavox, P. R. Mallory, Marchant Calculators, Minneapolis-Honeywell, Minn. Mining & Mfg., National Acme, National Cash Register, Otis Elevator, Philco, Robertshaw-Fulton Controls, Royal McBee, Ryan Aeronautical, Servomechanisms, Stewart-Warner, Storer Bcstg., Sylvania, Taylor Instrument, Texas Instruments, Tung-Sol, United-Carr Fastener, United Utilities, Varian Assoc., Walt Disney Productions, Westinghouse Electric, Zenith.

Part of holdings were sold in Allis-Chalmers, Ampex, Beckman Instruments, Bendix Aviation, Boeing Airplane, Cincinnati Milling Machine, CBS "A," Columbia Pictures, Consolidated Electrodynamics, Cutler-Hammer, Eastern Industries, Eastman Kodak, Eaton Mfg., Electronic Assoc., Elgin National Watch, General Dynamics, General Telephone, Goodyear Tire & Rubber, Hammond Organ, Indiana Steel Products, International Nickel, Liquidometer, Litton Industries, Martin Co., W. L. Maxson, Mergenthaler Linotype, Motorola, Neptune Meter, Oak Mfg., Reliance Electric & Engineering, Sperry-Rand, Square D.

Unchanged during quarter were holdings in Admiral, Aerojet-General, American Bosch Arma, AB-PT, AT&T, Bell & Gossett, Bullard, Bulova, Chance Vought, Clevite, Conrac, Consolidated Electronics Industries, Corning Glass, Douglas Aircraft, DuMont Labs "A," du Pont, Eitel-McCullough, Ex-Cell-O, Food Machinery & Chemical, Friden Calculating, Garrett Corp., General Bronze, GE, General Mills, General Railway Signal, Globe-Union, Industrial Electronics, IBM, Johnson Service, Leeds & Northrup, Lockheed Aircraft, Machlett Labs, North American Aviation, Northrop Aircraft, Paramount Pictures, Penn Controls, Pullman, RCA, Sprague Electric, Technicolor, TelAutograph, Telecomputing, TV Assoc., Thompson Products, 20th Century-Fox, United Aircraft, Vitro, Westinghouse Air Brake.

[For status preceding quarter, see Vol. 13:36.]

* * * *

Whirlpool Corp. 9-mo. net sales rose to \$323,707,129 from \$285,201,441 in 1956 period, with net income after taxes down to \$10,406,981 (\$1.61 per share) vs. \$10,577,328 (\$1.64). Third quarter sales were \$112,390,003 vs. \$103,036,687; earnings \$4,258,901 (66¢) vs. \$4,051,073 (63¢). Wrote pres. Elisha Gray to stockholders Nov. 20: "As this is written, it appears that the improvement shown in the third quarter will not continue through the fourth quarter. However, in the face of industry conditions which continue to show a unit sales decrease of 15.5% for the year to date, our performance of increasing unit sales by 5.5% is an indication of the continued relative strength of our products in the market place. While some of our sales increase has been due to new products introduced this year, our share of the market for our other products has shown increases."

Zenith proposes 2-for-1 common stock split to be voted at early 1958 special meeting, declares special \$2 dividend payable Jan. 31 to Jan. 15 holders, partly reflecting recent RCA anti-trust settlement (Vol. 13:38), declares usual 75¢ quarterly dividend and extra \$2, both payable Dec. 27 to Dec. 15 holders. At 2-for-1 approval meeting, vote will also be taken on plan to incorporate company in Del. instead of Ill.

Twentieth Century-Fox reports consolidated net income of \$5,623,858 (\$2.13 per share) in 39 weeks ended Sept. 28 vs. \$3,182,099 (\$1.20) year earlier. In 13 weeks ended Sept. 28 earnings were \$1,553,993 (59¢) vs. \$1,024,429 (38¢) in 1956. Gross income in 39 weeks was \$96,556,893, including film rentals of \$89,419,401, vs. \$87,157,860 in 1956, when film rentals were \$77,719,336.

Philco earnings for 1957 are now estimated in excess of \$1 a common share after taxes and preferred dividends (93¾¢), said pres. James M. Skinner Jr. after Nov. 27 board meeting which declared 4% stock dividend on common payable Dec. 27 to holders of record Dec. 9. He added: "Net capital expenditures have been kept within accruing depreciation for the year. These factors, together with substantial reduction in inventories, have enabled the company to retire, as of Oct. 31, 1957, all of its outstanding bank loans for civilian business, which amounted to \$17,500,000 at the beginning of the year. Defense business continues to be financed, as in the past, under its Regulation V Loan." Note: Philco comeback was indicated in 9-mo. report showing net profit of \$3,112,000 (74¢) on sales of \$270,246,000 as against \$1,071,000 (21¢) on \$254,322,000 in 1956 period (Vol. 13:43). Quarterly per-share earnings this year were 11¢, 26¢, 37¢ (Vol. 13:15, 30, 43).

Dividends: Zenith, 75¢ plus \$2 extra, both payable Dec. 27 to stockholders of record Dec. 12, plus \$2 special Jan. 31 to holders Jan. 15; Hoffman Electronics, 25¢ Dec. 31 to holders Dec. 13; Philco, 4% stock Dec. 27 to holders Dec. 9; Amphenol, 30¢ Jan. 31 to holders Jan. 17; Bendix Aviation, 60¢ Dec. 27 to holders Dec. 7; Globe-Union, 30¢ Dec. 12 to holders Dec. 6; Warner Bros., 30¢ Feb. 5 to holders Jan. 17; Audio Devices, 5% stock Dec. 13 to holders Dec. 3; Electronic Assoc., 5% stock Dec. 31 to holders Dec. 9; Gabriel, 15¢ Dec. 16 to holders Dec. 9; GE, 50¢ Jan. 25 to holders Dec. 20; Radio Condenser, 5¢ Dec. 20 to holders Dec. 2; Standard Radio Ltd., 15¢ Jan. 10 to holders Dec. 20.

Westinghouse, with \$49,100,000 9-mo. earnings, rates 29th place on Nov. 30 *Business Week* list of 39 top non-financial companies, bouncing back from 1956 strike-bound \$1,400,000 deficit. GE, with \$183,000,000 9-mo. earnings, is 11th, down from 10th last year. Bell system rates 2nd with \$623,800,000; IBM with \$62,400,000 rates 21st, up from 25th. General Motors, long holder of 1st, dropped to 3rd by Standard Oil (N. J.). Oil put 10 companies on list; steel, 5; auto, 3; chemicals, 3; 2 each for electric power, electrical equipment, nonferrous metals, tobacco, railroads. Chrysler, boomed to 16th from no-listing last year, showing 1551.4% increase in Jan.-Sept. earnings.

American Electronics reports net income of \$487,305 (69¢ per share) for 9 months ended Sept. 30 on sales of \$13,096,152 vs. \$242,425 (47¢) on \$5,946,756 last year. Chairman Phillip W. Zonne said 9-mo. report reflects operations of Atlantic Instrument Corp., Norwood, Mass., acquired April 1, but doesn't reflect Taller & Cooper and Cal-Air Engineering, which were Oct. acquisitions. Zonne said backlog is \$9,500,000, down from \$11,000,000 year ago.

Electro Instruments has asked SEC registration (File 2-13765) of 150,000 shares of \$1 par common to be offered for public sale through underwriting group headed by Bear, Stearns & Co. and Paine, Webber, Jackson & Curtis. Company plans to use \$500,000 of amount raised for San Diego plant now being built and to retire \$163,000 in short term debts. Offering price and underwriting terms are to be announced later.

TPA earned \$894,637 in fiscal year ended July 31, when assets totaled \$12,623,082—no figures given for preceding year. Privately-owned firm had current assets of \$11,006,384, current liabilities of \$5,418,448, working capital of \$5,588,384, according to pres. Milton A. Gordon. He said both domestic & foreign sales represented "major gain" over fiscal 1956.

Varian Assoc. reports earnings of \$736,280 (56¢ per share) for year ended Sept. 30 vs. \$502,578 (42¢) last year.

FCC and Subliminal Ads: Commission believes it has power to control subliminal, or "invisible," commercials on TV, Chairman Doerfer declared in letter to alarmed members of Congress who had urged FCC investigation (Vol. 13:45-47). Also this week, Commission released progress report on its inquiry into the widely publicized advertising technique, stating that "the public interest is not in immediate danger of being affected" and that it is continuing its investigation to determine what steps it must take, if any.

Letter to the lawmakers, excerpts of which were released this week by Sen. Potter (R-Mich.), one of the alarmed Senators, cited 3 sections of Communications Act under which "it seems fair to say that reasonable protections may be available to the public." Sections of the Act specifically mentioned:

Sec. 303, subsections of which give Commission authority to (1) prescribe nature of service to be rendered by each station, (2) regulate apparatus used by stations, (3) study new uses of radio. Sec. 4 (i), which gives FCC "wide authority, to make rules and regulations in carrying out it's functions." Sec. 317, which bars station from broadcasting paid material without identifying "at the time the same is so broadcast," that material has been paid for and who the payer is.

Doerfer's letter explained that while FCC doesn't have censorship power, "at this time it does not appear to be certain that the regulation of this particular technique would necessarily constitute censorship." He added that "matter is in its formative stage" and Commission is still seeking additional facts.

Releasing Doerfer's comments, Potter stated: "I am urging the FCC to stage a demonstration of this amazing device in the near future and they have indicated willingness to do so." Potter said he is disturbed by "ethical questions" raised by subliminal advertising. "The possibilities are certainly unfair to a viewer who isn't even given a chance to exercise sales resistance." Officials of Sub-

liminal Projection Corp., told us last week that if viewer is hostile or indifferent to product advertised, message will be ignored (Vol. 13:47).

FCC's public notice on its subliminal investigation was more non-committal than its letter to the lawmakers. It cited NARTB code board's disapproval of use of the method (Vol. 13:46) as evidence that TV licensees intend to approach problem cautiously. Commission stated that one of the 2 companies promoting the technique (presumably Subliminal Projection Corp.) "has submitted considerable information, has offered to demonstrate the technique on a closed-circuit system and has advised that there has been no demonstration by it on a TV station."

Technique has not been used by networks, Commission stated, adding that it knows of only one station which has experimented with the technique—and "with negative results." Station was presumed to be WTWO, Bangor, Me., which has submitted information on its tests to FCC (Vol. 13:47). FCC said it will continue its study "as expeditiously as possible" and "will take such action as may be warranted."

NARTB has sent 6-page memo on subliminal advertising to its members, outlining research in the field and its implications to broadcasting industry. Does it work? Memo states evidence can't be considered conclusive yet, but "balance would lead in the direction of supporting the view that subliminal perception can take place; i.e., that people respond to and are affected by stimuli so faint that they are not consciously aware of them."

Memo states that further research is necessary to determine whether it works and how well. It notes that use of technique may create serious public relations problem for stations, make necessary new monitoring techniques. It suggests that subliminal commercials might be inserted in film or transcriptions supplied to a station and played on air without station's knowledge.

NARTB memo concludes that "industry should make an effort to anticipate these contingencies and devise a systematic policy to deal with them."

Barrow Report Briefing: Dean Roscoe Barrow of U of Cincinnati Law School will return to Washington in 2 weeks to brief Commissioners and answer their questions about his network study report draft (Vol. 13:40-41). The 3-Commissioner (Doerfer, Hyde, Bartley) Network Study Committee this week held first meeting since staff report was issued and is understood to have decided, in effect, to pass entire report on to full Commission. Full Commission meets on it week of Dec. 16, with Barrow and members of Office of Network Study on hand. In address to Chicago Broadcast Advertising Club this week, Barrow reiterated his view that networks should be made directly responsible to FCC rules. "Power and responsibility go hand in hand," he said, "not weakness and responsibility."

End of CBC's dual role as TV-radio controller and broadcaster was demanded by Canadian Chamber of Commerce representatives in meeting with Cabinet members. They also urged repeal of TV-radio excise tax which supports CBC, asking that Parliament make annual grant to CBC instead.

RTDG Wins NABET Fight: NBC program directors won union jurisdiction hassle with technicians (Vol. 13:45-46) in a binding arbitration decision Nov. 27 by AFL-CIO pres. George Meany, who held Radio & TV Directors Guild members have contract right to give orders directly to members of National Assn. of Broadcast Employees & Technicians. He upheld RTDG's contention that program directors may bypass technical directors on unrehearsed programs and in rehearsals other than dress rehearsals, giving crews production instructions. Decision is effective Jan. 1, permitting 2 unions time to work out details of settlement of issue which had disrupted some NBC-TV shows. Meany said "wholehearted cooperation" is needed for "maintenance of high artistic & technical standards" on TV.

Plea for dismissal of govt. anti-trust suit against RCA-NBC arising from NBC-Westinghouse Cleveland-Philadelphia station swap (Vol. 12:51) was taken under advisement this week by Federal Judge Kirkpatrick after 75-min. hearing in Philadelphia.

SUMMARY-INDEX OF THE WEEK'S NEWS — December 7, 1957

NEW YORK REGENTS seek Ch. 13 for metropolitan area educational station, urging FCC reject sale of WATV to NTA for \$3,500,000; legal battle royal looms in new cause celebre (pp. 1 & 6).

STATION-OWNED TV TAPE units now in regular use; Ampex announces color conversion kit at \$29,000, offers recorders on lease basis (p. 2).

STANDARD-TIME REPEATS of network programs via video tape pose monumental problem for AT&T; some areas may be bypassed this summer (p. 3).

10TH VIDEOTOWN SURVEY, intense study of New Brunswick, N. J., shows last year's high viewing plateau maintained with small variations (p. 4).

UHF STATION TOTAL drops by 2 as Albany outlet switches to vhf, discontinues one of 2 satellites. Notes on upcoming stations (p. 7).

VHF CHANNEL SHIFTS sought—to San Antonio by local uhf, to Greensboro, N. C. by Jefferson Standard; Ch. 7 grant in Alexandria, Minn. (p. 7).

NEW WIRED TOLL-TV operation, charging viewers on per-program basis, reported due to start construction in Cal.; other fee-TV notes (p. 8).

SUBLIMINAL AD SHOWING for FCC tentatively planned next month on closed circuit. All 3 networks ban use of "hidden sell" (p. 9).

TV-RADIO AD TAX THREAT beaten back in St. Louis by campaign to halt spread of Baltimore plan, but AFA's Proud warns that danger persists (p. 10).

Manufacturing-Distribution

RADIO SET PRODUCTION in unheralded comeback, with 1957 fourth biggest year in history; phonohi-fi output to hit all-time high (p. 11).

COLOR SERVICE is simple, RCA reports, disclosing it's reaching profitability; spokesman sees color now at 1947 black-&-white level (p. 11).

HOTPOINT REALIGNS all distribution and sales under John F. McDaniel; plans to cut dealers from 14,000 to 9000 (p. 13).

WHY WOO BIGGER DEALERS? Case presented by electronics distributor George Wedemeyer in analysis of cost vs. net in selling smaller accounts (p. 14).

ANOTHER INVESTMENT FUND reports on TV-electronics holdings (p. 15). Interlocking directorships-officerships reported by House committee (p. 14).

DEMAND FOR Ch. 13 MAY BE CAUSE CELEBRE: There's much more than meets the eye in the simple 3-page petition for rule-making filed with the FCC this week by counsel for the Board of Regents of the University of the State of New York, asking that Newark's Ch. 13 be set aside for educational TV—instead of being permitted to go to National Telefilm Associates, the film syndicate, by reason of its proposed \$3,500,000-plus purchase of WATV and radios WAAT & WAAT-FM (Vol. 13:40, 44).

The powerful laymen's group (see p. 6) heading what one regent calls "the greatest educational system in the world" proclaims that "New York City [must] take its proper place in providing the benefits of educational TV to the largest metropolitan area in the country and without serious dislocation in the commercial TV pattern, since there will be 6 competing commercial stations remaining, and without injury to the economic status or intentions of any existing TV operators."

They promise that the present operators of WATV "shall not be the losers by reason of the withdrawal of the channel from commercial use," indicating a willingness to buy the TV if not the radio property. WATV is licensed to New Jersey under the FCC's allocation plan; it has studios in both Newark and New York and transmitter atop Empire State Bldg., along with New York's other 6 stations.

FCC has literally been rubber-stamping station sales in the last few years, many TV and even more radio. Now it's faced with a basic policy decision not only with respect to transfer of ownership

between private interests but state's rights and educational claims involving a change in channeling.

This is the first such attempt to "usurp" an occupied channel—and there's no doubt a battle royal impends before the FCC and perhaps the courts and Congress. Up to now, only 28 non-commercial educational stations have taken to the air, 22 on vhf channels; there are also commercial vhf's operated by Cornell U at Ithaca, N. Y., Iowa State College at Ames, Loyola of New Orleans, U of Missouri at Columbia; Notre Dame has commercial uhf at South Bend.

Plenty of uhf channels are still available, generally unwanted, and some vhf's in certain areas; the New York regents themselves since 1952 have held CPs for 7 uhf's but have done nothing about them because of the failure of uhf set circulation in well-served vhf territory. Their unwillingness to venture will doubtless be cited against them.

Besides the question of New Jersey rights, there's municipally-owned WNYC, holding a uhf Ch. 31 grant—and city's politicians may step in to ask priority on any newly available vhf. There are 5 uhf grantees (one educational) in New Jersey, and they may also be heard from—to say nothing of priority claims that might be put forth by the private owners of defunct uhf's in Atlantic City and Asbury Park who had to quit when they couldn't make the economic grade. For example, indicative of kind of fight that may be in store was this week's filing in Court of Appeals by David E. Mackey, holder of CP for WOCN, Atlantic City (Ch. 52); he challenges FCC refusal to move WRCV-TV's Ch. 3 from Philadelphia to Atlantic City, noting that New Jersey has only one vhf station—i.e., WATV.

If WATV and NTA choose to fight, as expected, this case promises to be a cause celebre about which we'll be hearing a lot more in ensuing months. (More on p. 6.)

VIDEO TAPE BECOMES TV STATION TOOL: As first 2 non-network-owned stations put their video tape recorders to work, Ampex this week began taking orders for color conversion units and announced video tape recorder leasing plan for stations which can't afford or don't want to buy.

First stations with production-model Ampex recorders are Seattle's KING-TV & Portland's KGW-TV, both owned by Mrs. A. Scott Bullitt interests. KING-TV engineers, under James L. Middlebrooks, had new machine in operation within 4 hours after uncrating, successfully used recordings on air.

Compatibility feature of production model recorders will be put to acid test, with KING-TV and KGW-TV (which received its Ampex this week) already working out details of taped program exchange.

Next 4 Ampex video recorders to be delivered this month go to CBS, which already has 5 prototype models and is scheduled to receive an additional 9 production models next month, another 5 later.

Ampex this week announced it is ready to take orders for color conversion kits for its production model black-and-white recorders, and for complete color recorders—deliveries of both to begin in June. Color kit is engineer-made prototype model; Ampex won't make decision on production models (which should be considerably cheaper) until it can gauge demand for color recorders and conversion kits. Though Ampex prototype color kits won't be compatible with RCA prototype or production models, Ampex officials say that any future production models will have interchangeability feature.

With 2 manufacturers now offering both color and monochrome video tape units, here is the picture in machine availability and price:

Monochrome recorder-reproducers: Ampex production models \$45,000 each, now being delivered, close to 100 on order; 13 pre-production prototypes delivered at \$75,000 each. RCA, production model available by Dec. 1958, at \$49,500.

Color recorder-reproducers: RCA production models, for Dec. 1958 delivery, \$63,000; 7 pre-production units, to be delivered April-Sept. 1958, at \$96,000 (6 to NBC, 1 to WBTV, Charlotte, no more scheduled). Ampex monochrome production model recorder with prototype color unit, for delivery by June, \$74,000; prototype color converter for Ampex monochrome recorder, delivery by June, \$29,000.

In addition, Ampex announced this week new recorder leasing plan for stations. Company says it will rent a single recorder or an entire system, black-&-white or color, under the plan. For a single

monochrome recorder, leased on 4-year basis, rental would come to about \$1200 a month, which may be applied toward purchase of machine, if desired. Ampex is now taking orders for rental machines, deliveries to begin in April or May.

■ ■ ■
Problem of editing video recordings is well on way to solution, Ampex and RCA agree. Ampex and others have been working on system by which splices can now be made by experts in 3 minutes. System involves spraying portion of tape to be edited with solution containing minute iron filings, making magnetic impulses visible. Production-model recorders record "editing pulse" on edge of tape, indicating end of frame. This pulse shows up when sprayed, indicating where splice can be made without disturbing sync.

NATIONWIDE STANDARD-TIME TV UNCERTAIN: There's still a large obstacle in the way of the 3 TV networks' plans to eliminate Daylight Time program schedule changes in areas which remain on Standard Time this summer.

The obstacle, as reported in these columns last June (Vol. 13:23-24), is the availability of inter-city microwave-cable circuits to carry the heavy additional network program repeat schedule. AT&T, which has performed some monumental jobs in expanding network service, plans to add 15,000 miles of channels to its video facilities—but not all will be completed by start of Daylight Time next April, and spokesmen say they don't know how much of the networks' demands they'll be able to meet.

Network TV requirements for AT&T lines will be doubled in some parts of country next spring and summer—since each network plans to transmit its programs twice, the first time live, then by video tape repeat one hour later for areas which don't observe Daylight Time. Fortunately for AT&T, each network will originate bulk of its tape repeats from different location—ABC from Chicago, CBS from N. Y., NBC from Hollywood—easing circuit jam somewhat.

Networks and other video circuit users must file their spring-summer requirements with AT&T by Jan. 27, and until these are weighed even AT&T doesn't know just what portion can be met. Important factor in AT&T's considerations is the amount of requests it gets for video circuits by users other than major networks. Under FCC regulations, telephone company must give all applicants for service an even shake.

It's understood that biggest Standard Time repeat problem is expected northwest of Chicago, while southeastern states are virtually assured of Standard "clock-time" service. Ohio Valley is said to be another trouble spot.

Long lines dept. operations director James E. Dingman, in response to our query, said:

"No one can say now, positively, just what the situation will be next summer with respect to availability of channels, as the networks and other customers have until Jan. 27, 1958 to give us their firm requirements. Once we're sure of the needs of all our customers and process and analyze them, we'll know where we stand."

Networks, nevertheless, are reasonably confident that most Standard Time areas will be accessible for repeat telecasts. Said CBS engineering & station relations v.p. Wm. Lodge: "We still hope AT&T will be able to deliver almost all areas we want to serve on a Standard Time delay basis."

■ ■ ■
AT&T, meanwhile, has undertaken study to determine future requirements and needed areas of expansion. As Dingman put it, long lines dept. seeks to find out:

"(1) What the capacity of our facilities would be under the maximum requirements that can be visualized. (2) What can be done about unexpected shortages that may develop."

Without promising everything will be dandy next summer, he added: "In other words, we have been trying to dig out the facility problems in those areas where we anticipate a request for a doubling of channels, and we're shaping plans to overcome problems as early as practicable."

VIDEOTOWN SURVEY—HIGH PLATEAU SUSTAINED: The high plateau reached by TV as a dominant force in people's lives, well documented last year by Cunningham & Walsh's famed "Videotown" survey (Vol. 12:41), has been sustained with minor variations this year.

Ad agency's 10th annual "depth" study of New Brunswick, N. J. (pop. 40,000), released this week, summarizes this year's findings thus: "Watching became a fixed habit with hours of viewing taking a sidewise course rather than the emotional necessity which was so impelling at first." Researchers conclude it would take some major change in programming to change amount of viewing significantly. Here are principal findings:

(1) Viewing habits. Total watching actually increased from 1956, which was first year to show drop—but individual viewing slipped slightly. Increase of people in TV homes outweighed individual viewing curtailment. Evening viewing Mon.-thru-Fri. is up slightly from 1956—11 hours & 27 min. per week vs. 11 hours & 3 min. Morning viewing is less than an hour vs. slightly more than an hour last year. Afternoon watching has dropped slightly but steadily from 1954 peak of 1 hour & 39 min. to 1 hour & 15 min. this year.

(2) Entertaining & visiting. Substantial increase—up from 12% to 20%.

(3) Movie-going. Somewhat more than in 1956, but still less than $\frac{2}{3}$ pre-TV level. "No trend is apparent at this point."

(4) Magazine reading. Still dropping. After initial severe drop in early 1950's, increases were reported in 1953-55. In 1956, it suffered again—and this year sank to early 1950's level, inducing surveyors to state: "It may be partly coincidence that during these last 2 years several magazines, representing millions of circulation, have discontinued publication."

(5) Newspaper reading. Still scarcely affected, level remaining high.

(6) Radio listening. Continued improvement. Pre-TV, 60% of homes reported listening in week-day evenings. In 1951, TV homes showed only 5% listening—then it went to 8% in 1952, 9% in 1953, 10% in 1954 & 1955, 12% in 1956, 16% in 1957. Radios are owned by 94% of families, averaging 2 radios in TV homes, 1.8 in non-TV.

(7) TV set sales. With saturation over 90%, sales "will have to come from replacement of small screen and worn out sets, and from newlyweds." No estimate is given for total 1957 sales. Previous totals: 1596 in 1956, 1477 in 1955, 1793 in 1954, 1555 in 1953, 2777 in 1950 (1951 & 1952 not reported).

Two-set homes total 10% vs. 8.7% in 1956. Of those planning to buy, 23% said they want 2 sets; of these, about half plan on portables. Repairs average \$7.71 yearly.

(8) Color. About 25% of set owners had seen color vs. 23% last year. "Reactions to color TV were mixed, more people commenting unfavorably than expressing favorable opinions." About half of TV owners want color sets, feel price should be about \$320; 10% of those planning to buy TV this year said they'd buy color.

(Copies of study will be available from Cunningham & Walsh, 260 Madison Ave., N. Y.—Gerald W. Tasker, v.p. & director of research.)

It's official: Nielsen reports that westerns are highest rated group among 30-min. TV shows so far this season, averaging 28.1%; quiz & audience participation are No. 2 with 27.1%, up from 23.1% year ago. Over-all rating levels of network shows are up slightly, Nielsen adds, Oct. evening programs averaging out to total audience of 23.3%, up from 21.9% in Oct. 1956; weekday daytime averaged 8.1% (vs. 7.8% year ago); weekend daytime 14.5% (down from 15.7%).

TV relay station nearly 22,000 miles high is planned by Russia, according to Soviet scientist Jevgeniyi Krinov, quoted in a Hungarian newspaper. TV-carrying sputnik "in the next few years" will enable people in China and on the South Pole to watch Soviet TV, he's quoted as saying.

Cops-&-robbers gun battle in Cleveland was filmed on spot by KYW-TV cameraman Ralph Mayher, who always carries equipment with him. Driving through neighborhood where food market holdup had just been staged, he came on scene as police cornered 5 suspects in fusillade of shots. Mayher perched on ledge, caught action for newscast that night.

Experimental TV coverage of murder trial by KDKA-TV, Pittsburgh, permitted by Judge Lloyd Weaver with understanding that camera alone would be used in courtroom, has brought comment by him that filming of proceedings caused no disruption. Consent of defendant also was obtained before trial opened. Judge permitted no other photographers in court.

Personal Notes: Michael J. Minahan promoted to business mgr. of ABN; Sy Cohen, ex-Warner Bros., named stations exploitation executive, new post . . . **Ralph Beaudin**, ex-radio WBNY, Buffalo, joins AB-PT's recently-acquired radio KQV, Pittsburgh, as gen. mgr. . . . **David Scott**, from WNBC, New Britain-Hartford, named to new post of New England div. mgr. of NBC Spot Sales . . . **Lloyd E. Yoder**, NBC v.p. & gen. mgr. of WRCV-TV & WRCV, Philadelphia, appointed to exec. committee of Carnegie Tech board of trustees . . . **Bennet H. Korn**, station mgr. of WABD, N. Y., and v.p. of DuMont Bestg. Corp., named exec. asst. to **Richard D. Buckley**, programming-sales v.p., and assigned additional responsibilities of supervising WTTG, Washington, and DuMont syndicated operations . . . **George Ruppel** promoted to treas. of RKO Teleradio Pictures, Oscar Nittel to controller . . . **Charles M. Reagan** resigns as v.p. & gen. sales mgr. of Loew's Inc.; **John P. Byrne**, asst. gen. sales mgr., promoted to succeed him . . . **James J. Johnston**, ex-KTVH, Hutchinson-Wichita, named operations mgr. of upcoming WMBD-TV, Peoria; **Joseph Franzgrote**, ex-WNDU-TV, South Bend, promotion mgr. . . . **Roland Giguere** promoted to director of CBC TV-radio reporting services, Montreal . . . **Dick Moran**, ex-D'Arcy, St. Louis, recently with *Chicago Tribune*, joins newly-opened Des Moines office of rep **John E. Pearson** . . . **J. Wm. Chapman Jr.**, ex-Stone Mfg. Co., joins brother **Paul H. Chapman's** brokerage firm in Atlanta . . . **Si Lewis** named national sales mgr. of Tele-Broadcasters radio stations . . . **Alan J. Bell**, ex-Army Pictorial Service, named asst. TV-radio promotion & research director of rep **Peters, Griffin, Woodward** . . . **Albert J. Gillen**, ex-WHAS-TV, Louisville, named sales director of WABT, WAPI & WAFM, Birmingham . . . **Bruce Johns** resigns as promotion director of WCHS-TV & WCHS, Charleston, W. Va., joins *TV Guide* as Cincinnati regional promotion director; **Wm. Cooke**, from WTVR, Richmond, Va., returns to WCHS-TV &

ADVERTISING AGENCIES: **Robert L. Foreman**, exec. v.p. of BBDO in charge of TV-radio operations, elected to exec. committee . . . **Harry D. Way** resigns as media director of Warwick & Legler . . . **John Ennis** promoted to v.p. & media director of Bryan Houston, succeeding **H. H. Dobberteen**, resigned; **Robert Boulware**, ex-WLWT, Cincinnati, promoted to v.p. & assoc. media director . . . **Jack Bard** named marketing services v.p. of **Edward H. Weiss & Co.**, in charge of integrated marketing, research & media facilities; **Dr. Gray Steiner** promoted to research director . . . **Henry J. Opperman**, TV-radio director of **Geoffrey Wade**, also named N. Y. office mgr. . . . **Jay Berry**, from **Brooke, Smith, French & Dorrance**, named v.p. & gen. mgr., national div., **Alexander Film Co.**, Colo. Springs.

William S. Cherry Jr., pres. of WPRO-TV & WPRO, Providence, and WDBO-TV & WDBO, Orlando, Fla., is chairman and **Paul A. O'Bryan**, partner of Washington law firm of **Dow, Lohnes & Albertson**, is pres.-treas. of company now operating deluxe **Cherry Plaza Hotel**, Orlando. They joined with **C. J. Mack**, v.p. of Hotel Corp. of America and mgr. of **Mayflower Hotel**, Washington, to acquire property in \$3,000,000 purchase-renovation deal. Fourth member of board is **Earnest Willard**, pres. of Orlando's Florida National Bank.

Wm. H. Watkins, asst. chief of FCC's frequency allocation & treaty div. since 1954, named engineering asst. to **Comr. Craven**. He joined staff in 1946.

NBC's 25-year Club admitted 19 new N. Y. members this week, each receiving watch & certificate after a welcoming speech by NBC pres. **Robert W. Sarnoff**.

WCHS to replace him . . . **Larry Geraghty** promoted to news director of WCSH-TV, Portland, Me. . . . **Frank Lane** continues as gen. mgr. and retains staff of KRMG, Tulsa, newly acquired 5th radio in Meredith group of TV-radio stations in Syracuse, Omaha, Kansas City, Phoenix (for details, see Group Ownership, p. 362, *TV Factbook No. 25*) . . . **Joseph P. Foley**, ex-CBS, named adv. v.p. of new *Young New Yorkers* monthly magazine . . . **James C. McMurray** promoted to station mgr. of WVUE, Wilmington-Philadelphia . . . **Wm. E. Pierson**, WBKB, Chicago, appointed secy.-treas. of Broadcasters' Promotion Assn.; **Ralph Trieger**, WBBM-TV, Chicago, publicity chairman . . . **Ruddick Lawrence**, ex-NBC v.p., now N. Y. Stock Exchange public relations v.p., expected to be released next week from **Lawrence Hospital**, Bronxville, N. Y., where he has been confined with slipped disc.

Obituary

Frank E. Gannett, 81, founder of chain of 22 newspapers and head of 3 TV and 5 radio stations, died Dec. 3 at his home in Rochester, N. Y. He had retired last April as pres. of his company, was succeeded by exec. v.p. **Paul Miller**, onetime head of Washington AP bureau. Survivors are his widow, an adopted son **Dixon**, of Dearborn, Mich., 6 grandchildren. Gannett TV-radio interests comprise WHEC-TV & WHEC, Rochester; WINR-TV & WINR, Binghamton; WDAN-TV & WDAN, Danville, Ill.; radio WENY, Elmira; and pending application (Vol. 13:47) to buy KOVR, Stockton, Cal. (Ch. 13); **Glover DeLaney** is managing director of group. [For newspapers, see *Rochester Democrat & Chronicle* under Newspaper Ownership of TV Stations, *TV Factbook No. 25*.]

G. Ralph Branton, 61, pres. of Interstate TV Corp., film distribution subsidiary of Allied Artists, of which he was a v.p., died Dec. 2 in Cedars of Lebanon Hospital, Hollywood, following heart attack. Surviving are his widow, 2 daughters.

Challenge to broadcasters to arouse "imagination and attention of the child, parent and teacher . . . in America's present quest for more scientific manpower and know-how" was voiced by FCC chairman **John C. Doerfer** at Dec. 2 **Thomas Alva Edison Foundation's** mass media awards dinner for TV, radio & film at **Waldorf-Astoria Hotel**, N. Y. He suggested that "some of our children should be disabused of some of their phobias about science" and some programs should be aimed at youths who have dropped out of high school, citing them as "excellent prospects for highly skilled technicians—if not scientists." Doerfer noted need for foreign language interpreters, suggesting broadcasters look into theory of late professor **L. L. Thurston** that "rote material can be taught during sleep if the student is taking lessons during the day."

Edward Lamb, who besides operating WICU-TV, Erie, Pa. also controls **Air-Way Industries Inc.**, Toledo, has sued **McGraw-Hill Publishing Co.** for \$1,500,000 in Detroit Federal Court, alleging damaging statements in *Business Week* about conduct of the appliance-making concern which recently disposed of its Toledo vacuum cleaner plant.

Telescript-CSP Inc. is new corporation (263 W. 69th St., N. Y. 23; Trafalgar 4-7272) formed to design and sell prompting equipment to TV stations and film studios. Pres. **Bob Swanson** estimates 1958 gross of \$250,000.

Seymour M. Chase, on dissolution of **Segal, Smith & Hennessey** law partnership Jan. 1, when **Smith & Hennessey** start separate Washington firm (Vol. 13:47), will enter practice on his own, offices not yet selected.

Young Television Corp. plans Atlanta branch to be headed by **Hal Parks**, ex-WAGA.

Educators Seek Ch. 13 for N. Y.: New Jersey's sole vhf allocation, WATV's Ch. 13 assigned to Newark and using joint antenna site atop Empire State Bldg. occupied also by New York City area's other 6 stations, has been an object of contention ever since engineering v.p. Frank Bremer founded the station in 1948. Other Jersey communities, forced to uhf only, have complained of discrimination and charged the station was really just another metropolitan N. Y. outlet.

But never have the present owners, headed by Irving R. Rosenhaus and principally including his family, who also control Pharmaceuticals Inc. (Geritol, Serutan, etc.), faced such titans as group now proposing FCC set aside Ch. 13 for education and thereby opposing projected sale of WATV to National Telefilm Associates (p. 1).

"We will fight this thing through if we have to go to Congress and the courts," said Jacob L. Holtzmann, chairman of the special committee on TV for education set up by the powerful Board of Regents of the University of the State of New York. Its Washington counsel is Henry G. Fisher; WATV counsel is Paul M. Segal.

This is no group of long-hairs, nor is there actually a "University of the State of New York." Rather, it's a unique setup of 13 members, all eminent citizens, all elected by the State Legislature, its origin dating back to 1784. It has supervisory jurisdiction over 170-odd institutions of higher learning in state, including Columbia and NYU, and over all other schools from kindergarten to post-graduate; it charters such institutions as the Metropolitan Museum of Art, issues licenses for medical practice, runs "state board" exams, etc. Membership on 13-man board, non-salaried, has been regarded as a high honor ever since it was first created with Alexander Hamilton as Chancellor.

One new regent is elected every 13 years, and the business and professional people chosen serve largely as a labor of love. Mr. Holtzmann, for example, is senior partner of New York law firm of Holtzmann, Wise & Shepard; educational TV is his professed hobby. Fellow members of his TV committee, also regents, are Charles W. Millard Jr.,

Buffalo banker, and Chester H. Lang, retired GE public relations v.p. Only woman regent is Mrs. Frank E. Gannett, widow of the Rochester publisher who died this week. Board's Chancellor, Roger W. Straus, who died recently, was chairman of American Smelting & Refining Co.

Recently named Chancellor is John F. Brosnan, prominent Catholic layman and pres., N. Y. County Lawyers Assn. Vice Chancellor is Edgar W. Couper, Binghamton insurance executive. Other members: Wm. J. Wallin, Yonkers attorney, Chancellor-emeritus; John T. Myers, pres., Plattsburg National Bank; Dr. Dominic Maurillo, Brooklyn physician; Alexander J. Allan Jr., Troy paint manufacturer; Thad L. Collum, Syracuse engineer; George L. Hubbell Jr., N. Y. attorney; Prof. T. Norman Hurd, Cornell U.

Executive officer is James E. Allen Jr., state commissioner of education. This same group in 1952 applied for, and got, uhf channels in Albany, Binghamton, Buffalo, Ithaca, New York City, Rochester, Syracuse, with application still pending for Utica—but has done nothing about these grants for a proposed educational network because, as Holtzmann puts it, "We found the uhf channels aren't worth activating."

Avowedly, this group got particularly het up lately about educational TV by the success of the 6:30-7 a.m. *Sunrise Semester* on WCBS-TV, an NYU full college credit course in comparative literature that is proving a phenomenal success (Vol. 13:38). According to Chairman Holtzmann, it has assurances it can get both state and foundation money; some members, he said, are even willing to finance the project "in trust" in order to get it going quickly. Their ultimate aim is a state network.

As for recompense to the WATV owners, Mr. Holtzmann says "we'll pay what's right." His group doesn't want the radio (WAAT & WAAT-FM) portion of the package being sold to NTA. NTA deal (Vol. 13:40, 44) doesn't break down evaluations on respective properties. but proposes payment of \$2,550,000 for the stock, assumption of \$950,000 obligations, and retention of executives and staff under profit-sharing arrangements that might amount to another \$1,000,000 over an extended period.

Both stations are shown as deficit operations, though it's understood radio has been quite profitable, TV generally a loser. Sept. 30 balance sheet of WATV shows total deficit of \$148,115, current assets \$123,362, fixed assets \$474,939, liabilities \$532,416, estimated replacement cost \$1,235,000.

FCC's most outspoken critic of programming that he considers in poor taste, Comr. Lee, issued another warning this week. In Minneapolis, he told reporters: "I'm not too happy with some of the stuff I see on TV . . . I don't like cheap commercials, but I dislike much TV entertainment even more. I resent the bad clothes, the allusions, the hints, the unspoken—all indicating sex." He said he dislikes private censor and pressure groups "but I prophesy that video will be brought under their control unless it mends its ways immediately."

Mass radio education of illiterate Indians in Mexico has been started by govt. agencies in cooperation with National Committee for Regional Communications. Pilot project centered in Tlaxico, Oaxaca, includes broadcasts to 41 specially-built schools scattered through mountains, where local teachers familiar with Indian dialects as well as Spanish supervise language classes. Program is aimed at estimated 3,000,000 Indians who don't speak Spanish.

Motion pictures and filmstrips are listed in *Catalog of Copyright Entries*, Jan.-June 1957, available for 50¢ from Register of Copyrights, Library of Congress, Washington.

Press opposition to legislative proposals for permanent TV installations for coverage of W. Va. legislative sessions is developing, Charleston papers complaining that plans debated by state legislature's rules committee constitute public subsidy for private profit. Sessions have been covered since Jan. 1956 by WSAZ-TV, which rigged up own temporary facilities with permission of state officials, making them available to other stations.

To block construction of illegal vhf booster in Richland, Utah, by Sevier County commissioners, town's community antenna operator T. Collins Jackson has asked state Supreme Court for writ of prohibition. This is a sort of preliminary step to major challenge of recently passed Utah law permitting local govt. units to use tax money for uhf translators.

New studio equipment for Boston U's public relations & communications school, including 4 cameras, film chain, 2 switcher-faders, 2 synchronizer units, sound projectors, will be installed this month. More than 100 students are enrolled for TV training.

NARTB Conference of State Assn. Presidents will be held in Washington Feb. 18-19.

Albany TV Drops Satellite: Number of uhf outlets on air decreased by 2 this week as Lowell Thomas interests switched their Albany station from Ch. 41 to 10, changing call from WCDA to WTEN, at same time dropping satellite WCDB, Hagaman, N. Y. (Ch. 29), while retaining other satellite WCDC, Adams, Mass. (Ch. 19). Since FCC's grant of Ch. 10 is tentative, station is retaining Hagaman CP, will reactivate satellite if it must switch Albany outlet back to uhf. Switch-over reduces number of uhf stations on air to 90, total TVs to 519. No new outlets were reported on air this week.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KIRO-TV, Seattle (Ch. 7) has studio-transmitter building 70% completed, 50-kw GE transmitter installation scheduled for completion Dec. 20, construction on 500-ft. Truscon tower underway and special GE helical antenna is due Dec. 18, according to v.p. Lincoln W. Miller. Test pattern target is now Dec. 25, with CBS-TV programming due Feb. 8. Rep will be Peters, Griffin, Woodward Inc.

KGHL-TV, Billings, Mont. (Ch. 8) had 280 ft. of 417-ft. Ideco tower erected last week, hopes to have tower completed when RCA traveling-wave antenna—first of its kind—arrives Dec. 7, reports gen. mgr. Jeff Kiichli. Wiring of 25-kw RCA transmitter awaits completion of transmitter building, held up by weather. No target date has been set. Rep will be Young Television.

WGTE-TV, Toledo, O. (Ch. 30, educational) is work-

ing on contracts concerning consultant, bids, field tests, etc. and has given up Feb. 1 target, writes program & production director Murray W. Stahl, who has been TV-radio programming director for U of Toledo. GE 100-watt transmitter and helical antenna are on hand. Present studio facilities would permit operation on limited scale.

New tower proposal in years-long effort by Louisville's WHAS-TV to find site acceptable to aeronautics authorities will be given hearing Dec. 17 by N. Y. airspace subcommittee, subject to review by Washington Airspace Panel. Station now proposes 1856-ft. tower 1.25 mi. north-east of Brownsboro, Ky. Meanwhile, Airspace Panel this week designated site near Orion, Ill. as antenna farm area for Davenport-Moline in approving request by Ch. 8 applicant Televue News Co. for 1043-ft. tower there.

KFAR-TV, Fairbanks, Alaska (Ch. 2), returned to air Nov. 30, just one week after explosion and fire knocked it out (Vol. 13:48). Station had estimated it would take 30-60 days before operation could be resumed, but engineers worked round the clock after 1000 lbs. of replacement equipment was flown in from RCA's Camden plant Nov. 29.

New towers & powers: KCJB-TV, Minot, N. D. (Ch. 13) Dec. 2 to 245-kw ERP from new site 11.5 mi. south of Minot; WICU-TV, Erie, Pa. (Ch. 12) Dec. 15 begins full 316-kw operation from new 492-ft. tower.

CBS adds upcoming CKBI-TV, Prince Albert, Sask. (Ch. 5) as secondary affiliate effective Dec. 15.

WROM-TV, Rome, Ga. (Ch. 9) left air Dec. 4 to move to Chattanooga, plans to resume Jan. 6.

Translator starts: K83AC, Globe, Ariz. began Nov. 12, repeating KVAR, Phoenix.

More VHF Channel Shifts Sought: While educators were seeking vhf station in New York (see p. 1), a hard-pressed uhf operator was pleading with FCC to give it at least part time on unused vhf educational channel. KCOR-TV, San Antonio (Ch. 41) petitioned for part-time or share-time on Ch. 9, for which application is pending from San Antonio Council for Educational TV.

Station reports losses of \$150,000 to date, states that although 75,000 sets were converted to uhf originally, uhf tuners have been maintained on only 20,000. Serving Spanish-speaking population, station says viewers can't afford to repair sets. It requests temporary operation on Ch. 9 pending rule-making. As alternative, it seeks assignment of Ch. 2 to city, substituting Ch. 6 or 7 for Ch. 2 in Piedras Negras, Mex. and cutting co-channel separation with KPRC-TV, Houston, to 183 mi.

Another vhf allocations change was sought this week, Jefferson Standard Bcstg. Co. proposing to build a Ch. 8 station in Greensboro, N. C. It asks that Ch. 13 be substituted for Ch. 8 in Florence, Ch. 8 for educational Ch. 13 in Charleston; this would require shift of Jefferson's WBTW, Florence, to Ch. 13. If Jefferson winds up with Ch. 8 CP in Greensboro, it would have to dispose of its 16½% interest in city's other vhf—WFMY-TV (Ch. 2).

Week produced another move in Texas Tech case (Vol. 13:48), when college urged Commission to reconsider its holdup of Lubbock Ch. 5 CP, asserting that donations from KDUB-TV & KCBD-TV had no strings attached; that grant would be in full accord with FCC rules & policy.

One CP was authorized—Ch. 7, Alexandria, Minn., to Central Minn. TV Co. FCC staff was instructed to draft final grant for Ch. 11, Provo, Utah, to Beehive Telecasting Corp. Initial decision proposed CP for Ch. 6, Greenwood, Miss., to WABG. Commission also announced intention of denying various petitions asking reconsideration of grant of WCKT, Miami (Ch. 7). Rule-making was initiated on request of KGUL-TV, Galveston (Ch. 11) to shift its channel to Houston. [For details of Commission actions, see *TV Addenda 25-S* herewith.]

Four applications for TV stations were filed with FCC this week, bringing total to 119 (32 uhf). Applications: For St. Petersburg, Fla. (Ch. 10), by WTSP; for Eugene, Ore. (Ch. 9), by local group headed by fruit grower Donald A. McDonald; for Yakima, Wash. (Ch. 23), by owners of KXLY-TV & KXLY, Spokane; for Fajardo, P. R. (Ch. 13), by owners of WHOA, San Juan. No translator applications were filed. [For details, see *TV Addenda 25-S*.]

FCC refused to change its rules which bar fixed radio installations in 72-76-mc band (between Ch. 4 & 5) within 10 mi. of TV stations on Ch. 4 or 5. Request had been made by GE, which asked that such stations be permitted under certain conditions. In rejecting petition, Commission said GE had furnished no new data and that insufficient information was available to determine potential interference or how to correct it.

Sly commentary on toll TV, in Dec. 5 syndicated "Channel Chuckles," which appears on TV pages of daily newspapers, shows lady viewer watching TV set with coinbox attachment, while announcer says: "Will the killer be caught? Will Valda find her husband? Deposit another quarter to find out."

'Per-Program' Cable Theatre: Ground will be broken "early next year" for wired pay-TV system in Oceanside, Cal., pres. Walter J. Dennis of Tele-Movie Development Co. told Arizona Theatre Owners Assn. meeting this week. He said subsidiary Tri-Cities Tele-Movie Corp. hopes to begin Oceanside operation in 1958. Unlike Bartlesville project, he said, it will charge viewers on a per-program basis, plus small monthly fee.

Three channels will be provided, he said, to supply "current motion pictures, sports and other quality entertainment." He didn't state what pay-TV system would be used—whether decoders or meters would be installed. He urged all theatre owners to get into cable theatre business, offering Tele-Movie's services in construction and buying and booking entertainment.

Meanwhile, these were other developments this week on pay-as-you-see front:

(1) San Francisco board of supervisors finance committee, having concluded hearings on wired TV franchise applications by Skiatron & Telemeter, indicated no immediate decision would be forthcoming. Skiatron told committee it would franchise local organization to install and operate equipment. Telemeter stated that it is financed

Baseball-TV Probe Sought: Minor league baseball clubs, which depend on Sunday gates, have asked Congress to save them from network telecasts of big league games Sundays as well as Saturdays. Agreements between CBS-TV & 5 major clubs for Sunday "game-of-the-week" telecasts next season, added to expected renewal by CBS-TV & NBC-TV of Saturday "game-of-the-week" schedule, are in issue. They amount to "greed, greed, greed" on part of majors, pres. Frank Shaughnessy of International League protested at Colorado Springs winter meetings of majors. He promised to "fight, fight, fight" if Sunday plan, invading minors' game territory, isn't dropped. Getting cool reception from National & American Leagues, he sent telegram to Chairman Celler (D-N. Y.) of House Judiciary anti-trust subcommittee, asking reopening of last session's sports investigation (Vol. 13:19 et seq.). Shaughnessy said Sunday telecasts "could cause the end of minor league baseball in America." Baseball Comr. Ford Frick said he sympathized with minors: "I hope those major league officials who are selling out to the networks do not sleep well." But he said any concerted refusal by majors to permit Sunday telecasts would run afoul of anti-trust laws—point which Celler subcommittee will be asked to explore.

Court battle continues over proposed NTA-AAP deal (Vol. 13:46, 48) with these developments: (1) NTA asked N. Y. State Supreme Court to enforce purchase agreement which it says AAP's Louis Chesler and associates are seeking to nullify. (2) Minority stockholder suit hearing in same court was postponed to Dec. 11. (3) Chesler and Maxwell Goldhar wrote NTA that deal "lacks those characteristics necessary to make it a binding and enforceable contract" and that "a more recent offer" (presumably by United Artists) appears to be better.

TV audience will judge pilot film of new interview show, *People*, produced by Jack Webb's Mark VII Ltd., when it's presented on ABC's KABC-TV, Los Angeles, Dec. 15. Viewers will be asked to write their comments. Program will be aired in 6:30-7 p.m. slot usually occupied and sponsored by automobile dealer-actor Ben Alexander, who also is host of the proposed *People* series.

up to \$6,000,000, that it plans no stock offering, that Paramount Pictures owns 88% of its stock.

(2) Two movie exhibitor organizations, Theatre Owners of America & Allied States Assn., called theatre owners to meeting sponsored by Joint Committee on Toll TV in N. Y. Dec. 9 to discuss strategy in lobbying for anti-pay-TV legislation.

(3) Tele-Movies of Fla. Inc. applied for 30-year closed-circuit franchise for Hialeah.

(4) Wired TV operators in Great Britain, who supply about 100,000 subscribers with BBC & ITA programs, met for annual luncheon, discussed possibility of adding closed-circuit subscription-TV channels.

(5) A new and mysterious "compatible" pay-TV system, as reported in Dec. 2 *Electronic News*, can best be described as payless pay TV, since it doesn't appear to cost anybody anything. Quoting San Francisco attorney Arthur M. Schaffer, identified as co-owner of system, *Electronic News* reported: "[It] will require no closed-circuit wiring, no scrambling or unscrambling of the picture, no additional equipment, electronic or otherwise, to be installed either at the broadcasting station or home receiver, and it will in no way interfere with the present system of free-TV broadcast and reception." It will require no additional channels, nor will it black out any present free channels, but "will, in fact, supplement the service given by the free channels[!]" (Exclamation ours).

NLRB has upheld CBS in unfair labor practice charges filed by network against N. Y. IBEW Local 1212 in jurisdictional tiff with IATSE which forced cancellation of telecast of Antoinette Perry "Tony" award ceremonies last April (Vol. 13:17-18). In preliminary "determination" of case, Board held that electricians "are not and have not been entitled" to force CBS to give them work—instead of stagehands—in "setting up & operating lighting equipment on remote telecasts." Network hailed decision as providing premise for contempt action if similar union interference with programming occurs again. But IBEW counsel Robert Silagi said union, which also faces \$100,000 damage suit by CBS in U. S. District Court, would seek final order from NLRB, then carry unfair labor case to Court of Appeals.

TV-thwarting Canon 35 of American Bar Assn., which bars cameras & microphones from news coverage of judicial proceedings, has been applied by N. M. Supreme Court to its own sessions and those of all state district courts. High court order effective Jan. 1 says any picture-taking or broadcasting in courtrooms, even during recesses, has "extraneous influences which tend to have a detrimental psychological effect on the participants" in trials. Canon 35 also has been invoked in Cleveland to prevent KYW-TV from planned coverage of suburban traffic court. Mayor Wilson Stapleton of Shaker Heights reversed decision to permit coverage after Cleveland Bar Assn. called it "violation of the canon of judicial ethics."

Hectic union bargaining season—"likes of which the radio & TV industry has never before seen"—is foreseen by Dec. 5 *Variety* for networks between now and end of March. Expiring labor contracts bring ABC & NBC into negotiations with NABET, CBS with IBEW, both unions seeking 4-day week agreements and security against layoffs caused by program shifts from N. Y. to Hollywood. NABET problems were pointed up this week by dismissals of 30 NBC-TV cameramen in N. Y. Other key bargaining involves stagehands, newsfilm cameramen, writers, scenic artists, actors, directors.

New rep: WESH-TV, Daytona Beach, Fla. to Avery-Knodel Inc. Nov. 1 (from Petry).

Subliminal TV Test Next Month: Closed-circuit demonstration of "hidden sell" technique as it might be used on TV (Vol. 13:45-48) may be held in Washington "after the holidays," FCC revealed in brief announcement which reported that Subliminal Projection Inc., N. Y., had begged off planned demonstration this month, which was to use facilities offered by WTOP-TV.

Fascinating as the subject may be, it doesn't appear to be a burning issue at the moment, since all 3 networks have declared they won't accept such ads and NARTB's code review board has urged subscribers to refrain from using them.

But controversy continued, Sen. Potter (R-Mich.) continuing to take the dimmest view, as proponents of subliminal advertising stepped up their defense. In his newsletter to constituents, Potter blasted "sneaky sales messages planted in heads without the owners' permission" and even warned that some teetotaler FCC commissioners and staffers "may find them-

New line of FM transmitters and multiplexing equipment has been developed by RCA for marketing by late 1958 at prices expected to be lower than RCA's FM transmitters 10 years ago. Multiplexing equipment is now undergoing tests in conjunction with Philadelphia's WCAU-FM. FM line will include 10-watt exciter-transmitter, 250-watt & 5-kw transmitters and multiplex subcarrier generator equipment for use with RCA multiplex exciters. RCA says multiplex gear will be designed for use "with many of the FM broadcast transmitters now in operation."

Ireland plans commercial TV network, to be operated by private program organization using govt.-owned facilities, Eire Posts & Telegraphs Minister Neal Blaney announced in Dublin. Among organizations submitting proposals to operate network for Govt. are McLendon Investment Corp., Dallas (Texas State Network & AM stations), Pye (Ireland) Ltd., subsidiary of the British TV-radio-electronics manufacturer, and undisclosed French interests. Franchise is due to be awarded soon, with aim of getting stations on air by next summer.

FCC softened its FM multiplexing rules this week by extending from Jan. 1 to March 1, 1958 the deadline for converting from simplexing to multiplexing, and announcing that it will consider individual requests for waiver of rules to permit continued simplex operation "upon a showing that the station is in the process of converting to multiplexing but will be unable to complete conversion within the time permitted." Requests for waiver are due by Jan. 15.

NARTB radio code symbols have been proposed, will be submitted to radio board in Jan. Audio symbol, wording not quite completed, will have theme: "A Good Practices Station." Visual symbol is shield with "National Assn. of Broadcasters" at top, trumpet and lightning bolt in center, "A Good Practices Station" at bottom. TV keeps current symbol except for change reflecting reversion of name to National Assn. of Broadcasters, Jan. 1.

Alien radio operator has been deported for obtaining permit under false pretenses in first case of kind, FCC reported this week. Routine field check by FCC showed that Herbert W. Weichmann, Velasco, Tex., was operating beyond scope of 3rd class radiotelephone permit. Subsequent investigation disclosed he was born in Germany, not in N. J. as he claimed, and had criminal record, according to FCC. Weichmann was deported in Nov.

themselves wanting a drink of Glugg beer" after witnessing subliminal demonstration. He speculated that some "evil genius" might get "exclusive rights to the process [and] control everybody's cerebellum and we'll all become robots."

James M. Vicary, one of chieftains of Subliminal Projection Inc., interviewed in Nov. 30 *Sponsor*, reiterated that SP is valuable only as reminder advertising, adding that it "can appeal only to those who already have an interest in the product or some desire to respond."

Asked how stations might charge for subliminal ads, he suggested that the plugs be sold on a "per impression" basis, at a cost-per-impression based on a downward projection of station's rates through fractional parts of second.

A. B. Moore, pres. of Precon Process & Equipment Corp., New Orleans, another company pushing the subliminal technique, stated in Hollywood this week that he believes FCC will have no objections to the process once it is familiar with it. "We are well aware of [the] need for its use by responsible parties," he said. "However, its potential use in education, therapy and ethical forms of advertising stamps it as one of the most important communication developments of the century."

Conelrad Weather Warnings: FCC this week authorized all TV, AM & FM stations to use Conelrad attention signals for peacetime dissemination of emergency weather bulletins, such as hurricane, tornado and flood warnings. Working on plan with Air Force and Weather Bureau, FCC said alerting system "will provide a worthwhile service to the general public as well as to all radio services." Fact that Commission was studying possibility of such action was revealed last month by Comr. Lee in address to National Assn. of Civil Defense Directors (Vol. 13:46). In addition to obvious and announced benefits of Conelrad weather alert plan, FCC hopes that it will provide increased incentive for manufacturers to make and consumers to buy reasonably priced automatic Conelrad receivers which are activated by the attention signal.

Domestic court trouble caught up with contestant Theophilus Aderonmu of CBS-TV's *The \$64,000 Question* this week—but son of Nigerian tribal chief had answer for it, too. Week after he won \$64,000 on program he was hailed before Justice Charles Horowitz in Bronx Dec. 3 on charges of non-support of estranged wife Faye, 25, and child. Horowitz suggested reconciliation, reserved decision in case after Aderonmu talked it over with wife and reported they wanted to remarry. Aderonmu, 30, then went on *Question* to win \$16,000 more.

Political switch on TV enlivened Parliamentary by-election campaign in Liverpool's Garston Riding this week. BBC's Manchester station showed picture of Labor candidate, along with speech praising Conservative policy. Then came picture of Conservative candidate accompanied by voice urging Labor victory. Mixed-up tape recordings were untangled by station for repeat run next night.

New local TV magazine—weekly giveaway *Channel* published in Tacoma by Channel Northwest Inc. (Marshall Riconosciuto, pres.) and distributed by druggists in Wash., Ore., northern Ida., has reached 160,000 circulation first month. It runs 16 pages, emphasizes local TV features in Seattle-Tacoma, Spokane-Yakima, Portland-Eugene editions.

KHUM, Eureka, Cal. has been sold by Carroll Hauser for \$184,000 to Wendell Adams of Wm. Esty Co., N. Y., and Jack Fearnhead of WINS, N. Y.—Allen Kander & Co. broker.

Ad Tax Scheme Falters: Quiet lobbying by Advertising Club of St. Louis against adoption there of Baltimore plan for special municipal taxes on TV-radio and other advertising (Vol. 13:45-48) appeared to be paying off this week, reducing threat of spread of unprecedented scheme across country.

Helped by members of Women's Advertising Club, pres. Hugo Autz of St. Louis admen's group campaigned on "friendly, personal basis" to persuade city officials to seek other means of raising needed revenue. Opposition to ad tax was expressed by Mayor Raymond Tucker, and ordinance proposed by Alderman Alfred Harris appeared headed for pigeonhole.

Advertising Federation of America nevertheless called again for national mobilization of all advertising interests to combat Baltimore 6% levy plan, which is being fought in court there by local TV-radio stations & newspapers. AFA placed ads in *Editor & Publisher* and *Sponsor* to rally defense, for which it seeks \$50,000 war chest from members.

"This is still a very serious threat," AFA pres.-gen. mgr. C. James Proud told us this week. He said newspaper owners generally were alert to dangers of tax scheme, but "maybe broadcasters ought to be kicking in a little stronger" in opposition to it.

Meanwhile radio WCAO, Baltimore, joined Sunpapers (WMAR-TV) and Hearst *News-Post* and *Sunday American* (WBAL-TV & WBAL) in-junction suits challenging constitutionality of new City Council levies which assess 4% on advertising sales, 2% on gross advertising receipts of media.

Audience of 12,000,000 or more has been won by educational TV on non-commercial stations, according to education director Dr. Ryland Crary of Educational TV & Radio Center, Ann Arbor. Excluding viewers of educational shows on commercial stations and participants in closed-circuit school programs, estimate is projection of studies of areas served by KQED, San Francisco; KUHT, Houston; WGBH-TV, Boston; WKAR-TV, East Lansing; WUNC-TV, Chapel Hill; WQED, Pittsburgh. "The figure is surprising," Dr. Crary says, "when it is considered that educational broadcasters have not been engaged in building huge audiences."

Teaching by TV in Port Chester (N. Y.) High School was okayed with a big "if" last week by principal Robert Zimmerman. He'd favor extension of the 1-channel, 3-classroom General Precision experimental system installed last year if money were not a factor—"but with our limited budget, I'd never consent to a sacrifice of teaching personnel in favor of TV, if a choice were necessary. There is no substitute for live, competent teachers."

Favorite TV programs in Argentina, according to survey by Institute of Public Opinion, as released by Pan American Union: (1) Symphony concerts. (2) Boxing matches. (3) Family counsel programs—in that order! Argentina still has only one station, about 92,000 sets.

"White's Radio Log," 35-year-old station directory, has been bought by Curtis Pub. Co. subsidiary Science & Mechanics Pub. Co.

Electronics Personals: Donald M. Allison Jr. named mgr. of govt. products group, Bendix Aviation radio div., replacing Adam E. Abel, now radio div. gen. mgr. . . . Frank L. Randall, v.p. & gen. mgr., named pres. of Amperex . . . Max Fialkov, General Transistor treas., adds post of v.p. in charge of transistor manufacturing . . . Joseph A. Gentile, ex-MIT Lincoln Lab, named mgr. of marketing administration, Motorola semiconductor div. . . . Robert S. Saichek, ex-Motorola, named adv. mgr. of Hoffman semiconductor div., Evanston, Ill. . . . John G. Lanning promoted to senior sales engineer of Corning Glass new products div.; Charles J. Lucy to senior applications engineer in electronic components sales dept., electrical products div. . . . Harold W. Arlidge, ex-G&M Equipment, named mgr. of Audio & Recordata div., American Electronics . . . Robert M. Rowe, ex-Stanford Research Institute, named director of engineering, Pulse Engineering Inc., Redwood City, Cal. (transformers) . . . Fred Speaks named asst. director of marketing for research & development, Eitel-McCullough . . . Irving K. Kessler, ex-John B. Stetson Co., rejoins RCA as mgr., management engineering, defense electronic products.

DuMont Labs reorganizes research & development div. into 8 specialized labs under div. director Robert T. Cavanaugh: Advanced development, under Richard C. Palmer; systems, Robert Wakeman; communications & radar, Wm. Sayer; data & display, Robert Deichert; military TV, John Auld; nuclear instrumentation, supervised by Cavanaugh; mechanical, Ludwig Zucker; commercial receiver, Bernard Amos. Humbert Pacini is promoted to div. assoc. director for technical operations.

RCA program to encourage science teaching careers has been started with a award of 30 scholarships, one teacher fellowship, Dr. C. B. Jolliffe, v.p. and chairman of RCA education committee, saying "RCA believes a good start toward achieving the long-range objective of increasing the number of engineers and scientists can be made through the Science Teacher Scholarships." Fellowship is worth \$3000; 20 scholarships are \$800; 10 are \$250.

Rectifier & rectifier equipment sales will hit record \$100,000,000 this year, pass \$200,000,000 in next 10 years, predicted Frederick M. Spaugh, mgr. market research, GE rectifier department and chairman of statistics div., NEMA's semiconductor rectifier section—at NEMA's 31st annual convention in Atlantic City.

Westinghouse awards \$2500 each to engineers Raymond W. Moore, Wm. D. King, James T. Carleton, Loren F. Stringer for development of magnetic amplifier control system that permits production of strip steel at mile-a-minute speeds.

General Transistor Corp. leases 16,000-sq. ft. plant in Richmond Hill, Queens, N. Y. for production of germanium and silicon computer diodes and silicon rectifiers—Rudolph Sachs v.p. in charge.

Philco's "Exicon," closed-circuit TV flying-spot scanning device which extracts maximum information from X-ray negatives by enhancing contrast, was demonstrated this week to AMA clinical meeting in Chicago.

Fairchild Camera & Instrument Corp. has set up Fairchild Semi-Conductors Corp., Palo Alto, to develop & produce silicon diffused transistors & other semiconductors.

Parabolic antenna inflated like a balloon is feature of air-transportable uhf scatter station, developed by Collins Radio for Signal Corps.

General Instrument Corp. appoints Walter J. Zimmerman Assoc. ad agency.

RADIO BOUNCING BACK TO 4TH BIGGEST YEAR: While jittery industry keeps one eye on soaring hi-fi curve, the other on an easing TV curve, radio is staging an unheralded comeback which will make 1957 fourth biggest output year in history. While phonographs & hi-fi are bursting through 5,000,000 production mark to record high and TV drifts to 5-year production low & 8-year factory-value low, radio chalked up in week ended Nov. 22 the highest week's production in over 5 years of its steady recovery curve. By week ended Nov. 29, year's radio production beat all of 1956. At current pace, 1957 will pass 15,000,000 units (including auto) compared with record 1947 high of 20,000,000, next highest 16,500,000 of 1948, and 15,955,000 of 1946.

At retail in Oct., radio scored unprecedented 57% increase over Oct. year ago and has been up 8 out of 10 months, while retail TV has been down 7 out of 10.

As in case of TV, disturbing thumb in radio soup is factory value. Year ago, with almost 14,000,000 radios produced, factory value was shade under \$300,000,000 -- less than half the \$650,000,000 of record 1947. Average factory value of a unit set has slipped from about \$32 to about \$21 in 10 years.

Speculation on 1957 factory value of radio notes glumly on one hand that the clock radio, manna of the past several years, is now being turned out at lists as low as \$18.95. On other hand, hi-fi has put bigger & better styling in radio's high end. Multiple speakers, tone controls, FM, more amplification in finer table models will tend to push dollar values higher there.

Fluctuation within the radio assortment itself is also disturbing some. From 1951 to 1956, table radio is steadily down in importance from 74% to 39.5% of home radios produced. Clock radio, born in 1951 with 9.6% of production, pushed to 30.5% in 1954 but eased back to 25.5% last year. Portables have earned increased attention, moving from 16.4% to 35% of production.

Big question is influence of transistor radios, now marketed at lists from \$34 to over \$75. Until retail sales for Dec. -- normally 20% of a year's business -- tell which price bracket is big one, manufacturers won't know whether they've succeeded in also pushing up factory value of radio, or whether, like the Red Queen, they've simply been running like mad to stay where they were a year ago.

COLOR SET SERVICING—RCA's FINDINGS: Color set servicing poses no great problems -- and it's beginning to be profitable. That's essence of RCA Service Co.'s experience to date, according to v.p. & operations mgr. Donald H. Kunsman. He also believes that "color breakthrough is near" -- with color at point famous RCA 630TS 10-in. black-&-white set was some 10 years ago.

Kunsman declined to give average number of service calls per color set per year but said he "wouldn't argue" with Sylvania's estimate of 6 (Vol. 13:39). This is with RCA's unlimited-call contract, which attracts many "nuisance" calls, he said. Similar black-&-white contract produces 3.9 calls yearly.

Kunsman defends reasonableness of color service contract prices. Full coverage for first year is \$99.50, \$119.50 second year (as risk of tube & parts failures rises -- picture tube alone retailing at \$160). He compares this with \$65 for the 630TS in 1947, when technicians averaged \$40 weekly -- whereas they now get \$90-\$103. RCA has a \$69.95 color contract, providing 90-day service, tube & parts warranty for year, service calls after 90 days at \$7.50 each; this runs \$79.50 for the second year. Lowest contract is \$39.95 -- installation & unlimited service, 90 days.

Anyone able to service black-&-white can learn to handle color, with a small investment in equipment, Kunsman said. About 50% of RCA Service Co. technicians are trained for color. As of June, RCA had conducted color clinics in 250 cities, with

105,000 attendees. Kunsman reports, incidentally, that less than 10% of all RCA black-&-white and color sets are under RCA service contracts.

RCA's color contract prices were established at level to produce profit, Kunsman said, but starting and training costs had precluded profit until quite recently. However, 4th quarter may well be profitable, and 1958 looks "sure."

Discussing recent Time Magazine article on servicing (Vol. 13:41), Kunsman said: "Manufacturers and servicemen must educate the public to be prepared to pay for adequate servicing. The public still isn't aware of service needs brought on by automobile power equipment, automatic washing machines, refrigerators, etc. If housewives want gadgets, they must be taught the need for service."

Retail Sales: Oct. TV set sales at retail were off 16%. EIA reports 572,589 sets sold vs. 683,573 in Oct. 1956. Retail sales for 10 months were 5,024,670 vs. 5,287,199 in 1956. Radio set sales at retail were up 57% in Oct.: 923,849 vs. 585,-666 in Oct. 1956. For 10 months, radio sales were up 13%: 6,764,221 sets, excluding auto, vs. 5,990,718 in 1956.

Production: TV output was 123,844 week ended Nov. 29 vs. 134,179 the preceding week & 147,713 in 1956. Year's 49th week brought production to about 5,937,000 vs. 6,885,441 last year. Also this week, EIA officially gave 10 months cumulative production as 5,251,158 vs. 6,080,052 in 1956. Official Oct. set production was put at 661,994 (83,372 uhf), compared with 832,631 (87,040 uhf) in Sept., and 820,781 (131,243 uhf) in Oct. last year.

Radio production was 357,881 (109,372 auto) week ended Nov. 29 vs. 5-year high of 455,779 (158,655 auto) in preceding week & 367,878 (169,871 auto) year ago. For 49 weeks, output totaled about 13,991,000 (5,034,000 auto) -- passing the full 1956 year total -- vs. 12,609,633 (4,385,122 auto) last year. EIA officially put first 10 months production at 11,945,534 (4,362,091 auto) vs. 10,884,760 (3,607,911 auto) last year. Official Oct. count was given as 1,569,180 (522,746 auto) vs. 1,610,748 (446,419 auto) in Sept. & 1,348,864 (574,818 auto) in Oct. 1956.

Trade Personals: Walter G. Seeger resigns as chairman of Whirlpool Corp., remaining a director, no new chairman to be named . . . Jack Sparks, ex-gen. mgr., Whirlpool laundry div., promoted to director of marketing for RCA Whirlpool home appliances & Estate ranges . . . Robert G. Marchisio named v.p. & gen. mgr. of CBS-Hytron semiconductor operations; Michael Callahan v.p. & gen. mgr. receiving tube operations as CBS-Hytron div. forms 2 subdivisions . . . Herbert M. Greenspon promoted to Columbia Records exec. v.p.; Milton Selkowitz named national sales mgr. of phonographs, succeeded by Laurence Goughan as mgr. of special markets for records . . . Herbert H. Flint Jr. named mgr. of community relations & employe communications, Westinghouse appliance divs. . . Daniel P. Knowland Jr. promoted to asst. gen. mgr. of Heath Co., Henry H. Tippet replacing him as controller . . . John M. Dierkes, ex-Hallicrafters, named sales mgr. of Andrea Radio, replacing Charles Van Maanen, resigned . . . Arthur Howard resigns as sales mgr. of Sonic Industries . . . Thomas A. Fitzgerald resigns as RCA staff writer, Cherry Hill, N. J. to become SKF Industries public relations mgr. Dec. 16.

Obituary

Harry F. Randolph, 57, gen. mgr. of RCA receiving tube operations, died of heart attack Dec. 3 in railroad station at Harrison, N. J. He joined RCA in 1932 as foreman of Harrison tube div. plant. Survivors are his widow, brother, sister.

RCA Victor record div. names 2 v.p.'s: James P. Davis, record operations dept.; Walter W. Bullock, album dept.

Hotpoint's TV dept. was included in total realignment this week of all distribution, merchandising, sales & adv. functions, in which John F. McDaniel, ex-gen. mgr. of range dept., became gen. mgr. of new sales & distribution dept., and the chief executive under pres. John C. Sharp. D. Edward Weston Jr., ex-gen. mgr. of TV dept., becomes central regional mgr. for HASCO; Howard Hibshman remains TV marketing mgr., but reports directly to McDaniel; John Clarke, TV merchandising mgr., still reports to Hibshman. Lee DiAngelo, ex-custom appliance marketing mgr., was promoted to mgr. of adv. & merchandising for whole company. His staff includes: Alfred M. Utt, adv. mgr.; Joseph F. Adamik, sales promotion mgr.; Wm. C. Bartels, merchandising production mgr.; Philip L. Crittenden, ex-national adv. mgr., product publicity mgr. Others now reporting to McDaniel: L. E. Ankersen, ex-refrigeration mgr., special markets mgr.; C. C. Gramer, mgr. distribution development & planning; W. G. McNeal, product service mgr.

Frank B. Walker resigns as M-G-M Records pres. to become consultant to parent Loew's Inc. Record operation splits into 2 divs., both reporting to Robert O'Brien, Loew's financial v.p. Arnold Maxim, ex-Epic Records artists & repertoire director, heads new M-G-M records div.; Frank Cocchiaraley continues as head of record mfg. div.

Dempster McIntosh, U. S. Ambassador to Venezuela who was pres. of Philco International Corp. from 1943 to 1953, was named mgr. of Development Loan Fund by President Eisenhower this week in recess appointment.

Philco Distributors Inc., Philadelphia, appoints David Brody gen. mgr. replacing John J. Kelley, resigned; John McIlhenny succeeds Brody as electronic sales mgr.

Hotpoint Distribution Realignment: If TV industry had any doubts, Hotpoint served a 3rd notice this week that it intends to grow into a more substantial image of parent GE. First move was establishment of own captive distribution in the 91 HASCO offices which now do 80% of its wholesaling. Second was announcement this fall of 10-year plans for a super appliance park outside Chicago. Third, made this week, centralized all distribution & sales functions under one man, John F. McDaniel, is designed to eliminate inefficiencies between retail sales floor and factory. Among these problems are small dealers and distributor inventory control. McDaniel stated that Hotpoint would "experiment with many new approaches in the field of dealer and distributor communications."

First action would be to trim 14,000 dealers to 9000. GE is doing a like trimming job. Both brands are now eliminating duplication on dealer floors in certain key markets, recommending dealers drop either GE or Hotpoint next year.

A second action goes into effect Jan. 1 when HASCO houses will no longer own their inventories. Factory will own local stocks, presumably set and ship mix it desires.

To help tell the story of what's to come, Hotpoint breaks in Dec. issue of *Electrical Merchandising* with first of series of trade ads designed to inform dealers of new policies & practices. In first of these, pres. John Sharp states that though Hotpoint does not yet have all the answers, it intends to offer reasonable profit, price protection policy, selective franchising for mutual profit.

* * * *

Cost of Money: Washington area credit costs, listed by Dec. 2 *Washington Post and Times-Herald*, show commercial banks charge 5-6% annually on unpaid balance of secured loans up to \$10,000, 4½-5% over \$10,000. Bank loans on new autos run 7-9¼%, used autos 7½-11%; auto dealers get 10½-12% & 11-20% respectively. Rate for collateral loans from brokerage houses is 5%, life insurance companies 5-6%. Personal unsecured loans have 6-11% interest up to \$2500, 5-6% over that; Title 1 home improvement loans are at 9½% rate; credit unions 8-12%. Small loan company rates in Md. are 36% up to \$300; in Va. 30% up to \$300, 18% for \$300-\$600. Dept. store revolving credit or budget plans is 6-18%, deferred payment on appliances 16-18%; appliance, furniture & other stores 18%; Washington Gas Light Co. 11%.

Inventories of Canadian TV sets—manufacturer plus distributor at end of Oct.—are 40% less than last year, Canadian RETMA pres. W. H. Jeffery told components div. meeting last week. There may be shortage of some models for pre-Christmas selling, he said. He predicted inventory will be down to 50% of last year—less than 4 weeks selling—by year end, lowest in 3 years. Distributor sales of TV sets topped 70,000 units in Oct., highest in a year. Low in sales has been passed, he said, forecasting leveling-off in 1957 & 1958 at between 465,000-475,000 units. Radio is up too, and is expected to pass "comfortably" the 709,416 unit sales of 1956, he said.

Sylvania's novel "Sylouette" receiver (Vol. 13:46) is already backordered, according to TV-radio div. gen. sales mgr. Robert L. Shaw who also reported that Sylvania will introduce "some very interesting product developments" at Dec. 11-13 distributor meeting in Miami's Americana Hotel. He said that Sylvania's factory TV sales continued at record pace in Nov., nearly double year ago.

Transistor Output Soars: Factory sales of transistors nearly tripled again in Oct. vs. Oct. 1956 and more than doubled in the cumulative 10 months, according to EIA. Oct. factory sales were 3,544,000 units worth \$7,075,000 vs. 1,290,000 worth \$3,930,000 last Oct. For 10 months, factory sales hit 22,386,300 units worth \$56,131,000 vs. 9,403,000 worth \$27,102,000 in 1956 period. EIA's breakdown by months:

	1957 Sales (units)	1957 Sales (dollars)	1956 Sales (units)
January	1,436,000	\$ 4,119,000	572,000
February	1,785,300	5,172,000	618,000
March (5 wks)	1,904,000	5,321,000	708,000
April	1,774,000	4,880,000	832,000
May	2,055,000	5,636,000	898,000
June (5 wks)	2,245,000	6,121,000	1,130,000
July	1,703,000	4,216,000	885,000
August	2,709,000	6,598,000	1,315,000
September (5 wks)	3,231,000	6,993,000	1,115,000
October	3,544,000	7,075,000	1,290,000
TOTAL	22,386,300	\$56,131,000	9,403,000

Tube Sales: Factory sales of receiving tubes were 47,075,000 worth \$38,421,000 in Oct. compared with 42,921,000 at \$34,362,000 in Oct. 1956, reports EIA, bringing 10-mo. total to 388,738,000 tubes at \$326,355,000 vs. 390,357,000 at \$313,599,000 in 1956 period. Picture tube sales in Oct. were 995,629 worth \$19,495,574, compared with 1,165,740 at \$21,117,261 last Oct.; 10-mo. 1957 totals were 8,304,181 at \$155,121,412 vs. 9,233,780 valued at \$166,782,244 in 1956 period. EIA's monthly tabulation:

	Picture Units	Tubes Value	Receiving Units	Tubes Value
January	760,860	\$ 13,594,525	37,571,000	\$ 31,170,000
February	728,363	13,134,778	44,460,000	36,631,000
March (5 wks)	833,257	14,850,847	43,010,000	37,007,000
April	629,838	11,394,043	27,970,000	25,384,000
May	758,328	14,031,519	32,836,000	28,955,000
June (5 wks)	1,104,013	19,981,319	35,328,000	31,314,000
July	491,935	9,835,586	33,077,000	27,042,000
August	930,296	17,984,185	43,029,000	34,886,000
Sept. (5 wks)	1,071,662	20,819,036	44,382,000	35,545,000
October	995,629	19,495,574	47,075,000	38,421,000
TOTAL	8,304,181	\$155,121,412	388,738,000	\$326,355,000

Du Pont will discontinue making phosphors for TV and other CR tubes early next year, states "continued production would be unprofitable" because more efficient tube manufacturing uses less phosphor and major TV tube makers are now making phosphors. It will continue production of phosphors for X-ray intensifying and fluorescent screens.

BBC color experiments have been "encouraging," according to engineering director Sir Harold Bishop, but he asserts that color camera must be simplified; that RCA color tube "is expensive to make and one would expect that further development will lead to simplification, lower cost, and improved quality."

FTC charges of misrepresenting "reject" radio tubes as first quality have been filed against Rad-Tel Tube Co., 604 Market St., Newark. It claims company's ads, brochures, tube cartons and invoices do not reveal tubes are seconds, while disclosure on tube is "wholly inadequate." Hearing is scheduled Feb. 4 in N. Y.

San Francisco color sales totaled 68 in Oct. vs. 82 last year, according to Pacific Gas & Electric Co.; 10-mo. total was 412. Oct. black-&-white sales: 3367 vs. 3553 last year; 10-mo. total, 24,452 vs. 25,052. Oct. radio: 2406 vs. 2166; 10-mo. total, 19,445 vs. 21,851.

Philco has extended until May 1961 the contract under which Avco's Crosley div. makes Philco ranges and laundry equipment at its Nashville, Tenn. plant.

RCA will increase by \$1 the list price of its \$3.98 Red Seal line of classical LPs Feb. 1. Increase doesn't apply to popular and jazz LPs.

Distributors' Millstone: Why they pamper the bigger dealer is graphically illustrated in Nov. *NEDA Journal* article by George E. Wedemeyer, Wedemeyer Electronic Supply Co., Ann Arbor & Lansing, Mich. Past-pres. of NEDA, Wedemeyer recently presented his research on costs-of-servicing-vs.-net-earned from smaller accounts to President's Conference on Distribution in Washington.

Detailed analysis of accounts breaks dealers into 6 groups by amount of monthly buying. Each group was related to percent of expense, sales & net it represented. Costs of handling 4 smaller groups precluded any profit. But dealers buying \$100.01 to \$500 a month produced 55.4% of net while representing 36.3% of accounts, 50.2% of expense, 55.3% of orders. 60.8% of sales, 52% of delivery expense, 58.6% of phone calls, 42.5% of salesmen's calls, 55.3% of invoices. Biggest dealers (\$500.01 to \$1500 a month) produced 32.1% of net while representing 4.8% of accounts, 15% of expenses, 19% of orders, 27.1% of sales, 7.1% of delivery expense, 27.1% of phone calls, 5.6% of salesmen's calls, 18.2% of invoices. Groups buying \$100 and less caused 36% of expenses, but produced only 12% of sales; they accounted for half of salesmen's calls.

* * * *

Extending further into consumer end of music business, *Billboard* buys *High Fidelity* and *Audiocraft* from Audiocom Inc. (Charles Fowler, publisher), will continue its own *Audition*.

Bell & Howell names Irving E. Russell central states sales mgr.; appoints Capitol Wholesaler div., Consolidated Sales, Indianapolis, for tape recorders.

Philco Technological Center is being opened to non-Philco employes to help ease shortage of technical manpower. It will offer only specialized correspondence courses.

EIA services and activities, including brief history of organization, are described in new 40-page booklet available from EIA, 1721 DeSales St. NW, Washington.

Federal excise taxes paid by TV-radio-phonograph and components manufacturers amounted to \$27,987,000 in quarter ended Sept. 30 vs. \$26,602,000 in 1956 period.

EXTENT to which financial men hold interlocking directorships or officerships of major financial and industrial concerns—and thus presumably exercise “big business” influence or control—is detailed in 176-page report by House Committee on Small Business released this week as House Report No. 1278. Top 35 commercial banks, 20 mutual savings banks, 20 investment trusts, 20 investment bankers, 20 life insurance companies, 20 fire & casualty insurance companies are individually listed with their assets and with the directorships and/or officerships their executives hold in 1642 companies and their subsidiaries and affiliates as of Dec. 31, 1956.

In “communications” category, 38 firms are listed as having interlocking directors and officials with the 135 largest financial companies of the U. S., including AB-PT, CBS, NBC and RCA, along with various news-

Every TV an FM: NARTB's FM Radio Committee, meeting Dec. 6 in Washington, passed resolution urging TV set manufacturers to incorporate FM broadcast band tuners in their receivers. Resolution stated that extension of TV tuning to FM band would stimulate sale of new TV receivers, and pointed to recent growth of numbers of FM stations, receivers and listeners—as well as recently announced FM converters for TV sets—to indicate that public is becoming increasingly interested in FM. Committee, headed by Raymond S. Green of Philadelphia's WFLN-FM, also voted to explore possibility of publicity campaign to promote manufacture and use of FM auto radios.

Hotpoint TV will kick off national dealer competition Dec. 30, with window display contest open until Feb. 28. Dealers will compete (pictures of displays must show at least 4 TV sets) for \$30,000 in prizes. In April, 10 top dealers and wives will be flown to Caribbean to dig for buried treasure, armed with maps of uninhabited islands off Cuba—and shovels. All this to continue TV exposure push which in 5 months has added 1000 TV dealers and increased franchise roster to 6500.

First All-American Awards to TV-radio servicemen for public service will be presented by GE receiving tube dept. in Washington Dec. 10. Awards comprise trophies and “checks for \$500 for use in a community activity or charity of their preference.”

Wage hike of 5-9¢ per hour is contained in 11th annual Raytheon-IBEW contract for 11 Mass. plants. Company says wage increase, plus additional fringe benefits for 13,200 employes, will amount to about \$2,350,000 annually. Agreement is retroactive to Sept. 1, runs to Aug. 31, 1958.

Capitol Records buys Electric & Musical Industries (U. S.) Ltd., including Angel label of classical European recordings, will merge Angel sales organization with Capitol Record Distributing Corp.

Oct. sales of TVs in Washington area totaled 8059 vs. 7523 in 1956 month, bringing 10-mo. total to 56,092 vs. 58,156, reports Electric Institute of Washington.

Institute of Hi Fi Mfrs. will stage 3 shows next year: San Francisco, Feb. 14-16; Los Angeles, Feb. 26-March 2; N. Y., Sept. 30-Oct. 4—no Chicago show.

Westinghouse buys Edgar Morris Sales Co., its Washington, D. C., distributor for 20 years, will convert it to Westinghouse Appliance Sales branch Jan. 1.

Capehart appoints Fuller & Smith & Ross for advertising & public relations.

papers, magazines and motion picture companies. In “manufacturing & mining” category these firms in TV-radio-electronics are included: Admiral, Arvin, Avco, Bendix Aviation, Clevite, Collins Radio, Daystrom, Decca, DuMont, Emerson Radio, General Dynamics, GE, General Precision Equipment, Globe-Union, I-T-E Circuit Breaker, Magnavox, Mallory, Meredith Publishing [misplaced from “communications” category], Minnesota Mining, Minneapolis-Honeywell, Motorola, Penn-Texas, Philco, Raytheon, Sperry Rand, Stewart-Warner, Sylvania, Thompson Products, Western Electric, Westinghouse, Whirlpool-Seeger, Zenith.

AT&T is placed in “public utilities” category, with “merchandising companies” comprising mainly big store chains. Other categories are oil companies, pipelines, railroads, airlines, miscellaneous transportation companies. [House Report No. 1278 is available while supply lasts from Select Committee on Small Business, House of Representatives, Washington, D. C.—or we'll get it for you.]

Electronics Portfolio Report: Electronics Investment Corp., mutual fund founded and headed by ex-San Diego broadcaster Charles E. Salik, reports net assets of \$13,315,250 as of Oct. 31, including \$82,888 undistributed from which 3¢ per share dividend was distributed Nov. 29 to 3,177,111 shares of common stock outstanding Nov. 1. Portfolio included \$10,685,415 shares of common stock, \$316,875 preferred, \$915,275 bonds, \$897,576 U. S. Govt. obligations. Net income for quarter to Oct. 31 was \$162,806. Portfolio changes during July 31-Oct. 31 quarter:

Purchases: 18,182 shares of Cohu Electronics Inc.; 1000 Fansteel (making total of 2000); 20,000 Laboratory for Electronics; 2000 RCA (total 9000); 5000 Statham Instruments; 1000 Westinghouse Air-brake (total 7000); 2000 Tung-Sol 5% cum. pfd. (total 3000); \$100,000 Emerson Electric 5½% conv. debts. 1977 (total \$150,000); \$100,000 Sperry Rand 5½% debts. 1982; \$50,000 Thompson Products 4½% conv. debts. 1982; \$300,000 Federal National Mortgage Assn. 4.7% due Aug. 11, 1958.

Sales: 1200 Amp. Inc. (holds 3800), 300 Boeing; 500 Consolidated Electrodynamics (holds 6500); 108 IBM (holds 1300); 5250 Glenn L. Martin; 1300 Minnesota Mining & Mfg. (holds 1700); 3800 Raytheon (holds 9300); \$100,000 U. S. Treasury cert. 2¾%; \$100,000 Federal Intermediate Credits, 3.875%.

Note: Like its larger and older counterpart, Television-Electronics Fund Inc., reported on last week (Vol. 13:48) the Salik fund showed predilection for certain favorites in TV-radio-electronics fields, listing among stocks held: 10,000 AB-PT, 5000 Amphenol, 2040 CBS "A," 4000 GE, 12,480 General Tire, 4000 Hazeltine, 5000 Hoffman Electronics, 9000 IT&T, 8000 P. R. Mallory, 5000 Motorola, 13,130 Philco, 5000 Sprague Electric, 10,300 Storer, 5000 Sylvania, 3000 Westinghouse. Television-Electronic Fund's holdings in same firms: 38,800 AB-PT, 20,500 Amphenol, 43,700 CBS "A," 43,500 General Tire, 45,000 Hazeltine, 22,900 Hoffman, 30,000 P. R. Mallory, 26,000 Motorola, 24,200 Philco, 10,500 Sprague, 16,800 Storer, 35,000 Sylvania, 44,800 Westinghouse. While EIC also listed 9300 Raytheon and 17,500 Slegler, TEF did not include these—but did show 30,000 Admiral, 22,900 Indiana Steel Products, 21,600 Oak Mfg., 51,500 Walt Disney, 21,900 Zenith, among others not on EIC list.

[For status in April 30-July 31 quarter, see Vol. 13:34.]

* * * *

Warner Bros. earned \$3,415,000 (\$1.90 per share on 1,793,296 shares outstanding) in fiscal year ended Aug. 31 vs. \$2,098,000 (84¢ on 2,482,247) in fiscal 1956, when figure didn't include \$15,295,408 income from sale of old films, which was transferred to earned surplus account. In fiscal 1957 film rentals & sales amounted to \$75,476,000 vs. \$73,350,000 year earlier. Annual report also disclosed company bought 36,400 of its common shares for \$736,000 on N. Y. Stock Exchange in 3 months ended Nov. 30. Operating results for new quarter were not available, but report indicated loss would be shown because of decline in domestic & foreign film rentals.

Stanley Warner Corp., whose operations include WTRI, Albany, in addition to 297 owned or leased theatres, Cinerama and International Latex, reports consolidated profits of \$3,767,840 (\$1.82 per share on 2,063,099 shares outstanding) in fiscal year ended Aug. 31 vs. \$3,194,200 (\$1.47 on 2,166,800) year earlier. Theatre admissions and merchandise sales rose from \$96,055,700 from \$115,125,300. Earnings were figured after providing for \$1,908,200 amortization of cost of Cinerama films.

Midwestern Instruments, Tulsa, has purchased Data Storage Devices Co., Van Nuys, Cal. for undisclosed sum—part cash, part common stock. Francis A. Oliver, ex-sole owner of Data, becomes v.p. of Midwestern, will head Data Storage Devices div. which moves to Tulsa. Midwestern chairman M. E. Morrow said growth of Magnecord div. "created accelerated requirements for magnetic heads to the point where acquisition . . . appeared both necessary and desirable."

Cohu Electronics sets up electronic instruments div. in Schenectady through stock exchange acquisition of Millivac Instrument Corp. and Volkert & Schaffer Inc.

Olympic Radio sales of about \$30,000,000 for 1957 are foreseen by pres. Morris Sobin, based on 10-mo. sales of \$22,100,000, 24.6% higher than in 1956.

Hallicrafters Co., old-line communications-radio-TV manufacturing firm with 2 big plants in Chicago, which just 2 years ago made exchange-of-stock deal whereby it became subsidiary of Penn-Texas Corp. (Vol. 11:51), may revert to independent status if moves to sell certain Penn-Texas subsidiaries to pay off debts materialize. There's nothing official yet, but it's understood founder-pres. Wm. J. Halligan and his sons may acquire control. The senior Halligan founded Hallicrafters in 1933 after choosing to become a newspaperman (original radio columnist for *Boston Transcript*) upon graduation from West Point. He and family owned about 25% of firm's 825,000 shares of common stock, traded on Midwest Exchange at 7, which was swapped for 332,000 shares of Penn-Texas, still traded on N. Y. Stock Exchange and then quoted at 18¼ (now 3%). Hallicrafters Aug. 31, 1955 fiscal year report showed \$4,793,531 working capital, and it had earned \$406,146 (49¢ per share) on sales of \$29,063,463 vs. loss of \$940,946 on sales of \$31,054,363 in preceding year (Vol. 11:47). Penn-Texas, big holding company, showed \$85,000,000 assets at time of deal, has been slipping since unsuccessful attempt of chairman Leopold D. Silberstein to acquire control of Fairbanks-Morse.

E. J. Korvette Inc. discount house earned \$1,187,527 (\$1.02 per share) on sales of \$71,073,688 for the year ended Sept. 28 vs. \$1,558,876 (\$1.33) on \$54,847,140 last year. Pres. Wm. Willensky told N. Y. Security Analysts: "Competitive pricing has affected our earnings for the past fiscal year. Our over-all gross profit margin . . . was reduced to 18.3% from 19.2%, [costing] us about \$600,000 before taxes." Korvette, which calls itself a chain of "promotional department stores," blamed 23.8% net profit decline on heavy expenses of opening new stores. Willensky noted that Korvette operates 7 small stores and 5 department stores and is opening a 6th (in Hartford, Conn.) Company hasn't paid a dividend since it became publicly owned Jan. 1956, preferring to invest in more stores, Willensky said.

Dividends: RCA, 25¢ plus 50¢ extra, both payable Jan. 27 to stockholders of record Dec. 20; Webcor, 15¢ plus 10¢ extra Dec. 28 to holders Dec. 16; Universal Pictures, 25¢ plus 25¢ extra Dec. 23 to holders Dec. 13; Canadian Westinghouse, 25¢ Jan. 2 to holders Dec. 13; Eitel-McCullough, 5% stock Dec. 31 to holders Dec. 12; Clevite, 40¢ Dec. 27 to holders Dec. 13; Corning Glass, 25¢ Dec. 27 to holders Dec. 13; Waldemar Press, 20¢ Dec. 31 to holders Dec. 16; Wells-Gardner, no action.

Standard Electromagnetics Inc., newly formed, buys R. P. Bennett Co. Inc., 43 S. Carroll St., Frederick, Md., primarily a manufacturer of relays. E. J. Boland, ex-pres., Carol Electronics Corp., Martinsburg, W. Va., is pres. of Standard. Other principals include: A. H. Fogelman, v.p., Hamilton Engineering Assoc., Washington, and Washington businessman Lisle Lipscomb. R. P. Bennett continues with new organization.

Packard-Bell earned \$704,447 (\$1.02 per share) on record sales of \$32,262,878 in year ended Sept. 30, compared with \$862,356 (\$1.25) on \$28,405,059 in preceding year. Pres. Robert S. Bell credited sales increase to technical products div., blamed lower earnings on increased labor and material costs. He said TV accounted for 30% of sales, giving firm "highest market share of TV sales, excluding so-called portables, we have ever enjoyed."

Telechrome Mfg. Corp. earned \$113,539 (42¢ per share) on sales of \$1,096,414 in year to June 30 vs. \$17,661 (18¢) on \$504,513 year earlier.

Clips from the Current Press

Networks' Printed Promotion: On-air promotion of own shows is most effective advertising used by the TV networks to build audience for programs—but *N. Y. Times* columnist Carl Spielvogel finds they're also spending "record amounts" in print media, mainly newspapers. Reason is increased competition, spate of new shows (some on irregular schedules and requiring special reminders), rapidly increasing number of set owners. Sponsors also buy a lot of space independently to acquaint viewers with their offerings. And the networks doing more institutional advertising than ever in trade papers and in such specialized journals at *TV Guide*.

Essence of Spielvogel's report, in his Dec. 1 column on advertising, is that networks believe strongly in print promotion, practice it on huge scale, encourage affiliates to do so locally too by sending them kits and otherwise assisting them. CBS-TV has 36 persons creating ad campaigns under John Cowden, operations director of adv. & sales promotion. CBS believes its creative director Wm. Golden's "CBS Eye" has been "seen more times by more people in the nation than any other trade-mark." Its ads are placed through Marschalk & Pratt div. of McCann-Erickson.

NBC's main identification is "Mezzo-Tint" process that produces a photo that looks like a drawing, permits better newspaper reproduction; v.p. Kenneth Bilby is in charge, Grey Adv. is agency. ABC uses no set art approach, but plugs hard its many new shows with "sell copy," says Dean D. Linger, director of adv. & promotion; its agency is BBDO. All 3 executives, while not deprecating print, insisted their best promotions still come from TV spot and "stay tuned" messages at end of programs.

Distressed theatre owners, confronted by growing TV competition, should stop moaning and do something about old movie houses, critic Bosley Crowther suggests in Dec. 1 *N. Y. Times*. He says Theatre Owners of America at Miami Beach convention last month (Vol. 13:47) "did a lot of tearful talking" but didn't mention "possible stimulant" to business: "That is the construction of some brand new theatres that would be in the rhythm and the style of the modern age."

Voice of Democracy's 4 national co-winners of \$500 college scholarships will be announced at Feb. 10 windup of 3-day Washington tour for 52 state and territorial winners. Now in 11th year, contest is open to upper 3 high school grades—sponsored by NARTB, EIA, U. S. Junior Chamber of Commerce.

"Largest TV station equipment sale" in history of Teleprompter Corp. was announced this week to Crosley Bestg. Corp., which has signed long-term contracts for use of new Mark V Teleprompter and has purchased new Telepro 6000 rear-screen projector for each of its 5 TV stations.

Top 50 TV-radio agencies in 1957 billings are compiled in Nov. 30 *Sponsor*, rankings generally corresponding with those in survey by Nov. 25 *Broadcasting* (Vol. 13:48). *Sponsor* estimates that combined TV-radio billings of biggest agencies hit \$1.22 billion this year vs. \$1.04 billion in 1956, with \$697,000,000 of the 1957 total accounted for by 10 leaders (McCann-Erickson, Young & Rubicam, J. Walter Thompson, BBDO, Ted Bates, Benton & Bowles, Leo Burnett, Dancer-Fitzgerald-Sample, Foote, Cone & Belding, Wm. Esty). Note: *Sponsor* tabulation breaks down TV figures for network & spot, does same for radio; also gives each agency's total billings for 1957 (e.g., McCann-Erickson's network TV was \$63,000,000, spot TV \$31,000,000, network radio zero, spot radio \$12,000,000—or on-air total of \$106,000,000 out of total agency billings of \$184,000,000, or 58%).

TV-radio advertising jobs total 33,900, Dec. 6 *Printers' Ink* estimates in roundup indicating 374,852 in U. S. are employed creating or selling ads—excluding "thousands behind the scenes such as printers, sign painters & clerical help." Magazine lists 3800 in advertising work at 475 TV stations—475 supervisors, 475 in promotion, 1425 in sales, 1425 in creative & other jobs. Estimate for radio is 29,400 at 3675 stations, including 11,025 in sales. Daily newspapers employ nearly 13,000; agencies, 50,000. Same issue of *Printers' Ink* explores performance of retired military leaders as executives in industry, concludes "military brass can be turned into business gold."

Commercial TV's success in Britain, its rising billings and growing inroads on BBC audience since started in Sept. 1955, is subject of significant report by British-born E.P.H. (Jimmy) James in Dec. 2 *Broadcasting*; onetime NBC research chief, later an MBS v.p., he's now a Nielsen v.p. and recently returned from England where he organized sales-research dept. for Granada TV Network.

"Rating madness should have run its course" by some time in 1958, *Sponsor* predicts in 2-page editorial in Nov. 30 issue, which points out that broadcasters, networks, agencies and many advertisers abhor the practice of "rating worship." "If it is allowed to continue unabated," says editorial, "it is a sad commentary on a creative industry that is not creative enough to lick a system that it doesn't want."

Bound and Indexed

We will index and bind, between embossed hard book covers, a limited quantity of all 1957 issues of the Television Digest Weekly Newsletters, plus the semi-annual TV Factbooks with all Addenda, plus all Supplements and Special Reports. This volume will provide a handy and handsome permanent reference for your own or your company library. Orders will be taken until Dec. 30. Price: \$25 per volume.

SUMMARY-INDEX OF THE WEEK'S NEWS — December 14, 1957

"INSTANT RATINGS" to bow next month when ARB begins wired "Arbitron" service in N. Y.; wired hook-up to connect 8 cities now being installed (p. 1).

MOVIE DEPRESSION now blamed on feature film backlogs on TV, as exhibitors rally to block release of post-1948 backlogs. Hollywood goes all-TV (p. 2).

UHF TAX RELIEF DRIVE enters crucial week as House subcommittee schedules vote on proposal; sputnik casts shadow over industry optimism (p. 3).

CH. 13 LEGAL BATTLE already under way as FCC fails to act on transfer of WATV-WAAT to NTA. N. Y. Regents seek Gov. Meyner support (p. 4).

RUSSIA BEAMS TV to Norway from new transmitter; Austria inaugurates 3 new outlets, Portugal & Switzerland add stations. Other foreign news (p. 5).

NEW TV MARKET opened at Riverton, Wyo., as KWRB-TV goes on air. Next outlets due to start are KVII, Amarillo, & WMBD-TV, Peoria (p. 8).

MAJOR REVISION of FCC rules, first in 10 years, completed as Commission issues new "practice & procedure" regulations governing legal action (p. 9).

NETWORK TV BILLINGS totaled \$49,201,406 in Oct., increase of 8.2% over Oct. 1956, PIB reports; 10-month total is \$418,394,205 (p. 14).

INTERNATIONAL PAY-TV DEAL joins Skiatron & Rediffusion in 21-year mutual aid pact; British firm to install systems for Skiatron (p. 14).

Manufacturing-Distribution

RECORD ELECTRONICS factory sales of \$7 billion, about 50% to Govt., is outlook in EIA year-end statement; TV sales down 4%, production 12% (p. 10).

NOV. RETAIL SALES top comparable 1956 month first time since July; all-level inventory of 2,500,000 at end of Nov. down 300,000 from year ago (p. 10).

MAGNAVOX LOOKING for added dealers in metropolitan areas where share of market is low (p. 10).

HALLIGANS BUYING BACK Hallicrafters for \$3,000,000 cash, reports Penn-Texas. Chicago firm dropping brand-name TV-radio business next month (p. 11).

GERMAN RADIO, HI-FI IMPACT on U. S. market much smaller than speculated; won't pass 250,000 units in any year, says German expert (p. 12).

'INSTANT RATINGS' DUE TO START JAN. 1: The dream (or nightmare) of being able to tell, from minute to minute, the approximate number of viewers watching a given show—even how many switch channels when the commercial begins—is about to come true.

American Research Bureau's instantaneous rating system—or "Arbitron"—is currently being installed in 8 U. S. cities, including N. Y., Chicago & Los Angeles, and the research organization is now taking orders for service, to begin in N. Y. next month.

Principal difference between Arbitron and other oft-reported "instant ratings" is this: Equipment has been developed, manufactured & tested; system is being installed and is virtually ready to go. Despite recent leaks, the 2-year development of Arbitron has been one of best-kept secrets of the highly competitive TV research industry, whose business it is to pry into viewers' secrets.

New York operation will begin Jan. 1 with 300 sample homes, Chicago & Los Angeles Feb. 1 with 200 each. Shortly thereafter, ARB will begin instantaneous rating service with 1200-home 7-city sample (including N. Y. & Chicago, but not Los Angeles)—cities being chosen because their viewing habits in past have accurately reflected those of all 23 cities where 3 networks are in equal competition. Results of 7-city survey will be flashed instantaneously to ARB office in N. Y.

Basic unit of system is small "remote unit" or "transponder" which fits inside TV set in sample home and is adjusted to "feel" position of channel tuner switch. It's connected to central measuring

equipment by leased telephone line. There's nothing basically new in idea—except the one basic breakthrough which ARB is counting on to make system economically feasible: An almost unlimited number of remote units can be hooked to same telephone line.

Measuring system was specially designed by ARB, and, together with remote units, was manufactured by Taller & Cooper div. of American Electronics. It consists of computer, bank of amplifiers, memory cells, counter, teletype printer.

Basically, system works this way: Series of different-frequency pulses are sent out on each line, in sequence; transponder in each home set responds to only one of the frequencies. Each receiver identifies itself when "interrogated" by central control point—every 90 seconds.

It takes printer 2 seconds to turn out report saying, for example: 37 sets on Ch. 2, 96 on Ch. 5, 43 turned off—and new report is printed every 90 seconds (printer reports if any of the remote units are out of order). These figures can be converted to ratings or sets-in-use projections, using standard table. Results can also be shown on 8x13-ft. display board. Though ARB plans to deliver printed overnight ratings to clients, duplicate printers or boards can be installed in clients' offices.

Sample homes to be wired are chosen according to standard sampling procedures, then hooked up by telephone company (non-telephone homes as well as telephone homes are included). N. Y. sample includes homes in entire 16-county metropolitan area, using 12 leased lines, or average of 25 sets on each. It's understood that 200 N. Y. installations have been completed, most important remaining job being telephone company's task of "balancing" the lines.

It's understood ARB hopes eventually to have 2000-3000 U. S. homes wired for local station ratings, but all transponder-equipped homes in each community won't be used in nationwide sampling.

ARB plans several new rating services based on Arbitron—including deluxe job with electronic printer or board in client's office. It plans regular service of national and local overnight ratings, with complete report—broken down into 15-min. segments—hand-delivered to client next day, though, of course, the client can phone ARB at any time to find out how many people watched that 9:12 commercial.

Network spokesmen expressed strong interest in system, some reservations about cost and workability. One said he'd seen lab demonstration, and that he'd seen similar ones before, main difference being that "ARB is going ahead."

Families in sample are given periodic gifts for permitting their sets to be tapped—traditional in TV research industry—plus 90-day free set warranty to convince them that gadget won't hurt their sets. When ARB installers come across sample home TV with continuous tuner (which can't be measured by Arbitron), they replace set with reconditioned receiver of same screen size.

Press demonstration of Arbitron is scheduled for Dec. 18 at ARB's N. Y. office, 400 Park Ave.

EXHIBITORS FIGHT POST-'48 FILM RELEASE: "What time does the next show start?" asks the voice on the phone. "When can you get here?" is the theatre exhibitor's reply.

There's more truth than humor to this gag which has been making the rounds of TV shows the last few weeks—as the blackest depression yet engulfs the movie exhibition industry. Whether it's coincidence or not, theatre owners now have the dubious opportunity of recalling their warnings to major Hollywood producers at the time of the big feature backlog-dumping, and saying "I told you so."

For the start of the near-calamitous drop-off in movie attendance coincided with widespread exhibition of top-notch pre-1948 movie product on nation's TV stations. Climaxing a dip which became obvious in Sept., weekly movie attendance dropped last month to 32,000,000—a new low for Nov., 15% below Nov. 1956 and less than half of weekly average of 75,000,000 in pre-TV 1947. And some 1200 theatres have closed since start of year—leaving 17,800.

Effect of depression is being felt strongly in Hollywood, where TV now is almost the sole occupation of motion picture industry. Industry was shocked this week when Universal-International virtually

suspended theatrical picture production, dismissing more than 400 of its 1500 employees. Company said it had backlog of 32 unreleased pictures—enough for all of 1958—and will decide during hiatus where its future lies.

That a reaction against movie-to-TV release is setting in on west coast is indicated by rather surprising action last week of Screen Producers Guild, which, instead of seeking cut of TV distribution coin from post-1948 feature films, unanimously passed resolution urging movie industry to "bring about a halt to this suicidal method of distribution [release of movies to TV], which is nothing more or less than a 'quick-buck' method of liquidation of valuable assets."

How far exhibitors will get in their campaign to block TV release of post-1948 features is debatable. But they have received from one movie major—20th Century-Fox—tentative assurance that no picture less than 5 years old will be released to TV.

Most exhibitors feel this kind of assurance might not be enough; they're out to block release of any more features to TV. There were even rumors this week that group of exhibitors was trying to scare up enough money to buy the Paramount pre-1948 backlog—only such group of films not yet on TV—just to keep it off the home screens.

Another factor which may retard movie majors' decision to release backlogs of more recent films is possibility of pay TV. While exhibitors' organizations have gone on record as opposing toll TV (though many individual theatre owners want to experiment with it), the major movie companies are expected to have no such reluctance in exploiting medium if it ever should arrive—and there's been some indication that they intend to sit tight in hope that post-1948 films may have some toll-TV value.

Sale of Paramount pre-1948 backlog for TV was imminent at week's end, company's stock spurting in advance of board meeting at which it was believed offer would be approved. NTA and Screen Gems were believed to have inside track on the features, at an eventual return of \$35-\$40,000,000 to Paramount.

CRUCIAL WEEK FOR UHF SET TAX RELIEF: The 4-year drive to eliminate Federal excise tax on all-channel TV receivers—considered by many the most constructive single move to alleviate plight of uhf telecasters—is due to reach now-or-never climax next week when House Ways & Means excise tax subcommittee votes on issue.

Ironically, legislative experts agree that chances would be excellent this time—if it weren't for sputnik. There's more inclination in Congress now to take cynical look at any tax-cut proposals in light of heavier concentration on defense and satellites—even such relatively piddling revenue cuts as that involved in the uhf proposal.

For 3 successive years, industry muffed its opportunity to get measure passed—due to an inexplicable lethargy on part of manufacturing and telecasting interests, even uhf telecasters. When voting time came up, important committee members were only vaguely aware of what proposal was all about.

This year, under leadership of uhf-organized Committee for Competitive TV, and with active cooperation of NARTB, telecasters have conducted quiet but hard-hitting campaign, taking full advantage of unanimous endorsement of tax relief by Senate & House Commerce Committees and FCC to counterbalance Treasury Dept.'s opposition. Set manufacturers, through Electronic Industries Assn., have again endorsed the measure this fall.

Industry's argument for tax relief is based on contention that such a measure would eliminate price differential between vhf-only and all-channel sets, and encourage manufacturers to drop production of sets which can't tune uhf band. Treasury's opposition stems from potential elimination of all TV excise tax revenues. But telecasters, in talking with Congressmen, have pointed out that Govt. can be expected to gain far more revenue if TV output increases, more uhf stations show profit, new ones go on air, making more jobs and resulting in more tax money.

They also have used TV receiver industry's declining output and dollar volume as argument that tax exemption would help spur employment and sales and that tax loss to Govt. wouldn't be as

great now as it would have been 3 years ago. Federal manufacturers excise collection on TV sets (10% of factory price) dipped from \$110,087,000 in fiscal 1955 to \$99,134,000 in 1956 and \$86,427,900 in 1957.

If the tax exemption should be proposed by 8-man excise tax subcommittee under Rep. Forand (D-R. I.), its chances of eventual passage by both Houses are excellent. If subcommittee votes it down, odds against Congressional action would be almost insurmountable.

This year, for first time, subcommittee members are thinking seriously about proposal. For example, we were told by Rep. Eberharter (D-Pa.)—second-ranking majority subcommittee member, in whose home district of Pittsburgh 2 uhf outlets went off air:

“The backers of this relief have made a very good case from the social, business and even the revenue standpoint . . . Had it not been for sputnik and mutnik, the chances would have been very good, especially in view of the endorsement by both the House and Senate Committees on Interstate & Foreign Commerce. It’s difficult to tell now, but there may be a feeling in the [Ways & Means] Committee that now is not the time to reduce any excise taxes.”

Eberharter spoke after attending 3 days of subcommittee meetings on excise tax change proposals. Subcommittee reconvenes Mon. Dec. 16, continuing in session daily until it is ready to make recommendations to full Committee. These recommendations are almost always adopted by Committee.

Legal Battle Over Ch. 13: Though it was calendared for action this week, FCC passed over approval of projected \$3,500,000-plus transfer of Newark-New York’s WATV (Ch. 13) with radio WAAT to National Telefilm Associates (Vol. 13:40, 44, 49)—and it looks now like a “battle of lawyers” is in prospect over proposal of TV committee of N. Y. State’s Board of Regents that Ch. 13 be converted to education and that TV station should be sold instead to educational interests.

Counsel for WATV-WAAT owners, Paul M. Segal, and for NTA, Tom Wall (Dow, Lohnes & Albertson), have filed briefs opposing rule-making to change status of Ch. 13 from commercial to educational, and counsel for Regents, Henry G. Fischer, next week will file reply. Political undertones came to surface this week when Jacob L. Holtzmann, prominent N. Y. attorney and chairman of Regents TV committee, disclosed he had conferred with New Jersey’s Gov. Meyner to support move to make New Jersey’s sole vhf channel an educational outlet for N. Y. metropolitan area.

Gov. Meyner, though said to be “much interested,” did not commit himself—but even Holtzmann made it clear that both states’ legislatures would have to appropriate for such a station. The Governor, a Democratic presidential prospect, 3 years ago eliminated from state’s budget a project for closed-circuit TV programs to N. J. schools, taking position he opposed permitting a TV screen to “come between teacher and pupils in our schools.”

Opposition to Regents’ proposal, as expressed in NTA brief, takes position that board has no legal standing under rules, that Holtzmann committee’s proposal revives old “Avco rule,” dropped by FCC some years ago, giving FCC right to determine who should be purchaser. WATV brief maintains Regents have long held 7 CPs, have done nothing toward construction, have “absolutely no money . . . there being no appropriation by the Legislature [of N. Y.] and there being no indication of any likelihood of any such legislation being enacted.”

WATV brief also notes suggested Sept. 30, 1958 deadline for transfer to education is “impossible” not only because of necessity to obtain funds but fact other applicants

may also file for the channel. There has been no separation of evaluations of TV and radio properties, but Counsel Segal’s brief observes that Regents are “probably unaware of all of the implications of the transaction”—most particularly the \$1,000,000 in film contracts and long-term employment contracts involved.

Note: It was learned this week that, before the NTA deal and before the Regents’ move, there were conversations with WATV owners looking to possible acquisition of station by New York University and by Metropolitan Educational TV Assn.

■

More Subliminal Lore: A veteran experimenter in subliminal projection—Director H. Richard Blackwell of U of Mich. Vision Research Labs, who worked with subliminal perception during World War II for U. S. Govt. and since then at the university—this week debunked notion that “invisible” ads would be influential. “I know of no convincing evidence that subliminal perceptions are any different from any other kind,” he said. “I believe that ‘invisible advertising’ would be less effective than the kinds we can see clearly, except possibly for a novelty effect.” Meanwhile, Sir Harold Bishop, veteran BBC director of engineering, commented this week on the persistent reports that the British Govt. TV service had experimented with subliminal projection. As to the suggestion “that the BBC has tested the system of ‘invisible’ television advertising,” he wrote us, “may I say that there is no foundation whatever for this suggestion.”

NARTB Freedom of Information Committee steps up campaign to allow broader TV-radio reporting of public proceedings, will mail kits to TV-radio stations, state broadcasting assn. presidents. Committee also: (1) Received report that 38 state assns. now have similar committees. (2) Heard report that State Bar Assn. of Tex. had rejected ABA Canon 35 usage in Tex. courts. (3) Endorsed pres. Harold E. Fellows’ request that industry spokesman be allowed to present case against Canon 35 at ABA House of Delegates meeting Feb. 24-25 in Atlanta. (4) Supported in principle Sen. Hennings’ bill (S-2148) which would keep open channels of public information.

NARTB board holds regular winter meeting Jan. 19-24 at Camelback Inn, Phoenix; TV finance committee meets Jan. 20, TV board Jan. 23.

Foreign TV Report: Increasing rate of TV's expansion and influence in other countries is indicated in recent reports from overseas, many of them direct from foreign capitals in response to our survey for international directory section of forthcoming *1958 Spring-Summer TV Factbook*, which goes to press in Feb. This reliable information covers some of more recent changes:

Soviet Union—Russia is using TV as foreign propaganda weapon, according to special report made this month by USIA Office of Research & Intelligence. This conclusion is drawn from fact that Soviet has put station on air at Murmansk 3 years ahead of schedule and has announced chain of satellites at Monchegorsk, Kirovsk, Pechenga & Kandalaksha, to make Murmansk studios "the TV center of the Polar Region." These stations, according to report, are aiming at coverage of parts of Norway, particularly the province of Finnmark, which has common border with Soviet Union.

Other Communist stations which telecast to western-oriented nations: East German outlets, some of which beam programs to West Germany; Bratislava, to Austria; Tallinn, to Finland. Says USIA report: "The opening of the Murmansk station indicates that in spite of all the technical disadvantages of TV, such as a short direct range and different standards of transmission in various countries, the Communists see enough propaganda potential in this medium to try to reach greater audiences in the free world."

Austria—There are now 6 TV stations on air, plus 2 translator-type repeater outlets, new 30-kw station at Pyramidenkogel (Karnten) and 0.1-watt repeaters at Schladming and Baden having begun operation this month, we're informed by Osterreichischer Rundfunk, which says sets-in-use now total 15,000. Three more stations are due in 1958—two 60-kw outlets at Jauerling & Patscherkofel and 10-kw installation at Kahlenberg.

Portugal—Still undecided about commercial operation, Portugal formally inaugurated 100-kw station at Lisbon and 50-kw station at Lousa (Coimbra) late last month.

Three new Canadian TV stations, including 2 satellites, were recommended by CBC Board of Governors at Dec. 6 meeting. Approved were radio CHAB (Mrs. L. A. Davis, owner) for Ch. 4, Moose Jaw, Sask.; Societe Video de Clermont for Ch. 75 satellite at Clermont, Que. to repeat CFCM-TV, Quebec City; La Compagnie de Television Pohenegamooke Inc. for Ch. 70 satellite at Estcourt, Que. to repeat CJBR-TV, Rimouski, Que.

European Protestant radio station building plans are being pushed this week in Geneva by lay and clergy promoters despite June refusal of support by Federation of Swiss Protestant Churches. Promoters envision medium-power 1865-mi. range station to cost \$575,000-\$690,000 with operating costs of \$161,000 a year.

Fremantle Overseas Radio & TV Inc. establishes British sales subsidiary with offices in London, personnel not yet announced. Lane Blackwell, former European representative of Fremantle, has joined NBC to head British & European sales organization.

Eleven nations will participate in Eurovision's New Year's Eve program. Originating portions of show and carrying all of it will be TV stations in Britain (BBC), Netherlands, Austria, Italy, Belgium, Luxembourg, France, Switzerland, Monaco, Germany, Denmark.

New 100-kw outlet at Oporto is due to go on air by end of this month, with 6.5-kw station at Foia and 1-kw at Montejunto scheduled to start "at the beginning of next year," according to letter from Radiotevisao Portuguesa, which estimates 5000 receivers in use.

Australia—Australian Broadcasting Commission hopes to put 4 more non-commercial stations (Brisbane, Adelaide, Perth & Hobart) on air in fiscal 1959-60, will ask for applications for commercial stations in same cities some time next year. There currently are 6 stations on air, in Sydney & Melbourne (4 commercial). Commission says about 120,000 receivers were licensed as of Oct. 1.

Switzerland—Fifth outlet, German-language station at Saentis (30-kw ERP), went on air this month, says Swiss Broadcasting Corp. Under construction are 10-kw Italian-language stations at Monte Ceneri (due next Spring) and San Salvatore (due next Fall). New French station is planned at Mt. Gibloux, with no definite target date. The non-commercial service is beamed to about 30,000 licensed receivers.

Luxembourg—Privately owned commercial Tele-Luxembourg has increased power to 100-kw, now serves 5000 receivers, according to artistic director Jacques-Gerard Cornu.

Poland—First TV station in Polish Silesia is now on air at Katowice, according to Reuters dispatch this week. Data in *TV Factbook No. 25* indicates station has 15-kw transmitter, 200-kw ERP.

* * * *

"Free enterprise TV in the U. S. is so far ahead of TV in Europe and South America that there is no basis of comparison," according to Colin M. Selph, former pres. of Santa Barbara's KEYT, who has just returned from 6-month study of foreign TV. "I wish the critics of American TV could view foreign TV for one week—particularly those critics who would force stringent controls and censorship on almost every type of program," he said. "Foreign programs are so mediocre that the average family pays little or no attention to the medium."

He found West Germany "the brightest spot in European TV [and] closest to the American type," with Italian and British commercial TV also promising.

A super TV sputnik is being built by Russia (Vol. 13:49) not only to jam radar and TV & radio signals but broadcast "its own propaganda on any TV channel anywhere in the world," Rep. Patterson (R-Conn.) asserted this week. Quoting "most reliable & authoritative sources" who informed him as member of House Armed Services and Joint Atomic Energy Committees, Patterson also told Middletown (Conn.) American Legion that sputniks may be utilized as "bomb-carry vehicles." He called for "super-accelerated crash program in all research & weaponry."

British retail TV sales hit year's peak of 191,000 in Sept. vs. 175,000 year ago, reports British Radio Equipment Mfrs. Assn. Total for 9 months was 856,000 vs. 777,000 in 1956 period. Radio sales in Sept. were 105,000 vs. 86,000 in 1956, while 9-mo. total was 824,000 vs. 674,000 last year.

Suggestions on international radio problems are invited by FCC, with Jan. 23 deadline, as part of U. S. preparation for International Telecommunication Union conference starting in Geneva July 1, 1959.

EIA spectrum study proposal is still at level of informal talks between EIA committee members and govt. officials (Vol. 13:44, 47-48). No formal meetings have been lined up and none are likely until after Jan. 1.

Personal Notes: Herbert B. Lazarus resigns Dec. 31 as AB-PT v.p., secy. & gen. counsel to open private law practice . . . Earl Rettig elected California National Productions pres., leaving post of NBC v.p. and treas.; he succeeds Robert D. Levitt, resigned; Weller Keever promoted to v.p. & gen. mgr. . . . Marcel Carter promoted to CBC controller of management planning & development, succeeded by A. M. Henderson as comptroller . . . Robert M. Weitman, CBS-TV program development v.p., named TV industry coordinator for 10th anniversary of State of Israel . . . Henry Hede promoted to ABC-TV administrative sales mgr., succeeded as eastern sales mgr. by Eugene Wyatt . . . Don L. Kearney, ex-ABC Film Syndication sales v.p., appointed Corinthian stations sales director . . . Herbert L. Golden, v.p. of Entertainment Industries div., Bankers Trust Co., N. Y. and former *Variety* reporter & editor, Jan. 1 becomes pres. of new United Artists Television Corp. and v.p. & director of parent United Artists Corp. . . . Stephen A. Machcinski Jr. promoted to exec. v.p. of rep Adam Young Inc. . . . Robert J. Sullivan, ex-WOR-TV & WOR, N. Y., named CBS Radio mgr. of audience promotion & merchandising . . . James Richards, ex-Don Lee v.p., rejoins John Blair & Co. as account exec. on N. Y. staff . . . Norman J. Ostby, ex-Don Lee station relations v.p., appointed gen. mgr. of MBS west coast div. . . . Walter E. Nilson promoted to rep Katz Agency TV sales mgr.; Wm. W. Joyce named Chicago TV sales mgr.; Oliver T. Blackwell, Alfred I. Miranda & Michael T. Membrado promoted to asst. TV sales mgrs. . . . F. A. (Mike) Wurster transfers from N. Y. office of John E. Pearson rep firm after holidays to become mgr. of San Francisco office, succeeding Martin Percival, who has resigned to accept a position in N. Y. . . . Mutual Life Insurance Co., 2800 Euclid Bldg., Cleveland . . . Ted Steele forms Ted Steele Radio & Television Station Representatives, 510 Madison Ave., N. Y. with Leonard H. Levitt v.p.-gen. mgr., Steele continuing WOR-TV program . . . Mort Stein resigns as sales mgr. of Frazen TV Commercial Productions.

Seymour M. Chase, onetime attorney in FCC Office of Opinions & Review, who for last 4 years has been with Segal, Smith & Hennessey law firm, on Jan. 2 occupies own offices at 736 Wyatt Bldg., Washington (phone, Executive 3-2299); George S. Smith and Philip J. Hennessey, forming new law firm of Smith & Hennessey (Vol. 13:45), same date move into own building at 1240 19th St. NW (Executive 3-7242). In honor of his ex-partners, Paul M. Segal, who retains present quarters at 816 Connecticut Ave., gives cocktail party Dec. 20 at Army & Navy Club.

Nathan D. Golden, veteran director of Dept. of Commerce scientific, motion picture & photographic products div., awarded B'nai Israel plaque for outstanding achievement.

Wm. S. Paley, CBS chairman, appointed by President Eisenhower to Civil War Centennial Commission, preparing program for 100th anniversary of Civil War.

Frank L. Dennis promoted to USIA director of Public Information, succeeding Sidney H. Fine, assigned overseas.

Obituary

Johnnie Andrews, 50, pres. of Andrews Tower Co., TV & radio tower builder, died Dec. 12 in plane crash near Van Horn, Tex. Local officials said he may have suffered heart attack shortly before crash.

ADVERTISING AGENCIES: Dwight M. Mills, Kenyon & Eckhardt exec. committee chairman, plans to retire next year, no date set . . . F. Kenneth Beirn and F. Bourne Ruthrauff resign as v.p.'s of Erwin Wasey, Ruthrauff & Ryan . . . Anderson F. Hewitt, Kenyon & Eckhardt senior v.p., elected to exec. committee . . . Dan Potter promoted from broadcast media director of Norman, Craig & Kummel to head new corporate media planning & analysis dept. . . . Edward N. Mayer Jr. promoted to exec. v.p. of Communications Counselors Inc., div. of McCann-Erickson . . . Charles E. Coe, ex-Communications Counselors div. of McCann-Erickson, appointed Reach, McClinton & Co. v.p., director of market development and plans board member . . . John T. McHugh, ex-Joseph Katz agency pres., appointed Keyes, Madden & Jones exec. v.p. . . . Robert J. Brewster, ex-McCann-Erickson, joins J. Walter Thompson Co., Chicago, as a senior group head.

Baltimore's taxing spree—not only the proposed levies on all advertising media (Vol. 13:45-49) but by newly imposed tax on stocks & machinery of industries—is reaping an inevitable harvest. AP reports that 102-year-old A. K. Robins Co., employing 75, and Maryland Beverage Co. are moving to other towns—making 11 firms to do so since new city tax on inventory & equipment went into effect earlier this year.

Tempest in a Toothpaste Tube: Madison Ave. was still choosing up sides at week's end over rather spectacular loss of Whitehall Pharmacal account by Grey Adv. Agency after Grey pres. Arthur Fatt acknowledged in TV interview that he didn't always use Whitehall's Kolynos toothpaste. Appearing on *Nightbeat* on WABD, N. Y., Fatt told interviewer Howard Whitman, in response to question, that he had used Crest toothpaste the morning of telecast; Whitman then brought out that Grey Adv. represented Kolynos. Fatt stated his agency also handled some products of Procter & Gamble, but not Crest. This week, Whitehall dropped Grey for Kolynos. Though Whitehall parent American Home Products Corp. is one of top 20 national advertisers, Kolynos account represents only about \$300,000 a year. Most admen felt that by & large Fatt did excellent job on TV show in representing ad industry—but opinion was divided as the whether Whitehall was justified in dismissing agency. There was unanimity, however, in feeling that it would be a long time before any more agency men appeared on TV interview shows.

New reps: WESH-TV, Daytona Beach, to Avery-Knodel (from Petry); KSHO-TV, Las Vegas, to McGavren-Quinn (from Forjoe); KCEN-TV, Temple, Tex. to Blair Television Assoc. (from Hollingbery); WJBF, Augusta, Ga. to Hollingbery (from Avery-Knodel).

Telecasting Notes: What's more important to a sponsor than ratings? At least 3 other considerations should be, says pres. Walter Guild of Guild, Bascom & Bonfigli in special article in Dec. 11 *Variety*. "We dearly love high ratings, and are as dejected as the next one when we lose a point or 2," he sums up. "But we rank ratings in about fourth place in our consideration of TV properties" . . . Mr. Guild's 3 more-important-than-ratings points: (1) Good commercial fusion, or "opportunity to present commercials at a time and in a situation when audience is in a mood to receive them." (2) Every-week frequency of commercial message, rather than alt. week sponsorship. (3) Exclusivity of sponsorship, as opposed to shared sponsorship . . . John Crosby takes dimmer view of ratings in his Dec. 13 N. Y. *Herald Tribune* column. "Ratings are idiotic," he says. "Only idiots would pay the slightest attention to them and here a whole industry is based on them" . . . "The TV market has suddenly gone soft," reports another article in same issue of *Variety*, "and the networks are more than a little concerned over a situation that finds them with several openings in prime time and no solid prospects for filling them." Among shows which article lists as seeking alt. sponsors are NBC's *Restless Gun*, which pulled No. 5 rating in Nov. ARB list; CBS's well-rated *Person to Person* and *I Love Lucy* reruns . . . Swing to live shows next summer and fall is predicted by ABC-TV program v.p. James Aubrey Jr., according to Dec. 9 *Billboard*. His logic: Sponsors and producers have learned

lesson this season, and plan to start shows live so that changes may be made quickly, if needed; if shows prove successful, then they'll switch them to film . . . Westinghouse Broadcasting Co. will be only U. S. non-network station group with correspondent at Paris NATO meetings; WBC national correspondent Rod MacLeish will transmit daily 15-min. reports for duration of conference and will supervise special UP film coverage for WBC stations . . . Major cultural effort of CBS-TV, *Seven Lively Arts*, will be dropped after 10 of the originally planned 26 shows, having failed to attract sponsor—or critical acclaim, until Dec. 7 jazz show, which received enthusiastic response from reviewers . . . Metropolitan music critics again applauded *NBC-TV Opera Theatre* as it opened season Dec. 7 with striking performance of Poulenc's "Dialogues of the Carmelites" . . . One of most ambitious and largest news shows ever scheduled is CBS-TV's Jan. 5 *Where We Stand*, 90-min. program sponsored by Prudential Insurance, and reporting on scientific, military, govt., economic & educational scorecard between U. S. & Russia . . . IT&T's debut in network TV sponsorship will be 60-min. CBS-TV *See It Now* Dec. 30 program of filmed highlights of Marian Anderson's Asian concert tour . . . Major league baseball on film is project being considered by ABC-TV for 1958 ball season. Under plan, daytime games would be filmed, then played back same evening . . . Like old times: CBS-TV's *Lucille Ball-Desi Arnaz* show topped both Nielsen & ARB ratings for Nov., when the new once-a-month 60-min. show made its debut.

TV poses no moral problem to Catholics generally, Bishop Wm. A. Scully of Albany, chairman of Episcopal Committee on Motion Pictures, Radio & TV, said this week. Reminding Catholics to renew pledges of loyalty to Legion of Decency and be on guard against improper movies, he said his Committee sees no need now to pass judgment on U. S. TV or radio programs in carrying out censorship encyclical by Pope Pius XII (Vol. 13:46-47). "The [broadcasting] industry is to be commended in preserving standards which permit the American home to tune in programs at random without being faced, in each instance, with a problem of moral judgment," Bishop Scully said. He praised TV's "self-regulatory agencies" for upholding—"with some exceptions"—broadcasting principles of serving public interest.

Westinghouse's 5 TV stations, which under direction of pres. Don McGannon are taking lead among non-network interests in production of our own educational programs, is screening documentary *Education '57* for U. S. Commissioner of Education Lawrence Derthick and others at Washington's Statler Hotel, Dec. 16 at 5 p.m. Last month, it screened for FCC its *Adventurers in Number & Space*, featuring Baird Puppets in nine 30-min. films designed to popularize such subjects as arithmetic, algebra, geometry, computers, etc. Westinghouse spent \$80,000 on the series, is currently running them sustaining in prime time (between 7 & 8 p.m.) on its own stations, plans to release them also to educational stations.

Rate increases: WSIX-TV, Nashville, Nov. 1 added Class AA hour (7-9:30 p.m. daily) at \$700, min. at \$140, Class A hour going from \$575 to \$600. WILK-TV, Wilkes-Barre, Nov. 1 raised base hour from \$425 to \$475, min. \$85 to \$95, its second increase in 3 months, having raised hour from \$375 last Sept. WESH-TV, Daytona Beach, Nov. 1 added Class AA hour (7:30-10:30 p.m. daily) at \$400, min. at \$90, Class A hour going from \$200 to \$325. WTPA, Harrisburg, Nov. 1 raised hour from \$350 to \$385, 20 sec. \$70 to \$75.

TV network contracts with major league baseball clubs for Sunday games next season should be deferred pending Congressional investigation, Chairman Celler (D-N. Y.) and Rep. Keating (R-N. Y.) of House Judiciary anti-trust subcommittee said this week. Responding to protests by minor leagues that telecasts scheduled by CBS-TV and 5 major clubs would cut into minors' Sunday gates (Vol. 13:49), Celler & Keating warned in joint statement that "precipitous action taken now would seriously interfere with an ultimate solution that is fair & equitable to all concerned." They promised probe of dispute between minors & majors to see if new anti-monopoly legislation is needed to prevent situation which would "jeopardize the welfare of the entire sport."

Local TV programming by Westinghouse stations in new "Project 62" will help "discover & develop the performing, writing & producing talent for the industry's needs," according to Westinghouse Bestg. Co. pres. Donald H. McGannon. He told meeting of station executives in Savannah that "Project 62" will be financed as corporate undertaking "well into 6 figures."

Jefferson Standard Bestg. Co.'s WBTV & WBT, Charlotte, have received first annual "Corporate Citizenship Award" from N. C. Literary and Historical Assn. Inc. Also, this week, Jefferson Standard Foundation awarded 3 one-year scholarships to U of N. C. students for study in Dept. of Radio, TV and Motion Pictures.

Weather radar system which can be used by TV-radio stations and other relatively small privately operated enterprises, such as construction projects and offshore drilling operations, was announced this week by RCA. New compact ground system is designed to provide accurate forecasts, spotting and tracking disturbances at distances up to 150 mi. It is being manufactured in RCA's Los Angeles defense electronic products plant.

New closed-circuit TV system at Ohrbach's dept store, N. Y., was credited with first arrest this week when woman was held on charge of taking \$70 sweater.

New and Upcoming Stations: KWRB-TV, Riverton, Wyo. (Ch. 10) opened up new market when it started Dec. 14 as CBS-TV affiliate, bringing on-air total to 520 (90 uhf). It plans off-air network pickup from KTWO-TV, Casper, Wyo. (Ch. 2), 105-mi. away, when that station moves to higher power at new site, scheduled for Jan. Other outlets due soon are KVII, Amarillo, Tex. (Ch. 7) and WMBD-TV, Peoria, Ill. (Ch. 31).

KWRB-TV has 5-kw GE transmitter, 12-bay antenna, atop Mt. Ridge, Boysen Peak. Studio in Thermopolis is connected via microwave, as will be studios to be built later in Riverton & Worland. Owner-mgr. is Joseph P. Ernst, operator of radio KWRL, Riverton; KRTR, Thermopolis; KWOR, Worland. Base hour is \$150. Rep is Meeker.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WLOF-TV, Orlando, Fla. (Ch. 9) has 80% of GE equipment on hand, hopes to begin test patterns about Jan. 9, programming 2 weeks later, reports v.p.-gen. mgr. Donn R. Colee. It will use 651-ft. Stainless tower. Principal owners are Joseph L. Brechner and John W. Kluge. Rates not yet set. Rep will be Young TV.

WJCT, Jacksonville, Fla. (Ch. 7, educational) has

Radio Station Sales Approved by FCC: WDIA, Memphis, Tenn. by John R. Pepper & E. R. Ferguson for \$1,000,000 to owners of WOPA, Oak Park, Ill. (Vol. 13:44) . . . WOBS, Jacksonville, Fla. by Robert W. Rounsaville for \$500,000 to owners of WSTN, St. Augustine (Vol. 13:34) . . . WMRY, New Orleans, La. by Lester Kamin and associates for \$250,000 to Robert W. Rounsaville (Vol. 13:34) . . . KITO, San Bernardino, Cal. by Frank Oxarart, Albert Zugsmith and John D. Feldmann for \$200,000 to owners of KWKW, Pasadena, Cal. (Vol. 13:46) . . . KRCT, Pasadena, Tex. by W. D. Christmas for \$175,000 to v.p.-gen. mgr. John H. Touchstone and Leroy J. Gloger (Vol. 13:46) . . . WTAN, Clearwater, Fla. by Mary B. & William G. Wells for \$155,000 to H. Dennison Parker (Vol. 13:44) . . . WWIL, Ft. Lauderdale, Fla. by Missouri Bestg. Corp. for \$130,000 to Florida Air-Power Inc. (Vol. 13:36) . . . WEAR, Pensacola, Fla. by Gulfport Bestg. Corp. for \$112,500 to Florida Radio & Bestg. Co. (Vol. 13:43) . . . WMMB, Melbourne, Fla. by Mrs. Erna Bessler for \$102,500 to Harlan Murrelle and associates (Vol. 13:43) . . . WVLN, Olney, Ill. by Olney Bestg. Co. for \$95,000 to owners of WSOY, Decatur, Ill. . . . WHUC, Hudson, N. Y. by Robert P. Strakos and John F. Kearney for \$82,500 to Colgreene Bestg. Co. (Vol. 13:47) . . . KTOO, Henderson, Nev. by KTOO Inc. for \$78,945 to Advertising Dynamics Corp. . . . WGKV, Charleston, W. Va. by Jacob & Walter Evans for \$77,500 to Joseph L. Brechner (Vol. 13:46) . . . KTNM, Tucumcari, N. M. 55% by David R. Worley, Lloyd Hawkins & Bruce Zorns for \$63,000 to Howard L. Maudlin (Vol. 13:33) . . . WIKB, Iron River, Mich. by WIKB Inc. for \$53,000 to Edwin Phelps and son (Vol. 13:44) . . . WMGE, Madison, Ga. by W. C. Woodall Jr. and associates for \$30,000 to Howard C. Gilreath and F. K. Graham (Vol. 13:46).

Sale of KGEO-TV, Enid-Oklahoma City (Ch. 5) by Streets Electronics Inc. (P. R. Banta, pres.) for \$2,500,000 (Vol. 13:41, 45) was approved by FCC. Buyers are L. E. Caster, ex-pres. of WREX-TV, Rockford, Ill. (Ch. 13), who acquires 75%, and Ashley L. Robison, owner of radio KOVO, Provo, Utah and 15% stockholder of WREX-TV, who gets 25%. Banta is to buy back 10% of KGEO-TV from Caster.

changed target to Feb. 1, reports Heywood Dowling, pres. of grantee Educational Television Inc. GE 5-kw transmitter donated by WMBR-TV is expected to be hooked up in month to Alford antenna on WFGA-TV tower at 843-ft. level. It will use WMBR-TV studios, but transmitter and film equipment will be located in WFGA-TV transmitter house.

WBPZ-TV, Lock Haven, Pa. (Ch. 32) is wiring 1-kw RCA transmitter, plans test patterns about Jan. 1, reports WBPZ gen. mgr. Harris Lipez. It will be first local TV outlet in area which has been getting service from community antenna systems. It plans Jan. 15 start as ABC-TV affiliate, picking programs off air from WILK-TV, 80 mi. away. Antenna was scheduled for installation Dec. 16 on Stainless 100-ft. tower on Sugar Lusk Mt. Radio staffers assuming TV duties are Richard Yoke, sales mgr.; Dave King, program mgr.; Albert Stratmoen, chief engineer. Base hour will be \$100. Rep not chosen.

New joint 1110-ft. tower was inaugurated Dec. 15 by Philadelphia's WFIL-TV (Ch. 6) & WRCV-TV (Ch. 3) with 30-min. dedicatory color program carried by both stations.

Translator starts: K78AF, La Barge-Big Piney, Wyo. began Dec. 7 repeating KSL-TV, Salt Lake City.

Reports of Radio Station Sales: KDON, Salinas, Cal. by Clark Fee and Glen Stadler for \$260,000 to Richard Bott, asst. gen. mgr. of KSAN-TV, San Francisco (Hamilton, Stubblefield, Twining & Assoc.) . . . WOTW, Nashua, N. H. by Arthur A. Newcomb for \$155,000 to Theodore Feinstein, owner of 3 other New England stations . . . KSUB, Cedar City, Utah, 34.27% by Durham Morris, W. Arthur Jones, Lannell N. Lunt and Lorin C. Miles for \$65,415 to Beehive Telecasting Corp., grantee for Ch. 11 in Provo and present 23.72% owner; Beehive will own 58% of station after transaction . . . KTOO, Henderson, Nev. by Tom Magowan and Fred Jones for \$63,600 to group of Hollywood TV-radio announcers . . . KOFE, Pullman, Wash. by J. Ronald Bayton & Maynard F. Hicks for \$60,000 to KOFE Inc. (Herbert E. Everitt, pres.) . . . KASI, Ames, Ia. by Ames Bestg. Corp. for \$57,000 to William Evans, free-lance radio producer & writer . . . WJOT, Lake City, S. C. by Lake Bestg. Corp. for \$49,731 to Charles W. & John A. Dowdy.

Transfer of KCOP, Los Angeles (Ch. 13) to Bing Crosby-Kenyon Brown group for \$4,000,000 from Copley Press was approved by FCC this week—Commission satisfied with purchaser's program plans, which it had questioned after complaints were filed by NAFBRAT (Vol. 13:34, 37). Viewers' group had charged that station's schedule was poor in presentation of controversial issues, overcommercialized, etc.; purchaser had said it planned no substantial change, later submitted statement meeting Commission approval.

Kansas City Star, now selling its TV-radio stations for \$7,600,000 cash to National Theatres Inc. in compliance with consent decree arising from anti-trust conviction (Vol. 13:48), faces new damage suits filed Dec. 13 in Federal district court in Kansas City by publishers of several newspapers and shopping papers. Alleging monopolistic practices, publisher of *Independence* (Kan.) *Daily News* asks treble damages of \$3,000,000 and \$150,000 attorney fees; owners of *North Kansas City News* and weekly *Industrial Press* demand \$2,550,000 damages and \$50,000 fees; publishers of *Johnson County Herald* seek \$1,500,000 & \$50,000.

FCC Issues Major Rules Revision: New "practice & procedure" rules of FCC, issued this week, are source of pride to Commission—being first major revision in about 10 years, and FCC being first govt. agency to accomplish feat essayed by all similar agencies.

Extensive document, to be printed in *Federal Register* as soon as possible, also in special Govt. Printing Office pamphlet, contains numerous revisions—including elimination of mandatory "written hearings" (Vol. 13:48), changes in treatment of petitions for stay and reconsideration, simplification of admission to practice before Commission, modification of procedure in filing amendments after initial decisions, etc.

* * * *

FCC continued its closer scrutiny of "drop-out" agreements, as in Lubbock case (Vol. 13:48-49) wherein competitor withdraws application, leaving one applicant free for grant. It stayed finalization of Ch. 18 CP in Baton Rouge for Port City TV Co., pending study of agreement with Bayou Bestg. Corp., which dismissed.

Sale of 60% of WMFD-TV, Wilmington, N.C. (Ch. 6) by Richard A. Dunlea & wife for \$153,850 (Vol. 13:44) was approved by FCC this week. Dan D. Cameron retains his 40% of station, Dunleas keep radio WMFD. Buyers of Dunlea stock are WNCT, Greenville, N. C. (Ch. 9) and J. W. Jackson. After transfer is effected, stockholders are to buy additional shares which will result in this lineup: WNCT, 49.58%; Dan D. Cameron, 40%; James W. Jackson, 10.41%.

Control of KPLC-TV, Lake Charles, La. (Ch. 7) & KPLC is being acquired by T. B. Lanford, who already has 1/3 interest, it's revealed by application filed with FCC. He's paying \$322,000 for 1/6 held by R. M. Dean and 1/6 by Viola Lipe Dean Trust, increasing holdings to 2/3. Other 1/3 partnership interest is held by L. M. Sepaugh. Oct. 31 combined balance sheet for TV and radio lists \$134,297 net profit. It shows \$219,218 current assets, \$276,475 fixed assets; \$90,998 current liabilities, \$282,876 investment by Lanford, \$151,035 by Sepaugh.

Triangle Publications Inc., headed by Walter Annenberg, publisher of *Philadelphia Inquirer*, *TV Guide* and other periodicals, owner of WFIL-TV & WFIL, Philadelphia as well as 4 other TV and 4 other radio stations [see p. 206, *TV Factbook No. 25*] this week acquired tabloid *Philadelphia Daily News* (circ. 175,000) from Matthew J. McCloskey, treas. of Democratic National Committee. It will continue to be published as a tabloid but editorial policy changes to Republican.

Five applications for TV stations and one for a translator were filed with FCC this week, bringing total to 122 (32 uhf) for stations, 25 for translators. Applications: For Moline, Ill., 2 for Ch. 8, one by group headed by Frank Schreiber, ex-gen. mgr. of WGN-TV, Chicago, other by principals of WMT-TV, Cedar Rapids; for Hot Springs, Ark., Ch. 9, by Donald Reynolds, owner of KFSA-TV, Ft. Smith, and other stations; for Gainesville, Fla., educational Ch. 5, by U of Fla.; Lubbock, Tex., Ch. 5, by owners of KDAV there. Translator was for Ch. 77, Redwood Falls, Minn. [For details, see *TV Addenda 25-T* herewith.]

Assn. of Maximum Service Telecasters added 5 members at board meeting in Tulsa last week. KOA-TV, Denver; WFIL-TV, Philadelphia; WBR-TV, Knoxville; WRGP-TV, Chattanooga; KSIX-TV, Corpus Christi.

Allocations activity: (1) *Washington Post*, operator of WTOP-TV (Ch. 9) and WMBR-TV, Jacksonville (Ch. 4), asked that Ch. 8 be shifted from Selma, Ala. to Birmingham. CP for Ch. 8 is held by WSLA (Wm. Brennan & Wm. E. Benns) which has sought approval for move to new site and 2000-ft. tower 50-mi. southeast of Selma. WSLA has had grant since Dec. 14, 1953, is seeking 7th extension of time to build. WSLA has had long hassle with Govt., in attempt to get approval of its proposed tower. (2) KATV, Pine Bluff, Ark. (Ch. 7) asked for move of its channel to Little Rock, shift of Ch. 9 from Hot Springs to Pine Bluff. (3) WWLP, Springfield, Mass. (Ch. 22) filed 5-town uhf parlay aimed at getting Ch. 74 into Springfield, Vt. for translator. (4) FCC started rule-making to delete Ch. 5 & 8 from Walla Walla, Wash. to make city all-uhf. (5) Commission denied proposals to shift educational Ch. 11 from Durham, N. H. to Keene, N. H. or Worcester, Mass. for commercial use.

Time for comments on low-power vhf rule-making was again moved, from Dec. 15 to Jan. 15, at request of booster proponent Gov. McNichols of Colo.

Ch. 11 CP to Beehive Telecasting Corp., Provo, Utah, was made effective immediately. Translators on Ch. 73, 80 & 83 were granted for Redwood Falls, Minn.

Program at 83rd semi-annual SMPTE convention April 21-25, Ambassador Hotel, Los Angeles, includes these papers: "Closed Circuit TV," by Boyce Nemece, management consultant; "Color and Black-&White Cinematography," Alan M. Gundelfinger, Technicolor Corp.; "Distribution of TV Programs on Film," Frank Ralston, ABC TV Center; "High-Speed & Instrumentation Photography," Robert M. Beatty, Lockheed missile div.; "Industry Milestones," John B. McCullough, Motion Picture Assn. of America; "Laboratory Practices," Vaughn Shaner, Eastman Kodak; "Motion Picture Studio Practices," Petro Vlahos, Motion Picture Research Council; "Sound Recording," James L. Pettus, RCA; "TV Recordings," Ralph E. Lovell, NBC; "TV Studio Practices," Jack Kennedy, NBC; "World-Wide TV," Ellis W. D'Arcy, consulting engineer.

Compatible single-sideband radio transmission is being tested by ABC's WABC—second N. Y. outlet to experiment with the new technique, first having been WMGM (Vol. 13:12). System eliminates one sideband (saving spectrum space), concentrating entire output on other sideband. Tests began Dec. 8, using CSSB on regular programs 6 p.m.-8 a.m. this week; next week tests will be carried 8 a.m.-6 p.m., with transmission hours alternating each week thereafter. Listeners have been invited to comment. Engineering v.p. Frank Marx said ABC expects CSSB to provide increase in effective signal equivalent to doubling power, improvement in fidelity, less fading in fringe areas.

Unique agreement with 3 networks has been signed by WJIM-TV, Lansing-Flint (Ch. 6), under which station "will accept orders from all networks on an equal basis" effective Jan. 1. Outlet will drop its "basic" affiliation with NBC and "basic optional" ABC & CBS tags. Currently, according to pres. Harold F. Gross, station is scheduling 58 hours weekly from NBC, 24 from CBS & 14 from ABC. "As of Dec. 1," he adds, "WJIM-TV had orders on hand for all NBC programs, 71% of all CBS programs and 87% of the ABC commercial schedule." Station originates 30 shows weekly at new Flint studio.

American Research Bureau has moved into new 2-story center at Beltsville, Md., consolidating depts. previously quartered in National Press Bldg., Washington, and College Park, Md.

DIMENSIONS OF THE ELECTRONICS INDUSTRY: Electronics' role in the economy was blocked out precisely and concisely this week when James D. Secrest, Electronic Industries Assn.'s perceptive and experienced exec. v.p., addressed U.S. Chamber of Commerce "Business Outlook Conference" in Washington. Highlights:

(1) Govt. is by far electronics industry's biggest customer -- percentage of factory dollar volume coming from Govt. rising from 20% to 50% from 1950 to 1957, while entertainment volume dropped from 58% to 21%.

(2) Total factory electronics sales should reach record \$7 billion this year vs. \$5.9 billion in 1956 -- with 8-10% increase in prospect for 1958.

(3) Military electronics jumped from \$2.7 billion in 1956 to an expected \$3.5 billion this year.

(4) Industrial electronics is \$1.3 billion this year, \$350,000,000 above 1956.

(5) TV sales slipped about 4% this year, production about 12% -- to about 6,500,000 units for both -- but "greater stability and balanced inventories improved the profit position of most companies" -- and industry expects to produce and sell about 7,000,000 or more sets in 1958.

(6) Radio and hi-fi have boomed -- radio production due to hit about 15,300,000 this year vs. 13,900,000 in 1956 (Vol. 13:49) -- with 500,000 more due in 1958.

(7) One of biggest potentials is industrial electronics. "Already, it is running a close second to home entertainment and may well surpass it next year."

(8) Component sales this year will be about \$900,000,000, up \$50,000,000; transistor sales of 27,000,000 will be more than double 1956's.

(9) A strong comer: Closed-circuit TV -- especially for school & industry.

NOV. SALES TURN UP, INVENTORIES DOWN: Year's downward trend in retail TV unit sales broke to upward side in Nov., preliminary estimates indicating 613,000 units sold, including exports, compared with 572,000 in Nov. 1956. It was first month since July and only 4th in year (others, Jan. & May) that retail sales bettered comparative 1956 months. If Dec. sales match the 960,000 of last Dec., retail sales for full year should reach about 6,500,000 vs. 1956's 6,800,000. However, Dun & Bradstreet Inc. reports 1-5% drop in retail business week ended Dec. 11, compared with last year, blaming sloppy weather and transportation strikes -- heaviest impact on furniture, housewares, major appliances.

End-of-Nov. inventories totaling 2,500,000 at all levels -- factory, distributor, retail -- also are regarded as favorable and compare with 2,800,000 at same time last year. Particularly noteworthy is fact inventories have remained virtually constant since end of Sept., whereas in same 1956 period they increased 200,000.

Inventory shows how carefully set makers are watching the production-factory sales-retail sales cycle. Nov. production was 562,000 vs. 680,000 in Nov. 1956; factory sales were 580,000 vs. 631,000.

Note: We've remarked before on the curious parallel between passenger auto and TV receiver production figures. Ward's Automotive Reports estimates 6,158,000 cars being built this year (aside from 1,000,000-plus trucks). In 49 weeks thus far reported by EIA, TV production totaled 6,047,000 (see p. 11); last 3 weeks of year are not usually heavy -- so parallel seems to hold again, for whatever it may betoken.

Magnavox Mending Fences: "Magnavox is looking for dealers in metropolitan areas where we don't have adequate distribution." That's the explanation given by merchandising director George Fezell when we asked if this week's controversial addition of dealers in Philadelphia showed break in company's tight franchising policy.

Key cities have to produce higher percent of market in order to balance Magnavox's (1600 dealers) lack of representation in most of nation's 3000 counties, he said. "Our Philadelphia figure was too low." He added that increasing franchises to 17 this week from start of 9 in first quarter won't interfere with business of present accounts -- 17 dealers being less than half number Magnavox marketing might require.

Does local "character" of some of the added dealers disturb Magnavox? "No, our franchise has teeth in it. All dealers have signed it," he said, adding that agreements signed also protect price against excessive trade-in allowance tactic often used by discounter to disguise price cutting. "Some of our biggest accounts are discounters," he added, "but they value our franchise; they don't cut Magnavox."

Production: TV output was 109,339 week ended Dec. 6 vs. 123,844 the preceding week & 151,993 in 1956. Year's 49th week brought production to about 6,047,000 vs. 7,010,837 last year. Radio production was 387,597 (121,784 auto) in Dec. 6 week vs. 357,881 (109,372 auto) the preceding week & 374,826 (164,907 auto) in 1956. Through 49th week, radio set output totaled about 14,379,000 (5,156,000 auto) vs. 12,952,675 (4,553,194 auto) through 49 weeks of 1956.

\$3,000,000 Hallicrafters Deal: Hallicrafters principals would neither confirm nor deny widely published reports this week that sustain advance indications (Vol. 13:49) that company will shortly revert to control of pres. Wm. J. Halligan and family—but fact is announcement came from Penn-Texas Corp., of which Hallicrafters became a subsidiary in Feb. 1956 (Vol. 11:51). At Hallicrafters it was stated announcement was premature because some contingencies remain to be resolved.

Penn-Texas stated \$3,000,000 cash was being paid to spin off the pioneer TV-radio-communications equipment manufacturer; whether the Halligans will be sole owners, or will once again offer their stock publicly, could not be ascertained. First National Bank, Chicago, is Hallicrafters' banker.

It's definite that Hallicrafters is going to halt TV-radio output at end of Jan., but it will continue to make the amateur equipment which first made it famous along with police, railroad and other mobile radio apparatus. Firm also has substantial govt. contracts still in force, and is making the Lowrey electronic organ under contract. Its gross sales will run about \$23,000,000 this year, whereas in its 1955 & 1954 fiscal years, when TV sales under own brand name were substantial, it did around \$30,000,000 (Vol. 11:47). It went under the Penn-Texas wing in an exchange-of-stock deal.

Firm is currently completing contracts to manufacture some of Western Auto's private-label TV's, radios and auto radios (*Tructone*); Gamble-Skogmo's TV (*Coronado*); Montgomery Ward's radios (*Airline*). Founder and head of firm, the widely known and popular "Bill" Halligan, ex-West Pointer, is understood to be slated for chairman of the board, his sons for other key posts much the same as they now hold: Wm. J. Jr., 33, sales & exec. v.p.; Robert F., 32, now v.p., probably new pres.; John R., 30, now treas. & asst. secy., new secy.-treas. Firm has 2 big plants in southwest Chicago.

Record GE sales & earnings for 1957 are seen by pres. Ralph J. Cordiner, who says there's every indication they'll top 1956's earnings of \$214,000,000 on sales of \$4.09 billion. He sees a tapering off in first half of 1958 for both electrical equipment industry and economy generally, with upturn in second half.

Census Bureau reports \$3.258 billion sales of electrical appliances, TV, radio sets, electronic parts by distributors in first 10 months of 1957 vs. \$3.253 in 1956 period.

TV Styling to Come: Further evidence of styling trends in coming TV lines (Vol 13:48) came with introduction of mid-season, pre-market filler models into current 1958 lines by 4 TV set manufacturers this week. Philco accented out-front sound in 3-model drop-in line featuring table model with tapered sides and "jeweled look." Sales mgr. Gib Kennedy told us front is 2-in. wider than finished back, trimmings are gold metal parts on grey background; controls are recessed into top of set, lighted from underneath.

Sylvania extended the styling shown in June by introducing "convertible" basic portable which intergrates into conventional and period table, lowboy, console furniture. In ensemble, portable's speaker hooked into set's audio system by extension cord, is "front-mounted on furniture piece"; when receiver is portable, speaker is removed from console and placed in portable's own special compartment. Prices range from \$230 to \$380; 3 new 17-in. portables are \$150 to \$180.

Motorola pushed for hi-fi sound, showing distributors 4 new models—table, console, 2 consoles—and tubeless 8-transistor car radio. Table model TV uses short-neck 90-degree tube, has two 5¼-in. speakers in cabinet, 3rd speaker in matching base—carries open list price. Console at \$300 has 12-in. woofer & two 4-in. tweeters; 2nd (period styled) console at \$400 has twin 8-in. speakers. Console, \$230 carry-over of fall special, has pair of 4-in. speakers and 8-in. in base.

Zenith showed 21 sets to distributors. Among 8 portables are 4 with indoor antenna completely contained within cabinet, operated by dial. New 14-in. is included. One new 17-in. is beamed specifically at hospital market, equipped with remote control, high eastered table, ear-phones, pillow speaker.

Philco's foreign operating company (Philco Corp. S. A., Fribourg, Switzerland) has concluded agreements with James N. Kirby Mfg. Pty. Ltd., Camperdown, N. S. W., Australia, for manufacture & distribution of all Philco consumer products there—in addition to Crosley & Bendix products Kirby will continue to make.

Trav-Ler, switching to distribution totally through independents, drops factory branches in Portland, Ore., San Francisco, Minneapolis, Milwaukee, Cleveland & Boston, has converted branch mgrs. to regional mgrs. who will franchise distributors.

Trade Personals: Harry M. Kane promoted to gen. mgr. of Whirlpool laundry appliance div. . . . Roy Raymond named N. Y. district mgr. for Stromberg-Carlson commercial sound products . . . R. T. Silberman named pres. of Cohu Electronics Kin Tel div.; Thomas M. Hamilton named administrative v.p. of Millivac div. . . . Donald R. Kingdon named district sales mgr. for GE receiving tubes, hi-fi and other components for part of Los Angeles, all of San Diego & Ariz. . . . Robert G. Stuart promoted to gen. sales mgr. of Zenith hearing aid div. . . . Henry F. Frailey named operations mgr. for special purpose & power tubes, Westinghouse electronic tube div. . . . Robert R. Williams promoted to supervisor of renewal sales service, Sylvania radio tube div. . . . Robert E. Silver named eastern states sales & distribution v.p. for Sterling Hi-Fidelity Inc., importer of German Nordmende-Sterling . . . Walter Fleck promoted to mgr. of all operations of Bath, N. Y. plant of Westinghouse electronic tube div.; he was recently named mfg. mgr. . . . Jack Adams promoted to editor of *Mart*.

Distributor franchises were shifting again in Philadelphia this week—3rd major shuffle in 5 years. This one was occasioned by departure of Stuart Louchheim from appliance distribution business Dec. 31 after 45 years. Louchheim has been a Zenith distributor for 20 years, currently has Kelvinator and York in white lines. Zenith has gone to giant Peirce-Phelps which drops Admiral TV and white goods. Admiral says it will set up a branch Jan. 1. Zenith simply acknowledged that switch was effective immediately and included TV, radio & hi-fi. This leaves Peirce-Phelps without refrigerator & range line to

German Exports: Oft-discussed impact of Germany on the U. S. market was somewhat watered this week by arrival of West German total electronic export figures from Zentralverband der Elektrotechnischen Industrie (trade assn.). Breaking electronic exports to U. S. into 4 groups, ZVEI charts show total for 1956 to be \$14,424,000, up from \$6,000,000 in 1955, as follows: Radio & TV transmitting & receiving equipment, \$9,734,000 vs. \$4,205,000; tubes, \$614,000 vs. \$153,000; microphones & loudspeakers, \$302,000 vs. \$107,000; other sound recording & reproducing equipment including parts, \$3,774,000 vs. \$1,601,000. (No estimates given for 1957.)

ZVEI says West Germany is leader in world radio export, followed by U. S., U. K., Netherlands & Japan—its total radio export in 1956 being 1,559,000 sets vs. 1,290,000 in 1955 and mere 53,000 in 1950. Germany exports radios to 130 markets, but half of them to Europe.

As TV exporter, Germany is small. Total German TV production in 1956 was 594,500 sets, 10% exported; 1957 total is estimated at 750,000, with 20% export. However, 97% of all export TV goes into Europe's own markets. Several German firms are making TV sets which receive more than one system: the 625-line and 525-line combination and the 819-, 405-, 625-line combination.

Hi-fi isn't included in ZVEI's figures. However, in recent trip here, Werner Meyer, v.p. & gen. mgr. of Blaupunkt and pres. of West German Export Assn., said Germany will ship to U. S. about 200,000 radios and radio-phonograph combinations this year and probably never will ship more than 250,000 in any year. He said that U. S. takes 6% of German radio exports; that 70% are consoles, 30% table models—significant change from last year's 50-50.

Penetration of American manufacturers into hi-fi has hurt German sales in U. S., according to Meyer. But to

fill in around its Easy laundry appliances. It also left, at week end, Kelvinator and York without distributors. Pres. Stuart Louchheim told us that he's leaving appliance distribution to concentrate on manufacture of nuclear electronic instruments of his Nuclear Electronics Corp. He declined to give reasons for quitting appliances but said that his new interest is "a far more profitable business and we have several million dollars in back orders."

Edgar A. Brown Inc., Cleveland distributor, names Elliott Godin, ex-Trav-Ler, sales mgr. of TV, radio, hi-fi & electric housewares, replacing Herbert Walker, resigned.

Main Line Cleveland, RCA distributor, elects James J. Shipley v.p.

Obituary

Henry J. Hoffman, 55, Machlett Laboratories sales v.p., died Dec. 10 at Stamford (Conn.) Hospital. He was an EIA director and v.p. of technical products div., director of Joint Electron Tube Engineering Council and member of NEMA and National Defense Electrical Reserve. A graduate of Cooper Institute of Technology, he worked for GE and Westinghouse before joining Machlett in 1944. Survivors are widow, 2 sons.

Basil M. Goldsmith, 49, material control mgr., DuMont industrial tube div., died Dec. 6 at Clifton, N. J. plant. Holder of degrees from Furman U and Cornell U, he was a pioneer in TV and electronics, helped build first DuMont TV set in 1938. Survivors are widow, 2 sons, 2 daughters and brother Dr. Thomas T. Goldsmith Jr., DuMont research & engineering v.p.

Leonard Ashbach, pres. of Majestic International, importer of Grundig line of radio & hi-fi (he takes 60% of Grundig production) such is not the case. He attributes an admitted 25% Oct. decrease in Grundig's eastern U. S. business to lack of dealer salesmanship.

Service Spotlighted: Service, an exceptionally popular subject since *Time's* recent blast at servicemen (Vol. 13:41), was discussed in 3 areas this week:

(1) National Appliance Radio-TV Dealers Assn. said it would run a 3-day week-end \$75 service course during its Jan. Chicago convention. Surveying members for curriculum suggestions, program chairman Frank Pieratt (Pieratt's, Lexington, Ky.) found 98% want stress on human relations in servicing; 82%, responsibilities of service mgrs.; 80%, compensation of servicemen; 76%, business forms; 72%, finding personnel; 65%, merchandising of service depts.; 52%, budgeting; 76%, service charges.

(2) In St. Louis talk, Russell Hansen, RCA Service Co. coordinator, said that dealers don't charge enough for service; that gross profit should be at least 20%; that gross business should be 2½-times payroll expense.

(3) Philco, backing a national service policy which puts all in-warranty service through franchised independent contractors, closed its last 8 Philco Service Co. branches—completing plans introduced at its summer convention.

Akkord brand of German radio has been added by N. Pickens Import Co., N. Y. which currently handles Blaupunkt German hi-fi. Akkord unit is AM-FM radio with battery & recharger, lists at \$149.

Retail sales of radio-household appliance stores totalled \$342,000,000 in Oct., compared with \$363,000,000 in Oct. 1956, reports U. S. Commerce Dept.; 10-mo. sales were \$3.188 billion vs. \$3.248 in 1956 period.

Financial Notes: Officers-&directors stock transactions for Nov. as reported to SEC: Allied Artists—G. Ralph Branton bought 7000, held 48,625 personally, 220 for wife; Samuel Broidy bought 400, holds 70,118; George D. Burrows bought 300, holds 33,686; Maurice Goldstein bought 4000, holds 12,100; Edward Morey bought 2700, holds 10,350. American Bosch Arma—Wm. S. Wasserman sold 2000 through holding company, holds 8000 in holding company, 4569 in trusts, 12 personally. AB-PT—E. Chester Gersten sold 400, holds 100; Leonard H. Goldenson sold 4000, holds 50,000. American Electronics—David Van Alstyne Jr. sold 900 through Van Alstyne Noel & Co., holds 7150 in Van Alstyne Noel, none personally. Audio Devices—Joseph K. McCammon sold 200, holds 25,263. Avco—K. R. Wilson Jr. bought 500, holds 1600. C&C TV—Matthew Fox bought 64,700, sold 29,600 by pledges, holds 610,300 as collateral against loans; Walter S. Mack sold 1700, holds 204,571; Arnold C. Stream sold 2800, holds 1000. Columbia Pictures—Harry Cohn bought 1000, holds 189,699. Consolidated Electrodynamics—Franklin H. Donnell sold 400, holds 11,600. Consolidated Electronics—Robert G. Dettmer bought 200, holds 500; Arie Vernes bought 250, holds 250. Corning Glass—C. D. LaFollette exercised option to buy 2000, holds 14,800; Thomas Waaland exercised option to buy 1000, holds 2500. DuMont Labs—Frederick H. Guterman bought 300, holds 300; Donovan H. Tyson bought 600, holds 1000. Electronic Communications—Hal A. Kroeger sold 200, holds 350. Emerson Radio—Max Abrams bought 1500 personally, 1400 for trusts, 700 for foundations; holds 88,609 personally, 11,155 in trusts, 64,501 in foundations. General Dynamics—Lisle W. Adkins sold 500, holds 2000; Earl D. Johnson sold 7000, holds 5000; Kenneth Stiles sold 700, holds 1600. GE—H. S. Morgan bought 500, holds 9000; Harold E. Strang bought 1350, holds 7922. General Precision Equipment—George T. Link sold 2000, holds 7372.

General Tire & Rubber—F. W. Knowlton bought 200, holds 2042. Guild Film—Harry A. McDonald bought 300, holds 700; David Van Alstyne Jr. sold 2000 through Van Alstyne Noel & Co., holds 7833 in Van Alstyne Noel, 13,507 personally. IBM—Jeannette K. Watson sold 2000, holds 24,733. International Resistance—Walter H. Powell bought 100, holds 100. Lear—A. G. Handschumacher sold 1600, holds 94. Loew's—Bennett Cerf bought 100, holds 300. Minneapolis-Honeywell—John J. Wilson bought 2600, holds 62,470. Minn. Mining & Mfg.—Joseph C. Duke bought 1500, holds 39,453; Irwin R. Hansen sold 100, holds 400 personally, 120 in joint account. National Telefilm Assoc.—Robert Westheimer bought 200, holds 200. National Theatres—B. Gerald Cantor bought 19,000, holds 69,000; Willard W. Keith sold 2500, holds 2500. Philco—Charles S. Cheston bought 1500, holds 1803; Raymond B. George bought 800, holds 600; Wm. Fulton Kurtz bought 300, holds 815. RCA—Andre Meyer bought 900, holds 10,000. Raytheon—D. R. Hull sold 500, holds 1000. Siegler—A. Charles Schwartz bought 1250 through Bache & Co., holds 8750 in Bache, none personally. Sylvania—Lawrence A. Appley bought 100, holds 300. Texas Instruments—W. D. Coursey bought 500, holds 5720; S. T. Harris bought 300, holds 17,904; R. W. Olson sold 255, holds 13,700. Traveler Radio—Joe Friedman bought 1300, holds 208,633. Tung-Sol—Anthony Scala bought 1000, holds 1000 personally, 1000 in joint account. 20th Century-Fox—Joseph H. Moskowitz bought 200, holds 400. Walt Disney Productions—Lawrence E. Tryon bought 160 personally, 20 as custodian; holds 160 personally, 20 as custodian; E. Cardon Walker bought 200, holds 400. Webcor—Harry R. Ferris bought 1000, holds 2200. Whirlpool—Charles M. Odorizzi bought 500, holds 1100. Zenith—E. F. McDonald bought 2200 through Seneca Securities Corp., holds 37,031 in Seneca, 10,462 personally.

Indiana Steel Products Co., biggest domestic producer of permanent magnets and also heavily in radar and defense products, in adding 5¢ to regular quarterly 30¢ dividend this week, reports net income after taxes of \$688,553 (\$2.35 per share) for 10 months ended Oct. 31, bringing book value to \$14.82 from \$13.40 same date last year. Reports pres. Paul F. Smith: "Our general business continues good and though incoming orders are slightly slower than the record pace of the third quarter, our sales for 1957 will top all previous records. Consolidated earnings are also expected to be at an all-time high." Last sales report, for 9 months of 1957, was \$9,541,215, earnings \$2.03 per share. For all 1956, sales were \$11,329,592, earnings \$764,366 (\$2.61) vs. \$9,402,753 & \$766,542 (\$2.70) in 1955 (Vol. 13:11).

IT&T had consolidated net income of \$16,854,296 (\$2.35 per share) on sales of \$436,725,523 in 9 months ended Sept. 30 vs. \$19,827,146 (\$2.76) on \$344,118,913 in 1956 period. Pres. Edmond H. Leavey reported Sept. 30 orders on hand at \$467,000,000, compared with last year's \$478,000,000, noted income for current quarter is being hit by strike at Federal Telephone's Clifton, N. J. plant.

Dividends: Motorola, 37½¢ payable Jan. 15 to stockholders of record Dec. 31; Whirlpool, 35¢ Dec. 31 to holders Dec. 13; Belock Instrument, 1½% stock Jan. 17 to holders Dec. 17; IT&T, 45¢ Jan. 15 to holders Dec. 20.

United Artists earned \$2,363,000 on gross film sales of \$52,553,000 in 9 months ended Sept. 30 vs. \$2,256,000 on sales of \$46,777,000 in 1956 period.

Herold Radio & Electronics Corp. common stock was admitted to trading on American Stock Exchange this week.

ELECTRONICS PERSONALS: James F. Toole elected Sperry Rand treas., Charles Ondrick controller . . . Homer L. Marrs promoted to v.p. & operations mgr. of Motorola Communications and Electronics Inc.; Harold A. Jones succeeds him as v.p. and midwestern areas sales mgr. . . . Harvey G. Melhouse elected v.p. of Western Electric, replacing A. Pope Lancaster who becomes v.p. of another manufacturing area with headquarters in Chicago; W. Clare Brooks succeeds Melhouse as mgr. of Merrimack Valley works; J. Harold Moore replaces Brooks as personnel director . . . Col. James W. Anderson Jr. (USAF ret.) appointed special asst. to Magnavox chairman Richard A. O'Connor . . . Walter W. Finke elected v.p. of Minneapolis-Honeywell, continues as pres. of Datamatic div. . . . H. Steven Berck, ex-GE, named mgr. of distributor & export sales, Motorola semiconductor div., Phoenix . . . W. R. Entrikin, ex-Martin Co., named sales mgr. of Elgin National Watch electronics div. . . . Michael J. James promoted to asst. mgr. of purchasing, Philco govt. & industrial div., succeeding John R. McAllister, recently named purchasing mgr. . . . David M. Rush, ex-GE, appointed head of production control dept. of Raytheon missile systems div. plant, succeeding Nelson Johnson, transferred to unspecified post . . . Samuel B. Fishbein promoted to new post of asst. gen. sales mgr., DuMont military operations dept. . . . Clark A. Crawford promoted to Corning Glass asst. coordinator for Pyroceram.

Radars display which can present signals from as far as 4000 mi. has been developed by DuMont under sub-contract with MIT's Lincoln Labs.

Network Television Billings

October 1957 and January-October 1957

(For Sept. report see *Television Digest*, Vol. 13:45)

FIRST FULL MONTH of 1957-58 TV season, Oct. saw network TV billings 8.2% ahead of Oct. 1956 and 17% ahead of preceding month (Vol. 13:45), according to Publishers Information Bureau. For first 9 months of 1957, total billings were 4.8% higher than corresponding 1956 period. Oct. billings this year were \$49,201,406, CBS again leading with \$22,335,986 (up 9.2% from Oct. 1956)—though ABC, with \$8,093,724, showed greatest percentage increase over Oct. 1956 (17.7%). Cumulative total billings for Jan.-Oct. 1957 were \$418,394,205. The complete PIB report for Oct.:

NETWORK TELEVISION

	Oct. 1957	Oct. 1956	% Change	Jan.-Oct. 1957	Jan.-Oct. 1956	% Change
CBS	\$22,335,986	\$20,446,755	+ 9.2	\$195,811,480	\$183,258,519	+6.8
NBC	18,771,696	18,142,005	+ 3.5	156,206,019	152,661,346	+2.3
ABC	8,093,724	6,878,183	+17.7	66,376,706	63,407,570	+4.7
Total	\$49,201,406	\$45,466,943	+ 8.2	\$418,394,205	\$399,327,435	+4.8

1957 NETWORK TELEVISION BY MONTHS

	ABC	CBS	NBC	Total
Jan.	\$ 6,715,581	\$ 20,231,474	\$ 16,554,941	\$ 43,501,996
Feb.	6,175,488	18,309,088	14,900,631	39,385,207

Total	\$66,376,706	\$195,811,480	\$156,206,019	\$418,394,205

* Revised as of Dec. 10, 1957.

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 25%. However, they're generally accepted in the trade as an index.

NARTB on Pay TV and Canon 35: "Distribution" and "accessibility" of information are the vital issues involved in pay TV and American Bar Assn.'s Canon 35, respectively, according to NARTB pres. Harold E. Fellows. Addressing Federal Communications Bar Assn. meeting in Washington this week, he stated that pay TV would inhibit "total circulation of total information . . . If for no other reason, I find this sufficient cause to take issue with the proponents of pay TV." Of Canon 35's prohibitions against use of cameras & microphones in courts, he asserted. "We believe that Canon 35 infringes upon the public's right to know and, in this 20th century to be informed through the up-to-date means of electronic journalism." He said broadcasters don't want to take authority away from judges in administration of courts but do want to eliminate Canon 35's restrictions because they've "obtained regulatory force in numerous jurisdictions."

ABC-TV adds KSHO-TV, Las Vegas (Ch. 13) as primary affiliate effective Dec. 15.

Matty Fox's British Toll Deal: International pay-TV agreement was signed this week by Skiatron International TV Corp. with Rediffusion Ltd., big British wired TV-radio firm which also is part owner of commercial TV programmer Associated-Rediffusion.

The 21-year pact, announced by Skiatron TV pres. Matty Fox, calls for Rediffusion to survey, install & supervise closed-circuit systems for Skiatron anywhere in the U. S. or abroad. As part of deal, Skiatron International acquires 50% interest in Rediffusion Inc., Canadian subsidiary of British company.

In programming step at same time, Fox signed up impresario Sol Hurok to direct all "cultural" entertainment in Skiatron subscription TV operations which Fox said he hoped to start in Los Angeles & San Francisco by end of April, depending on authorizations by local authorities. Fox also indicated he'd file franchise application for N. Y. within 2 months.

In other developments on pay-as-you-see TV fronts:

(1) Metropolitan Phoenix Broadcasters Assn., headed by pres. & gen. mgr. Tom Chauncey of KOOL-TV, mobilized opposition to toll-TV franchise issued by Ariz. Corporation Commission to Direct Wire Service Inc. as public utility in Maricopa County. Court test of state body's right to grant license to entertainment enterprise was threatened.

(2) Movie exhibitors' Joint Committee on Toll TV (Vol. 13:47) started national campaign against pay TV, asking all movie exhibition groups to urge Congress to ban all forms of subscription TV.

(3) Writers Guild of America, West, asked major film studios for flat 10% of gross from pay-TV showings of all theatrical pictures produced prior to Sept. 2, 1957, with sliding scale for later pictures.

First remote taped commercials were recorded this week by CBS-TV for use on live Dec. 19 *Climax!* show. Production crew fed pictures to CBS mobile unit at Santa's Village in San Bernardino mountains, and commercial was taped at Hollywood TV City from microwave relay. Entire 60-min. *Climax!* Dec. 26 drama will be taped Dec. 22, to avoid necessity of Christmas Day dress rehearsal.

Need for outer-space law will be discussed by gen. counsel Andrew G. Haley of American Rocket Society on Dave Garroway's *Today* on NBC-TV Dec. 17. The Washington communications attorney proposes UN take steps to avert international conflicts in interplanetary claims.

Bound and Indexed

We will index and bind, between embossed hard book covers, a limited quantity of all 1957 issues of the *Television Digest* Weekly Newsletters, plus the semi-annual TV Factbooks with all Addenda, plus all Supplements and Special Reports. This volume will provide a handy and handsome permanent reference for your own or your company library. Orders will be taken until Dec. 30. Price: \$25 per volume.

MARTIN CODEL, Editor and Publisher; ALBERT WARREN, Senior Editor; ROBERT CADEL, Business Manager; DAVID LACHENBRUCH, JAMES S. CANNON, JAMES J. CASSIDY, Associate Editors
Editorial Associates: Paul Stone, William J. McMahon Jr., Wilbur H. Baldinger

Published every Saturday, with TV Factbook Numbers (53rd and 54th issues) issued in February and August and AM-FM Directory (55th issue) published in January, by Radio News Bureau, Wyatt Bldg., Washington 5, D. C. Sterling 3-1755.

SUMMARY-INDEX OF THE WEEK'S NEWS — December 21, 1957

CBS BUYS WCAU-TV & WCAU, Philadelphia, in \$20,000,000 deal embracing \$4,400,000 for plant and 10-acre land tract in boom area (p. 1).

UHF TAX RELIEF hopes virtually dead as increased defense spending, psychological factors rule out even token tax cuts (p. 2).

WIRED PAY-TV franchises granted by Los Angeles; referendum on issue threatened. VIT denies Bartlesville telemovie "disappointment" (p. 2).

TV-ACTIVE CONGRESS session probable, with Committees planning to survey FCC performance, fee TV, networks, ASCAP-BMI, allocations (p. 3).

AMARILLO GETS 3RD VHF as KVII begins; Ann Arbor uhf WPAG-TV leaving air after losses since 1953. Notes on upcoming stations (p. 7).

UNITED ARTISTS' purchase of control of AAP for \$8,400,000 challenged by NTA which claims to be prior buyer; courts will decide (p. 9).

VHF TRANSLATORS & BOOSTERS, limited to ¼ watt, proposed by Ben Adler in FCC rule-making (p. 8).

INSTANT RATING SERVICE orders are heavy, ARB says. Automatic N.Y. rating tallies to cost subscribers \$850-\$2700 monthly starting Jan. 1 (p. 16).

Manufacturing-Distribution

PHONO BUSINESS 1957: Industry producing 5,000,000 units in year; boom in high end to continue next year, adding another \$100,000,000 at retail (p. 11).

PRODUCT DIVERSIFICATION is set makers' aim, Admiral making disposable hypodermic device; Packard-Bell reports on unique new products (pp. 12 & 13).

REBUILT TUBES account for nearly 25% of 10,900,000 picture tubes sold in first 10 months; receiving tube sales hold at about same level as 1956 (p. 12).

WESTINGHOUSE ADVANCES CRESAP to pres., Hodnette to exec. v.p., Huggins to head exec. committee. Looks to \$2 billion year (p. 14).

\$20,000,000 FOR PHILADELPHIA OUTLETS: CBS diversifies its expanding holdings to include a booming real estate tract as well as Philadelphia stations WCAU-TV (Ch. 10), WCAU (1210 kc, 50 kw) and WCAU-FM (98.1 mc) in \$20,000,000 cash purchase deal made with Philadelphia Bulletin Dec. 20. It's the biggest transaction yet involving a single TV-radio entity, with valuation of \$12,600,000 placed on TV, \$3,000,000 on radio, \$4,400,000 on physical plant with 10-acre tract situated in now booming business area at City Line & Monument Ave.

Purchase gives CBS its full allowable complement of 5 vhf's, 2 uhf's, 7 AMs—though recent FCC-approved \$4,000,000 deal for purchase of KWK-TV, St. Louis (Ch. 4), in which \$1,500,000 valuation was included for studio & real estate, is still at loose ends because of protest now before courts (Vol. 13:36 et seq). Bulletin pulls out of TV-radio, is expected to dispose of its 75% interest in WDAU-TV, Scranton (Ch. 22), acquired last year (Vol. 12:31, 42).

WCAU Inc. pres. & gen. mgr. Donald W. Thornburgh and staff will remain for CBS, though he's due for retirement in about 2 years. He is an ex-CBS executive of 18 years service—last post having been Pacific Coast v.p.—who quit to head Bulletin stations about 8½ years ago. Bulletin founded WCAU-TV in 1948 after having bought out radio WCAU, along with Philadelphia Record, from J. David Stern for \$10,500,000 in 1947 and closing down the paper. (It's interesting to note that Philadelphia Inquirer interests, now owning WFIL-TV & WFIL in that city plus 4 TVs, 4 radios and 50% of another radio in other cities only last week bought up tabloid Philadelphia Daily News which it is continuing to publish with exception of Sunday edition; see Vol. 13:50.)

Biggest previous deal in TV-radio history was Bitner's package sale of 3 TVs & 3 AMs to Time Inc. for \$15,750,000 (Vol. 12:47,50-52; 13:11,16). Storer paid \$10,000,000 to buy Herbert Mayer's Cleveland vhf and Portland uhf along with an electronics plant (Vol. 10:2, 44). Westinghouse paid then-record \$9,750,000 cash for DuMont's pioneer Pittsburgh station, now KDKA-TV (Vol. 10:49-50), after having paid \$8,500,000 cash for Philco's WPTZ, Philadelphia, now WRCV-TV (Vol. 9:8, 22), which along with radio KYW was later swapped for NBC's Cleveland stations and \$3,000,000 (Vol. 11:21 & 12:3).

[For complete listings of all TV sales and transfers up to last Aug., see pp. 296-301, TV Factbook No. 25. For list of CBS stations, see p. 42.]

UHF SET TAX RELIEF HOPES VANISHING: Sputnik, Muttnik and the Treasury Dept. appear to have killed all hope for aid to uhf via exemption of all-channel sets from manufacturers' 10% excise tax, despite excellent industry job of acquainting Congressmen with issue and principle involved.

House Ways & Means excise tax subcommittee discussed industry proposal this week—but members and staff were put under heavy secrecy wraps by Chairman Forand (D-R. I.). However, one senior subcommittee member told us that no decision had been reached on any excise tax changes, that all recommendations had been deferred until Jan.

One of most active supporters of uhf tax exemption on Ways & Means Committee—though not a member of excise subcommittee—is Rep. Boggs (D-La.). We asked him this week to appraise chances of measure in view of recent developments. His answer was simple, to the point, and in one word: "Zero."

Two other revelations this week cast further doubt on any remaining chances of action on tax changes which involve cuts in revenues to Govt.: (1) Publication in copyright Washington Post story of account of top-secret Gaither Report on U. S. defenses, portraying U. S. as in gravest danger in history and hinting that tax increases should be explored. (2) Defense Secy. McElroy's disclosure that Administration will ask Congress for an extra \$1 billion for defense in current fiscal year.

TV tax cut proposal has been consistently opposed by Treasury Dept., despite fact that Govt. stands to lose relatively small amount of revenue. Psychologically, it now seems certain that Congress will be in no mood to poke even a small hole in tax dike by making revenue-losing revisions.

Full Ways & Means Committee is scheduled to begin formal tax revision hearings Jan. 7, with testimony by top Administration officials. Gist of their pleas undoubtedly will be: Don't cut any taxes; instead, give consideration to methods of bringing in more revenue. Rep. Mills (D-Ark.)—who strongly opposes tax cuts now—is expected to succeed the late Rep. Cooper (D-Tenn.) as Committee chairman.

L. A. WIRED PAY TV OKAYED; BALLOT TEST DUE: When Los Angeles became first major city to approve closed-circuit toll-TV franchises this week, it also set stage for what may become first voter referendum on subscription TV.

By bare 8-6 majority, Los Angeles city council Dec. 18 ratified ordinances granting 21-year wired-TV franchises to Skiatron TV (Matty Fox) and to Fox West Coast Theatres-International Telemeter (Paramount) combination. By law, 8 members of the 15-member council constitute majority required to adopt ordinance.

Action came after bitter hearing at which Southern Cal. Theatre Owners Assn. put up last-ditch fight to delay vote until after Congress has had time to consider bills to outlaw pay TV. Theatre Owners' representative Julius F. Tuchler, in advance of vote, issued "ultimatum" (his own word) that, if franchises were granted, exhibitors would collect the more than 50,000 signatures needed to put issue on ballot.

If referendum petition, with required number of signatures, is filed, franchises would automatically be postponed until after public vote is held.

In Phoenix, Ariz., meanwhile, Maricopa County Board of Supervisors unanimously rejected wired TV application by Direct Wire Service Inc., after campaign against it led by Metropolitan Phoenix Broadcasters' Assn., headed by pres.-gen. mgr. Tom Chauncey of KOOL-TV.

Joint Committee on Toll TV, representing all national theatre-owning groups, began mobilizing

its local-level campaign aimed at anti-fee legislation. Funds will be supplied by theatres, which will be asked to pay \$7.50-\$75 annually, on basis of seating capacity.

AFL-CIO indicated that it would work actively against pay TV when its second constitutional convention reaffirmed anti-subscription position taken by the first one 2 years ago. Vote of the 130 unions was recorded as unanimous, although 2 AFL-CIO unions—Screen Actors Guild & Actors Equity—opposed resolution and have been campaigning for toll TV. These unions, however, are 2 of 5 banded together in Associated Actors & Artistes of America, which has one vote.

There was a flurry in Bartlesville, Okla. this week—after United Press carried story starting: "Is America's first telemovies experiment heading for the rocks?" and stating that "the danger sign was hoisted." It quoted Video Independent Theatres' Kenneth Blackledge to effect that results to date are disappointing, noted that local VIT mgr. Phil Hays had resigned this week.

"We're not at all disappointed," VIT v.p. C. O. Fulgham told us. He confirmed Hays' resignation, declined to give reasons. "The operation is going about according to plan," he said. "Some 150 homes had been attached at the beginning, without cost, to serve as monitors. We've lost a good many of them, but they've been more than replaced by paying subscribers. We now have total of 553—and our aim is about 1000 at the end of one year; we've been operating now on a payment basis for about 3 months. We have about 200 more applications waiting for service in areas not yet wired. These must wait until the phone company can reach them.

"We're now getting about \$5000 a month income from telemovies. Our theatres in town have lost attendance—but absolutely to no more degree than in other Okla. towns where we operate theatres. In short, we're getting a substantial new income that we would not have received otherwise."

That VIT is in telemovies to stay—until it has definite answers—is emphasized by fact it's known to be planning to apply for cable-movie franchises in at least 4 more towns—and by fact it plans to give a real try to per-program metering method of billing, possibly next spring; Jerrold is working on metering equipment.

CLOSER SCRUTINY OF TV BY CONGRESS: TV industry and the FCC are due to come under the Congressional microscope again after Congress reconvenes next month—and preliminary information indicates that some crucial aspects of TV business may get more thorough going-over than last session.

Subjects to be investigated include the same old chestnuts—but before the rush of Congressional business has begun, at least, lawmakers are promising to dig more deeply this time. Included in promised inquiries are all angles of network business, performance of FCC, subscription TV, ASCAP-BMI, overhaul of Communications Act, and—yes—allocations again.

At least 3 Committees will be watching FCC closely for follow-up of Barrow network study staff report, impatient for action. If Commission doesn't begin some concrete actions soon after Congress reconvenes, you can expect further investigations and introduction of bills to carry out some of the Barrow report's recommendations.

Commission spent 2 days this week in briefing session on Barrow report, meeting with ex-network study group chairman Roscoe Barrow and others responsible for staff report. Session took longer than expected, covered only about half of report's territory, so FCC has scheduled further briefing Jan. 6-7—which precludes any action on report before Congress meets.

Here's rundown on major contemplated Congressional TV activities:

Legislative oversight subcommittee—Headed by Rep. Moulder (D-Mo.), this House Commerce Committee group has been actively investigating independent regulatory agencies since last summer, FCC being one of prime subjects. Object of probe is to determine to what extent regulated industries dominate govt. agencies. Subcommittee has requested such a mass of data on personal activities of Commissioners, etc., that Commissioners met this week with Chairman Moulder in attempt to clarify

and narrow down material requested, and to reach understanding on object and scope of probe.

Subcommittee isn't due to meet until after Moulder returns from home district Jan. 4 or 5, has set no schedule for hearings. Best guess on timetable: SEC & CAB first, FCC next. Subcommittee counsel Bernard Schwartz has been running quiet shop, under heavy wraps voted by subcommittee, since his early tactics in agency fishing expedition (appeals for informers, etc.) brought violent protests from Rep. Heselton (R-Mass.) and other Republican members.

Senate Commerce Committee—Potentially most inflammatory item on agenda is bill by Sen. Smathers (D-Fla.) to divorce networks and stations from ownership of music publishing and phono record firms. This bill is virtually certain to get hearing, which will center around ASCAP-BMI controversy and will again send network presidents scurrying to Washington. Though there are indications that Smathers feels less strongly on issue since he met with broadcasters from his own state and elsewhere, he still wants thorough hearing—and Committee presumably will be ready, staff having conducted quiet investigation this summer & fall at request of Chairman Magnuson (D-Wash.).

Magnuson indicated this week that pay TV will again "receive serious attention from the Committee," which hopelessly split on the issue of a trial last session. Magnuson himself again went on record as favoring test.

Ghost of past allocation hearings will come up again when Magnuson unveils the now largely academic report of ad hoc engineering allocations study headed by Dr. Edward L. Bowles of MIT. Bowles' draft has been in circulation among committee members for months, but in its original form he reportedly could get no one to sign it except himself.

Committee expects to watch FCC progress on Barrow recommendations, and Magnuson predicted "further inquiry into TV [will] occupy a prominent place in the Committee's work."

House Commerce Committee—Top TV priority on this Committee will be the promised investigation of pay TV. Among other activities promised by Chairman Harris (D-Ark.) are (1) examination of Communications Act—particularly whether Congress should take over direct frequency allocations responsibility; (2) investigation of whether direct Congressional action is necessary on Barrow report.

Anti-trust subcommittee—Rep. Celler's subcommittee will continue its close scrutiny of FCC, particularly with regard to Barrow recommendations. But it's expected to turn an even sharper eye on Justice Dept. investigations in TV field. This subcommittee may call Justice Dept. officials to hearing to explain status of TV inquiries.

Note: Though FCC is still officially being "briefed" on Barrow report, effects of some of the recommendations are already being felt. It's understood that Commission has held up renewal of some TV station licenses on basis of suspicion that the outlets have used their power to block network affiliation of stations in nearby areas.

Seems like old times on network radio: CBS plans 2-hour radio spectacular May 4, sponsored by C. H. Masland & Sons (carpets) and said to have budget "in the TV category," costing more than any single radio show in 15 years or more. NBC announced return of Jerry Lewis to radio, with \$350,000 sale to Oldsmobile of ten 5-min. "Star Dust" segments weekly on *Monitor* and *Nightline*. Already sold are Fibber McGee & Molly and Bob & Ray "Star Dust" briefs; available are George Gobel and Ed Gardner. Twentieth Century-Fox has ordered saturation campaign of 100 parties, plugging new feature "The Enemy Below," Dec. 23-28 in 5 of ABN's live weekday shows.

TV traffic violation was charged by Hamilton, Ont. police against motorist this week for operating car equipped with receiving set—8½-in. screen in dashboard of convertible. It was first reported case of kind since prohibition against TV in cars was written into Ontario Highways Act in 1953.

In trouble again: For second time, *Mike Wallace Interview* has brought ABC-TV chief Oliver Treyz on air with public apology for guests' statements on show. Charge by Drew Pearson that Pulitzer Prize-winning *Profiles in Courage* by Sen. Kennedy (D-Mass.) was ghosted "is unfounded," Treyz told audience week after columnist appeared on program. Earlier Treyz apologized for accusations against Los Angeles police made by ex-gambler Mickey Cohen when he was questioned on show by Wallace (Vol. 13:45).

Paramount Pictures and color: (1) Paramount's KTLA, Los Angeles, is dropping colorcasts because of inability to attract sponsors willing to absorb extra cost, is reported planning to sell mobile unit custom built by late mgr. Klaus Landsberg. (2) Dec. 17 *Wall St. Journal* reports Paramount v.p. Paul Raibourn stating that Lawrence color tube, under development by DuMont (part-owned by Paramount), is "100% sound" and production is "imminent."

Personal Notes: Charles C. Cowley advanced to pres. of Muzak Corp., replacing Harry E. Houghton, who sold interest in company to Jack D. Wrather in Sept. (Vol. 13:38) . . . Charles Boasberg, gen. sales mgr. of Warner Bros., elected pres. of subsidiaries Warner Bros. Pictures Distributing Corp. and Warner Bros. Pictures Distribution Co. Ltd. . . . Robert W. Morris elected pres. of Broadcast Advertisers Reports, succeeding Phil Edwards, who retires as pres. but continues as exec. committee chairman & publisher . . . Roger L. Putnam, chairman of WWLP, Springfield, Mass., named Knight of Malta by Pope Pius XII . . . Miller C. Robertson, ex-WTCN-TV, Minneapolis, named station mgr. of upcoming KIRO-TV, Seattle . . . James A. Schulke, ex-James L. Saphier Agency, joins Paramount Pictures in TV development capacity . . . Edward E. Hewitt, ex-KGO-TV, San Francisco, United Film Service and ABC Spot Sales, named mgr. of CBS TV Film Sales San Francisco office . . . Otis H. Segler promoted from sales mgr. to station mgr. of WDEF-TV, Chattanooga, succeeding Harold (Hap) Anderson, now pres. of Founders Corp., which has 50% interest in KTVR, Denver, and in 4 AMS . . . E. J. Paxton Jr. named managing director of WPSD-TV, Paducah, Ky.; Sam Livingston moves from sales to gen. mgr.; Charles M. Neel becomes sales mgr. . . . Oliver C. B. Howard, regional sales director of WGR-TV, Buffalo, also named public relations director . . . Warren Marshall, from radio KGHL, will be sales mgr. of upcoming KGHL-TV, Billings, Mont. (Ch. 8), due next spring . . . Robert B. Cheyne, ex-Allied Appliance Co., Boston, joins WHDH-TV & WHDH there as sales promotion director . . . R. J. McNamara, ex-Peters, Griffin, Woodward, joins H-R Television as client services dir. . . . Paul Jones, ex-*Playboy*, joins Screen Gems as national sales executive . . . Norman Kennelly, ex-NBC, joins *American Weekly* as sales promotion supervisor . . . George Hankoff, Screen Gems account executive in Philadelphia-Baltimore-Washington area, shifts to national sales, N. Y., replaced by Marvin Fraum.

Mrs. E. C. Page, wife of the senior partner of Page Communications Engineers Inc., gave birth to a daughter Dec. 17. She's the former Virginia Erwin, was once FCC's first woman engineer, and it's their second daughter; he has 4 other daughters by previous marriage.

Advertising Agencies: Charles H. Brower elected BBDO pres. & exec. committee chairman, succeeding Bernard C. (Ben) Duffy, who becomes vice chm. . . . C. Terence Clyne promoted to a senior v.p. of McCann-Erickson to oversee worldwide TV-radio activities; George Haight succeeds him as v.p. in charge of home-office TV-radio . . . Charles Powers, from N. Y. office, named director of McCann-Erickson TV-radio commercial services dept., Los Angeles; Thomas Greenhow promoted to Los Angeles programming director . . . Harold J. Saz, business mgr. of Ted Bates TV-radio dept., and James A. Benham, account supervisor, promoted to v.p.'s . . . Mark Byrne, a Wm. Esty v.p., named media director . . . Kenneth E. Moore appointed marketing services v.p. of Fuller & Smith & Ross; Robert P. Clark, administration v.p. . . . Wm. R. Gillen, a BBDO v.p., named Chicago office mgr., succeeding J. H. Haupt, resigned for health reasons . . . Robert Brinkerhoff, a Young & Rubicam v.p., named head of Chicago office . . . E. Louis Figenwald named exec. v.p. of Lee-Stockman in charge of TV & radio . . . Julian L. Watkins, ex-Campbell-Ewald, Detroit, joins Leo Burnett, Chicago, as a v.p. and plans board member . . . R. A. Phelps named to new post of v.p. & marketing development director of Earle Ludgin . . . Wm. Pitts promoted to creative services v.p. of Ben Sackheim.

Recent changes among Washington communications law firms: Lyon, Wilner & Bergson adds David Reich, former special asst. to Attorney General, a specialist in Administrative Procedures Act; Roberts & McInnis adds Richard R. Paradise, 1955 NYU graduate recently with N. Y. firm of Hall, Haywood, Patterson & Taylor, and George W. Perry, from N. Y. firm of H. Howard Babcock; Wilkinson, Cragun & Barker advances Donald C. Gormley to partner, Carl S. Hawkins withdrawing from firm; Rhyne, Mullin, Connor & Rhyne adds 1957 Duke U graduate Charles A. Dukes Jr. and 1957 Georgetown U graduate Edward F. Kearney; Miller & Schroeder adds 1955 Harvard U graduate John P. Bankson Jr.; Weaver & Glassie adds 1957 U of Va. graduate Edwin C. Majer.

Jack Van Volkenburg, ex-CBS-TV pres., heads new applicant (one of 5) competing for Ch. 10, Tampa-St. Petersburg. Group includes, along with local businessmen: John S. Houseknecht, Screen Gems account executive; Fred Waring, orchestra leader; Harry W. Bennett Jr., Joseph Katz Agency exec. v.p.; Hal James, TV-radio v.p. of Doherty, Clifford, Steers & Shenfield; Frederick C. Hutchinson, mgr. of St. Louis Cardinals. [For full details, see *TV Addenda 25-U* herewith.]

New TV-radio brokerage firm of Robert Carpenter Enterprises Inc. is formed at 527 Madison Ave., N. Y., by Robert W. Carpenter, ex-MBS station relations v.p.

Video Film Inc., Hollywood film producer & distributor, names Betty Luster Assoc. as eastern sales representative.

Obituary

Ann Gillis, 44, who began in radio as a secretary and publicity & news aide at the old WJSV, Washington (now WTOP), and who assisted ex-CBS v.p. Harry C. Butcher in staging President Roosevelt's "fireside chats," died of leukemia Dec. 16 in New York. Recently an NBC producer, she handled Queen Elizabeth's visit in Oct., worked on such shows as *Comment, On the Line, Tonight, Who Said That?* and was preparing a news program for children at time of her death. Surviving are husband, *N. Y. Mirror* columnist Bill Slocum, and their 12-year-old daughter. Earlier marriage to CBS newsman Wells Church ended in divorce.

Buick Bumps Kudner: In crash which reverberated all along Madison Ave. this week, Buick div. of GM dropped its \$24,000,000 advertising account with Kudner Agency Inc. after 22 years. Including big current TV shows (NBC's *Wells Fargo*, ABC's *Patrice Munsel Show*) and such other-season favorites as Jackie Gleason & Milton Berle, Buick's account had represented more than third of Kudner business. Only comparable Madison Ave. noise was heard 2 years ago when Coca-Cola shifted its \$15,000,000 annual business from D'Arcy to McCann-Erickson. Unanswered question at week's end was where Buick is going. Trade talk had Leo Burnett, Ted Bates, Benton & Bowles leading agency race to pick up pieces from Kudner. Buick gen. mgr. E. T. Ragsdale explained only that he feels "it is now in the best interests of both parties." Buick sales have been slipping. But company was said to have been satisfied with Kudner's recent TV offerings, although Buick displeasure was expressed at premature commercial at end of NBC-TV's telecast of Floyd Patterson-Hurricane Jackson championship fight last summer. Chain reaction set off at Kudner this week included these personnel upheavals: Myron P. Kirk, senior v.p. & TV-radio director, resigned, replaced temporarily by newly-elected v.p. Donald Gibbs. C. M. Rohrabacher, v.p. & secy., was elected exec. v.p., replacing pres. J. H. S. Ellis as head of exec. committee. Ellis himself denied he was resigning.

Telecasting Notes: Two trends for 1958-59 TV season have been spotted by *Variety's* veteran N. Y. & Hollywood trend-spotters in Dec. 18 issue. From N. Y., TV editor George Rosen sees potential "economic turmoil" at the networks as result of "the growing sponsor yen for once-a-month exposure with full hour or 90-min. TV specials instead of weekly or alt.-week shows" . . . "At least half a dozen major advertisers currently riding the TV networks with weekly or alt.-week programming have been making overtures in recent weeks toward embracing the new sponsorship formula," says Rosen, qualifying statement with phrase, "it's reported." Big problem from networks' standpoint, he says, is that "there's no money in it," weekly & alt.-week sponsorship being their bread-&-butter item and "specials" invariably meaning a loss for the network . . . From Hollywood, *Variety* sees trend to 60-min. film shows, a la *Wagon Train*, *Maverick* and *Perry Mason*, with "a whole flock" now being prepared out there aimed at network showcasing. Among those *Variety* says are now working on new 60-min. film series are Warner Bros., CBS-TV (2), Revue Productions, MGM—most of them working on westerns . . . First movie major to enter TV commercial field—10 years ago—Universal Pictures is now estimated to account for 30-50% of all filmed commercials, reports Dec. 16 *Billboard* in its "TV Commercial Quarterly" section, which features heavy coverage and analysis of beer commercials, among other things . . . Film-to-live switch on ABC-TV: Betty White's filmed *Date with the Angels* will be succeeded by live comedy-variety *Betty White Show* Feb. 5 . . . Full-page ads in Dec. 19 *N. Y. Times* and *Wall St. Journal* proclaim that "Per average evening minute, 57% more homes watch ABC-TV than a year ago," crediting new affiliates and better programs . . . Sales in 10 Latin American TV markets—all markets except Dominican Republic & Cuba—have been chalked up by NTA for its Spanish-dubbed *Sheriff of*

Cochise . . . Ace drama producer Fred Coe, who recently left NBC, reported ready to sign 3-year contract with CBS, providing for 4 "specials" a year plus development of live & filmed series; there was speculation that he may produce some *Playhouse 90* dramas next year . . . Betty Furness signs new contract with Westinghouse, continuing as announcer-demonstrator through 1958; she'll move to Hollywood with *Studio One* . . . Leaving Sunday afternoon "intellectual ghetto" for one night only, NBC-TV's *Omnibus* moves to prime time Jan. 14 for special musical colorcast 8-9 p.m., pre-empting *George Gobel Show* . . . "World's largest news medium" is how CBS-TV is billing its 10-year-old *Douglas Edwards with the News*, basing its claim of 14,156,400 viewers a day and 33,975,360 a week on latest Nielsen ratings. How does this compare with other news media? *Life*, the largest, claims to reach 30,426,000 a week (average 5.2 readers per issue, 5,851,168 circulation); *London Daily Mirror*, biggest in daily field, reaches 12,421,834 (circ. 4,732,131 with 2.63 per issue); in U. S. *N. Y. Daily News* has 5,480,846 readers (circ. 2,083,927) . . . Correction: Washington Post Broadcast Div. (WTOP-TV & WTOP, Washington & WMBR-TV & WMBR, Jacksonville) pres. John S. Hayes chides us for reporting in this column last week that Westinghouse Broadcasting was only U. S. non-network station group with correspondent at NATO Paris meeting. His stations sent ace newsman Murrey Marder to Paris.

Cut in commercials by partic. sponsors of feature films on WGN-TV, Chicago, was made effective this week, station voluntarily reducing breaks to 15-min intervals instead of maximum of break for each 5-min. of programming permitted by NARTB code. "In our opinion, the present formula permits too frequent interruption of the plot of these dramatic presentations," WGN-TV v.p. & gen. mgr. Ward L. Quaall said.

TV is "terrorvision," according to new critic James Thomas of *London Daily Express* in recent series of articles headed "The Case of the Captive Child." He said something should be done to save 3,500,000 British children from nightly torments of "horror" films imported from U. S. But *Express* campaign has "sputtered out like a spent rocket" following "explosive start and about half a dozen erratic orbits," L. Marsland Gander reported in Dec. 15 *N. Y. Times*. Council for Children's Welfare joined *Express* campaign at first, calling TV movies "nasty," but Gander wrote that *Express* began to drop crusade after Rev. Marcus Morris, editor of 4 children's newspapers, "came on the air and said unequivocally that he was all for horror, and he thought it ridiculous to pretend that TV pictures were brutalizing children." Note: Gander, dean of British TV critics, is on staff of rival *Daily Telegraph*.

Should TV stars sell, too? Answers to troublesome question of whether TV performers cheapen themselves and/or products by delivering sponsors' commercials are attempted by Dec. 20 *Printers' Ink*. Magazine polled sponsors, agencies, network programmers, critics, performers themselves, found total of 20 favored practice, 18 gave "yes-but" opinions, 15 opposed. Sponsors & agencies generally favored. Programmers & performers split nearly evenly. No critic gave unqualified approval.

In England, too, theatres are suffering from the impact of TV—more than 700 having been closed down since last May, according to govt. report to House of Commons. Total movie houses closed in U. S. since start of year: 1200.

TV's "little hell": Damages of \$3000 against CBC have been awarded by Quebec Superior Court to Dr. E. E. Robbins, 77-year-old Montreal physician, for display of his name, address & telephone number on TV in Feb. 1956. He had written to govt.-owned network complaining about CBC's *Tabloid* show. Commenting on letter, master of ceremonies Dic MacDougall had Dr. Robbins' identification flashed on screen, suggested viewers get in touch with him to make him "feel better." Result, according to doctor who sued for \$10,000, was that they made his life "a little hell." Assoc. Chief Justice W. B. Scott agreed that privacy had been badly invaded, said he was impressed by psychiatrist's testimony that "marginal viewers" could have been expected to react in hostile manner toward Dr. Robbins.

Quiz show anti-climax was reached this week by contestant Theophilus Adepoju Aderonmu on CBS-TV's *The \$64,000 Question*. Nigerian native, who says he is tribal chief's son, took \$64,000 he had won last month and left program, although he had since gone on to \$96,000 and was due to try for \$128,000—and possible \$256,000—by answering Bible questions. "I have been so embarrassed I can't concentrate on what I'm doing," he explained to quizmaster Hal March. Reasons: Following admission that he owed divorced wife support payments (Vol. 13:49) it was publicly disclosed that: (1) He had remarried without mentioning earlier domestic status. (2) Immigration Service was questioning his status as medical student.

Video tape recorder will be placed in mobile unit by San Francisco's KRON-TV for remote pickups. Station has 2 Ampex recorders on order.

New and Upcoming Stations: One vhf starter, one uhf going dark leaves on-air total at 520, uhf's dropping to 89. KVII, Amarillo (Ch. 7), ABC-TV affiliate, began programming Dec. 21, third vhf in city where KFDDA-TV (Ch. 10) and KGNC-TV (Ch. 4) have been operating since 1953. WPAG-TV, Ann Arbor, Mich. (Ch. 20), which began April 3, 1953, asked permission to go dark for 6 months Dec. 31, listing following losses: \$24,990 for 1953; \$30,036, 1954; \$30,057, 1955; \$30,654, 1956; \$26,944 first 9 months of 1957. Also reported temporarily off air because of Dec. 15 fire was KSWO-TV, Lawton, Okla. (Ch. 7). In Canada, satellite CFCL-TV-1, Kapuskasing, Ont. (Ch. 3) began Dec. 15 repeating parent CFCL-TV, Timmins, Ont. (Ch. 6), 81 mi. away. It has 15-watt Canadian GE transmitter, 200-ft. tower. CFCL-TV base hour is \$180. Reps are McGillivra, Paul Mulvihill & John N. Hunt.

KVII has 5-kw RCA transmitter and 12-section antenna on 833-ft. Andrews tower. Ownership, interlocking with radio KAMQ, Amarillo, consists of five local businessmen, each with 20%, headed by John L. McCarty, chairman; Murry Woroner, pres.-gen. mgr., formerly asst. gen. mgr. of KFDDA-TV. Jerry Gardner, from KAMQ and ex-KFDDA-TV, is production mgr.; Don Daniels, ex-KFDDA-TV, chief engineer. Base hour is \$300. Rep is Venard, Rintoul & McConnell.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KTVU, Oakland-San Francisco (Ch. 2) had 25-kw RCA transmitter due Dec. 20, plans early March programming, writes Wm. D. Pabst, exec. v.p. & gen. mgr. Transmitter house walls are up, bids are in for studio building. Foundation is ready for 100-ft. Ideco tower on Television Peak, San Bruno Mt. Rates not set as yet. Rep will be H-R Television.

WIPR-TV, San Juan (Ch. 6, educational) with test

Capitol Cities Television Corp. is new name for operating company of so-called Lowell Thomas group, representing merger of ownership of WTEN, Albany (Ch. 10), formerly WCDA, with satellite WCDC, Adams, Mass. (Ch. 19); radio WROW, Albany; WTVD, Durham, N. C. (Ch. 11); pres. Frank Smith owns 1/3 of CP for Ch. 40, Baton Rouge. There are 2,000,000 shares authorized, 1,048,944 outstanding, with additional 52,000 being offered over-the-counter 6 5/8-7. Pres. is Frank M. Smith, 13.91% stockholder, onetime WLW and Transamerican executive, mgr. for Lowell Thomas for last 10 years. Vice-presidents are Wm. J. Casey, 4.87%, Alger B. Chapman, 4.85%, and John P. McGrath, 5.99%; N. Y. attorneys; Harmon L. Duncan, 2.18%, and J. Floyd Fletcher, 3.81%, ex-owners, now co-mgrs. of WTVD; Thomas S. Murphy, 1.16%, mgr. of Albany stations. Lowell Thomas and family, largest stockholders, own 18.2%. Among 50-odd other stockholders, all under 4%, are GOP Congressman Dean P. Taylor, Troy, N. Y., 3.15%; Democratic Congressman Leo W. O'Brien, Albany, 2.34%; H. V. Kaltenborn, news analyst, 1.19%; radio WDNC, Durham, 1.53% (Carl C. Council, pres.).

"Fisbie" trademark is being registered by WHAS-TV, Louisville, to identify station with slogan, "Foremost in Service, Best in Entertainment," and sketch of head with Ch. 11 numerals superimposed which has been used for promotion since Jan. 1956. Name was picked in contest which drew 40,000 entries.

patterns on air since Aug. 30, plans Jan. 6 programming, reports gen. mgr. R. Delgado Marquez. It has 25-kw RCA transmitter feeding 6-bay antenna on 200-ft. Blaw-Knox tower at TV-radio plant 15 mi. from San Juan.

CKRN-TV, Rouyn, Que. (Ch. 5), planning Christmas programming, has 760-ft. Wind Turbine tower nearly ready for 4-bay GE antenna, reports pres.-gen. mgr. D. A. Gourd. It will use 35-kw Canadian GE transmitter. Programming will be network only until studio facilities are completed. George A. Chartrand, from radio CKRN, is station mgr.; Vernard Valiquette, ex-Canadian Press & British UP, news editor; Jean-Guy Langevin, CKRN, technical director. Base hour will be \$160. Reps will be Weed and Joseph Hardy & Co.

RCA shipped 24-gain antenna and used 1-kw transmitter Dec. 2 & 3 to upcoming WBPZ-TV, Lock Haven, Pa. (Ch. 32), due in Jan.; 8-section superturnstile antenna Dec. 13 to WTVC, Chattanooga (Ch. 9), due to resume early in 1958 after move from Rome, Ga. where WROM-TV call was used; 1-section superturnstile antenna Dec. 13 to WWJ-TV, Detroit (Ch. 4); 1-section superturnstile antenna Dec. 19 to KVAL-TV, Eugene, Ore. (Ch. 13).

Battle of daytime AM stations to get longer operating hours was marked this week by FCC's issuance of rule-making proposing to permit operation from 5 a.m. or local sunrise (whichever is earlier) to 7 p.m. or local sunset (whichever is later)—in lieu of present sunrise-sunset-only provisions. Comments are due March 18, replies 30 days later.

Translator starts: K74AL, Gold Beach, Ore. began equipment tests Dec. 13 repeating KIEM-TV, Eureka, Cal.; K80AG, Show Low, Ariz. Dec. 10 began repeating KGUN-TV, Tucson; K80AK, La Grande, Ore. plans Jan. 4 start with KREM-TV, Spokane.

CBS-TV adds WBOY-TV, Clarksburg, W. Va. (Ch. 12) as secondary interconnected affiliate, effective immediately.

New ABC-TV affiliate is WLBR-TV, Lebanon, Pa. (Ch. 15), effective Jan. 5.

Rate increases: KCOP, Los Angeles, has raised base hour from \$1350 to \$1500, min. \$350 to \$425. WTEN, Albany, N. Y., formerly WCDA, Nov. 1 raised hour from \$625 to \$900, min. \$130 to \$175. KGW-TV, Portland, Ore. Jan. 1 raises hour from \$700 to \$800, min. \$200 to \$225. WGR-TV, Buffalo, Dec. 1, hour \$700 to \$750, min. \$190 to \$255. WHO-TV, Des Moines, Dec. 1, hour \$700 to \$750, min. remaining \$150. WHCT, Hartford, Dec. 15, hour \$650 to \$700, 20 sec. remaining \$130. KGMB-TV, Honolulu, hour \$350 to \$400, min. \$75 to \$87.50. WBRZ, Baton Rouge, hour \$300 to \$400, min. \$65 to \$90. WLBR-TV, Lebanon, Pa. Jan. 1, hour \$200 to \$350, min. \$46 to \$80.50. WAPA-TV, San Juan, Jan. 1, hour \$250 to \$325, min. \$55 to \$70. KROC-TV, Rochester, Minn. Dec. 31 adds Class AA hour (7-10:15 p.m. daily) at \$300, min. at \$60, Class A hour going from \$250 to \$240.

WBLN, Bloomington, Ill. (Ch. 15) off air since June 3 (13:26) has sold \$66,225 worth of common stock to public at \$25 a share, according to application filed with FCC by mgr. Worth S. Rough, who changes from majority to 12% owner. Station also reports it is liquidating indebtedness by paying off creditors at 10%, except for GE which is to get \$22,500 or approximately 17% of \$142,014 remaining on equipment.

Charles B. Jordan is exchanging his 25% of KFDDA-TV, Amarillo, Tex. (Ch. 10) & KPDA for full control of radio KFDDA plus note for approximately \$112,000.

Adler's Vhf Repeater Proposal: Vhf translators, as well as uhf translators and on-channel vhf boosters, are proposed by Adler Electronics Inc. as answer for sparsely settled areas. Filing comments in FCC's vhf booster rule-making proceeding, Adler suggests that vhf translators could be supported economically by 50 families.

To guard against interference, company recommends that power output not exceed 0.25 watt and that transmitters have equipment which will shut them down automatically if objectionable radiation outside assigned channel is generated. Also suggested is increase in uhf translator power from 10 to 100 watts maximum.

Washington State TV Reflector Assn., biggest defender of unauthorized vhf boosters, urged Commission to permit continued use of operating boosters wherever absence of interference can be proved.

KXLY-TV, Spokane, and KELP-TV, El Paso, suggested low-power vhf outlets be authorized with "minimum necessary safeguards."

* * * *

There was still another step this week in long fight over WESH-TV, Daytona Beach (Ch. 2)—when Commis-

sion instructed staff to draft decision affirming Feb. 6 grant authorizing move to site 25 mi. from Daytona Beach, increase in power & height—denying protest of WLOF, Orlando.

By bare majority (Doerfer, Hyde & Mack dissenting), Commission authorized grantee KVVU, Santa Fe (Ch. 2) to change site to towering Sandia Crest, 43 mi. away, location of the Albuquerque stations.

In allocations, Commission: (1) Denied WENS (Ch. 16) proposal for 4th commercial vhf in Pittsburgh, adding either Ch. 6 or 9 by extensive channel shifts in wide area. (2) Set Jan. 17 deadline for comments on WWLP, Springfield, Mass. (Ch. 22) proposal to substitute Ch. 15 for 75 in Concord, N. H., Ch. 21 for 15 in Portsmouth, N. H.; 75 for 30 in St. Johnsbury, Vt.; 69 for 74 in Bennington, Vt. and give 74 to Springfield, Vt. (3) Denied request by Veterans Bcstg. Co. Inc., Ch. 10 applicant in Vail Mills, N. Y. (Albany area), for temporary stay of operation of WTEN on Ch. 10.

Grantee WXTV, Youngstown (Ch. 73), petitioned for substitution of Ch. 33 for 73, Ch. 22 for 47 in Pittsburgh, Ch. 79 for 22 in Clarksburg, W. Va.

Translators authorized: Ch. 75, Indio, Cal.; Ch. 78, Joplin, Mont.; Ch. 76, Shelby, Mont. [For details, see *TV Addenda 25-U* herewith.]

Radio Station Sales Approved by FCC: KGA, Spokane, Wash. by Bankers Life & Casualty Co. for \$250,000 to Gran Bcstg. Co. (Vol. 13:48) . . . WHOO, Orlando, Fla. by Edward Lamb for \$250,000 to Ted Estabrook (Vol. 13:47) . . . WAND, Canton, O. by P. C. Wilson for \$150,000 to Agnes J. Reeves Greer (Vol. 13:44) . . . WROD, Daytona Beach, Fla. by Jim McDonough & John Murphy for \$145,000 to Radio of Daytona Inc., owned 20% by McDonough (Vol. 13:46) . . . KBTM, Jonesboro, Ark. by Helen W. & Harold E. King for \$110,000 to brothers Alan G. Jr. & Matthew C. Patteson (Vol. 13:48) . . . WCOS, Columbia, S. C. by Charles Pittman for \$107,500 to George H. Buck Jr. (Vol. 13:47) . . . KTKT, Tucson, Ariz. 50% by Thomas J. Wallace for \$90,000 to Art Linkletter & John Guedel (Vol. 13:33) . . . KYNG, Coos Bay, Ore. by Harold C. Singleton & Walter N. Nelskog for \$70,000 to KYNG Radio Inc. (Vol. 13:48) . . . KLEE, Ottumwa, Ia. by Jack Lester & Wm. O'Connor for \$57,500 to Carroll Marts ex-MBS central div. (Vol. 13:43).

Dominican Republic demand that FCC require CBS Radio to give Trujillo govt. "free time or some form of redress" to answer May 20 documentary on "The Galindez-Murphy Case" was rejected by Commission this week. Dominican Information Service in N. Y. also had asked FCC to force CBS to "accept sponsored time if free time is not obligatory" for reply to broadcast account of disappearance of Jesus Maria de Galindez, Trujillo foe, and death of Dominican Airlines pilot Gerald L. Murphy. Pointing out that it exercises no network program supervision, FCC said it "is unable to conclude at this time that CBS has failed to discharge its responsibility as broadcast licensee."

Sale of KREM-TV, Spokane (Ch. 2) by Louis Wasmer to group headed by Mrs. A. Scott Bullitt, was given go-ahead again this week as FCC dismissed protest which had been filed by TV Spokane Inc. (Vol. 13:47). Protestant, one-time applicant for Ch. 2, withdrew objection after private settlement—terms undisclosed. Comrs. Bartley & Ford dissented, saying they wanted to know more about "the circumstances surrounding the withdrawal."

Construction of 1082-ft. TV tower has been started in Tokyo by Nippon Television City Corp.

Reports of Radio Station Sales: KXLW, St. Louis, by John Kluge & Mark Evans for \$500,000 to R. J. Miller, N. Y. finance exec. and George Eng, pres. of Peninsula Swift Homes Inc., Norfolk (Blackburn & Co.) . . . KANS, Wichita, Kan. by Kenyon Brown and Frank Lynch for \$300,000, including assumption of liabilities, to J. Wm. O'Connor and associates (Hamilton, Stubblefield, Twining & Assoc.) . . . KPLA (FM), Los Angeles, by Don Martin for \$100,000 to John H. Poole . . . KEAR (FM), San Francisco, by Stephen A. Cisler for \$100,000 to Harry H. Nasburg, publisher of *The Argonaut*, weekly literary magazine.

Next move in "Ch. 13 case" is up to FCC—and prospects of N. Y. Board of Regents' acquisition of channel for proposed educational uses, in lieu of projected \$3,500,000-plus sale of WATV with WAAM to National Telefilm Associates (Vol. 13:49, 50), appear enmeshed in cloud of legal arguments. This week, replying to WATV and NTA briefs opposing proposed rule-making to change Newark station's channel to educational, counsel for Regents filed 31-page brief, insisting FCC has authority to make change, citing precedents and reiterating intention of seeing to it that "no harm shall be caused WATV," i.e., that WATV owners will be paid. Meanwhile, the trade journal *Sponsor*, in unverifiable reports, stated this week that N. Y. educational exponents are working on plan whereby the 6 metropolitan stations "put up \$1,000,000 each to buy the 7th for the educators" in order to "cut down commercial competition and soften pressure on themselves for more educational fare."

Film interests are represented in new AM application for Albuquerque (1310 kc, 1 kw, daytime) reportedly also have pay-TV plans: Larry Stern, pres.-treas., 33½%, eastern sales rep of M & A Alexander Productions; Arthur Alexander, v.p., 33½%, pres. of M & A; Murray J. Chikofsky, secy., 33½%, asst. house counsel of 20th Century-Fox, N. Y.

Inconsistencies in govt. agency decisions and some reasons therefor are discussed in Dec. 5 *Virginia Law Weekly* by Paul Dobin, former chief of FCC rules & standards div., now member of Cohn & Marks, Washington law firm.

Who Owns AAP? United Artists made its bid to become major factor in TV industry this week with announcement that it had purchased 51% of Associated Artists Production Corp.—which was immediately challenged by NTA, which claims it has previous legal contract for purchase of controlling interest in AAP (Vol. 13:46 et seq.). Web of litigation arising out of conflict must be untangled by courts to determine actual purchaser.

UA's purchase was negotiated in Canada, buying outfit being new UA subsidiary Gotham Television Film Corp. Gotham announced it has purchased 700,000 shares of AAP stock (51%) for \$12 a share, consisting of \$6 cash and \$6 in debentures guaranteed by UA. Sellers were Canadian financier AAP chairman Louis Chesler and his group. UA says it will offer same deal to other stockholders. Chesler confirmed sale to Gotham TV this week. The offer which NTA says AAP

officials accepted involved sale of 820,000 shares by same group for \$4,375 cash, \$4.40 in debentures and 1/10 share of NTA stock for each AAP share.

Chesler, Maxwell Goldhar and M. Mac Schwebel have resigned as AAP officers and directors, but pres. Eliot Hyman and other management personnel of AAP are slated to remain if UA sale sticks.

What makes AAP so desirable is its ownership of pre-1948 Warner Bros. film library, plus Paramount's *Popeye* cartoons.

UA recently organized new subsidiary United Artists Television Corp., to be headed Jan. 1 by Herbert L. Golden, well-known in TV industry as head of entertainment industries div. of Bankers Trust Co., N. Y. (Vol. 13:50); Bruce Eells is exec. v.p. John Leo, who has been director of feature film sales for UA, continues in that post.

At Bankers Trust Co., asst. v.p. Edgar A. (Ted) Manning succeeds Golden as chief of entertainment industries div., which handles loans to film producers.

Slip of the decimal point in Nov. 2 *Television Digest* (Vol. 13:44) caused us to cite incorrect prices for European Broadcasting Union's excellent TV & FM station directories. *List of Television Stations* contains latitude & longitude, frequency, power and polarization of all Western European TV stations as of April 1, together with each country's TV standards. *List of Sound Broadcasting Stations (VHF Band)* gives same data for FM stations. Both have separate lists arranged by country and by frequency. They're available from EBU Technical Centre, 4 Rue de la Vallee, Brussels, for 25 Belgian francs each, or about 50¢ (not \$5 as erroneously stated). EBU also has announced new monthly publication, *EBU Review*, a printed periodical which replaces the bi-monthly mimeographed *EBU Bulletin* next month. New publication, printed in English and French editions, will be divided into 2 parts, each published semi-monthly. Technical edition will be issued in Jan. and bi-monthly thereafter, with General & Legal edition beginning in Feb. Annual subscription by surface mail is 300 Belgian francs (about \$6); single copies of Technical edition are 30 Belgian francs.

Baseball TV Plan Stands: CBS-TV proceeded this week to negotiate Sunday baseball game telecasts with 5 major league clubs next season despite howls by minor clubs and promise of investigation by House Judiciary anti-trust subcommittee (Vol. 13:49-50). Network stressed that telecasts wouldn't be carried in areas where minor clubs play Sunday home games, but minor league czar George Trautman said that wouldn't prevent damage to Sunday gates. "Apparently Columbia has but one thing in mind and that is the preservation of Columbia and the destruction of the minors," he said pursuing demands that Congress step into minor-major dispute. Trautman wants baseball exempted from monopoly laws so that clubs can join together to control broadcasts of games.

Broadcast Americana: CBS Radio presented Library of Congress this week with complete tape recordings of May 13-26 network programs, 397 reels becoming part of permanent collection of audio-visual reference materials. Accepting gift from CBS Radio pres. Arthur Hull Hayes, librarian L. Quincy Mumford said: "In a day when mass media comprise a major aspect of American civilization, it is appropriate that the Library of Congress should preserve representative examples of the offerings of network radio to the American people."

NARTB promotes Howard H. Bell to asst. to pres. in charge of joint affairs effective Jan. 1, aiding pres. Harold E. Fellows in staff planning, activities with state broadcasting assns. and freedom of information campaign. In new post, Bell will lift some of administrative load from Fellows—who will be 59 in March—and as NARTB spokesman puts it "has been doing work of 3 men," asserting that Fellows has "nothing organically wrong with him." NARTB also announced appointment of employer-employee committee, chairman Leslie C. Johnson, WHBF (AM-TV), Rock Island, Ill.; initial meeting is scheduled tentatively for Feb. 27 in Washington.

NBC Opera Company has attained "major importance" in musical world, which no longer can regard troupe as "precocious upstart bred by a medium with spasmodic pretensions to culture," *N. Y. Times* critic Howard Taubman wrote Dec. 15. Reviewing NBC-TV's production of Francis Poulenc's "Dialogues of the Carmelites" which opened 9th season Dec. 8, Taubman lauded company's "valuable contribution to the cause of opera in America."

Inroads on FM band have never been proposed by Commission, FCC said this week—issuing special notice to answer numerous inquiries (Vol. 13:48). "It is emphasized," notice stated, "that the Commission has not instituted any rule-making proceeding directed toward reallocating any part of the FM broadcast band (88-108 mc) although proposals have been received by the Commission to make such spectrum space available for use by other radio services."

Memo on subliminal advertising, circulated Dec. 16 to all dept. heads by AB-PT pres. Leonard H. Goldenson, reads in part: "Until such time as full and complete information concerning the effects of this technique is available for careful consideration, the ABC-TV network and its owned-&-operated stations, in keeping with their policy that all commercial announcements shall be clearly identified as such, will not broadcast messages utilizing the technique of 'subliminal perception' . . ."

San Francisco TV blackout of National Football League's western div. playoff Dec. 22 is being investigated by Justice Dept., asst. attorney general Victor Hansen revealed this week. The anti-trust div. chief pointed out that tickets for game at San Francisco's Kezar Stadium have long been sold out and event is being televised coast-to-coast, except to San Francisco area.

Major TV Study: Fund for the Republic, Ford Foundation-financed group devoted to issues involving Constitutional rights, this week announced study of "mass media of communication," which will begin with "an analysis of the relationship between Govt. and TV." According to pres. Robert M. Hutchins, project "will include a study of the application of the First Amendment's guarantee of free speech to the medium of TV, and an analysis of the role of the FCC as a regulatory body in this field." Explaining project's emphasis on TV, Hutchins stated: "Surveys have shown that people spend more time with TV than with magazines, newspapers and radio combined . . . It has become increasingly clear that TV is having a tremendous impact on our society." Responsible for mass media study will be Princeton U history professor Eric F. Goldman, former *Time* magazine staffer. Acting as liaison directors will be 3 members of Fund's board, none of them identified with TV: Miss Alicia Patterson, editor & publisher of *Long Island Newsday*; Bruce Catton, editor of *American Heritage* magazine; Harry Ashmore, exec. editor of *Little Rock Arkansas Gazette*.

Advanced science reporting course for broadcasters, newspapermen & magazine writers under \$70,000 grant by Alfred P. Sloan Foundation, was announced this week by Columbia U's Graduate School of Journalism. Selected reporters & writers, preferably those with 3-6 years' experience, will be given tuition plus \$550 monthly for living expenses. Dean Edward W. Barrett said fellowships are intended to "increase the number of dependable science & technology writers for newspapers, press services, magazines, radio, TV & industry."

"First intercity big-screen closed-circuit colorcast" is claimed by Closedcircuit Telecasting System (Fanshawe Lindsley, pres.) for Dec. 12 Greater N. Y. Dental Meeting at Statler Hotel, where 1500 dentists viewed mouth surgery and tooth repair demonstrations which originated at U. S. Institute of Pathology, Walter Reed Hospital, Washington. N. Y. color picture was displayed by 3 RCA color projection units.

CBS-TV Affiliates, holding 2-day general conference in Washington's Hotel Shoreham Jan. 13-14, will be addressed at luncheon meeting first day by Vice President Nixon, second day by Senate majority leader Lyndon Johnson (D-Tex.) whose wife heads company owning KTBC-TV, Austin, and has interests in KWTX-TV, Waco, and KRGV-TV, Weslaco.

Mass media data covering TV, radio, movies, newspapers, magazines, books are compiled & evaluated in *Mass Communications: A Statistical Analysis* by Richard E. Chapin (Mich. State U Press, East Lansing, 148 pp., \$5.75). Chapter on TV & radio industries says their statistics "are more complete, more available, and more consistent than those for any of the other mass media."

One application for TV station, one for translator, were filed with FCC this week, bring total to 123 (33 uhf) for stations, 23 for translators. Applications: For St. Petersburg, Fla., Ch. 10, by group headed by ex-CBS-TV pres. J. L. Van Volkenburg; translator was for Ch. 78, Libby, Mont. [See *TV Addenda 25-U* herewith.]

Soviet bloc TV-radio programs will be exchanged under agreement between communications ministers of Communist countries, Tass reported this week. Pact also calls for development of telecommunications & mail services.

Tele-Pay Productions is new firm formed to make films exclusively for toll TV. It's headed by George Weiss, with Ted Adair as casting director; office is at 723 Seventh Ave.; N. Y.

"Educational Television & Groucho Marx" titles strikingly illustrated booklet being distributed by NBC. Theme: "Because millions enjoy Groucho—and other popular entertainers like him—TV has grown into the greatest advertising medium in history. Every year American industry, recognizing TV's matchless ability to reach the entire family, has poured increasing millions of dollars into TV advertising. This money serves 2 functions. It lights up TV screens across the nation with a week-long schedule of the most diversified entertainment available. At the same time it enables the networks to go beyond mass entertainment to create the so-called 'special interest' programs, programs designed to instruct and uplift, to enrich and enlarge the cultural life of the American people." Booklet describes, in words and pictures, such NBC-TV cultural ventures as NBC-Educational TV & Radio Center educational series, "Project 20" documentaries, NBC-TV Opera, *Wisdom* series, etc. Note: One of NBC-TV's prestige programs, *Wide Wide World*, was scheduled to feature Vice President Nixon, who was due to participate in show featuring story of American justice and law enforcement Dec. 22.

Electronic Eyes for Military: Army awarded 2-year \$1,500,000 contract this week to Cornell Aeronautical Lab, Buffalo, for development of TV and other electronic surveillance methods for battlefield use. Contract provides for study of TV, radar, conic, meteorological, drone reconnaissance & photographic systems for observing enemy positions and actions. Research & development will be carried out by 35 key Cornell Lab scientists and some 35 military personnel of Army Combat Surveillance Agency.

Add mergers: Compton Adv. acquires Western Adv., Los Angeles, transferring its personnel & accounts to Compton offices there Jan. 1, merger raising latter's west coast staff to 49. Edward E. Keeler, former Western head, joins Compton as a v.p.

Headline of the week: "Hi-Fi Followers Want a Static FM"—Dec. 15 N. Y. *Times* story by Jay Walz detailing drive by FM stations and others to prevent encroachment of other services on 88-108 mc band.

Assn. of National Advertisers directors name Donald S. Frost, Bristol-Myers v.p. in charge of advertising, as treas. He succeeds Henry Schachte, Lever Bros. v.p., now ANA vice chairman.

First live radio coverage of N. H. state legislature has been approved by its rules committee for special Jan. session, permission going to WKXL, Concord. Facilities will be shared by WMOU, Berlin, and WJWG, Conway.

New closed-circuit TV dept. of Bramson Entertainment Service, headed by Nat M. Abramson, mgr. of WOR Artists Bureau, opens at 1440 Broadway, N. Y.

Summarizing radio growth, NARTB estimates 1957's gross will run to record of about \$650,000,000, up 14% from 1956's \$571,000,000, which was up 5% from 1955.

Bound and Indexed

We will index and bind, between embossed hard book covers, a limited quantity of all 1957 issues of the Television Digest Weekly Newsletters, plus the semi-annual TV Factbooks with all Addenda, plus all Supplements and Special Reports. This volume will provide a handy and handsome permanent reference for your own or your company library. Orders will be taken until Dec. 30. Price: \$25 per volume.

PHONO BUSINESS 1957—THE FI IS REALLY HIGH: Ten-month figures in hand are showing that packaged phono-hi-fi business this year is surging to its majority with about 5,000,000 units of factory sales and retail value of about \$500,000,000. The figures make emphatic this message to price-depressed TV-radio manufacturers: The big-ticket hi-fi bracket is booming. Second item: Following TV in style though not yet in price, the portable phono is full-fledged trend -- with some automatic and with-radio models showing increases best described as spectacular.

Both points add up to a dollar story that TV & radio manufacturers haven't been hearing lately. TV retail sales have slipped from \$1.4 billion to \$1.3 in 2 years; home radio has held constant at about \$250,000,000 despite 6-year unit sales records (Vol. 13:49). But after ignoring the recent growth of phono industry for almost 2 years, all major TV & radio makers got in (with one or 2 outstanding hold-outs) with big production at the high phono-only end last year and the high radio-phono end this year. TV & radio makers are now sharing in phono retail dollar boom. Retail value in 1957 will have topped 1956 by \$100,000,000, most of it in sales of units over the \$100-\$125 line -- and 1958 is expected to add another \$100,000,000 retail, again from increased activity in the higher-end areas.

Industry opinion explains all this with a happy story. People have learned what good sound is and are willing -- conditioned, if you will -- to pay upwards of \$100-\$125 for hi-fi. Same opinion says high-end matched constant low-end in 1956 in retail dollars, doubled it in 1957, will triple it in 1958.

Figures from Electronic Industries Assn. help spell out some of the story -- and point up some dramatic areas. But caution is the word from most interpreters of EIA's detailed breakdowns of phono-hi-fi mix. While some models & price brackets show huge percentage gains, many of these categories started from near zero in comparable periods last year as manufacturers were still "discovering" their market. EIA breaks its statistical studies of the packaged phono market (components not included) into 3 major merchandise groups: record player attachments, phonographs (without radios), combinations (radio-phonos & TV-radio-phonos) -- then breaks these into many price & model categories. Here are selected views of total picture:

* * * *

(1) Through Oct., total factory sales in units are up 25% over 10 months last year -- and EIA's exec. v.p. James D. Secrest sees year leveling off at 16% increase (Vol. 13:50), with about 5,000,000 units vs. 4,175,000 in 1956.

(2) Record player attachments as a group are down 5% from last year.

(3) Phonographs as a group are up 97% in 10 months; of 17 categories, 6 are down, 11 up. All non-automatic phonos are down except low-end single-speed single-play category, which is booming. All multi-speed automatics are up except the \$100-\$150 table model, which is off slightly. Low-end tables are up sharply; high-end tables have doubled. All portables are up, especially the over-\$100 list category, which has doubled. All consoles are up, the high-end (over-\$200) having tripled -- from 100,798 in 10 months of 1956 to 304,884 in 10 months this year.

(4) Combination group is up 16%; 6 of 8 radio-phono categories are up -- and activity in highest end is dramatic. Low-end tables and portables are down slightly or even. Middle- & high-end portables have doubled. Low- & middle-end consoles have doubled. High-end console radio-phono combinations have more than doubled, and TV-radio-phono combinations are up slightly.

Growth of most expensive (over-\$300 list) radio-phono is impressive. In 1955, factory sales totaled 23,097 units; in 1956, 51,244 were sold. In 10 months of 1957,

factories had already moved 196,275 -- 31,678 of these in new "over-\$500" bracket.

Further growth patterns are pointed by shifts in percent-of-industry done by certain merchandise categories in last 2 years. For example, in 10 months of 1957 vs. like period last year, analysis of EIA factory sales by units shows: consolette & console phonos at all prices did 14% of factory sales vs. 8.7% in 1956. Console radio-phono in the \$200-to-over-\$500 class grew to 9.3% vs. 3.3%. Middle- & high-end portable radio-phono grew to 4.6% from 2.1%. In lower priced goods, portable automatic, multi-speed phonos held at about 22% for both years. Portable single-play multi-speed phonos slipped to 15% from 21%. All single-speed, single-play models slipped to 13% of production total from 19% last year.

Note: In Dec. 23 issue, Time cover story sees continuing boom of hi-fi (and helps it along), pointing out that phono ownership in U.S. homes has risen 37% in 5 years to 30,000,000; that there are 2,000,000 (component) hi-fi rigs in use; that LP records now do 2/3 of pop record business. In Dec. 2 issue, Newsweek points to tomorrow's stereo tape business noting 40 firms making stereo library, which grows by 100 titles a month and will soon top 1000. Finally, bringing packaged phonograph (\$500,000,000), records & tapes (\$300,000,000) and tape recorders (\$100,000,000) together in retail dollars as one major maker does, we've got -- or will have by 1958 -- a \$1 billion "music in the home" market to be vigorously worked. (More of that in coming issues of Television Digest.)

ADMIRAL'S HYPOS—AND A FEW 'SLEEPERS': Most unusual area of product diversification we've yet encountered in the unpredictable TV-radio-electronics fields is Admiral Corp.'s move into, of all things, plastic hospital supplies. First product is a disposable syringe used for one hypodermic shot then thrown away. It's favored by medics because some types of germs can't be destroyed by the usual boiling or steaming -- and about 2,000,000 a month are already being marketed to hospital supply houses through some Admiral distributors and certain others assigned closed territories.

It's not a high-price item, nor will it bulk large in Admiral's over-all sales, adding up to some \$8,000,000 next year (when sales should be 10,000,000 units a month) and an expected \$12-\$15,000,000 by 1959. But it's opening up an entirely new field, for now being perfected are disposable plastic sheets and pillow cases which, like the syringe, can be thrown away after one use. These are designed to help obviate the bane of all sickrooms, danger of infection, besides cutting down laundry labor and costs.

Whole field has enormous potential, says pres. Ross Siragusa, who recently engaged V.M. Stilson, ex-Erie Resistor, to head it up. Molded Products Corp., 100% subsidiary acquired from estate of Siragusa's brother, is the producer. At big plant covering more than 3 acres in west Chicago, it is also turning out certain fiber-glass materials and plastic parts for Fisher Body, Pontiac, Plymouth, Buick; it has always made the plastic cabinets for Admiral's TVs and radios.

[For further report on Admiral and other "diversifiers," see p. 13.]

* * * *

TV Tube Rebuilders: Increasing part of TV picture tube market going to the tube rebuilders is emphasized by latest EIA breakdown showing renewal tube sales by rebuilders at 2,600,000 in 10-months through Oct., compared with 2,400,000 in 1956 period. At same time, sale of new tubes to setmakers totaled 5,300,000 vs. 6,300,000 in first 10 months of 1956, tied to production decline (Vol. 13:49). New tubes for renewal market were 2,400,000 -- same as in 1956. Exports also remained static at 600,000 -- bringing total picture tube sales through Oct. to 10,900,000 vs. 11,500,000 last year. By sizes: 15-in. & under, 6% in 1957, 14% in 1956; 17-in., 23% vs. 17%; 21-in., 65% vs. 62%; 24-27-in., 6% vs. 7%.

Receiving tubes for same period totaled 389,000,000, holding about even with 390,000,000 in first 10 months of 1956. Continued high volume, despite TV drop, is attributed to radio upsurge, increased industrial, commercial, military uses. Here's breakdown: Initial equipment, 210,000,000 through Oct. 1957, 220,000,000 in 1956;

renewal, 153,000,000 vs. 140,000,000; export, 19,000,000 vs. 22,000,000; Govt., 6,600,000 vs. 7,900,000. Marketing specialists expect 1958 increase in sales as greater number of units-in-use require more replacement tubes.

Note: EIA didn't compile TV-radio production figure for week ended Dec. 13, statistical dept. explaining that too few manufacturers reported output. Figures will be reported as soon as available.

Diversification & Profitability: Admiral is diversifying into plastic products for hospital uses, among other items (see p. 12), and other companies are also finding new lines besides the ever-varying requirements of govt. contracts. But their original products remain TV-radio and related household items, now given big lift by the enormous upsurge of hi-fi.

For example, Packard-Bell's report for fiscal year ended Sept. 30, showing sales at record \$32,262,878 and earnings of \$704,447 (\$1.02 per share) vs. \$28,405,059 & \$862,356 (\$1.25) in preceding year, describes the various communications, missiles, radar & computer products it turns out. But it also makes the Foetoscope for hearing and visualizing the heartbeat of an unborn child; the Sigalert emergency radio warning system for police, highway patrols, doctors, firemen; an electronic garage door opener; wooden doors in 12 sizes for homes and building—latter in own Bellwood Co., wood factory which also makes its TV-radio-hi-fi cabinets.

Yet TV represents about 30% of total corporate sales, and continues profitable, says report, while radio and hi-fi have "increased dramatically"—latter up 49% and still climbing. Pioneer Los Angeles radio-making firm calls itself "oldest and largest manufacturer of TV, radio and hi-fi in the West"—presumably because bigger Hoffman Electronics Corp. is now accenting its many electronics products—and report says it plans to expand distribution throughout the 11 western stations "and possibly the nation."

At Dec. 12 stockholders meeting, pres. Robert S. Bell foresaw home products such as TV, radio, hi-fi and garage door openers facing "limitations [that] probably will no more than double [their] sales in the next 5 years." However, in same period, he expects technical products and electronics can "expand to 10 times our current sales." In last fiscal year, he reported, technical products div. contributed 38% of total corporate sales.

While it isn't one of the biggest companies in the field, Packard-Bell offers fascinating reading in its report as an example of diversification effort; you can get a copy by writing Mr. Bell at 12333 W. Olympic Blvd., Los Angeles.

* * * *

Still another report on diversification: General Instrument Corp., back on profit and dividend-paying levels (earnings \$247,053, or 18¢ a share, on sales of \$15,200,170 in 6 months ended Aug. 31 vs. only \$35,561, or 2½¢, on \$13,979,913 in same period of preceding year), informed its stockholders this week:

"Our program is to convert . . . from a manufacturer primarily of components for the radio-TV industry into one which has its base in all phases of electronics activity. Thus, your management plans, without in any way diminishing our leading position as a supplier of TV and radio components, to lessen dependence on the vagaries of the radio-TV market . . ."

Recently, GI acquired Radio Receptor Co. for expansion into industrial and military electronics, notably semi-conductors. Its military backlog at Nov. 20 was \$13,000,000 against \$1,800,000 last year. Its F. W. Sickles div. has introduced a new, cheaper, smaller uhf tuner which chairman M. H. Benedek states should "help bring down uhf set costs and, perhaps, thus stimulate this area of TV broadcasting."

Note: Govt. is by far electronics industry's best customer, as EIA exec. v.p. James D. Secrest reported last week (Vol. 13:50), representing 50% of over-all 1957 factory dollar volume—and Admiral this week reported that, after long lean period in the field since 1950 when it had \$50,000,000 in govt. contracts, it now has backlog of \$25,000,000 as against half that amount year ago. But Admiral, too, still depends on TV ("inventories down 35% from last year's levels"), radio and hi-fi ("booming") and on its appliance lines for by far most of its volume, according to pres. Ross Siragusa.

He's especially hot on prospects for new lines of refrigerators, freezers, dishwashers, ranges—and predicts 1958 will be as good as if not better than 1957 in spite of soft markets expected in first half. Admiral's own 4th quarter will run in black as high as it was in red last year, he said, meaning around \$750,000. Officially reported so far this year are 9-mo. figures only, showing \$572,662 net profit (24¢ per share) on sales of \$126,125,817 vs. \$1,792,029 (76¢) on \$134,204,988 in same 1956 period. For all 1956, earnings were \$1,037,274 (44¢) on sales of \$182,046,168, both lowest since 1950.

Distribution reorganization move by GE converts all General Electric Appliance Co. (GEA) branches and TV-appliance depts. of GESCO branches to district offices of a new unit—sales & distribution dept. of the appliance & TV receiver div. Move, designed to speed communications between production and field, is basically a change in method of reporting and change in nomenclature, GE says. Pat A. Tilley, formerly pres. of GEA, becomes gen. mgr. of new dept. with headquarters at Louisville; R. C. Hawley, formerly mgr. of GESCO appliance & TV dept., mgr. of western districts; W. D. Dance, former GEA sales mgr., mgr. of eastern districts. GEA branch mgrs. become sales & distribution district mgrs. Physical structure of distribution remains the same. L. G. Hertzler will contact independent distributors. Radio and small appliances will still be distributed through GESCO, with headquarters in Bridgeport, Conn.

Christmas-inventory furloughs were started this week by most TV plants, greatest number of employes affected being 4800 at RCA Bloomington & Indianapolis TV & tube plants. Spokesman said Bloomington plant would be closed one week, Indianapolis 2, emphasizing this was not a layoff or reduction in force. Westinghouse laid off about 400 at Metuchen, N. J. TV-radio plant, attributed partly to season, partly to soft sales.

Consent judgment has resulted in dismissal of patent infringement suit by Kay-Townes Antenna Co. against Channel Master Corp. which will continue to make conical-yogi antennas under license from Kay-Townes.

Westinghouse Ups Executives: Westinghouse Electric Corp., its 1957 sales at all-time peak of about \$2 billion and anticipating "even higher in 1958," changes presidents as of Jan. 1—48-year-old exec. v.p. Mark W. Cresap Jr. ascending to that post while chairman-pres. Gwilym A. Price remains as chairman. Cresap has been with Westinghouse since 1951 when he became v.p. & asst. to the president after conducting a management survey for his then firm, Cresap, McCormick & Paget. Price, 62, has been pres. since 1946 and pres.-chairman since 1955.

E. V. Huggins, 50, to whom the broadcasting, defense products plant at Baltimore and international subsidiaries and the law, tax, patent & secretary's depts. continue to report, becomes v.p. & chairman of executive committee changing title from v.p.-corporate affairs and secy. He's a lawyer, formerly with Cravath, deGersdorff, Swain & Wood, who joined Westinghouse in 1943 after serving 2 years as Asst. Secy. for the Air Force.

John K. Hodnette, v.p. & gen. mgr. since 1955, becomes exec. v.p.; George G. Main, v.p.-finance & treas.; Francis E. Dalton, controller; Carlisle P. Myers, gen. counsel since 1955, corporate secy. in addition to gen. coun-

sel; Russell B. Read, asst. treas. as well as planning director.

Executive committee comprises Price, Cresap, Huggins. As operations head, exec. v.p. Hodnette continues to have reporting to him Chris Witting, v.p. consumer products group (all appliances, distribution, tubes, semi-conductors); A. C. Monteith, v.p. apparatus products; Wm. Sproul, v.p. industrial products; Charles Weaver, atomic products.

A major contractor in nuclear fields, big producer of heavy duty electrical and electronic apparatus, Westinghouse is also an important factor in broadcasting, owning 5 TV & 7 AM stations—highly successful properties headed by Don McGannon. He was formerly a colleague of Witting's when latter headed DuMont Broadcasting Co.

In year-end statement this week, Price had this to say about consumer lines: "Prospects for improvement in the consumer products field are hinged to a modest increase in residential construction and the continued rise of personal consumption expenditures even though the rate will not be as rapid as in the past several years. Consumer acceptance of radical new designs in appliances helped to reverse a year-long slump in appliance sales in the late summer of 1957 and since then sales have shown gains over comparable months of 1956."

Topics & Trends of TV Trade: Shipments of TV's to dealers totaled 4,873,819 in year's first 10 months, when production was 5,251,158 and retail sales 5,024,670, according to EIA state-by-state report. They compare with shipments of 5,433,750, production of 6,080,052, retail sales of 5,287,199 in first 10 months of 1956. Oct. shipments were 624,044 vs. 789,675 in Sept. and 843,508 in Oct. 1956. Here's 10-mo. report:

State	Total	State	Total
Alabama	68,690	New Jersey	174,330
Arizona	30,544	New Mexico	18,122
Arkansas	42,724	New York	561,991
California	472,389	North Carolina	96,821
Colorado	39,636	North Dakota	17,134
Connecticut	78,933	Ohio	273,385
Delaware	11,763	Oklahoma	55,753
District of Columbia	51,146	Oregon	48,050
Florida	170,836	Pennsylvania	344,042
Georgia	96,365	Rhode Island	26,182
Idaho	14,839	South Carolina	37,992
Illinois	297,702	South Dakota	18,604
Indiana	124,930	Tennessee	81,113
Iowa	56,571	Texas	254,212

DISTRIBUTOR NOTES: Sylvania appoints Peninsular Distributing Co., Detroit, replacing Wholesale Appliances Inc.; Allied Distributing Co., Omaha, replacing Wright & Wilhemny Co. . . . Motorola appoints Ray Distributing Co., Savannah, for southern Ga., replacing Rex Distributing . . . Peirce-Phelps, Philadelphia (Zenith) names Richard Woltemate to head new electronics div. . . . Graybar promotes E. A. Droegemueller to branch house financial mgr. at Phoenix, in Los Angeles district; P. E. Miller to branch house financial mgr. at Louisville, in Cincinnati district . . . W. R. Light Co., N. Y. (Harman-Kardon) names Gregg Edelhelt, ex-Norge, to new post of sales mgr. . . . Legum Distributing Co., Baltimore (Philco) names Jules Resnick, ex-Allied Appliance Distributors, to new post. of exec. director of sales & marketing.

Trade Personals: Don G. Mitchell, chairman & pres. of Sylvania, elected a director of ACF Industries . . . Ross Siragusa, pres. of Admiral, leaves in latter Jan. for survey of Admiral's foreign plants, plans to spend 2 weeks each in Italy, Mexico, Australia . . . Henry T. Heald, Ford Foundation pres., elected an AT&T director succeeding Myron C. Taylor, resigned after 28 years . . . John C. Maxwell, of Tucker, Anthony & R. L. Day investment house, elected a director of General Precision . . . Robert T. Campion, ex-Alexander Grant & Co., Chicago, named Siegler Corp. secy. . . . Floyd I. Makstein, ex-Emerson, named national service mgr., Steelman phonograph & Roland radio divs., Herold Radio & Electronics Corp. . . . Gerald R. Sauer named to new position as mgr. of RCA's SAGE powerhouse operation at Topsham, Me. . . . Ralph M. Lane, ex-Admiral, named RCA eastern regional rep, color TV market development, replacing George P. O'Brien recently named district sales mgr. in northeastern region (Boston) . . . Harold M. Johnston, treas. of Spartan Corp., also elected v.p.

Frank M. Folsom, ex-pres. and now chairman of exec. committee of RCA, named by Gov. Harriman as chairman of Saratoga Springs Commission, non-salaried board of 12 on which he has sat for several years. Commission operates mineral springs, hotel, recreation center, etc.

Canadian TV sales by distributors to dealers were down for Oct. & 10 months. RETMA of Canada reports 70,537 in Oct. vs. 86,778 last year; 365,875 for 10 months vs. 498,340 in 1956. Sales by provinces: Ontario, 24,767 for Oct. & 135,973 for 10 months; Quebec, 16,960 & 101,249; British Columbia, 7292 & 32,599; Alberta, 6359 & 28,301; Manitoba, 4879 & 23,417; Nova Scotia, 3163 & 15,859; Saskatchewan, 4383 & 15,191; New Brunswick & Prince Edward Island, 2313 & 10,551; Newfoundland, 421 & 2745.

DuMont licenses Electrical Products Mfg. Co. Ltd. of Mount Royal, Que., to manufacture & sell TV sets, radio & hi-fi. Company has 100,000 sq. ft. plant at 5785 Pare St., will continue making its own Fleetwood TV, radio & hi-fi.

AMERICAN BROADCASTING-Paramount's little-publicized hedges into the higher dome electronic fields (NBC has its parent RCA, of course, and CBS labs div. has been quietly branching out into govt. and other contracts under pres. Peter Goldmark) is by way of interests in Microwave Associates Inc. and Technical Operations Inc., both of Burlington, Mass. Both are small companies but apparently doing fairly well, according to research report prepared by Carl M. Loeb, Rhoades & Co., which also handled recent DuMont banking.

Microwave Associates makes precision components for microwave radio apparatus, including magnetron & duplexer tubes, silicon diodes, wave guides, transistorized power supplies. AB-PT owns 121,000 of its 409,000 outstanding shares, or 29%, about same as holding of Western Union, acquired at \$8 per share. Revenues for year ended Sept. 30, not disclosed, are reported in excess of the \$2,300,000 of fiscal 1956 but earnings are down from that year's 38¢ per share, due largely to shift to larger plant.

Technical Operations Inc., with about 22% of its 231,000 shares of stock also held by AB-PT (same by Western Union) and acquired at \$6 per share with options to build holdings to 25% each, does govt. electronic & nucleonic research, war gaming & logistic planning for military, with emphasis on nuclear weapons. Manufacture accounts for only about 10% of its revenues, which were \$2,200,000 for year ended Sept. 30 with earnings of 17¢ per share. Current fiscal year's revenues are expected to expand to \$3,000,000, earnings to 50¢. Principal products now are industrial radiography machines (a type of X-ray) and, through Power Sources Inc., owned 50-50 with Microwave Associates, transistorized power supplies.

Note: Reports on these and 6 other unlisted so-called "applied science" stocks—Airborne Instruments Lab, High Voltage Engineering Co., Taylor Instrument Co., Midwestern Instruments (which recently absorbed Magnecord), Sanders Associates, Magnetic Amplifier Co.—are available from George P. Edgar at Carl M. Loeb, Rhoades & Co., 42 Wall St., N. Y.

Siegler Corp., which recently took over Olympic Radio with merger of Unitronics Corp., and which also has Bogen-Presto and Hufford Corp. as subsidiaries (Vol. 13:37, 38, 39, 47), has applied for listing of its 1,714,339 shares on the N. Y. Stock Exchange; it's now listed on American Stock Exchange.

Transitron Inc. and Insuline Corp. of America, Manchester, N. H. subsidiaries of Van Norman Industries Inc., have been joined into single electronics div. under Samuel K. Lackoff, head of Transitron.

Columbia Pictures lost \$425,000 in quarter ended Sept. 28 vs. net income of \$843,000 (71¢ per share) in 1956 quarter.

Dividends: Packard-Bell, 12½¢ payable Jan. 25 to stockholders of record Jan. 10; Muter, 5% stock Jan. 15 to holders Dec. 31; Avco, 10¢ Feb. 20 to holders Jan. 29; Boston Herald-Traveler, 4% stock Jan. 15 to holders Dec. 24; Howard W. Sams, 12¢ plus 12¢ extra, both Jan. 25 to holders Jan. 15; Daystrom, 30¢ Feb. 14 to holders Jan. 27; General Dynamics, 50¢ Feb. 10 to holders Jan. 10; American Cable & Radio, 30¢ Jan. 28 to holders Jan. 3; Columbia Pictures, 2½% stock Jan. 30 to holders Dec. 30, cash dividend omitted.

Gross Telecasting Inc., operator of WJIM-TV, Lansing, Mich. (Ch. 6) with radio WJIM, had net income of \$156,277 (39¢ per share) for quarter ended Sept. 30 as against \$176,714 (44¢) for same 1956 quarter. Net for 9 months was \$502,003 (\$1.26) vs. \$599,515 (\$1.50). Total sales are not reported until annual report, nor is there breakdown between TV & radio. Firm is one of few single-station entities whose stock is publicly traded, 193,000 shares of common out of 600,000 authorized having been sold at \$15.75 in 1954 with pres. Harold Gross retaining 7000 shares and holding all 200,000 B stock. Latest annual report showed 1956 total revenues of \$2,815,408, net earnings of \$741,926 (\$1.85) vs. \$2,607,530 & \$724,947 (\$1.81) in 1955 and \$1,973,031 & \$639,464 in 1954. [For report on previous sales & earnings, see p. 14, Vol. 13:12.]

Litton Industries' stockholders have approved increase in authorized common stock shares from 2,000,000 to 3,500,000, issuance of 16,000 shares of new voting preferred stock with \$100 par value, to cover purchase of Monroe Calculating Machine Co., Aircraft Radio Corp., Maryland Electronic Mfg. Corp. (Vol. 13:42) and possible other acquisitions in Litton's long-range plans. Pres. Charles B. Thornton said sales would be divided evenly between industrial-commercial and military, with military probably showing faster growth in immediate future.

Hewlett-Packard Co., Palo Alto, Cal. maker of TV & FM monitors and test equipment and other electronic instruments, earned between \$2,100,000 and \$2,400,000 (70-80¢ per share) in year ended Oct. 31, according to pres. David Packard in Dec. 17 *Wall St. Journal* interview. Its business rose to \$27,900,000 from \$20,161,621 in preceding fiscal year, and current year, with govt. contracts running about 25%, is expected to be "relatively good." Mr. Packard and v.p. Wm. R. Hewlett own 88% of 2,700,000 shares outstanding.

National Theatres Inc., which is buying WDAF-TV & WDAF from *Kansas City Star* for \$7,600,000 (Vol. 13:47-48), earned \$2,266,096 (84¢ per common share) in 52 weeks ended Sept. 24 vs. \$4,648,037 (\$1.72) in 53 weeks of fiscal 1956. Gross revenues for 1957 fiscal year were \$58,927,856 vs. \$59,707,251. Profit for 1956 included \$2,370,803 (88¢) net gain on sale of Roxy Theatre, N. Y. Earned surplus Sept. 24 was \$22,046,443. Controlled subsidiaries operate 313 theatres, closed 31 during year.

Hal Roach Productions, one of last of privately-owned Hollywood movie firms, plans to open stock to public. Underwriters led by S. D. Fuller & Co. will offer 375,000 shares of \$3 common stock. Operating old Hal Roach studio at Culver City, Cal., company is heavily in production of TV film series & commercials, syndication of library.

Philips Electronics Inc., formerly A. Hollander & Son Inc., earned \$260,937 (29¢ per share) on sales of \$4,844,166 in 9 months ended Sept. 30 vs. net loss of \$451,317 in 1956 period (total 1956 sales were \$2,671,376). Oct. earnings were \$97,901 on sales of \$1,270,203.

Channel Master Corp. reports \$459,839 contribution to employes profit sharing retirement fund, bringing fund total to \$2,316,916 in 6 years. Company contribution amounts to 15% of annual earnings of each of more than 700 now in employe-owned plan.

Trav-Ler reports net loss of \$104,000 on sales of \$7,842,000 in 6 months ended Oct. 31 vs. net loss of \$42,000 on \$5,960,000 sales in 1956 period.

Topp Industries earned \$248,348 (35¢ per share) on sales of \$5,803,531 in 6 months ended Oct. 31 vs. \$84,888 (18¢) on \$2,870,428 sales in 1956 period.

Plans for Arbitron: In wake of this week's showing of ARB's "Arbitron" instant rating system (Vol. 13:50), director James W. Seiler reports "tremendous number of people saying they are ready to place orders"—but says he doesn't want to accept orders for national service until Feb. 1 starting target.

Cost of New York area service will range from \$850 to \$2700 per month—and Seiler expects to be taking orders within week, service to start in first week of Jan. when telephone company probably will have 250 of 300 sets hooked up.

Present plan is to have local services in N. Y., Chicago, Los Angeles. National sample will cover N. Y., Chicago, Philadelphia, Baltimore, Washington, Cleveland, Detroit. Results in each city will

be gathered in central point via telephone line connections, then transmitted to N. Y. on less expensive teletype line. Within year, Seiler says, he expects to have rural areas hooked into system.

Seiler expects to set up special package for agencies or others wanting only rating for one show—or for one week of month. Also in works is equipment which will give cumulative ratings, showing who is watching what station and supplying viewer's buying habits by previous inventory.

ARB's total investment when system is working in 8 cities will be about \$750,000—no outside investors. System will be extended to other markets when ARB finds customers. However, Seiler emphasized he's "still very fond of the diary method of ratings" which ARB has in 141 cities.

Transatlantic TV Cable: C. O. Stanley, chairman-managing director of Britain's big Pye electronics combine and a director of commercial TV programmer Associated TV Ltd. (ATV) wants British & Canadian Govts. to finance undersea TV cable from Britain to Canada, which he says "could pay its way by the sale of live programs which would be linked with advertising" and could carry telephone conversations during non-programming hours. He said cost would be about \$42,000,000 and cable could be operative by 1962. He made proposal in address to Canadian trade delegation in London. He said he would recommend it to British Govt.'s TV Advisory Committee, of which he is member. "It is a matter for the Postmaster General and the British & Canadian Govts.," he said. "Reception of U. S. TV has probably done more to swing Canadian trade from Britain and towards America than any other single factor."

Important role in writing so-called Gaither Report, top-secret document which warned President Eisenhower of U. S. military deficiencies as compared with Russia, was occupied by Sprague Electric Co. chairman Robert C. Sprague, long one of electronics industry's statesmen. When Gaither Committee's initial chairman, H. Rowan Gaither, became ill, report was completed under co-chairmen Sprague & Wm. C. Foster, of Olin-Mathieson Chemical Corp. Other electronics industry figures on committee were Bell Labs' Robert C. Prim, Airborne Instruments Labs' Hector R. Skifter and MIT's Prof. Jerome B. Wiesner. Committee's 11-man advisory panel included: Westinghouse's Adm. Robert C. Carney (ret.), Bell Labs' Mervin J. Kelly & James B. Fisk, MIT's James R. Killian Jr. (later named President's Scientific Advisor), U of California's Ernest O. Lawrence and CBS's Frank Stanton.

New British commercial TV program contractor—the 8th to be franchised by ITA—will be group representing national *Daily News Chronicle*, film producer Sydney Box and group of British business men. New group will handle programming for new ITA station to be built at Burnhope in northeast England in late 1958. Meanwhile, non-commercial BBC Dec. 18 opened first TV station serving Northern Ireland, 1-kw outlet at Londonderry.

Ad Taxes Defended: Special municipal taxes on TV-radio & other advertising are valid exercises of city's levying power, City of Baltimore contended this week in court defense of 6% assessments scheduled to become effective Jan. 1 (Vol. 13:45-50). Asking Md. Circuit Court Judge Edward Harlan to throw out 14 suits by broadcasters & newspapers which seek injunction against taxes (4% on ad sales, 2% on media ad receipts), city attorneys argued that they aren't discriminatory or oppressive, don't violate free-press provisions of U. S. Constitution & Md. Declaration of Rights. Hearing on issues probably will be held after first of year. Meanwhile, St. Louis alderman Alfred I. Harris told United Press he planned to introduce similar tax ordinance there Jan. 4, although he's won little political support for proposal over quiet opposition by local admen.

Ad volume of \$11 billion—gain of 6% or more than \$500,000,000 over 1957—will be reached in 1958, publisher Eldridge Peterson of *Printers' Ink* predicted this week in speech to American Marketing Assn. in Philadelphia. He said advertising will continue its upward trend despite leveling-off or decline in general business foreseen for next year by many economists. Many manufacturers will maintain high ad budgets as stimulant, he said. Peterson repeated earlier estimates that 1957 volume will total around \$10.4 billion, up 5% from 1956, and that TV will show 6% increase, network & spot radio 28%, newspapers 5%, magazines 3%. Article in Dec. 20 *Printers' Ink* warns, however, that "There will have to be more selling to keep advertising high in 1958."

CBS News & Public Affairs dept. is becoming plain CBS News—probably with CBS Inc. divisional status and separate budget—in move by network to emphasize identity of operations under v.p. Sig Mickelson. New accounting setup for news, sports, public affairs & special events under shortened name is expected by CBS to help underscore network's public service programming.

Conelrad weather warning (Vol. 13:49) got first use this week when KMOX, St. Louis, one of idea's originators, used system for tornado—"very effectively," according to FCC Conelrad engineers.

SUMMARY-INDEX OF THE WEEK'S NEWS — December 28, 1957

FIRST PAY-TV APPLICANT is Philadelphia uhf grantee. Congressional showdown assured as Harris blasts toll TV, sets hearing for Jan. 14 (p. 1).

NEARLY 3200 AMs, 537 FMs on air as year ends. Nearly 150 new AMs authorized in 1957. Radio stations now far outnumber daily & Sunday papers (p. 2).

CLOSED-CIRCUIT TELECASTING, for business & educational meetings, was \$2,500,000 business in 1957; rise to \$10,000,000 seen by 1960 (pp. 2 & 4).

TWO UHF's START as one goes off—WMBD-TV, Peoria, beginning; WBLN, Bloomington, Ill. resuming; WNAO-TV, Raleigh, dropping out (p. 6).

INSTANT NIELSEN pilot rating system has been operating in Chicago "for some time," but no specific proposals are being made to clients now (p. 8).

Manufacturing-Distribution

RCA SALES exceed \$1 billion for third straight year; profits expected slightly under 1956, due to softer economic conditions in 4th quarter (p. 9).

ELECTRONICS' DEFENSE ROLE stressed by RCA's Gen. Sarnoff, EIA's Dr. Baker. \$24 billion industry volume foreseen for 1967 (p. 10).

ESTIMATES OF 1958 TV set sales running from 7,000,000 high to 6,000,000 low with agreement first half will be slow (p. 10).

TV INVENTORIES at year end seen better than 1956 by GE officials, who predict 75% rise in transistor market, doubling of closed-circuit in '58 (p. 13).

FOREIGN TV-RADIO production spotty—continued progress in West Germany, USSR, Argentina (p. 12).

HARRIS BLASTS TOLL TV; APPLICATION FILED: Even as FCC received first application for trial pay-TV operation. Congressional showdown on issue was assured this week when Chairman Harris (D-Ark.) of House Commerce Committee loosed a blast at fee TV and set Jan. 14 hearings on anti-toll bills.

Harris put himself on record for first time in interview filmed by KNOE-TV, Monroe, La., in which he blasted FCC as "derelict" in its duty for "dilly-dallying" on pay-TV issue, and said he was now convinced that issue should be decided by Congress, that toll TV "would destroy the free use of the spectrum and make a utility out of the industry," that there's no provision in law to permit FCC to "establish rules [adequately to] control such a procedure." He said he hoped for Congressional action by March.

By filing first pay-TV application with FCC, uhf grantee WSES, Philadelphia (Ch. 29) not only reaps harvest of publicity but feels out Commission's exact requirements for other prospective applicants. Because Commission says it won't grant any pay-TV go-ahead until March, there'll be plenty of time to pore over this week's filing.

WSES says it will use Skiatron system—but it hasn't reached agreement with Skiatron (Matty Fox), is still negotiating. For program material, it plans to emphasize sports. So far, it has agreement only with Philadelphia Warriors pro basketball team, reports it's negotiating with Phillies baseball club, Eagles football team, U of Pa., Villanova U, Temple U, St. Joseph's College, LaSalle College. It has had "exploratory conversations" with movie distributors, opera companies, symphonies, legitimate theatres and "other organizations" which can provide "spectaculars." No commercials are planned.

Applicant proposes to go it alone—own the decoders, maintain them itself, handle decoding card arrangements, etc. It hasn't yet made any agreement to buy decoders and other equipment.

Principals, said to be well heeled, are: Wm. L. Jones, pres., 57 1/7% owner, coal business; Isadore B. Sley, treas., 28 4/7%, parking lots & garages; Murray Borkon, v.p., 14 2/7%, once sought foothold

in community antenna business. He acts as the TV "consultant" to the other principals of the firm.

Applicant proposes to supply subscribers with either decoder or combination uhf converter-decoder—depending on whether set is uhf-equipped. "Nominal" charge for installation is planned.

Intention is to charge \$30 annually to home subscribers, \$100 to commercial establishments for basic sports schedule—plus \$1 & \$5, respectively, for "special events." Goal is 300,000 subscribers.

Applicant has had uhf CP since March 28, 1956, never started construction, presumably had been waiting for subscription-TV green light.

AMs ON AIR NOW NEAR 3200, FMs ALSO RISE: Phenomenon of the current broadcasting structure is not only the upsurge in radio business but the continuing increase in the number of AM & FM stations. They now outnumber daily and Sunday newspapers by a wide margin.

Year now ending saw more than 150 new AMs start and 22 new FM station starters. These compare with 40 new TV starters, bringing end-of-year TV total to 521.

Actual radio figures are these, as recapitulated from data collected for our 1958 AM-FM Station Directory, now readying for mid-January publication:

AMs authorized at end of 1957 total 3289, of which 3180 are on the air and 109 are CP holders. Thus, every year since end of wartime freeze saw additions to the roster of authorized AMs: At end of 1956, total was 3140; 1955, 2941; 1954, 2782; 1953, 2644; 1952, 2516; 1951, 2410; 1950, 2351; 1949, 2246; 1948, 2131; 1947, 1961; 1946, 1579; 1945, 1056.

FM grantees total 588 as year ends, with 537 on air; year ago, total was 559 with 528 on air. Up to this year there had been constant dropoff in FM's—but only 17 FM licenses and 4 CPs were dropped during 1957 while 46 applications for new ones are pending.

[The 1958 AM-FM Directory, incidentally, not only lists all stations by states, frequencies & call letters but also lists all applications pending for new AMs & FM's. At end of 1957, there are 328 AM applications vs. 255 year earlier. Only 2 AM licenses and 10 CPs were dropped during year. In other North American countries, as shown by the Directory, there were additions: Canada's AMs went from 217 year ago to 231 now, Mexico's from 467 to 489, Cuba's from 141 to 146—all with addresses, etc.]

Practically no new daily newspapers have been started in recent years—indeed, there has been slight fall-off in numbers, though circulation has climbed. TV-radio competition is one major economic factor, no doubt, though enormous costs of publishing undoubtedly account mainly for the relatively static entries into the newspaper business. (Fact that 19 newspapers in 12 cities were involved in strikes last week betokens another big factor.)

There are 1751 daily newspapers in the U. S., English-language, their aggregate circulation about 57,000,000, plus 546 Sunday newspapers, circ. about 47,000,000, according to latest Editor & Publisher Yearbook. Canada has 96 dailies, 13 Sunday. In addition, there are 9413 U. S. newspapers in weekly category (which includes some semi- and some thrice-weeklies) and they have combined circulation of 21,765,000, according to latest N. W. Ayer Directory.

CLOSED-CIRCUIT TELECASTING—WHAT, WHO, HOW? How big is "meeting TV" or "private telecasting"? Who are its principal entrepreneurs and what is its potential?

"Meeting TV" or "closed-circuit telecasting" or "private telecasting" are terms used to describe application of TV to serve selected audiences in selected locations. It has been called, at various times, "theatre TV" (but most productions are no longer viewed in theatres), "large-screen closed-circuit" (but in some locations the events are still viewed on conventional sets) and "business-meeting TV" (but it's also used for education, fund-raising, science, etc.).

Small industry built up around "meeting TV" is centered on group of companies which handle closed-circuit meetings from production to operation of receiving sets. In 1957, best guess is that something less than \$2,500,000 has been spent on closed-circuit telecasting and that maybe \$750,000 of this

was actually taken in by the closed-circuit companies—remainder going to outside packagers, ad agencies, etc. There were some 35 multi-city events this year, beamed to as many as 130 cities.

Ten organizations which offer services in arranging closed-circuit telecasts are listed in our TV Factbook No. 25 (p. 408). To get size-up of this industry, we addressed series of questions to the 3 major companies actively promoting medium now and beating bushes for customers. They are:

(1) Theatre Network TV and its subsidiary TNT Tele-Sessions, headed by Nathan L. Halpern, former TV consultant to several theatre chains and onetime asst. to CBS pres. Frank Stanton.

(2) Teleprompter Corp.'s Group Communications div., under v.p. Wm. P. Rosensohn, who originally headed Box Office Television Inc., backed by Sid Caesar money, and later formed Sheraton Hotels' closed-circuit subsidiary, which was purchased late last year by Teleprompter (Vol. 12:49).

(3) Closedcircuit Telecasting System, whose pres. is Fanshawe Lindsley, former gen. sales mgr. of TNT Tele-Sessions. His new company, formed this year, is only one specializing in closed-circuit color.

We received detailed data from 2 of these, Halpern declining to participate.

As to ranking of the companies, it's safe to say that Teleprompter and TNT currently dominate the field. Though TNT has been in business since 1951, it appears to have been overtaken by Teleprompter in number of events and in dollar volume for 1957. CTS, with heavy financial backing, has just gotten started and hopes to make bid for leadership via color.

■ ■ ■

Offshoot of disappointing theatre-TV medium, "meeting TV" had first significant use in 1952, accelerating to 15 multi-city meetings in 1954 for such large companies as Ford, Dodge and Sealtest at total cost (staging, production, talent, AT&T lines, etc.) of about \$1,200,000. In 1955, dollar volume rose to \$1,700,000 (20 major meetings), in 1956 to \$2,000,000 (25).

Though first meetings were held in theatres—nearly 100 of them are still equipped for projection TV—locale soon shifted to hotels as more logical place to hold meeting of businessmen or salesmen, and one which could be used at any hour of day (theatres were used for business meetings mainly in mornings, before movie hours).

Portable projection TV equipment has steadily improved, and today Teleprompter, TNT & CTS own total of nearly 200 projection units (including 40 color projectors owned by CTS), which may be shifted from city to city as required. In addition, some hotels and other organizations own units which can be utilized. Picture size varies from 6x8-ft. to theatre-screen size.

What does a closed-circuit meeting cost? Both CTS & Teleprompter agree that good rule of thumb today for an average production on 20-30 city circuit is about \$2000 per city, including all costs (production, origination, transmission & viewing facilities). For color, CTS charges 15% premium. Virutally all business-meeting telecasts use network or station facilities and crews for origination.

Why hasn't medium grown at greater rate? Teleprompter's Rosensohn offers these answers:

Too few people know about it. "And the fact that it has been used by large companies—such as GE, Ford, Chrysler & U. S. Steel—has tended to discourage smaller companies." But even at present costs (\$4-\$8 per viewer), Rosensohn argues, it's "cheaper than bringing a group to a central point."

With greater use of medium, he adds, further economies can be realized on AT&T facilities, lowering costs considerably. He points to another factor not generally considered: A kinescope can be made at no extra charge—and entire telecast is usually cheaper than production of special film.

CTS's Lindsley thinks medium has been retarded because of unavailability of color. "You cannot," he adds, "present food, appliances, cars, packaged goods, fashion or even today's bathroom fixtures effectively in black-&-white. Nor is there any point in a company presenting its 4-color magazine advertising campaign in black-&-white."

What's the medium's future? Rosensohn predicts 1957 industry-wide gross of \$2,400,000 will increase to about \$4,000,000 in 1958 and \$10,000,000 annually by 1960.

"We are talking about more than a medium for sales meetings," he adds. "It can be—in fact, it has been—used for such important projects as fund-raising, education, changing a company's name and stockholders' meetings. Closed-circuit TV is, by and large, the most effective way for management to keep in touch with its field forces . . . It represents a substitution of transportation of ideas for transportation of men." [For further details of closed-circuit meeting business, see story below.]

More on 'Meeting TV': Closed-circuit telecasting (see above) had its roots in "theatre TV," the stunted offspring of an early mating of TV & movie industries. Nathan L. Halpern's Theatre Network TV (575 Madison Ave., N. Y.) was pioneer company in this medium which once had theatre owners envisioning Broadway extravaganzas, Las Vegas floor shows, Metropolitan Opera and outstanding sports events in movie palaces as boxoffice hypo. Except for an occasional championship prizefight and a Metropolitan Opera opening night, however, this dream was never realized.

Theatre owners once applied for exclusive theatre-TV frequencies, but after lengthy hearing FCC denied request in 1953, ruling that leased common carrier lines were adequate. Interest in theatre TV faded after that. However, 20th Century-Fox still occasionally holds showings of improved versions of its Eidophor color theatre-TV projector, which it hopes to develop to Cinema-scope proportions.

Though first TV meetings were held in theatres, development of good portable equipment made hotels a better location. Teleprompter (311 W. 43rd St., N. Y.) now owns 60 of General Precision Lab's newest black-&-white projection TV units, which produce pictures 9x12 to 15x20-ft. TNT is understood to have bought 10 of these, too, which it added to its 36 older portable GPL units and 25 theatre-type RCA & GPL units converted for portability.

Only company now offering color TV projection units in quantity is RCA. Closedcircuit Telecasting System (237 W. 54th St., N. Y.) has 40 of RCA's new compatible color receiver-projectors, which throw 6x8-ft. picture. Philips of Eindhoven, big Dutch electronics combine which produces optical system for RCA color projectors, has developed its own big-screen color unit which produces 9x12-ft. color picture. CTS has taken option on 10 of these.

* * * *

To stage closed-circuit meeting, it's not necessary to deal through one of the established companies in the field—but most closed-circuit users find it desirable. Companies such as Teleprompter, TNT & CTS and others can handle show from beginning to end—from engaging talent to installing projection receivers. Some of these shows are as elaborate as any telecast spectacular, featuring TV or film stars, especially composed music, etc.—all as window-dressing for introduction of new lines of appliances or autos, or a pep talk to salesmen.

Networks have offered closed-circuit services to outside (non-sponsor) companies, but they seem to be leaving this business. NBC, perhaps biggest in field, is understood to be discontinuing contract closed-circuit telecast activity Jan. 1.

As to costs, Teleprompter provides this breakdown of typical 20-city closed-circuit telecast: Origination, using 3

cameras and reasonably large studio—\$5000 ("extravaganza" production would range from \$8000-\$12,000). Intercity transmission via AT&T facilities, at \$1.25 per mi. per hour, for 6000-mi.—\$7500. Local loops, averaging \$500 per receiving location—\$10,000. Large-screen projection facilities, \$500 an outlet, including engineer & projectionist (40 outlets)—\$20,000. Closed-circuit company's fee (17.65%)—\$7500. Total cost for 20-city telecast—\$50,000.

Though other companies have staged closed-circuit colorcasts, Lindsley's CTS is first to specialize in color. His first intercity colorcast Dec. 12 for N. Y. Dental Society (originating at Washington's Walter Reed Hospital) was enthusiastically received and resulted in scheduling of 2 more medical closed-circuit color shows from Washington—Jan. 29 to Northwestern U Dental School and Feb. 8 to American College of Radiology convention in Chicago. CTS says it is now in active negotiation with 24 companies for telecasts in 1958.

Closed-circuit sales & management course, aimed at audience of 100,000 in 62 U. S. & Canadian cities, is scheduled March 4-6. It's second annual "Tele-Sell" (Vol. 13:7), to which has been added "Tele-Manage" course. Each of the 3 sessions will take 90 min.—7:15-8:45 p.m. local time, using video tape repeats for clock-time presentation in all areas. Courses will be presented in hotel ballrooms using portable projection TV receivers. Dealing heavily in motivational research as it applies to selling, course's tuition is \$6 per night. Tele-Sell is produced by Visuals div. of Communications Institute of America Inc. (Morris I. Pickus, chairman; John L. Shirley, pres.), 360 N. Michigan Ave., Chicago.

Subliminal TV Experiment: Elaborating on his comment to us 2 weeks ago (Vol. 13:50), BBC director of engineering Sir Harold Bishop supplies this account of subliminal perception experiment on British TV: "It is true that we did do an experiment in subliminal perception in a program called *A Question of Science* that was included in our TV program on 22 June 1956, 18 months ago. A film of ballet dancing was shown, during which a single field (lasting 1/25 of a second) carried a caption. The caption did not contain any rude words, as reported [in one U.S. advertising publication and dismissed in *Television Digest* as "adman's dream"], but merely the phrase 'Pirie breaks world record' . . . The evidence was not really conclusive in determining whether the perception was below the level of consciousness. The experiment was repeated on 6 July 1956, this time without warning to viewers. A small number of people wrote to say that they had seen something unusual, and 6 had in fact correctly read the caption on this occasion." Adds Sir Harold: "I hope this information puts the record straight."

TV news bulletin board: Closed-circuit TV system is used by *Berkshire* (Pittsfield, Mass.) *Eagle* to give running story of day's events to man in street. Camera in news-room scans printed bulletins on revolving drum, flashes them outside to 27-in. screen.

Necrology, 1957

Personal Notes: Philip Williams, ex-Ziv, named syndication sales v.p. of ABC Film Syndication . . . Ralph L. Atlass, gen. mgr. of radio WIND, Chicago, named Westinghouse Bestg. Co. v.p. for area . . . Dick Linkroum slated for promotion to head sales of NBC-TV special programs . . . Michael Lannon promoted to sales promotion mgr. of WRCA-TV & WRCA, N. Y.; Tony Kraemer named audience promotion mgr. . . E. Walter Evans retires as *Billboard* pres. after 52 years with the amusement industry publication; Wm. D. Littleford succeeds him . . . James R. Sefert, from WLWC, Columbus, named head of new Cleveland sales office of Crosley Bestg. Corp.; Juanita Wilcox rejoins WLWC as film director . . . Rev. Clayton T. Griswold, exec. director of TV-radio dept., Presbyterian Church in the USA, who was a leader in founding the Broadcasting & Film Commission of the National Council of Churches, retires from his post as of Jan. 1 for health reasons . . . L. Herschel Graves, managing director of Phipps stations, assumes management of WPTV, Palm Beach, Fla., succeeding late Stephen P. Willis . . . John Baldwin promoted to asst. mgr. of WTCN-TV & WTCN, Minneapolis . . . Ralph Renick promoted to v.p. in charge of news, WTVJ, Miami . . . Glenn Marshall Jr., pres. of WMBR-TV & WMBR, Jacksonville, elected Chamber of Commerce pres. there . . . Stanley Burke, ex-*Vancouver Sun*, named CBC correspondent at UN . . . Tom Tausig, ex-WTOP-TV, Washington, joins P. Lorillard Co. as asst. adv. director . . . Jo Ranson resigns as press & public service director of radio WMGM, N. Y. to join *Variety* TV-radio editorial staff . . . Ron Schafer, ex-radio KRE, Berkeley, Cal., joins KSAN-TV & KSAN, San Francisco, as merchandising & publicity mgr. . . Luella Cannam, ex-radio WVDA, Boston, opens own adv. & public relations firm, Cannam Co., at 900 Statler Bldg. there.

Consulting engineering firm of Vandivere, Cohen & Wearn, Washington, becomes Vandivere & Cohen (Edgar F. Vandivere Jr. & Jules Cohen, partners) with resignation of Wilson C. Wearn, who continues as asst. to pres. Robert A. Jolley of WFBC-TV & WFBC, Greenville, S. C. Vandivere returns to active consulting practice from Vandivere Labs Inc., which is being dissolved. New engineer in firm is Raymond P. Aylor Jr., ex-RCA lab chief at Andrews Air Force Base.

Gilbert L. Berry, gen. mgr. of radio WIBC, Indianapolis, is one of 25 "men of achievement in career and citizenship" who were football stars 25 years ago selected for "Silver All America" featured in Dec. 23 issue of *Sports Illustrated*. He was an All-American at U of Ill., later played with Chicago Cardinals.

New ITA chairman is Sir Ivone Kirkpatrick, retired Permanent Under-Secretary of State in British Foreign Office who was 1941-44 controller of BBC's European services. He succeeds Sir Kenneth Clark, whose 5-year term as chairman ended in Aug.

ADVERTISING AGENCIES: Harry W. Bennett Jr., ex-Bryan Houston exec. v.p., joins Joseph Katz agency as senior v.p., N. Y. . . Victor M. Ratner, a Benton & Bowles v.p., appointed communications & mass media consultant to NYU's general education div. . . E. A. (Tim) Elliott resigns as media director of Ogilvy, Benson & Mather.

Advertisers Service Assoc. is formed in Hollywood (1487 Vine St., Hollywood 4-7288) as TV & radio program, research, testing & publicity organization for agencies which lack branch offices in 11-state western area. Gen. mgr. is Herbert K. Landon, ex-Kenyon & Eckhardt.

GIVE PAUSE for some thought and prayers, dear readers, for your industry friends and professional acquaintances who passed away during the year now ending. These are the members of the TV-radio-communications and associated electronics fields who died during 1957, according to best available records:

- | | | |
|----------------------------|------------------------------|-----------------------|
| Edward A. Allen | Kenneth E. Greene | Percy J. Orthwein |
| Maj. Gen. James B. Allison | John F. Grinan | C. E. Palmer |
| Hoyt Andres | Hugh A. L. Half | Harry L. Palmer |
| Johnnie Andrews | Joseph R. Hamlen | Herluf A. Provensen |
| John Balaban | Ralph W. Hardy | Raymond S. Pruitt |
| Col. Sosthenes Behn | Art Van Harvey | Herbert Pulitzer |

Look Magazine's annual TV awards, presented on NBC-TV's *Perry Como Show* Dec. 28: best dramatic series, 60-min. or more, *Playhouse 90* (CBS-TV); dramatic series, 30-min., *Alfred Hitchcock Presents* (CBS-TV); dramatic show, "Green Pastures" on *Hallmark Hall of Fame* (NBC-TV); straight comedy series, *Jack Benny Show* (CBS-TV); situation comedy, *Phil Silvers Show* (CBS-TV); musical series, *Perry Como Show*; musical show, "Edsel Show" (CBS-TV); variety, *Steve Allen Show* (NBC-TV); novelty series, *Tonight* (NBC-TV); public affairs, *See It Now* (CBS-TV); religious series, *Life Is Worth Living* (ABC-TV); educational series, *Omnibus* (NBC-TV); children's series, *Disneyland* (ABC-TV); quiz panel series, *I've Got a Secret* (CBS-TV); sports & special programs, *World Series* (NBC-TV).

Contest rules for many awards offered in TV, radio, newspaper, magazine & industrial fields are compiled in *Honor Awards Handbook* published for \$5 by Milton L. Levy, Box 425, Berkeley, Cal. Loose-leaf index of contests includes sponsors, qualifications, entry categories, deadlines, prizes.

Station Representatives Assn. elects pres. Frank M. Headley of H-R Television Inc. and H-R Representatives Inc. as pres., Richard O'Connell of Richard O'Connell Inc. as secy. H. Preston Peters of Peters, Griffin, Woodward continues as v.p., Eugene Katz of Katz Agency as treas.

Advertising Federation of America sets up new govt. relations & legislative intelligence committee to work with FTC on voluntary "truthful advertising" campaign (Vol. 13:43). Chairman is Coca-Cola v.p. Felix W. Coste.

New and Upcoming Stations: Programming debuts of 2 uhf stations and demise of another bring on-air box score to 521 (90 uhf). Starters are WMBD-TV, Peoria (Ch. 31), which begins programming Jan. 1 with CBS-TV, and WBLN, Bloomington, Ill. (Ch. 15), which reports that it resumed operation Dec. 1 as independent. Going dark Dec. 31 is WNAO-TV, Raleigh (Ch. 28)—its CBS-TV affiliation taken over by WTVD, Durham-Raleigh (Ch. 11). Canadian on-air total is now 47, with CHCA-TV, Red Deer, Alta. (Ch. 6) reporting Dec. 1 debut.

WMBD-TV has 25-kw RCA transmitter and 500-ft. Ideco tower with 24-gain antenna at Faye Hollow Rd., E. Peoria. Studios are at 212 S.W. Jefferson St. in downtown Peoria. Owners: Charles C. Caley (66.67%), who also holds 38% of radio WDW, Decatur, Ill., and John E. Fetzer (33.33%), who also owns WKZO-TV, Kalamazoo (WKZO), KOLN-TV, Lincoln, Neb. and radio WJEF, Grand Rapids, Mich. Robert O. Runnerstrom is v.p. & TV director; Robert M. Riley Jr., from WMBD, sales mgr.; Douglas L. Sinn, regional sales mgr.; W. P. (Win) Baker, ex-KLFY-TV, Lafayette, La., program director; Gordon F. Max, ex-WREC-TV, Memphis, production mgr.; George Pyle, WMBD, chief engineer. Base hour is \$500. Rep is Peters, Griffin, Woodward Inc.

WBLN resumed after being dark since Feb. 7 except for brief return last May (Vol. 13:7, 26). Gen. mgr. Worth S. Rough now owns but 12%, having sold stock to refinance (Vol. 13:51). It's on air from 5:30 p.m.-midnight, hasn't yet signed with network. Willard A. Nichols, ex-Bloomington Firestone store, is sales mgr.; Warner Tidemann, ex-Bloomington radio WJBC, program director. Base hour is \$120. Rep is Jack Masla.

WNAO-TV, reporting \$650,000 loss to date, joined off-air WTOB-TV, Winston-Salem (Ch. 26) in petition supporting request for rule-making by Jefferson Standard Bcstg. Co., asking that Ch. 13 be substituted for Ch. 8 for its WBTW, Florence, S. C., Ch. 8 for educational Ch. 13 in Charleston, S. C., and allocation of Ch. 8 to Greensboro-High Point-Winston-Salem area (Vol. 13:49). Petition also asks that the WTOB-TV construction permit be modified to permit operation on Ch. 8—station to be taken over by new Southern Bcstg. Co. Inc., which will have both WTOB-TV & WNAO-TV as stockholders, along with others to be selected.

FM Conelrad? Use of FM stations for Conelrad alerting system in some 25 areas of country where present nighttime AM signal isn't satisfactory is being proposed in letter to stations by Comr. Robert E. Lee, who describes weather warnings (Vol. 13:49, 51) as "first peacetime use of Conelrad." Areas to use FM station midnight-6 a.m. are mostly rural: central U. S. from N. D. through Tex., northern Fla., N. C., S. C., north La. and Ark. Stations would receive weather information from local U. S. meteorologists. Lee also said he's been working with set manufacturers to build in device which enables Conelrad attention signal to alert sets which are left on with speakers muted. Device is said to cost manufacturers about 40¢, being made by RCA, Motorola, Miratel and others.

Rate increases: CKLW-TV, Windsor-Detroit, Jan. 1 raises U. S. base hour from \$1200 to \$1400, min. \$240 to \$280. WSJS-TV, Winston-Salem, Jan. 1 raises hour from \$600 to \$700, min. \$125 to \$140.

New rep: WFIE-TV, Evansville, Ind. to Raymer Jan. 1 (from Venard, Rintoul & McConnell).

CHCA-TV has 5-kw Canadian GE transmitter with standby Andrews antenna on 300-ft. Wind Turbine tower, plans shift next spring to permanent 2-slot coaxial antenna. G. A. Bartley is pres.-mgr. & principal owner; C. G. Harju, ex-radio CKRD, Red Deer, asst. mgr. & sales mgr.; Ray D. Torgrud, ex-CHCT-TV, Calgary, production supervisor; John Jonkman, chief engineer. Base hour is \$100. Rep is John N. Hunt.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KGHL-TV, Billings, Mont. (Ch. 8) is waiting for AT&T to furnish target for interconnection with network before it sets programming target, reports gen. mgr. Jeff Kiichli. It plans to wire 25-kw RCA transmitter early in Feb.; new RCA traveling wave antenna is ready on 417-ft. Ideco tower. Base hour is \$200. Rep is Young.

WJPB-TV, Fairmont, W.Va. (Ch. 35) now hopes to resume in Feb., reports managing director Numa Fabre Jr., for owner J. Patrick Beacom. It has moved 1-kw transmitter to Grant & Hill Sts. Construction of tower was held up by bad weather and further delay was occasioned while RCA fabricated new antenna. Base hour will be \$200. Rep will be Gill-Perna.

KUED, Salt Lake City, (Ch. 7, educational) has changed programming target to Jan. 10, reports mgr. C. Richard Evans for owner U of Utah. It has 5-kw RCA transmitter ready, and 6-section superturnstile antenna has been installed on 140-ft. Ideco tower. Studios on campus are to be ready in 2 weeks.

CHAB-TV, Moose Jaw, Sask. (Ch. 4) hasn't ordered equipment but hopes to start in mid-summer of 1958, reports gen. mgr. Sid Beyling for owner Mrs. L. A. Davis. Beyling, Jack Johnson, business mgr. and Merv Pickford, chief engineer, are from radio CHAB. Joe Lawlor will be sales mgr.; Jay Leddy, program director. Rep will be Television Representatives Ltd.

Move of WNHC-TV, New Haven (Ch. 8) was held up this week as FCC granted protest of WWLP, Springfield, Mass. (Ch. 22), ordered evidentiary hearing. WNHC-TV holds authorization to move transmitter from 9 mi. north of New Haven and 26.5 mi. southwest of Hartford to 19.8 mi. northeast of New Haven and 14.5 mi. south of Hartford—and increase antenna from 720 to 770 ft.

RCA shipped 3-V color film camera Dec. 19 to KSLA-TV, Shreveport, La.

Application for multiplexed stereophonic FM system was filed with FCC by Fordham U's WFUV-FM. Station seeks authority for multiplexing, but unlike multiplexing authorizations granted to date, both transmissions would be received by public. Under proposal, adapter would be required to enable listeners' FM sets to pick up sub-channel signal. WFUV-FM plans to present live and taped stereophonic music, using both transmissions; in addition, it hopes to present experimental dramatic programs and other cultural activities at same time as station's regular programs are on air.

Part 1 of FCC rules, governing practice & procedure, recently adopted (Vol. 13:50), was published in *Federal Register* Dec. 27—mail requests to be addressed to Supt. of Documents, Procurement Section, Box 1533, Washington 13, D. C.

Ban on TV-radio giveaways in Canada (Vol. 13:40) is expected to be voted by CBC directors at Feb. meeting. Proposed rules would permit programs involving skill in which contestants participate at station studios.

Wisconsin Transfer Deal: The Morgan Murphy interests (*Superior, Wis. Telegram*) acquires 55% control of WMBV-TV, Marinette-Green Bay, Wis. (Ch. 11) in deal filed with FCC this week involving \$211,000 cash to present stockholders plus assumption of \$360,000 obligations. Station has had operating losses totaling about \$200,000 since founded in 1954, has expansion plans under new ownership which also controls WEAU-TV, Eau Claire (Ch. 13), is affiliated with WISC-TV, Madison (Ch. 3), both having adjuncts, and which owned old KGTW, Des Moines (Ch. 17), 1955 uhf casualty (Vol. 11:15). In new setup, pres. W. E. Walker surrenders 50%, reacquires 5%; gen. mgr. Joseph D. Mackin sells 23.3%, acquires 5% with option on Walker's 5%; Walter C. Bridges and Norman Postles, identified with Murphy group, 10% each; Charles Goldberg, Marinette clothier, 7½%; John Stang, Marinette, auto sales & trucking, 7½%. Mackin continues as gen. mgr., reporting to Bridges, who operates WEBC, Duluth, and Mackin and Walker retain their control of radios WBEV, Beaver Dam, Wis. and WRRR, Rockford, Ill. [For Morgan Murphy TV-radio-newspaper interests, see *TV Factbook No. 25*, p. 366.]

Reports of Radio Station Sales: WLEX, Lexington, Ky. by J. D. Gay Jr. & H. Guthrie Bell for \$255,000 to Roy B. White Jr., ex-adv. consultant (R. C. Crisler & Co.) . . . KFOX, Long Beach, Cal. by Arthur B. Hogan for \$700,000 to Kenyon Brown & Kevin B. Sweeney . . . KBYE, Oklahoma City, Okla. by Albert Zugsmith and associates for \$180,000 to Kevin B. Sweeney, Glenn Griswold & F. F. Lynch . . . KJIM, Ft. Worth, by Earl Cullum, Jim Speck & Velma Collins for \$139,500 to Jimmy Stewart, Paul Taft of KGUL-TV, Galveston, Wm. D. Schueler of KBRZ, Freeport, Tex., Milton Underwood of KXYZ, Houston, and oilman F. Kirk Johnson, each 20% . . . WPIK, Alexandria, Va. 32% by C. C. Carlin Jr., J. B. Phillips & Elizabeth H. Hoffman for \$80,000 to Carl L. Lindberg, pres. & gen. mgr., who now owns 98.8%.

Frank Sinatra's Essex Productions Inc. this week bought 100% interest in Mount Rainier Radio & TV Bestg. Corp. (KJR, Seattle; KXL, Portland; KNEW, Spokane) from Mr. & Mrs. Lester M. Smith and Mr. & Mrs. Lincoln Dellar, each of whom owns 25%, for \$2,000,000, subject to adjustments downward. Smith will probably continue as gen. mgr. of stations.

Japanese Govt. has issued CPs for 43 new TV stations, bringing total authorized to 68. Of new outlets, 36 will be commercial, 7 operated by semi-governmental Broadcasting Corp. of Japan (NHK). Best-served areas will be Tokyo, with 6 channels, Osaka with 5. In next 2 years, Govt. hopes to have 108 stations in operation, with additional chains of satellites and boosters to fill in gaps later.

Sheldon Anderson, reentering broadcasting "after a much needed rest from worries" incurred in operating now off-air KAFY-TV, Bakersfield, Cal. (Ch. 29), this week bought radio KBMX, Coalinga, Cal. from Vernon J. Stedry & Jesse F. Tepner for \$30,000.

Propagation study covering Baton Rouge area has been turned over to TASO by Assn. of Maximum Service Telecasters; Wilkes-Barre report was first. Under way are measurements in Fresno and Madison areas; 5th project is planned for Columbia, S. C.

Two Canadian TV applications to be considered by CBC Board of Governors at Feb. 14 meeting in Ottawa are for Ch. 5, New Carlisle, Que. by La Television de la Baie de Chaleurs Inc. and for Ch. 6 satellite, Inverness, N.S. by CJBC-TV, Sydney, N.S. (Ch. 4).

TV headlines are sketched in *The NBC Book of Stars* (184 pp., Pocket Books) by N. Y. *Post's* Earl Wilson.

Telecasting Notes: First big group of post-1948 features to be sold to TV is understood to be contained in package of 218 movies & 15 serials sold by Republic Pictures to group of stations headed by NBC-TV owned outlets (excluding Chicago's WNBQ). Little is known about composition of package, sold for a reported \$3,500,000, but it's believed to contain large proportion of post-1948 features . . . United Artists-AAP combine (being challenged by NTA in courts) now reported to have inside track on Paramount pre-1948 feature backlog; United Artists' first TV series will be 39-episode 30-min. drama anthology, each episode to be produced by one of UA's theatrical producers . . . "Champagne Package," NTA's newest batch of 58 feature films, has been sold in 50 markets . . . Screen Gems expands European operations, enlarging London technical headquarters and opening Paris office . . . Biggest feature film sale to British TV, involving 100 Hollywood features—mostly RKO, and including some made as recently as 1955—has been concluded by Robin International (Nicholas Reisini) and BBC, for "well over \$600,000," reports Dec. 25 *Variety* . . . Bing Crosby has decided to do 26 filmed shows next season, most of them 30-min., to be filmed abroad—film company and network as yet unspecified, but sponsor expected to be Chesterfield . . . Another 60-min. live drama show, *Pursuit*, planned by CBS-TV for next season; to originate in Hollywood, "pilot" will be taped in Feb. . . . Mike Wallace's interview show, on kinescope, to be offered overseas by ABC Film Syndication, starting with 26 half-hour programs . . . Add TV success stories, as detailed in current trade journals: *Variety* profiles TenDay Press-On Nail Polish, "which emerged from the obscurity of a new product to become a \$10,000,000-a-year seller inside of 4 months, with a conservatively estimated 35% share of the nail polish market, all through TV." *Sponsor* devotes article to Maypo, maple-flavored hot oat cereal, which led listless existence until it pinned its identity to one-min. cartoon commercial, boosting sales 78%.

CBS-TV is chief culprit in minor baseball clubs' case against Sunday major league game-of-the-week telecasts (Vol. 13:49-51), International League pres. Frank Shaughnessy complained this week. Asserting several major clubs are on side of minors in their fight to save Sunday gates, he said they "realize what a televised Sunday game would mean to the minors." But "CBS has very little going for them on week-end afternoons. So they're trying to steal our market and meanwhile we can't sell TV & radio for our own games." Network has pointed out it plans to withhold Sunday telecasts from areas where minor clubs play home games, but Shaughnessy said minors' gates would suffer anyway.

TV business in Kenya can be surprising, Dec. 27 *Wall St. Journal* reports in account of how Hollywood producer Gross-Krasne is financing filming of new *African Patrol* series around Nairobi. One thing led to another after company helped local Barclays Bank with movie shorts to persuade natives to put money into bank instead of goat herds. Bank then made big loan to Gross-Krasne on favorable terms. British subsidiary using British actors & technicians has been set up, beating TV film quota system, saving labor costs. Gross-Krasne is settling down in Africa at 2 permanent studios. It expects return of "at least \$6000 per episode" on first series, which opens in Jan. on WJW-TV, Cleveland, and WAGA-TV, Atlanta.

Add mergers: Roche, Williams & Cleary Inc. and U. S. Adv. Corp., both Chicago, form Roche, Rickerd & Cleary Inc., taking former's offices at 135 S. LaSalle St. John Pierre Roche is chairman; C. E. Rickerd, U. S. Adv. pres., becomes pres. of merged agency.

Rating Business Bubbles: Following ARB's "Arbitron" demonstration, A. C. Nielsen spokesmen told us this week that they've been operating pilot run of their own wired instant rating system "for some time" in Chicago, but "are not now making any specific proposals to our clients."

Nielsen instant Audimeter system was first developed in 1946, they said, with results flashed to N. Y. and Chicago offices. "It was all ready to go except for money," they declared, adding that it actually ran for a year or so, but they found clients just couldn't afford telephone lines.

At week's end, Nielsen was still negotiating with networks for renewal of audience measurement research contract. NBC & CBS were both showing great interest in Arbitron system, but presumably as a supplement to the information of the type currently supplied by Nielsen. There was no doubt, at any rate, that ARB's announcement and demonstration of instant ratings last week was having impact on networks' negotiations with Nielsen.

In other TV research developments: (1) Pulse initiated new rating technique in Boston, based on average of 4 weeks in month, eliminating so-called "rating week." Pulse says new method will soon be used in all markets. (2) M. A. Wallach Research, N. Y., announced it plans new TV rating system combining telephone, personal interview and diary methods. (3) ARB stated it's starting work on 4th annual "A-to-Z" Metropolitan Area Coverage Study, listing viewing habits and station preferences in more than 200 markets; it's due for release in mid-March.

Convicts go for westerns, warden Maurice Sigler of La. state penitentiary at Angola has discovered. Committee of prisoners petitioned him to change one-night-per-week late TV-viewing privileges from Sat. to Tue. Reason: WBRZ, Baton Rouge, carries solid 9-11 p.m. Tue. schedule of westerns (*Sugarfoot, Cheyenne, Tombstone Territory, Colt .45*), whereas Sat. night schedule stresses music & gaiety. Warden granted permission for switch to shows in which law always wins.

Fifth national survey of TV sets in U. S. households is to be taken by Census Bureau Jan. 20-25 for American Research Foundation—with networks, NARTB & TvB picking up tab. ARF managing director A. W. Lehman says no decision has been made to produce county-by-county estimates on previous survey (Vol. 13:43), but "it is very probable" that results of Jan. survey will be used to derive county-by-county figures for 1958.

New science TV series, intended to dramatize technology & engineering in Sputnik era, is planned by veteran TV-radio producer Theodore Granik in cooperation with Research Corp., N. Y., top-drawer private organization in field of fundamental research. Year-long once-a-month series seeks rotating sponsorship by big companies whose commercials would be aimed at recruiting youth for science careers.

Antennavision Inc., Phoenix (Bruce Merrill, pres.) is surviving corporation, with merger of CTV Constructors Inc., Antennavision Mfg. & Engineering Co. and following CATV systems: Community TV System Inc. (serving San Manuel and Ray-Sonora), Clifton-Morenci Community TV Inc., Winslow-Holbrook Community TV Inc., Antennavision Inc. of Globe-Miami-Safford.

New TV review column for afternoon newspapers is offered by United Press as Mon.-thru-Fri. wire service. Written by Wm. Ewald, who had been doing TV-radio news column, "Television in Review" format will depend on night's viewing, column covering single show or several programs plus TV briefs.

Ziv's 1957 Gains: Sales by all divisions of Ziv Television Programs Inc. rose 53% above 1956 levels, while "every facet of Ziv's operations reached a new peak of activity," company announced this week in year-end statement. Exemplifying expansion of production activity was increase of production budget from \$8,000,000 in 1956 to \$12,500,000 in 1957 and an anticipated \$16,000,000 in 1958—accompanied by increase from 6 to 8 to an expected 10 series in production. Ziv gave this division breakdown of increased activity in 1957 over 1956: Syndication, sales up 57%, with multi-market sales up 73%; Economee TV (rerun) div., sales up 83%; national sales div., sales direct to national spot & regional advertisers up 33%; network sales up threefold (from one to 3 series); international div., sales up 120%. Ziv's sales force has been increased to 123 men this year, and total number of employees in all phases of Ziv operation now stands at 3300. Meanwhile, Ziv's radio transcription affiliate, World Broadcasting, noted that radio's resurgence increased its new business 21% over 1956, with renewal business up 17%.

NARTB year-end statement reports TV viewing increased 15-30%, highest percentage gain noon-3 p.m. weekdays, but largest audience—38,000,000 households—tuned 6 p.m.-midnight; average week had 38,000,000 families watching TV, up 4,000,000 from 1956—and average week's viewing time was 41 hours, 34 min. vs. 38 hours, 52 min. NARTB estimates total TV advertising in 1957 at \$1.284 billion, up 6% over 1956—networks accounting for 4.5% boost; national & regional spot, 10%; local, 5%.

All-color TV station in Havana, to be operated by Cuban TV-radio pioneer Gaspar Pumarejo (Vol. 13:36), now has set Jan. 12 as opening day. RCA-equipped outlet, Canal 12 TV, will have antenna atop Hilton Hotel, plans to specialize in "all kinds of news, interviews, entertainment and a daily New York report." Station's general representative & correspondent in N. Y. is Jose A. (Babby) Quintero, 205 W. 88th St.

Prime of prime hours on U. S. TV may be 9-10 p.m., but in Argentina that time segment's a complete dud, according to Argentina's Institute of Public Opinion, which finds TV viewing at its lowest ebb during that hour (6% of set owners). Best time, survey showed, was 7 p.m., just before dinner hour (percentage of sets in use unspecified).

Salaries of top management went up average of 5.1% in 1957 compared with 5.9% in 1956, according to American Management Assn. study of 35,000 executives of 3800 firms. Profits of these firms averaged 5% increase in 1957, were up nearly 25% in 1956.

It's official from next Wed., Jan. 1—reversion of name of National Assn. of TV & Radio Broadcasters (NARTB) to National Assn. of Broadcasters (NAB). First NAB board meeting of year will be at Camelback Inn, Phoenix, Jan. 19-24.

TV award-winning films in NAM's *Industry on Parade* newsreel series, shown now in 273 cities and telecast by USIA in 15 foreign countries, have been donated to Library of Congress.

Pay-TV system patent (No. 2,816,158), assigned to Zenith, has been granted to Myron G. Pawley, Alexandria, Va. & Jacob M. Sacks, Silver Spring, Md.

Pay-TV publication, scheduled to start Jan. 26, is *PAY-TV Newsletter & Digest*, 25 California St., San Francisco. Publisher is Edward J. Cory, editor Don Rico.

NARTB TV Code subscribers totaled 299 stations, all 3 networks, as of Dec. 15.

Clips from the Current Press—

(Digests of Noteworthy Contemporary Reports)

Higher 1958 ad budgets are forecast by 70% of top-bracket agencies—"contrary to widespread reports of a tough business year ahead"—according to Dec. 23 *Advertising Age*. Roundup of opinion by executives of agencies whose 1957 billings aggregate \$2 billion indicates "outlook is not as optimistic as it was last year," but that most expect increase of 2%-15% in ad expenditures. Budgets for next year are being set less firmly by consumer goods advertisers, however. They're "ready to cut back quickly if necessary."

Christmas TV debut by Queen Elizabeth II, whose speaking performances have been criticized in British press, won plaudits this week. Her holiday message on BBC was delivered in "easy, polished manner," British Press Assn. said. Even Lord Altrincham, who called Queen's style "pain in the neck" last summer, had no complaint to make. *Daily Express* thought she was "wonderful" on TV, but said BBC's production was "disgraceful business." *Express* suggested Hollywood professional should supervise Queen's makeup & dress in future.

"In 1958 we believe the tape recorder will become the center of the home music system," says ORRadio Industries pres. J. Herbert Orr, quoted in *Wall St. Journal* as attributing 1957 sales rise to \$2,260,000 from 1956's \$1,528,931 to growing use of magnetic tape for hi-fi reproduction. New \$500,000 plant at Opelika, Ala. will increase production capacity by 400%. Report for fiscal year ending next Feb. 28 will show earnings of about 37¢ a share vs. 28¢ preceding year.

Predictions for 1958 are featured in special marketing outlook section of Dec. 27 *Printers' Ink*, covering TV & radio, agencies, newspapers, magazines, govt. regulations, etc. Byline forecasters include pres. John Blair of rep John Blair & Co., who sees daytime TV growing, and Matthew J. Culligan, NBC v.p. in charge of radio network, who forecasts increase in network radio affiliates.

Agency names on doors don't necessarily mean they correspond with names of men who run the firms, Carl Spielvogel points out in Dec. 27 *N. Y. Times*. Founders of agencies often aren't around any more; their names are kept on for prestige & goodwill. Examples: Erwin Wasey, Ruthrauff & Ryan; J. Walter Thompson; Young & Rubicam; N. W. Ayer; Benton & Bowles; Kenyon & Eckhardt.

TV alone gained in general advertising in Oct. over Sept., according to monthly index in Dec. 27 *Printers' Ink*. Index as whole was down 3%, but network TV was up 6%. In other categories, network radio declined 5%, magazines 2%, newspapers 10%, business papers 3%, outdoor 4%.

Magnavox pres. Frank Freimann reports that sales for 6 months ending Dec. 31 are expected to be at record level, exceeding \$46,395,187 in 1956 period. He predicted "somewhat higher" profits over last year despite "disappointing" TV sales and below-expected volume in current quarter, "due primarily to a leveling off of general business conditions and to certain production delays which were encountered in the introduction of new TV and hi-fi phonograph models." But he expects higher net because of improved efficiency. He said that Magnavox will introduce new color set next year; that hi-fi shipments are running well ahead of last year; that inventories are below normal, mainly due to delays in production start of TV & hi-fi models.

Financial Notes: Higher sales, lower profits is picture painted by RCA chairman Brig. Gen. David Sarnoff in year-end report noting business volume exceeding billion-dollar mark for 3rd consecutive year. He estimated 1957 volume at \$1.180 billion but said "softening of general economic conditions in the 4th quarter and the highly competitive situation in the radio-TV industry now indicate that profits for the full year will be slightly below 1956." Earnings in 1956 were \$40,031,000 (\$2.65 per share) on sales of \$1.127 billion.

Gen. Sarnoff said RCA continued to lead in black-& white TV sales through 1957 and that "public bought more color receivers under the stimulus of increased programming, improved quality and nation-wide 'Carnival of Color' promotions." Color sales "have not as yet attained the desired volume," he declared, but "there is encouraging evidence throughout the country that a mass-market status for color TV is close at hand." In Dec. 1956 (Vol. 12:52), Sarnoff disclosed that RCA sold 102,000 color sets in year with factory billings of approximately \$58,000,000, net loss of \$6,900,000 after taxes—including all costs such as development, personnel training, advertising & promotion, programming, etc. No comparable figures were given for this year.

RCA report also said govt. business totaled 23% of firm's 1957 volume, with current backlog of about \$250,000,000; capital improvements for year were about \$35,000,000.

For 1958, Sarnoff said: "Based on present indications, we believe . . . total volume of business in the electronics industry will exceed the 1957 volume."

* * * *

Warner Points With Pride: Warner Bros. pres. Jack L. Warner—in annual report just distributed to stockholders—instead of bemoaning the encroachments of TV, makes special point not only of fact company has 35 feature films in preparation but that it is "broadening its activities to meet . . . an ever-growing demand for high quality TV film productions"—and pridefully lists ABC-TV series *Cheyenne* (GE), *Maverick* (Kaiser), *Sugarfoot* (American Chicle) and *Colt .45* (Campbell Soup) as its productions; also, that its year-old commercial & industrial film subsidiary is producing 4 one-hour science films for AT&T as well as TV commercials for some 75 companies, including Eastman, Lever Bros., RCA, GE, Kaiser, Kellogg's, Gillette, General Motors, Procter & Gamble. "As far as toll or pay TV is concerned," report states, "we are maintaining close watch on all developments in this unsettled field." Warners did better in both sales and earnings in fiscal year ending Aug. 31 than in preceding year (Vol. 13:49) but expects Nov. 30 quarter to show loss from operations "because of the decline in domestic and foreign film rentals." At Aug. 31, however, it was in strong financial position, with net working capital of \$40,956,000, including \$13,529,000 cash, book value going up to \$25.01 per share vs. \$23.96 in preceding year when net profit of \$15,295,000 (\$6.16 per share) from sale of old films was transferred to earned surplus which went up to \$49,040,451 as of Aug. 31, 1957.

Western Union earned \$10,750,950 (\$1.73 per share) on 11-mo. gross operating revenue of \$238,384,931 vs. \$11,518,289 (\$1.85) on \$230,385,099 in 1956 period. Nov. net income was \$725,451 on revenue of \$19,908,711 vs. \$1,186,193 on \$21,521,342 revenue year ago.

ELECTRONICS FACES SPACE CHALLENGES: Missiles, satellites -- and eventually space ships -- spell out vastly expanded role of electronics industry in new areas of control and communications, in view of 2 leading industry spokesmen, RCA chairman David Sarnoff and EIA pres. Dr. W.R.G. Baker.

In year-end statement, Gen. Sarnoff said "electronics and the technology of space propulsion form the keystone of our defense structure" and the American electronics industry "is equipped and ready to meet this challenge."

Sarnoff cited electronics industry 25-year growth "from virtually no place to fifth among American industries." He foresaw doubling of 1957 volume of \$12 billion in 10 years, listing these as prime growth areas: color TV, automatic systems, electronic components, nuclear research, atomic power. (For Gen. Sarnoff's report on RCA financial outlook, see p. 9.)

* * * *

Dr. Baker called attention to electronics' role in economy and defense, said industry is on threshold of "another era in which its role will be even more significant" -- emphasizing that missiles, satellites, etc. would be useless without reliable electronic instruments. He also pointed to TV's potential in education: "TV provides a ready and effective means for overcoming the shortage of teachers and bringing the best teaching talent to the greatest number of pupils."

Rise of military electronics procurement to about 50% of industry volume, Baker noted, means no decline in TV-radio business -- "but rather that the other segments of the industry have expanded more rapidly."

FACTORS IN ESTIMATING 1958 TV BUSINESS: Guesses on number of sets industry will sell in coming year are actually based on 5 factors:

- (1) How many of 45,000,000 sets-in-use will be replaced?
- (2) How many more of 46,000,000 wired homes will become multiple set owners? (About 11% now watch second & third sets.)
- (3) How many of 1,000,000 new homes expected to be built will include new TV?
- (4) How many of 1,000,000 families to be formed will create new set sales?
- (5) How many of 10,000,000 homes now without TV will buy their first set?

Of several schools of market guessing, 2 rely heaviest on replacement area. One expects 4,000,000 in replacement market; 3,000,000 from other areas. The second expects 5,000,000 in replacement & 1,000,000 elsewhere.

So far, high guesses are running at 7,000,000 units for 1958 sales; lowest at 6,000,000. Most others are in at 6,500,000 or a shade over. But there is tacit agreement among all schools that first half business will be poor and that all chips must ride hopefully on better-than-average upswing in second part of year.

* * * *

Production: TV set output was 116,296 week ended Dec. 13 vs. 109,339 the preceding week & 138,149 in 1956. Year's 50th week brought total to about 6,163,000 vs. 7,136,233 last year. Radio production was 373,322 (118,284 auto) vs. 387,597 (121,784 auto) the preceding week & 383,063 (181,553 auto) in 1956. Through 50 weeks, production totaled about 14,752,000 (5,274,288 auto) vs. 13,295,717 (4,721,266 auto) last year. Figures would indicate home radio production close to 10,000,000 for the year, highest since 1948. Note: EIA did not compile Dec. 20 figures due this week, explaining that too few manufacturers reported output.

Trade Personals: Wm. Balderston, Philco chairman since 1954, retires after 26 years with company; he was 61 on Dec. 13, said "the time is now opportune for me to complete my retirement program" . . . Ian F. McRae elected chairman of Canadian GE, succeeding Harold M. Turner who continues active directorship; McRae continues as gen. mgr. of Canadian GE's civilian atomic power department . . . Carl N. Reifsteck promoted to mgr., general quality control, RCA Victor TV div.; Bryce S. Durant named administrator of color TV coordination; James H. Hickey, administrator of black-&-white coordination; R. K. Sparks, administrator of profit improvement; all report to div. operations mgr. George K. Bryant . . . Max E. Markell promoted to eastern area commercial administration mgr. of RCA electron tube div. . . Percy L. Spencer elected senior v.p. of Raytheon, continues as mgr. of microwave & power tube div. . . Edward J. Quirk promoted to mgr. of CBS-Hytron Lowell (Mass.) semiconductor plant . . . Stanley Everett, Everett's TV & Radio, Alhambra, Cal. elected pres. of Electric League of Los Angeles, succeeding Edward G. Marten, WESCO . . . Eugene M. Kinney elected v.p. of Zenith Radio of Canada . . . James E. Brown named Ampex secy. and secy. & asst. treas. of subsidiary Ampex Audio Inc. . . Albert K. Fowler, ex-GE, named sales mgr. of Technical Appliance Corp. commercial & govt. antenna div. . . Harvey A. Ludwig, secy. of Tenna Mfg. Co., Cleveland, elected sales & adv. v.p.

Dr. Ernst Weber, native of Vienna, holder of many patents in microwave fields, elected pres. of Brooklyn Polytechnic Institute, where he has been acting pres. since death last June of Dr. Harry S. Rogers.

Obituary

Henry Wallace McCandless, 91, who worked with Dr. Lee deForest 1905-7 in developing what became the first 3-element tube, and who manufactured it until 1914 when he sold out to Westinghouse, died Dec. 24 in a nursing home at Dunellen, N. J. Surviving are 3 daughters, including Mrs. Margaret Carberry, of Johnson's Dr., N. Plainfield, N. J., with whom he lived.

Color TV sales on West Coast are better than most talk indicates, says Dec. *Electrical Merchandising*. Examples: Los Angeles dealer moving one color set to 50 black-&-white at average price of \$600 and 25% gross profit vs. 17-18% on black-&-white; big Seattle dealer moving 5-6 per month—one to every 10 black-&-white; key San Francisco account reports sales double this year but still at only 1-40 ratio; another, up 80%, ratio 1-25, gross of 30-33%. Stereo-hi-fi pitch by dealer-columnist Mort Farr in same issue of magazine urges dealers to start getting ready for this next go-round in sound-for-the-home. Farr ventures industry could be on brink of evolution which will obsolete records in few years; he predicts thinner, slower-speed tape which will give 8 hours of music on single threading of cartridge. Good system will cost customer \$500, he says, but warns that sales deterrent is floor salesman who doesn't know enough about loading of tapes and proper demonstration techniques.

Speakers at annual NARDA convention at Conrad Hilton Hotel, Chicago, Jan. 12-15, include: Willard H. Sahloff, v.p. & gen. mgr., GE housewares & radio div.; J. B. (Kip) Anger, national sales mgr., Motorola radio & phono div.; Carl L. Bixby, marketing mgr., Canadian GE appliance & TV dept. Among other speakers: George T. Moore, Asst. Secy. of Commerce; Lee Miller, pres.-elect of American Bankers Assn.; Fran Allison, TV-radio actress.

Electronics Personals: Paul R. Brousse named Western Electric mfg. v.p., succeeding Paul A. Gorman who joins N. J. Bell as operations v.p.; Charles D. Dugan replaces Brousse as v.p.-finance; Frank J. Hammel elected v.p.-controller, replacing Dugan . . . Russell W. McFall, ex-GE, named v.p. of Litton Industries & gen. mgr. of its Md. div., replacing Dr. Harvard L. Hull who resigned to become pres. of Nucleodyne Corp., subsidiary of Cook Electric in Chicago . . . Charles M. Heiden promoted to mgr. of research application dept., GE research lab, Schenectady . . . Frank L. Miller promoted to marketing mgr., GE power tube dept. . . . Adm. James F. Byrne (USN ret.) named director of material, Norden-Ketay labs div. . . Carl Neisser named manufacturing mgr. of Beckman Instruments systems div. . . . Frank Clarke, ex-Melpar, named military relations engineer, Texas Instrument semiconductor components div., with headquarters in Washington . . . Frank W. Lynch, ex-Northrop Aircraft, named engineering v.p. of Hallamore Electronics div. of Siegler Corp., succeeding John Burke, recently named exec. v.p.; Walter J. Krueel named v.p. & works mgr. . . . George E. Geyer & Dr. Joseph Seton Smith, both ex-Control Instrument, elected pres. and v.p. & treas., respectively, of All-Tronics Inc., Westbury, N. Y. . . . Murray C. Walker Jr., ex-Ace Electronics, named New England regional mgr. of DuMont military operations dept. . . . David A. Findlay, ex-*Electronics*, joins Ziff-Davis as editor of electronics annuals & directories . . . Nathaniel M. Marshall promoted to new post of assoc. director for sales of industrial products div. of General Precision Lab.

NAPA's Business Outlook: Lower level of general business in first 6 months of 1958 is predicted by 40% of National Assn. of Purchasing Agents' business survey committee, 40% see business holding even with 1957 period, 20% think it will be better. Majority feel some major strikes will deter 2nd-half pickup, 30% expecting whole year to be worse than 1957, 42% the same, 28% better. NAPA reports brisk retail sales, but 43% record poorer new order bookings—highest number since Jan. 1954. Group says production and employment are down, some prices have been cut to reduce inventories and meet competition. Meanwhile, Govt. reported Nov. consumer price index at record 121.6 of average 1947-49 prices, 0.4% higher than in Oct. and 6.1% higher than at start of spiral in Feb. 1956.

TV's estimated decrease in factory sales (off about 14%, according to EIA) for 1957 finds numerous parallels in major appliances. National Electrical Mfrs. Assn. this week projected white goods declines to year-end vs. 1956. Only bright spot is built-in ranges with plus of 10.4%. All other NEMA projections are off: standard ranges, -21.7%; refrigerators, -9.5%; freezers, -5.1%; water heaters, -8.1%; dishwashers, -2.5%; disposers, -9.8%; dehumidifiers, -18.2%. Laundry appliance figures from American Home Laundry Mfrs. Assn. go only for 11 months: automatic washers, -15%; conventional washers, -22%; dryers, -15%.

"Some easing" of Nov. general business activity from last summer's peaks is reported by Commerce Dept.'s Office of Business Economics in Dec. *Survey of Current Business*, calling declines modest, economy "currently functioning at high, near-record rates." Using 1947-49 as basic 100, Oct. TV-radio production was 282 vs. 312 in Oct. 1956; wholesale TV prices were 71.4 in Nov. vs. 69.9 in Nov. 1956, radio & phono, 93.2 vs. 91.1. TV production, including combinations, for Nov. was 562,600 vs. 680,000 in Nov. 1956; Nov. radio production preliminary total was 1,687,000 vs. 1,381,000.

Foreign TV-Radio Growth: Uneven expansion of TV in other countries is reflected in these recent reports—from State Dept., Commerce Dept., etc.:

(1) West German TV production this year is estimated at 850,000—exceeding early-in-year predictions.

(2) Argentine assembly of sets, including many imported components, is expected to total about 42,000 this year vs. 12,000 in 1946. There are at least 14 manufacturers, and demand is outrunning production. About 325,000 radios are produced annually.

(3) USSR is reported producing about 1,000,000 receivers this year, bringing total in use to more than 3,000,000. (Russian embassy in Canada recently bought 3 Admiral color sets for \$2760, plans to exhibit them in Moscow.)

(4) Philippines' 1958 TV production target is 2500 units vs. 1800 in 1957. Radio output for next year is projected to 35,000 vs. 23,000 this year. TV imports dropped from 768 in 1955 to 487 in 1956, radio from 17,944 to 5606. Most components are imported.

(5) Colombian TV market is said to be sharply curtailed because of peso devaluation, with some 10,000 of the 22,560 sets imported in 1956 in inventory. Domestic TV production started this year, Bogota firm assembling 200. Radio production this year is estimated at 80,000-140,000—down 25-30% from 1956.

(6) Syrian radio imports, mostly from Netherlands, rose from 34,340 in 1955 to 41,686 in 1956. Sets-in-use total about 300,000, served by 2 stations.

(7) Egypt cut radio imports drastically—from 118,935 in 1955 to 58,200 in 1956, 2400 in first half of 1957—to conserve foreign exchange. Netherlands is major source, and sets-in-use figure is put at 720,000.

EIA Radio Report: Shipment of radio sets to dealers totaled 6,830,249 through Oct., when production was 7,583,443, retail sales were 6,764,221—excluding auto. In first 10 months of 1956 shipments were 6,080,825, production 7,276,749, retail sales 5,990,718. Oct. shipments were 985,969 vs. 1,056,274 in Sept. & 754,005 in Oct. 1956. Here's EIA 10-mo. shipment report (county-by-county tables available to EIA members):

State	Total	State	Total
Alabama	80,616	Nevada	9,524
Arizona	32,898	New Hampshire	22,979
Arkansas	35,697	New Jersey	277,539
California	518,598	New Mexico	20,499
Colorado	45,852	New York	1,065,593
Connecticut	96,573	North Carolina	101,350
Delaware	12,329	North Dakota	16,312
District of Columbia	63,378	Ohio	394,527
Florida	155,291	Oklahoma	65,653
Georgia	125,344	Oregon	56,441
Idaho	15,747	Pennsylvania	531,717
Illinois	584,925	Rhode Island	40,432
Indiana	124,455	South Carolina	42,223
Iowa	76,739	South Dakota	16,029
Kansas	56,114	Tennessee	89,814
Kentucky	97,323	Texas	304,335
Louisiana	101,720	Utah	23,789
Maine	38,087	Vermont	15,275
Maryland	130,531	Virginia	105,326
Massachusetts	249,405	Washington	92,718
Michigan	293,249	West Virginia	52,579
Minnesota	105,978	Wisconsin	146,953
Mississippi	40,229	Wyoming	7,888
Missouri	175,204		
Montana	18,492		
Nebraska	39,058		
		GRAND TOTAL	6,830,249

Litton Industries' proposed acquisition of Aircraft Radio Corp. (Vol. 13:42, 51) has been endorsed by ARC management and 4 directors, while 2 other directors opposed on grounds they believe stock exchange would reduce preferred stockholders' equity. Proposal is to be submitted to Cal. Corporation Commission and if approved it will be voted on by ARC stockholders; Litton stockholders have already given approval.

DISTRIBUTOR NOTES: Graybar elects as directors: J. E. Carroll, Allegheny district mgr., and G. L. Call, central Pacific district mgr.; transfers C. E. Kirkpatrick to Chicago as central district mgr. from Erie district mgr. at Cleveland . . . Sylvania appoints The Shield Co. for Ft. Worth & Dallas, replacing Straus-Frank . . . Raymond Rosen, Philadelphia (RCA), names Jack Kelley, ex-Philo Distributors, to "special assignments."

Freight rate increase of 3% is asked for in petition by major railroads to Interstate Commerce Commission this week. Categories of goods affected include TV & radio sets, heavy broadcasting equipment—as well as other appliances and hard goods. (Furniture is in 5%-increase bracket.) With certain exceptions (between N.Y. & Philadelphia, for instance), increased rates will apply to all longer distance (Chicago to or from either coast, for example). Also requested are hikes in pickup and/or delivery of less-than-carload shipments, in-transit stopping for loading or unloading, COD service. All-commodity rates, in-line haul rates won't be changed. Hikes are sought to be effective Feb. 1. Oral argument will be heard Jan. 29.

Philco's improvement in 1957—to sales of more than \$360,000,000, per-share earnings of more than \$1 vs. 1956 net of less than 1¢ per share—is analyzed by company officials in Dec. 24 *Wall St. Journal* interview. Pres. James M. Skinner Jr. noted: (1) Low inventory in 1957 3rd quarter, "therefore we made money on every set," with similar results in radio-hi-fi. (2) "Significant profits" in tubes & transistors. "We've had a far better cost picture [and] we've done a fairly good job of inventory control." John M. Otter, merchandising exec. v.p., said TV has been "good for us since June," saw nothing to slow it up.

Hi-fi promotion gets double test in Chicago Jan. 2 when Sol Polk kicks off 6-week, 6-store, city-wide "Polk Bros. Spectacular Hi-Fi Show." Ten manufacturers who will pick up all or most of tab will learn whether single huge dealer can boost area-wide hi-fi business and whether heavy promotion can sell hi-fi "off season." Polk will use 850 billboards, advertise in entertainment sections of papers, mail tickets to half million customers, expand hi-fi depts. in all units, tie in 2 major jazz-circuit restaurants with "hi-fi cocktails" and a major ice cream maker with "hi-fi sundae."

TV set sales in Canada declined in 1957 to estimated 470,000 sets, according to J. Herbert Smith, recently elected pres. of Canadian GE, who expects 1958 to hold at about same level. He said that radio continued high, should hit 700,000 units this year due to low-cost portables in color, clock radios and transistor set demand; that Canadian appliance firms are increasingly concerned over U. S. exports across border, blaming situation on "mass overproduction in the U. S. together with the interpretation of what constitutes 'fair' market value."

Admiral filed sweeping denial and asks dismissal of FTC charges (Vol. 13:47) that company's advertising of TV sets leads public to believe picture tube sizes represent horizontal rather than diagonal measurements; that its ads do not make this clear; that public is deceived and there is unfair competition.

FTC consent order, approved this week, prohibits Sunset House Distributing Corp., 792 Sunset Blvd., Hollywood, Cal., from misrepresenting that its "Color Filter" plastic adapter will produce same effect as color TV (Vol. 13:27).

Great Britain's TV set licenses totaled 7,524,071 Oct. 31, an increase of 125,886 from Sept. 30. Radio-only was 7,153,541.

GE—Review & Preview: Spokesmen for 3 GE departments this week issued wrap-up statements on the 1957 year and predictions for 1958. Fact & opinion came from Syracuse & Owensboro on both home and industrial electronics:

(1) TV set inventories are excessive at 1957 year end, said Jack S. Beldon, TV receiver marketing mgr., but not as bad as last year. "GE [is in] better inventory position than the industry," he said. Industry TV sales in 1958 will be slightly behind this year. GE will go easy on color, seeing no great consumer rush for present sets, will continue work on own color techniques.

(2) Hi-fi will continue boom as component makers work on pickup cartridges for stereo records, said L. Berkley Davis, electronics components div. gen. mgr. With records already being produced in stereo, and compatibility—records or tape—a feature of most other stereo sound components, cartridge is major bottleneck in stereo record growth.

Unit sales of transistors, Davis predicted, will increase 75% to 48,000,000 worth \$105,000,000, with home entertainment taking 2/3 of units and 1/3 of dollars; transistor versions of home portable radios will double in 1958; transistor car radios will go up 75% as 3/4 of all sets use some transistors, though the all-transistor car radio won't be a substantial market until 1959. Transistors for TV will be rather small market due to costs. Total semiconductor market will be up 35% to \$200,000,000. Receiving tubes will increase 7% to \$420,000,000, as entertainment types hold even with this year and military & industrial types increase. Picture tubes will hit 13,700,000 in factory sales worth \$260,000,000, half for replacement.

Industrial & military CR tubes will use transparent phosphors more extensively and trend to higher resolution, post acceleration and deflection devices will be stronger.

(3) Closed-circuit TV will double 1957's \$6,000,000 business in 1958, according to Wm. J. Morlock, technical products dept. gen. mgr., as GE diversification aims at larger share of that business. Further diversification has led to stronger interest in scatter communications, high-frequency heating devices and slow-scan TV. Morlock, who had previously predicted televised phone calls within 5 years, now sees first practical step taken in 1958 with a military installation next spring. GE's work in scatter communications has increased its distance goal from present 200-250 mi. to 600-700. Although scatter system is mainly military, Morlock believes it to be first step in practical transoceanic commercial TV broadcasting.

Regional TV set sales from electrical assns.: Chicago—Distributor sales of black-&-white for Nov. were 24,267 vs. 30,811 last year . . . Kansas City—Nov. sales hit 7811 vs. 10,108; Nov. color sales were 223 for total to date of 2828 . . . Philadelphia—Distributors in Nov. sold 16,553 sets vs. 20,726 last year; for 11 months, set sales totaled 145,765 vs. 172,742 last year.

Tax status on rebuilding picture tubes has been clarified by IRS which holds that excise tax is due if tube is opened for recoating screen or replacing gun, exempt if tube is restored without opening tube. It also held that rebuilders' wholesale price must include amount allowed for used tube accepted in exchange.

Accent on sound in TV merchandising trend continues (Vol. 13:48) as Olympic adds "high fidelity TV with 3-D" in two 1958 drop-in consoles: 21-in. at \$309; 24-in. at \$279, both with new horizontal chassis and "3-D control" in 3-speaker system.

Electronic refrigerator is much further along in Japan than in either Russia or U. S., according to Dec. 23 *Electronic Week* review of Japanese electronic progress and exports to U. S. (Vol. 13:45). It reports that under Prof. Suga of Tokyo U, one company is on threshold of introduction of industrial model.

New magazine, capitalizing on popular interest in electronics, TV-radio-hi-fi, is bi-monthly *Electronics Illustrated*, edited by Charles Tepfer, ex-technical editor of *Popular Electronics*. First issue (May) is due on newsstands March 13 at 25¢.

Single RCA Victor 45rpm records have been increased from 89¢ to 98¢ effective Jan. 1. Move follows \$1 raise in Red Seal LP line from \$3.98 to \$4.98.

Sales aide for dealers and technicians is provided in 24-page booklet, *Profit Builders*, available from RCA electron tube div., Harrison, N. J.

New booster offered by Blonder-Tongue is designed to couple 1, 2, or 3 sets to same antenna.

EIA reports \$926,000,000 defense electronics spending in quarter ended Sept. 30 vs. \$637,000,000 in 1956 period. Breakdown for the 2 quarters: Aircraft, \$340,000,000 in 1957 to \$213,000,000 in 1956; missiles, \$273,000,000 & \$205,000,000; electronics and communications, \$24,000,000 & \$130,000,000; research & development, \$73,000,000 & \$65,000,000; ships-harbor craft, \$23,000,000 & \$17,000,000; miscellaneous, \$11,000,000 & \$5,000,000; combat vehicles, \$1,000,000 & \$2,000,000; support vehicles, \$1,000,000 & no 1956 figure.

GE communications products dept. opens regional offices at Richmond, Va. under H. L. Blom, St. Louis under M. S. Chapin, Minneapolis under W. G. Pree, and 23 district offices. Walter E. Sutter is promoted to mgr. of microwave equipment sales; Kent Worthen to mgr. of product planning-microwave; L. R. Sheeley, mgr. of sales, mobile equipment; R. L. Casselberry, mgr. of product planning, mobile, and marketing research.

Insul-8-Corp. sets up closed-circuit TV development and production div. at San Carlos, Cal. under gen. mgr. & chief engineer Bruce J. Scievers. It has 41 employes, plans expansion into production of additional electronic devices.

Thompson-Ramo-Wooldridge Products Inc., a subsidiary of Thompson Products Inc. and Ramo-Wooldridge Corp., has been formed to make industrial process control instruments—first an electronic computer for process control.

Zenith hearing aid div. names Bausch & Lomb Optical Co. as its distributor in foreign markets, under supervision of export mgr. S. W. Steensma.

Second National Conference on Automation Systems is scheduled for Jan. 22-24 at Arizona State College, Tempe, under EIA auspices.

Bound and Indexed

We will index and bind, between embossed hard book covers, a limited quantity of all 1957 issues of the Television Digest Weekly Newsletters, plus the semi-annual TV Factbooks with all Addenda, plus all Supplements and Special Reports. This volume will provide a handy and handsome permanent reference for your own or your company library. Orders will be taken until Jan. 7. Price: \$25 per volume.

Do You Know That . . .

Quite a few former FBI agents, most of them graduates of J. Edgar Hoover's famed academy at Quantico for training tough young men, usually athletes, for the exciting job of crime-hunting, and nearly all holders of law or accountancy degrees, are to be found in many TV-radio broadcasting and associated pursuits?

There's FCC Comr. Robert E. Lee, of course, and Jack E. Buckley, chief of the FCC common carrier N. Y. field office; also still in govt. service, with U. S. Information Agency, which operates Voice of America, are Adelbert R. Baker, Paul J. McNichol, Joseph C. Walsh.

Practicing law in Washington, specializing in TV-radio, are Edward P. Morgan, of Welch, Mott & Morgan, and Robert L. Heald, ex-NARTB chief counsel, now with Spearman & Roberson. Chief counsel of Music Corp. of America is Robert E. Bramson, and, on NBC legal staff, also in New York, there's Edward T. Burns. Also practicing law is Melvin H. Purvis, of Florence, S. C., famed for helping bring Dillinger to bay; he owns radio WOLS, Florence.

In broadcasting, generally in top administrative posts, are Norman B. Bagwell, WKY, Oklahoma City, where his former FBI colleague Hoyt T. Andres, then newly transferred from WSFA-TV, Montgomery, Ala., to manage WKY-TV, died last summer; Wade H. Alley, WHIO, Dayton; Joseph W. Evans, KFJZ-TV, Ft. Worth; Arthur E. Haley, WORL, Boston; James W. Coan & John G. Johnson, WTOB, Winston-Salem; Philippe V. Moore, WINZ, Miami; Lamont L. Thompson, WHCT, Hartford.

Among station reps with distinguished FBI records are Frank R. Headley, pres., H-R Television Inc.; Edward R. Kenefick, with George P. Hollingbery Co.; Theodore Van Erk, The Bolling Co. Inc. And at the agencies are J. Lewis Ames, Erwin Wasey, Ruthrauff & Ryan; Carl I. Cartwright, J. Walter Thompson; Wm. F. Geeslin, Young & Rubicam; Howard O. Anderson, Ted Bates & Co.

With Westinghouse stations headquarters in N. Y. is Paul C. O'Friel, and electing to become commentators are Ron V. Cochran, CBS, and Howard D. Smoot, Dallas free-lance. Robert M. Dore, TV-radio agent in N. Y., is also ex-FBI, as are Joseph Wohl, Republic Pictures; Blayne F. Matthews, Warner Bros.; Alfred B. Berry, RKO.

In other branches of communications and electronics fields are still more FBI "alumni"; we'll list them for you in a later column.

French TV & radio were blacked out over Christmas holiday by nationwide technicians' strike. Among shows cancelled were several specially prepared Yuletide programs.

New European headquarters of A. C. Nielsen Co. Ltd. has opened at Oxford, England. British market research firm, started in 1939, employs 900.

Add ad tax gimmicks: Virginia's 0.3% retail merchants sales tax would be extended to include TV, radio & newspaper advertising under new revenue-raising plan by Norfolk Mayor W. Fred Duckworth. Pointing out that media now get off "scot free" from licensing or sales levies assessed against other businesses, he wants state legislature to remove exemption when it meets in mid-Jan. Proposal doesn't follow pattern of special 6% taxes on all advertising enacted by Baltimore City Council and threatened in St. Louis (Vol. 13:45-51). But Duckworth's move will be fought by Advertising Federation of America, whose pres. & gen. mgr. C. James Proud told us this week: "We have to sympathize with him, but we have to oppose any tax on advertising on principle." General sales taxes now apply to advertising in half-dozen states and Hawaii.

TV-ASCAP 4-Year Pact: Beating Dec. 31 contract deadline, closing of negotiations for new TV licensing agreements between ASCAP and networks & stations seemed certain in N. Y. this week. CBS, NBC & ABC have accepted 4-year renewal terms (2.5% of time sales plus 110% of highest 30-min. monthly rate) offered by ASCAP. Polled by wire Dec. 24 by broadcasters' contract committee headed by Irving Rosenhaus of WATV, Newark-N. Y., 250 stations it represents were voting overwhelmingly to continue same ASCAP fees (2.05% of gross plus highest 15-min. monthly rate) another 4 years. ASCAP, which has been collecting around \$10,000,000 annually from TV, had conditioned renewal offer on acceptance by "substantial majority" of licensed stations. Radio-ASCAP licensing agreements run to Dec. 31, 1958.

Infrared TV: Air Force last week received patent for infrared TV camera, invented by David A. Huffman of Cambridge, Mass. on basis of his research at Ohio State U Research Foundation. Presumably, Air Force device would be companion to such infrared military devices as snooperscope and sniperscope, both of which use invisible infrared rays instead of light. Japanese scientists have been working for about a year with a TV system called "noctovision," developed for Broadcasting Corp. of Japan (NHK), which also uses infrared.

Commercial TV network competitive to the semi-commercial state-controlled chains has been authorized by West German Govt. New Freies Fernseh, with headquarters in Frankfurt, plans to start telecasting in about 18 months, though it hasn't yet decided on location of stations. New private outfit plans to take spots between shows, but no sponsorships as such. Present German networks devote small amount of time to commercials.

RCA awards 9 fellowships for advanced studies in engineering, physics, dramatic arts, bringing total awards to some 120 since started in 1947. This year's recipients will study at New York U, Columbia U, Cal. Institute of Technology, Cornell U, U of Ill., Princeton U, Rutgers U, Carnegie Institute of Technology, Yale U.

World's TV & radio stations are listed in 1958 edition of *World Radio Television Handbook*. Printed in English, new 12th edition may be ordered from Publisher-Editor O. Lund-Johansen, 1, Lindorffsalle, Hellerup, Denmark (\$2 by surface mail, \$4 airmail).
